**RE: Groundwater Sampling and Hydraulic Conductivity Testing
National Defense Stockpile Center, Scotia Depot
Glenville, NY
NYSDEC Site No.: 4-47-023**

Dear Mr. Pelton,

This letter serves as a summary report for the recent groundwater monitoring/sampling event performed by Precision Environmental Services (PES) and NYSDEC at the above mentioned site on 08/07/2012 and 8/21/2012 using passive diffusion sampling techniques. Additionally, hydraulic conductivity (slug) tests were performed to determine rates of recharge for specific wells onsite.

1.0 Passive Diffusion Sampling:

According to the Interstate Technology Regulatory Council, a passive diffusion sampler (PDB) is a low-density polyethylene bag filled with deionized water, which acts as a semi-permeable membrane and is suspended in a well to passively collect groundwater samples. PDB samplers rely on the free movement of groundwater from the aquifer through the well screen. Volatile organic compounds (VOCs) in groundwater will diffuse across the bag material until constituent concentrations within the bag reach equilibrium with concentrations in the surrounding groundwater.

PES and NYSDEC personnel mobilized to the site on 8/7/2012 to collect groundwater monitoring data prior to PDB deployment. Wells were gauged with a Solinst® groundwater level indicator. Depth to water, and depth to bottom data was collected from each well sampled. Groundwater depth ranged from 62.02 to 70.72 feet. Groundwater data was used with known well elevation data to determine groundwater elevation and overall flow of groundwater at the site. Groundwater depth and elevation can be observed in Table-1. Groundwater elevation ranged from 226.12 to 232.20 feet above mean sea level. According to data collected on 8/7/2012, groundwater appears to flow to the southwest.

Well gauging data was used to determine the overall depth of each PDB deployed. Generally, PDBs were deployed to the center of the well column. PDB deployment data can be observed on Table-1

Once in place, PDBs were left to equilibrate with the surrounding groundwater for two weeks. On 8/21/2012, PES and NYSDEC remobilized to the site to retrieve PDBs and collect water samples. Once brought to the surface, PDBs were opened with clean stainless steel scissors and

PRECISION
ENVIRONMENTAL SERVICES, INC.

transferred to clean laboratory supplied glassware for submission to Test America Laboratory of Buffalo, New York for VOC analysis via EPA method 8260 B.

2.0 Hydraulic Conductivity Testing

On 9/21/2012 PES and NYSDEC personnel mobilized to the site to perform hydraulic conductivity (K) testing. During this K testing event, PES and NYSDEC utilized an Insitu® Leveltroll datalogger to collect real time data while using a PVC "slug" to displace water within each well tested, both for falling and rising "head" pressure. During each test, the slug was quickly dropped into the water column of the subject well until equilibrium was met, then quickly removed from the well until the displaced water column once again reaches equilibrium. K testing was performed on wells GEP-1, GEP-2, GEP-3, MW-13, MW-21, MW-5, MW-6, MW-7, and MW-9. K testing results can be seen as Attachment 1.

3.0 Groundwater Analytical Results:

As Table 2 –Summary of Groundwater Analytical Results shows, constituents of concern were found in all sampled wells above standards set forth by NYSDEC Part 703: Surface Water and Groundwater Quality Standards and Groundwater Effluent Limitations. Of note, trichloroethene (TCE) was found in 15 of the 22 samples submitted at levels above NYSDEC groundwater standards. Also of note, tetrachloroethene (PCE) was found above NYSDEC groundwater standards in MW-14, MW-21, and GEP-2. The laboratory analytical report can be found as Attachment II.

4.0 Conclusion:

In conclusion, PES and NYSDEC performed groundwater sampling via passive diffusion sampling techniques to delineate overall distribution of contaminants at the site. PDB sampling requires two weeks of equilibration once deployed and provide an overall undisturbed groundwater sample without the use of pumps or disturbance to the groundwater table during sampling. All samples collected were found to contain constituents of concern above NYSDEC groundwater standards, according to laboratory analytical data provided by Test America Laboratory of Buffalo, New York.

Additionally, PES and NYSDEC performed K testing in real time using PVC slugs, and Insitu® data collection equipment.

PES greatly appreciates the continued opportunity to provide environmental services to the New York State Department of Environmental Conservation. If you have any questions concerning report, please call the undersigned at (518) 885-4399.

Sincerely
PRECISION ENVIRONMENTAL SERVICES, INC.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation These commonly used abbreviations may or may not be present in this report.

✓	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CNF	Contains no Free Liquid
DL, RA, RE, IN	Indicates a Dilution, Reanalysis, Re-extraction, or additional Initial metals/anion analysis of the sample
EDL	Estimated Detection Limit
EPA	United States Environmental Protection Agency
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RL	Reporting Limit
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Case Narrative

Client: New York State D.E.C.

Project/Site: Defense Nat'l Stockpile #447023

TestAmerica Job ID: 480-24200-1

Job ID: 480-24200-1

Laboratory: TestAmerica Buffalo

Narrative

Job Narrative 480-24200-1

Receipt

The samples were received on 8/22/2012 9:00 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 2.4° C.

GC/MS VOA

Method 8260B: The following samples were diluted to bring the concentration of target analytes within the calibration range: (480-24200-16 MS), (480-24200-16 MSD), GEP-2 (480-24200-16), MW-18 (480-24200-12), MW-20 (480-24200-9), MW-22 (480-24200-13). Elevated reporting limits (RLs) are provided.

Method 8260B: The following samples were diluted to bring the concentration of target analytes within the calibration range: GEP-1 (480-24200-20), GEP-3 (480-24200-19), MW-13 (480-24200-21). Elevated reporting limits (RLs) are provided.

No other analytical or quality issues were noted.

Job Number: 480-24200-1

Login Number: 24200

List Source: TestAmerica Buffalo

List Number: 1

Creator: Janish, Carl

Question	Answer	Comment
Radioactivity either was not measured or, if measured, is at or below background	True	
The cooler's custody seal, if present, is intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the sample IDs on the containers and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	True	
If necessary, staff have been informed of any short hold time or quick TAT needs	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True
