TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 10 samples on 7/26/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:**	*30-Jul-19*
Project:	BASF Rensselaer – Hudson River OU-2		
Lab Order:	190726067		

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:		
	ND : Not Detected at reporting limit	C: CCV below acceptable Limits
	J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
	B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
	X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
	H: Hold time exceeded	Z: Duplication outside acceptable limits
	N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
	N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Mike Gardner:

Adirondack Environmental Services, Inc received 6 samples on 7/29/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:** *31-Jul-19*
Project:	BASF Rensselaer – Hudson River OU-2	
Lab Order:	190729049	

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:

ND : Not Detected at reporting limit	C: CCV below acceptable Limits
J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
H: Hold time exceeded	Z: Duplication outside acceptable limits
N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

Weekly Water Quality Monitoring Summary

Client:	**BASF**
Location:	**Rensselaer, New York**
Period:	**7/30/19 – 8/5/19 (Chemistry)**

On behalf of BASF Corporation (BASF), AECOM has prepared this water monitoring data summary for Hudson River Operable Unit 2 (OU-2) remedial activities at the Former BASF Facility located in Rensselaer, New York (referred to herein as "Site"). This data summary includes both tabular information and written discussions summarizing the ambient water-quality data collected during the indicated reporting period at the Site. The data was collected in accordance with the revised Surface Water Remedial Action Monitoring Plan prepared by AECOM (2019).

Introduction

Surface water monitoring and sampling activities were conducted during the reporting period (5 working days) to evaluate conditions within the river during remedial dredging activities to ensure that the measures used to control off-Site migration of Site related contaminants turbidity are effective, and to document ambient water quality/conditions in the river. A typical buoy layout is included as Figure 1. The monitoring program consists of the following real-time monitoring and integrated sampling:

- In-situ hand-held monitoring for turbidity, as well as observational monitoring sediment plumes conducted periodically, and during sampling activities;
- Daily (Monday through Friday) Total Suspended Solids (TSS) samples collected from each monitoring buoy (from near bottom in the water column, unless the worst case turbidity is observed at another depth, in which case that depth will be sampled). These samples will allow for comparison with the real-time/ field collected turbidity measurements;
- Daily (Monday through Friday) samples collected (one from each monitoring station from near bottom in the water column, unless the worst case turbidity is observed at another depth in which case that depth will be sampled) for laboratory analysis for PCB Aroclors, VOCs, hardness and dissolved/ total metals:
- Daily (Monday through Friday) TSS samples collected from the 600 ft downstream location (based on tidal stage) as a compliance check.

While not summarized in this memo, the following monitoring is also being conducted:

- Continuous real-time monitoring for (every 15 minutes for turbidity conducted at four fixed autonomous water quality buoys positioned up-river, adjacent to, downriver, and up-river off-Site (background) of the active work area (24 hours per day, 7 days per week);

The sampling/ monitoring results are compared to a list of Site-specific guidance values that were presented in Table 3-1 of the Surface Water Remedial Action Monitoring Plan.

Constituent Evaluation

AECOM conducted daily water quality monitoring associated with the Hudson River OU-2 remedial dredging installation over the period 7/30/19 through 8/5/19. In accordance with the July 2019 Surface Water Remedial Action Monitoring Plan, filtered analytical chemistry samples were collected daily for analysis of metals. Whole water samples were collected for VOCs, PCB Aroclors, metals, total suspended solids (TSS), and hardness (4 locations, one depth based on maximum observed in-situ turbidity readings). TSS was collected from one additional location.

A Geotech Geopump™ peristaltic pump was used to collect the water column samples. The initial metals sample were filtered using a 0.45 micron filter. Once collected, the filter was removed and the remainder of the sample

bottles were filled. While the samples was being collected the turbidity reading from the paired YSI EXO2 sonde was recorded in the project logbook. The samples were submitted under chain of custody to the Adirondack laboratory in Albany, NY. Upon receipt, all lab data packages provided by the lab were reviewed by AECOM's chemistry staff for completeness and accuracy.

Detected concentrations of organic and inorganic constituents were compared to a list of Site-specific guidance values that were presented in Table 3-1 of the Surface Water Remedial Action Monitoring Plan (see Table 1). The chemical sampling/ monitoring lab reports are presented in Attachment A. Over the reporting period, there was one low level exceedance of the water quality criteria (PCB Aroclor 1242). This exceedance (0.466 µg/l vs threshold of 0.2 µg/l) was at the downstream (Buoy 3) location. The sample was collected about 20 minutes prior to low tide and they were dredging a Non-TSCA/ low VOC grid cell at the time. The data received for the next day's sample set (8/1/19) samples came back completely non-detect.

Typically, field turbidity readings from the YSI EXO2 sonde were typically observed to be less than 10 NTU, however there were a few high readings (max = 60.5 NTU) over the reporting period. The associated buoy turbidity mirrored the field readings with a few spikes, but relatively low overall (less than 20 NTU). The lab TSS values collected at the same time were never higher than 20 mg/L. Overall, the turbidity readings continued to be in the near-bottom horizon.

Summary

Pursuant to the final Surface Water Remedial Action Monitoring Plan, the chemistry monitoring program for the first month of the remedial dredging operations (VOCs, hardness, PCBs, TSS, and total and dissolved metals) will be continued on a daily basis. Continuous daily turbidity monitoring will continue as described in the Work Plan throughout the duration of the dredging operations.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 8 samples on 7/30/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 8 samples on 7/31/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:**	*02-Aug-19*
Project:	BASF Rensselaer – Hudson River OU-2		
Lab Order:	190731058		

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:		
	ND : Not Detected at reporting limit	C: CCV below acceptable Limits
	J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
	B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
	X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
	H: Hold time exceeded	Z: Duplication outside acceptable limits
	N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
	N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 6 samples on 8/1/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:**	*05-Aug-19*
Project:	BASF Rensselaer – Hudson River OU-2		
Lab Order:	190801076		

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:		
	ND : Not Detected at reporting limit	C: CCV below acceptable Limits
	J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
	B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
	X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
	H: Hold time exceeded	Z: Duplication outside acceptable limits
	N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
	N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 8 samples on 8/2/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:**	*06-Aug-19*
Project:	BASF Rensselaer – Hudson River OU-2		
Lab Order:	190802076		

