Phoenix Laboratories does not assume responsibility for the data contained in this exceedance report. It is provided as an additional tool to identify requested criteria exceedances. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedance information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory. This report is incomplete unless all pages indicated in the pagination at the bottom of the page are included.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

Enclosed are revised Analysis Report pages. Please replace and discard the original pages. The contents of this report cannot be discussed with anyone other than the client listed above without their written consent.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Phyllis Shiller".

SDG Comments

February 17, 2025

SDG I.D.: GCS23184

Any compound that is not detected above the MDL/LOD is reported as ND on the report and is reported in the electronic deliverables (EDD) as <RL or U at the RL per state and EPA guidance.

Version 1: Analysis results minus raw data.

Version 2: Complete report with raw data.

Phoenix Laboratories does not assume responsibility for the data contained in this exceedance report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory. This report is incomplete unless all pages indicated in the pagination at the bottom of the page are included.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

Enclosed are revised Analysis Report pages. Please replace and discard the original pages. The contents of this report cannot be discussed with anyone other than the client listed above without their written consent.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Phyllis Shiller".

1 = This parameter is not certified by the primary accrediting authority (NY NELAC) for this matrix. NY NELAC does not offer certification for all parameters at this time.

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected BRL=Below Reporting Level L=Biased Low LOD=Limit of Detection MDL=Method Detection Limit1

QA/QC Surrogates: Surrogates are compounds (preceded with a %) added by the lab to determine analysis efficiency. Surrogate results(%) listed in the report are not "detected" compounds.

Comments:

If you are the client above and have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext.200. The contents of this report cannot be discussed with anyone other than the client listed above without their written consent.

Phoenix Laboratories does not assume responsibility for the data contained in this exceedance report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

Phoenix Laboratories does not assume responsibility for the data contained in this exceedance report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

Soil Gas Laboratory Analytical Reports

Tuesday, January 14, 2025

Attn: Todd Rollend
Labella Associates DPC
5 McCrea Hill Rd.,
Ballston Spa, NY 12020

Project ID: NEWTON PLAZA
SDG ID: GCS20037
Sample ID#s: CS20037 - CS20047

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory. This report is incomplete unless all pages indicated in the pagination at the bottom of the page are included.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

Enclosed are revised Analysis Report pages. Please replace and discard the original pages. The contents of this report cannot be discussed with anyone other than the client listed above without their written consent.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Phyllis Shiller".

SDG Comments

January 14, 2025

SDG I.D.: GCS20037

Any compound that is not detected above the MDL/LOD is reported as ND on the report and is reported in the electronic deliverables (EDD) as <RL or U at the RL per state and EPA guidance.

Version 1: Analysis results minus raw data.

Version 2: Complete report with raw data.

Phoenix Laboratories does not assume responsibility for the data contained in this exceedance report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

- USEPA Contract Laboratory Program National Functional Guidance for Organic Superfund Methods Data Review, EPA 542-R-20-005 (January 2020).
- USEPA Contract Laboratory Program National Functional Guidance for Inorganic Superfund Methods Data Review, EPA 542-R-20-006 (January 2020).
- VOA Standard Operation for the Validation of Volatile Data, QA-HWSS-A-004 (March 2022).
- VOA Standard Operation for the Validation of Semivolatile Data, QA-HWSS-A-005 (April 2022).
- Standard Operating Procedure for the Validation of Pesticide Data, QA-HWSS-A-007 (April 2022)
- Standard Operating Procedure for the Validation of ICP-AES Data, QA-HWSS-A-010 (February 2022)
- Sampling, Analysis, And Assessment of Per- and Polyfluoroalkyl Substances (PFAS) (Under NYSDEC's Part 375 Remedial Program) (April 2023)
- Method 8260D Volatile Organic Compounds by Gas Chromatography/Mass Spectrometry, revision 4 (June 2018)
- Method 8270E Semivolatile Organic Compounds by Gas Chromatography/Mass Spectrometry, revision 6 (June 2018)
- Method 8082A Polychlorinated Biphenyls (PCBs) by Gas Chromatography (February 2007)
- Method 8081B, Organochlorine Pesticides by Gas Chromatography (February 2007)

- Method 6010D Inductively Coupled Plasma—Optical Emission Spectrometry, revision 5 (June 2018)
- Method 7471B Mercury in Solid or Semisolid Wastes (Manual Cold-Vapor Technique) (February 2007)
- Method 1633, Analysis of Per- and Polyfluoroalkyl Substances (PFAS) in Aqueous, Solid, Biosolids, and Tissue Samples by LC-MS/MS, EPA 821-R-24-001 (January 2024)
- Standard Operating Procedure for the Validation of ICP-AES Data, QA-HWSS-A-010 (February 2022)
- Standard Methods for the Examination of Water and Wastewater, 24th edition, SM 2540 Solids (2017)
- Professional judgment.

Criteria for Data Usability Summary Report

Completeness:

A complete data package is one that has all relevant and related material packaged for distribution to its client in accordance with the Analytical Service Protocol (ASP) Category B Deliverables guidelines.

Compliant:

A compliant data package is one that is determined to have all work that pertains to the production of the laboratory data in a manner that is consistent with the Quality Assurance Program Plan.

Overall Usability Issues:

Data validation completed in accordance with the New York State Department of Environmental Conservation Analytical Service Protocol (NYSDEC ASP) Category B Data Deliverable requirements and reviewer's professional judgment.

This analytical report complies with the following points:

1. Holding Time and Analysis Time
2. Sample Analysis and Quality Control.

In conclusion, the data reviewed in this report is usable data which meets criteria for compliance with methods 8260D, 8270E, 8081.B, 8082A, 6010D, 7471B and 2540G except for rejected data due to instrument issues as noted in section 8270E. Percent solid method E160.3 was run and all samples are over 30% solid.

Data Completeness

- A complete Category B data package under the NYSDEC ASP has been reported.

Data Validation Acronyms

AA	Atomic Absorption, Flame Technique
BHC	Hexachlorocyclohexane
BFB	Bromofluorobenzene (Tune check analyte)
CCC	Continuing Calibration Check
CCV	Continuing Calibration Verification
CRDL	Contract Required Detection Limit
CRQL	Contract Required Quantitation Limit
CVAA	Atomic Absorption, Cold Vapor
DCAA	2,4-Dichlorophenylacetic acid
DCB	Decachlorobiphenyl
DFTPP	Decafluorotriphenyl phosphine (Tune check analyte)
DL	Detection Limit
ECD	Electron Capture Detector
FAA	Atomic Absorption, Furnace Technique
FID	Flame Ionization Detector
FNP	1-Fluoronaphthalene
GC	Gas Chromatography
GC/MS	Gas Chromatography/ Mass Spectrometry
GPC	Gel Permeation Chromatography
ICB	Initial Calibration Blank
ICP	Inductively Coupled Plasma – Atomic Emission Spectrometer
ICV	Initial Calibration Verification
IDL	Instrument Detection Limit
ICAL	Initial Calibration Curve
IS	Internal Standard
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LCS/LCSD	Laboratory Control Sample/ Laboratory Control Sample Duplicate
MB	Method Blank
MS	Matrix Spike
BNAMS11	Method of Standard Additions
MSD	Matrix Spike Duplicate
MS/MSD	Matrix Spike/ Matrix Spike Duplicate
ND	Non-detected or Not Detected
PID	Photo Ionization Detector

Data Validation Acronyms

PCB	Polychlorinated biphenyl
PCDD	Polychlorinated dibenzodioxins
PCDF	Polychlorinated dibenzofurans
PQL	Practical Quantitation Limit
QA	Quality Assurance
QA/QC	Quality Assurance/ Quality Control
QC	Quality Control
RF	Response Factor
RPD	Relative Percent Difference
RL	Reporting Limit
RRF	Relative Response Factor
RT	Retention Time
RRT	Relative Retention Time
SDG	Sample Delivery Group
SMC	System Monitoring Compounds/ Surrogates
SPCC	Sample Performance Check Compound
TCX	Tetrachloro-m-xylene
%D	Percent Drift
%R	Percent Recovery
%RSD	Percent Relative Standard Deviation

Data Validation Qualifiers

U	The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit.
J	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
J+	The result is an estimated quantity, but the result may bias high.
J-	The result is an estimated quantity, but the result may bias low.
UJ	The analyte was analyzed for but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
R	The data is unusable. The sample results are rejected due to serious deficiencies in meeting Quality Control (QC) criteria. The analyte may or may not be present in the sample.

Note:

1. These qualifiers are used for data validation purposes. The data validation qualifiers may differ from the qualifiers that the laboratory assigns to the data. Refer to the laboratory analytical report for the definitions of the laboratory qualifiers.
2. The EDDs are assigned these data validation qualifiers and refer to the valid value list supplied by the specific agency or informational data system.

Reviewer Summary :

Samples were handled and analyzed properly under USEPA Contract Laboratory Program National Functional Guidance for Super Organic Methods Data and QA-HWSS-A-004 VOA Standard Operation for the Validation of Volatile Data.

- Within initial calibration of instrument CHEM 26, Acetone was above laboratory criteria for %RSD but was not detected within associated samples, thus no qualification is needed.
- Within continuous calibration of instrument CHEM 14 analytes Chloroethane, Trichlorofluoromethane and Methyl t-Butyl Ether %deviations (%D) were above laboratory criteria leading to qualification of non-detect estimates "UJ" within associated samples.
- Within matrix samples several analytes recoveries were above laboratory criteria, but no analytes were detected within associated sample SB-1/MW-1 6-7' . No further qualification is needed.
- Acetone was detected in blind duplicate sample set SB-2/MW-2 6.5-8' and DUPE with %RPD less than 50%.
- Tentative identified compound was detected but raw data was not presented thus evaluation of procedure cannot be made. Analyte detected in sample (CR45186) is an estimate value, no further qualification is needed.

Data was qualified within category B criterion and is usable.

Job ID: GCR45184

8260D

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Technical Hold Time of 7 days not preserved or 14 days preserved (pH<2)?	x			
Cooling Temp $\geq 6^{\circ}\text{C}$?	x			
B. GC/MS Instrument Performance Check				
Were BFB performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period?	x			
C. Initial Calibration				
Was a 5-point calibration run?	x			Within initial calibration of instrument CHEM 26, Acetone was above laboratory criteria for %RSD but was not detected within associated samples, thus no qualification is needed.
Was RSD% with in criteria for each target analyte? Was RRF within criteria?		x		
Was curve fit used for evaluation? If yes, did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was the Initial Calibration Verification (ICV) done after the I.C., were (%D) (%R) within criteria?	x			

Criteria	Y	N	NA	Comment
D. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?	x			Within continuous calibration of instrument CHEM 14 analytes Chloroethane, Trichlorofluoromethane and Methyl t-Butyl Ether %deviations (%D) were above laboratory criteria leading to qualification of non-detect estimates "UJ" values within associated samples. See attachment.
Were (%D) $\leq$ limit and relative response factors (RRF) within criteria?		x		
E. Laboratory Blanks				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 12 hours?	x			
Were contamination found, if so qualification may be necessary?		x		
Subsection : Field Blanks				TRIP BLANK LL and TRIP BLAN HL 50X
Was a field blank associated with each sample of SDG?	x			
Were target compounds detected in it?		x		
F. Surrogate Spikes				
Were surrogate percent recovery (%R) within QC limits?	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
G. Matrix Spike/Matrix Duplicate				SB-1 / MW-1 6-7' MS/MSD
Were MS and MSD analyzed for SDG?	x			Several analytes recoveries were above laboratory criteria, but no analytes were detected within associated sample SB-1/MW-1 6-7' . No further qualification is needed.
Was MS/MSD done every 20 samples?	x			
Were MS/MSD (%R) and RPD within QC?		x		

Criteria	Y	N	NA	Comment
H. Field Duplicate				SB-2/MW-2 6.5-8' and DUPE
Were field duplicates identified in this SGD?	x			Acetone was detected in both field duplicate samples, SB-2/MW-2 6.5-8' and DUPE with %RPD less than 50%. See attachment.
Were target compounds detected in it? Were RPDs less than 50%?	x			
subsection: Internal Compounds				
Were counts within 50% to 200% of associated calibration standard?	x			
Were retention times within ± 10 sec of cal. standard?	x			
I. Target Analyte Identification				
Mass spectral ion abundance criteria specified for target analyte?	x			
Target analyte RRT outside specified RRT window?	x			
If sample is considered "Solid", is it greater than 30%?	x			
Did the spectrum meet EPA "Functional Guidelines"?	x			
J. Tentative Analyte Identification				
Were analyte results greater than 85% library match?	x			Raw data was not presented thus evaluation of procedure cannot be made. Analyte detected in sample (CR45186) is an estimate "J" value, no further qualification is needed.
Were National Functional Guidelines followed for TIC processing?			x	
K. Regional EPA QA/QC				
Were regional protocol of QA/AC protocols used in evaluation data?	x			
L. Overall Assessment of Data				
Was overall assessment of data found to be acceptable?	x			

Comments: Qualification due to failure in laboratory criteria within continuous calibration. All data is usable.

Reviewer Summary :

Samples were handled and analyzed properly under USEPA Contract Laboratory Program National Functional Guidance for Super Organic Methods Data and QA-HWSS-A-004 VOA Standard Operation for the Validation of Volatile Data.

- Within initial calibration , %RSD did not meet criteria for analyte 1,2-Dibromo-3-Chloropropane, but was not detected within sample. No further qualification is need.
- Carbon Disulfide was detected within EQUIPMENT BLANK but not within any other samples collected on that day. No further qualification needed.

Data was qualified within category B criterion and is usable.

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Technical Hold Time of 7 days not preserved or 14 days preserved (pH<2)?	x			
Cooling Temp $\geq 6^{\circ}\text{C}$?	x			
B. GC/MS Instrument Performance Check				
Were BFB performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period?	x			
C. Initial Calibration				
Was a 5-point calibration run?	x			Within initial calibration , %RSD did not meet criteria for analyte 1,2-Dibromo-3-Chloropropane, but was not detected within sample. No further qualification is need.
Was RSD% with in criteria for each target analyte? Was RRF within criteria?		x		
Was curve fit used for evaluation? If yes, did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was the Initial Calibration Verification (ICV) done after the I.C., were (%D) (%R) within criteria?	x			

Criteria	Y	N	NA	Comment
D. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?	x			
Were (%D) $\leq$ limit and relative response factors (RRF) within criteria?	x			
E. Laboratory Blanks				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 12 hours?	x			
Were contamination found, if so qualification may be necessary?		x		
Subsection : Field Blanks				EQUIPMENT BLANK
Was a field blank associated with each sample of SDG?	x			Carbon Disulfide was detected within blank but not within any other samples collected on that day. No further qualification needed.
Were target compounds detected in it?	x			
F. Surrogate Spikes				
Were surrogate percent recovery (%R) within QC limits?	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
G. Matrix Spike/Matrix Duplicate				
Were MS and MSD analyzed for SDG?		x		
Was MS/MSD done every 20 samples?			x	
Were MS/MSD (%R) and RPD within QC?			x	

Criteria	Y	N	NA	Comment
H. Field Duplicate				
Were field duplicates identified in this SGD?		X		
Were target compounds detected in it? Were RSPs less than 50%?			X	
subsection: Internal Compounds				
Were counts within 50% to 200% of associated calibration standard?	X			
Were retention times within ± 10 sec of cal. standard?	X			
I. Target Analyte Identification				
Mass spectral ion abundance criteria specified for target analyte?	X			
Target analyte RRT outside specified RRT window?	X			
If sample is considered "Solid", is it greater than 30%?			X	
Did the spectrum meet EPA "Functional Guidelines"?	X			
J. Tentative Analyte Identification				
Were analyte results greater than 85% library match?			X	
Were National Functional Guidelines followed for TIC processing?			X	
K. Regional EPA QA/QC				
Were regional protocol of QA/AC protocols used in evaluation data?	X			
L. Overall Assessment of Data				
Was overall assessment of data found to be acceptable?	X			

Comments: All data is usable.

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 protocol Standard Operating Procedure for Validation of Semivolatile Data, QA-HWSS-A-005 along with the EPA's National Functional Guideline for Organic Compounds.

- Within ICV of instrument CHEM19 compound Hexachlorocyclopentadiene was not within recommended RRF but did reach minimum RRF value, thus no qualification is needed.
- Several analytes did not meet %D criteria within associated CCVs led to qualification of non-detect estimate "UJ" values within all samples.
- Hexachlorocyclopentadiene was not within acceptable recovery within matrix spike but was qualified as reject by laboratory control sample, no further qualification needed.
- Hexachlorocyclopentadiene is qualified as rejected "R" values within samples due to recovery below laboratory limits within laboratory control sample duplicate CR45185 LCSD.

Data is qualified within category B criterion and is usable, except for the data qualified as rejected.

FORM III SV

Reviewer Comment: Due to recovery below laboratory limit for Hexachlorocyclopentadiene within laboratory control sample, several analytes are qualified as rejected "UJ" value for within sample. Qualification of several analytes as non-detect estimate "UJ" values is due to %D results above laboratory limit within associated CCV.

Reviewer Comment: Due to recovery below laboratory limit for Hexachlorocyclopentadiene within laboratory control sample, several analytes are qualified as rejected "UJ" value for within sample. Qualification of several analytes as non-detect estimate "UJ" values is due to %D results above laboratory limit within associated CCV.

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 protocol Standard Operating Procedure for Validation of Polychlorinated Biphenyl (PCB) Aroclor Data, SOP#QA-HWSS-A-006.

- It is noted by reviewer that QA/QC samples laboratory blanks, laboratory control samples and matrix samples were all conducted on instrument ECD08 while samples were analyzed on ECD29. Samples are evaluated based on data collected on instrument such as surrogates, initial and continuing calibrations. If analytes were detected, they would be qualified as estimate "J" values. QA/QC samples were run on ECD48, thus all normal qualification occurred on associated samples.

- ECD48 had a failure in within CCVs, it was not over 25% as stated in SOP. No further qualification needed. ECD29 failures within files 822A036 and 822A036 led to qualification of Aroclor 1260 as non-detect estimate "UJ" value in sample CR45187.

All data is within category B criterion and usable.

8082A PCB

Criteria	Y	N	NA	Comment
A. Sample Receipt				
With in technical hold time and extraction period?	x			
Cooling Temp = >6 °C	x			
B. Initial Calibration				
Was a 5 point calibration?	x			
RSD% for CF are within verification perimeter?	x			
Verified RT window. CFs and RSD are calculated and within bounds?	x			
C. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?	x			ECD48 had a failure in within CCVs, it was not over 25% as stated in SOP. No further qualification needed. ECD29 failures within files 822A036 and 822A036 led to qualification of Aroclor 1260 as non-detect estimate "UJ" value in sample CR45187. See attachment.
Were (%D) and relative respond factors (RRF) within bounds of CCV.	x			
Were the RTs of each target and surrogate in Arcelor standard (C3) and within RT window?	x			
D. Laboratory/Field Blanks				
Was a lab blank associated with each sample of SDG?		x		Samples run on instrument EDC29 had no blank run on the instrument, no analytes are detected in any associated samples. No further qualification needed. Blanks associated with ECD48 were within laboratory criteria.
Was blank analyzed every 20 samples?	x			
Were sulfur blanks run if needed?		x		
Were contamination found, if so qualification may be necessary.		x		

Criteria	Y	N	NA	Comment
E. Surrogate Spikes				
Were Surrogate percent recovery (%R) within QC limits?	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
F. Matrix Spike/Matrix Duplicate				
Were MS and MSD analyzed for SDG?	x			Matrix samples were not evaluated on ECD29 thus no qualification will be made based on this data. Matrix sample associated with ECD48 were within laboratory criteria.
Were MS/MSD (%R) and RPD within QC?	x			
G. Laboratory Control Sample				
Was LCS analysis for this SDG?	x			Laboratory control samples were not evaluated on ECD29 thus no qualification will be made based on this data. Laboratory control sample associated with ECD48 were within laboratory criteria.
Was LCS (%R) QC Limits?	x			
H. Target Analyte Identification				
Were relative retention times (RRTs) within ± 0.05 units of standard?	x			
Did the spectrum meet EPA "Functional Guidelines"?	x			
Were chromatograms peaks verified and accounted?	x			
I. GC/MS Confirmation				
GC/MS was performed at least one peak concentration ≥ 10 ng/ μ L.	x			
J. Target Analyte Quantitation and Reported CRQL				
Were target analyte and sample specific CRQL calculated correctly?	x			

Criteria	Y	N	NA	Comment
K. Field Duplicates				SB-2 / MW-2 6.5-8'and DUPE
Were Field Duplicated identified within sample package?	x			No analytes were detected within field duplicate samples.
Was RPD less than 50%?				
L. EPA Regional QA/QC				
Were QA/QC performed under regional criterion?	x			
Were field duplicates collected?	x			
M. Overall Assessment of Data				
Was Overall assessment of data found to be acceptable?	x			

Comments: Continuous calibration failure led to qualification of sample. All results are within Cat. B criterion and usable.

CR45187	DUPE	8/20/2024	Soil

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 Standard Operating Procedure for Validation of Pesticides Data, QA-HWSS-A_007.

- It is noted by reviewer that QA/QC samples laboratory blanks, laboratory control samples and matrix samples were all conducted on instrument EDD 33 while samples were analyzed on ECD4. Samples are evaluated based on data collected on instrument such as surrogates, initial and continuing calibrations. Detected analytes will be qualified as estimate "J" values.
- Within Continues Calibrations, several analytes were above laboratory limits of the CCVs of instrument ECD04 associated with the SDG GCR45184 in which all the samples were analyzed. All sample will have these analytes qualified as a non-detect estimate "UJ" values.
- Duplicate pair SB-2/MW-2 6.5-8' and DUPE samples results are within acceptable limits of comparison except for a-Chlorodane and Chlorodane which RPD which were over 50%.

All data is within category B criterion and usable.

Method 8081B Pesticides

Criteria	Y	N	NA	Comment
A. Sample Receipt				
With in technical hold time and extraction period?	x			
Cooling Temp = >6°C	x			
B. GC/ECD Instrument Performance Check				
Were Resolution Check Mixture (RESC) run and resolution criteria?	x			
Was PEM analysis performed within criteria for compound?	x			
Were Mid-point individual standard mixture performed and %resolution with in criteria?	x			
C. Initial Calibration				
Was the 5 point calibration with all mixtures and concentration run under criteria?	x			
Was a single point of Toxaphene at low standard in ICAL or five point Toxaphene independent runs?	x			
Were %RSD lower than criteria?	x			
D. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?	x			Several analytes were above laboratory limits of the CCVs of instrument ECD04 associated with the SDG GCR45184 in which all the samples were analyzed. All sample will have these analytes qualified as a non-detect estimate "UJ" values. Please see attachment.
Were (%D), relative respond factors (RRF) and RT within criteria?		x		
Time elapse between CCV, Instrumental Blank, CCV PEM, CS3 did not exceed 14 hrs.?	x			
PEM % breakdown did not exceed criteria?	x			

Criteria	Y	N	NA	Comment
E. Blanks				
Was a lab blank associated with each sample of SDG?	x			While blanks were present they were analyzed on a different instrument than samples thus all detection will be qualified as estimate "J" values with in all samples.
Were sulfur blanks run if needed?		x		
Were TCLP/ SPL Leachate Extractions Blanks (LEB) prepared and extracted at specific frequency?		x		
Were contaminants found, if so qualification may be necessary?		x		
F. Surrogate spikes				
Did Spike contain two surrogates (TCX and DCM) ran in all sample including blanks and standards?	x			
Were Surrogate percent recovery (%R) with in QC limits? (30-150%)	x			
Were RT of Surrogates calculated for each sample?	x			
G. Matrix Spike/Matrix duplicate				
Were MS and MSD analyzed for SDG or matrix?	x			While matrix samples were run, they were run a different instrument than samples thus no qualification will be made on this data.
Was MS/MSD done at specific frequency required by criteria?	x			
Were MS/MSD (%R) and RPD within QC?	x			
H. Laboratory control sample				
Was LCS analysis for this SDG and at specific frequency as required criteria?	x			While laboratory control samples were run, they were run a different instrument than samples thus no qualification will be made on this data.
Was LCS (%R) within QC Limits?	x			
I. Field Duplicates				SB-2 / MW-2 6.5-8' and DUPE
Were field duplicates collected?	x			Duplicate pair SB-2/MW-2 6.5-8' and DUPE samples results are within acceptable limits of comparison except for a-Chlorodane and Chlorodane which RPD which were over 50%. See attachment.
Were %RPD < 50% for observed analytes?				

Criteria	Y	N	NA	Comment
J. Florisil Cartridge Performance Check				
Were %R within specification.	x			
K. Target Analyte Identification				
RTs of surrogates and reported targets analytes are within calculated window?	x			
%D of target analytes and Toxaphene are calculated to less than 25%?	x			
All cosmographical observation are within QC criteria?	x			
L. GC/MS Confirmation				
GC/MS confirmation is done to specific criteria of both column for single compound concentration ≥ 5 ng/ μ and for Toxaphene concentration of ≥ 125 ng/ μ L?	x			
M. Target Analyte Quantitation and Reported CRQL				
Were target analyte and sample specific CRQL and CF are calculated correctly?	x			
N. EPA Regional QA/QC				
Were QA/QC performed under regional criterion	x			
Were field duplicates collected?		x		
O. Overall assessment of data				
Was Overall assessment of data found to be acceptable?	x			

Comments: Due to action above criteria limits of continuous calibration qualification is needed. Qualification also due to lack of QA/QC data from sample associated instrument. All results are within Cat. B criterion and usable.

Both channels need to have the compound detected for a concentration to be reported on either channel.

U1=Due to matrix interference and/or the presence of a large amount of non-target material, the reporting level for this compound has been elevated.

U2=The presence of this compound was not confirmed by the analyst based on the characteristic pattern matching of multi-component parameters, retention time, and/or peak shape.

P/C: P=Primary Result C=Confirmation Result X=Not Used CF=Calculated Calibration/Response Factor MC=Multi-Component

Reviewer Comment: Qualification analytes as non-detect estimate “UJ” values is due to %D results above laboratory limit within associated CCV. Qualification of detected analytes is due to lack of QA/QC data from analytical instrument ECD04.

CR45186	SB-2/MW-2 6.5-8'	8/20/2024	Soil
CR45187	DUPE	8/20/2024	Soil

Reviewer Summary :

Samples were handled and analyzed properly under SOP#QA-HWSS-A-010.

- It is noted the CRDL was not within recover limits of Mercury but was not detected within any samples, no further qualification is needed.

- Duplicate pair SB-2/MW-2 6.5-8' and DUPE samples results are within acceptable %RPD except for Lead which led to qualification within both sample as estimate "J" value.

Data is within category B criterion and is usable.

Client: Labella Associates DPC

Laboratory: Phoenix Environmental Laboratories, INC (NELAP #NY11301)

Site: Newton Plaza Associates, LLC

Job ID: GCR45184

Method 6010D Metals

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Technical Hold Time of aqueous/TCLP/SPLP samples of 180 days preserved with nitric acid (pH>2)?	x			
Technical Hold Time of soil/sediment/wipe samples of 180 days ?	x			
B. Calibration				
Was an initial calibration done when system was set up or after CCV failure?	x			
Were 5 calibration standards and blank run at or below CRQL but above MDL?	x			
Were initial and continuous calibration verification (ICV and CCV) within NFG guidelines of %R (table 3)?	x			
C. Blanks				
Were contaminants found?		x		
Initial Calibration Blank (ICB) was analyzed after standards and run after ICV?	x			
Continuing Calibration Blank (CCB) was ran after every CCV every 2 hrs.	x			

Criteria	Y	N	NA	Comment
D. Laboratory Control Samples				
Was LCS analyzed for every group of aqueous/soil/ sediment /wipes samples in each SDG?(LCS is spiked 2X the CRQL for the associated matrix.)?	x			
Were %Rs within control limit of 70-130%? (Except for Sb and Ag , 50-150%)	x			
E. Matrix Spike/Matrix duplicate				SB-1/MW-1 6-7', CR44950 Mercury
Were MS and MSD analyzed for SGD?	x			
Was MS/MSD done every 20 samples ?	x			
Were MS/MSD (%R) and RPD within QC?	x			
F. Duplicate Samples				Lab: SB-1/MW-1 6-7', CR44950 Mercury Field:SB-2/MW-2 6.5-8' and DUPE
Was at least one duplicate sample run per matrix or SDG?	x			Duplicate pair SB-2/MW-2 6.5-8' and DUPE samples results are within acceptable %RPD except for Lead which led to qualification within both sample as estimate "J" value. See attachment.
Were control limit of 50% Relative Percent Difference between 'original' and duplicate?		x		
Were control limit CRQL of <5X found?	x			
G. Serial Dilution				SB-1/MW-1 6-7
Was ICP serial dilution performed on each sample for each group of the same (aqueous/soil/sediment similar matrix or SDG?	x			
Was %D of original compared to dilution $\leq 10\%$?(%D > 15% may be used for soil)	x			
H. Performance Evaluation Sample				
Were PE samples analyzed with the field samples and field blanks in SDG?	x			

Criteria	Y	N	NA	Comment
Were results within warning limits (95% confidence interval) and action limit (99% confidence interval)	x			
I. Regional EPA QA/QC				
Were regional protocols of QA/QC protocols used in evaluating data?	x			
Did RPD fall within specific limits in EPA region's SOP or project QAPP?	x			
J. Overall Assessment of Data				
Was Overall assessment of data found to be acceptable?	x			

Comments: Qualification is due to failure in comparison of field duplicate samples. All results are within Cat. B criterion and usable

Chromium	7.04	7.49	6.19
Lead	19.2	60.9	104.12

Reviewer comment: Comparing duplicate pair SB-2/MW-2 6.5-8' and DUPE samples results are within acceptable %RPD except for Lead which led to qualification within both sample as estimate "J" value.

Client: Labella Associates DPC

Laboratory: Phoenix Environmental Laboratories, INC (NELAP #NY11301)

Site: Newton Plaza Associates, LLC

Method Review: 8270E SIM, Isotope Dilution

Lab Job ID: GCR45184

Lab ID	Field ID	Collection Date	Matrix
CR45185	SB-1/MW-1 6-7'	10/8/2024	Soil

Reviewer Summary:

Samples were handled and analyzed properly under EPA Region 2 protocol Standard Operating Procedure for Validation of Semivolatile Data, QA-HWSS-A-005 along with the EPA's National Functional Guideline for Organic Compounds.

- Internal standards within sample were below lower limits of laboratory criteria leading to qualification as non-detect estimate "UJ" value.

All data is within category B criterion and usable.

8270E SIM/Isotope Dilutions

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Were samples within technical hold time and extraction period?		X		
Cooling Temp $\leq 6^{\circ}\text{C}$?	X			
B. GC/MS Instrument Performance Check				
Were DFTPP performance results within criteria?	X			
Were all samples analyzed within the 12 hour time period?	X			
Ion abundance criteria met?	X			
C. Initial Calibration				
Was a 5-point calibration conducted?	X			
RSD% within acceptable criterion?	X			
Was curve fit used for evaluation? If yes, did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	X			
Was %D for target analytes within acceptable limit.	X			
Was RRF values meet for target analyte?	X			
Was the Initial Calibration Verification (ICV) done after the I.C.?	X			
D. Continuing Calibration				
Was it done every 12 hours after Initial Calibration to verify it?	X			
Were (%D) and relative response factors (RRF) within acceptable criteria?	X			

Criteria	Y	N	NA	Comment
E. Laboratory Blanks				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 20 samples?	x			
Were contamination found, if so qualification may be necessary?		x		
F. Field Blanks/Trip Blank				
Was a field blanks associated with each sample of SDG?		x		
Were target compounds detected in it?			x	
G. Surrogate Spikes (Isotope Dilution Recovery)				
Were surrogate percent recovery (%R) within QC limits?(1,4-Dioxane-d8)	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
H. Matrix Spike/Matrix Duplicate				SB-1/MW-1 6-7' MS/MSD
Were MS and MSD analyzed for SDG?	x			
Was MS/MSD done every 20 samples ?	x			
Were MS/MSD (%R) and RPD within QC?	x			
I. Laboratory Control Sample				
Was LCS analysis for this SDG?	x			
Was LCS analysis per analysis batch?	x			
Was LCS (%R) within QC Limits?	x			
J. Field Duplicate				
Were field duplicates identified in this SDG?		x		
Were target compounds detected in it?			x	

Criteria	Y	N	NA	Comment
K. Internal Standard				
Was area response within acceptance limits?		X		Internal standards within sample were below lower limits of laboratory criteria leading to qualification as non-detect estimate "UJ" value. See attachment.
Were retention times within ± 30 sec of cal. standard?	X			
L. Compound Quantitation				
Were correct internal standards, quantitation ions and RRF used in quantitate compounds?	X			
Were compound quantitates and RLs adjusted to reflect sample dilutions and dry weights to continuous calibration?	X			
M. Target Compound Identification				
Were relative retention times (RRTs) within ± 0.06 units of standard?	X			
Did the spectrum meet EPA "Functional Guidelines"?	X			
Were chromatograms peaks verified and accounted?	X			
N. Overall Assessment of Data				
Was overall assessment of data found to be acceptable?	X			

Comments: Qualification due to internal standards below lower limits of laboratory criteria. All data were within Cat. B criterion and usable.

- Method 8082A Polychlorinated Biphenyls (PCBs) by Gas Chromatography (February 2007)
- Method 8081B, Organochlorine Pesticides by Gas Chromatography (February 2007)
- Standard Operating Procedure for the Validation of Polychlorinated Biphenyl (PCB) Aroclor Data (April 2022)
- Professional judgment.

Criteria for Data Usability Summary Report

Completeness:

A complete data package is one that has all relevant and related material packaged for distribution to its client in accordance with the Analytical Service Protocol (ASP) Category B Deliverables guidelines.

Compliant:

A compliant data package is one that is determined to have all work that pertains to the production of the laboratory data in a manner that is consistent with the Quality Assurance Program Plan.

Overall Usability Issues:

Data validation completed in accordance with the New York State Department of Environmental Conservation Analytical Service Protocol (NYSDEC ASP) Category B Data Deliverable requirements and reviewer's professional judgment.

This analytical report complies with the following points:

1. Holding Time and Analysis Time
2. Sample Analysis and Quality Control.

In conclusion, the data reviewed in this report is usable data which meets criterion for compliance with methods 8260D, 8270E, 8081.B, and 8082A with the exception of rejected data due to instrument issues as noted in sections 8260D and 8270E. Percent solid method E160.3 was run and all samples are over 30% solid.

Data Completeness

- A complete Category B data package under the NYSDEC ASP has been reported.

