Mr. Stanley Segal
c/o Segal & Wenger
138 Central Ave.
Albany, New York 12206

Dear Mr. Segal:

RE: ADDENDUM #1 - PHASE 1 ESA STAR PLAZA SITE

I have reviewed the waste disposal information assimilated by the Guilderland Dry Cleaners organization (GDC) in an attempt to better characterize their historical regulated waste disposal practices. The waste disposal records were prepared by Safety - Kleen Inc., the commercial waste disposal contractor historically retained by GDC's. The waste disposal records obtained to date consist of a monthly summary from January 4, 1989 through October 28, 1996.

Generally, the information assembled identifies a relatively consistent history of tetrachloroethylene disposal; the principal dry cleaning chemical used by the GDC facility. An apparent gap in the waste disposal record has however been identified during the last quarter of 1989. No specific information has been obtained to identify the reason for the lack of waste tetrachloroethylene disposal between August 1989 - January 1990. A review of the disposal record from the period prior to and following August 1989 - January 1990 has not aided in explaining this discrepancy. A more comprehensive assessment of this discrepancy is not possible based on the information provided by Safety Kleen.

Additional information obtained from Mr. Michael Ermides of Star Plaza supports GDC's use of the Safety - Kleen since the early ± 1980's. Mr. Ermides also has represented that the GDC facility has been equipped with a municipal sewer service since ± 1973. Based on the above there appears to be sufficient information that the GDC organization has (over the past 6 years) appropriately managed its waste steam through the use of Safety - Kleen's off site disposal services. It is the opinion of NETC that the site's recent use of tetrachloroethylene should not be expected to represent a significant cause for environmental concern. This opinion is based solely on the site inspection services performed during the 1996 Phase 1 ESA, the use of a municipal sewer system and the site's recent (i.e., 6 year) waste disposal history.

Mr. Stanley Segal
November 29, 1996
Page 2

No opinions are offered or implied with respect to the methods by which the GDC managed its waste prior to 1989, or the environmental significance that this activity may have on the sites present condition. I have attached a copy of GDC's waste disposal records for your consideration. If you have any specific questions regarding this addendum report or the Phase 1 ESA please contact me. As always NETC remains available to assist you and your organization in this and related matters, as necessary.

Sincerely,
Northeastern Environmental Technologies Corporation

Re: Dry Cleaners Waste Report from
Safety-Kleen

Number of pages
including this Cover: 14

Message: Jeff, I just received this fax this morning from Safety-Kleen. As I
mentioned to you earlier it only goes back seven years, however the cleaner's has
been a client of Safety-Kleen since the early 1980's. I called the Town of
Guilderland Water Department and they informed me that Star Plaza and 20 Mall
were connected to the municipal sewer system in the first half of 1973. If I can be
of any further assistance to you please do not hesitate to give me a call. Thank
you.