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:

ND : Not Detected at reporting limit	C: CCV below acceptable Limits
J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
H: Hold time exceeded	Z: Duplication outside acceptable limits
N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 8 samples on 8/5/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:**	*07-Aug-19*
Project:	BASF Rensselaer – Hudson River OU-2		
Lab Order:	190805048		

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:		
	ND : Not Detected at reporting limit	C: CCV below acceptable Limits
	J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
	B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
	X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
	H: Hold time exceeded	Z: Duplication outside acceptable limits
	N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
	N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

Weekly Water Quality Monitoring Summary

Client:	**BASF**
Location:	**Rensselaer, New York**
Period:	**8/6/19 – 8/12/19 (Chemistry)**

On behalf of BASF Corporation (BASF), AECOM has prepared this water monitoring data summary for Hudson River Operable Unit 2 (OU-2) remedial activities at the Former BASF Facility located in Rensselaer, New York (referred to herein as "Site"). This data summary includes both tabular information and written discussions summarizing the ambient water-quality data collected during the indicated reporting period at the Site. The data was collected in accordance with the revised Surface Water Remedial Action Monitoring Plan prepared by AECOM (2019).

Introduction

Surface water monitoring and sampling activities were conducted during the reporting period (5 working days) to evaluate conditions within the river during remedial dredging activities to ensure that the measures used to control off-Site migration of Site related contaminants turbidity are effective, and to document ambient water quality/conditions in the river. A typical buoy layout is included as Figure 1. The monitoring program consists of the following real-time monitoring and integrated sampling:

- In-situ hand-held monitoring for turbidity, as well as observational monitoring sediment plumes conducted periodically, and during sampling activities;
- Daily (Monday through Friday) Total Suspended Solids (TSS) samples collected from each monitoring buoy (from near bottom in the water column, unless the worst case turbidity is observed at another depth, in which case that depth will be sampled). These samples will allow for comparison with the real-time/ field collected turbidity measurements;
- Daily (Monday through Friday) samples collected (one from each monitoring station from near bottom in the water column, unless the worst case turbidity is observed at another depth in which case that depth will be sampled) for laboratory analysis for PCB Aroclors, VOCs, hardness and dissolved/ total metals:
- Daily (Monday through Friday) TSS samples collected from the 600 ft downstream location (based on tidal stage) as a compliance check.

While not summarized in this memo, the following monitoring is also being conducted:

- Continuous real-time monitoring for (every 15 minutes for turbidity conducted at four fixed autonomous water quality buoys positioned up-river, adjacent to, downriver, and up-river off-Site (background) of the active work area (24 hours per day, 7 days per week);

The sampling/ monitoring results are compared to a list of Site-specific guidance values that were presented in Table 3-1 of the Surface Water Remedial Action Monitoring Plan.

Constituent Evaluation

AECOM conducted daily water quality monitoring associated with the Hudson River OU-2 remedial dredging installation over the period 8/6/19 through 8/12/19. In accordance with the July 2019 Surface Water Remedial Action Monitoring Plan, filtered analytical chemistry samples were collected daily for analysis of metals. Whole water samples were collected for VOCs, PCB Aroclors, metals, total suspended solids (TSS), and hardness (4 locations, one depth based on maximum observed in-situ turbidity readings). TSS was collected from one additional location.

A Geotech Geopump™ peristaltic pump was used to collect the water column samples. The initial metals sample were filtered using a 0.45 micron filter. Once collected, the filter was removed and the remainder of the sample

bottles were filled. While the samples was being collected the turbidity reading from the paired YSI EXO2 sonde was recorded in the project logbook. The samples were submitted under chain of custody to the Adirondack laboratory in Albany, NY. Upon receipt, all lab data packages provided by the lab were reviewed by AECOM's chemistry staff for completeness and accuracy.

Detected concentrations of organic and inorganic constituents were compared to a list of Site-specific guidance values that were presented in Table 3-1 of the Surface Water Remedial Action Monitoring Plan (see Table 1). The chemical sampling/ monitoring lab reports are presented in Attachment A. Over the reporting period, there were not any exceedances of the water quality criteria.

Typically, field turbidity readings from the YSI EXO2 sonde were typically observed to be less than 10 NTU, however there were a few high readings (max = 51.85 NTU) over the reporting period. The associated buoy turbidity mirrored the field readings with a few spikes, but relatively low overall (less than 20 NTU). The lab TSS values collected at the same time were never higher than 16 mg/L. Overall, the turbidity readings continued to be in the near-bottom horizon.

Summary

Pursuant to the final Surface Water Remedial Action Monitoring Plan, the chemistry monitoring program for the first month of the remedial dredging operations (VOCs, hardness, PCBs, TSS, and total and dissolved metals) will be continued on a daily basis (completed on 8/13/19). After the data from the first month's samples is received, AECOM will prepare a summary memorandum detailing the Turbidity/ TSS relationship and submit it to the NYSDEC for review/ approval. AECOM will Continuous daily turbidity monitoring will continue as described in the Work Plan throughout the duration of the dredging operations while the summary memorandum is prepared.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 6 samples on 8/6/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:**	*08-Aug-19*
Project:	BASF Rensselaer – Hudson River OU-2		
Lab Order:	190806066		

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:		
	ND : Not Detected at reporting limit	C: CCV below acceptable Limits
	J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
	B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
	X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
	H: Hold time exceeded	Z: Duplication outside acceptable limits
	N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
	N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 8 samples on 8/7/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:**	*09-Aug-19*
Project:	BASF Rensselaer – Hudson River OU-2		
Lab Order:	190807084		

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:

ND : Not Detected at reporting limit	C: CCV below acceptable Limits
J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
H: Hold time exceeded	Z: Duplication outside acceptable limits
N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 8 samples on 8/8/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:** *12-Aug-19*
Project:	BASF Rensselaer – Hudson River OU-2	
Lab Order:	190808092	

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:

- ND : Not Detected at reporting limit
- J: Analyte detected below quantitation limit
- B: Analyte detected in Blank
- X : Exceeds maximum contamination limit
- H: Hold time exceeded
- N: Matrix Spike below acceptable limits
- N+: Matrix Spike is above acceptable limits
- C: CCV below acceptable Limits
- C+: CCV above acceptable Limits
- S: LCS Spike recovery is below acceptable limits
- S+: LCS Spike recovery is above acceptable limits
- Z: Duplication outside acceptable limits
- T : Tentatively Identified Compound-Estimated
- E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 7 samples on 8/9/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

CC:
MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:** *13-Aug-19*
Project:	BASF Rensselaer – Hudson River OU-2	
Lab Order:	190809101	

Sample containers were supplied by Adirondack Environmental Services.