Data Validation Acronyms

AA	Atomic Absorption, Flame Technique
BHC	Hexachlorocyclohexane
BFB	Bromofluorobenzene (Tune check analyte)
CCC	Continuing Calibration Check
CCV	Continuing Calibration Verification
CRDL	Contract Required Detection Limit
CRQL	Contract Required Quantitation Limit
CVAA	Atomic Absorption, Cold Vapor
DCAA	2,4-Dichlorophenylacetic acid
DCB	Decachlorobiphenyl
DFTPP	Decafluorotriphenyl phosphine (Tune check analyte)
DL	Detection Limit
ECD	Electron Capture Detector
FAA	Atomic Absorption, Furnace Technique
FID	Flame Ionization Detector
FNP	1-Fluoronaphthalene
GC	Gas Chromatography
GC/MS	Gas Chromatography/ Mass Spectrometry
GPC	Gel Permeation Chromatography
ICB	Initial Calibration Blank
ICP	Inductively Coupled Plasma – Atomic Emission Spectrometer
ICV	Initial Calibration Verification
IDL	Instrument Detection Limit
ICAL	Initial Calibration Curve
IS	Internal Standard
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LCS/LCSD	Laboratory Control Sample/ Laboratory Control Sample Duplicate
MB	Method Blank
MS	Matrix Spike
BNAMS11	Method of Standard Additions
MSD	Matrix Spike Duplicate
MS/MSD	Matrix Spike/ Matrix Spike Duplicate
ND	Non-detected or Not Detected
PID	Photo Ionization Detector

Data Validation Acronyms

PCB	Polychlorinated biphenyl
PCDD	Polychlorinated dibenzodioxins
PCDF	Polychlorinated dibenzofurans
PQL	Practical Quantitation Limit
QA	Quality Assurance
QA/QC	Quality Assurance/ Quality Control
QC	Quality Control
RF	Response Factor
RPD	Relative Percent Difference
RL	Reporting Limit
RRF	Relative Response Factor
RT	Retention Time
RRT	Relative Retention Time
SDG	Sample Delivery Group
SMC	System Monitoring Compounds/ Surrogates
SPCC	Sample Performance Check Compound
TCX	Tetrachloro-m-xylene
%D	Percent Drift
%R	Percent Recovery
%RSD	Percent Relative Standard Deviation

Data Validation Qualifiers

U	The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit.
J	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
J+	The result is an estimated quantity, but the result may bias high.
J-	The result is an estimated quantity, but the result may bias low.
UJ	The analyte was analyzed for but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
R	The data is unusable. The sample results are rejected due to serious deficiencies in meeting Quality Control (QC) criteria. The analyte may or may not be present in the sample.

Note:

1. These qualifiers are used for data validation purposes. The data validation qualifiers may differ from the qualifiers that the laboratory assigns to the data. Refer to the laboratory analytical report for the definitions of the laboratory qualifiers.
2. The EDDs are assigned these data validation qualifiers and refer to the valid value list supplied by the specific agency or informational data system.

Reviewer Summary :

Samples were handled and analyzed properly under USEPA Contract Laboratory Program National Functional Guidance for Super Organic Methods Data and QA-HWSS-A-004 VOA Standard Operation for the Validation of Volatile Data.

- Within initial calibration , %RSD did not meet criteria for several analytes but only Acetone was detected. This lead to qualification of Acetone as an estimate "J" value in samples in which it was detected. Several analytes failed recommended RRF values but were above minimum. No further qualification is need.
- Within continuous calibration of instrument CHEM 31 several analytes failed recommended RRF values but were above minimum. No further qualification is need. Acetone which failed deviation was already qualified due to IC, no further qualification needed.
- Within matrix samples several analytes recoveries were above laboratory criteria, but no analytes except for Acetone (already qualified) were detected within associated sample SB-5 / MW-5 9-10' . No further qualification is needed.

Data was qualified within category B criterion and is usable.

Criteria	Y	N	NA	Comment
D. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?	x			Several analytes failed recommended RRF values but were above minimum. No further qualification is need. Aceton which failed deviation was already qualified due to IC, no further qualification needed.
Were (%D) $\leq$ limit and relative response factors (RRF) within criteria?		x		
E. Laboratory Blanks				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 12 hours?	x			
Were contamination found, if so qualification may be necessary?		x		
Subsection : Field Blanks				TRIP BLANK LL and TRIP BLANK HL
Was a field blank associated with each sample of SDG?	x			
Were target compounds detected in it?		x		
F. Surrogate Spikes				
Were surrogate percent recovery (%R) within QC limits?	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
G. Matrix Spike/Matrix Duplicate				SB-5 / MW-5 9-10'(normal and H 50X) MS/MSD
Were MS and MSD analyzed for SDG?	x			Several analytes recoveries were above laboratory criteria, but no analytes except for Acetone (already qualified) were detected within associated sample SB-5 / MW-5 9-10' . No further qualification is needed.
Was MS/MSD done every 20 samples?	x			
Were MS/MSD (%R) and RPD within QC?		x		

Criteria	Y	N	NA	Comment
H. Field Duplicate				
Were field duplicates identified in this SGD?		x		
Were target compounds detected in it? Were RPDs less than 50%?			x	
subsection: Internal Compounds				
Were counts within 50% to 200% of associated calibration standard?	x			
Were retention times within ± 10 sec of cal. standard?	x			
I. Target Analyte Identification				
Mass spectral ion abundance criteria specified for target analyte?	x			
Target analyte RRT outside specified RRT window?	x			
If sample is considered "Solid", is it greater than 30%?	x			
Did the spectrum meet EPA "Functional Guidelines"?	x			
J. Tentative Analyte Identification				
Were analyte results greater than 85% library match?			x	
Were National Functional Guidelines followed for TIC processing?			x	
K. Regional EPA QA/QC				
Were regional protocol of QA/AC protocols used in evaluation data?	x			
L. Overall Assessment of Data				
Was overall assessment of data found to be acceptable?	x			

Comments: Qualification due to failure in laboratory criteria within initial calibration. All data is usable.

Calculation Spot Check

Instrument: CHEM31

ICV Date and time :08/21/24 09:08

Compound: Chloromethane

	Curve Evaluation (RF)	Response	Concentration
L1	0.484	5715	2
L2	0.420	13008	5
L3	0.498	29483	10
L4	0.519	60932	20
L5	0.507	149618	50
L6	0.492	293163	100
L7	0.488	570015	200
average	0.487		
RSD	6.5		

Reviewer Comment: RSD% was above laboratory limits within initial calibration anlyte Acetone led to qualification within samples SB-5/MW-5 9-10', SB-5/MW-5 6.5-8' and SB-4/MW-4 10-11.5' as estimate "J" values.

Reviewer Summary :

Samples were handled and analyzed properly under USEPA Contract Laboratory Program National Functional Guidance for Super Organic Methods Data and QA-HWSS-A-004 VOA Standard Operation for the Validation of Volatile Data.

- Within initial calibration , %RSD did not meet criteria for several analytes none were detected with sample, no further qualification needed. Several analytes failed recommended RRF values but were above minimum. No further qualification is need.
- Within continuous calibration several analytes were below minimum RRF which led to qualification as rejected "R" values within samples.
- No analytes were detected within sample thus no further qualification needed on associated solid samples.

Data was qualified within category B criterion and is usable, except for rejected "R" value.

8260D

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Technical Hold Time of 7 days not preserved or 14 days preserved (pH<2)?	x			
Cooling Temp $\geq 6^{\circ}\text{C}$?	x			
B. GC/MS Instrument Performance Check				
Were BFB performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period?	x			
C. Initial Calibration				
Was a 5-point calibration run?	x			Within initial calibration , %RSD did not meet criteria for several analytes none were detected with sample, no further qualification needed. Several analytes failed recommended RRF values but were above minimum. No further qualification is need.
Was RSD% with in criteria for each target analyte? Was RRF within criteria?		x		
Was curve fit used for evaluation? If yes, did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was the Initial Calibration Verification (ICV) done after the I.C., were (%D) (%R) within criteria?	x			

Criteria	Y	N	NA	Comment
D. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?	x			Several analytes were below minimum RRF which led to qualification as rejected "R" values within samples. See attachment.
Were (%D) $\leq$ limit and relative response factors (RRF) within criteria?		x		
E. Laboratory Blanks				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 12 hours?	x			
Were contamination found, if so qualification may be necessary?		x		
Subsection : Field Blanks				EQUIPMENT BLANK
Was a field blank associated with each sample of SDG?	x			
Were target compounds detected in it?		x		
F. Surrogate Spikes				
Were surrogate percent recovery (%R) within QC limits?	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
G. Matrix Spike/Matrix Duplicate				
Were MS and MSD analyzed for SDG?		x		
Was MS/MSD done every 20 samples?			x	
Were MS/MSD (%R) and RPD within QC?			x	

Criteria	Y	N	NA	Comment
H. Field Duplicate				
Were field duplicates identified in this SGD?		x		
Were target compounds detected in it? Were RSPs less than 50%?			x	
subsection: Internal Compounds				
Were counts within 50% to 200% of associated calibration standard?	x			
Were retention times within ± 10 sec of cal. standard?	x			
I. Target Analyte Identification				
Mass spectral ion abundance criteria specified for target analyte?	x			
Target analyte RRT outside specified RRT window?	x			
If sample is considered "Solid", is it greater than 30%?			x	
Did the spectrum meet EPA "Functional Guidelines"?	x			
J. Tentative Analyte Identification				
Were analyte results greater than 85% library match?			x	
Were National Functional Guidelines followed for TIC processing?			x	
K. Regional EPA QA/QC				
Were regional protocol of QA/AC protocols used in evaluation data?	x			
L. Overall Assessment of Data				
Was overall assessment of data found to be acceptable?	x			

Comments: Qualification due to failure with continuous calibration. Data is usable except for rejected values.

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 protocol Standard Operating Procedure for Validation of Semivolatile Data, QA-HWSS-A-005 along with the EPA's National Functional Guideline for Organic Compounds.

- Within ICV of instrument CHEM19 compound Hexachlorocyclopentadiene was not within recommended RRF but did reach minimum RRF value, thus no qualification is needed.
- Several analytes did not meet %D criteria which led to qualification within all samples associated with CCVs led to qualification of non-detect estimate "UJ" values within all samples. 2,4-Dinitrophenol failed minimum RRF which led to qualification of reject "R" value in all samples.
- Hexachlorocyclopentadiene was not within acceptable recovery within matrix spike but was qualified as reject by laboratory control sample, no further qualification needed. 2,4-Dinitrophenol recovered above QC limits of RPD but was not detected with sample, no further qualification needed.
- Hexachlorocyclopentadiene is qualified as rejected "R" values within samples due to recovery below laboratory limits within laboratory control sample duplicate CR46087 LCSD.

Data is qualified within category B criterion and is usable, except for the data qualified as rejected.

8270E SIM/Isotope Dilutions

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Were samples within technical hold time and extraction period?	x			
Cooling Temp $\leq 6^{\circ}\text{C}$?	x			
B. GC/MS Instrument Performance Check				
Were DFTPP performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period?	x			
Ion abundance criteria met?	x			
C. Initial Calibration				
Was a 5-point calibration conducted?	x			Within ICV of instrument CHEM19 compound Hexachlorobenzene was not within recommended RRF but did reach minimum RRF value, thus no qualification is needed.
RSD% within acceptable criterion?	x			
Was curve fit used for evaluation? If yes, did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was %D for target analytes within acceptable limit.	x			
Was RRF values meet for target analyte?		x		
Was the Initial Calibration Verification (ICV) done after the I.C.?	x			

Criteria	Y	N	NA	Comment
D. Continuing Calibration				
Was it done every 12 hours after Initial Calibration to verify it?	x			Several analytes did not meet %D criteria which led to qualification within all samples associated with CCVs led to qualification of non-detect estimate "UJ" values within all samples. 2,4-Dinitrophenol failed minimum RRF which led to qualification of reject "R" value in all samples. See attachment.
Were (%D) and relative response factors (RRF) within acceptable criteria?		x		
E. Laboratory Blanks				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 20 samples?	x			
Were contamination found, if so qualification may be necessary?		x		
F. Field Blanks/Trip Blank				
Was a field blanks associated with each sample of SDG?		x		
Were target compounds detected in it?			x	
G. Surrogate Spikes (Isotope Dilution Recovery)				
Were surrogate percent recovery (%R) within QC limits?(Tetrahydrofuran-d8)	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
H. Matrix Spike/Matrix Duplicate				SB-5/MW-5 14-15` MS/MSD
Were MS and MSD analyzed for SDG?	x			Hexachlorocyclopentadiene was not within acceptable recovery within matrix spike but was qualified as reject by laboratory control sample, no further qualification needed. 2,4-Dinitrophenol recovered above QC limits of RPD but was not detected with sample, no further qualification needed.
Was MS/MSD done every 20 samples ?	x			
Were MS/MSD (%R) and RPD within QC?		x		

Criteria	Y	N	NA	Comment
I. Laboratory Control Sample				
Was LCS analysis for this SDG?	x			Hexachlorocyclopentadiene is qualified as rejected "R" values within samples due to recovery below laboratory limits within laboratory control sample duplicate CR46087 LCSD. See attachment.
Was LCS analysis per analysis batch?	x			
Was LCS (%R) within QC Limits?		x		
J. Field Duplicate				
Were field duplicates identified in this SDG?		x		
Were target compounds detected in it?			x	
K. Internal Standard				
Was area response within acceptance limits?	x			
Were retention times within ± 30 sec of cal. standard?	x			
L. Compound Quantitation				
Were correct internal standards, quantitation ions and RRF used in quantitate compounds?	x			
Were compound quantitates and RLs adjusted to reflect sample dilutions and dry weights to continuous calibration?	x			
M. Target Compound Identification				
Were relative retention times (RRTs) within ± 0.06 units of standard?	x			
Did the spectrum meet EPA "Functional Guidelines"?	x			
Were chromatograms peaks verified and accounted?	x			
N. Overall Assessment of Data				
Was overall assessment of data found to be acceptable?	x			

Comments: Qualification of samples occurred due to laboratory criteria failure within continuous calibrations and laboratory control samples. Data within Cat. B criterion and usable, except for the data that is qualified as rejected.

Reviewer Comment: Qualification of several analytes of non-detect estimate "UJ" values within all samples is due to %D results above laboratory limit. 2,4-Dinitrophenol failed minimum RRF which led to qualification of reject "R" value in all samples.

Reviewer Comment: Due to recovery below laboratory limit for Hexachlorocyclopentadiene within laboratory control sample, analyte is qualified as rejected "R" value for within samples. Qualification of several analytes as non-detect estimate "UJ" values is due to %D results above laboratory limit within associated CCV. 2,4-Dinitrophenol failed minimum RRF within CCV, led to qualification of reject "R" value in all samples.

Reviewer Comment: Due to recovery below laboratory limit for Hexachlorocyclopentadiene within laboratory control sample, analyte is qualified as rejected "R" value for within samples. Qualification of several analytes as non-detect estimate "UJ" values is due to %D results above laboratory limit within associated CCV. 2,4-Dinitrophenol failed minimum RRF within CCV, led to qualification of reject "R" value in all samples.

Reviewer Comment: Due to recovery below laboratory limit for Hexachlorocyclopentadiene within laboratory control sample, analyte is qualified as rejected "R" value for within samples. Qualification of several analytes as non-detect estimate "UJ" values is due to %D results above laboratory limit within associated CCV. 2,4-Dinitrophenol failed minimum RRF within CCV, led to qualification of reject "R" value in all samples.

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 Standard Operating Procedure for Validation of Pesticides Data, QA-HWSS-A_007.

- It is noted by reviewer that QA/QC samples laboratory blanks, laboratory control samples and matrix samples were all conducted on instrument EDD35 while samples were analyzed on ECD33. Samples are evaluated based on data collected on instrument such as surrogates, initial and continuing calibrations. Detected analytes will be qualified as estimate "J" values. Sample evaluated on ECD04 had QA/QC samples of blanks, lab controls and matrix samples and were evaluated normally.
 - Within Continuing Calibrations, several analytes were above laboratory limits of the CCVs of instrument ECD04 and ECD33 associated with the SDG GC46087 in which all the samples were analyzed. All sample will have these analytes qualified as a non-detect estimate "UJ" values.
 - Confirmation did not meet %D for CR45947 MS of 40%, no further qualification needed.
- All data is within category B criterion and usable.

Method 8081B Pesticides

Criteria	Y	N	NA	Comment
A. Sample Receipt				
With in technical hold time and extraction period?	x			
Cooling Temp = >6°C	x			
B. GC/ECD Instrument Performance Check				
Were Resolution Check Mixture (RESC) run and resolution criteria?	x			
Was PEM analysis performed within criteria for compound?	x			
Were Mid-point individual standard mixture performed and %resolution with in criteria?	x			
C. Initial Calibration				
Was the 5 point calibration with all mixtures and concentration run under criteria?	x			
Was a single point of Toxaphene at low standard in ICAL or five point Toxaphene independent runs?	x			
Were %RSD lower than criteria?	x			
D. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?			x	Several analytes were above laboratory limits of the CCVs of instrument ECD04 and ECD33 associated with the SDG GC46087 in which all the samples were analyzed. All sample will have these analytes qualified as a non-detect estimate "UJ" values. Please see attachment.
Were (%D), relative respond factors (RRF) and RT within criteria?		x		
Time elapse between CCV, Instrumental Blank, CCV PEM, CS3 did not exceed 14 hrs.?	x			
PEM % breakdown did not exceed criteria?	x			

Criteria	Y	N	NA	Comment
E. Blanks				
Was a lab blank associated with each sample of SDG?	x			While blanks were present, they were analyzed on a different instrument than samples evaluated on ECD33 thus all detection will be qualified as estimate "J" values with in all samples. Blanks associated with ECD04 were within laboratory criteria. See attachments.
Were sulfur blanks run if needed?		x		
Were TCLP/ SPL Leachate Extractions Blanks (LEB) prepared and extracted at specific frequency?		x		
Were contaminants found, if so qualification may be necessary?		x		
F. Surrogate spikes				
Did Spike contain two surrogates (TCX and DCM) ran in all sample including blanks and standards?	x			
Were Surrogate percent recovery (%R) with in QC limits? (30-150%)	x			
Were RT of Surrogates calculated for each sample?	x			
G. Matrix Spike/Matrix duplicate				
Were MS and MSD analyzed for SDG or matrix?	x			While matrix samples were present, they were analyzed on a different instrument than samples evaluated on ECD33 thus no qualification will be made based on this data. Matrix samples associated with ECD04 were within laboratory criteria.
Was MS/MSD done at specific frequency required by criteria?	x			
Were MS/MSD (%R) and RPD within QC?	x			
H. Laboratory control sample				
Was LCS analysis for this SDG and at specific frequency as required criteria?	x			While laboratory control samples were present, they were analyzed on a different instrument than samples evaluated on ECD33 thus no qualification will be made based on this data. Laboratory control samples associated with ECD04 were within laboratory criteria.
Was LCS (%R) within QC Limits?	x			

Criteria	Y	N	NA	Comment
I. Field Duplicates				
Were field duplicates collected?		x		
Were %RPD < 50% for observed analytes?			x	
J. Florisil Cartridge Performance Check				
Were %R within specification.	x			
K. Target Analyte Identification				
RTs of surrogates and reported targets analytes are within calculated window?	x			
%D of target analytes and Toxaphene are calculated to less than 25%?	x			
All cosmographical observation are within QC criteria?	x			
L. GC/MS Confirmation				
GC/MS confirmation is done to specific criteria of both column for single compound concentration ≥ 5 ng/ μ and for Toxaphene concentration of ≥ 125 ng/ μ L?	x			Confirmation did not meet %D for CR45947 MS of 40%, no further qualification needed.
M. Target Analyte Quantitation and Reported CRQL				
Were target analyte and sample specific CRQL and CF are calculated correctly?	x			
N. EPA Regional QA/QC				
Were QA/QC performed under regional criterion	x			
Were field duplicates collected?		x		

Criteria	Y	N	NA	Comment
O. Overall assessment of data				
Was Overall assessment of data found to be acceptable?	x			

Comments: Due to action above criteria limits of continuous calibration qualification is needed. Qualification also due to lack of QA/QC data from sample associated instrument. All results are within Cat. B criterion and usable.

Both channels need to have the compound detected for a concentration to be reported on either channel.

U1=Due to matrix interference and/or the presence of a large amount of non-target material, the reporting level for this compound has been elevated.

U2=The presence of this compound was not confirmed by the analyst based on the characteristic pattern matching of multi-component parameters, retention time, and/or peak shape.

P/C: P=Primary Result C=Confirmation Result X=Not Used CF=Calculated Calibration/Response Factor MC=Multi-Component

Reviewer Comment: Qualification analytes as non-detect estimate "UJ" values is due to %D results above laboratory limit within associated CCV.

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 protocol Standard Operating Procedure for Validation of Polychlorinated Biphenyl (PCB) Aroclor Data, SOP#QA-HWSS-A-006.

- It is noted by reviewer that QA/QC samples laboratory blanks, laboratory control samples and matrix samples were all conducted on instrument ECD08 while samples were analyzed on ECD3, ECD29, ECD48 and ECD7. Samples are evaluated based on data collected on instrument such as surrogates, initial and continuing calibrations. If analytes were detected, they would be qualified as estimate "J" values
- All instruments had a failure in within CCVs, it was not over 25% as stated in SOP except for ECD29 failures within files 822A036, 823A033 and 823B033 led to qualification of Aroclor 1260 as non-detect estimate "UJ" value in sample CR46089 and CR46092.

All data is with in category B criterion and usable.

Client: Labella Associates DPC

Laboratory: Phoenix Environmental Laboratories, INC (NELAP #NY11301)

Job ID: GCR48033

8082A PCB

Criteria	Y	N	NA	Comment
A. Sample Receipt				
With in technical hold time and extraction period?	x			
Cooling Temp = >6 °C	x			
B. Initial Calibration				
Was a 5 point calibration?	x			
RSD% for CF are within verification perimeter?	x			
Verified RT window. CFs and RSD are calculated and within bounds?	x			
C. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?	x			All instruments had a failure in within CCVs, which was not over 25% as stated in SOP except for ECD29 failures within files 822A036, 823A033 and 823B033. This also led to qualification of Aroclor 1260 as non-detect estimate "UJ" value in samples CR46089 and CR46092. See attachment.
Were (%D) and relative respond factors (RRF) within bounds of CCV.	x			
Were the RTs of each target and surrogate in Arcelor standard (C3) and within RT window?		x		
D. Laboratory/Field Blanks				
Was a lab blank associated with each sample of SDG?		x		Samples run on instruments ECD3, ECD29, ECD48 and ECD7 had no blank run on the instrument, no analytes are detected in any associated samples. No further qualification needed.
Was blank analyzed every 20 samples?	x			
Were sulfur blanks run if needed?		x		
Were contamination found, if so qualification may be necessary.		x		

Criteria	Y	N	NA	Comment
E. Surrogate Spikes				
Were Surrogate percent recovery (%R) within QC limits?	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
F. Matrix Spike/Matrix Duplicate				
Were MS and MSD analyzed for SDG?	x			Matrix samples were not evaluated on ECD3, ECD29, ECD48 and ECD7 thus no qualification will be made based on this data.
Were MS/MSD (%R) and RPD within QC?	x			
G. Laboratory Control Sample				
Was LCS analysis for this SDG?	x			Laboratory control samples were not evaluated on ECD3, ECD29, ECD48 and ECD7 thus no qualification will be made based on this data.
Was LCS (%R) QC Limits?	x			
H. Target Analyte Identification				
Were relative retention times (RRTs) within ± 0.05 units of standard?	x			
Did the spectrum meet EPA "Functional Guidelines"?	x			
Were chromatograms peaks verified and accounted?	x			
I. GC/MS Confirmation				
GC/MS was performed at least one peak concentration ≥ 10 ng/ μ L.	x			
J. Target Analyte Quantitation and Reported CRQL				
Were target analyte and sample specific CRQL calculated correctly?	x			

Criteria	Y	N	NA	Comment
K. Field Duplicates				
Were Field Duplicated identified within sample package?		x		
Was RPD less than 50%?			x	
L. EPA Regional QA/QC				
Were QA/QC performed under regional criterion?	x			
Were field duplicates collected?	x			
M. Overall Assessment of Data				
Was Overall assessment of data found to be acceptable?	x			

Comments: Qualification due to failure within continuous calibration were made. All results are within Cat. B criterion and usable.

Criteria for Data Usability Summary Report

Completeness:

A complete data package is one that has all relevant and related material packaged for distribution to its client in accordance with the Analytical Service Protocol (ASP) Category B Deliverables guidelines.

Compliant:

A compliant data package is one that is determined to have all work that pertains to the production of the laboratory data in a manner that is consistent with the Quality Assurance Program Plan.

Overall Usability Issues:

Data validation completed in accordance with the New York State Department of Environmental Conservation Analytical Service Protocol (NYSDEC ASP) Category B Data Deliverable requirements and reviewer's professional judgment.

This analytical report complies with the following points:

1. Holding Time and Analysis Time
2. Sample Analysis and Quality Control.

In conclusion, the data reviewed in this report is usable data which meets criteria for compliance with methods 8260D, 8270E, 8081.B, 8082A, 6010D and 7471B except for rejected data due to instrument issues as noted in sections 8270E and 6010D. Percent solid method E160.3 was run, and all samples are over 30% solid.

Data Completeness

- A complete Category B data package under the NYSDEC ASP has been reported.

Data Validation Acronyms

AA	Atomic Absorption, Flame Technique
BHC	Hexachlorocyclohexane
BFB	Bromofluorobenzene (Tune check analyte)
CCC	Continuing Calibration Check
CCV	Continuing Calibration Verification
CRDL	Contract Required Detection Limit
CRQL	Contract Required Quantitation Limit
CVAA	Atomic Absorption, Cold Vapor
DCAA	2,4-Dichlorophenylacetic acid
DCB	Decachlorobiphenyl
DFTPP	Decafluorotriphenyl phosphine (Tune check analyte)
DL	Detection Limit
ECD	Electron Capture Detector
FAA	Atomic Absorption, Furnace Technique
FID	Flame Ionization Detector
FNP	1-Fluoronaphthalene
GC	Gas Chromatography
GC/MS	Gas Chromatography/ Mass Spectrometry
GPC	Gel Permeation Chromatography
ICB	Initial Calibration Blank
ICP	Inductively Coupled Plasma – Atomic Emission Spectrometer
ICV	Initial Calibration Verification
IDL	Instrument Detection Limit
ICAL	Initial Calibration Curve
IS	Internal Standard
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LCS/LCSD	Laboratory Control Sample/ Laboratory Control Sample Duplicate
MB	Method Blank
MS	Matrix Spike
BNAMS11	Method of Standard Additions
MSD	Matrix Spike Duplicate
MS/MSD	Matrix Spike/ Matrix Spike Duplicate
ND	Non-detected or Not Detected
PID	Photo Ionization Detector

Data Validation Acronyms

PCB	Polychlorinated biphenyl
PCDD	Polychlorinated dibenzodioxins
PCDF	Polychlorinated dibenzofurans
PQL	Practical Quantitation Limit
QA	Quality Assurance
QA/QC	Quality Assurance/ Quality Control
QC	Quality Control
RF	Response Factor
RPD	Relative Percent Difference
RL	Reporting Limit
RRF	Relative Response Factor
RT	Retention Time
RRT	Relative Retention Time
SDG	Sample Delivery Group
SMC	System Monitoring Compounds/ Surrogates
SPCC	Sample Performance Check Compound
TCX	Tetrachloro-m-xylene
%D	Percent Drift
%R	Percent Recovery
%RSD	Percent Relative Standard Deviation

Data Validation Qualifiers

U	The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit.
J	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
J+	The result is an estimated quantity, but the result may bias high.
J-	The result is an estimated quantity, but the result may bias low.
UJ	The analyte was analyzed for but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
R	The data is unusable. The sample results are rejected due to serious deficiencies in meeting Quality Control (QC) criteria. The analyte may or may not be present in the sample.

Note:

1. These qualifiers are used for data validation purposes. The data validation qualifiers may differ from the qualifiers that the laboratory assigns to the data. Refer to the laboratory analytical report for the definitions of the laboratory qualifiers.
2. The EDDs are assigned these data validation qualifiers and refer to the valid value list supplied by the specific agency or informational data system.

Reviewer Summary :

Samples were handled and analyzed properly under USEPA Contract Laboratory Program National Functional Guidance for Super Organic Methods Data and QA-HWSS-A-004 VOA Standard Operation for the Validation of Volatile Data.

- Within continuous calibration several analytes were above %deviation (%D) which led to qualification of analytes as non-detect estimates within sample.
- No analytes were detected within sample thus no further qualification needed on associated solid samples.

Data was qualified within category B criterion and is usable.

Reviewer Summary :

Samples were handled and analyzed properly under USEPA Contract Laboratory Program National Functional Guidance for Super Organic Methods Data and QA-HWSS-A-004 VOA Standard Operation for the Validation of Volatile Data.

- Within initial calibration of instrument CHEM 26, Acetone was above laboratory criteria for %RSD but was not detected within associated samples, thus no qualification is needed.
- Within continuous calibration of instrument CHEM14 analytes Trichlorofluoromethane and Methyl t-Butyl Ether %deviations (%D) were above laboratory criteria leading to qualification of non-detect estimates "UJ" values with associated samples. Within continuous calibration of instrument CHEM26 analyte Dichlorodifluoromethane was above laboratory criteria leading to qualification of non-detect estimates "UJ" values with associated samples. Recoveries and RPD of other analytes above laboratory limits occurred but did not lead to further qualification.
- Several analytes recoveries were below laboratory criteria led to qualification as non-detect estimate "UJ" values within sample SB-6 / MW-6 6-7.5'.
- Tentative identified compound was detected but raw data was not presented thus evaluation of procedure cannot be made. Analyte detected in sample (CR47007) is an estimate value, no further qualification is needed.

Data was qualified within category B criterion and is usable.

8260D

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Technical Hold Time of 7 days not preserved or 14 days preserved (pH<2)?	x			
Cooling Temp $\geq 6^{\circ}\text{C}$?	x			
B. GC/MS Instrument Performance Check				
Were BFB performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period?	x			
C. Initial Calibration				
Was a 5-point calibration run?	x			Within initial calibration of instrument CHEM 26, Acetone was above laboratory criteria for %RSD but was not detected within associated samples, thus no qualification is needed.
Was RSD% with in criteria for each target analyte? Was RRF within criteria?		x		
Was curve fit used for evaluation? If yes, did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was the Initial Calibration Verification (ICV) done after the I.C., were (%D) (%R) within criteria?	x			

Criteria	Y	N	NA	Comment
D. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?	x			Within continuous calibration of instrument CHEM14 analytes Trichlorofluoromethane and Methyl t-Butyl Ether %deviations (%D) were above laboratory criteria leading to qualification of non-detect estimates "UJ" values with associated samples. Within continuous calibration of instrument CHEM26 analyte Dichlorodifluoromethane was above laboratory criteria leading to qualification of non-detect estimates "UJ" values with associated samples. Recoveries and RPD of other analytes above laboratory limits occurred but did not lead to further qualification. See attachment.
Were (%D) ≤ limit and relative response factors (RRF) within criteria?		x		
E. Laboratory Blanks				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 12 hours?	x			
Were contamination found, if so qualification may be necessary?		x		
Subsection : Field Blanks				LL TRIP BLANKS and HL TRIP BLANKS
Was a field blank associated with each sample of SDG?	x			
Were target compounds detected in it?		x		
F. Surrogate Spikes				
Were surrogate percent recovery (%R) within QC limits?	x			

Criteria	Y	N	NA	Comment
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
G. Matrix Spike/Matrix Duplicate				SB-6 / MW-6 6-7.5'
Were MS and MSD analyzed for SDG?	x			Several analytes recoveries were below laboratory criteria led to qualification as non-detect estimate "UJ" values within sample SB-6 / MW-6 6-7.5'. See attachment.
Was MS/MSD done every 20 samples?	x			
Were MS/MSD (%R) and RPD within QC?		x		
H. Field Duplicate				
Were field duplicates identified in this SGD?		x		
Were target compounds detected in it? Were RPDs less than 50%?			x	
subsection: Internal Compounds				
Were counts within 50% to 200% of associated calibration standard?	x			
Were retention times within ± 10 sec of cal. standard?	x			
I. Target Analyte Identification				
Mass spectral ion abundance criteria specified for target analyte?	x			
Target analyte RRT outside specified RRT window?	x			
If sample is considered "Solid", is it greater than 30%?	x			
Did the spectrum meet EPA "Functional Guidelines"?	x			

Criteria	Y	N	NA	Comment
J. Tentative Analyte Identification				
Were analyte results greater than 85% library match?	x			Raw data was not presented thus evaluation of procedure cannot be made. Analyte detected in sample (CR45186) is an estimate "J" value, no further qualification is needed.
Were National Functional Guidelines followed for TIC processing?			x	
K. Regional EPA QA/QC				
Were regional protocol of QA/AC protocols used in evaluation data?	x			
L. Overall Assessment of Data				
Was overall assessment of data found to be acceptable?	x			

Comments: Qualification due to failure in laboratory criteria within continuous calibration and matrix samples. All data is usable.

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 protocol Standard Operating Procedure for Validation of Semivolatile Data, QA-HWSS-A-005 along with the EPA's National Functional Guideline for Organic Compounds.

- It is noted by reviewer that QA/QC samples laboratory blanks, laboratory control samples and matrix samples were all conducted on instrument CHEM19 while some samples were analyzed on CHEM06. Samples are evaluated based on data collected on instrument such as surrogates, initial and continuing calibrations. If analytes were detected, they would be qualified as estimate "J" values. No analytes were present. Sample evaluated on CHEM19 had QA/QC samples of blanks and laboratory controls samples were evaluated normally.
- Within ICV of instrument CHEM19 compounds Hexachlorobenzene was not within recommended RRF but did reach minimum RRF value, thus no qualification is needed.
- Several compounds did not meet %D criteria within associated CCVs led to qualification of non-detect estimate "UJ" values within samples. Within CHEM06 closing CCV several compounds failed minimum RRF leading to qualification as rejection "R" values within associate sample CR47004-CR47005.
- Hexachlorocyclopentadiene was not within acceptable recovery for matrix samples of SB-8 / MW-8 14'-15' but was qualified as reject by laboratory control sample, no further qualification needed. Benzoic Acid was below QC limits for RPD/recovery led to qualification of analyte as non-detect estimate "UJ" value within sample.
- Within matrix samples Hexachlorocyclopentadiene and Benzoic Acid was outside QC limits for RPD but sample were not part of SDG: GCR47003 thus no qualification is needed.
- Hexachlorocyclopentadiene is qualified as rejected "R" values associated CR47006-CR47010 samples due to recovery below laboratory limits within laboratory control sample CR48036LCS. Benzoic acid had a RPD above laboratory criteria but no qualification is needed.

