         Site #V00367  
         Quarterly Summary Report**

Dear Mr. Miller:

Attached for your information are the summary documents from the quarterly OM&M activities conducted at the National Grid former MGP site located in Amsterdam, NY (Front Street). Monthly inspections and routine OM&M have continued in accordance with the Site Management Plan, approved by the NYSDEC on April 7, 2008. OM&M activities in October, November, and December 2025 were completed by Groundwater & Environmental Services, Inc. (GES). Routine site work includes monthly site inspections and quarterly gauging of monitoring wells and river stage (**Attachment A**). Water level data is summarized on **Table 1** in **Attachment B**. The site features are presented on the site plan (**Attachment C**).

In general, the site is in good condition. The site controls, catch basins, storm water outfall, and monitoring wells are intact and continue to serve their intended purpose. No measurable dense non-aqueous phase liquids (DNAPL) were detected during the quarterly monitoring well gauging event (**Attachment B**). After DNAPL was observed and removed NRW-3R in September 2025, the monitoring well was gauged during the October and November inspection events for quantifiable amounts of DNAPL. Only trace amounts of DNAPL were observed on the monitoring probe during these supplemental inspections and during the quarterly gauging event in December 2025; no measurable quantities were present.