Analytical Comments for EPA Method 8260: Sample 080919-TB01 vial broke in autosampler and is not reported.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:	ND : Not Detected at reporting limit	C: CCV below acceptable Limits
	J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
	B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
	X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
	H: Hold time exceeded	Z: Duplication outside acceptable limits
	N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
	N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 8 samples on 8/12/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:**	*14-Aug-19*
Project:	BASF Rensselaer – Hudson River OU-2		
Lab Order:	190812066		

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:

ND : Not Detected at reporting limit	C: CCV below acceptable Limits
J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
H: Hold time exceeded	Z: Duplication outside acceptable limits
N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

Weekly Water Quality Monitoring Summary

Client:	**BASF**
Location:	**Rensselaer, New York**
Period:	**8/13/19 – 8/19/19 (Chemistry)**

On behalf of BASF Corporation (BASF), AECOM has prepared this water monitoring data summary for Hudson River Operable Unit 2 (OU-2) remedial activities at the Former BASF Facility located in Rensselaer, New York (referred to herein as "Site"). This data summary includes both tabular information and written discussions summarizing the ambient water-quality data collected during the indicated reporting period at the Site. The data was collected in accordance with the revised Surface Water Remedial Action Monitoring Plan prepared by AECOM (2019).

Introduction

Surface water monitoring and sampling activities were conducted during the reporting period (5 working days) to evaluate conditions within the river during remedial dredging activities to ensure that the measures used to control off-Site migration of Site related contaminants turbidity are effective, and to document ambient water quality/conditions in the river. A typical buoy layout is included as Figure 1. The monitoring program consists of the following real-time monitoring and integrated sampling:

- In-situ hand-held monitoring for turbidity, as well as observational monitoring sediment plumes conducted periodically, and during sampling activities;
- Daily (Monday through Friday) Total Suspended Solids (TSS) samples collected from each monitoring buoy (from near bottom in the water column, unless the worst case turbidity is observed at another depth, in which case that depth will be sampled). These samples will allow for comparison with the real-time/ field collected turbidity measurements;
- Daily (Monday through Friday) samples collected (one from each monitoring station from near bottom in the water column, unless the worst case turbidity is observed at another depth in which case that depth will be sampled) for laboratory analysis for PCB Aroclors, VOCs, hardness and dissolved/ total metals:
- Daily (Monday through Friday) TSS samples collected from the 600 ft downstream location (based on tidal stage) as a compliance check.

While not summarized in this memo, the following monitoring is also being conducted:

- Continuous real-time monitoring for (every 15 minutes for turbidity conducted at four fixed autonomous water quality buoys positioned up-river, adjacent to, downriver, and up-river off-Site (background) of the active work area (24 hours per day, 7 days per week);

The sampling/ monitoring results are compared to a list of Site-specific guidance values that were presented in Table 3-1 of the Surface Water Remedial Action Monitoring Plan.

Constituent Evaluation

AECOM conducted daily water quality monitoring associated with the Hudson River OU-2 remedial dredging installation over the period 8/13/19 through 8/19/19. In accordance with the July 2019 Surface Water Remedial Action Monitoring Plan, filtered analytical chemistry samples were collected daily for analysis of metals. Whole water samples were collected for VOCs, PCB Aroclors, metals, total suspended solids (TSS), and hardness (4 locations, one depth based on maximum observed in-situ turbidity readings). TSS was collected from one additional location.

A Geotech Geopump™ peristaltic pump was used to collect the water column samples. The initial metals sample were filtered using a 0.45 micron filter. Once collected, the filter was removed and the remainder of the sample

bottles were filled. While the samples was being collected the turbidity reading from the paired YSI EXO2 sonde was recorded in the project logbook. The samples were submitted under chain of custody to the Adirondack laboratory in Albany, NY. Upon receipt, all lab data packages provided by the lab were reviewed by AECOM's chemistry staff for completeness and accuracy.

Detected concentrations of organic and inorganic constituents were compared to a list of Site-specific guidance values that were presented in Table 3-1 of the Surface Water Remedial Action Monitoring Plan (see Table 1). The chemical sampling/ monitoring lab reports are presented in Attachment A. Over the reporting period, there was one low level exceedance of the water quality criteria (PCB Aroclor 1242). This exceedance (0.439 µg/l vs threshold of 0.2 µg/l) was at the up-current background (Buoy 4) location. The sample was collected about one hour and 15 minutes after low tide and they were dredging a Non-TSCA grid cell at the time. The data received for the next day's sample set (8/16/19) samples came back without any exceedances.

Typically, field turbidity readings from the YSI EXO2 sonde were typically observed to be less than 10 NTU, however there were a four readings between 18 and 22 NTU over the reporting period. The associated buoy turbidity mirrored the field readings with a few spikes, but relatively low overall (typically less than 10 NTU, with isolated observations to 20-30 NTU). The lab TSS values collected at the same time were never higher than 11 mg/L. Overall, the turbidity readings continued to be in the near-bottom horizon.