Data is qualified within category B criterion and is usable, except for the data qualified as rejected.

8270E SIM/Isotope Dilutions

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Were samples within technical hold time and extraction period?	x			
Cooling Temp $\leq 6^{\circ}\text{C}$?	x			
B. GC/MS Instrument Performance Check				
Were DFTPP performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period?	x			
Ion abundance criteria met?	x			
C. Initial Calibration				
Was a 5-point calibration conducted?	x			Within ICV of instrument CHEM19 compounds Hexachlorobenzene were not within recommended RRF but did reach minimum RRF value, thus no qualification is needed.
RSD% within acceptable criterion?	x			
Was curve fit used for evaluation? If yes, did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was %D for target analytes within acceptable limit.	x			
Was RRF values meet for target analyte?		x		
Was the Initial Calibration Verification (ICV) done after the I.C.?	x			

Criteria	Y	N	NA	Comment
D. Continuing Calibration				
Was it done every 12 hours after Initial Calibration to verify it?	x			Several compounds did not meet %D criteria within associated CCVs led to qualification of non-detect estimate "UJ" values within samples. Within CHEM06 closing CCV several compounds failed minimum RRF leading to qualification as rejection "R" values within associate sample CR47004-CR47005. See attachment.
Were (%D) and relative response factors (RRF) within acceptable criteria?				
E. Laboratory Blanks				
Was a lab blank associated with each sample of SDG?	x			Samples run on instrument CHEM06 had no blank run on the instrument, no analytes are detected in any associated samples. No further qualification needed.
Was blank analyzed every 20 samples?	x			
Were contamination found, if so qualification may be necessary?		x		
F. Field Blanks/Trip Blank				
Was a field blanks associated with each sample of SDG?		x		
Were target compounds detected in it?			x	
G. Surrogate Spikes (Isotope Dilution Recovery)				
Were surrogate percent recovery (%R) within QC limits?(Tetrahydrofuran-d8)	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
H. Matrix Spike/Matrix Duplicate				
Were MS and MSD analyzed for SDG?	x			Hexachlorocyclopentadiene and Benzoic Acid was outside QC limits for RPD but sample were not part of SDG: GCR74003 thus no qualification is needed.
Was MS/MSD done every 20 samples ?	x			
Were MS/MSD (%R) and RPD within QC?		x		

Criteria	Y	N	NA	Comment
I. Laboratory Control Sample				
Was LCS analysis for this SDG?	x			Samples run on instrument CHEM06 had no LCS run on the instrument, no analytes are detected in any associated samples. Hexachlorocyclopentadiene is qualified as rejected "R" values associated CR47006-CR47010 samples due to recovery below laboratory limits within laboratory control sample CR48036LCS. Benzoic acid had a RPD above laboratory criteria but no qualification is needed. See attachment.
Was LCS analysis per analysis batch?	x			
Was LCS (%R) within QC Limits?		x		
J. Field Duplicate				
Were field duplicates identified in this SDG?		x		
Were target compounds detected in it?			x	
K. Internal Standard				
Was area response within acceptance limits?	x			
Were retention times within ± 30 sec of cal. standard?	x			
L. Compound Quantitation				
Were correct internal standards, quantitation ions and RRF used in quantitate compounds?	x			
Were compound quantitates and RLs adjusted to reflect sample dilutions and dry weights to continuous calibration?	x			
M. Target Compound Identification				
Were relative retention times (RRTs) within ± 0.06 units of standard?	x			
Did the spectrum meet EPA "Functional Guidelines"?	x			
Were chromatograms peaks verified and accounted?	x			

Criteria	Y	N	NA	Comment
N. Overall Assessment of Data				
Was overall assessment of data found to be acceptable?	x			

Comments: Qualification of samples occurred due to laboratory criteria failure within continuous calibrations and laboratory control samples. Data within Cat. B criterion and usable, except for the data that is qualified as rejected.

Reviewer Comment: Qualification of analyte as non-detect estimate "UJ" values within associated samples (CR47004 and CR47005) is due to %D results above laboratory limit. Qualification of other analytes as rejected "R" values is due RRF not meeting minimum values within CCV.

Reviewer Comment: Due to recovery below laboratory limit for Hexachlorocyclopentadiene within laboratory control sample, analyte is qualified as rejected "R" value for within sampled (CR47006-CR47010). Benzoic acid had a RPD above laboratory criteria but no qualification is needed.

Reviewer comment: Qualification analytes as non-detect estimate "UJ" values is due to %D results above laboratory limit within associated CCV on CHEM19. Due to recovery below laboratory limit for Hexachlorocyclopentadiene within laboratory control sample, analyte is qualified as rejected "R" value .

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 protocol Standard Operating Procedure for Validation of Polychlorinated Biphenyl (PCB) Aroclor Data, SOP#QA-HWSS-A-006.

- It is noted by reviewer that QA/QC samples laboratory blanks, laboratory control samples and matrix samples were all conducted on instrument ECD08 while samples were analyzed on ECD03. Samples are evaluated based on data collected on instrument such as surrogates, initial and continuing calibrations. If analytes were detected, they would be qualified as estimate "J" values.

All data is with in category B criterion and usable.

Job ID: GCR47003

8082A PCB

Criteria	Y	N	NA	Comment
A. Sample Receipt				
With in technical hold time and extraction period?	x			
Cooling Temp = >6 °C	x			
B. Initial Calibration				
Was a 5 point calibration?	x			
RSD% for CF are within verification perimeter?	x			
Verified RT window. CFs and RSD are calculated and within bounds?	x			
C. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?	x			
Were (%D) and relative respond factors (RRF) within bounds of CCV.	x			
Were the RTs of each target and surrogate in Arcelor standard (C3) and within RT window?	x			
D. Laboratory/Field Blanks				
Was a lab blank associated with each sample of SDG?	x			Samples run on instrument EDC03 had no blank run on the instrument, no analytes are detected in any associated samples. No further qualification needed.
Was blank analyzed every 20 samples?	x			
Were sulfur blanks run if needed?		x		
Were contamination found, if so qualification may be necessary.		x		

Criteria	Y	N	NA	Comment
E. Surrogate Spikes				
Were Surrogate percent recovery (%R) within QC limits?	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
F. Matrix Spike/Matrix Duplicate				
Were MS and MSD analyzed for SDG?	x			While matrix samples were present, they were analyzed on a different instrument than samples evaluated on ECD03 thus no qualification will be made based on this data.
Were MS/MSD (%R) and RPD within QC?	x			
G. Laboratory Control Sample				
Was LCS analysis for this SDG?	x			While laboratory control samples were present, they were analyzed on a different instrument than samples evaluated on ECD03 thus no qualification will be made based on this data.
Was LCS (%R) QC Limits?	x			
H. Target Analyte Identification				
Were relative retention times (RRTs) within ± 0.05 units of standard?	x			
Did the spectrum meet EPA "Functional Guidelines"?	x			
Were chromatograms peaks verified and accounted?	x			
I. GC/MS Confirmation				
GC/MS was performed at least one peak concentration ≥ 10 ng/ μ L.	x			
J. Target Analyte Quantitation and Reported CRQL				
Were target analyte and sample specific CRQL calculated correctly?	x			

Criteria	Y	N	NA	Comment
K. Field Duplicates				
Were Field Duplicated identified within sample package?		x		
Was RPD less than 50%?			x	
L. EPA Regional QA/QC				
Were QA/QC performed under regional criterion?	x			
Were field duplicates collected?	x			
M. Overall Assessment of Data				
Was Overall assessment of data found to be acceptable?	x			

Comments: All results are within Cat. B criterion and usable.

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 Standard Operating Procedure for Validation of Pesticides Data, QA-HWSS-A_007.

- It is noted by reviewer that QA/QC samples laboratory blanks, laboratory control samples and matrix samples were all conducted on instrument ECD04 while samples were analyzed on ECD33 and ECD35. Samples are evaluated based on data collected on instrument such as surrogates, initial and continuing calibrations. No analytes were detected, thus no qualification needed.
- Within Continues Calibrations, Endosulfan II was above laboratory limits %D of CCV of instrument ECD35 associated with sample CR47008-CR47010. Samples will have this analyte qualified as a non-detect estimate "UJ" values.

All data is within category B criterion and usable.

Method 8081B Pesticides

Criteria	Y	N	NA	Comment
A. Sample Receipt				
With in technical hold time and extraction period?	x			
Cooling Temp = >6°C	x			
B. GC/ECD Instrument Performance Check				
Were Resolution Check Mixture (RESC) run and resolution criteria?	x			
Was PEM analysis performed within criteria for compound?	x			
Were Mid-point individual standard mixture performed and %resolution with in criteria?	x			
C. Initial Calibration				
Was the 5 point calibration with all mixtures and concentration run under criteria?	x			
Was a single point of Toxaphene at low standard in ICAL or five point Toxaphene independent runs?	x			
Were %RSD lower than criteria?	x			
D. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?			x	Endosulfan II was above laboratory limits %D of CCV of instrument ECD35 associated with sample CR47008-CR47010. Samples will have this analyte qualified as a non-detect estimate "UJ" values. See attachment.
Were (%D), relative respond factors (RRF) and RT within criteria?		x		
Time elapse between CCV, Instrumental Blank, CCV PEM, CS3 did not exceed 14 hrs.?	x			
PEM % breakdown did not exceed criteria?	x			

Criteria	Y	N	NA	Comment
E. Blanks				
Was a lab blank associated with each sample of SDG?	x			While blanks were present, they were analyzed on a different instrument than samples evaluated on ECD33 and ECD35 thus all detection will be qualified as estimate "J" values. No analytes were detected, no further qualification.
Were sulfur blanks run if needed?		x		
Were TCLP/ SPL Leachate Extractions Blanks (LEB) prepared and extracted at specific frequency?		x		
Were contaminants found, if so qualification may be necessary?		x		
F. Surrogate spikes				
Did Spike contain two surrogates (TCX and DCM) ran in all sample including blanks and standards?	x			
Were Surrogate percent recovery (%R) with in QC limits? (30-150%)	x			
Were RT of Surrogates calculated for each sample?	x			
G. Matrix Spike/Matrix duplicate				
Were MS and MSD analyzed for SDG or matrix?	x			While matrix samples were present, they were analyzed on a different instrument than samples evaluated on ECD33 or ECD35 thus no qualification will be made based on this data.
Was MS/MSD done at specific frequency required by criteria?	x			
Were MS/MSD (%R) and RPD within QC?	x			
H. Laboratory control sample				
Was LCS analysis for this SDG and at specific frequency as required criteria?	x			While laboratory control samples were present, they were analyzed on a different instrument than samples evaluated on ECD33 or ECD35 thus no qualification will be made based on this data.
Was LCS (%R) within QC Limits?	x			

Criteria	Y	N	NA	Comment
I. Field Duplicates				
Were field duplicates collected?		x		
Were %RPD < 50% for observed analytes?			x	
J. Florisil Cartridge Performance Check				
Were %R within specification.	x			
K. Target Analyte Identification				
RTs of surrogates and reported targets analytes are within calculated window?	x			
%D of target analytes and Toxaphene are calculated to less than 25%?	x			
All cosmographical observation are within QC criteria?	x			
L. GC/MS Confirmation				
GC/MS confirmation is done to specific criteria of both column for single compound concentration ≥ 5 ng/ μ and for Toxaphene concentration of ≥ 125 ng/ μ L?	x			
M. Target Analyte Quantitation and Reported CRQL				
Were target analyte and sample specific CRQL and CF are calculated correctly?	x			
N. EPA Regional QA/QC				
Were QA/QC performed under regional criterion	x			
Were field duplicates collected?		x		

Criteria	Y	N	NA	Comment
O. Overall assessment of data				
Was Overall assessment of data found to be acceptable?	x			

Comments: Due to action above criteria limits of continuous calibration qualification is needed. All results are within Cat. B criterion and usable.

Reviewer Summary :

Samples were handled and analyzed properly under SOP#QA-HWSS-A-010.

- It is noted the CRDL was not within recover limits of Mercury but also was not detected within any samples, no further qualification is needed.
- Within Matrix samples failures in recovery within CR46670 led to qualification with sample CR47004 for metals Barium and Lead as estimate bias high and bias low (J+,J-) values.
- Within laboratory duplicate samples failures in RPD within CR46670 led to qualification with sample CR47004 for Lead as rejected "R" high and Chromium as estimate J" value. Failures in RPD within CR46660 led to qualification with sample CR47005-CR47010 for Lead as estimate "J" value.

Data is within category B criterion and is usable except for rejected value within data.

Job ID: GCR47003

Method 6010D Metals

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Technical Hold Time of aqueous/TCLP/SPLP samples of 180 days preserved with nitric acid (pH>2)?	x			
Technical Hold Time of soil/sediment/wipe samples of 180 days ?	x			
B. Calibration				
Was an initial calibration done when system was set up or after CCV failure?	x			
Were 5 calibration standards and blank run at or below CRQL but above MDL?	x			
Were initial and continuous calibration verification (ICV and CCV) within NFG guidelines of %R (table 3)?	x			
C. Blanks				
Were contaminants found?		x		
Initial Calibration Blank (ICB) was analyzed after standards and run after ICV?	x			
Continuing Calibration Blank (CCB) was ran after every CCV every 2 hrs.	x			

Criteria	Y	N	NA	Comment
D. Laboratory Control Samples				
Was LCS analyzed for every group of aqueous/soil/ sediment /wipes samples in each SDG?(LCS is spiked 2X the CRQL for the associated matrix.)?	x			
Were %Rs within control limit of 70-130%? (Except for Sb and Ag , 50-150%)	x			
E. Matrix Spike/Matrix duplicate				SB-6 / MW-6 14.5-15' and several other samples not within sample package
Were MS and MSD analyzed for SGD?	x			Failures in recovery within CR46670 led to qualification with sample CR47004 for metals Barium and Lead as estimate bias high and bias low "J+,J-" values. See attachment.
Was MS/MSD done every 20 samples ?	x			
Were MS/MSD (%R) and RPD within QC?		x		
F. Duplicate Samples				SB-6 / MW-6 14.5-15' and several other samples not within sample package
Was at least one duplicate sample run per matrix or SDG?	x			Failures in RPD within CR46670 led to qualification with sample CR47004 for Lead as rejected "R" high and Chromium as estimate J" value. Failures in RPD within CR46660 led to qualification with sample CR47005-CR47010 for Lead as estimate "J" value. See attachment.
Were control limit of 50% Relative Percent Difference between 'original' and duplicate?		x		
Were control limit CRQL of <5X found?	x			
G. Serial Dilution				CR46670 and CR46660
Was ICP serial dilution performed on each sample for each group of the same (aqueous/soil/sediment similar matrix or SDG?	x			
Was %D of original compared to dilution $\leq 10\%$?(%D > 15% may be used for soil)	x			

Criteria	Y	N	NA	Comment
H. Performance Evaluation Sample				
Were PE samples analyzed with the field samples and field blanks in SDG?	x			
Were results within warning limits (95% confidence interval) and action limit (99% confidence interval)		x		
I. Regional EPA QA/QC				
Were regional protocols of QA/QC protocols used in evaluating data?	x			
Did RPD fall within specific limits in EPA region's SOP or project QAPP?	x			
J. Overall Assessment of Data				
Was Overall assessment of data found to be acceptable?	x			

Comments: Qualification occurred due to failure in laboratory criteria within duplicate and spike samples. All results are within Cat. B criterion and usable except for rejected value of Lead.

Laboratory report reviewed under:

- USEPA Contract Laboratory Program National Functional Guidance for Organic Superfund Methods Data Review, EPA 542-R-20-005 (January 2020).
- USEPA Contract Laboratory Program National Functional Guidance for Inorganic Superfund Methods Data Review, EPA 542-R-20-006 (January 2020).
- VOA Standard Operation for the Validation of Volatile Data, QA-HWSS-A-004 (March 2022).
- VOA Standard Operation for the Validation of Semivolatile Data, QA-HWSS-A-005 (April 2022).
- Standard Operating Procedure for the Validation of Pesticide Data, QA-HWSS-A-007 (April 2022)
- Standard Operating Procedure for the Validation of ICP-AES Data, QA-HWSS-A-010 (February 2022)
- Method 8260D Volatile Organic Compounds by Gas Chromatography/Mass Spectrometry, revision 4 (June 2018)
- Method 8270E Semivolatile Organic Compounds by Gas Chromatography/Mass Spectrometry, revision 6 (June 2018)
- Method 8082A Polychlorinated Biphenyls (PCBs) by Gas Chromatography (February 2007)
- Method 8081B, Organochlorine Pesticides by Gas Chromatography (February 2007)
- Method 6010D Inductively Coupled Plasma—Optical Emission Spectrometry, revision 5 (June 2018)

- Method 7471B Mercury in Solid or Semisolid Wastes (Manual Cold-Vapor Technique) (February 2007)
- Professional judgment.

Criteria for Data Usability Summary Report

Completeness:

A complete data package is one that has all relevant and related material packaged for distribution to its client in accordance with the Analytical Service Protocol (ASP) Category B Deliverables guidelines.

Compliant:

A compliant data package is one that is determined to have all work that pertains to the production of the laboratory data in a manner that is consistent with the Quality Assurance Program Plan.

Overall Usability Issues:

Data validation completed in accordance with the New York State Department of Environmental Conservation Analytical Service Protocol (NYSDEC ASP) Category B Data Deliverable requirements and reviewer's professional judgment.

This analytical report complies with the following points:

1. Holding Time and Analysis Time
2. Sample Analysis and Quality Control.

In conclusion, the data reviewed in this report is usable data which meets criteria for compliance with methods 8260D, 8270E, 8081.B, 8082A, 6010D and 7471B except for rejected data due to instrument issues as noted in section 8270E. Percent solid method E160.3 was run, and all samples are over 30% solid.

Data Completeness

- A complete Category B data package under the NYSDEC ASP has been reported.

Data Validation Acronyms

AA	Atomic Absorption, Flame Technique
BHC	Hexachlorocyclohexane
BFB	Bromofluorobenzene (Tune check analyte)
CCC	Continuing Calibration Check
CCV	Continuing Calibration Verification
CRDL	Contract Required Detection Limit
CRQL	Contract Required Quantitation Limit
CVAA	Atomic Absorption, Cold Vapor
DCAA	2,4-Dichlorophenylacetic acid
DCB	Decachlorobiphenyl
DFTPP	Decafluorotriphenyl phosphine (Tune check analyte)
DL	Detection Limit
ECD	Electron Capture Detector
FAA	Atomic Absorption, Furnace Technique
FID	Flame Ionization Detector
FNP	1-Fluoronaphthalene
GC	Gas Chromatography
GC/MS	Gas Chromatography/ Mass Spectrometry
GPC	Gel Permeation Chromatography
ICB	Initial Calibration Blank
ICP	Inductively Coupled Plasma – Atomic Emission Spectrometer
ICV	Initial Calibration Verification
IDL	Instrument Detection Limit
ICAL	Initial Calibration Curve
IS	Internal Standard
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LCS/LCSD	Laboratory Control Sample/ Laboratory Control Sample Duplicate
MB	Method Blank
MS	Matrix Spike
BNAMS11	Method of Standard Additions
MSD	Matrix Spike Duplicate
MS/MSD	Matrix Spike/ Matrix Spike Duplicate
ND	Non-detected or Not Detected
PID	Photo Ionization Detector

Data Validation Acronyms

PCB	Polychlorinated biphenyl
PCDD	Polychlorinated dibenzodioxins
PCDF	Polychlorinated dibenzofurans
PQL	Practical Quantitation Limit
QA	Quality Assurance
QA/QC	Quality Assurance/ Quality Control
QC	Quality Control
RF	Response Factor
RPD	Relative Percent Difference
RL	Reporting Limit
RRF	Relative Response Factor
RT	Retention Time
RRT	Relative Retention Time
SDG	Sample Delivery Group
SMC	System Monitoring Compounds/ Surrogates
SPCC	Sample Performance Check Compound
TCX	Tetrachloro-m-xylene
%D	Percent Drift
%R	Percent Recovery
%RSD	Percent Relative Standard Deviation

Data Validation Qualifiers

U	The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit.
J	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
J+	The result is an estimated quantity, but the result may bias high.
J-	The result is an estimated quantity, but the result may bias low.
UJ	The analyte was analyzed for but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
R	The data is unusable. The sample results are rejected due to serious deficiencies in meeting Quality Control (QC) criteria. The analyte may or may not be present in the sample.

Note:

1. These qualifiers are used for data validation purposes. The data validation qualifiers may differ from the qualifiers that the laboratory assigns to the data. Refer to the laboratory analytical report for the definitions of the laboratory qualifiers.
2. The EDDs are assigned these data validation qualifiers and refer to the valid value list supplied by the specific agency or informational data system.

Method Review: 8260D

Lab Job ID: **GCR478033**

Lab ID	Field ID	Collection Date	Matrix
CR48033	SB-8 / MW-8 8`-9`	8/22/2024	Soil
CR48034	DUPE 2	8/22/2024	Soil
CR48035	SB-8 / MW-8 10`-11`	8/22/2024	Soil
CR48036	SB-8 / MW-8 14`-15`	8/22/2024	Soil

Reviewer Summary :

Samples were handled and analyzed properly under USEPA Contract Laboratory Program National Functional Guidance for Super Organic Methods Data and QA-HWSS-A-004 VOA Standard Operation for the Validation of Volatile Data.

- Within initial calibration of instrument CHEM 26, Acetone was above laboratory criteria for %RSD which led to qualification within samples CR48033 and CR480034.
- Within continuous calibration of instrument CHEM03 and CHEM26 several analytes were not within recommended response factor but above minimum RRF values, since no analytes were detected within samples, thus no qualification needed.

Several analytes recoveries were below laboratory criteria of matrix samples led to qualification as non-detect estimate "UJ" values within sample SB-8 / MW-8 14`-15`.

- Within duplicate pair SB-8 / MW-8 8`-9` and DUPE 2 samples detected analyte Acetone result is within acceptable limits of comparison.

Data was qualified within category B criterion and is usable.

Job ID: GCR48033

8260D

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Technical Hold Time of 7 days not preserved or 14 days preserved (pH<2)?	x			
Cooling Temp $\geq 6^{\circ}\text{C}$?	x			
B. GC/MS Instrument Performance Check				
Were BFB performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period?	x			
C. Initial Calibration				
Was a 5-point calibration run?	x			Within initial calibration of instrument CHEM 26, Acetone was above laboratory criteria for %RSD which led to qualification within samples CR48033 and CR480034. See attachment.
Was RSD% with in criteria for each target analyte? Was RRF within criteria?		x		
Was curve fit used for evaluation? If yes, did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was the Initial Calibration Verification (ICV) done after the I.C., were (%D) (%R) within criteria?	x			

Criteria	Y	N	NA	Comment
D. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?	x			Within continuous calibration of instrument CHEM03 and CHEM26 several analytes were not within recommended response factor but above minimum RRF values, since no analytes were detected within samples, thus no qualification needed.
Were (%D) $\leq$ limit and relative response factors (RRF) within criteria?		x		
E. Laboratory Blanks				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 12 hours?	x			
Were contamination found, if so qualification may be necessary?		x		
Subsection : Field Blanks				
Was a field blank associated with each sample of SDG?		x		
Were target compounds detected in it?			x	
F. Surrogate Spikes				
Were surrogate percent recovery (%R) within QC limits?	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			

Criteria	Y	N	NA	Comment
G. Matrix Spike/Matrix Duplicate				SB-8 / MW-8 14'-15'
Were MS and MSD analyzed for SDG?	x			Several analytes recoveries were below laboratory criteria led to qualification as non-detect estimate "UJ" values within sample SB-8 / MW-8 14'-15'. See attachment.
Was MS/MSD done every 20 samples?	x			
Were MS/MSD (%R) and RPD within QC?		x		
H. Field Duplicate				SB-8 / MW-8 8'-9' and DUPE 2
Were field duplicates identified in this SGD?	x			Only Aetone was detected in both samples. Well compared, see attachment.
Were target compounds detected in it? Were RPDs less than 50%?		x		
subsection: Internal Compounds				
Were counts within 50% to 200% of associated calibration standard?	x			
Were retention times within ± 10 sec of cal. standard?	x			
I. Target Analyte Identification				
Mass spectral ion abundance criteria specified for target analyte?	x			
Target analyte RRT outside specified RRT window?	x			
If sample is considered "Solid", is it greater than 30%?	x			
Did the spectrum meet EPA "Functional Guidelines"?	x			
J. Tentative Analyte Identification				
Were analyte results greater than 85% library match?			x	

Criteria	Y	N	NA	Comment
Were National Functional Guidelines followed for TIC processing?			x	
K. Regional EPA QA/QC				
Were regional protocol of QA/AC protocols used in evaluation data?	x			
L. Overall Assessment of Data				
Was overall assessment of data found to be acceptable?	x			

Comments: Qualification due to failure in laboratory criteria within continuous calibration and matrix samples. All data is usable.

Blind Duplicate Comparison

8260D

Well	Original Sample SB-8 / MW-8 8'-9'	Blind Duplicate DUPE 2	Relative Percent Difference
Acetone	45	60	25.00

Reviewer comment: Duplicate pair SB-8 / MW-8 8'-9' and DUPE 2 samples acetone result is within acceptable limits of comparison.

Lab Job ID: GCR48033

Lab ID	Field ID	Collection Date	Matrix
CR48033	SB-8 / MW-8 8`-9`	8/22/2024	Soil
CR48035	SB-8 / MW-8 10`-11`	8/22/2024	Soil
CR48036	SB-8 / MW-8 14`-15`	8/24/2024	Soil

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 protocol Standard Operating Procedure for Validation of Semivolatile Data, QA-HWSS-A-005 along with the EPA's National Functional Guideline for Organic Compounds.

- Within ICV of instrument CHEM36 compounds Hexachlorobenzene and 2-Nitrophenol were not within recommended RRF but did reach minimum RRF value, thus no qualification is needed.
 - 2-Nitroaniline, Di-n-oxyphthalate and 2,4-Dinitrophenol did not meet %D criteria which led to qualification within all samples associated with CCV of non-detect estimate "UJ" values.
 - Hexachlorocyclopentadiene was not within acceptable recovery for matrix samples of SB-8 / MW-8 14`-15` but was qualified as rejected by laboratory control sample, no further qualification needed. Benzoic Acid was below QC limits for RPD/recovery led to qualification of analyte as non-detect estimate "UJ" value within sample.
 - Hexachlorocyclopentadiene is qualified as rejected "R" values within samples due to recovery below laboratory limits within laboratory control sample CR48036LCS.
- Data is qualified within category B criterion and is usable, except for the data qualified as rejected.

Job ID: GCR48033

8270E SIM/Isotope Dilutions

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Were samples within technical hold time and extraction period?	x			
Cooling Temp $\leq 6^{\circ}\text{C}$?	x			
B. GC/MS Instrument Performance Check				
Were DFTPP performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period?	x			
Ion abundance criteria met?	x			
C. Initial Calibration				
Was a 5-point calibration conducted?	x			Within ICV of instrument CHEM36 compounds Hexachlorobenzene and 2-Nitrophenol was not within recommended RRF but did reach minimum RRF value, thus no qualification is needed.
RSD% within acceptable criterion?	x			
Was curve fit used for evaluation? If yes, did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was %D for target analytes within acceptable limit.	x			
Was RRF values meet for target analyte?		x		
Was the Initial Calibration Verification (ICV) done after the I.C.?	x			

Criteria	Y	N	NA	Comment
D. Continuing Calibration				
Was it done every 12 hours after Initial Calibration to verify it?	x			2-Nitroaniline, Di-n-oxyolphthalate and 2,4-Dinitrophenol did not meet %D criteria which led to qualification as non-detect estimate "UJ" values within all samples. See attachment.
Were (%D) and relative response factors (RRF) within acceptable criteria?				
E. Laboratory Blanks				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 20 samples?	x			
Were contamination found, if so qualification may be necessary?		x		
F. Field Blanks/Trip Blank				
Was a field blanks associated with each sample of SDG?		x		
Were target compounds detected in it?			x	
G. Surrogate Spikes (Isotope Dilution Recovery)				
Were surrogate percent recovery (%R) within QC limits?(Tetrahydrofuran-d8)	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
H. Matrix Spike/Matrix Duplicate				SB-8 / MW-8 14'-15' MS/MSD
Were MS and MSD analyzed for SDG?	x			Hexachlorocyclopentadiene was not within acceptable recovery but was qualified as rejected in laboratory control sample, no further qualification needed. Benzoic Acid was below QC limits for RPD/recovery led to qualification of analyte as non-detect estimate "UJ" value within sample. See attachment.
Was MS/MSD done every 20 samples ?	x			
Were MS/MSD (%R) and RPD within QC?		x		

Criteria	Y	N	NA	Comment
I. Laboratory Control Sample				
Was LCS analysis for this SDG?	x			Hexachlorocyclopentadiene is qualified as rejected "R" value within samples due to recovery below laboratory limits within laboratory control sample CR48036LCS. See attachment.
Was LCS analysis per analysis batch?	x			
Was LCS (%R) within QC Limits?		x		
J. Field Duplicate				
Were field duplicates identified in this SDG?		x		
Were target compounds detected in it?			x	
K. Internal Standard				
Was area response within acceptance limits?	x			
Were retention times within ± 30 sec of cal. standard?	x			
L. Compound Quantitation				
Were correct internal standards, quantitation ions and RRF used in quantitate compounds?	x			
Were compound quantitates and RLs adjusted to reflect sample dilutions and dry weights to continuous calibration?	x			
M. Target Compound Identification				
Were relative retention times (RRTs) within ± 0.06 units of standard?	x			
Did the spectrum meet EPA "Functional Guidelines"?	x			
Were chromatograms peaks verified and accounted?	x			
N. Overall Assessment of Data				
Was overall assessment of data found to be acceptable?	x			

Comments: Qualification of samples occurred due to laboratory criteria failure within continuous calibrations, matrix samples, and laboratory control samples. Data within Cat. B criterion and usable, except for the data that is qualified as rejected.

Reviewer Comment: Due to recovery below laboratory limit for Hexachlorocyclopentadiene within laboratory control sample, analyte is qualified as rejected "R" value for within samples. Qualification of several analytes as non-detect estimate "UJ" values is due to %D results above laboratory limit within associated CCV.

Reviewer Comment: Due to recovery below laboratory limit for Hexachlorocyclopentadiene within laboratory control sample, analyte is qualified as rejected "R" value for within samples. Qualification of several analytes as non-detect estimate "UJ" values is due to %D results above laboratory limit within associated CCV. Reviewer Comment: Due to recovery below laboratory limit for associated matrix spike samples, analyte Benzoic Acid is qualified as non-detected estimate "UJ" values for within sample.

CR48035	SB-8 / MW-8 10`-11`	8/22/2024	Soil
CR48036	SB-8 / MW-8 14`-15`	8/22/2024	Soil

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 protocol Standard Operating Procedure for Validation of Polychlorinated Biphenyl (PCB) Aroclor Data, SOP#QA-HWSS-A-006.

- It is noted by reviewer that QA/QC samples laboratory blanks, laboratory control samples and matrix samples were all conducted on instrument ECD08 while samples were analyzed on ECD03. Samples are evaluated based on data collected on instrument such as surrogates, initial and continuing calibrations. If analytes were detected, they would be qualified as estimate "J" values.

All data is with in category B criterion and usable.

Criteria	Y	N	NA	Comment
A. Sample Receipt				
With in technical hold time and extraction period?	x			
Cooling Temp = >6 °C	x			
B. Initial Calibration				
Was a 5 point calibration?	x			
RSD% for CF are within verification perimeter?	x			
Verified RT window. CFs and RSD are calculated and within bounds?	x			
C. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?	x			
Were (%D) and relative respond factors (RRF) within bounds of CCV.	x			
Were the RTs of each target and surrogate in Arcelor standard (C3) and within RT window?	x			
D. Laboratory/Field Blanks				
Was a lab blank associated with each sample of SDG?		x		Samples run on instrument EDC03 had no blank run on the instrument, no analytes are detected in any associated samples. No further qualification needed.
Was blank analyzed every 20 samples?	x			
Were sulfur blanks run if needed?		x		
Were contamination found, if so qualification may be necessary.		x		

Criteria	Y	N	NA	Comment
E. Surrogate Spikes				
Were Surrogate percent recovery (%R) within QC limits?	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
F. Matrix Spike/Matrix Duplicate				
Were MS and MSD analyzed for SDG?	x			While matrix samples were present, they were analyzed on a different instrument than samples evaluated on ECD03 thus no qualification will be made based on this data.
Were MS/MSD (%R) and RPD within QC?	x			
G. Laboratory Control Sample				
Was LCS analysis for this SDG?	x			While laboratory control samples were present, they were analyzed on a different instrument than samples evaluated on ECD03 thus no qualification will be made based on this data.
Was LCS (%R) QC Limits?	x			
H. Target Analyte Identification				
Were relative retention times (RRTs) within ± 0.05 units of standard?	x			
Did the spectrum meet EPA "Functional Guidelines"?	x			
Were chromatograms peaks verified and accounted?	x			
I. GC/MS Confirmation				
GC/MS was performed at least one peak concentration ≥ 10 ng/ μ L.	x			
J. Target Analyte Quantitation and Reported CRQL				
Were target analyte and sample specific CRQL calculated correctly?	x			

Criteria	Y	N	NA	Comment
K. Field Duplicates				
Were Field Duplicated identified within sample package?		x		
Was RPD less than 50%?			x	
L. EPA Regional QA/QC				
Were QA/QC performed under regional criterion?	x			
Were field duplicates collected?	x			
M. Overall Assessment of Data				
Was Overall assessment of data found to be acceptable?	x			

Comments: All results are within Cat. B criterion and usable.

Method Review: 8081B Pesticides

Lab Job ID: GCR48033

Lab ID	Field ID	Collection Date	Matrix
CR48033	SB-8 / MW-8 8`-9`	8/22/2024	Soil
CR48035	SB-8 / MW-8 10`-11`	8/22/2024	Soil
CR48036	SB-8 / MW-8 14`-15`	8/22/2024	Soil

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 Standard Operating Procedure for Validation of Pesticides Data, QA-HWSS-A_007.

- It is noted by reviewer that QA/QC samples laboratory blanks, laboratory control samples and matrix samples were all conducted on instrument ECD35 while samples were analyzed on ECD33. Samples are evaluated based on data collected on instrument such as surrogates, initial and continuing calibrations. No analytes were detected, thus no qualification needed.
- Within Continues Calibrations, Endosulfan I was above laboratory limits %D of CCV of instrument ECD33 associated with sample CR48035 and CR48036. Endosulfan I and Endosulfan II was above laboratory limits %D of CCV of instrument ECD33 associated with sample CR48033. Samples will have these analyte qualified as a non-detect estimate "UJ" values.
- It is noted confirmation did not meet %D for CR48036 LCS/LCSDS of 40%, no further qualification needed.

