## **NMPC To Hold Public Meeting on Cleanup of Troy Site**

Niagara Mohawk Power Corporation will conduct a public information meeting at 6 pm, Wednesday, October 30, 1996 in City Council Chambers, Troy, New York on the status of remedial investigation activities related to a site located at the King Fuels property on Water Street. The industrial site had historically been used for the production of iron, steel, coke, and manufactured gas from coal, and is currently used for the bulk storage of fuel oil and gasoline.

Niagara Mohawk will undertake a second phase of field investigations starting in November which will support the development of an engineering feasibility study which will examine potential cleanup options for manufactured gas plant residuals.