Summary

Pursuant to the final Surface Water Remedial Action Monitoring Plan, the chemistry monitoring program for the first month of the remedial dredging operations (VOCs, hardness, PCBs, TSS, and total and dissolved metals) will be continued on a daily basis (first month completed on 8/13/19). The data from the first month's samples are currently being evaluated and AECOM is preparing a summary memorandum detailing the Turbidity/ TSS relationship and will submit to the NYSDEC for review/ approval. AECOM will continue daily turbidity monitoring as described in the Work Plan throughout the duration of the dredging operations while the summary memorandum is prepared.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 8 samples on 8/13/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:** *15-Aug-19*
Project:	BASF Rensselaer – Hudson River OU-2	
Lab Order:	190813071	

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:

ND : Not Detected at reporting limit	C: CCV below acceptable Limits
J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
H: Hold time exceeded	Z: Duplication outside acceptable limits
N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 6 samples on 8/14/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:** *16-Aug-19*
Project:	BASF Rensselaer – Hudson River OU-2	
Lab Order:	190814072	

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:

- ND : Not Detected at reporting limit
- J: Analyte detected below quantitation limit
- B: Analyte detected in Blank
- X : Exceeds maximum contamination limit
- H: Hold time exceeded
- N: Matrix Spike below acceptable limits
- N+: Matrix Spike is above acceptable limits
- C: CCV below acceptable Limits
- C+: CCV above acceptable Limits
- S: LCS Spike recovery is below acceptable limits
- S+: LCS Spike recovery is above acceptable limits
- Z: Duplication outside acceptable limits
- T : Tentatively Identified Compound-Estimated
- E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 9 samples on 8/15/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:**	*19-Aug-19*
Project:	BASF Rensselaer – Hudson River OU-2		
Lab Order:	190815066		

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:

ND : Not Detected at reporting limit	C: CCV below acceptable Limits
J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
H: Hold time exceeded	Z: Duplication outside acceptable limits
N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 7 samples on 8/16/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:** *20-Aug-19*
Project:	BASF Rensselaer – Hudson River OU-2	
Lab Order:	190816088	

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:

ND : Not Detected at reporting limit	C: CCV below acceptable Limits
J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
H: Hold time exceeded	Z: Duplication outside acceptable limits
N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 6 samples on 8/19/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:**	*21-Aug-19*
Project:	BASF Rensselaer – Hudson River OU-2		
Lab Order:	190819059		

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:		
	ND : Not Detected at reporting limit	C: CCV below acceptable Limits
	J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
	B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
	X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
	H: Hold time exceeded	Z: Duplication outside acceptable limits
	N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
	N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

Weekly Water Quality Monitoring Summary

Client:	**BASF**
Location:	**Rensselaer, New York**
Period:	**8/20/19 – 8/26/19 (Chemistry)**

On behalf of BASF Corporation (BASF), AECOM has prepared this water monitoring data summary for Hudson River Operable Unit 2 (OU-2) remedial activities at the Former BASF Facility located in Rensselaer, New York (referred to herein as "Site"). This data summary includes both tabular information and written discussions summarizing the ambient water-quality data collected during the indicated reporting period at the Site. The data was collected in accordance with the revised Surface Water Remedial Action Monitoring Plan prepared by AECOM (2019).

Introduction

Surface water monitoring and sampling activities were conducted during the reporting period (5 working days) to evaluate conditions within the river during remedial dredging activities to ensure that the measures used to control off-Site migration of Site related contaminants turbidity are effective, and to document ambient water quality/conditions in the river. A typical buoy layout is included as Figure 1. The monitoring program consists of the following real-time monitoring and integrated sampling:

- In-situ hand-held monitoring for turbidity, as well as observational monitoring sediment plumes conducted periodically, and during sampling activities;
- Daily (Monday through Friday) Total Suspended Solids (TSS) samples collected from each monitoring buoy (from near bottom in the water column, unless the worst case turbidity is observed at another depth, in which case that depth will be sampled). These samples will allow for comparison with the real-time/ field collected turbidity measurements;
- Daily (Monday through Friday) samples collected (one from each monitoring station from near bottom in the water column, unless the worst case turbidity is observed at another depth in which case that depth will be sampled) for laboratory analysis for PCB Aroclors, VOCs, hardness and dissolved/ total metals:
- Daily (Monday through Friday) TSS samples collected from the 600 ft downstream location (based on tidal stage) as a compliance check.

While not summarized in this memo, the following monitoring is also being conducted:

- Continuous real-time monitoring for (every 15 minutes for turbidity conducted at four fixed autonomous water quality buoys positioned up-river, adjacent to, downriver, and up-river off-Site (background) of the active work area (24 hours per day, 7 days per week);

The sampling/ monitoring results are compared to a list of Site-specific guidance values that were presented in Table 3-1 of the Surface Water Remedial Action Monitoring Plan.

Constituent Evaluation

AECOM conducted daily water quality monitoring associated with the Hudson River OU-2 remedial dredging installation over the period 8/20/19 through 8/26/19. In accordance with the July 2019 Surface Water Remedial Action Monitoring Plan, filtered analytical chemistry samples were collected daily for analysis of metals. Whole water samples were collected for VOCs, PCB Aroclors, metals, total suspended solids (TSS), and hardness (4 locations, one depth based on maximum observed in-situ turbidity readings). TSS was collected from one additional location.

A Geotech Geopump™ peristaltic pump was used to collect the water column samples. The initial metals sample were filtered using a 0.45 micron filter. Once collected, the filter was removed and the remainder of the sample

bottles were filled. While the samples was being collected the turbidity reading from the paired YSI EXO2 sonde was recorded in the project logbook. The samples were submitted under chain of custody to the Adirondack laboratory in Albany, NY. Upon receipt, all lab data packages provided by the lab were reviewed by AECOM's chemistry staff for completeness and accuracy.

Detected concentrations of organic and inorganic constituents were compared to a list of Site-specific guidance values that were presented in Table 3-1 of the Surface Water Remedial Action Monitoring Plan (see Table 1). The chemical sampling/ monitoring lab reports are presented in Attachment A. Over the reporting period, there was one low level exceedance of the water quality criteria (PCB Aroclor 1242). This exceedance (0.253 µg/l vs threshold of 0.2 µg/l) was at the down-current (Buoy 3) location. The sample was collected about one hour and 30 minutes after high tide and they were dredging a Non-TSCA grid cell at the time. The data received for the next day's sample set (8/26/19) samples came back without any exceedances. Additionally, on August 27, AECOM reported that there was elevated mercury concentrations in four of the samples from August 22 associated with the storm event/ high flows. Upon review of the data, these elevated detections were not in excess of the mercury guidance value (0.05 µg/L)

Typically, field turbidity readings from the YSI EXO2 sonde were typically observed to be less than 10 NTU, however there were a seven readings between 28 and 37 NTU over the reporting period. Additionally, all readings on august 22 were extremely elevated due to the storm event (not associated with Site Activities). The associated buoy turbidity mirrored the field readings with a few spikes, but relatively low overall (typically less than 10 NTU, with isolated observations to 20-40 NTU). Overall, the turbidity readings continued to be in the near-bottom horizon. TSS values on August 22 were between 204 and 295 mg/L due to the storm event. The samples collected the following day (August 23) still had TSS values that were still higher than normal (between 32 and 40 mg/L), as the river was settling back to normal conditions. Otherwise, the lab TSS values were never higher than 14.8 mg/L.