All data is within category B criterion and usable.

Criteria	Y	N	NA	Comment
A. Sample Receipt				
With in technical hold time and extraction period?	x			
Cooling Temp = >6°C	x			
B. GC/ECD Instrument Performance Check				
Were Resolution Check Mixture (RESC) run and resolution criteria?	x			
Was PEM analysis performed within criteria for compound?	x			
Were Mid-point individual standard mixture performed and %resolution with in criteria?	x			
C. Initial Calibration				
Was the 5 point calibration with all mixtures and concentration run under criteria?	x			
Was a single point of Toxaphene at low standard in ICAL or five point Toxaphene independent runs?	x			
Were %RSD lower than criteria?	x			
D. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?			x	Endosulfan I was above laboratory limits %D of CCV of instrument ECD33 associated with sample CR48035 and CR48036. Endosulfan I and Endosulfan II was above laboratory limits %D of CCV of instrument ECD33 associated with sample CR48033. Samples will have these analyte qualified as a non-detect estimate "UJ" values. See attachment.
Were (%D), relative respond factors (RRF) and RT within criteria?		x		
Time elapse between CCV, Instrumental Blank, CCV PEM, CS3 did not exceed 14 hrs.?	x			
PEM % breakdown did not exceed criteria?	x			

Criteria	Y	N	NA	Comment
E. Blanks				
Was a lab blank associated with each sample of SDG?	x			While blanks were present, they were analyzed on a different instrument than samples evaluated on ECD33, thus all detection will be qualified as estimate "J" values. No analytes were detected, no further qualification.
Were sulfur blanks run if needed?		x		
Were TCLP/ SPL Leachate Extractions Blanks (LEB) prepared and extracted at specific frequency?		x		
Were contaminants found, if so qualification may be necessary?		x		
F. Surrogate spikes				
Did Spike contain two surrogates (TCX and DCM) ran in all sample including blanks and standards?	x			
Were Surrogate percent recovery (%R) with in QC limits? (30-150%)	x			
Were RT of Surrogates calculated for each sample?	x			
G. Matrix Spike/Matrix duplicate				
Were MS and MSD analyzed for SDG or matrix?	x			While matrix samples were present, they were analyzed on a different instrument than samples evaluated on ECD33, thus no qualification will be made based on this data.
Was MS/MSD done at specific frequency required by criteria?	x			
Were MS/MSD (%R) and RPD within QC?	x			
H. Laboratory control sample				
Was LCS analysis for this SDG and at specific frequency as required criteria?	x			While laboratory control samples were present, they were analyzed on a different instrument than samples evaluated on ECD33, thus no qualification will be made based on this data.
Was LCS (%R) within QC Limits?	x			

Criteria	Y	N	NA	Comment
I. Field Duplicates				
Were field duplicates collected?		x		
Were %RPD < 50% for observed analytes?			x	
J. Florisil Cartridge Performance Check				
Were %R within specification.	x			
K. Target Analyte Identification				
RTs of surrogates and reported targets analytes are within calculated window?	x			
%D of target analytes and Toxaphene are calculated to less than 25%?	x			
All cosmographical observation are within QC criteria?	x			
L. GC/MS Confirmation				
GC/MS confirmation is done to specific criteria of both column for single compound concentration ≥ 5 ng/ μ and for Toxaphene concentration of ≥ 125 ng/ μ L?	x			Confirmation did not meet %D for CR48036 LCS/LCSDS of 40%, no further qualification needed.
M. Target Analyte Quantitation and Reported CRQL				
Were target analyte and sample specific CRQL and CF are calculated correctly?	x			
N. EPA Regional QA/QC				
Were QA/QC performed under regional criterion	x			
Were field duplicates collected?		x		

Criteria	Y	N	NA	Comment
O. Overall assessment of data				
Was Overall assessment of data found to be acceptable?	x			

Comments: Due to action above criteria limits of continuous calibration qualification is needed. All results are within Cat. B criterion and usable.

Reviewer Summary :

Samples were handled and analyzed properly under SOP#QA-HWSS-A-010.

- It is noted the CRDL was not within recover limits of Mercury but also was no detected within any samples, no further qualification is needed.
- Within laboratory duplicate samples Arsenic failure in RPD occurred in sample CR47889 which was not part of the sample package . No further qualification is needed.

Data is within category B criterion and is usable.

Laboratory: Phoenix Environmental Laboratories, INC (NELAP #NY11301)

Site: Newton Plaza Associates, LLC

Job ID: GCR48033

Method 6010D Metals

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Technical Hold Time of aqueous/TCLP/SPLP samples of 180 days preserved with nitric acid (pH>2)?	x			
Technical Hold Time of soil/sediment/wipe samples of 180 days ?	x			
B. Calibration				
Was an initial calibration done when system was set up or after CCV failure?	x			
Were 5 calibration standards and blank run at or below CRQL but above MDL?	x			
Were initial and continuous calibration verification (ICV and CCV) within NFG guidelines of %R (table 3)?	x			
C. Blanks				
Were contaminants found?		x		
Initial Calibration Blank (ICB) was analyzed after standards and run after ICV?	x			
Continuing Calibration Blank (CCB) was ran after every CCV every 2 hrs.	x			

Criteria	Y	N	NA	Comment
D. Laboratory Control Samples				
Was LCS analyzed for every group of aqueous/soil/ sediment /wipes samples in each SDG?(LCS is spiked 2X the CRQL for the associated matrix.)?	x			
Were %Rs within control limit of 70-130%? (Except for Sb and Ag , 50-150%)	x			
E. Matrix Spike/Matrix duplicate				SB-8 / MW-8 14' -15' Mercury and CR47889
Were MS and MSD analyzed for SGD?	x			
Was MS/MSD done every 20 samples ?	x			
Were MS/MSD (%R) and RPD within QC?	x			
F. Duplicate Samples				SB-8 / MW-8 14' -15' Mercury and CR47889
Was at least one duplicate sample run per matrix or SDG?	x			Arsenic failure in RPD occurred in sample CR47889 which was not part of the sample package . No further qualification is needed.
Were control limit of 50% Relative Percent Difference between 'original' and duplicate?		x		
Were control limit CRQL of <5X found?	x			
G. Serial Dilution				CR47889
Was ICP serial dilution performed on each sample for each group of the same (aqueous/soil/sediment similar matrix or SDG?	x			
Was %D of original compared to dilution $\leq 10\%$?(%D > 15% may be used for soil)	x			
H. Performance Evaluation Sample				
Were PE samples analyzed with the field samples and field blanks in SDG?	x			

Criteria	Y	N	NA	Comment
Were results within warning limits (95% confidence interval) and action limit (99% confidence interval)	x			
I. Regional EPA QA/QC				
Were regional protocols of QA/QC protocols used in evaluating data?	x			
Did RPD fall within specific limits in EPA region's SOP or project QAPP?	x			
J. Overall Assessment of Data				
Was Overall assessment of data found to be acceptable?	x			

Comments: All results are within Cat. B criterion and usable.

- Method 8081B, Organochlorine Pesticides by Gas Chromatography (February 2007)
- Method 6010D Inductively Coupled Plasma—Optical Emission Spectrometry, revision 5 (June 2018)
- Method 7471B Mercury in Solid or Semisolid Wastes (Manual Cold-Vapor Technique) (February 2007)
- Professional judgment.

Criteria for Data Usability Summary Report

Completeness:

A complete data package is one that has all relevant and related material packaged for distribution to its client in accordance with the Analytical Service Protocol (ASP) Category B Deliverables guidelines.

Compliant:

A compliant data package is one that is determined to have all work that pertains to the production of the laboratory data in a manner that is consistent with the Quality Assurance Program Plan.

Overall Usability Issues:

Data validation completed in accordance with the New York State Department of Environmental Conservation Analytical Service Protocol (NYSDEC ASP) Category B Data Deliverable requirements and reviewer's professional judgment.

This analytical report complies with the following points:

1. Holding Time and Analysis Time
2. Sample Analysis and Quality Control.

In conclusion, the data reviewed in this report is usable data which meets criterion for compliance with methods 8260D, 8270E, 8081.B, 8082A, 6010D and 7471B except for rejected data due to instrument issues as noted in section 8270E. Percent solid method E160.3 was run, and all samples are over 30% solid.

Data Completeness

- A complete Category B data package under the NYSDEC ASP has been reported.

Data Validation Acronyms

AA	Atomic Absorption, Flame Technique
BHC	Hexachlorocyclohexane
BFB	Bromofluorobenzene (Tune check analyte)
CCC	Continuing Calibration Check
CCV	Continuing Calibration Verification
CRDL	Contract Required Detection Limit
CRQL	Contract Required Quantitation Limit
CVAA	Atomic Absorption, Cold Vapor
DCAA	2,4-Dichlorophenylacetic acid
DCB	Decachlorobiphenyl
DFTPP	Decafluorotriphenyl phosphine (Tune check analyte)
DL	Detection Limit
ECD	Electron Capture Detector
FAA	Atomic Absorption, Furnace Technique
FID	Flame Ionization Detector
FNP	1-Fluoronaphthalene
GC	Gas Chromatography
GC/MS	Gas Chromatography/ Mass Spectrometry
GPC	Gel Permeation Chromatography
ICB	Initial Calibration Blank
ICP	Inductively Coupled Plasma – Atomic Emission Spectrometer
ICV	Initial Calibration Verification
IDL	Instrument Detection Limit
ICAL	Initial Calibration Curve
IS	Internal Standard
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LCS/LCSD	Laboratory Control Sample/ Laboratory Control Sample Duplicate
MB	Method Blank
MS	Matrix Spike
BNAMS11	Method of Standard Additions
MSD	Matrix Spike Duplicate
MS/MSD	Matrix Spike/ Matrix Spike Duplicate
ND	Non-detected or Not Detected
PID	Photo Ionization Detector

Data Validation Acronyms

PCB	Polychlorinated biphenyl
PCDD	Polychlorinated dibenzodioxins
PCDF	Polychlorinated dibenzofurans
PQL	Practical Quantitation Limit
QA	Quality Assurance
QA/QC	Quality Assurance/ Quality Control
QC	Quality Control
RF	Response Factor
RPD	Relative Percent Difference
RL	Reporting Limit
RRF	Relative Response Factor
RT	Retention Time
RRT	Relative Retention Time
SDG	Sample Delivery Group
SMC	System Monitoring Compounds/ Surrogates
SPCC	Sample Performance Check Compound
TCX	Tetrachloro-m-xylene
%D	Percent Drift
%R	Percent Recovery
%RSD	Percent Relative Standard Deviation

Data Validation Qualifiers

U	The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit.
J	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
J+	The result is an estimated quantity, but the result may bias high.
J-	The result is an estimated quantity, but the result may bias low.
UJ	The analyte was analyzed for but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
R	The data is unusable. The sample results are rejected due to serious deficiencies in meeting Quality Control (QC) criteria. The analyte may or may not be present in the sample.

Note:

1. These qualifiers are used for data validation purposes. The data validation qualifiers may differ from the qualifiers that the laboratory assigns to the data. Refer to the laboratory analytical report for the definitions of the laboratory qualifiers.
2. The EDDs are assigned these data validation qualifiers and refer to the valid value list supplied by the specific agency or informational data system.

Reviewer Summary :

Samples were handled and analyzed properly under USEPA Contract Laboratory Program National Functional Guidance for Super Organic Methods Data and QA-HWSS-A-004 VOA Standard Operation for the Validation of Volatile Data.

- Within initial calibration of instrument CHEM 18, Acetone was above laboratory criteria for %RSD, which led to qualification within two associated samples, CR48044 and CR48045 as estimate "J" values.
- Within continuous calibration of instrument CHEM18 analyte Acetone %deviations (%D) was above laboratory criteria leading to qualification of non-detect estimates "UJ" values with associated samples.
- No analytes were detected within field duplicate samples SB-10/MW-10 19-20' and DUP-3, no further qualification is needed.
- Sample CR48045 had internal standards 1,4-Dichlorobenzene-d4 and Chlorobenzene-d5 area below 50% which lead to associated analytes to be qualified as non-detect estimate "UJ" values.

Data was qualified within category B criterion and is usable.

8260D

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Technical Hold Time of 7 days not preserved or 14 days preserved (pH<2)?	x			
Cooling Temp $\geq 6^{\circ}\text{C}$?	x			
B. GC/MS Instrument Performance Check				
Were BFB performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period?	x			
C. Initial Calibration				
Was a 5-point calibration run?	x			Within initial calibration of instrument CHEM 18, Acetone was above laboratory criteria for %RSD, which led to qualification within two associated samples, CR48044 and CR48045 as estimate "J" values. See attachment
Was RSD% with in criteria for each target analyte? Was RRF within criteria?		x		
Was curve fit used for evaluation? If yes, did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was the Initial Calibration Verification (ICV) done after the I.C., were (%D) (%R) within criteria?	x			

Criteria	Y	N	NA	Comment
D. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?	x			Within continuous calibration of instrument CHEM18 analyte Acetone %deviations (%D) was above laboratory criteria leading to qualification of non-detect estimates "UJ" values with associated samples. See attachment.
Were (%D) $\leq$ limit and relative response factors (RRF) within criteria?		x		
E. Laboratory Blanks				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 12 hours?	x			
Were contamination found, if so qualification may be necessary?		x		
Subsection : Field Blanks				TRIP BLANK LL and TRIP BLANK HL
Was a field blank associated with each sample of SDG?	x			
Were target compounds detected in it?		x		
F. Surrogate Spikes				
Were surrogate percent recovery (%R) within QC limits?	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			

Criteria	Y	N	NA	Comment
G. Matrix Spike/Matrix Duplicate				CR48270 MS-H
Were MS and MSD analyzed for SDG?	x			While a matrix sample was present it was not associate with an other samples within batch, no further qualification is needed.
Was MS/MSD done every 20 samples?	x			
Were MS/MSD (%R) and RPD within QC?	x			
H. Field Duplicate				SB-10/MW-10 19-20' and DUP-3
Were field duplicates identified in this SGD?	x			No analytes were detected within field duplicate samples SB-10/MW-10 19-20' and DUP-3, no further qualification is needed.
Were target compounds detected in it? Were RPDs less than 50%?			x	
subsection: Internal Compounds				
Were counts within 50% to 200% of associated calibration standard?		x		Sample CR48045 had internal standards 1,4-Dichlorobenzene-d4 and Chlorobenzene-d5 area below 50% which lead to associated analytes to be qualified as non-detect estimate "UJ" values. See attachment.
Were retention times within ± 10 sec of cal. standard?	x			
I. Target Analyte Identification				
Mass spectral ion abundance criteria specified for target analyte?	x			
Target analyte RRT outside specified RRT window?	x			
If sample is considered "Solid", is it greater that 30%?	x			
Did the spectrum meet EPA "Functional Guidelines"?	x			

Criteria	Y	N	NA	Comment
J. Tentative Analyte Identification				
Were analyte results greater than 85% library match?			x	
Were National Functional Guidelines followed for TIC processing?			x	
K. Regional EPA QA/QC				
Were regional protocol of QA/AC protocols used in evaluation data?	x			
L. Overall Assessment of Data				
Was overall assessment of data found to be acceptable?	x			

Comments: Qualification due to failure in laboratory criteria within initial calibration, continuous calibration and internal compounds (standards). All data is usable.

r=Result Reported U=Not Detected D=Reported Dilution E/J=Estimated Value X=Not Used S=Lab Solvent

Reviewer Comment: Due to recovery below 50% of internal standard 1,4-Dichlorobenzene-d4 and Chlorobenzene-d5 lead to qualification of associated analytes within sample as non-detect estimate "UJ" values. Qualification Acetone as estimate "J" values is due to %RSD results above laboratory limit within associated ICV.

Reviewer Summary :

Samples were handled and analyzed properly under USEPA Contract Laboratory Program National Functional Guidance for Super Organic Methods Data and QA-HWSS-A-004 VOA Standard Operation for the Validation of Volatile Data.

- Within continuous calibration analyte Naphthalene was above %deviation (%D) which led to qualification of analytes as non-detect estimates "UJ" value within sample.
- No analytes were detected within sample thus no further qualification needed on associated solid samples.

Data was qualified within category B criterion and is usable.

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Technical Hold Time of 7 days not preserved or 14 days preserved (pH<2)?	x			
Cooling Temp $\geq 6^{\circ}\text{C}$?	x			
B. GC/MS Instrument Performance Check				
Were BFB performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period?	x			
C. Initial Calibration				
Was a 5-point calibration run?	x			
Was RSD% with in criteria for each target analyte? Was RRF within criteria?	x			
Was curve fit used for evaluation? If yes, did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was the Initial Calibration Verification (ICV) done after the I.C., were (%D) (%R) within criteria?	x			

Criteria	Y	N	NA	Comment
D. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?	x			Analyte Naphthalene was above %deviation (%D) which led to qualification of analytes as non-detect estimates "UJ" value within sample. See attachment.
Were (%D) $\leq$ limit and relative response factors (RRF) within criteria?		x		
E. Laboratory Blanks				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 12 hours?	x			
Were contamination found, if so qualification may be necessary?		x		
Subsection : Field Blanks				EQUIPMENT BLANK
Was a field blank associated with each sample of SDG?	x			
Were target compounds detected in it?		x		
F. Surrogate Spikes				
Were surrogate percent recovery (%R) within QC limits?	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
G. Matrix Spike/Matrix Duplicate				
Were MS and MSD analyzed for SDG?		x		
Was MS/MSD done every 20 samples?			x	
Were MS/MSD (%R) and RPD within QC?			x	

Criteria	Y	N	NA	Comment
H. Field Duplicate				
Were field duplicates identified in this SGD?		X		
Were target compounds detected in it? Were RSPs less than 50%?			X	
subsection: Internal Compounds				
Were counts within 50% to 200% of associated calibration standard?	X			
Were retention times within ± 10 sec of cal. standard?	X			
I. Target Analyte Identification				
Mass spectral ion abundance criteria specified for target analyte?	X			
Target analyte RRT outside specified RRT window?	X			
If sample is considered "Solid", is it greater than 30%?			X	
Did the spectrum meet EPA "Functional Guidelines"?	X			
J. Tentative Analyte Identification				
Were analyte results greater than 85% library match?			X	
Were National Functional Guidelines followed for TIC processing?			X	
K. Regional EPA QA/QC				
Were regional protocol of QA/AC protocols used in evaluation data?	X			
L. Overall Assessment of Data				
Was overall assessment of data found to be acceptable?	X			

Comments: Qualification due to failure with continuous calibration. Data is usable.

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 protocol Standard Operating Procedure for Validation of Semivolatile Data, QA-HWSS-A-005 along with the EPA's National Functional Guideline for Organic Compounds.

- Within ICV of instrument CHEM36 compounds Hexachlorobenzene and 2-Nitrophenol were not within recommended RRF but did reach minimum RRF value, thus no qualification is needed.
- 2-Nitroaniline, Di-n-oxyphthalate and 2,4-Dinitrophenol did not meet %D criteria which led to qualification within all samples associated with CCVs led to qualification of non-detect estimate "UJ" values within all samples
- Hexachlorocyclopentadiene was not within acceptable recovery for matrix samples of CR48036 but was qualified as reject by laboratory control sample, no further qualification needed. Benzoic Acid was below QC limits for RPD/recovery but sample CR was not part of the SDG, no qualification needed.
- Hexachlorocyclopentadiene is qualified as rejected "R" values within samples due to recovery below laboratory limits within laboratory control sample CR48036LCS.

Data is qualified within category B criterion and is usable, except for the data qualified as rejected.

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Were samples within technical hold time and extraction period?	x			
Cooling Temp $\leq 6^{\circ}\text{C}$?	x			
B. GC/MS Instrument Performance Check				
Were DFTPP performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period?	x			
Ion abundance criteria met?	x			
C. Initial Calibration				
Was a 5-point calibration conducted?	x			Within ICV of instrument CHEM36 compounds Hexachlorobenzene and 2-Nitrophenol were not within recommended RRF but did reach minimum RRF value, thus no qualification is needed.
RSD% within acceptable criterion?	x			
Was curve fit used for evaluation? If yes, did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was %D for target analytes within acceptable limit.	x			
Was RRF values meet for target analyte?		x		
Was the Initial Calibration Verification (ICV) done after the I.C.?	x			

Criteria	Y	N	NA	Comment
D. Continuing Calibration				
Was it done every 12 hours after Initial Calibration to verify it?	x			2-Nitroaniline, Di-n-oxyolphthalate and 2,4-Dinitrophenol did not meet %D criteria which led to qualification within all samples associated with CCVs led to qualification of non-detect estimate "UJ" values within all samples. See attachment.
Were (%D) and relative response factors (RRF) within acceptable criteria?				
E. Laboratory Blanks				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 20 samples?	x			
Were contamination found, if so qualification may be necessary?		x		
F. Field Blanks/Trip Blank				
Was a field blanks associated with each sample of SDG?		x		
Were target compounds detected in it?			x	
G. Surrogate Spikes (Isotope Dilution Recovery)				
Were surrogate percent recovery (%R) within QC limits?(Tetrahydrofuran-d8)	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
H. Matrix Spike/Matrix Duplicate				CR48036
Were MS and MSD analyzed for SDG?	x			Hexachlorocyclopentadiene was not within acceptable recovery but was qualified as reject by laboratory control sample, no further qualification needed. Benzoic Acid was below QC limits for RPD/recovery but sample CR was not part of the SDG, no qualification needed.
Was MS/MSD done every 20 samples ?	x			
Were MS/MSD (%R) and RPD within QC?		x		

Criteria	Y	N	NA	Comment
I. Laboratory Control Sample				
Was LCS analysis for this SDG?	x			Hexachlorocyclopentadiene is qualified as rejected "R" values within samples due to recovery below laboratory limits within laboratory control sample CR48036LCS. See attachment.
Was LCS analysis per analysis batch?	x			
Was LCS (%R) within QC Limits?		x		
J. Field Duplicate				
Were field duplicates identified in this SDG?		x		
Were target compounds detected in it?			x	
K. Internal Standard				
Was area response within acceptance limits?	x			
Were retention times within ± 30 sec of cal. standard?	x			
L. Compound Quantitation				
Were correct internal standards, quantitation ions and RRF used in quantitate compounds?	x			
Were compound quantitates and RLs adjusted to reflect sample dilutions and dry weights to continuous calibration?	x			
M. Target Compound Identification				
Were relative retention times (RRTs) within ± 0.06 units of standard?	x			
Did the spectrum meet EPA "Functional Guidelines"?	x			
Were chromatograms peaks verified and accounted?	x			
N. Overall Assessment of Data				
Was overall assessment of data found to be acceptable?	x			

Comments: Qualification of samples occurred due to laboratory criteria failure within continuous calibrations and laboratory control samples. Data within Cat. B criterion and usable, except for the data that is qualified as rejected.

Reviewer Comment: Due to recovery below laboratory limit for Hexachlorocyclopentadiene within laboratory control sample, analyte is qualified as rejected "R" value for within samples. Qualification of several analytes as non-detect estimate "UJ" values is due to %D results above laboratory limit within associated CCV.

Reviewer Comment: Due to recovery below laboratory limit for Hexachlorocyclopentadiene within laboratory control sample, analyte is qualified as rejected "R" value for within samples. Qualification of several analytes as non-detect estimate "UJ" values is due to %D results above laboratory limit within associated CCV.

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 Standard Operating Procedure for Validation of Pesticides Data, QA-HWSS-A_007.

- It is noted by reviewer that QA/QC samples laboratory blanks, laboratory control samples and matrix samples were conducted on instrument ECD35 and EDC04 while samples were analyzed on ECD33 and ECD35 at different times. Samples are evaluated based on data collected on instrument such as surrogates, initial and continuing calibrations. Detected analytes will be qualified as estimate "J" values.

- Within Continues Calibrations, Several analytes were above laboratory limits of the CCVs of instrument ECD33 and ECD35 associated with the SDG GC48041 in which all the samples were analyzed. All sample will have these analytes qualified as a non-detect estimate "UJ" values.

- Confirmation did not meet %D for CR48036 LCS/LSCD and CR52284MS/MSD of 40%, no further qualification needed..

All data is within category B criterion and usable.

Method 8081B Pesticides

Criteria	Y	N	NA	Comment
A. Sample Receipt				
With in technical hold time and extraction period?	x			
Cooling Temp = >6°C	x			
B. GC/ECD Instrument Performance Check				
Were Resolution Check Mixture (RESC) run and resolution criteria?	x			
Was PEM analysis performed within criteria for compound?	x			
Were Mid-point individual standard mixture performed and %resolution with in criteria?	x			
C. Initial Calibration				
Was the 5 point calibration with all mixtures and concentration run under criteria?	x			
Was a single point of Toxaphene at low standard in ICAL or five point Toxaphene independent runs?	x			
Were %RSD lower than criteria?	x			
D. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?			x	Several analytes were above laboratory limits of the CCVs of instrument ECD33 and ECD35 associated with the SDG GC48041 in which all the samples were analyzed. All sample will have these analytes qualified as a non-detect estimate "UJ" values. Please see attachment.
Were (%D), relative respond factors (RRF) and RT within criteria?		x		
Time elapse between CCV, Instrumental Blank, CCV PEM, CS3 did not exceed 14 hrs.?	x			
PEM % breakdown did not exceed criteria?	x			

Criteria	Y	N	NA	Comment
E. Blanks				
Was a lab blank associated with each sample of SDG?	x			While blanks were present, they were analyzed on a different times and instrument than samples evaluated on ECD33 and ECD35 thus all detection will be qualified as estimate "J" values with in all samples.
Were sulfur blanks run if needed?		x		
Were TCLP/ SPL Leachate Extractions Blanks (LEB) prepared and extracted at specific frequency?		x		
Were contaminants found, if so qualification may be necessary?		x		
F. Surrogate spikes				
Did Spike contain two surrogates (TCX and DCM) ran in all sample including blanks and standards?	x			
Were Surrogate percent recovery (%R) with in QC limits? (30-150%)	x			
Were RT of Surrogates calculated for each sample?	x			
G. Matrix Spike/Matrix duplicate				
Were MS and MSD analyzed for SDG or matrix?	x			While matrix samples were present, they were analyzed on a different times and instrument than samples evaluated on ECD33 and ECD35 thus no qualification will be made based on this data.
Was MS/MSD done at specific frequency required by criteria?	x			
Were MS/MSD (%R) and RPD within QC?	x			
H. Laboratory control sample				
Was LCS analysis for this SDG and at specific frequency as required criteria?	x			While laboratory control samples were present, they were analyzed on a different times and instrument than samples evaluated on ECD33 and ECD35 thus no qualification will be made based on this data.
Was LCS (%R) within QC Limits?	x			

Criteria	Y	N	NA	Comment
I. Field Duplicates				
Were field duplicates collected?		x		
Were %RPD < 50% for observed analytes?			x	
J. Florisil Cartridge Performance Check				
Were %R within specification.	x			
K. Target Analyte Identification				
RTs of surrogates and reported targets analytes are within calculated window?	x			
%D of target analytes and Toxaphene are calculated to less than 25%?	x			
All cosmographical observation are within QC criteria?	x			
L. GC/MS Confirmation				
GC/MS confirmation is done to specific criteria of both column for single compound concentration ≥ 5 ng/ μ and for Toxaphene concentration of ≥ 125 ng/ μ L?	x			Confirmation did not meet %D for CR48036 LCS/LSCD and CR52284MS/MSD of 40%, no further qualification needed.
M. Target Analyte Quantitation and Reported CRQL				
Were target analyte and sample specific CRQL and CF are calculated correctly?	x			
N. EPA Regional QA/QC				
Were QA/QC performed under regional criterion	x			
Were field duplicates collected?		x		

Criteria	Y	N	NA	Comment
O. Overall assessment of data				
Was Overall assessment of data found to be acceptable?	x			

Comments: Due to action above criteria limits of continuous calibration qualification is needed. Qualification also due to lack of QA/QC data from sample associated instrument. All results are within Cat. B criterion and usable.

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 protocol Standard Operating Procedure for Validation of Polychlorinated Biphenyl (PCB) aroclor Data, SOP#QA-HWSS-A-006.

- It is noted by reviewer that QA/QC samples laboratory blanks, laboratory control samples and matrix samples were all conducted on instrument ECD08 while samples were analyzed on ECD03. Samples are evaluated based on data collected on instrument such as surrogates, initial and continuing calibrations. If analytes were detected, they would be qualified as estimate "J" values. QA/QC samples were run on ECD29, thus all normal qualification occurred on associated samples.

- While calibration for ECD29 file 903A003 had a failure in %D of Aroclor 1260-3, it was not over 25% as stated in SOP. No further qualification needed.

All data is with in category B criterion and usable.

Criteria	Y	N	NA	Comment
A. Sample Receipt				
With in technical hold time and extraction period?	x			
Cooling Temp = >6 °C	x			
B. Initial Calibration				
Was a 5 point calibration?	x			
RSD% for CF are within verification perimeter?	x			
Verified RT window. CFs and RSD are calculated and within bounds?	x			
C. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?	x			calibration for ECD29 file 903A003 had a failure in %D of Aroclor 1260-3, it was not over 25% as stated in SOP. No further qualification needed.
Were (%D) and relative respond factors (RRF) within bounds of CCV.	x			
Were the RTs of each target and surrogate in Arcelor standard (C3) and within RT window?		x		
D. Laboratory/Field Blanks				
Was a lab blank associated with each sample of SDG?		x		Samples run on instrument EDC03 had no blank run on the instrument, no analytes are detected in any associated samples. No further qualification needed. Blanks associated with ECD29 were within laboratory criteria.
Was blank analyzed every 20 samples?	x			
Were sulfur blanks run if needed?		x		
Were contamination found, if so qualification may be necessary.		x		

Criteria	Y	N	NA	Comment
E. Surrogate Spikes				
Were Surrogate percent recovery (%R) within QC limits?	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
F. Matrix Spike/Matrix Duplicate				
Were MS and MSD analyzed for SDG?	x			Matrix samples were not evaluated on ECD03 thus no qualification will be made based on this data. Matrix sample associated with ECD29 were within laboratory criteria.
Were MS/MSD (%R) and RPD within QC?	x			
G. Laboratory Control Sample				
Was LCS analysis for this SDG?	x			Laboratory control samples were not evaluated on ECD03 thus no qualification will be made based on this data. Laboratory control sample associated with ECD29 were within laboratory criteria.
Was LCS (%R) QC Limits?	x			
H. Target Analyte Identification				
Were relative retention times (RRTs) within ± 0.05 units of standard?	x			
Did the spectrum meet EPA "Functional Guidelines"?	x			
Were chromatograms peaks verified and accounted?	x			
I. GC/MS Confirmation				
GC/MS was performed at least one peak concentration ≥ 10 ng/ μ L.	x			
J. Target Analyte Quantitation and Reported CRQL				
Were target analyte and sample specific CRQL calculated correctly?	x			

Criteria	Y	N	NA	Comment
K. Field Duplicates				
Were Field Duplicated identified within sample package?		x		
Was RPD less than 50%?			x	
L. EPA Regional QA/QC				
Were QA/QC performed under regional criterion?	x			
Were field duplicates collected?	x			
M. Overall Assessment of Data				
Was Overall assessment of data found to be acceptable?	x			

Comments: All results are within Cat. B criterion and usable.

Method 6010D Metals

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Technical Hold Time of aqueous/TCLP/SPLP samples of 180 days preserved with nitric acid (pH>2)?	x			
Technical Hold Time of soil/sediment/wipe samples of 180 days ?	x			
B. Calibration				
Was an initial calibration done when system was set up or after CCV failure?	x			
Were 5 calibration standards and blank run at or below CRQL but above MDL?	x			
Were initial and continuous calibration verification (ICV and CCV) within NFG guidelines of %R (table 3)?	x			
C. Blanks				
Were contaminants found?		x		
Initial Calibration Blank (ICB) was analyzed after standards and run after ICV?	x			
Continuing Calibration Blank (CCB) was ran after every CCV every 2 hrs.	x			

Criteria	Y	N	NA	Comment
D. Laboratory Control Samples				
Was LCS analyzed for every group of aqueous/soil/ sediment /wipes samples in each SDG?(LCS is spiked 2X the CRQL for the associated matrix.)?	x			
Were %Rs within control limit of 70-130%? (Except for Sb and Ag , 50-150%)	x			
E. Matrix Spike/Matrix duplicate				CR48036 and SB-10/MW-10 7-8' Mercury, CR47889 and SB-10/MW-10 15-16.5'
Were MS and MSD analyzed for SGD?	x			
Was MS/MSD done every 20 samples ?	x			
Were MS/MSD (%R) and RPD within QC?	x			
F. Duplicate Samples				CR48036 and SB-10/MW-10 7-8' Mercury, CR47889 and SB-10/MW-10 15-16.5'
Was at least one duplicate sample run per matrix or SDG?	x			Arsenic failure in RPD occurred in sample CR47889 which was not part of the sample package . No further qualification is needed.
Were control limit of 50% Relative Percent Difference between 'original' and duplicate?		x		
Were control limit CRQL of <5X found?	x			
G. Serial Dilution				CR47889 and SB-10/MW-10 15-16.5'
Was ICP serial dilution performed on each sample for each group of the same (aqueous/soil/sediment similar matrix or SDG?	x			
Was %D of original compared to dilution $\leq 10\%$?(%D > 15% may be used for soil)	x			
H. Performance Evaluation Sample				
Were PE samples analyzed with the field samples and field blanks in SDG?	x			

Criteria	Y	N	NA	Comment
Were results within warning limits (95% confidence interval) and action limit (99% confidence interval)	x			
I. Regional EPA QA/QC				
Were regional protocols of QA/QC protocols used in evaluating data?	x			
Did RPD fall within specific limits in EPA region's SOP or project QAPP?	x			
J. Overall Assessment of Data				
Was Overall assessment of data found to be acceptable?	x			

Comments: All results are within Cat. B criterion and usable.

Criteria for Data Usability Summary Report

Completeness:

A complete data package is one that has all relevant and related material packaged for distribution to its client in accordance with the Analytical Service Protocol (ASP) Category B Deliverables guidelines.

Compliant:

A compliant data package is one that is determined to have all work that pertains to the production of the laboratory data in a manner that is consistent with the Quality Assurance Program Plan.

Overall Usability Issues:

Data validation completed in accordance with the New York State Department of Environmental Conservation Analytical Service Protocol (NYSDEC ASP) Category B Data Deliverable requirements and reviewer's professional judgment.

