

(Fact Sheet Begins Next)

Act Now to Continue Receiving Information About This Site!

DEC's Division of Environmental Remediation (DER) now distributes information about contaminated sites electronically by email.

If you would like to continue to receive information about the contaminated site featured in this fact sheet:

You must sign up for the DER email listserv:

<https://dec.ny.gov/environmental-protection/site-cleanup/regional-remediation-project-information/environmental-cleanup-email-newsletters>

DER cannot register your email address - only the email address owner can do so. If you already have signed up for the listserv for the county in which the site is located, you need do nothing.

Why You Should Go “Paperless”:

- Get site information faster and share it easily;
- Receive information about all sites in a chosen county - read what you want, delete the rest;
- It helps the environment and stretches your tax dollars.

If “paperless” is not an option for you, call or write to the DER project manager identified in this fact sheet. Indicate that you need to receive paper copies of fact sheets through the Postal Service. Include the site name in your correspondence. The option to receive paper is available to individuals only. Groups, organizations, businesses, and government entities are assumed to have email access.

Remedy Proposed for State Superfund Site; Public Comment Period and Public Meeting Announced

Public Meeting, Monday, 04/21/25 at 6:30 PM
Watervliet Senior Center, 1501 Broadway, Watervliet NY, 12189

NYSDEC invites you to a public meeting to discuss the remedy proposed for the site. You are encouraged to provide comments at the meeting, and during the 30-day comment period described in this fact sheet.

DEC will provide interpreter services for hearing impaired persons and language interpreter services for individuals with difficulty understanding or reading English at no charge upon written request submitted no later than 2 weeks prior to meeting date.

The public is invited to comment on a remedy being proposed by the New York State Department of Environmental Conservation (NYSDEC) in consultation with the New York State Department of Health (NYSDOH) to address contamination related to the Admiral Cleaners site ("site") located at 617 19th Street, Watervliet, Albany County. Please see the map for the site location. The estimated cost to implement the remedy is \$3,323,000.

How to Comment: NYSDEC is accepting written comments about the proposed plan, called a Proposed Remedial Action Plan (PRAP) for 30 days, from **April 2** through **May 2, 2025**

- Access the PRAP and other project documents online through the DECinfo Locator:
<https://extapps.dec.ny.gov/data/DecDocs/401075/>. (PRAP will be added to DECInfo Locator)
- Documents also are available at the location(s) identified at left under "Where to Find Information."
- Please submit comments to the NYSDEC project manager listed under Project-Related Questions in the "Who to Contact" area at left.

The site is listed as a Class "2" site in the State Registry of Inactive Hazardous Waste Sites (list of State Superfund sites). A Class 2 site represents a significant threat to public health or the environment; action is required. NYSDEC is proposing the following remedy to address these threats:

Proposed Remedial Action Plan: The remedy proposed for the site includes:

- Excavation and proper off-site disposal of contaminated on-site soils;

STATE SUPERFUND PROGRAM

- Treating contaminated groundwater through in-situ (in place) enhanced biodegradation, which enhances the underground conditions to encourage microorganisms to destroy contaminants;
- Implementing a Site Management Plan (SMP) to assess the performance and effectiveness of the remedy;
- Recording of an Environmental Easement to ensure proper use of the site may be necessary.

NYSDEC developed the proposed remedy after reviewing the detailed investigation of the site and evaluating the remedial options in the "Feasibility Study."

Next Steps: NYSDEC will consider public comments as it finalizes the remedy for the site. The selected remedy will be described in a document called a "Record of Decision" that will explain why the remedy was selected and respond to public comments. A detailed design of the selected remedy will then be prepared, and the cleanup will be performed.

NYSDEC will keep the public informed throughout the investigation and cleanup of the site.

Site Description: The Admiral Cleaners site is a 0.17-acre parcel located at 617 19th Street in the city of Watervliet. The site was used as a dry cleaner from 1950 until 2013. The former on-site single-story brick/concrete block commercial building was demolished in 2020. The remaining slab occupies most of the parcel and a fence surrounds the vacant site.

The site was divided into two operable units. An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate, or mitigate a release, threat of release, or exposure pathway resulting from the site contamination. Operable Unit 01 (OU01) is the on-site source area and surrounding impacted soil and groundwater, as well as off-site soil vapor. Operable Unit 02 (OU02) is off-site soil and groundwater.

OU01 is the subject of this document.

A Record of Decision will be issued for OU02 in the future.

Additional site details, including environmental and health assessment summaries, are available on NYSDEC's Environmental Site Remediation Database (by entering the site ID, 401075) at:

<https://extapps.dec.ny.gov/cfm/extapps/derexternal/in dex.cfm?pageid=3>

Summary of the Investigation: The primary contaminants of concern for OU01 are volatile organic compounds (VOCs) which are present site-wide in soil, groundwater, and soil vapor. The VOCs include chlorinated and petroleum-related VOCs.

The remedial investigation for OU02 is underway.

State Superfund Program: New York's State Superfund Program (SSF) identifies and characterizes suspected inactive hazardous waste disposal sites. Sites that pose a significant threat to public health and/or the environment go through a process of investigation, evaluation, cleanup, and monitoring.

NYSDEC attempts to identify parties responsible for site contamination before committing State funds for investigation and cleanup.

For more information about the SSF, visit:

<https://dec.ny.gov/environmental-protection/site-cleanup/brownfield-and-state-superfund-programs/state-superfund-sites>

We encourage you to share this fact sheet with neighbors and tenants, and/or post this fact sheet in a prominent area of your building for others to see.