Summary

Pursuant to the final Surface Water Remedial Action Monitoring Plan, the chemistry monitoring program for the first month of the remedial dredging operations (VOCs, hardness, PCBs, TSS, and total and dissolved metals) will be continued on a daily basis (first month completed on 8/13/19). BASF has submitted a request to reduce the sampling program to the NYSDEC. The data from the first month's samples are currently being evaluated and AECOM is preparing a summary memorandum detailing the Turbidity/ TSS relationship and will submit to the NYSDEC for review/ approval. AECOM will continue daily turbidity monitoring as described in the Work Plan throughout the duration of the dredging operations until NYSDEC advises that the program can be scaled back.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 8 samples on 8/20/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

ND : Not Detected at reporting limit	C: CCV below acceptable Limits
J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
H: Hold time exceeded	Z: Duplication outside acceptable limits
N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 6 samples on 8/21/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:** *23-Aug-19*
Project:	BASF Rensselaer – Hudson River OU-2	
Lab Order:	190821069	

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:

ND : Not Detected at reporting limit	C: CCV below acceptable Limits
J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
H: Hold time exceeded	Z: Duplication outside acceptable limits
N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 8 samples on 8/22/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:**	*26-Aug-19*
Project:	BASF Rensselaer – Hudson River OU-2		
Lab Order:	190822104		

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:		
	ND : Not Detected at reporting limit	C: CCV below acceptable Limits
	J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
	B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
	X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
	H: Hold time exceeded	Z: Duplication outside acceptable limits
	N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
	N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 8 samples on 8/23/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Tara Daniels
Laboratory Director

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:**	*27-Aug-19*
Project:	BASF Rensselaer – Hudson River OU-2		
Lab Order:	190823069		

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:

ND : Not Detected at reporting limit	C: CCV below acceptable Limits
J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
H: Hold time exceeded	Z: Duplication outside acceptable limits
N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 6 samples on 8/26/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Tara Daniels
Laboratory Director

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:**	*28-Aug-19*
Project:	BASF Rensselaer – Hudson River OU-2		
Lab Order:	190826046		

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:		
	ND : Not Detected at reporting limit	C: CCV below acceptable Limits
	J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
	B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
	X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
	H: Hold time exceeded	Z: Duplication outside acceptable limits
	N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
	N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

Weekly Water Quality Monitoring Summary

Client:	**BASF**
Location:	**Rensselaer, New York**
Period:	**8/27/19 – 9/2/19 (Chemistry)**

On behalf of BASF Corporation (BASF), AECOM has prepared this water monitoring data summary for Hudson River Operable Unit 2 (OU-2) remedial activities at the Former BASF Facility located in Rensselaer, New York (referred to herein as "Site"). This data summary includes both tabular information and written discussions summarizing the ambient water-quality data collected during the indicated reporting period at the Site. The data was collected in accordance with the revised Surface Water Remedial Action Monitoring Plan prepared by AECOM (2019).

Introduction

Surface water monitoring and sampling activities were conducted during the reporting period (4 working days) to evaluate conditions within the river during remedial dredging activities to ensure that the measures used to control off-Site migration of Site related contaminants turbidity are effective, and to document ambient water quality/conditions in the river. A typical buoy layout is included as Figure 1. The monitoring program consists of the following real-time monitoring and integrated sampling:

- In-situ hand-held monitoring for turbidity, as well as observational monitoring sediment plumes conducted periodically, and during sampling activities;
- Daily (Monday through Friday) Total Suspended Solids (TSS) samples collected from each monitoring buoy (from near bottom in the water column, unless the worst case turbidity is observed at another depth, in which case that depth will be sampled). These samples will allow for comparison with the real-time/ field collected turbidity measurements;
- Daily (Monday through Friday) samples collected (one from each monitoring station from near bottom in the water column, unless the worst case turbidity is observed at another depth in which case that depth will be sampled) for laboratory analysis for PCB Aroclors, VOCs, hardness and dissolved/ total metals:
- Daily (Monday through Friday) TSS samples collected from the 600 ft downstream location (based on tidal stage) as a compliance check.

While not summarized in this memo, the following monitoring is also being conducted:

- Continuous real-time monitoring for (every 15 minutes for turbidity conducted at four fixed autonomous water quality buoys positioned up-river, adjacent to, downriver, and up-river off-Site (background) of the active work area (24 hours per day, 7 days per week);

The sampling/ monitoring results are compared to a list of Site-specific guidance values that were presented in Table 3-1 of the Surface Water Remedial Action Monitoring Plan.

Constituent Evaluation

AECOM conducted daily water quality monitoring associated with the Hudson River OU-2 remedial dredging installation over the period 8/27/19 through 9/2/19. In accordance with the July 2019 Surface Water Remedial Action Monitoring Plan, filtered analytical chemistry samples were collected daily for analysis of metals. Whole water samples were collected for VOCs, PCB Aroclors, metals, total suspended solids (TSS), and hardness (4 locations, one depth based on maximum observed in-situ turbidity readings). TSS was collected from one additional location.

A Geotech Geopump™ peristaltic pump was used to collect the water column samples. The initial metals sample were filtered using a 0.45 micron filter. Once collected, the filter was removed and the remainder of the sample

bottles were filled. While the samples was being collected the turbidity reading from the paired YSI EXO2 sonde was recorded in the project logbook. The samples were submitted under chain of custody to the Adirondack laboratory in Albany, NY. Upon receipt, all lab data packages provided by the lab were reviewed by AECOM's chemistry staff for completeness and accuracy.