This analytical report complies with the following points:

1. Holding Time and Analysis Time
2. Sample Analysis and Quality Control.

In conclusion, the data reviewed in this report is usable data which meets criteria for compliance with methods 8260D, 8270E, 8081.B, 8082A, 6010D, 7471B and 2540G except for rejected data due to instrument issues as noted in sections 8260D and 8270E. Percent solid method E160.3 was run, and all samples are over 30% solid.

Data Completeness

- A complete Category B data package under the NYSDEC ASP has been reported.

Data Validation Acronyms

AA	Atomic Absorption, Flame Technique
BHC	Hexachlorocyclohexane
BFB	Bromofluorobenzene (Tune check analyte)
CCC	Continuing Calibration Check
CCV	Continuing Calibration Verification
CRDL	Contract Required Detection Limit
CRQL	Contract Required Quantitation Limit
CVAA	Atomic Absorption, Cold Vapor
DCAA	2,4-Dichlorophenylacetic acid
DCB	Decachlorobiphenyl
DFTPP	Decafluorotriphenyl phosphine (Tune check analyte)
DL	Detection Limit
ECD	Electron Capture Detector
FAA	Atomic Absorption, Furnace Technique
FID	Flame Ionization Detector
FNP	1-Fluoronaphthalene
GC	Gas Chromatography
GC/MS	Gas Chromatography/ Mass Spectrometry
GPC	Gel Permeation Chromatography
ICB	Initial Calibration Blank
ICP	Inductively Coupled Plasma – Atomic Emission Spectrometer
ICV	Initial Calibration Verification
IDL	Instrument Detection Limit
ICAL	Initial Calibration Curve
IS	Internal Standard
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LCS/LCSD	Laboratory Control Sample/ Laboratory Control Sample Duplicate
MB	Method Blank
MS	Matrix Spike
BNAMS11	Method of Standard Additions
MSD	Matrix Spike Duplicate
MS/MSD	Matrix Spike/ Matrix Spike Duplicate
ND	Non-detected or Not Detected
PID	Photo Ionization Detector

Data Validation Acronyms

PCB	Polychlorinated biphenyl
PCDD	Polychlorinated dibenzodioxins
PCDF	Polychlorinated dibenzofurans
PQL	Practical Quantitation Limit
QA	Quality Assurance
QA/QC	Quality Assurance/ Quality Control
QC	Quality Control
RF	Response Factor
RPD	Relative Percent Difference
RL	Reporting Limit
RRF	Relative Response Factor
RT	Retention Time
RRT	Relative Retention Time
SDG	Sample Delivery Group
SMC	System Monitoring Compounds/ Surrogates
SPCC	Sample Performance Check Compound
TCX	Tetrachloro-m-xylene
%D	Percent Drift
%R	Percent Recovery
%RSD	Percent Relative Standard Deviation

Data Validation Qualifiers

U	The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit.
J	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
J+	The result is an estimated quantity, but the result may bias high.
J-	The result is an estimated quantity, but the result may bias low.
UJ	The analyte was analyzed for but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
R	The data is unusable. The sample results are rejected due to serious deficiencies in meeting Quality Control (QC) criteria. The analyte may or may not be present in the sample.

Note:

1. These qualifiers are used for data validation purposes. The data validation qualifiers may differ from the qualifiers that the laboratory assigns to the data. Refer to the laboratory analytical report for the definitions of the laboratory qualifiers.
2. The EDDs are assigned these data validation qualifiers and refer to the valid value list supplied by the specific agency or informational data system.

Reviewer Summary :

Samples were handled and analyzed properly under USEPA Contract Laboratory Program National Functional Guidance for Super Organic Methods Data and QA-HWSS-A-004 VOA Standard Operation for the Validation of Volatile Data.

- Within initial calibration , %RSD did not meet criteria for analyte Vinyl Chloride, but was not detected within sample. No further qualification is need.
- Within continuous calibration , several compounds were outside of %D laboratory criteria which led to qualification of compounds as non-detect estimate "UJ" values. Compound TFH was below minimum RRF value which led to qualification as a rejected "R" value.

Data was qualified within category B criterion and is usable, except of rejected value..

H. Field Duplicate				
Were field duplicates identified in this SGD?		x		
Were target compounds detected in it? Were RSPs less than 50%?			x	
subsection: Internal Compounds				
Were counts within 50% to 200% of associated calibration standard?	x			
Were retention times within ± 10 sec of cal. standard?	x			
I. Target Analyte Identification				
Mass spectral ion abundance criteria specified for target analyte?	x			
Target analyte RRT outside specified RRT window?	x			
If sample is considered "Solid", is it greater than 30%?			x	
Did the spectrum meet EPA "Functional Guidelines"?	x			
J. Tentative Analyte Identification				
Were analyte results greater than 85% library match?			x	
Were National Functional Guidelines followed for TIC processing?			x	
K. Regional EPA QA/QC				
Were regional protocol of QA/AC protocols used in evaluation data?	x			
L. Overall Assessment of Data				
Was overall assessment of data found to be acceptable?	x			

Comments: Qualification of sample occurred due to continuous calibration failures. All data is usable except of rejected value.

Calculation Spot Check

Instrument: CHEM17

ICV Date and time : 08/27/24 9:06

Compound: Chloromethane

	Curve Evaluation (RF)	Response	Concentration
L1	0.700	16121	0.5
L2	0.652	58220	2
L3	0.735	127869	4
L4	0.733	300835	10
L5	0.823	660075	20
L6	0.804	990623	30
average	0.741		
RSD	8.6		

Reviewer Comment: Qualification of several analytes as non-detect estimate "UJ" values within associated sample CR50342 due to %D results above SOP limits. Compound THF detected RRF was below minimum level which led to qualification as rejected "R" value

Reviewer Comment: Qualification of several analytes as non-detect estimate "UJ" values is due to %D results above laboratory limit within associated CCV file 0829_28.D. Analyte THF was below minimum RRF which led to qualification of compound in sample as rejected "R" value.

Reviewer Summary :

Samples were handled and analyzed properly under USEPA Contract Laboratory Program National Functional Guidance for Super Organic Methods Data and QA-HWSS-A-004 VOA Standard Operation for the Validation of Volatile Data.

- Within initial calibration , %RSD did not meet criteria for analyte Acetone, and detected in two associated samples CR50337 and CR50338 leading to qualification as a estimate "J" value.
- Within continuous calibration , several compounds were outside of %D laboratory criteria which led to qualification of compounds as non-detect estimate "UJ" values
- Several analyte failed %R, only those present in CR50334MS/MSD led to qualification within parent sample as non-detect estimates "UJ" values for Acetone and MEK.
- Internal standard within DUP-4, 1,4-Dichlorobenzene-d4 was below 50% leading to the qualification of associated compounds as non-detect estimate "UJ" values.
- Duplicate pair SB-13/MW-13 8-9FT and DUP-4 were beyond laboratory comparison limits leading to the qualification of Acetone as an estimate in sampled SB-13/MW-13 8-9FT. DUP-4 was qualified due to issued with instrument calibration.
- Tentative identified compounds were detected but raw data was not presented thus evaluation of procedure cannot be made. Analytes detected in samples (CR50329-CR50331) are estimate values, no further qualification is needed.

Data was qualified within category B criterion and is usable.

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Technical Hold Time of 7 days not preserved or 14 days preserved (pH<2)?	x			
Cooling Temp $\geq 6^{\circ}\text{C}$?	x			
B. GC/MS Instrument Performance Check				
Were BFB performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period?	x			
C. Initial Calibration				
Was a 5-point calibration run?	x			Within initial calibration , %RSD did not meet criteria for analyte Acetone, and detected in two associated samples CR50337 and CR50338 leading to qualification as a estimate "J" value. See attachment.
Was RSD% with in criteria for each target analyte? Was RRF within criteria?		x		
Was curve fit used for evaluation? If yes, did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was the Initial Calibration Verification (ICV) done after the I.C., were (%D) (%R) within criteria?	x			

Criteria	Y	N	NA	Comment
D. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?	x			Several compounds were outside of %D laboratory criteria which led to qualification of compounds as non-detect estimate "UJ" values. See attachment.
Were (%D) $\leq$ limit and relative response factors (RRF) within criteria?		x		
E. Laboratory Blanks				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 12 hours?	x			
Were contamination found, if so qualification may be necessary?		x		
Subsection : Field Blanks				TRIP BLANK LL/HL
Was a field blank associated with each sample of SDG?	x			
Were target compounds detected in it?		x		
F. Surrogate Spikes				
Were surrogate percent recovery (%R) within QC limits?	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
G. Matrix Spike/Matrix Duplicate				CR50334 MS/MSD (-H), CR49395,CR50154
Were MS and MSD analyzed for SDG?	x			While several analyte failed %R only those present in CR50334MS/MSD led to qualification within parent sample as non-detect estimates "UJ" values for Acetone and MEK. See attachment.
Was MS/MSD done every 20 samples?	x			
Were MS/MSD (%R) and RPD within QC?		x		

Criteria	Y	N	NA	Comment
H. Field Duplicate				SB-13/MW-13 8-9FT and DUP-4
Were field duplicates identified in this SGD?	x			Duplicate pair SB-13/MW-13 8-9FT and DUP-4 were beyond laboratory comparison limits leading to the qualification of Acetone as an estimate "J" value in sampled SB-13/MW-13 8-9FT. DUP-4 was qualified due to issued with instrument calibration. See attachment.
Were target compounds detected in it? Were RSPs less than 50%?		x		
subsection: Internal Compounds				
Were counts within 50% to 200% of associated calibration standard?		x		Internal standard within DUP-4, 1,4-Dichlorobenzene-d4 was below 50% leading to the qualification of associated compounds as non-detect estimate "UJ" values. See attachment.
Were retention times within ± 10 sec of cal. standard?	x			
I. Target Analyte Identification				
Mass spectral ion abundance criteria specified for target analyte?	x			
Target analyte RRT outside specified RRT window?	x			
If sample is considered "Solid", is it greater than 30%?			x	
Did the spectrum meet EPA "Functional Guidelines"?	x			
J. Tentative Analyte Identification				
Were analyte results greater than 85% library match?		x		
Were National Functional Guidelines followed for TIC processing?			x	
K. Regional EPA QA/QC				
Were regional protocol of QA/AC protocols used in evaluation data?	x			
L. Overall Assessment of Data				
Was overall assessment of data found to be acceptable?	x			

Comments: Qualification of sample occurred due to initial and continuous calibration failures. Qualification also occurred due to matrix samples failures and duplicate comparison failure. All data within Cat. B criterion and usable.

Blind Duplicate Comparison

8260D

Compounds	Original Sample SB-13/MW-13 8-9FT	Blind Duplicate DUP-4	Relative Percent Difference
Acetone	35	160	78.13
Methyl Ethyl Ketone	-	38	NA

Reviewer comment: Duplicate pair SB-13/MW-13 8-9FT and DUP-4 were beyond laboratory comparison limits leading to the qualification of Acetone as an estimate in sampled SB-13/MW-13 8-9FT. DUP-4 was qualified due to issued with instrument calibration.

Reviewer Comment: Qualification of analyte Acetone as estimate/ non-detect estimate “J/UJ” values within associated sample CR50337-CR50341 due to %D results above laboratory limits.

Reviewer Comment: Qualification of analyte Methyl Ethyl Ketone, as non-detect estimate "UJ" values is due to %D results above laboratory limit within associated continuous calibration file 0828.02. Acetone is qualified as a estimate due to comparison to DUP-4 (Blind duplicate sample) being over 50%.

Reviewer Comment: Qualification of analyte Acetone as estimate "J" values is due to %D results above laboratory limit within associated initial calibration. Qualification of analyte Methyl Ethyl Ketone, as non-detect estimate "UJ" values is due to %D results above laboratory limit within associated continuous calibration file 0828.02.

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 protocol Standard Operating Procedure for Validation of Semivolatile Data, QA-HWSS-A-005 along with the EPA's National Functional Guideline for Organic Compounds.

- Within ICV of instrument CHEM36 compounds Hexachlorobenzene and 2-Nitrophenol were not within recommended RRF but did reach below minimum RRF value, thus no qualification is needed.
 - Several compounds did not meet %D criteria within associated CCVs led to qualification of non-detect estimate "UJ" values within samples. Within CHEM06 closing CCV 2,4-Dinophenol failed minimum RRF leading to qualification as rejection "R" values within associate sample CR50330-CR50337.
 - Within matrix samples several compounds were outside QC limits for RPD but sample were not part sample package GCR50329 thus no qualification is needed.
 - Within laboratory control sample Hexachlorocyclopentadiene is qualified as rejected "R" values associated CR50340 and CR5341 samples due to recovery below laboratory limits within CR48036 LCS. While the other LCS had analytes with RPD above laboratory criteria, there was no need for qualification is needed.
 - While Phenanthrene-d10 was not within response limits for sample CR50329, analytes associated with the internal standard were not present. No further qualification needed.
- Data is qualified within category B criterion and is usable, except for the data qualified as rejected.

Job ID: GCR50329

8270E SIM/Isotope Dilutions

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Were samples within technical hold time and extraction period?	x			
Cooling Temp $\leq 6^{\circ}\text{C}$?	x			
B. GC/MS Instrument Performance Check				
Were DFTPP performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period?	x			
Ion abundance criteria met?	x			
C. Initial Calibration				
Was a 5-point calibration conducted?	x			Within ICV of instrument CHEM36 compounds Hexachlorobenzene and 2-Nitrophenol were not within recommended RRF but did reach minimum RRF value, thus no qualification is needed.
RSD% within acceptable criterion?	x			
Was curve fit used for evaluation? If yes, did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was %D for target analytes within acceptable limit.	x			
Was RRF values meet for target analyte?		x		
Was the Initial Calibration Verification (ICV) done after the I.C.?	x			

Criteria	Y	N	NA	Comment
D. Continuing Calibration				
Was it done every 12 hours after Initial Calibration to verify it?	x			Several compounds did not meet %D criteria within associated CCVs led to qualification of non-detect estimate "UJ" values within samples. Within CHEM06 closing CCV 2,4-Dinophenol failed minimum RRF leading to qualification as rejection "R" values within associate sample CR50330-CR50337. See attachment.
Were (%D) and relative response factors (RRF) within acceptable criteria?				
E. Laboratory Blanks				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 20 samples?	x			
Were contamination found, if so qualification may be necessary?		x		
F. Field Blanks/Trip Blank				
Was a field blanks associated with each sample of SDG?		x		
Were target compounds detected in it?			x	
G. Surrogate Spikes (Isotope Dilution Recovery)				
Were surrogate percent recovery (%R) within QC limits?(Tetrahydrofuran-d8)	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
H. Matrix Spike/Matrix Duplicate				CR48036 MS, CR53735 MS AND CR51258 MS
Were MS and MSD analyzed for SDG?	x			Several compounds were outside QC limits for RPD but sample were not part sample package GCR50329 thus no qualification is needed.
Was MS/MSD done every 20 samples ?	x			
Were MS/MSD (%R) and RPD within QC?		x		

Criteria	Y	N	NA	Comment
I. Laboratory Control Sample				
Was LCS analysis for this SDG?	x			Hexachlorocyclopentadiene is qualified as rejected "R" values associated CR50340 and CR5341 samples due to recovery below laboratory limits within laboratory control sample CR48036 LCS. While the other LCS had analytes with RPD above laboratory criteria, there was no need for qualification is needed. See attachment.
Was LCS analysis per analysis batch?	x			
Was LCS (%R) within QC Limits?		x		
J. Field Duplicate				
Were field duplicates identified in this SDG?		x		
Were target compounds detected in it?			x	
K. Internal Standard				
Was area response within acceptance limits?		x		While Phenanthrene-d10 was not within response limits for sample CR50329, analytes associated with the internal standard were not present. No further qualification needed.
Were retention times within ± 30 sec of cal. standard?	x			
L. Compound Quantitation				
Were correct internal standards, quantitation ions and RRF used in quantitate compounds?	x			
Were compound quantitates and RLs adjusted to reflect sample dilutions and dry weights to continuous calibration?	x			
M. Target Compound Identification				
Were relative retention times (RRTs) within ± 0.06 units of standard?	x			
Did the spectrum meet EPA "Functional Guidelines"?	x			
Were chromatograms peaks verified and accounted?	x			

Criteria	Y	N	NA	Comment
N. Overall Assessment of Data				
Was overall assessment of data found to be acceptable?	x			

Comments: Qualification of samples occurred due to laboratory criteria failure within continuous calibrations and laboratory control samples. Data within Cat. B criterion and usable, except for the data that is qualified as rejected.

Reviewer Comment: Qualification of several analytes, as non-detect estimate "UJ" values is due to %D results above laboratory limit within associated continuous calibration files 0904.19 and 0904_44. 2,4-Dinophenol failed minimum RRF leading to qualification as rejection "R" values within sample.

r=Result Reported U=Not Detected D=Reported Dilution E/J=Estimated Value X=Not Used S=Lab Solvent

Reviewer Comment: Qualification of several analytes, as non-detected estimate "UJ" values is due to %D results above laboratory limit within associated continuous calibration files 0904.19 and 0904_44. 2,4-Dinophenol failed minimum RRF leading to qualification as rejection "R" values within sample.

Reviewer Comment: Due to recovery below laboratory limit for Hexachlorocyclopentadiene within laboratory control sample CR48036 LCD/LCSD, led to qualification as rejected "R" value for within sample. Qualification of several analytes, as non-detect estimate "UJ" values is due to %D results above laboratory limit within associated continuous calibration files 0828_26and 0828_51.

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 protocol Standard Operating Procedure for Validation of Polychlorinated Biphenyl (PCB) Aroclor Data, SOP#QA-HWSS-A-006.

- It is noted by reviewer that QA/QC samples laboratory blanks, laboratory control samples and matrix samples were all conducted on instrument ECD8 while samples were analyzed on mostly ECD29 and ECD24. Samples are evaluated based on data collected on instrument such as surrogates, initial and continuing calibrations. If analytes were detected, they would be qualified as estimate "J" values. QA/QC samples which were run on ECD3, normal qualification occurred on associated sample CR50341.

- ECD3 had a failure in within CCVs, it was not over 25% as stated in SOP. No further qualification needed. ECD24 failures within files 904A015, 904B015, 904A028, and 904B028 led to qualification of Aroclor-1016 and 1260 as non-detect estimate "UJ" value in associated samples

All data is with in category B criterion and usable.

Laboratory: Phoenix Environmental Laboratories, INC (NELAP #NY11301)

Site: Newton Plaza Associates, LLC

Job ID: GCR45184

8082A PCB

Criteria	Y	N	NA	Comment
A. Sample Receipt				
With in technical hold time and extraction period?	x			
Cooling Temp = >6 °C	x			
B. Initial Calibration				
Was a 5 point calibration?	x			
RSD% for CF are within verification perimeter?	x			
Verified RT window. CFs and RSD are calculated and within bounds?	x			
C. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?	x			ECD3 had a failure in within CCVs, it was not over 25% as stated in SOP. No further qualification needed. ECD24 failures within files 904A015, 904B015, 904A028, and 904B028 led to qualification of Aroclor 1016 and 1260 as non-detect estimate "UJ" value in associated samples. See attachment.
Were (%D) and relative respond factors (RRF) within bounds of CCV.	x			
Were the RTs of each target and surrogate in Arcelor standard (C3) and within RT window?	x			
D. Laboratory/Field Blanks				
Was a lab blank associated with each sample of SDG?		x		Samples run on instruments EDC29 ECD24 had no blank run on the instrument, no analytes are detected in any associated samples. No further qualification needed. Blanks associated with ECD3 were within laboratory criteria.
Was blank analyzed every 20 samples?	x			
Were sulfur blanks run if needed?		x		
Were contamination found, if so qualification may be necessary.		x		

Criteria	Y	N	NA	Comment
E. Surrogate Spikes				
Were Surrogate percent recovery (%R) with in QC limits?	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
F. Matrix Spike/Matrix Duplicate				
Were MS and MSD analyzed for SDG?	x			Matrix samples were not evaluated on ECD29 and ECD24 thus no qualification will be made based on this data. Matrix sample associated with ECD3 were within laboratory criteria.
Were MS/MSD (%R) and RPD within QC?	x			
G. Laboratory Control Sample				
Was LCS analysis for this SDG?	x			Laboratory control samples were not evaluated on ECD29 and ECD24thus no qualification will be made based on this data. Laboratory control sample associated with ECD3 were within laboratory criteria.
Was LCS (%R) QC Limits?	x			
H. Target Analyte Identification				
Were relative retention times (RRTs) with in ± 0.05 units of standard?	x			
Did the spectrum meet EPA "Functional Guidelines"?	x			
Were chromatograms peaks verified and accounted?	x			
I. GC/MS Confirmation				
GC/MS was performed at least one peak concentration ≥ 10 ng/ μ L.	x			

Criteria	Y	N	NA	Comment
J. Target Analyte Quantitation and Reported CRQL				
Were target analyte and sample specific CRQL calculated correctly?	x			
K. Field Duplicates				
Were Field Duplicated identified within sample package?		x		
Was RPD less than 50%?			x	
L. EPA Regional QA/QC				
Were QA/QC performed under regional criterion?	x			
Were field duplicates collected?	x			
M. Overall Assessment of Data				
Was Overall assessment of data found to be acceptable?	x			

Comments: Continuous calibration failure led to qualification of sample. All results are within Cat. B criterion and usable.

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 Standard Operating Procedure for Validation of Pesticides Data, QA-HWSS-A_007.

- It is noted by reviewer that QA/QC samples laboratory blanks, laboratory control samples and matrix samples were all conducted on instrument EDD 33 where only one sample was analyzed (CR50332). All other samples were analyzed on ECD4. Samples examined on ECD4 are evaluated on based on data collected on instrument such as surrogates, initial and continuing calibrations. Detected analytes will be qualified as estimate "J" values. This led to qualification with sample CR50329 and CR50339.
 - Within Continues Calibrations, Endosulfan I was above laboratory limits %D for closing CCV (file 90539) of instrument ECD4 associated with sample CR50341 led qualification of analyte as a non-detect estimate "UJ" value.
 - Due matrix sample, CR50334 had delta-BHC fail recovery led to qualification within sample CR50332 as non-detect estimate "UJ" value.
 - Sample CR50334 had Methoxchlor fail RPD of LCS, no further qualification is needed.
- All data is within category B criterion and usable.

Method 8081B Pesticides

Criteria	Y	N	NA	Comment
A. Sample Receipt				
With in technical hold time and extraction period?	x			
Cooling Temp = >6°C	x			
B. GC/ECD Instrument Performance Check				
Were Resolution Check Mixture (RESC) run and resolution criteria?	x			
Was PEM analysis performed within criteria for compound?	x			
Were Mid-point individual standard mixture performed and %resolution with in criteria?	x			
C. Initial Calibration				
Was the 5 point calibration with all mixtures and concentration run under criteria?	x			
Was a single point of Toxaphene at low standard in ICAL or five point Toxaphene independent runs?	x			
Were %RSD lower than criteria?	x			
D. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?			x	Endosulfan I was above laboratory limits %D for closing CCV (file 90539) of instrument ECD04 associated with sample CR50341 led qualification of analyte as a non-detect estimate "UJ" value. Please see attachment.
Were (%D), relative respond factors (RRF) and RT within criteria?		x		
Time elapse between CCV, Instrumental Blank, CCV PEM, CS3 did not exceed 14 hrs.?	x			
PEM % breakdown did not exceed criteria?	x			

Criteria	Y	N	NA	Comment
E. Blanks				
Was a lab blank associated with each sample of SDG?	x			While blanks were present they were analyzed on a different instrument than samples thus all detection will be qualified as estimate "J" values within all samples. This led to qualification with sample CR50329 and CR50339. See attachment.
Were sulfur blanks run if needed?		x		
Were TCLP/ SPL Leachate Extractions Blanks (LEB) prepared and extracted at specific frequency?		x		
Were contaminants found, if so qualification may be necessary?		x		
F. Surrogate spikes				
Did Spike contain two surrogates (TCX and DCM) ran in all sample including blanks and standards?	x			
Were Surrogate percent recovery (%R) with in QC limits? (30-150%)	x			
Were RT of Surrogates calculated for each sample?	x			
G. Matrix Spike/Matrix duplicate				CR50334
Were MS and MSD analyzed for SDG or matrix?	x			Sample CR50334 had delta-BHC fail recovery led to qualification within sample CR50332 as non-detect estimate "UJ" value. While matrix samples were run, all other samples were run a different instrument than matrix samples thus no further qualification will be made with this data. See attachment.
Was MS/MSD done at specific frequency required by criteria?	x			
Were MS/MSD (%R) and RPD within QC?	x			
H. Laboratory Control Sample				CR50334
Was LCS analysis for this SDG and at specific frequency as required criteria?	x			Sample CR50334 had Methoxchlor fail RPD of LCS, no further qualification is needed. While laboratory control samples were run in associated with CR50332, all other samples were run a different instrument than laboratory control samples thus no further qualification will be made with this data.
Was LCS (%R) within QC Limits?	x			

Criteria	Y	N	NA	Comment
I. Field Duplicates				
Were field duplicates collected?		x		
Were %RPD < 50% for observed analytes?			x	
J. Florisil Cartridge Performance Check				
Were %R within specification.	x			
K. Target Analyte Identification				
RTs of surrogates and reported targets analytes are within calculated window?	x			
%D of target analytes and Toxaphene are calculated to less than 25%?	x			
All cosmographical observation are within QC criteria?	x			
L. GC/MS Confirmation				
GC/MS confirmation is done to specific criteria of both column for single compound concentration ≥ 5 ng/ μ and for Toxaphene concentration of ≥ 125 ng/ μ L?	x			
M. Target Analyte Quantitation and Reported CRQL				
Were target analyte and sample specific CRQL and CF are calculated correctly?	x			
N. EPA Regional QA/QC				
Were QA/QC performed under regional criterion	x			
Were field duplicates collected?		x		

Criteria	Y	N	NA	Comment
O. Overall assessment of data				
Was Overall assessment of data found to be acceptable?	x			

Comments: Due to action above criteria limits of continuous calibration and matrix spike qualification is needed. Qualification also due to lack of QA/QC data from sample associated instrument. All results are within Cat. B criterion and usable.

Reviewer Summary :

Samples were handled and analyzed properly under SOP#QA-HWSS-A-010.

- It is noted the CRDL was not within recover limits of Mercury but detected within only one sample at a level 10X larger than MDL and PQL, no further qualification is needed.
- Within matrix samples failures in recovery within CR50493 led to qualification with sample CR50339-CR50341 for metal Lead as estimate bias low "J-" values.
- Lead failed %D of serial dilution under laboratory condition at 11.7% but passed SOP condition of less than 15%, thus no further qualification is needed.

Data is within category B criterion and is usable.

Method 6010D Metals

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Technical Hold Time of aqueous/TCLP/SPLP samples of 180 days preserved with nitric acid (pH>2)?	x			
Technical Hold Time of soil/sediment/wipe samples of 180 days ?	x			
B. Calibration				
Was an initial calibration done when system was set up or after CCV failure?	x			
Were 5 calibration standards and blank run at or below CRQL but above MDL?	x			
Were initial and continuous calibration verification (ICV and CCV) within NFG guidelines of %R (table 3)?	x			
C. Blanks				
Were contaminants found?		x		
Initial Calibration Blank (ICB) was analyzed after standards and run after ICV?	x			
Continuing Calibration Blank (CCB) was ran after every CCV every 2 hrs.	x			

Criteria	Y	N	NA	Comment
D. Laboratory Control Samples				CR49995,CR50337,CR49872,CR50795,CR50493
Was LCS analyzed for every group of aqueous/soil/ sediment /wipes samples in each SDG?(LCS is spiked 2X the CRQL for the associated matrix.)?	x			
Were %Rs within control limit of 70-130%? (Except for Sb and Ag , 50-150%)	x			
E. Matrix Spike/Matrix duplicate				CR49995,CR50337,CR49872,CR50795,CR50493
Were MS and MSD analyzed for SGD?	x			Failures in recovery within CR50493 led to qualification with sample CR50339-CR50341 for metal Lead as estimate bias low "J-" values. See attachment.
Was MS/MSD done every 20 samples ?	x			
Were MS/MSD (%R) and RPD within QC?		x		
F. Duplicate Samples				CR49995,CR50337,CR49872,CR50795,CR50493
Was at least one duplicate sample run per matrix or SDG?	x			
Were control limit of 50% Relative Percent Difference between 'original' and duplicate?	x			
Were control limit CRQL of <5X found?	x			
G. Serial Dilution				CR49995,CR50337,CR49872,CR50795,CR50493
Was ICP serial dilution performed on each sample for each group of the same (aqueous/soil/sediment similar matrix or SDG?	x			Lead failed %D of serial dilution under laboratory condition at 11.7% but passed SOP condition of less than 15%, thus no further qualification is needed.
Was %D of original compared to dilution $\leq 10\%$?(%D > 15% may be used for soil)	x			
H. Performance Evaluation Sample				
Were PE samples analyzed with the field samples and field blanks in SDG?	x			
Were results within warning limits (95% confidence interval) and action limit (99% confidence interval)	x			

Criteria	Y	N	NA	Comment
I. Regional EPA QA/QC				
Were regional protocols of QA/QC protocols used in evaluating data?	x			
Did RPD fall within specific limits in EPA region's SOP or project QAPP?	x			
J. Overall Assessment of Data				
Was Overall assessment of data found to be acceptable?	x			

Comments: Qualification due to failure in matrix samples. All results are within Cat. B criterion and usable.

Method Review: SM 2540G

Lab Job ID: GCR50329

Lab ID	Field ID	Collection Date	Matrix
24H2004-01	CR50329	8/26/2024	Solid

Reviewer Summary:

Samples were handled and analyzed properly under National Functional Guideline for Organic Superfund Method Data Review.

- Duplicates of samples were run under 24H1946 and BH42092-DUP1, result is within acceptable quantities for SM 2540G results.

Data is within category B criterion and is usable.

Client: Labella Associates, PC

Laboratory: : Phoenix Environmental Laboratories, INC (NELAP #NY11301)(sub lab NYLAP ID 12058)

Location: Newton Plaza Associates, LLC

Job ID: GCR48041

Methods : SM 2540G

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Was sample run during technical hold time of aqueous/TCLP/SPLP samples?	x			
Was sample run during technical hold time soil/sediment/wipe samples?	x			
B. Precision test run				
Was balance checked with duplicate weights for accuracy or some other test run before sample processing.	x			
C. Duplicate Samples				
Was at least one duplicate sample is run per matrix or SDE?	x			Duplicates of samples were run under 24H1946 and BH42092-DUP1 result is within acceptable quantities for SM 2540G results.
Were control limit of 20% Relative Percent Difference between 'original' and duplicate?	x			
Were control limit CRQL of <5X found?	x			
D. Regional EPA QA/QC				
Were regional protocol of QA/QC protocols used in evaluating data?	x			
Did RPD fall within specific limits in EPA region's SOP or project QAPP?	x			
E. Overall assessment of data				
Was Overall assessment of data found to be acceptable?	x			

Comments: All results are within Cat. B criterion and usable.

Duplicate Comparison

	Original Sample 24H1946-09	Duplicate BH42092-DUP1	Relative Percent Difference
Solids, Percent	96.47	96.15	0.33

Reviewer comment: Comparing Duplicate pair 24H1946-09 and BH42092-DUP1 samples results are within acceptable quantities. There are no qualification which will be added to this data.

Criteria for Data Usability Summary Report

Completeness:

A complete data package is one that has all relevant and related material packaged for distribution to its client in accordance with the Analytical Service Protocol (ASP) Category B Deliverables guidelines.

Compliant:

A compliant data package is one that is determined to have all work that pertains to the production of the laboratory data in a manner that is consistent with the Quality Assurance Program Plan.

Overall Usability Issues:

Data validation completed in accordance with the New York State Department of Environmental Conservation Analytical Service Protocol (NYSDEC ASP) Category B Data Deliverable requirements and reviewer's professional judgment.

This analytical report complies with the following points:

1. Holding Time and Analysis Time
2. Sample Analysis and Quality Control.

In conclusion, the data reviewed in this report is usable data which meets criterion for compliance with methods 8260D, 8270E, 6010D, 7470A, 8081.B, and 8082A with the exception of rejected data due to instrument issues as noted in sections 8260D and 8270E.

Data Completeness

- A complete Category B data package under the NYSDEC ASP has been reported.

Data Validation Acronyms

AA	Atomic Absorption, Flame Technique
BHC	Hexachlorocyclohexane
BFB	Bromofluorobenzene (Tune check analyte)
CCC	Continuing Calibration Check
CCV	Continuing Calibration Verification
CRDL	Contract Required Detection Limit
CRQL	Contract Required Quantitation Limit
CVAA	Atomic Absorption, Cold Vapor
DCAA	2,4-Dichlorophenylacetic acid
DCB	Decachlorobiphenyl
DFTPP	Decafluorotriphenyl phosphine (Tune check analyte)
DL	Detection Limit
ECD	Electron Capture Detector
FAA	Atomic Absorption, Furnace Technique
FID	Flame Ionization Detector
FNP	1-Fluoronaphthalene
GC	Gas Chromatography
GC/MS	Gas Chromatography/ Mass Spectrometry
GPC	Gel Permeation Chromatography
ICB	Initial Calibration Blank
ICP	Inductively Coupled Plasma – Atomic Emission Spectrometer
ICV	Initial Calibration Verification
IDL	Instrument Detection Limit
ICAL	Initial Calibration Curve
IS	Internal Standard
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LCS/LCSD	Laboratory Control Sample/ Laboratory Control Sample Duplicate
MB	Method Blank
MS	Matrix Spike
BNAMS11	Method of Standard Additions
MSD	Matrix Spike Duplicate
MS/MSD	Matrix Spike/ Matrix Spike Duplicate
ND	Non-detected or Not Detected
PID	Photo Ionization Detector

Data Validation Acronyms

PCB	Polychlorinated biphenyl
PCDD	Polychlorinated dibenzodioxins
PCDF	Polychlorinated dibenzofurans
PQL	Practical Quantitation Limit
QA	Quality Assurance
QA/QC	Quality Assurance/ Quality Control
QC	Quality Control
RF	Response Factor
RPD	Relative Percent Difference
RL	Reporting Limit
RRF	Relative Response Factor
RT	Retention Time
RRT	Relative Retention Time
SDG	Sample Delivery Group
SMC	System Monitoring Compounds/ Surrogates
SPCC	Sample Performance Check Compound
TCX	Tetrachloro-m-xylene
%D	Percent Drift
%R	Percent Recovery
%RSD	Percent Relative Standard Deviation

Data Validation Qualifiers

U	The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit.
J	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
J+	The result is an estimated quantity, but the result may bias high.
J-	The result is an estimated quantity, but the result may bias low.
UJ	The analyte was analyzed for but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
R	The data is unusable. The sample results are rejected due to serious deficiencies in meeting Quality Control (QC) criteria. The analyte may or may not be present in the sample.