Detected concentrations of organic and inorganic constituents were compared to a list of Site-specific guidance values that were presented in Table 3-1 of the Surface Water Remedial Action Monitoring Plan (see Table 1). The chemical sampling/ monitoring lab reports are presented in Attachment A. Over the reporting period, there was one low level exceedance of the water quality criteria (PCB Aroclor 1242). This exceedance (0.235 µg/l vs threshold of 0.2 µg/l) was at the background (Buoy 4) location. The sample was collected approximately 3.0 hours prior to high tide and they were dredging a Non-TSCA grid cell at the time. The data received for the next day's sample set (8/29/19) samples came back without any exceedances.

Typically, field turbidity readings from the YSI EXO2 sonde were typically observed to be less than 11 NTU. The associated buoy turbidity mirrored the field readings with a few spikes, but relatively low overall (typically less than 10 NTU, with isolated observations to 15-20 NTU). Overall, the turbidity readings continued to be in the near-bottom horizon. Lab TSS values during the reporting period were typically in the low teens and never higher than 17.0 mg/L.

Summary

Pursuant to the final Surface Water Remedial Action Monitoring Plan, and a 9/4/19 call with Drew Hoffert (NYSDEC) the chemistry monitoring program during remedial dredging operations will be continued on a daily basis for VOCs/ TSS and three times per week for PCBs. The data from the first month's samples are currently being evaluated and AECOM is preparing a summary memorandum detailing the Turbidity/ TSS relationship and will submit to the NYSDEC for review/ approval. AECOM will continue daily turbidity monitoring as described in the Work Plan throughout the duration of the dredging operations until NYSDEC advises that the program can be scaled back.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 8 samples on 8/27/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:**	*29-Aug-19*
Project:	BASF Rensselaer – Hudson River OU-2		
Lab Order:	190827054		

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:

ND : Not Detected at reporting limit	C: CCV below acceptable Limits
J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
H: Hold time exceeded	Z: Duplication outside acceptable limits
N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

Experience is the solution

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 8 samples on 8/28/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:** *03-Sep-19*
Project:	BASF Rensselaer – Hudson River OU-2	
Lab Order:	190828068	

Sample containers were supplied by Adirondack Environmental Services.

This is an updated report to correct the matrix spike for Volatile Organics and the corresponding flags for the data.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:	ND : Not Detected at reporting limit	C: CCV below acceptable Limits
	J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
	B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
	X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
	H: Hold time exceeded	Z: Duplication outside acceptable limits
	N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
	N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 6 samples on 8/29/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:**	*03-Sep-19*
Project:	BASF Rensselaer – Hudson River OU-2		
Lab Order:	190829068		

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:

ND : Not Detected at reporting limit	C: CCV below acceptable Limits
J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
H: Hold time exceeded	Z: Duplication outside acceptable limits
N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 8 samples on 8/30/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:**	*03-Sep-19*
Project:	BASF Rensselaer – Hudson River OU-2		
Lab Order:	190830047		

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:

ND : Not Detected at reporting limit	C: CCV below acceptable Limits
J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
H: Hold time exceeded	Z: Duplication outside acceptable limits
N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

Weekly Water Quality Monitoring Summary

Client:	**BASF**
Location:	**Rensselaer, New York**
Period:	**9/3/19 – 9/9/19 (Chemistry)**

On behalf of BASF Corporation (BASF), AECOM has prepared this water monitoring data summary for Hudson River Operable Unit 2 (OU-2) remedial activities at the Former BASF Facility located in Rensselaer, New York (referred to herein as "Site"). This data summary includes both tabular information and written discussions summarizing the ambient water-quality data collected during the indicated reporting period at the Site. The data was collected in accordance with the revised Surface Water Remedial Action Monitoring Plan prepared by AECOM (2019).

Introduction

Surface water monitoring and sampling activities were conducted during the reporting period (5 working days) to evaluate conditions within the river during remedial dredging activities to ensure that the measures used to control off-Site migration of Site related contaminants turbidity are effective, and to document ambient water quality/conditions in the river. River water samples were not collected on 9/6/19. A typical buoy layout is included as Figure 1. The monitoring program consists of the following real-time monitoring and integrated sampling:

- In-situ hand-held monitoring for turbidity, as well as observational monitoring sediment plumes conducted periodically, and during sampling activities;
- Daily (Monday through Friday) Total Suspended Solids (TSS) samples collected from each monitoring buoy (from near bottom in the water column, unless the worst case turbidity is observed at another depth, in which case that depth will be sampled). These samples will allow for comparison with the real-time/ field collected turbidity measurements;
- Daily (Monday through Friday) samples collected (one from each monitoring station from near bottom in the water column, unless the worst case turbidity is observed at another depth in which case that depth will be sampled) for laboratory analysis for PCB Aroclors, VOCs, hardness and dissolved/ total metals (metals will no longer be collected per NYSDEC 9/4/19);
- Three times per week samples collected (one from each monitoring station from near bottom in the water column, unless the worst case turbidity is observed at another depth in which case that depth will be sampled) for laboratory analysis for PCB Aroclors;
- Daily (Monday through Friday) TSS samples collected from the 600 ft downstream location (based on tidal stage) as a compliance check.

While not summarized in this memo, the following monitoring is also being conducted:

- Continuous real-time monitoring for (every 15 minutes for turbidity conducted at four fixed autonomous water quality buoys positioned up-river, adjacent to, downriver, and up-river off-Site (background) of the active work area (24 hours per day, 7 days per week);

The sampling/ monitoring results are compared to a list of Site-specific guidance values that were presented in Table 3-1 of the Surface Water Remedial Action Monitoring Plan.

Constituent Evaluation

AECOM conducted daily water quality monitoring associated with the Hudson River OU-2 remedial dredging installation over the period 9/3/19 through 9/9/19. In accordance with the July 2019 Surface Water Remedial Action Monitoring Plan, filtered analytical chemistry samples were collected daily for analysis of metals. Whole water samples were collected for VOCs, PCB Aroclors, metals, total suspended solids (TSS), and hardness (4 locations, one depth based on maximum observed in-situ turbidity readings). TSS was collected from one additional location.

A Geotech Geopump™ peristaltic pump was used to collect the water column samples. The initial metals sample were filtered using a 0.45 micron filter. Once collected, the filter was removed and the remainder of the sample bottles were filled. While the samples was being collected the turbidity reading from the paired YSI EXO2 sonde was recorded in the project logbook. The samples were submitted under chain of custody to the Adirondack laboratory in Albany, NY. Upon receipt, all lab data packages provided by the lab were reviewed by AECOM's chemistry staff for completeness and accuracy.

Detected concentrations of organic and inorganic constituents were compared to a list of Site-specific guidance values that were presented in Table 3-1 of the Surface Water Remedial Action Monitoring Plan (see Table 1). The chemical sampling/ monitoring lab reports are presented in Attachment A. Over the reporting period, there were two low level exceedances of the water quality criteria (mercury and chlorobenzene). The mercury exceedance (0.06 µg/l vs threshold of 0.05 µg/l) on 9/4/19 was at the upstream (Buoy 1) location. The sample was collected approximately 1 hour after high tide. The data received for the next day's sample set (9/4/19) samples came back without any exceedances. The chlorobenzene exceedance (5.6 µg/l vs threshold of 5 µg/l) on 9/9/19 was at the downstream (Buoy 3) location. The sample was collected approximately 1 hour after low tide. The data received for the next day's sample set (9/10/19) samples came back without any exceedances.

Typically, field turbidity readings from the YSI EXO2 sonde were typically observed to be less than 10 NTU. The associated buoy turbidity mirrored the field readings with a few spikes, but relatively low overall (typically less than 10 NTU, with isolated observations to 31 NTU). Overall, the turbidity readings continued to be in the near-bottom horizon. Lab TSS values during the reporting period were typically in the low teens and never higher than 16.0 mg/L.

Summary

Pursuant to the final Surface Water Remedial Action Monitoring Plan, and a 9/4/19 call with Drew Hoffert (NYSDEC) the chemistry monitoring program during remedial dredging operations will be continued on a daily basis for VOCs/ TSS and three times per week for PCBs. The data from the first month's samples are currently being evaluated and AECOM is preparing a summary memorandum detailing the Turbidity/ TSS relationship and will submit to the NYSDEC for review/ approval. AECOM will continue daily turbidity monitoring as described in the Work Plan throughout the duration of the dredging operations until NYSDEC advises that the program can be scaled back.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 8 samples on 9/3/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 6 samples on 9/4/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:** *06-Sep-19*
Project:	BASF Rensselaer – Hudson River OU-2	
Lab Order:	190904087	

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:

ND : Not Detected at reporting limit	C: CCV below acceptable Limits
J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
H: Hold time exceeded	Z: Duplication outside acceptable limits
N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 8 samples on 9/5/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:**	*09-Sep-19*
Project:	BASF Rensselaer – Hudson River OU-2		
Lab Order:	190905082		

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:		
	ND : Not Detected at reporting limit	C: CCV below acceptable Limits
	J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
	B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
	X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
	H: Hold time exceeded	Z: Duplication outside acceptable limits
	N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
	N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 6 samples on 9/9/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Christopher Hess
QA Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:** *11-Sep-19*
Project:	BASF Rensselaer – Hudson River OU-2	
Lab Order:	190909044	

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:

- ND : Not Detected at reporting limit
- J: Analyte detected below quantitation limit
- B: Analyte detected in Blank
- X : Exceeds maximum contamination limit
- H: Hold time exceeded
- N: Matrix Spike below acceptable limits
- N+: Matrix Spike is above acceptable limits
- C: CCV below acceptable Limits
- C+: CCV above acceptable Limits
- S: LCS Spike recovery is below acceptable limits
- S+: LCS Spike recovery is above acceptable limits
- Z: Duplication outside acceptable limits
- T : Tentatively Identified Compound-Estimated
- E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

Weekly Water Quality Monitoring Summary

Client:	**BASF**
Location:	**Rensselaer, New York**
Period:	**9/10/19 – 9/16/19 (Chemistry)**

On behalf of BASF Corporation (BASF), AECOM has prepared this water monitoring data summary for Hudson River Operable Unit 2 (OU-2) remedial activities at the Former BASF Facility located in Rensselaer, New York (referred to herein as "Site"). This data summary includes both tabular information and written discussions summarizing the ambient water-quality data collected during the indicated reporting period at the Site. The data was collected in accordance with the revised Surface Water Remedial Action Monitoring Plan prepared by AECOM (2019).

Introduction

Surface water monitoring and sampling activities were conducted during the reporting period (5 working days) to evaluate conditions within the river during remedial dredging activities to ensure that the measures used to control off-Site migration of Site related contaminants turbidity are effective, and to document ambient water quality/conditions in the river. A typical buoy layout is included as Figure 1. The monitoring program consists of the following real-time monitoring and integrated sampling:

- In-situ hand-held monitoring for turbidity, as well as observational monitoring sediment plumes conducted periodically, and during sampling activities;
- Daily (Monday through Friday) Total Suspended Solids (TSS) samples collected from each monitoring buoy (from near bottom in the water column, unless the worst case turbidity is observed at another depth, in which case that depth will be sampled). These samples will allow for comparison with the real-time/ field collected turbidity measurements;
- Daily (Monday through Friday) samples collected (one from each monitoring station from near bottom in the water column, unless the worst case turbidity is observed at another depth in which case that depth will be sampled) for laboratory analysis for VOCs;
- Three times per week samples collected (one from each monitoring station from near bottom in the water column, unless the worst case turbidity is observed at another depth in which case that depth will be sampled) for laboratory analysis for PCB Aroclors;
- Daily (Monday through Friday) TSS samples collected from the 600 ft downstream location (based on tidal stage) as a compliance check.

While not summarized in this memo, the following monitoring is also being conducted:

- Continuous real-time monitoring for (every 15 minutes for turbidity conducted at four fixed autonomous water quality buoys positioned up-river, adjacent to, downriver, and up-river off-Site (background) of the active work area (24 hours per day, 7 days per week);

The sampling/ monitoring results are compared to a list of Site-specific guidance values that were presented in Table 3-1 of the Surface Water Remedial Action Monitoring Plan.