Note:

1. These qualifiers are used for data validation purposes. The data validation qualifiers may differ from the qualifiers that the laboratory assigns to the data. Refer to the laboratory analytical report for the definitions of the laboratory qualifiers.
2. The EDDs are assigned these data validation qualifiers and refer to the valid value list supplied by the specific agency or informational data system.

Client: Labella Associates DPC

Reviewer Summary :

Samples were handled and analyzed properly under USEPA Contract Laboratory Program National Functional Guidance for Super Organic Methods Data and QA-HWSS-A-004 VOA Standard Operation for the Validation of Volatile Data.

- Within initial calibration RRF did not meet recommended values for some analytes it did meet minimum, thus no further qualification needed. Also, %RSD did not meet criteria for some analytes, yet none were detected. No further qualification is need.
- Within continuous calibration opening CCV, Bromomethane and Methyl Ethyl Ketone did not meet %D criteria leading to qualification of non-detect estimate "UJ" values within samples. Also, RRF did not meet minimum RRF of several analytes which led to qualification as rejected "R" values within samples.
- Tentative identified compounds were detected but raw data was not presented thus evaluation of procedure cannot be made. Analytes detected in sample (MW-11) as estimate values, no further qualification is needed.

Data was qualified within category B criterion and is usable, except for rejected "R" values.

Laboratory: Phoenix Environmental Laboratories, INC (NELAP #NY11301)

Site: Newton Plaza Associates, LLC

Job ID: GCR81261

8260D

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Technical Hold Time of 7 days not preserved or 14 days preserved (pH<2)?	x			
Cooling Temp $\geq 6^{\circ}\text{C}$?	x			
B. GC/MS Instrument Performance Check				
Were BFB performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period?	x			
C. Initial Calibration				
Was a 5-point calibration run?	x			While RRF did not meet recommended values for some analytes it did meet minimum thus no qualification needed. Also, %RSD did not meet criteria for some analytes, yet none were detected. No further qualification is need.
Was RSD% with in criteria for each target analyte? Was RRF within criteria?		x		
Was curve fit used for evaluation? If yes, did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was the Initial Calibration Verification (ICV) done after the I.C., were (%D) (%R) within criteria?	x			

Criteria	Y	N	NA	Comment
D. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?	x			Within opening CCV Bromomethane and Methyl Ethyl Ketone did not meet %D criteria leading to qualification of non-detect estimate "UJ" values within samples. Also, RRFs did not meet minimum RRF of several analytes which led to qualification as rejected "R" values within samples. See attachment.
Were (%D) $\leq$ limit and relative response factors (RRF) within criteria?		x		
E. Laboratory Blanks				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 12 hours?	x			
Were contamination found, if so qualification may be necessary?		x		
Subsection : Field Blanks				TRANSPORTATION BLANK
Was a field blank associated with each sample of SDG?	x			
Were target compounds detected in it?		x		
F. Surrogate Spikes				
Were surrogate percent recovery (%R) within QC limits?	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
G. Matrix Spike/Matrix Duplicate				
Were MS and MSD analyzed for SDG?		x		
Was MS/MSD done every 20 samples?			x	
Were MS/MSD (%R) and RPD within QC?			x	

Criteria	Y	N	NA	Comment
H. Field Duplicate				
Were field duplicates identified in this SGD?		x		
Were target compounds detected in it? Were RSPs less than 50%?			x	
subsection: Internal Compounds				
Were counts within 50% to 200% of associated calibration standard?	x			
Were retention times within ± 10 sec of cal. standard?	x			
I. Target Analyte Identification				
Mass spectral ion abundance criteria specified for target analyte?	x			
Target analyte RRT outside specified RRT window?	x			
If sample is considered "Solid", is it greater than 30%?			x	
Did the spectrum meet EPA "Functional Guidelines"?	x			
J. Tentative Analyte Identification				
Were analyte results greater than 85% library match?	x			Raw data was not presented thus evaluation of procedure cannot be made. Analytes detected in sample (MW-11) are estimate "J" values, no further qualification is needed.
Were National Functional Guidelines followed for TIC processing?			x	
K. Regional EPA QA/QC				
Were regional protocol of QA/AC protocols used in evaluation data?	x			
L. Overall Assessment of Data				
Was overall assessment of data found to be acceptable?	x			

Comments: Qualification due to failure in laboratory criteria within continuous calibration. Data is usable, except for rejected values.

Calculation Spot Check

Instrument: CHEM17

ICV Date and time :10/07/24 11:37

Compound: Chloromethane

	Curve Evaluation (RF)	Response	Concentration
L1	0.974	22464	0.5
L2	0.897	77966	2
L3	1.037	176304	4
L4	1.005	416944	10
L5	0.946	759535	20
L6	0.944	1173756	30
average	0.967		
RSD	5.1		

Reviewer Comment: Qualification of analytes Bromoethane and Methyl Ethyl Ketone of non-detect estimate "UJ" values within samples is due to %D results above laboratory limit. Qualification of other analytes as rejected "R" value within samples is due RRF not meeting minimum values.

Reviewer Comment: Qualification of analytes Bromoethane and Methyl Ethyl Ketone of non-detect estimate "UJ" values is due to %D results above laboratory limit within CCV. Qualification of other analytes as rejected "R" values is due RRF not meeting minimum values within associated CCVs.

Reviewer Comment: Qualification of analytes Bromoethane and Methyl Ethyl Ketone of non-detect estimate "UJ" values is due to %D results above laboratory limit within CCV. Qualification of other analytes as rejected "R" values is due RRF not meeting minimum values within associated CCVs.

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 protocol Standard Operating Procedure for Validation of Semivolatile Data, QA-HWSS-A-005 along with the EPA's National Functional Guideline for Organic Compounds.

- Within ICV of instrument CHEM36 compounds Bis(2-chloroisopropyl)ether and 2-Nitrophenol did not reach minimum RRF value within ICV leading to qualification within samples MW-7,-9,-10 and -13 as rejected "R" values.
 - Several analytes did not meet %D criteria of their associated continuous calibration which led to qualification within all samples depending on their associated CCV.
 - Surrogate %2,4,6-Tribromophenol within sample MW-11 experience interference in recovery. No qualification is needed.
 - Hexachlorocyclopentadiene is qualified as rejected "R" values within samples MW-8,-11, and -12 due to recovery below laboratory limits within laboratory control sample CR79555. Several samples were recovered below laboratory limits of laboratory control sample CR81264, this led to qualification of these analytes within samples MW-7,-9,-10,-13 as rejected "R" values.
- Data is qualified within category B criterion and is usable, except for the data qualified as rejected.

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Were samples within technical hold time and extraction period?	x			
Cooling Temp $\leq 6^{\circ}\text{C}$?	x			
B. GC/MS Instrument Performance Check				
Were DFTPP performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period?	x			
Ion abundance criteria met?	x			
C. Initial Calibration				
Was a 5-point calibration conducted?	x			Within ICV of instrument CHEM36 compounds Bis(2-chloroisoprpyl)ether and 2-Nitrophenol did not reach minimum RRF value within ICV leading to qualification within samples MW-7,-9,-10 and -13 as rejected "R" values. See attachment.
RSD% within acceptable criterion?	x			
Was curve fit used for evaluation? If yes, did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was %D for target analytes within acceptable limit.	x			
Was RRF values meet for target analyte?		x		
Was the Initial Calibration Verification (ICV) done after the I.C.?	x			

Criteria	Y	N	NA	Comment
D. Continuing Calibration				
Was it done every 12 hours after Initial Calibration to verify it?	x			Several analytes did not meet %D criteria which led to qualification within all samples depending on their associated CCV. See attachment.
Were (%D) and relative response factors (RRF) within acceptable criteria?				
E. Laboratory Blanks				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 20 samples?	x			
Were contamination found, if so qualification may be necessary?		x		
F. Field Blanks/Trip Blank				
Was a field blanks associated with each sample of SDG?		x		
Were target compounds detected in it?			x	
G. Surrogate Spikes (Isotope Dilution Recovery)				
Were surrogate percent recovery (%R) within QC limits?(Tetrahydrofuran-d8)	x			Surrogate %2,4,6-Tribromophenol within sample MW-11 experience interference in recovery. No qualification is needed.
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?		x		
H. Matrix Spike/Matrix Duplicate				
Were MS and MSD analyzed for SDG?		x		
Was MS/MSD done every 20 samples ?			x	
Were MS/MSD (%R) and RPD within QC?			x	

Criteria	Y	N	NA	Comment
I. Laboratory Control Sample				
Was LCS analysis for this SDG?	x			Hexachlorocyclopentadiene is qualified as rejected "R" values within samples MW-8,-11, and -12 due to recovery below laboratory limits within laboratory control sample CR79555. Several samples were recovered below laboratory limits of laboratory control sample CR81264, this led to qualification of these analytes within samples MW-7,-9,-10,-13 as rejected "R" values. See attachment.
Was LCS analysis per analysis batch?	x			
Was LCS (%R) within QC Limits?		x		
J. Field Duplicate				
Were field duplicates identified in this SDG?		x		
Were target compounds detected in it?			x	
K. Internal Standard				
Was area response within acceptance limits?	x			
Were retention times within ± 30 sec of cal. standard?	x			
L. Compound Quantitation				
Were correct internal standards, quantitation ions and RRF used in quantitate compounds?	x			
Were compound quantitates and RLs adjusted to reflect sample dilutions and dry weights to continuous calibration?	x			
M. Target Compound Identification				
Were relative retention times (RRTs) within ± 0.06 units of standard?	x			
Did the spectrum meet EPA "Functional Guidelines"?	x			
Were chromatograms peaks verified and accounted?	x			

Criteria	Y	N	NA	Comment
N. Overall Assessment of Data				
Was overall assessment of data found to be acceptable?	x			

Comments: Qualification of samples occurred due to laboratory criteria failure within initial calibration, continuous calibrations and laboratory control samples. Data within Cat. B criterion and usable, except for the data that is qualified as rejected.

Reviewer comment: ICV of instrument CHEM36 compounds Bis(2-chloroisopropyl)ether and 2-Nitrophenol did not reach minimum RRF value within ICV leading to qualification within sample as rejected "R" value. Several analytes are qualified as rejected "R" values due to recovery below limits within laboratory control sample CR81264. Due to %D results above laboratory limit within associated CCV, several analytes are qualified as a non-detect estimate "UJ" values within sample.

Reviewer comment: ICV of instrument CHEM36 compounds Bis(2-chloroisopropyl)ether and 2-Nitrophenol did not reach minimum RRF value within ICV leading to qualification within sample as rejected "R" value. Several analytes are qualified as rejected "R" values due to recovery below limits within laboratory control sample CR81264. Due to %D results above laboratory limit within associated CCV, several analytes are qualified as a non-detect estimate "UJ" values within sample.

Reviewer Summary :

Samples were handled and analyzed properly under SOP#QA-HWSS-A-010.

- Within initial continuing calibration blanks (CCB) Lead was detected, which led to qualification of analyte within samples CR812672 and CR81265 as non-detect "U" values.
- It is noted the CRDL was not within recovery limits of Mercury but also was no detected within any samples, no further qualification is needed.

Data is within category B criterion and is usable.

Method 6010D/7470A Metals

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Technical Hold Time of aqueous/TCLP/SPLP samples of 180 days preserved with nitric acid (pH>2)?	x			
Technical Hold Time of soil/sediment/wipe samples of 180 days ?	x			
B. Calibration				
Was an initial calibration done when system was set up or after CCV failure?	x			
Were 5 calibration standards and blank run at or below CRQL but above MDL?	x			
Were initial and continuous calibration verification (ICV and CCV) within NFG guidelines of %R (table 3)?	x			
C. Blanks				
Were contaminants found?		x		Lead detected within associated CCB led to qualification of analyte within samples CR812672 and CR81265 as non-detect estimate "U" values. See attachment.
Initial Calibration Blank (ICB) was analyzed after standards and run after ICV?	x			
Continuing Calibration Blank (CCB) was ran after every CCV every 2 hrs.	x			

Criteria	Y	N	NA	Comment
D. Laboratory Control Samples				
Was LCS analyzed for every group of aqueous/soil/ sediment /wipes samples in each SDG?(LCS is spiked 2X the CRQL for the associated matrix.)?	x			
Were %Rs within control limit of 70-130%? (Except for Sb and Ag , 50-150%)	x			
E. Matrix Spike/Matrix duplicate				CR81440, CR81249 Mercury, CR81299 Mercury
Were MS and MSD analyzed for SGD?	x			
Was MS/MSD done every 20 samples ?	x			
Were MS/MSD (%R) and RPD within QC?	x			
F. Duplicate Samples				CR81440, CR81249 Mercury, CR81299 Mercury
Was at least one duplicate sample is run per matrix or SDG?	x			
Were control limit of 50% Relative Percent Difference between 'original' and duplicate?	x			
Were control limit CRQL of <5X found?	x			
G. Serial Dilution				CR81440
Was ICP serial dilution performed on each sample for each group of the same (aqueous/soil/sediment similar matrix or SDG?	x			
Was %D of original compared to dilution $\leq 10\%$?(%D > 15% may be used for soil)	x			
H. Performance Evaluation Sample				
Were PE samples analyzed with the field samples and field blanks in SDG?	x			

Criteria	Y	N	NA	Comment
Were results within warning limits (95% confidence interval) and action limit (99% confidence interval)	x			
I. Regional EPA QA/QC				
Were regional protocols of QA/QC protocols used in evaluating data?	x			
Did RPD fall within specific limits in EPA region's SOP or project QAPP?	x			
J. Overall Assessment of Data				
Was Overall assessment of data found to be acceptable?	x			

Comments: Detection within associated CCBs led to qualification of samples. All results are within Cat. B criterion and usable.

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 Standard Operating Procedure for Validation of Pesticides Data, QA-HWSS-A_007.

- Within Continues Calibrations, %D of Endosulfan Sulfate and beta-BHC were above laboratory limits of several of the CCVs associated with the instrument ECD4 which all the samples except for MW-9 are associated with. %D of Endosulfan Sulfate and Methoxychlor were above laboratory limits of one of the CCVs associated with the instrument ECD33 which sample MW-9 is associated with. All sample will have their effected analyte(s) qualified as a non-detect estimate "UJ" values if applicable.

- Associated laboratory control sample had analytes that were not confirmed, no further action is need.

All data is with in category B criterion and usable.

Both channels need to have the compound detected for a concentration to be reported on either channel.
U1=Due to matrix interference and/or the presence of a large amount of non-target material, the reporting level for this compound has been elevated.
U2=The presence of this compound was not confirmed by the analyst based on the characteristic pattern matching of multi-component parameters, retention time, and/or peak shape.
P/C: P=Primary Result C=Confirmation Result X=Not Used CF=Calculated Calibration/Response Factor MC=Multi-Component

Reviewer Comment: Qualification of a non-detect estimate "UJ" value within all associated samples is due to %D results above laboratory limit for analyte beta-BHC within CCV. Treated as Primary and Confirmation data.

Both channels need to have the compound detected for a concentration to be reported on either channel.
U1=Due to matrix interference and/or the presence of a large amount of non-target material, the reporting level for this compound has been elevated.
U2=The presence of this compound was not confirmed by the analyst based on the characteristic pattern matching of multi-component parameters, retention time, and/or peak shape.

P/C: P=Primary Result C=Confirmation Result X=Not Used CF=Calculated Calibration/Response Factor MC=Multi-Component

Reviewer Comment: Qualification of a non-detect estimate "UJ" value within all associated samples is due to %D results above laboratory limit for analyte beta-BHC within CCV. Treated as Primary and Confirmation data.

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 protocol Standard Operating Procedure for Validation of Polychlorinated Biphenyl (PCB) Aroclor Data, SOP#QA-HWSS-A-006.

- It is noted by reviewer that QA/QC samples laboratory blanks, laboratory control samples and matrix samples were all conducted on instrument ECD08 while samples were analyzed on ECD29. Samples are evaluated based on data collected on instrument QA/QC such as surrogates, initial and continuing calibrations. If analytes were detected, they would be qualified as estimate "J" values. No analytes were present. Sample evaluated on ECD24 had QA/QC samples of blanks and laboratory controls samples and were evaluated normally.
- Compounds were outside of %D within associated CCVs of instrument ECD29 led to qualification within samples of Aroclor 1016 and 1260 as non-detect estimate "UJ" values. ECD24 had a failure of %D but was below SOP standards (25%) no further qualification needed.
- Surrogate failure occurred in CR81265 leading to qualification of all analytes as non-detect estimate "UJ" values.

All data is within category B criterion and usable.

Client: Labella Associates DPC

Laboratory: Phoenix Environmental Laboratories, INC (NELAP #NY11301)

Site: Newton Plaza Associates, LLC

Job ID: GCSR81261

8082A PCB

Criteria	Y	N	NA	Comment
A. Sample Receipt				
With in technical hold time and extraction period?	x			
Cooling Temp = >6 °C	x			
B. Initial Calibration				
Was a 5 point calibration?	x			
RSD% for CF are within verification perimeter?	x			
Verified RT window. CFs and RSD are calculated and within bounds?	x			
C. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?	x			Compounds were outside of %D within associated CCVs of instrument ECD29 led to qualification within samples of Aroclor 1016 and 1260 as non-detect estimate "UJ" values. ECD24 had a failure of %D, but was below SOP standards, no further qualification needed. See attachment.
Were (%D) and relative respond factors (RRF) within bounds of CCV.	x			
Were the RTs of each target and surrogate in Aroclor standard (C3) and within RT window?		x		
D. Laboratory/Field Blanks				
Was a lab blank associated with each sample of SDG?		x		Sample conducted in of ECD24 had blanks associated within criteria. Samples run on instrument EDC29 had no blank run on the instrument, no analytes are detected in any associated samples. No further qualification needed.
Was blank analyzed every 20 samples?	x			
Were sulfur blanks run if needed?		x		
Were contamination found, if so qualification may be necessary.		x		

Criteria	Y	N	NA	Comment
E. Surrogate Spikes				
Were Surrogate percent recovery (%R) within QC limits?	x			Surrogate failure occurred in CR81265 leading to qualification of all analytes as non-detect estimate "UJ" values. See attachment.
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?		x		
F. Matrix Spike/Matrix Duplicate				
Were MS and MSD analyzed for SDG?		x		
Were MS/MSD (%R) and RPD within QC?			x	
G. Laboratory Control Sample				
Was LCS analysis for this SDG?	x			Sample conducted on ECD24 had LCS/LCSD associated within criteria. While laboratory control samples were present, they were analyzed on a different instrument than samples evaluated on ECD29 thus no qualification will be made based on this data.
Was LCS (%R) QC Limits?	x			
H. Target Analyte Identification				
Were relative retention times (RRTs) within ± 0.05 units of standard?	x			
Did the spectrum meet EPA "Functional Guidelines"?	x			
Were chromatograms peaks verified and accounted?	x			
I. GC/MS Confirmation				
GC/MS was performed at least one peak concentration ≥ 10 ng/ μ L.	x			
J. Target Analyte Quantitation and Reported CRQL				
Were target analyte and sample specific CRQL calculated correctly?	x			

Criteria	Y	N	NA	Comment
K. Field Duplicates				
Were Field Duplicated identified within sample package?		x		
Was RPD less than 50%?			x	
L. EPA Regional QA/QC				
Were QA/QC performed under regional criterion?	x			
Were field duplicates collected?	x			
M. Overall Assessment of Data				
Was Overall assessment of data found to be acceptable?	x			

Comments: Qualification occurred due to continuous calibration and surrogate failure within one sample. All results are within Cat. B criterion and usable.

Calculation Spot Check

- Professional judgment.

Criteria for Data Usability Summary Report

Completeness:

A complete data package is one that has all relevant and related material packaged for distribution to its client in accordance with the Analytical Service Protocol (ASP) Category B Deliverables guidelines.

Compliant:

A compliant data package is one that is determined to have all work that pertains to the production of the laboratory data in a manner that is consistent with the Quality Assurance Program Plan.

Overall Usability Issues:

Data validation completed in accordance with the New York State Department of Environmental Conservation Analytical Service Protocol (NYSDEC ASP) Category B Data Deliverable requirements and reviewer's professional judgment.

This analytical report complies with the following points:

1. Holding Time and Analysis Time
2. Sample Analysis and Quality Control.

In conclusion, the data reviewed in this report is usable data which meets criterion for compliance with methods 8260D, 8270E, 6010D, 7470A, 8081.B, 8082A. 8270E SIM and 1633, except for rejected data due to instrument issues as noted in sections 8260D and 8270E.

Data Completeness

- A complete Category B data package under the NYSDEC ASP has been reported.

Data Validation Acronyms

AA	Atomic Absorption, Flame Technique
BHC	Hexachlorocyclohexane
BFB	Bromofluorobenzene (Tune check analyte)
CCC	Continuing Calibration Check
CCV	Continuing Calibration Verification
CRDL	Contract Required Detection Limit
CRQL	Contract Required Quantitation Limit
CVAA	Atomic Absorption, Cold Vapor
DCAA	2,4-Dichlorophenylacetic acid
DCB	Decachlorobiphenyl
DFTPP	Decafluorotriphenyl phosphine (Tune check analyte)
DL	Detection Limit
ECD	Electron Capture Detector
FAA	Atomic Absorption, Furnace Technique
FID	Flame Ionization Detector
FNP	1-Fluoronaphthalene
GC	Gas Chromatography
GC/MS	Gas Chromatography/ Mass Spectrometry
GPC	Gel Permeation Chromatography
ICB	Initial Calibration Blank
ICP	Inductively Coupled Plasma – Atomic Emission Spectrometer
ICV	Initial Calibration Verification
IDL	Instrument Detection Limit
ICAL	Initial Calibration Curve
IS	Internal Standard
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LCS/LCSD	Laboratory Control Sample/ Laboratory Control Sample Duplicate
MB	Method Blank
MS	Matrix Spike
BNAMS11	Method of Standard Additions
MSD	Matrix Spike Duplicate
MS/MSD	Matrix Spike/ Matrix Spike Duplicate
ND	Non-detected or Not Detected
PID	Photo Ionization Detector

Data Validation Acronyms

PCB	Polychlorinated biphenyl
PCDD	Polychlorinated dibenzodioxins
PCDF	Polychlorinated dibenzofurans
PQL	Practical Quantitation Limit
QA	Quality Assurance
QA/QC	Quality Assurance/ Quality Control
QC	Quality Control
RF	Response Factor
RPD	Relative Percent Difference
RL	Reporting Limit
RRF	Relative Response Factor
RT	Retention Time
RRT	Relative Retention Time
SDG	Sample Delivery Group
SMC	System Monitoring Compounds/ Surrogates
SPCC	Sample Performance Check Compound
TCX	Tetrachloro-m-xylene
%D	Percent Drift
%R	Percent Recovery
%RSD	Percent Relative Standard Deviation

Data Validation Qualifiers

U	The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit.
J	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
J+	The result is an estimated quantity, but the result may bias high.
J-	The result is an estimated quantity, but the result may bias low.
UJ	The analyte was analyzed for but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
R	The data is unusable. The sample results are rejected due to serious deficiencies in meeting Quality Control (QC) criteria. The analyte may or may not be present in the sample.

Note:

1. These qualifiers are used for data validation purposes. The data validation qualifiers may differ from the qualifiers that the laboratory assigns to the data. Refer to the laboratory analytical report for the definitions of the laboratory qualifiers.
2. The EDDs are assigned these data validation qualifiers and refer to the valid value list supplied by the specific agency or informational data system.

Reviewer Summary :

Samples were handled and analyzed properly under USEPA Contract Laboratory Program National Functional Guidance for Super Organic Methods Data and QA-HWSS-A-004 VOA Standard Operation for the Validation of Volatile Data.

- Within initial calibration RRF did not meet recommended values for some analytes but did meet minimum, thus no further qualification needed. Also, %RSD did not meet criteria for some analytes, yet none were detected. No further qualification is needed.
 - Within CCV Bromomethane and Dichlorodifluoromethane did not meet %D criteria leading to qualification of non-detect estimate "UJ" values within samples. Also, RRFs did not meet the minimum RRF of several analytes which led to qualification as rejected "R" values within samples.
 - Note: neither MW-5 or blind duplicate sample DUPE had analytes detected.
- Data was qualified within category B criterion and is usable except for rejected value data.

Laboratory: Phoenix Environmental Laboratories, INC (NELAP #NY11301)

Site: Newton Plaza Associates, LLC

Job ID: GCR82666

8260D

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Technical Hold Time of 7 days not preserved or 14 days preserved (pH<2)?	x			
Cooling Temp $\geq 6^{\circ}\text{C}$?	x			
B. GC/MS Instrument Performance Check				
Were BFB performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period?	x			
C. Initial Calibration				
Was a 5-point calibration run?	x			While RRF did not meet recommended values for some analytes but did meet minimum valued thus no qualification needed. Also, %RSD did not meet criteria for some analytes, yet none were detected. No further qualification is need.
Was RSD% with in criteria for each target analyte? Was RRF within criteria?		x		
Was curve fit used for evaluation? If yes, did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was the Initial Calibration Verification (ICV) done after the I.C., were (%D) (%R) within criteria?	x			

Criteria	Y	N	NA	Comment
D. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?	x			Within CCV Bromomethane, Dichlorodifluoromethane and THF did not meet %D criteria leading to qualification of non-detect estimate "UJ" values within samples. See attachment.
Were (%D) $\leq$ limit and relative response factors (RRF) within criteria?		x		
E. Laboratory Blanks				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 12 hours?	x			
Were contamination found, if so qualification may be necessary?		x		
Subsection : Field Blanks				TRIP BLANK
Was a field blank associated with each sample of SDG?	x			
Were target compounds detected in it?		x		
F. Surrogate Spikes				
Were surrogate percent recovery (%R) within QC limits?	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
G. Matrix Spike/Matrix Duplicate				MS/MSD
Were MS and MSD analyzed for SDG?	x			
Was MS/MSD done every 20 samples?	x			
Were MS/MSD (%R) and RPD within QC?	x			

Criteria	Y	N	NA	Comment
H. Field Duplicate				MW-5 and DUP
Were field duplicates identified in this SGD?	x			
Were target compounds detected in it? Were RSPs less than 50%?		x		
subsection: Internal Compounds				
Were counts within 50% to 200% of associated calibration standard?	x			
Were retention times within ± 10 sec of cal. standard?	x			
I. Target Analyte Identification				
Mass spectral ion abundance criteria specified for target analyte?	x			
Target analyte RRT outside specified RRT window?	x			
If sample is considered "Solid", is it greater than 30%?			x	
Did the spectrum meet EPA "Functional Guidelines"?	x			
J. Tentative Analyte Identification				
Were analyte results greater than 85% library match?			x	
Were National Functional Guidelines followed for TIC processing?			x	
K. Regional EPA QA/QC				
Were regional protocol of QA/AC protocols used in evaluation data?	x			
L. Overall Assessment of Data				
Was overall assessment of data found to be acceptable?	x			

Comments: Qualification due to failure in laboratory criteria within continuous calibration. All data is usable.

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 protocol Standard Operating Procedure for Validation of Semivolatile Data, QA-HWSS-A-005 along with the EPA's National Functional Guideline for Organic Compounds.

- Within ICV of instrument CHEM06 compound 2-Nitrophenol did not meet recommended RRF but was above minimum RRF value. No further qualification needed.
- Several analytes did not meet %D criteria which led to qualification as non-detect-estimate "UJ" values within all samples depending on their associated CCV.
- Hexachlorocyclopentadiene is qualified as rejected "R" values within samples associated with instrument CHEM69 due to recovery below laboratory limits within laboratory control sample CR8266LCS.

Data is qualified within category B criterion and is usable, except for the data qualified as rejected.

Job ID: GCR82666

8270E SIM/Isotope Dilutions

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Were samples within technical hold time and extraction period?	x			
Cooling Temp $\leq 6^{\circ}\text{C}$?	x			
B. GC/MS Instrument Performance Check				
Were DFTPP performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period?	x			
Ion abundance criteria met?	x			
C. Initial Calibration				
Was a 5-point calibration conducted?	x			Within ICV of instrument CHEM06 compound 2-Nitrophenol did not recommended RRF but was above minimum RRF value No further qualification needed.
RSD% within acceptable criterion?	x			
Was curve fit used for evaluation? If yes, did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was %D for target analytes within acceptable limit.	x			
Was RRF values meet for target analyte?		x		

Criteria	Y	N	NA	Comment
Was the Initial Calibration Verification (ICV) done after the I.C.?	x			
D. Continuing Calibration				
Was it done every 12 hours after Initial Calibration to verify it?	x			Several analytes did not meet %D criteria which led to qualification as non-detect-estimate "UJ" values within all samples depending on their associated CCV. See attachment.
Were (%D) and relative response factors (RRF) within acceptable criteria?				
E. Laboratory Blanks				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 20 samples?	x			
Were contamination found, if so qualification may be necessary?		x		
F. Field Blanks/Trip Blank				
Was a field blanks associated with each sample of SDG?		x		
Were target compounds detected in it?			x	
G. Surrogate Spikes (Isotope Dilution Recovery)				
Were surrogate percent recovery (%R) within QC limits?(Tetrahydrofuran-d8)	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
H. Matrix Spike/Matrix Duplicate				
Were MS and MSD analyzed for SDG?		x		

Criteria	Y	N	NA	Comment
Was MS/MSD done every 20 samples ?			x	
Were MS/MSD (%R) and RPD within QC?			x	
I. Laboratory Control Sample				
Was LCS analysis for this SDG?	x			Hexachlorocyclopentadiene is qualified as rejected “R” values within samples associated with instrument CHEM69 due to recovery below laboratory limits within laboratory control sample CR8266LCS. See attachment.
Was LCS analysis per analysis batch?	x			
Was LCS (%R) within QC Limits?		x		
J. Field Duplicate				
Were field duplicates identified in this SDG?		x		
Were target compounds detected in it?			x	
K. Internal Standard				
Was area response within acceptance limits?	x			
Were retention times within ± 30 sec of cal. standard?	x			
L. Compound Quantitation				
Were correct internal standards, quantitation ions and RRF used in quantitate compounds?	x			
Were compound quantitates and RLs adjusted to reflect sample dilutions and dry weights to continuous calibration?	x			
M. Target Compound Identification				
Were relative retention times (RRTs) within ±0.06 units of standard?	x			
Did the spectrum meet EPA "Functional Guidelines"?	x			
Were chromatograms peaks verified and accounted?	x			

Criteria	Y	N	NA	Comment
N. Overall Assessment of Data				
Was overall assessment of data found to be acceptable?	x			

Comments: Qualification of samples occurred due to laboratory criteria failure in continuous calibrations and laboratory control samples. Data within Cat. B criterion and usable, except for the data that is qualified as rejected.

Reviewer Comment: Hexachlorocyclopentadiene is qualified within samples are associated with CHEM69, as rejected "R" values due to recovery below laboratory limits. Qualification of analyte Pentachlororphenol as non-detect estimate "UJ" values is due to %D results above laboratory limit within associated CCV.

Reviewer Comment: Hexachlorocyclopentadiene is qualified within samples are associated with CHEM69, as rejected "R" values due to recovery below laboratory limits. Qualification of analyte Pentachlorophenol as non-detect estimate "UJ" values is due to %D results above laboratory limit within associated CCV.

Reviewer Comment: Qualification of several analytes as non-detect estimate "UJ" values is due to %D results above laboratory limit within associated CCV of CHEM06. 4-Chloroaniline did not meet minimum response led to qualification as rejection "R" value.

CR82672	MW-14	10/8/2024	Water

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 protocol Standard Operating Procedure for Validation of Polychlorinated Biphenyl (PCB) Aroclor Data, SOP#QA-HWSS-A-006.

- It is noted by reviewer that QA/QC samples laboratory blanks, laboratory control samples and matrix samples were all conducted on instrument ECD8 while samples were analyzed on ECD29. Samples are evaluated based on data collected on instrument such as surrogates, initial and continuing calibrations. If analytes were detected, they would be qualified as estimate "J" values. No analytes were present. Sample evaluated on ECD24 had QA/QC samples of blanks and laboratory controls samples and were evaluate normally.
- Within continuous calibration some compounds were outside of %D of instrument ECD29, samples are qualified as non-detect estimate "UJ" values. ECD24 had a failure of %D, but was below SOP standards, no further qualification needed.
- Surrogate failure occurred in CR8672 leading to qualification of all analytes as non-detect estimate "UJ". values.

All data is with in category B criterion and usable.

Client: Labella Associates DPC

Laboratory: Phoenix Environmental Laboratories, INC (NELAP #NY11301)

Site: Newton Plaza Associates, LLC

Job ID: GCSR82666

8082A PCB

Criteria	Y	N	NA	Comment
A. Sample Receipt				
With in technical hold time and extraction period?	x			
Cooling Temp = >6 °C	x			
B. Initial Calibration				
Was a 5 point calibration?	x			
RSD% for CF are within verification perimeter?	x			
Verified RT window. CFs and RSD are calculated and within bounds?	x			
C. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?	x			Compounds were outside of %D within associated CCVs of instrument ECD29 led to qualification within samples of Aroclor 1016 and 1260 as non-detect estimate "UJ" values. ECD24 had a failure of %D, but was below SOP standards, no further qualification needed. See attachment.
Were (%D) and relative respond factors (RRF) within bounds of CCV.	x			
Were the RTs of each target and surrogate in Aroclor standard (C3) and within RT window?		x		
D. Laboratory/Field Blanks				
Was a lab blank associated with each sample of SDG?		x		Sample conducted in of ECD24 had blanks associated within criteria. Samples run on instrument EDC29 had no blank run on the instrument, no analytes are detected in any associated samples. No further qualification needed.
Was blank analyzed every 20 samples?	x			
Were sulfur blanks run if needed?		x		
Were contamination found, if so qualification may be necessary.		x		

Criteria	Y	N	NA	Comment
E. Surrogate Spikes				
Were Surrogate percent recovery (%R) within QC limits?	x			Surrogate failure occurred in CR82672 leading to qualification of all analytes as non-detect estimate "UJ" values. See attachment.
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?		x		
F. Matrix Spike/Matrix Duplicate				
Were MS and MSD analyzed for SDG?		x		
Were MS/MSD (%R) and RPD within QC?			x	
G. Laboratory Control Sample				
Was LCS analysis for this SDG?	x			Sample conducted on ECD24 had LCS/LCSD associated within criteria. While laboratory control samples were present, they were analyzed on a different instrument than samples evaluated on ECD29 thus no qualification will be made based on this data.
Was LCS (%R) QC Limits?	x			
H. Target Analyte Identification				
Were relative retention times (RRTs) within ± 0.05 units of standard?	x			
Did the spectrum meet EPA "Functional Guidelines"?	x			
Were chromatograms peaks verified and accounted?	x			
I. GC/MS Confirmation				
GC/MS was performed at least one peak concentration ≥ 10 ng/ μ L.	x			
J. Target Analyte Quantitation and Reported CRQL				
Were target analyte and sample specific CRQL calculated correctly?	x			

Criteria	Y	N	NA	Comment
K. Field Duplicates				
Were Field Duplicated identified within sample package?		x		
Was RPD less than 50%?			x	
L. EPA Regional QA/QC				
Were QA/QC performed under regional criterion?	x			
Were field duplicates collected?	x			
M. Overall Assessment of Data				
Was Overall assessment of data found to be acceptable?	x			

Comments: Qualification occurred due to calibration and to surrogate failure. All results are within Cat. B criterion and usable.