Constituent Evaluation

AECOM conducted daily water quality monitoring associated with the Hudson River OU-2 remedial dredging installation over the period 9/10/19 through 9/16/19. In accordance with the July 2019 Surface Water Remedial Action Monitoring Plan, filtered analytical chemistry samples were collected daily for analysis of metals. Whole water samples were collected for VOCs, PCB Aroclors, and TSS (4 locations, one depth based on maximum observed in-situ turbidity readings). TSS was collected from one additional location.

A Geotech Geopump™ peristaltic pump was used to collect the water column samples. The initial metals sample were filtered using a 0.45 micron filter. Once collected, the filter was removed and the remainder of the sample bottles were filled. While the samples was being collected the turbidity reading from the paired YSI EXO2 sonde was recorded in the project logbook. The samples were submitted under chain of custody to the Adirondack laboratory in Albany, NY. Upon receipt, all lab data packages provided by the lab were reviewed by AECOM's chemistry staff for completeness and accuracy.

Detected concentrations of organic and inorganic constituents were compared to a list of Site-specific guidance values that were presented in Table 3-1 of the Surface Water Remedial Action Monitoring Plan (see Table 1). The chemical sampling/ monitoring lab reports are presented in Attachment A. Over the reporting period, there was one exceedances of the water quality criteria (chlorobenzene). The chlorobenzene exceedance (22 µg/l vs threshold of 5 µg/l) on 9/11/19 was at the downstream (Buoy 3) location. The sample was collected approximately 2 hours before low tide. The data received for the next day's sample set (9/12/19) samples came back without any exceedances.

Typically, field turbidity readings from the YSI EXO2 sonde were typically observed to be less than 5 NTU. The associated buoy turbidity mirrored the field readings with a few spikes, but relatively low overall (typically less than 10 NTU). Overall, the turbidity readings continued to be in the near-bottom horizon. Lab TSS values during the reporting period were typically in the low teens and never higher than 11.6 mg/L.

Summary

Pursuant to the final Surface Water Remedial Action Monitoring Plan, and a 9/18/19 email from Drew Hoffert (NYSDEC) the chemistry monitoring program during remedial dredging operations will be continued on a daily basis for VOCs/ TSS and three times per week for PCBs. The following criteria also apply to the VOC samples:

- Samples will not be collected for VOCs when low VOC grid cells are being dredged
- Samples will be collected daily during first pass dredging of high VOC cells (only North End HVOC Cuts 4, 5 and 6 remain as of 9/18/19)
- Samples will be collected three days a week during cleanup passes of high VOC cells

The data from the first month's samples are currently being evaluated and AECOM is preparing a summary memorandum detailing the Turbidity/ TSS relationship and will submit to the NYSDEC for review/ approval. AECOM will continue daily turbidity monitoring as described in the Work Plan throughout the duration of the dredging operations until NYSDEC advises that the program can be scaled back.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 6 samples on 9/10/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:** *12-Sep-19*
Project:	BASF Rensselaer – Hudson River OU-2	
Lab Order:	190910063	

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:

ND : Not Detected at reporting limit	C: CCV below acceptable Limits
J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
H: Hold time exceeded	Z: Duplication outside acceptable limits
N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.

(c) **Adirondack Environmental Services, Inc.** reports are submitted in writing and are for our customers only. Our customers are considered to be only those entities being billed for our services. Acquisition of an **Adirondack Environmental Services, Inc.** report by other than our customer does not constitute a representation of **Adirondack Environmental Services, Inc.** as to the accuracy of the contents thereof.

(d) In no event shall **Adirondack Environmental Services, Inc.,** its employees, agents or sub-contractors be responsible for consequential or special damages of any kind or in any amount.

(e) No deviation from the terms set forth herein shall bind **Adirondack Environmental Services, Inc.** unless in writing and signed by a Director of **Adirondack Environmental Services, Inc.**

(f) Results pertain only to items analyzed. Information supplied by client is assumed to be correct. This information may be used on reports and in calculations and **Adirondack Environmental Services, Inc.** is not responsible for the accuracy of this information.

(g) Payments by Credit Card/Purchase Cards are subject to a 3% additional charge.

RE: BASF Rensselaer – Hudson River OU-2
Water Analysis

Dear Ryan McCarthy:

Adirondack Environmental Services, Inc received 7 samples on 9/11/2019 for the analyses presented in the following report.

Please see case narrative for specifics on analysis.

If you have any questions regarding these tests results, please feel free to call.

Sincerely,

ELAP#: 10709

Monica Higdon
Laboratory Manager

MS/MSD/DUP Report

Adirondack Environmental Services, Inc CASE NARRATIVE

CLIENT:	AECOM Environment	**Date:** *13-Sep-19*
Project:	BASF Rensselaer – Hudson River OU-2	
Lab Order:	190911070	

Sample containers were supplied by Adirondack Environmental Services.

Definitions - RL: Reporting Limit DF: Dilution factor

Qualifiers:		
	ND : Not Detected at reporting limit	C: CCV below acceptable Limits
	J: Analyte detected below quantitation limit	C+: CCV above acceptable Limits
	B: Analyte detected in Blank	S: LCS Spike recovery is below acceptable limits
	X : Exceeds maximum contamination limit	S+: LCS Spike recovery is above acceptable limits
	H: Hold time exceeded	Z: Duplication outside acceptable limits
	N: Matrix Spike below acceptable limits	T : Tentatively Identified Compound-Estimated
	N+: Matrix Spike is above acceptable limits	E :Above quantitation range-Estimated

Note : All Results are reported as wet weight unless noted

The results relate only to the items tested. Information supplied by the client is assumed to be correct.

TERMS, CONDITIONS & LIMITATIONS

All service rendered by the **Adirondack Environmental Services, Inc.** are undertaken and all rates are based upon the following terms:

(a) Neither **Adirondack Environmental Services, Inc.,** nor any of its employees, agents or sub-contractors shall be liable for any loss or damage arising out of **Adirondack Environmental Services, Inc.'s** performance or nonperformance, whether by way of negligence or breach of contract, or otherwise, in any amount greater than twice the amount billed to the customer for the work leading to the claim of the customer. Said remedy shall be the sole and exclusive remedy against **Adirondack Environmental Services, Inc.** arising out of its work.

(b) All claims made must be in writing within forty-five (45) days after delivery of the **Adirondack Environmental Services, Inc.** report regarding said work or such claim shall be deemed or irrevocably waived.