Reviewer Summary :

Samples were handled and analyzed properly under EPA Region 2 Standard Operating Procedure for Validation of Pesticides Data, QA-HWSS-A_007.

- Within Continues Calibrations, %D of Endosulfan Sulfate and beta-BHC were above laboratory limits of several of the CCVs associated with the SDG GCR8266 in which all the samples were analyzed. All sample will have this analytes qualified as a non-detect estimate "UJ" values if applicable.
 - Within sample MW-3, Chlordane was not confirmed and was denoted by lab with appropriate qualification. No further qualification is needed.
- All data is with in category B criterion and usable.

Criteria	Y	N	NA	Comment
A. Sample Receipt				
With in technical hold time and extraction period?	x			
Cooling Temp = >6°C	x			
B. GC/ECD Instrument Performance Check				
Were Resolution Check Mixture (RESC) run and resolution criteria?	x			
Was PEM analysis performed within criteria for compound?	x			
Were Mid-point individual standard mixture performed and %resolution with in criteria?	x			
C. Initial Calibration				
Was the 5 point calibration with all mixtures and concentration run under criteria?	x			
Was a single point of Toxaphene at low standard in ICAL or five point Toxaphene independent runs?	x			
Were %RSD lower than criteria?	x			
D. Continuing Calibration				
Was it done every 12 hours after I.C. to verify it?			x	%D of Endosulfan Sulfate and beta-BHC were above laboratory limits of several of the CCVs associated with the SDG GCR8266 in which all the samples were analyzed. All sample will have this analyte qualified as a non-detect estimate "UJ" values if applicable. See attachment.
Were (%D), relative respond factors (RRF) and RT within criteria?		x		
Time elapse between CCV, Instrumental Blank, CCV PEM, CS3 did not exceed 14 hrs.?	x			
PEM % breakdown did not exceed criteria?	x			

Criteria	Y	N	NA	Comment
E. Blanks				
Was a lab blank associated with each sample of SDG?	x			
Were sulfur blanks run if needed?		x		
Were TCLP/ SPL Leachate Extractions Blanks (LEB) prepared and extracted at specific frequency?		x		
Were contaminants found, if so qualification may be necessary?		x		
F. Surrogate spikes				
Did Spike contain two surrogates (TCX and DCM) ran in all sample including blanks and standards	x			
Were Surrogate percent recovery (%R) with in QC limits? (30-150%)	x			
Were RT of Surrogates calculated for each sample?	x			
G. Matrix Spike/Matrix duplicate				
Were MS and MSD analyzed for SDG or matrix?		x		
Was MS/MSD done at specific frequency required by criteria?			x	
Were MS/MSD (%R) and RPD within QC?			x	
H. Laboratory control sample				
Was LCS analysis for this SDG and at specific frequency as required criteria?	x			
Was LCS (%R) within QC Limits?	x			
I. Florisil Cartridge Performance Check				
Were Florisil Cartridges used in Florisil clean up process?		x		
If so, %R of each performance target analyte and surrogates within criteria?			x	

Criteria	Y	N	NA	Comment
J. Gel Permeation Chromatography Performance Check				
Were GPC system used and did the two UV trace meet criteria requirements?		x		
K. Target Analyte Identification				
RTs of surrogates and reported targets analytes are with in calculated window?	x			
%D of target analytes and Toxaphene are calculated to less then 25%?	x			
All cosmographical observation are within QC criteria?	x			
L. GC/MS Confirmation				
GC/MS confirmation is done to specific criteria of both column for single compound concentration ≥ 5 ng/ μ and for Toxaphene concentration of ≥ 125 ng/ μ L?	x			Within sample MW-3, Chlordane was not confirmed and was denoted by lab with appropriate qualification. No further qualification is needed.
K. Target Analyte Quantitation and Reported CRQL				
Were target analyte and sample specific CRQL and CF are calculated correctly?	x			
M. EPA Reginal QA/QC				
Were QA/QC performed under regional criterion	x			
Were field duplicates collected?		x		
N. Overall assessment of data				
Was Overall assessment of data found to be acceptable?	x			

Comments: Due to action above criteria limits of continuous calibration qualification is needed. All results are with in Cat. B criterion and usable.

Calculation Spot Check

Instrument: ECD4

ICV Date and Time: 9/13/2024

Compound: alpha-BHC

Calibration Factor Response Concentration

L1	2.509	15391	2
L2	2.428	48659	5
L3	2.321	96714	10
L4	2.286	226512	25
L5	2.247	429149	50
L6	2.087	652013	75
L7	2.988	852409	100
average	2.409		
RSD	11.96		

Reviewer Comment: Qualification of a non-detect estimate “UJ” value within all associated samples is due to %D results above laboratory limit for analyte Endosulfan Sulfate within CCV.

Both channels need to have the compound detected for a concentration to be reported on either channel.

U1=Due to matrix interference and/or the presence of a large amount of non-target material, the reporting level for this compound has been elevated.

U2=The presence of this compound was not confirmed by the analyst based on the characteristic pattern matching of multi-component parameters, retention time, and/or peak shape.

P/C: P=Primary Result C=Confirmation Result X=Not Used CF=Calculated Calibration/Response Factor MC=Multi-Component

Reviewer Comment: Due to %D results above laboratory limit within associated CCVs, analytes beta-BHC and Endosulfan Sulfate are qualified as a non-detect estimate "UJ" value within sample. Treated as Primary and Confirmation data.

Both channels need to have the compound detected for a concentration to be reported on either channel.
U1=Due to matrix interference and/or the presence of a large amount of non-target material, the reporting level for this compound has been elevated.
U2=The presence of this compound was not confirmed by the analyst based on the characteristic pattern matching of multi-component parameters, retention time, and/or peak shape.
P/C: P=Primary Result C=Confirmation Result X=Not Used CF=Calculated Calibration/Response Factor MC=Multi-Component

Reviewer Summary :

Samples were handled and analyzed properly under SOP#QA-HWSS-A-010.

- It is noted the CRDL was not within recover limits of Mercury but was not detected within samples, no further qualification is needed.

Data is within category B criterion and is usable.

Method 6010D Metals

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Technical Hold Time of aqueous/TCLP/SPLP samples of 180 days preserved with nitric acid (pH>2)?	x			
Technical Hold Time of soil/sediment/wipe samples of 180 days ?	x			
B. Calibration				
Was an initial calibration done when system was set up or after CCV failure?	x			
Were 5 calibration standards and blank run at or below CRQL but above MDL?	x			
Were initial and continuous calibration verification (ICV and CCV) within NFG guidelines of %R (table 3)?	x			
C. Blanks				
Were contaminants found?		x		
Initial Calibration Blank (ICB) was analyzed after standards and run after ICV?	x			
Continuing Calibration Blank (CCB) was ran after every CCV every 2 hrs.	x			

Criteria	Y	N	NA	Comment
D. Laboratory Control Samples				CR82352 Mercury, CR82684
Was LCS analyzed for every group of aqueous/soil/ sediment /wipes samples in each SDG?(LCS is spiked 2X the CRQL for the associated matrix.)?	x			
Were %Rs within control limit of 70-130%? (Except for Sb and Ag , 50-150%)	x			
E. Matrix Spike/Matrix duplicate				CR82352 Mercury, CR82684
Were MS and MSD analyzed for SGD?	x			
Was MS/MSD done every 20 samples ?	x			
Were MS/MSD (%R) and RPD within QC?	x			
F. Duplicate Samples				CR82352 Mercury, CR82684
Was at least one duplicate sample is run per matrix or SDG?	x			
Were control limit of 50% Relative Percent Difference between 'original' and duplicate?	x			
Were control limit CRQL of <5X found?	x			
G. Serial Dilution				CR82684
Was ICP serial dilution performed on each sample for each group of the same (aqueous/soil/sediment similar matrix or SDG?	x			
Was %D of original compared to dilution $\leq 10\%$?(%D > 15% may be used for soil)	x			
H. Performance Evaluation Sample				
Were PE samples analyzed with the field samples and field blanks in SDG?	x			
Were results within warning limits (95% confidence interval) and action limit (99% confidence interval)	x			

Criteria	Y	N	NA	Comment
I. Regional EPA QA/QC				
Were regional protocols of QA/QC protocols used in evaluating data?	x			
Did RPD fall within specific limits in EPA region's SOP or project QAPP?	x			
J. Overall Assessment of Data				
Was Overall assessment of data found to be acceptable?	x			

Comments: All results are within Cat. B criterion and usable.

Criteria	Y	N	NA	Comment
A. Sample Receipt				
Were samples within technical hold time and extraction period?		x		
Cooling Temp $\leq 6^{\circ}\text{C}$?	x			
B. GC/MS Instrument Performance Check				
Were DFTPP performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period?	x			
Ion abundance criteria met?	x			
C. Initial Calibration				
Was a 5-point calibration conducted?	x			
RSD% within acceptable criterion?	x			
Was curve fit used for evaluation? If yes, did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was %D for target analytes within acceptable limit.	x			
Was RRF values meet for target analyte?	x			
Was the Initial Calibration Verification (ICV) done after the I.C.?	x			
D. Continuing Calibration				
Was it done every 12 hours after Initial Calibration to verify it?	x			
Were (%D) and relative response factors (RRF) within acceptable criteria?	x			

Criteria	Y	N	NA	Comment
E. Laboratory Blanks				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 20 samples?	x			
Were contamination found, if so qualification may be necessary?		x		
F. Field Blanks/Trip Blank				
Was a field blanks associated with each sample of SDG?		x		
Were target compounds detected in it?			x	
G. Surrogate Spikes (Isotope Dilution Recovery)				
Were surrogate percent recovery (%R) within QC limits?(1,4-Dioxane-d8)	x			
If the (%R) for one or more surrogates were out of QC, was reanalysis performed to confirm %R?	x			
H. Matrix Spike/Matrix Duplicate				
Were MS and MSD analyzed for SDG?		x		
Was MS/MSD done every 20 samples ?			x	
Were MS/MSD (%R) and RPD within QC?			x	
I. Laboratory Control Sample				
Was LCS analysis for this SDG?	x			
Was LCS analysis per analysis batch?	x			
Was LCS (%R) within QC Limits?	x			
J. Field Duplicate				
Were field duplicates identified in this SDG?		x		
Were target compounds detected in it?			x	

Criteria	Y	N	NA	Comment
K. Internal Standard				
Was area response within acceptance limits?	x			
Were retention times within ± 30 sec of cal. standard?	x			
L. Compound Quantitation				
Were correct internal standards, quantitation ions and RRF used in quantitate compounds?	x			
Were compound quantitates and RLs adjusted to reflect sample dilutions and dry weights to continuous calibration?	x			
M. Target Compound Identification				
Were relative retention times (RRTs) within ± 0.06 units of standard?	x			
Did the spectrum meet EPA "Functional Guidelines"?	x			
Were chromatograms peaks verified and accounted?	x			
N. Overall Assessment of Data				
Was overall assessment of data found to be acceptable?	x			

Comments: All data were within Cat. B criterion and usable.

CR82667-24J0825-02	MW-14	10/8/2024	Water

Reviewer Summary:

Samples were handled and analyzed properly under EPA's National Functional Guideline for Organic Compounds, DEC's Sampling, Analysis, And Assessment of Per- and Polyfluoroalkyl Substances and method 1633.

- It is noted that there were several analytes which correlation coefficients were outside of laboratory limits, but none were detected with in sample. No further qualification is needed.
- Within associated continuing calibrations, S4J2139-CCV3 and -CCV4 there were a few failures in recovery but only analyte PFHpA was detected which led to qualification of analyte as a estimate "J" values in sample MW-14.
- Recovery of system monitoring compounds d-N-MeFOSA and d-N-EtFOSA were recovered below laboratory limits within MW-14 as was d-N-EtFOSA for MW-1. This led to qualification of the target compounds within these samples non-detect estimate values.

All data is within category B criterion and usable.

Samples were analyzed under:

- USEPA Region 2 *Analysis of Volatile Organic Compounds in Air Contained in Canisters by Method TO-15*, SOP HW-31, Revised 6 (September 2016)
- USEPA Contract Laboratory Program National Functional Guidelines for Organic Superfund Methods Data Review, EPA 540-R-20-005 (November 2020)

Criteria for Data Usability Summary Report

Completeness:

A complete data package is one that has all relevant and related material packaged for distribution to its client in accordance with the Analytical Service Protocol (ASP) Category B Deliverables guidelines.

Compliant:

A compliant data package is one that is determined to have all work that pertains to the production of the laboratory data in a manner that is consistent with the Quality Assurance Program Plan.

Overall Usability Issues

Data validation was completed in accordance with the New York State Department of Environmental Conservation Analytical Service Protocol (NYSDEC ASP) Category B Data Deliverable requirements and reviewer's professional judgment.

This analytical report complies with the following points:

1. Holding Time and Analysis Time
 2. Sample Analysis and Quality Control.
- There was no rejection of data.

In conclusion, the data reviewed in this report is usable and valid as it passes all stated criteria for compliance with method TO-15.

Data Completeness

- A complete Category B data package under the NYSDEC ASP has been reported.
- Note- Result were presented as in laboratory report Form1 as ppbv while shown in EDD as ug/m3. Both results are accurate and acceptable. Also note, while there are both target and SIM analytes, only one is noted in EDD, thus only one is qualified within document.

Data Validation Acronyms

AA	Atomic Absorption, Flame Technique
BHC	Hexachlorocyclohexane
BFB	Bromofluorobenzene (Tune check analyte)
CCC	Continuing Calibration Check
CCV	Continuing Calibration Verification
CRDL	Contract Required Detection Limit
CRQL	Contract Required Quantitation Limit
CVAA	Atomic Absorption, Cold Vapor
DCAA	2,4-Dichlorophenylacetic acid
DCB	Decachlorobiphenyl
DFTPP	Decafluorotriphenyl phosphine (Tune check analyte)
DL	Detection Limit
ECD	Electron Capture Detector
FAA	Atomic Absorption, Furnace Technique
FID	Flame Ionization Detector
FNP	1-Fluoronaphthalene
GC	Gas Chromatography
GC/MS	Gas Chromatography/ Mass Spectrometry
GPC	Gel Permeation Chromatography
ICB	Initial Calibration Blank
ICP	Inductively Coupled Plasma – Atomic Emission Spectrometer
ICV	Initial Calibration Verification
IDL	Instrument Detection Limit
ICAL	Initial Calibration Curve
IS	Internal Standard
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LCS/LCSD	Laboratory Control Sample/ Laboratory Control Sample Duplicate
MB	Method Blank
MS	Matrix Spike
BNAMS11	Method of Standard Additions
MSD	Matrix Spike Duplicate
MS/MSD	Matrix Spike/ Matrix Spike Duplicate
ND	Non-detected or Not Detected
PID	Photo Ionization Detector

Data Validation Acronyms

PCB	Polychlorinated biphenyl
PCDD	Polychlorinated dibenzodioxins
PCDF	Polychlorinated dibenzofurans
PQL	Practical Quantitation Limit
QA	Quality Assurance
QA/QC	Quality Assurance/ Quality Control
QC	Quality Control
RF	Response Factor
RPD	Relative Percent Difference
RL	Reporting Limit
RRF	Relative Response Factor
RT	Retention Time
RRT	Relative Retention Time
SDG	Sample Delivery Group
SMC	System Monitoring Compounds/ Surrogates
SPCC	Sample Performance Check Compound
TCX	Tetrachloro-m-xylene
%D	Percent Drift
%R	Percent Recovery
%RSD	Percent Relative Standard Deviation

Data Validation Qualifiers

U	The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit.
J	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
J+	The result is an estimated quantity, but the result may be biased high.
J-	The result is an estimated quantity, but the result may be biased low.
NJ	The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated numerical value represents its approximate concentration.
UJ	The analyte was analyzed for but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
R	The data is unusable. The sample results are rejected due to serious deficiencies in meeting Quality Control (QC) criteria. The analyte may or may not be present in the sample.

Note:

1. These qualifiers are used for data validation purposes. The data validation qualifiers may differ from the qualifiers that the laboratory assigns to the data. Refer to the laboratory analytical report for the definitions of the laboratory qualifiers.
2. The EDDs are assigned to these data validation qualifiers and refer to the valid value list supplied by the specific agency or informational data system.

CS20047	DUP	12/2/2024	Air (8 hrs.)

Reviewer Summary :

Samples were handled and analyzed properly under EPA's National Functional Guideline for Organic Compounds and SOP NO. HW-31.

- It is noted that recovery was outside laboratory criteria for certain analytes of the three ICV but did not require any qualification.
- The opening and closing CCVs ran per batch had several compounds failed %D which led to qualification within associated samples as non-detect estimate or estimate "UJ/J" values.
- Within laboratory control sample CS19456, ethanol had recovery above laboratory limit led to qualification in all samples as estimate "J" values with associated samples.
- No analytes were detected within SV-5 thus no comparison to DUP needed. Each batch had duplicate samples run, RSD were all within laboratory criteria. No qualification needed.

All data is within category B criterion and usable.

TO-15

Criteria	Y	N	NA	Comment
A. Sample Integrity and Preservation				
Were samples within technical hold time and extraction period?	x			
Were preserved pressure difference between sampling and analysis ≤ 5 psi)	x			
Canister Cleaning results provided?	x			
B. GC/MS Instrument Performance Check				
Were BFB performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period	x			
C. Initial Calibration				
Was a 5 point calibration conducted?	x			It is noted that recovery was outside laboratory criteria for certain analytes of the three ICV but did not require any qualification.
RSD% within acceptable criterion?	x			
Was curve fit used for evaluation? If yes did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was the Initial Calibration Verification (ICV) done after the I.C? Was retention time within bounds?	x			
D. Continuing Calibration				
Was it done every 12 hours after Initial Calibration to verify it?	x			The opening and closing CCVs ran per batch had several compounds failed %D which led to qualification within associated samples as non-detect estimate or estimate "UJ/J" values. See attachment.
Were Drift % and (RRF) within acceptable criteria?	x			

Criteria	Y	N	NA	Comment
E. Laboratory Blanks/ Air Canister Certification Results				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 20 samples?	x			
Were contamination found, if so qualification may be necessary?		x		
Were method detection limits defined?	x			
Were Air Canister Certification Results present?	x			
Were contaminants detected, if so qualification may be necessary?		x		
F. Laboratory control sample				
Was LCS analysis for this SDG?	x			Within LCS sample CS19456, ethanol had recovery above laboratory limit led to qualification in all samples as estimate "J" values with associated samples. See attachment.
Was LCS analysis per analysis batch?	x			
Was LCS (%R) within QC Limits?		x		
G. Internal Standards				
Were Surrogates percent recovery (%R) within QC limits?	x			
Were retention times of analytes less than 20 sec difference between samples?	x			
H. Compound Quantitation				
Were correct internal standards, quantitation ions and RRF used in quantitate compounds?	x			
Were compound quantitates and RLs adjusted to reflect sample dilutions and dry weights to continuous calibration?	x			

Criteria	Y	N	NA	Comment
I. Target Compound Identification				
Did the spectrum meet EPA "Functional Guidelines"?	x			
Were chromatograms peaks verified and accounted?	x			
J. Laboratory/Field Duplicate				SV-5 and DUP
Were field duplicates identified in this SDG?	x			No analytes were detected within SV-5 thus no comparison needed. Each batch had duplicate samples run, RSD were all within laboratory criteria. No qualification needed.
Were target compounds detected in it?	x			
K. Overall Assessment of Data				
Was Overall assessment of data found to be acceptable?	x			

Comments: Qualification due to failure in criteria within continuous calibration and laboratory control sample. All results were within Cat. B criterion and usable.

Samples were analyzed under:

- USEPA Region 2 *Analysis of Volatile Organic Compounds in Air Contained in Canisters by Method TO-15*, SOP HW-31, Revised 6 (September 2016)
- USEPA Contract Laboratory Program National Functional Guidelines for Organic Superfund Methods Data Review, EPA 540-R-20-005 (November 2020)

Criteria for Data Usability Summary Report

Completeness:

A complete data package is one that has all relevant and related material packaged for distribution to its client in accordance with the Analytical Service Protocol (ASP) Category B Deliverables guidelines.

Compliant:

A compliant data package is one that is determined to have all work that pertains to the production of the laboratory data in a manner that is consistent with the Quality Assurance Program Plan.

Overall Usability Issues

Data validation was completed in accordance with the New York State Department of Environmental Conservation Analytical Service Protocol (NYSDEC ASP) Category B Data Deliverable requirements and reviewer's professional judgment.

This analytical report complies with the following points:

1. Holding Time and Analysis Time
2. Sample Analysis and Quality Control.

- There was no rejection of data.

In conclusion, the data reviewed in this report is usable and valid as it passes all stated criteria for compliance with method TO-15.

Data Completeness

- A complete Category B data package under the NYSDEC ASP has been reported.

Note- Result were presented as in laboratory report Form1 as ppbv while shown in EDD as ug/m³. Both results are accurate and acceptable. Also note, while there are both target and SIM analytes, only one is noted in EDD, thus only one is qualified within document.

Data Validation Acronyms

AA	Atomic Absorption, Flame Technique
BHC	Hexachlorocyclohexane
BFB	Bromofluorobenzene (Tune check analyte)
CCC	Continuing Calibration Check
CCV	Continuing Calibration Verification
CRDL	Contract Required Detection Limit
CRQL	Contract Required Quantitation Limit
CVAA	Atomic Absorption, Cold Vapor
DCAA	2,4-Dichlorophenylacetic acid
DCB	Decachlorobiphenyl
DFTPP	Decafluorotriphenyl phosphine (Tune check analyte)
DL	Detection Limit
ECD	Electron Capture Detector
FAA	Atomic Absorption, Furnace Technique
FID	Flame Ionization Detector
FNP	1-Fluoronaphthalene
GC	Gas Chromatography
GC/MS	Gas Chromatography/ Mass Spectrometry
GPC	Gel Permeation Chromatography
ICB	Initial Calibration Blank
ICP	Inductively Coupled Plasma – Atomic Emission Spectrometer
ICV	Initial Calibration Verification
IDL	Instrument Detection Limit
ICAL	Initial Calibration Curve
IS	Internal Standard
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LCS/LCSD	Laboratory Control Sample/ Laboratory Control Sample Duplicate
MB	Method Blank
MS	Matrix Spike
BNAMS11	Method of Standard Additions
MSD	Matrix Spike Duplicate
MS/MSD	Matrix Spike/ Matrix Spike Duplicate
ND	Non-detected or Not Detected
PID	Photo Ionization Detector

Data Validation Acronyms

PCB	Polychlorinated biphenyl
PCDD	Polychlorinated dibenzodioxins
PCDF	Polychlorinated dibenzofurans
PQL	Practical Quantitation Limit
QA	Quality Assurance
QA/QC	Quality Assurance/ Quality Control
QC	Quality Control
RF	Response Factor
RPD	Relative Percent Difference
RL	Reporting Limit
RRF	Relative Response Factor
RT	Retention Time
RRT	Relative Retention Time
SDG	Sample Delivery Group
SMC	System Monitoring Compounds/ Surrogates
SPCC	Sample Performance Check Compound
TCX	Tetrachloro-m-xylene
%D	Percent Drift
%R	Percent Recovery
%RSD	Percent Relative Standard Deviation

Data Validation Qualifiers

U	The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit.
J	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
J+	The result is an estimated quantity, but the result may be biased high.
J-	The result is an estimated quantity, but the result may be biased low.
NJ	The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated numerical value represents its approximate concentration.
UJ	The analyte was analyzed for but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
R	The data is unusable. The sample results are rejected due to serious deficiencies in meeting Quality Control (QC) criteria. The analyte may or may not be present in the sample.

Note:

1. These qualifiers are used for data validation purposes. The data validation qualifiers may differ from the qualifiers that the laboratory assigns to the data. Refer to the laboratory analytical report for the definitions of the laboratory qualifiers.
2. The EDDs are assigned to these data validation qualifiers and refer to the valid value list supplied by the specific agency or informational data system.

Reviewer Summary :

Samples were handled and analyzed properly under EPA's National Functional Guideline for Organic Compounds and SOP NO. HW-31.

- It is noted that several analytes recovery was outside laboratory criteria for certain analytes of the two ICV but did not require any qualification.
- The opening and closing CCVs per batch 761314 had analytes Napthalene and 1,2,4-Trichlorobenzene(sim) failed %D which led to qualification within associated samples as non-detect estimate "UJ" values. Note, while additional analytes may have failed, not all analytes are present in samples.
- Within LCS sample CS20740, ethyl acetate had recovery above laboratory limit led to qualification in samples CS21164 and CS21166 as estimate "J" values. Within LCS sample CS20743, ethanol had recovery above laboratory limit led to qualification in all associated sample.

All data is within category B criterion and usable.

TO-15

Criteria	Y	N	NA	Comment
A. Sample Integrity and Preservation				
Were samples within technical hold time and extraction period?	x			
Were preserved pressure difference between sampling and analysis ≤ 5 psi)	x			
Canister Cleaning results provided?	x			
B. GC/MS Instrument Performance Check				
Were BFB performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period	x			
C. Initial Calibration				
Was a 5 point calibration conducted?	x			It is noted that several analytes recovery was outside laboratory criteria for certain analytes of the two ICV but did not require any qualification.
RSD% within acceptable criterion?	x			
Was curve fit used for evaluation? If yes did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was the Initial Calibration Verification (ICV) done after the I.C? Was retention time within bounds?	x			
D. Continuing Calibration				
Was it done every 12 hours after Initial Calibration to verify it?	x			The opening and closing CCVs per batch 761314 had analytes Napthalene and 1,2,4-Trichlorobenzene(sim) failed %D which led to qualification within associated samples as non-detect estimate "UJ" values. See attachment.
Were Drift % and (RRF) within acceptable criteria?		x		

Criteria	Y	N	NA	Comment
E. Laboratory Blanks/ Air Canister Certification Results				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 20 samples?	x			
Were contamination found, if so qualification may be necessary?		x		
Were method detection limits defined?	x			
Were Air Canister Certification Results present?	x			
Were contaminants detected, if so qualification may be necessary?		x		
F. Laboratory control sample				
Was LCS analysis for this SDG?	x			Within LCS sample CS20740, ethyl acetate had recovery above laboratory limit led to qualification in samples CS21164 and CS21166 as estimate "J" values. Within LCS sample CS20743, ethanol had recovery above laboratory limit led to qualification in all associated sample. See attachment.
Was LCS analysis per analysis batch?	x			
Was LCS (%R) within QC Limits?		x		
G. Internal Standards				
Were Surrogates percent recovery (%R) within QC limits?	x			
Were retention times of analytes less than 20 sec difference between samples?	x			
H. Compound Quantitation				
Were correct internal standards, quantitation ions and RRF used in quantitate compounds?	x			
Were compound quantitates and RLs adjusted to reflect sample dilutions and dry weights to continuous calibration?	x			

Criteria	Y	N	NA	Comment
I. Target Compound Identification				
Did the spectrum meet EPA "Functional Guidelines"?	x			
Were chromatograms peaks verified and accounted?	x			
J. Laboratory/Field Duplicate				
Were field duplicates identified in this SDG?		x		
Were target compounds detected in it?			x	
K. Overall Assessment of Data				
Was Overall assessment of data found to be acceptable?	x			

Comments: Qualification due to failure in criteria within continuous calibration and laboratory control sample. All results were within Cat. B criterion and usable.

Reviewer Comment: Due to opening and closing CCVs per batch 761314 had analytes Naphthalene and 1,2,4-Trichlorobenzene(sim) failed %D which led to qualification within associated samples as non-detect estimate "UJ" values. Ethyl acetate is qualified as estimate "J" value due to recovery above limits within laboratory control sample CS20740.

Samples were analyzed under:

- USEPA Region 2 *Analysis of Volatile Organic Compounds in Air Contained in Canisters by Method TO-15*, SOP HW-31, Revised 6 (September 2016)
- USEPA Contract Laboratory Program National Functional Guidelines for Organic Superfund Methods Data Review, EPA 540-R-20-005 (November 2020)

Criteria for Data Usability Summary Report

Completeness:

A complete data package is one that has all relevant and related material packaged for distribution to its client in accordance with the Analytical Service Protocol (ASP) Category B Deliverables guidelines.

Compliant:

A compliant data package is one that is determined to have all work that pertains to the production of the laboratory data in a manner that is consistent with the Quality Assurance Program Plan.

Overall Usability Issues

Data validation was completed in accordance with the New York State Department of Environmental Conservation Analytical Service Protocol (NYSDEC ASP) Category B Data Deliverable requirements and reviewer's professional judgment.

This analytical report complies with the following points:

1. Holding Time and Analysis Time
2. Sample Analysis and Quality Control.

- There was no rejection of data.

In conclusion, the data reviewed in this report is usable and valid as it passes all stated criteria for compliance with method TO-15.

Data Completeness

- A complete Category B data package under the NYSDEC ASP has been reported.

Note- Result were presented as in laboratory report Form1 as ppbv while shown in EDD as ug/m³. Both results are accurate and acceptable. Also note, while there are both target and SIM analytes, only one is noted in EDD, thus only one is qualified within document.

Data Validation Acronyms

AA	Atomic Absorption, Flame Technique
BHC	Hexachlorocyclohexane
BFB	Bromofluorobenzene (Tune check analyte)
CCC	Continuing Calibration Check
CCV	Continuing Calibration Verification
CRDL	Contract Required Detection Limit
CRQL	Contract Required Quantitation Limit
CVAA	Atomic Absorption, Cold Vapor
DCAA	2,4-Dichlorophenylacetic acid
DCB	Decachlorobiphenyl
DFTPP	Decafluorotriphenyl phosphine (Tune check analyte)
DL	Detection Limit
ECD	Electron Capture Detector
FAA	Atomic Absorption, Furnace Technique
FID	Flame Ionization Detector
FNP	1-Fluoronaphthalene
GC	Gas Chromatography
GC/MS	Gas Chromatography/ Mass Spectrometry
GPC	Gel Permeation Chromatography
ICB	Initial Calibration Blank
ICP	Inductively Coupled Plasma – Atomic Emission Spectrometer
ICV	Initial Calibration Verification
IDL	Instrument Detection Limit
ICAL	Initial Calibration Curve
IS	Internal Standard
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LCS/LCSD	Laboratory Control Sample/ Laboratory Control Sample Duplicate
MB	Method Blank
MS	Matrix Spike
BNAMS11	Method of Standard Additions
MSD	Matrix Spike Duplicate
MS/MSD	Matrix Spike/ Matrix Spike Duplicate
ND	Non-detected or Not Detected
PID	Photo Ionization Detector

Data Validation Acronyms

PCB	Polychlorinated biphenyl
PCDD	Polychlorinated dibenzodioxins
PCDF	Polychlorinated dibenzofurans
PQL	Practical Quantitation Limit
QA	Quality Assurance
QA/QC	Quality Assurance/ Quality Control
QC	Quality Control
RF	Response Factor
RPD	Relative Percent Difference
RL	Reporting Limit
RRF	Relative Response Factor
RT	Retention Time
RRT	Relative Retention Time
SDG	Sample Delivery Group
SMC	System Monitoring Compounds/ Surrogates
SPCC	Sample Performance Check Compound
TCX	Tetrachloro-m-xylene
%D	Percent Drift
%R	Percent Recovery
%RSD	Percent Relative Standard Deviation

Data Validation Qualifiers

U	The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit.
J	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
J+	The result is an estimated quantity, but the result may be biased high.
J-	The result is an estimated quantity, but the result may be biased low.
NJ	The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated numerical value represents its approximate concentration.
UJ	The analyte was analyzed for but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
R	The data is unusable. The sample results are rejected due to serious deficiencies in meeting Quality Control (QC) criteria. The analyte may or may not be present in the sample.

Note:

1. These qualifiers are used for data validation purposes. The data validation qualifiers may differ from the qualifiers that the laboratory assigns to the data. Refer to the laboratory analytical report for the definitions of the laboratory qualifiers.
2. The EDDs are assigned to these data validation qualifiers and refer to the valid value list supplied by the specific agency or informational data system.

Reviewer Summary :

Samples were handled and analyzed properly under EPA's National Functional Guideline for Organic Compounds and SOP NO. HW-31.

- It is noted that several analytes recovery was outside laboratory criteria for certain analytes of the two ICV but did not require any qualification.
- The opening and closing CCVs per batch 761314 had analytes Napthalene and 1,2,4-Trichlorobenzene(sim) failed %D which led to qualification within associated samples as non-detect estimate "UJ" values. Note, while additional analytes may have failed, not all analytes are present in samples.
- Within LCS sample CS20740, ethyl acetate had recovery above laboratory limit led to qualification in samples CS21164 and CS21166 as estimate "J" values. Within LCS sample CS20743, ethanol had recovery above laboratory limit led to qualification in all associated sample.

All data is within category B criterion and usable.

TO-15

Criteria	Y	N	NA	Comment
A. Sample Integrity and Preservation				
Were samples within technical hold time and extraction period?	x			
Were preserved pressure difference between sampling and analysis ≤ 5 psi)	x			
Canister Cleaning results provided?	x			
B. GC/MS Instrument Performance Check				
Were BFB performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period	x			
C. Initial Calibration				
Was a 5 point calibration conducted?	x			It is noted that several analytes recovery was outside laboratory criteria for certain analytes of the two ICV but did not require any qualification.
RSD% within acceptable criterion?	x			
Was curve fit used for evaluation? If yes did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was the Initial Calibration Verification (ICV) done after the I.C? Was retention time within bounds?	x			
D. Continuing Calibration				
Was it done every 12 hours after Initial Calibration to verify it?	x			The opening and closing CCVs per batch 761495 add 761497 had analytes Napthalene and 1,2,4-Trichlorobenzene(sim) failed %D which led to qualification within associated samples as non-detect estimate "UJ" values. See attachment.
Were Drift % and (RRF) within acceptable criteria?		x		

Criteria	Y	N	NA	Comment
E. Laboratory Blanks/ Air Canister Certification Results				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 20 samples?	x			
Were contamination found, if so qualification may be necessary?		x		
Were method detection limits defined?	x			
Were Air Canister Certification Results present?	x			
Were contaminants detected, if so qualification may be necessary?		x		
F. Laboratory control sample				
Was LCS analysis for this SDG?	x			Within LCS sample CS22254, ethyl acetate had recovery above laboratory limit led to qualification in several samples as estimate "J" values. Within LCS sample CS21903, 1,4-dioxane had recovery below laboratory limit led to qualification in all associated sample as an estimate and no-detect estimate "J/UJ" values. See attachment.
Was LCS analysis per analysis batch?	x			
Was LCS (%R) within QC Limits?		x		
G. Internal Standards				
Were Surrogates percent recovery (%R) within QC limits?	x			
Were retention times of analytes less than 20 sec difference between samples?	x			
H. Compound Quantitation				
Were correct internal standards, quantitation ions and RRF used in quantitate compounds?	x			
Were compound quantitates and RLs adjusted to reflect sample dilutions and dry weights to continuous calibration?	x			

Criteria	Y	N	NA	Comment
I. Target Compound Identification				
Did the spectrum meet EPA "Functional Guidelines"?	x			
Were chromatograms peaks verified and accounted?	x			
J. Laboratory/Field Duplicate				
Were field duplicates identified in this SDG?	x			Laboratory duplicates were run within each batch, CS222254, CS21903 and CS21908 were all within parameters of laboratory comparison. Comparing duplicate pair SS-22 and DUP-3 samples results are within acceptable quantities. No further qualification is needed.
Were target compounds detected in it?	x			
K. Overall Assessment of Data				
Was Overall assessment of data found to be acceptable?	x			

Comments: Qualification due to failure in criteria within continuous calibration and laboratory control sample. All results were within Cat. B criterion and usable.

Reviewer Comment: Due to opening and closing CCVs per batch 761497 had analytes Naphthalene and 1,2,4-Trichlorobenzene(sim) failed %D which led to qualification within associated samples as non-detect estimate "UJ" values. 1,4-Dioxane is qualified due to recovery below limits within laboratory control sample CS21903.

Reviewer Comment: Due to opening and closing CCVs per batch 761497 had analytes Naphthalene and 1,2,4-Trichlorobenzene(sim) failed %D which led to qualification within associated samples as non-detect estimate "UJ" values. 1,4-Dioxane is qualified due to recovery below limits within laboratory control sample CS21903.

Reviewer Comment: Due to opening and closing CCVs per batch 761495 had analytes Naphthalene and 1,2,4-Trichlorobenzene(sim) failed %D which led to qualification within associated samples as non-detect estimate "UJ" values. Ethyl acetate is qualified due to recovery above limits within laboratory control sample CS22254.

CS23199	SS-4	12/4/2024	Air (8 hrs.)	x

Samples were analyzed under:

- USEPA Region 2 *Analysis of Volatile Organic Compounds in Air Contained in Canisters by Method TO-15*, SOP HW-31, Revised 6 (September 2016)
- USEPA Contract Laboratory Program National Functional Guidelines for Organic Superfund Methods Data Review, EPA 540-R-20-005 (November 2020)

Criteria for Data Usability Summary Report

Completeness:

A complete data package is one that has all relevant and related material packaged for distribution to its client in accordance with the Analytical Service Protocol (ASP) Category B Deliverables guidelines.

Compliant:

A compliant data package is one that is determined to have all work that pertains to the production of the laboratory data in a manner that is consistent with the Quality Assurance Program Plan.

Overall Usability Issues

Data validation was completed in accordance with the New York State Department of Environmental Conservation Analytical Service Protocol (NYSDEC ASP) Category B Data Deliverable requirements and reviewer's professional judgment.

This analytical report complies with the following points:

1. Holding Time and Analysis Time
2. Sample Analysis and Quality Control.

- There was no rejection of data.

In conclusion, the data reviewed in this report is usable and valid as it passes all stated criteria for compliance with method TO-15.

Data Completeness

- A complete Category B data package under the NYSDEC ASP has been reported.

Note- Result were presented as in laboratory report Form1 as ppbv while shown in EDD as ug/m³. Both results are accurate and acceptable. Also note, while there are both target and SIM analytes, only one is noted in EDD, thus only one is qualified within document.

Data Validation Acronyms

AA	Atomic Absorption, Flame Technique
BHC	Hexachlorocyclohexane
BFB	Bromofluorobenzene (Tune check analyte)
CCC	Continuing Calibration Check
CCV	Continuing Calibration Verification
CRDL	Contract Required Detection Limit
CRQL	Contract Required Quantitation Limit
CVAA	Atomic Absorption, Cold Vapor
DCAA	2,4-Dichlorophenylacetic acid
DCB	Decachlorobiphenyl
DFTPP	Decafluorotriphenyl phosphine (Tune check analyte)
DL	Detection Limit
ECD	Electron Capture Detector
FAA	Atomic Absorption, Furnace Technique
FID	Flame Ionization Detector
FNP	1-Fluoronaphthalene
GC	Gas Chromatography
GC/MS	Gas Chromatography/ Mass Spectrometry
GPC	Gel Permeation Chromatography
ICB	Initial Calibration Blank
ICP	Inductively Coupled Plasma – Atomic Emission Spectrometer
ICV	Initial Calibration Verification
IDL	Instrument Detection Limit
ICAL	Initial Calibration Curve
IS	Internal Standard
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LCS/LCSD	Laboratory Control Sample/ Laboratory Control Sample Duplicate
MB	Method Blank
MS	Matrix Spike
BNAMS11	Method of Standard Additions
MSD	Matrix Spike Duplicate
MS/MSD	Matrix Spike/ Matrix Spike Duplicate
ND	Non-detected or Not Detected
PID	Photo Ionization Detector

Data Validation Acronyms

PCB	Polychlorinated biphenyl
PCDD	Polychlorinated dibenzodioxins
PCDF	Polychlorinated dibenzofurans
PQL	Practical Quantitation Limit
QA	Quality Assurance
QA/QC	Quality Assurance/ Quality Control
QC	Quality Control
RF	Response Factor
RPD	Relative Percent Difference
RL	Reporting Limit
RRF	Relative Response Factor
RT	Retention Time
RRT	Relative Retention Time
SDG	Sample Delivery Group
SMC	System Monitoring Compounds/ Surrogates
SPCC	Sample Performance Check Compound
TCX	Tetrachloro-m-xylene
%D	Percent Drift
%R	Percent Recovery
%RSD	Percent Relative Standard Deviation

Data Validation Qualifiers

U	The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit.
J	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
J+	The result is an estimated quantity, but the result may be biased high.
J-	The result is an estimated quantity, but the result may be biased low.
NJ	The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated numerical value represents its approximate concentration.
UJ	The analyte was analyzed for but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
R	The data is unusable. The sample results are rejected due to serious deficiencies in meeting Quality Control (QC) criteria. The analyte may or may not be present in the sample.

Note:

1. These qualifiers are used for data validation purposes. The data validation qualifiers may differ from the qualifiers that the laboratory assigns to the data. Refer to the laboratory analytical report for the definitions of the laboratory qualifiers.
2. The EDDs are assigned to these data validation qualifiers and refer to the valid value list supplied by the specific agency or informational data system.

Reviewer Summary :

Samples were handled and analyzed properly under EPA's National Functional Guideline for Organic Compounds and SOP NO. HW-31.

- Samples CS23291, CS23198 and CS23199 were received under no vacuum thus samples may not be representative of results stated by lab.
- It is noted that several analytes recovery was outside laboratory criteria for certain analytes of the two ICV but did not require any qualification.
- The opening and closing CCVs per batch 761314 had analytes naphthalene and 1,2,4-trichlorobenzene(sim) failed %D which led to qualification within associated samples as non-detect estimate "UJ" values. Note, while additional analytes may have failed, not all analytes are present in samples.
- Within LCS sample CS20740, ethyl acetate had recovery above laboratory limit led to qualification in samples CS21164 and CS21166 as estimate "J" values. Within LCS sample CS20743, ethanol had recovery above laboratory limit led to qualification in all associated sample.
- Laboratory duplicates were run within each batch, CS21908 and CS22739 were all within parameters of laboratory comparison. Duplicate pair SS-18 and DUP-5 samples results are within acceptable quantities. No further qualification is needed.

(continue to nest page)

- Duplicate pair SS-4 and DUP-2 samples results are not within acceptable quantities. As note previously samples had no vacuumed when arriving to laboratory leading to questionable results. As such detected target with RPD greater than 50% than be qualified as estimate "J" values. Duplicate pair SS-19 and DUP-4 samples results are within acceptable quantities except for ethanol which requires estimates "J" value.
All data is within category B criterion and usable.

TO-15

Criteria	Y	N	NA	Comment
A. Sample Integrity and Preservation				
Were samples within technical hold time and extraction period?	x			Samples CS23291, CS23198 and CS23199 were received under no vacuum thus samples may not be representative of results stated by lab.
Were preserved pressure difference between sampling and analysis ≤ 5psi)	x			
Canister Cleaning results provided?	x			
B. GC/MS Instrument Performance Check				
Were BFB performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period	x			
C. Initial Calibration				
Was a 5 point calibration conducted?	x			It is noted that several analytes recovery were outside laboratory criteria for certain analytes of the two ICV but did not require any qualification.
RSD% within acceptable criterion?	x			
Was curve fit used for evaluation? If yes did the I.C. meet the curve fit acceptability of ≥0.990 ?	x			
Was the Initial Calibration Verification (ICV) done after the I.C? Was retention time within bounds?	x			
D. Continuing Calibration				
Was it done every 12 hours after Initial Calibration to verify it?	x			The opening and closing CCVs per batch 761314 had analytes naphthalene and 1,2,4-trichlorobenzene(sim) failed %D which led to qualification within associated samples as non-detect estimate "UJ" values. See attachment.
Were Drift % and (RRF) within acceptable criteria?		x		

Criteria	Y	N	NA	Comment
E. Laboratory Blanks/ Air Canister Certification Results				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 20 samples?	x			
Were contamination found, if so qualification may be necessary?		x		
Were method detection limits defined?	x			
Were Air Canister Certification Results present?	x			
Were contaminants detected, if so qualification may be necessary?		x		
F. Laboratory control sample				
Was LCS analysis for this SDG?	x			Within LCS sample CS20740, ethyl acetate had recovery above laboratory limit led to qualification in samples CS21164 and CS21166 as estimate "J" values. Within LCS sample CS20743, ethanol had recovery above laboratory limit led to qualification in all associated sample. See attachment.
Was LCS analysis per analysis batch?	x			
Was LCS (%R) within QC Limits?		x		
G. Internal Standards				
Were Surrogates percent recovery (%R) within QC limits?	x			
Were retention times of analytes less than 20 sec difference between samples?	x			
H. Compound Quantitation				
Were correct internal standards, quantitation ions and RRF used in quantitate compounds?	x			
Were compound quantitates and RLs adjusted to reflect sample dilutions and dry weights to continuous calibration?	x			

Criteria	Y	N	NA	Comment
I. Target Compound Identification				
Did the spectrum meet EPA "Functional Guidelines"?	x			
Were chromatograms peaks verified and accounted?	x			
J. Laboratory/Field Duplicate				
Were field duplicates identified in this SDG?		x		Laboratory duplicates were run within each batch, CS21908 and CS22739 were all within parameters of laboratory comparison. Duplicate pair SS-18 and DUP-5 samples results are within acceptable quantities. No further qualification is needed. Duplicate pair SS-4 and DUP-2 samples results are not within acceptable quantities. As note previously samples had no vacuumed when arriving to laboratory leading to questionable results. As such detected target with RPD greater than 50% than be qualified as estimate "J" values. Duplicate pair SS-19 and DUP-4 samples results are within acceptable quantities except for ethanol which requires estimates "J" value.
Were target compounds detected in it?			x	
K. Overall Assessment of Data				
Was Overall assessment of data found to be acceptable?	x			

Comments: Qualification due to failure in criteria within continuous calibration and laboratory control sample. Qualification also occurred due to RPD of laboratory duplicates being greater than 50%. All results were within Cat. B criterion and usable.

RSD	5.48		

Blind Duplicate

	Original Sample	Blind Duplicate	Relative Percent Difference
Compounds	SS-18	DUP-5	
Toluene	7.16	5.27	30.41
Tetrahydrofuran	15.2	14.9	1.99
Tetrachloroethene	2.54	2.44	4.02
m,p-Xylene	7.64	5.99	24.21
Ethanol	166	150	10.13
Isopropylalcohol	143	135	5.76
Acetone	64.8	62.4	3.77
Methyl Ethyl Ketone	8.78	8.11	7.93
1,2,4-Trimethylbenzene	8.3	5.9	33.80

Reviewer comment: Comparing duplicate pair SS-18 and DUP-5 samples results are within acceptable quantities. No further qualification is needed.

	Original Sample	Blind Duplicate	Relative Percent Difference
Compounds	SS-4	DUP-2	
Toluene	9.04	-	na
Tetrachloroethene	300	117	87.77
m,p-Xylene	8.42	-	na
Isooctane	6.48	-	na
Ethanol	89.4	103	14.14
Isopropylalcohol	77.9	25.5	101.35
Acetone	38	24.2	44.37
Trichlorofluoromethane	60.6	21.2	96.33
Trichloroethene	14.7	5.34	93.41

Reviewer comment: Comparing duplicate pair SS-4 and DUP-2 samples results are not within acceptable quantities. As note previously samples had no vacuumed when arriving to laboratory leading to questionable results. As such detected target with RPD greater than 50% than be qualified as

	Original Sample	Blind Duplicate	Relative Percent Difference
Compounds	SS-19	DUP-4	
Toluene	-	5.16	na
Tetrahydrofuran	12.2	12.3	0.82
Tetrachloroethene	2.41	2.27	5.98
m,p-Xylene	6.16	5.9	4.31
Ethanol	41.6	131	103.59
Isopropylalcohol	44	43	2.30
Acetone	61.5	62	0.81
Dichlorodifluoromethane	7.36	6.97	5.44
Methyl Ethyl Ketone	6.22	6.54	5.02
1,2,4-Trimethylbenzene	5.9	5.75	2.58

Reviewer comment: Comparing duplicate pair SS-19 and DUP-4 samples results are within acceptable quantities except for ethanol which requires estimates "J" value.

FORM I AIR

r=Result Reported U=Not Detected D=Reported Dilution E/J=Estimated Value X=Not Used S=Lab Solvent

Reviewer Comment: Due to opening and closing CCVs per batch CS22739 having analytes Acetone, Naphthalene, Hexachlorobutadiene and 1,2,4-Trichlorobenzene(sim) failed %D which led to qualification within associated samples as estimate or non-detect estimate "J/UJ" values. Ethanol is qualified as estimate "J" value due to recovery below limits within laboratory control sample CS21908.

Reviewer Comment: Due to opening and closing CCVs per batch CS21908 having analytes Naphthalene and 1,2,4-Trichlorobenzene(sim) failed %D which led to qualification within associated samples as non-detect estimate "UJ" values. 1,4-Dioxane is qualified as non-detect estimate "UJ" due to recovery below limits within laboratory control sample CS21908.

Samples were analyzed under:

- USEPA Region 2 *Analysis of Volatile Organic Compounds in Air Contained in Canisters by Method TO-15*, SOP HW-31, Revised 6 (September 2016)
- USEPA Contract Laboratory Program National Functional Guidelines for Organic Superfund Methods Data Review, EPA 540-R-20-005 (November 2020)

Criteria for Data Usability Summary Report

Completeness:

A complete data package is one that has all relevant and related material packaged for distribution to its client in accordance with the Analytical Service Protocol (ASP) Category B Deliverables guidelines.

Compliant:

A compliant data package is one that is determined to have all work that pertains to the production of the laboratory data in a manner that is consistent with the Quality Assurance Program Plan.

Overall Usability Issues

Data validation was completed in accordance with the New York State Department of Environmental Conservation Analytical Service Protocol (NYSDEC ASP) Category B Data Deliverable requirements and reviewer's professional judgment.

This analytical report complies with the following points:

1. Holding Time and Analysis Time
2. Sample Analysis and Quality Control.

- There was no rejection of data.

In conclusion, the data reviewed in this report is usable and valid as it passes all stated criteria for compliance with method TO-15.

Data Completeness

- A complete Category B data package under the NYSDEC ASP has been reported.

Note- Result were presented as in laboratory report Form1 as ppbv while shown in EDD as ug/m3. Both results are accurate and acceptable. Also note, while there are both target and SIM analytes, only one is noted in EDD, thus only one is qualified within document.

Data Validation Acronyms

AA	Atomic Absorption, Flame Technique
BHC	Hexachlorocyclohexane
BFB	Bromofluorobenzene (Tune check analyte)
CCC	Continuing Calibration Check
CCV	Continuing Calibration Verification
CRDL	Contract Required Detection Limit
CRQL	Contract Required Quantitation Limit
CVAA	Atomic Absorption, Cold Vapor
DCAA	2,4-Dichlorophenylacetic acid
DCB	Decachlorobiphenyl
DFTPP	Decafluorotriphenyl phosphine (Tune check analyte)
DL	Detection Limit
ECD	Electron Capture Detector
FAA	Atomic Absorption, Furnace Technique
FID	Flame Ionization Detector
FNP	1-Fluoronaphthalene
GC	Gas Chromatography
GC/MS	Gas Chromatography/ Mass Spectrometry
GPC	Gel Permeation Chromatography
ICB	Initial Calibration Blank
ICP	Inductively Coupled Plasma – Atomic Emission Spectrometer
ICV	Initial Calibration Verification
IDL	Instrument Detection Limit
ICAL	Initial Calibration Curve
IS	Internal Standard
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LCS/LCSD	Laboratory Control Sample/ Laboratory Control Sample Duplicate
MB	Method Blank
MS	Matrix Spike
BNAMS11	Method of Standard Additions
MSD	Matrix Spike Duplicate
MS/MSD	Matrix Spike/ Matrix Spike Duplicate
ND	Non-detected or Not Detected
PID	Photo Ionization Detector

Data Validation Acronyms

PCB	Polychlorinated biphenyl
PCDD	Polychlorinated dibenzodioxins
PCDF	Polychlorinated dibenzofurans
PQL	Practical Quantitation Limit
QA	Quality Assurance
QA/QC	Quality Assurance/ Quality Control
QC	Quality Control
RF	Response Factor
RPD	Relative Percent Difference
RL	Reporting Limit
RRF	Relative Response Factor
RT	Retention Time
RRT	Relative Retention Time
SDG	Sample Delivery Group
SMC	System Monitoring Compounds/ Surrogates
SPCC	Sample Performance Check Compound
TCX	Tetrachloro-m-xylene
%D	Percent Drift
%R	Percent Recovery
%RSD	Percent Relative Standard Deviation

Data Validation Qualifiers

U	The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit.
J	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
J+	The result is an estimated quantity, but the result may be biased high.
J-	The result is an estimated quantity, but the result may be biased low.
NJ	The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated numerical value represents its approximate concentration.
UJ	The analyte was analyzed for but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
R	The data is unusable. The sample results are rejected due to serious deficiencies in meeting Quality Control (QC) criteria. The analyte may or may not be present in the sample.

Note:

1. These qualifiers are used for data validation purposes. The data validation qualifiers may differ from the qualifiers that the laboratory assigns to the data. Refer to the laboratory analytical report for the definitions of the laboratory qualifiers.
2. The EDDs are assigned to these data validation qualifiers and refer to the valid value list supplied by the specific agency or informational data system.

Reviewer Summary :

Samples were handled and analyzed properly under EPA's National Functional Guideline for Organic Compounds and SOP NO. HW-31.

- It is noted that several analytes recovery was outside laboratory criteria for certain analytes of the two ICV but did not require any qualification.

- CCV of batches 761941 and 761915 %D results above laboratory limit several analytes are qualified as an estimate or non-detect estimate "J/UJ" value within associated samples. Note, while additional analytes may have failed, not all analytes are present in samples.

- Within LCS sample CS24309, 1,4-dioxane had recovery above laboratory limit led to qualification in samples CS24309-CS24323 as non-detect estimate "UJ" values. Within LCS sample CS24324, ethanol and ethyl acetate had recovery above laboratory limit led to qualification as estimate "J" values in sample CS2324.

- Laboratory duplicates were run within each batch, CS24309 and CS24324 were all within parameters of laboratory comparison.

All data is within category B criterion and usable.

TO-15

Criteria	Y	N	NA	Comment
A. Sample Integrity and Preservation				
Were samples within technical hold time and extraction period?	x			
Were preserved pressure difference between sampling and analysis ≤ 5 psi)	x			
Canister Cleaning results provided?	x			
B. GC/MS Instrument Performance Check				
Were BFB performance results within criteria?	x			
Were all samples analyzed within the 12 hour time period	x			
C. Initial Calibration				
Was a 5 point calibration conducted?	x			It is noted that several analytes recovery was outside laboratory criteria for certain analytes of the two ICV but did not require any qualification.
RSD% within acceptable criterion?	x			
Was curve fit used for evaluation? If yes did the I.C. meet the curve fit acceptability of ≥ 0.990 ?	x			
Was the Initial Calibration Verification (ICV) done after the I.C? Was retention time within bounds?	x			
D. Continuing Calibration				
Was it done every 12 hours after Initial Calibration to verify it?	x			CCV of batches 761941 and 761915 %D results above laboratory limit several analytes are qualified as an estimate or non-detect estimate "J/UJ" value within associated samples. See attachment.
Were Drift % and (RRF) within acceptable criteria?		x		

Criteria	Y	N	NA	Comment
E. Laboratory Blanks/ Air Canister Certification Results				
Was a lab blank associated with each sample of SDG?	x			
Was blank analyzed every 20 samples?	x			
Were contamination found, if so qualification may be necessary?		x		
Were method detection limits defined?	x			
Were Air Canister Certification Results present?	x			
Were contaminants detected, if so qualification may be necessary?		x		
F. Laboratory control sample				
Was LCS analysis for this SDG?	x			Within LCS sample CS24309, 1,4-dioxane had recovery above laboratory limit led to qualification in samples CS24309-CS24323 as non-detect estimate "UJ" values. Within LCS sample CS24324, ethanol and ethyl acetate had recovery above laboratory limit led to qualification as estimate "J" values in sample CS2324. See attachment.
Was LCS analysis per analysis batch?	x			
Was LCS (%R) within QC Limits?		x		
G. Internal Standards				
Were Surrogates percent recovery (%R) within QC limits?	x			
Were retention times of analytes less than 20 sec difference between samples?	x			
H. Compound Quantitation				
Were correct internal standards, quantitation ions and RRF used in quantitate compounds?	x			
Were compound quantitates and RLs adjusted to reflect sample dilutions and dry weights to continuous calibration?	x			

Criteria	Y	N	NA	Comment
I. Target Compound Identification				
Did the spectrum meet EPA "Functional Guidelines"?	x			
Were chromatograms peaks verified and accounted?	x			
J. Laboratory/Field Duplicate				
Were field duplicates identified in this SDG?	x			Laboratory duplicates were run within each batch, CS24309 and CS24324 were all within parameters of laboratory comparison.
Were target compounds detected in it?		x		
K. Overall Assessment of Data				
Was Overall assessment of data found to be acceptable?	x			

Comments: Qualification due to failure in criteria within continuous calibration and laboratory control sample. All results were within Cat. B criterion and usable.

FORM III AIR

Reviewer Comment: 1,4-Dioxane is qualified as non-detect estimate "UJ" value due to recovery above limits within laboratory control sample CS24309. Due to %D results above laboratory limits of several analytes within CCV(batch 761941), analytes are qualified as a non-detect estimate or estimate "UJ/J" value within sample.

Reviewer Comment: 1,4-Dioxane is qualified as non-detect estimate "UJ" value due to recovery above limits within laboratory control sample CS24309. Due to %D results above laboratory limits of several analytes within CCV(batch 761941), analytes are qualified as a non-detect estimate or estimate "UJ/J" value within sample.

Reviewer Comment: 1,4-Dioxane is qualified as non-detect estimate "UJ" value due to recovery above limits within laboratory control sample CS24309. Due to %D results above laboratory limits of several analytes within CCV(batch 761941), analytes are qualified as a non-detect estimate or estimate "UJ/J" value within sample.

Reviewer Comment: 1,4-Dioxane is qualified as non-detect estimate "UJ" value due to recovery above limits within laboratory control sample CS24309. Due to %D results above laboratory limits of several analytes within CCV(batch 761941), analytes are qualified as a non-detect estimate or estimate "UJ/J" value within sample.

Reviewer Comment: 1,4-Dioxane is qualified as non-detect estimate "UJ" value due to recovery above limits within laboratory control sample CS24309. Due to %D results above laboratory limits of several analytes within CCV(batch 761941), analytes are qualified as a non-detect estimate or estimate "UJ/J" value within sample.

Reviewer Comment: 1,4-Dioxane is qualified as non-detect estimate "UJ" value due to recovery above limits within laboratory control sample CS24309. Due to %D results above laboratory limits of several analytes within CCV(batch 761941), analytes are qualified as a non-detect estimate or estimate "UJ/J" value within sample.

**RE: Limited Phase II Site Investigation
Newton Plaza
596 New Loudon Road
Latham, New York 12110**

Dear Mr. Jesmain,

LaBella Associates D.P.C. (LaBella) has prepared this report to document performance of the client requested, sub-surface, investigation work and to assess the laboratory analytical data results from the performance of this investigation at the above referenced commercial property (site). The information contained herein includes a discussion of site investigation activities and presents supporting information such as a site map and laboratory analytical report. All soil and groundwater sampling was performed in accordance with applicable New York State Department of Environmental Conservation (NYSDEC) standards and testing was performed at a National Environmental Laboratory Accreditation Conference (NELAC) laboratory accredited in New York.

On January 5, 2023, LaBella advanced three (3) boings (SB-1 to SB-3) to 20-feet below grade (fbg) using a track-mounted Geoprobe® Systems direct-push machine equipped with 5-foot MacroCore® sampler and disposable polyethylene sleeves. All drill tooling was cleaned with an Alconox solution prior to arrival onsite. Overburden soil samples were retrieved in 5-foot sections for observation, documentation, and soil headspace screening of volatile organic compounds (VOCs) by photo-ionization detector (PID). A fresh air calibration was performed on the PID prior to use and the 10.6eV lamp response curve set to tetrachloroethene (PCE).

Soil encountered during sampler advancement was primarily coarse to fine sand to approximately 18 fbg. A transition to fine sand, silt, and some clay was recorded at approximately 18 fbg to the borehole terminal depth of 20 fbg. One (1) soil sample was obtained from each boring location from the soil/groundwater interface and placed into laboratory supplied glassware. No visual or olfactory impacts were noted at any borehole interval or location. PID headspace screening results recorded no detections above 0.2 parts per million (ppm). At each boring location, a 1-inch polyvinyl chloride (PVC) temporary groundwater monitoring well was installed. Monitoring well construction consisted of 15-feet of well screen with casing to grade. Soil boring locations are depicted on the attached **Figure 1**.

Groundwater monitoring wells were surveyed relative to a common site datum with an assigned elevation of 100.00 feet. The top of casing elevation was used in conjunction with depth to water (DTW) measurements to assist with determination of groundwater flow direction. The average DTW of the three newly installed wells was 5.62 fbg. Data obtained from the DTW measurements and survey indicate an easterly groundwater flow direction which contradicts expectation based upon topography. Subsequent to performance of the survey and groundwater gauging, a single sample was obtained from each monitoring well utilizing a dedicated bailer and laboratory supplied glassware.

The analytical results for samples collected on January 5, 2023, indicate compounds at concentrations below applicable New York State guidance values for soil as published in 6 NYCRR Part 375 and as published in TOGS 1.1.1 for class GA groundwater. Samples below New York State guidance values are:

- SB-1 (soil) recorded methyl ethyl ketone (MEK) at a concentration of 0.043 mg/kg (ppm). The guidance value in soil for Unrestricted Use is 0.12 mg/kg.

Note: At SB-1/MW-1, acetone was recorded in soil and groundwater at concentrations of 0.14 ppm and 4.0 ppb respectively. Albeit above NYS Guidance for soil, acetone is identified by the lab as a possible lab artifact and is therefore not considered a site related compound of concern.

- MW-2 (groundwater) recorded cis-1,2-dichloroethene (cis-DCE) at 3.0 ug/L (ppb). The guidance value in groundwater is 5.0 ug/L.
- SB-3 (soil) recorded cis-DCE at 0.015 mg/kg. The guidance value for Unrestricted Use is 0.25 mg/kg.
- MW-3 (groundwater) recorded tetrachloroethene (PCE) at a concentration of 1.9 ug/L. The guidance value for PCE in groundwater is 5.0 ug/L.

Two compounds were detected in groundwater above guidance values. A copy of the laboratory analytical report is attached.

- MW-3 (groundwater) recorded vinyl chloride and cis-1,2-dichloroethene at 5.7 ug/L (2.0 ug/L guidance value) and 29 ug/L (5.0 guidance value), respectively.

Discussion and Recommendation

The detection of relatively low-level soil and groundwater chemical concentrations are not representative of a recent release. The three chlorinated compounds (PCE, cis-DCE, vinyl chloride) and their reported concentrations are indicative of reductive dehalogenation occurring naturally. We do not recommend any additional soil or groundwater testing or remedial actions at this time because (i) the detections of such low-level concentrations are not reflective of a significant source, (ii) the detection of VOCs reflects active naturally occurring attenuation, and (iii) the area is serviced by a municipal water supply system. Although the PCE reductive “daughter compounds” vinyl chloride and cis-DCE confirm natural attenuation, the concentrations were reported above applicable NYS guidance values and as such, it is LaBella’s recommendation that indoor air sampling be performed within the Sunshine Cleaners tenant space. If this recommendation is acceptable, we will work out the details of the indoor air sampling with the client’s representative.

Respectfully submitted,

LaBella Associates

Todd Rollend
Environmental Scientist

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory. This report is incomplete unless all pages indicated in the pagination at the bottom of the page are included.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you are the client above and have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext.200. The contents of this report cannot be discussed with anyone other than the client listed above without their written consent.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Phyllis Shiller".

BRL=Below Reporting Level L=Biased Low

QA/QC Surrogates: Surrogates are compounds (preceded with a %) added by the lab to determine analysis efficiency. Surrogate results(%) listed in the report are not "detected" compounds.

Comments:

Volatile Comment:

L flag signifies that this sample was not collected in accordance with EPA method 5035. NELAC requires the laboratory to qualify the volatile soil data as biased low.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

S - Laboratory solvent, contamination is possible.

-----------	--------	------------	-------	----------	-----------	----	-----------

RL/PQL=Reporting/Practical Quantitation Level (Equivalent to NELAC LOQ, Limit of Quantitation) ND=Not Detected at RL/PQL
BRL=Below Reporting Level L=Biased Low

QA/QC Surrogates: Surrogates are compounds (preceded with a %) added by the lab to determine analysis efficiency. Surrogate results(%) listed in the report are not "detected" compounds.

Comments:

Volatile Comment:

L flag signifies that this sample was not collected in accordance with EPA method 5035. NELAC requires the laboratory to qualify the volatile soil data as biased low.

All soils, solids and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

If you are the client above and have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext.200. The contents of this report cannot be discussed with anyone other than the client listed above without their written consent.

% Toluene-d8	96	%	110	100	9.5				70 - 130	30

Comment:

A LCS and LCS Duplicate were performed instead of a matrix spike and matrix spike duplicate.

Additional 8260 criteria: 10% of LCS/LCSD compounds can be outside of acceptance criteria as long as recovery is 40-160%, 25-160% for Chloroethane-HL and Trichlorofluoromethane-HL.

l = This parameter is outside laboratory LCS/LCSD specified recovery limits.

m = This parameter is outside laboratory MS/MSD specified recovery limits.

r = This parameter is outside laboratory RPD specified recovery limits.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

RPD - Relative Percent Difference

LCS - Laboratory Control Sample

LCSD - Laboratory Control Sample Duplicate

MS - Matrix Spike

MS Dup - Matrix Spike Duplicate

NC - No Criteria

Intf - Interference

Sample Criteria Exceedances Report
GCN18950 - LABELLA

SampNo	Acode	Phoenix Analyte	Criteria	Result	RL	Criteria	RL Criteria	Analysis Units
--------	-------	-----------------	----------	--------	----	----------	----------------	-------------------

*** No Data to Display ***

Phoenix Laboratories does not assume responsibility for the data contained in this exceedance report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

Analysis Comments

January 12, 2023

SDG I.D.: GCN18950

The following analysis comments are made regarding exceptions to criteria not already noted in the Analysis Report or QA/QC Report:

VOA Narration

CHEM14 01/09/23-1: CN18950, CN18951, CN18952

The following Initial Calibration compounds did not meet RSD% criteria: 1,2-Dibromo-3-chloropropane 24% (20%), Bromoform 21% (20%), Chloroethane 28% (20%)

The following Initial Calibration compounds did not meet maximum RSD% criteria: None.

Up to eight compounds can be outside of ICAL %RSD criteria and up to sixteen compounds can be outside of CCAL %Dev criteria if less than 40%.

CHEM23 01/07/23-1: CN18953, CN18954, CN18955

The following Initial Calibration compounds did not meet RSD% criteria: Chloroethane 25% (20%)

The following Initial Calibration compounds did not meet maximum RSD% criteria: None.

The following Initial Calibration compounds did not meet recommended response factors: Acetone 0.075 (0.1)

The following Initial Calibration compounds did not meet minimum response factors: None.

Up to eight compounds can be outside of ICAL %RSD criteria and up to sixteen compounds can be outside of CCAL %Dev criteria if less than 40%.

NY Temperature Narration

January 12, 2023

SDG I.D.: GCN18950

The samples in this delivery group were received at 1.1°C.
(Note acceptance criteria for relevant matrices is above freezing up to 6°C)

This is an automated sample acknowledgement.

If you were issued a Phoenix Price Quote # for this SDG and it was not listed on the chain, please email client services with the quote number so we can ensure proper invoicing. If no quote was issued, no further action is required.

If you have a PO# that is required for this SDG, and you need it listed on your invoice please email client services so we can be sure to get the PO# listed on the invoice. If no PO# is required, no further action is required.

Samples Will Be Disposed After: 30 Days

GCN18950 Criteria:
None.

Please email client services only if you require criteria different than what is listed.

Delivery group GCN18950 (NEWTON PLAZA) has been logged in for the following samples:
