RE: Drum/Container Excavation Findings Report
Malta Rocket Fuel Area Superfund Site

CB&I Environmental and Infrastructure, Inc. (CB&I) submits this report summarizing the methodology and findings for the investigation of the northeast corner of the former Malta Rocket Test Station where historic buried containers and metal debris were previously identified (referred to in this report as the "Northeast Debris Area"). The purpose of this investigation was to excavate and fully characterize the contents of any drums/containers, and to identify impacts from the debris to the soil and groundwater quality in this area.

BACKGROUND

The former Test Station is located in the Towns of Malta and Stillwater, New York and includes approximately 165 acres of developed land (**Figure 1**, Site Location Map). The former Test Station and portions of recently developed surrounding areas comprise the former Malta Rocket Fuel Area Site (Site).

The Test Station was established in 1945 by the U.S. Government and was owned by the New York State Energy Research and Development Authority until 1984 when it was sold to Wright Malta Corporation. Wright Malta Corporation sold the former Test Station to the Luther Forest Technology Campus Economic Development Corporation (LFTCEDC). LFTCEDC is currently developing the former Test Station specifically to support advanced manufacturing, research and development, and related industrial and commercial uses. The cornerstone company on the campus is GlobalFoundries and their semiconductor factory.

As part of redevelopment efforts, NAEVA Geophysics Inc. was retained by LFTCEDC and utilized high-resolution time domain electromagnetism to identify shallow ferrous and non-ferrous

metallic objects at the Site. On May 12, 2014, during a "Munitions and Explosives of Concern" (MEC) study and investigation of a particular metallic anomaly, barrel remnants and an assortment of debris were discovered in a location on the northeast corner of the former Test Station (**Figure 2**, Northeast Debris Area Survey). Under the oversight of the New York State Department of Environmental Conservation (NYSDEC), LFTCEDC contractor Precision Industrial Maintenance (PIM) excavated a total of 11 drums/containers and over-packed and/or staged them at the Site. Two of the eleven drums/containers were identified as empty (**Table 1**, Drum/Container Inventory). Additional buried drums/containers were expected at the Site based upon the results of the electromagnetic survey and the limited excavation preformed at that time.

In the Spring/Summer of 2014, a Phase II Environmental Site Assessment (Phase II ESA) was performed by CT Male Associates (CT Male) for GlobalFoundries for a 17-acre area known as the Temporary Construction Parking Lot F, which is part of the Site purchased by GlobalFoundries from LFTCEDC. Temporary Construction Parking Lot F, is located directly to the north, west and south of the Northeast Debris Area. Groundwater monitoring wells were installed by GlobalFoundries in and around the Northeast Debris Area to determine groundwater quality in the area. Additionally, test borings were used to collect soil samples. Laboratory analytical results of groundwater collected from four monitoring wells (three wells to the north and one well to the south) and 26 soil samples indicated "limited and minor impacts to subsurface soils and groundwater above applicable regulatory values" in this area of the Site (additional details may be found in *Phase II Environmental Site Assessment, Temporary Construction Parking Lot F, C.T. Male Associates, Inc., October 2, 2014).*

SCOPE OF WORK

The completed scope of the work detailed in this report was documented in the September 17, 2015 Work Plan approved by the United States Environmental Protection Agency (USEPA). The required actions from the Work Plan are as follows:

1) Fully characterize the Northeast Debris Area for possible buried munitions and historic contaminants of concern and assess soil quality;

2) Update site specific Health & Safety Plan (HASP) and establish an accurate site map of the northeast corner of the Test Station, including the Northeast Debris Area. Review sample locations for post-drum/container removal soil borings;

3) Excavation of remaining drums/containers and debris encountered within the Northeast Debris Area;

4) Full characterization of the contents of drums/containers and debris encountered within the Northeast Debris Area;

5) Collect soil samples within the Northeast Debris Area to determine whether the drums/containers and debris have resulted in a release or threat of release of hazardous substances to soil above the NYSDEC Part 375 commercial and industrial soil cleanup objectives (SCOs) that may present a risk to human health or the environment, and,

6) Collection of groundwater samples in the Northeast Debris Area at soil sampling locations with elevated PID readings.

Implementation of these requirements is addressed in subsequent sections of this report.

DRUM/CONTAINER EXCAVATION PREPARATION

Health & Safety Plan

Prior to commencement of field work CB&I reviewed and updated the Health and Safety Plan (HASP) for the Site. This HASP objective is to help establish safe working conditions at the site, especially during drum/container excavation. Safety procedures and protective equipment were chosen according to potential hazards. Specific hazard control methods were evaluated and selected to minimize the potential of accident or injury. All work complied with Occupational Safety and Health Act (OSHA) standards, "Hazardous Waste Operations and Emergency Response" (29 CFR 1910.120), CB&I Health and Safety Procedures, and other federal, state, and local procedures that require the development and implementation of a HASP. Generation of this document certified that the workplace was evaluated for hazards. A hazard assessment was performed and the adequacy of selected personal protective equipment (PPE) was evaluated, and subsequently followed.

Quality Assurance Project Plan

A Quality Assurance Project Plan or QAPP was prepared. The intent of the QAPP was to detail the quality assurance/quality control (QA/QC) procedures that were followed during the collection, analysis and evaluation of analytical samples and data generated during the drum/container excavation and subsequent soil and groundwater investigation of the Northeast

Debris Area. The QAPP provided general information and references CB&I's Standard Operating Procedures (SOPs) related to analytical sampling, field equipment operation, calibration and management, data collection, field sampling and management, and data quality requirements. CB&I prepared the QAPP in accordance with the requirements of the Uniform Federal Policy for Quality Assurance Project Plans, incorporating numerous rounds of edits from the USEPA, before finalizing the document on March 21, 2016.

Geophysical Survey Results

On May 22, 2015 CB&I and Utility Survey completed a supplemental geophysical survey in the area, building upon the initial confines of the survey performed by NAEVA Geophysics Inc. Three technologies were utilized for the subsurface survey, 1) electromagnetic induction, 2) ground penetrating radar, and 3) ferro-magnetic. All work was georeferenced with global positioning equipment for accurate follow-on mapping needs. Pin flagging and spray paint were used to delineate the bounds of the inferred buried debris anomaly. The presence of buried metallic debris was confirmed, along with the anomaly demensions previously identified. Utility Survey's Profiler Investigation Field Report is included as **Attachment A**.

Topographic Survey of the Northeast Disposal Area

On October 20, 2015 the LaBerge Group performed a survey of the Northeast Debris Area. Horizontal data (using NAD 83) and vertical data (using NAVD 88) were collected and used to develop a topographic base map of the northeast corner of the former Test Station including the results of the initial and supplemental geophysical surveys (**Figure 2**, Northeast Debris Area Survey).

Previously Excavated Container Sampling

On October 23, 2015 samples were collected from nine previously excavated drums/containers. CB&I contracted Op-Tech Environmental to perform the sampling. All sampling of the over-packed drum/containers excavated by LFTCEDC and their contractor PIM in May, 2014 was performed in Level B personal respiratory protection due to the unknown characteristics of the drum/containers (**Attachment B**, Photolog). The samples were delivered under proper chain-of-custody to ALS Environmental (ALS) in Middletown, Pennsylvania for analysis. Samples were analyzed for the following:

- Volatile Organic Compounds (VOCs) by USEPA Method 8260C;
- Semi-volatile Organic Compounds (SVOCs) by USEPA Method 8270D;

- Organochlorine Pesticides by USEPA Method 8081B;
- Herbicides by USEPA Method 8151A;
- Polychlorinated Biphenyls (PCBs) by USEPA Method 8082A;
- Total Metals by USEPA Method 6010C;
- Total Mercury by USEPA Method 7470A;
- Hexavalent Chromium by USEPA Method 7196A; and,
- General Chemistry - Reactivity, Ignitability, and Corrosivity.

Laboratory analytical results indicated that the material in the excavated drums did not exhibit hazardous waste characteristics. The results from this waste characterization sampling event are summarized on **Table 2**. Laboratory results were reviewed by CB&I's project chemist for quality control purposes. The complete laboratory data package is included as **Attachment C**.

DRUM/CONTAINER EXCAVATION

Between May 27 and June 9, 2016, a total of 46, 55-gallon drums, 2 steel buckets and 2, 1-gallon paint cans were excavated from the Northeast Debris Area. Sixteen of the drums/containers contained solid or liquid material and 34 were empty, partially to largely deformed carcasses. Additionally, 34 stainless steel cylinders marked "US Navy" were excavated from the area. Of the 34 cylinders, 20 contained holes through each of the cylinders. A complete inventory and description of drums/containers, cylinders, and investigation derived waste (IDW) is detailed on **Table 1**. The drums/containers excavated in May 2014 are included in the inventory.

The excavation work, performed by HEPACO and supervised by CB&I, was conducted in zones of protection (Exclusion, Contamination Reduction, and Support Zones), using Level B respiratory protection. HEPACO used an excavator to uncover buried debris. The excavator was equipped with a flat edged sand-type bucket and operator cab blast shielding with the operator in supplied airline with an egress bottle. After uncovering of the debris, two HEPACO workers approached the debris in Level B self-contained breathing apparatus (SCBA) with multi-gas and volatile organic vapor air monitoring. Once the debris was cleared for safe access, it was documented, photographed and contents were sampled prior to being placed in an over-pack and moved to a staging location until laboratory analysis was complete. All empty drums/containers and drum carcasses were placed in a scrap location in the staging area. All container and burial positions were mapped and labelled and are shown in **Figure 3**. A photo log of all drums/containers and debris uncovered during the excavation work is provided in **Attachment B**. Daily field notes recorded by CB&I personnel are included as **Attachment D**.

The removed drum/container debris was located approximately 3 to 4 feet bgs in the soil boring investigation area. Once the debris was removed at each location several additional feet of exploratory digging was performed, confirming no further debris existed with depth. Based on this process CB&I determines the excavated debris area was examined to an approximate depth of 7 to 8 feet bgs.

All samples were sent to ALS for the following waste characterization analyses:

- VOCs by USEPA Method 8260C;
- SVOCs by USEPA Method 8270D;
- Organochlorine Pesticides by USEPA Method 8081B;
- Herbicides by USEPA Method 8151A;
- PCBs by USEPA Method 8082A;
- Total Metals by USEPA Method 6010C;
- Total Mercury by USEPA Method 7470A;
- Hexavalent Chromium by USEPA Method 7196A; and,
- General Chemistry - Reactivity, Ignitability, and Corrosivity.

Given limited drum/container content, coupled with the need to split samples with the USEPA onsite representative, CB&I was unable to collect matrix spike and matrix spike duplicate samples. Laboratory analytical results indicated that all liquid waste drum samples and two of the solid waste drum/container samples exhibited hazardous waste characteristics (**Tables 3a and 3b**). Laboratory results were reviewed by CB&I's project chemist. Laboratory analytical results for the drums/containers are provided in **Attachment E**.

SOIL AND GROUNDWATER INVESTIGATION

Three soil borings were completed inside the former drum/container excavation area using a Geoprobe® direct-push drill rig on September 14th and 15th, 2016. The locations of the soil borings were selected following review with the USEPA. The three boring locations, shown in **Figure 3,** are representative of three general regions where buried drums/containers containing solids or liquids were removed.

Soil samples were collected in continuous 4-foot intervals from ground surface down to the water table (i.e., 0-4 feet, 4-8 feet, 8-12 feet below ground surface[bgs]). The drill string consisted of a dual-tube arrangement to minimize hole collapse with continued downward advancement. The outer 3.25-inch diameter casing was advanced in front of the smaller diameter sampler. Samples

were extruded into a clear plastic sleeve to minimize the loss of VOCs, screened with a PID for VOC headspace, visually inspected for evidence of soil staining, characterized, and logged. Steam cleaning was performed before and between each of the sampling locations to ensure no cross-contamination would occur. A composite sample from each 4-foot interval was sent to ALS for analysis. Laboratory analysis was performed for VOCs, SVOCs, Organochlorine Pesticides, Herbicides, PCBs, Total Metals, Total Mercury, Hexavalent Chromium and General Chemistry (Reactivity, Ignitability and Corrosivity). The USEPA onsite representative collected split samples for each of the three borings.

The soil borings were advanced and logged to a total depth of 14 feet bgs, where groundwater was encountered. Soil type throughout consisted of dark yellowish brown, poorly graded fine-to-medium sand with trace amounts of fines. Soil boring logs are presented in **Attachment F**.

Following the completion of soil boring characterization and sampling the driller removed the drill string, completing the hole with bentonite fill. Based on PID readings, a second hole was advanced within a few feet at each location to collect a representative groundwater sample from that location. A slotted, 5-foot sampler was attached to the direct push rod assembly and advanced to a water collection depth of 14 to 19 feet bgs or the upper five feet of the groundwater table. A peristaltic pump, with dedicated tubing was then used to purge the location and collect a groundwater sample. Since elevated PID readings were recorded at all three boring locations a groundwater sample was collected at all three locations, in accordance with the Work Plan.

Steam cleaning of the drilling equipment was performed before and after each of the sample locations to ensure no cross-contamination would occur. Laboratory analysis was performed for VOCs, SVOCs, Organochlorine Pesticides, Herbicides, PCBs, Total Metals, Total Mercury, Hexavalent Chromium, and General Chemistry (Reactivity and Ignitability). The USEPA onsite representative collected a split water sample from the SB-1 boring.

Analytical Results – Soil

Eight VOCs were detected in soil samples collected from the soil borings. None of these compounds were detected at concentrations exceeding the NYSDEC NYCRR Part 375 Soil Cleanup Objective (SCO). Two VOCs, acetone and chloroform, were detected throughout boring SB-1. The presence of these compounds coincides with the compounds detected in drums removed (i.e. LF036, LF037, LF038, LF039 and LF042) at this location. Four VOCs, acetone, chloroform, ethyl acetate and methylene chloride, were detected throughout most of SB-2. The presence of

these compounds coincides with materials detected in the removed drums (i.e. LF021, LF022 and LF023) at this location. Two VOCs, acetone and methylene chloride, were detected throughout most of SB-3. The presence of these compounds coincides with the removed drums (i.e. LF012 and LF014) at this location. Soil boring soil analytical data for VOC analysis are included in **Table 4a**.

Six SVOCs were detected in soil samples collected from soil borings SB-2 and SB-3. All of these compounds were detected at estimated concentrations and did not exceed their respective SCOs.

Three Pesticides were detected in soil samples collected from soil borings SB-1 and SB-2. All of these compounds were detected at estimated concentrations and did not exceed their respective SCOs.

Numerous metals were detected in soil samples collected from the soil borings. None of these compounds were detected at concentrations exceeding the SCO. CB&I subsequently reviewed the *Remedial Investigation Report* from February 1995. The Site concentration ranges for metals in soil are comparable to those found during this investigation in the Northeast Debris Area.

Hexavalent chromium was detected in soil sample SB-1 (0-4ft) at an estimated concentration of 2.1 micrograms per kilogram. This concentration is well below the SCO. All remaining samples recorded no detection for hexavalent chromium.

The remaining methods analyzed for (PCBs, Herbicides, reactive Sulfide and reactive Cyanide) yielded no detections above laboratory method detection limits. All soil samples were not ignitable. Laboratory analytical results from soil boring soil samples are provided in **Attachment G**.

Analytical Results – Groundwater

All groundwater samples analyzed for SVOCs, PCBs, Pesticides, Herbicides, Hexavalent Chromium, reactive Sulfide and reactive Cyanide yielded no detections above laboratory method detection limits. All groundwater samples were not ignitable and pH results were within acceptable range. Laboratory analytical results from soil boring groundwater samples are provided in **Attachment G** and summarized in **Table 4b**.

Three VOCs were detected in at least one groundwater sample collected. Acetone was reported at an estimated concentration of 3.7J micrograms per liter (µg/L) in sample GW-SB-3and 3.2J µg/L in the duplicate sample. Chloroform was detected an an estimated concentration of 0.7 µg/L in

sample GW-SB-2. Carbon Tetrachloride was detected at an average concentration of 2.97 µg/L (7.2 µg/L in the groundwater sample collected from the SB-1 location (GW-SB-1), 1.2 µg/L in GW-SB-2 and ND in GW-SB-3). The New York State Groundwater Standard (NYSGWS) for Carbon Tetrachloride is 5.0 µg/L. It is also noted that carbon tetrachloride was detected in soil samples collected in NE Debris Area borings (see Table 4a) ranging from ND to the highest concentration estimated at 10.1J mg/Kg.

Numerous metals were detected in the unfiltered groundwater samples collected from the soil boring locations. Iron, Manganese, and Sodium were detected in the SB-1 and SB-2 locations at concentrations exceeding the NYSGWS. Iron was detected at concentrations of 4.1 mg/L in SB-1 and 0.55 mg/L in SB-2. The NYSGWS for Iron is 0.3 mg/L. Manganese was detected at a concentration of 0.96 mg/L in SB-1. The NYSGWS for Manganese is 0.3 mg/L. Sodium was detected at concentrations of 51.7 mg/L in SB-1 and 23.8 mg/L in SB-2. The NYSGWS for Sodium is 20 mg/L. CB&I subsequently reviewed the *Remedial Investigation Report* from February 1995. The Site concentration ranges for metals in groundwater are comparable to those found during this investigation in the Northeast Debris Area. It is also important to note that metal concentrations tend to be higher in unfiltered groundwater samples.

Third Party Data Validation

All soil and groundwater samples were sent to ALS in Middletown, Pennsylvania. ALS is certified by the New York State Department of Health for the analysis performed. The data packages submitted by ALS contained full deliverables for validation. All soil and groundwater samples were collected and analyzed in accordance with the methodologies described in the Work Plan and QAPP. The attached Data Usability Summary Report or DUSR (**Attachment H**) was generated from review of quality control (QC) summary form information, with full review of sample raw data and limited review of associated QC raw data. The reported QC summary forms and sample raw data were reviewed for application of validation qualifiers, in accordance with the QAPP, with guidance from the USEPA national and regional validation documents, and in consideration of specific requirements of the analytical methodology. In summary, most sample results were usable either as reported or with minor qualification or edit, all of which are provided in the attached DUSR.

DRUM/CONTAINER WASTE DISPOSAL

A total of 22 drums/containers with contents exhibiting hazardous waste characteristics were removed from the staging area and transported by Veolia ES Technical Services (EPA ID

#NJD080631369) to their disposal facility in Middlesex, New Jersey (EPA ID #NJD002454544) on August 30, 2016 and September 7, 2016. MC Environmental Services (MCES) removed fourteen (14) drums of non-hazardous waste on September 23, 2016. The waste was transported to ESMI of New York in Fort Edward, New York for disposal. On October 27, 2016 MCES returned to the Site to transport the drum scrap debris to Cohen Recycling in Glens Falls, New York. Four (4) drums containing non-hazardous PPE, waste water from decontamination, and soil from the soil and groundwater investigative activities were removed from the staging area and transported by EQ Northeast, Inc. (EPA ID #MAD084814136) to their Detroit, Michigan disposal facility (EPA ID #MID980991566) on November 15, 2016. Manifests and other disposal documents are included in **Attachment I**.

Notes:

Toxicity Regulatory Levels as given in 40 CFR 261.24.
Only compounds detected above reporting limits for one or more samples presented above.
"-" = No Toxicity Characteristic Regulatory Level given for analyte.
Polychlorinated Biphenyls, Herbicides, and Hexavalent Chromium were not detected above reporting limits for all samples.
Analytical method results presented in units from laboratory report.
Bold represents detected compounds above laboratory reporting limits.
Shaded cells represent detection above Toxicity Characteristic Hazardous Waste Regulatory Level (Toxicity, D004-D043 [40 CFR 261.24]).
Data not independently validated.
[1]Maximum TCLP for a Solid Material = Total Concentration of Constituent / 20
U = Indicates the analyte was not detected.
J = Indicates an estimated value between the Method Detection Limit and Practical Quantitation Limit for the analyte.
NA = Not Analyzed

Notes:

Toxicity Regulatory Levels as given in 40 CFR 261.24.

Only compounds detected above reporting limits for one or more samples presented above.

"-" = No Toxicity Characteristic Regulatory Level given for analyte.

Polychlorinated Biphenyls, Herbicides and Hexavalent Chromium were not detected above reporting limits for all samples.

Analytical method results presented in units from laboratory report.

Bold represents detected compounds above laboratory reporting limits.

Shaded cells represent detection above Characteristic Hazardous Waste Regulatory Level (Toxicity, D004-D043 [40 CFR 261.24], Ignitability, D001 [40 CFR 261.21], or Corrosivity, D002 [40 CFR 261.22]).

Data not independently validated.

U = Indicates the analyte was not detected.

J = Indicates an estimated value between the Method Detection Limit and Practical Quantitation Limit for the analyte.

> = PID reading above instrument calibration level.

* = Readings are approach readings only; headspace not tested.

** = Readings are on sample container headspace.

NA = Not Analyzed; Not enough volume.

Notes:

New York State Department of Environmental Conservation (NYSDEC) Commercial and Industrial Soil Cleanup Objective (SCOs) were obtained from 6NYCRR Part 375, December 14, 2006.

Only compounds detected above reporting limits for one or more samples presented above.

"-" = No Regulatory Level given for analyte.

Polychlorinated Biphenyls, Herbicides and Hexavalent Chromium were not detected above reporting limits for all samples.

Analytical method results presented in units from laboratory report.

[b] The SCOs for commercial use were capped at a maximum value of 500 ppm (500,000 ppb).

[c] The SCOs for industrial use and the protection of groundwater were capped at a maximum value of 1000 ppm (1,000,000 ppb).

[d] The SCOs for metals were capped at a maximum value of 10,000 ppm.

[f] For constituents where the calculated SCO was lower than the rural soil background concentration as determined by the Department and Department of Health rural soil survey, the rural soil background concentration is used as the Track 2 SCO value for this use of the site.

[h] The SCO for this specific compound (or family of compounds) is considered to be met if the analysis for the total species of this contaminant is below the specific SCO. The SCOs for Chromium, trivalent, are given in the table.

Bold represents detected compounds above laboratory reporting limits.

Shaded cells represent detection above NYSDEC Commercial Use SCO.

Data independently validated.

U = Indicates the analyte was not detected.

J = Indicates an estimated value between the Method Detection Limit and Practical Quantitation Limit for the analyte.

US Survey Report

Profiler Investigation Field Report

Client: CB&I
Job Site: 400 Stonebreak Rd. Ext, Malta, NY
Client Contact: Brian Neumann, Steve Meier
Survey Technician: Jose Tejada
Survey Date: 5-22-15

THE MAPS:

There are two map formats generated for this report that show the results of the Profiler Electromagnetic Induction Investigation carried out by Utility Survey Corp. at the above referenced job site.

Map Formats:

1. Google Earth Digital Maps (see separate "Google Earth" folder)
2. Color Contour Maps (see under "Field Report" below)

The maps were created from data collected by a Trimble Geo-7X GPS used in tandem with a GSSI Profiler EMP-400 electromagnetic induction instrument.

Both the Google Earth and the Color Contour maps are depictions of the same data.

Digital Files: Any digital files provided to our clients will be in a Google Earth (kmz) and/or AutoCAD (dxf) format depending on the project scope.

When opened on a computer, the Google Earth (kmz) files will depict georeferenced targets as an overlay over the project site.

For projects where AutoCAD (dxf) files are provided to the client, they can be used to update their existing AutoCAD files or create new ones.

It should be noted that neither these maps, nor any other maps, should be used as a substitute for in-field markings (i.e. paint/flags/stakes etc.) if intrusive activities such as excavations are being considered.

Job site field markings are the primary reference points but even then, hand-digging should always be carried out in the proximity of buried utilities.

PROJECT SCOPE:

The requirement was for Utility Survey Corp. to conduct a survey to detect for the presence of potential "targets of interest" such as buried containers and tanks, waste and contaminant extents, and other significant objects.

The survey was carried out with three types of technology specifically designed for this type of investigation as follows:

1. Electromagnetic Induction (EM)
2. Ground Penetrating Radar (GPR)
3. Ferro-Magnetic (FM).

THE METHODOLOGY:

Phase 1 - EM Area Scan: The first phase was to scan the designated survey area with a GSSI Georeferenced Profiler EMP-400 Electromagnetic Induction Instrument. The Profiler and previous generation technology of this nature are commonly referred to as EM instruments.

This first scanning phase generated georeferenced, colored, contour-type, data maps showing the location of potential targets of interest. These target areas were then investigated further in Phase 2 to try and determine their physical nature, approximate size, and depth.

Phase 2 - GPR & FM Localized Investigation: The second phase was to carry out a localized investigation of target areas of interest revealed during the Phase 1 Profiler scanning.

An intensive localized scanning was performed at each target area of interest using both GPR (Ground Penetrating Radar) and an FM instrument (Ferro-Magnetic Center-Mass Metal Detector).

The purpose of this second phase was to try and determine the nature of the targets shown on the maps generated by the Profiler scanning. The GPR is used to determine the approximate size and depth of potential targets.

The EM instrument was used to determine if targets are made of a ferrous metal such as is typically used in the manufacture of steel drums and underground storage tanks (USTs) etc.

Any target “seen” with the GPR that does not generate a tone when scanned with the FM instrument will be assumed to be of a non-ferrous nature.

THE TECHNOLOGY:

Primary Technology: The primary instrument used for this survey was the GSSI Profiler EMP-400. This is a powerful new generation Electromagnetic Induction Instrument with georeferencing GPS capability.

The Profiler has the benefit of GSSI's proprietary source cancellation and calibration technology to create the greatest signal stability available over any comparable instrument.

The Profiler's system structure, electronics and coils are designed for maximum structural and thermal stability. These key features minimize signal drift thereby maintaining an accurate zero level and system null across its full bandwidth range. The major advantage of this design is to overcome the signal drift problem that is common with other previous generation EM instruments.

Older EM-type instruments do not incorporate the advanced electronics and software controls employed in the Profiler. The Profiler can therefore be relied upon to produce superior data quality, which means more accurate results.

To obtain the highest level of georeferencing accuracy, Utility Survey Corp's Profiler is driven by a Trimble Geo-7X mobile GPS unit with 1 cm accuracy (i.e. plus or minus half-inch corrected*).

The procedure was to scan the target area with the Profiler in an x-y grid pattern. Data was collected by the Trimble Geo-7X GPS. The survey data was then downloaded into data processing software to generate georeferenced color contour maps.

<u>Typical Uses for The Profiler EMP-400 include:</u>

- Environmental remediation
- Utility/UST detection – metallic and non-metallic
- Archaeology

- Geological investigation
- Site assessment
- Ground water investigation
- Septic fields
- Agricultural research

Localized Investigation Technology - GPR: The major secondary instrument to be deployed as follow up to the Profiler scanning was the GSSI GPR UtilityScan cart system configured with a 270 MHz frequency antenna.

The 270 MHz antenna's lower frequency design provides for optimal depth of penetration and large size target detection. This is the preferred antenna of choice for when larger objects and features are required to be detected, such as underground storage tanks, drums, containers and contamination extents etc.

The target areas of interest generated from the Profiler survey were investigated with the GPR 270. The procedure was to criss-cross the target area in an x-y grid pattern. The GPR's on-board computer provided target data information in real time.

The UtilityScan cart is the industry standard Ground Penetrating Radar system for subsurface designation of many different target types. It is of a highly rugged construction yet extremely maneuverable allowing for efficient scanning of a variety of site environments. Another major feature of the UtilityScan is its ability to produce immediate, on-screen, target information.

<u>Typical Uses for The UtilityScan Include:</u>

- Utility/UST detection – metallic and non-metallic
- Environmental assessment
- Septic Fields
- Damage prevention
- Geological investigation

- Turf assessment
- Archaeology
- Forensics
- Road inspection

Localized Investigation Technology - FM: An additional secondary instrument was used in a supporting role to the GPR in the follow up to the Profiler scanning. This was a Ferro-Magnetic Center-Mass type instrument, commonly known as a box locator or metal detector.

Utility Survey Corp. utilizes several types of FM instruments such as the CST Magna Trak 102 and MetroTech 880B. These instruments are hand-held and highly portable. They are designed to detect ferrous metal-mass objects down to a depth of 15 feet depending on object size, environmental conditions, signal strength etc.

The procedure was to sweep the target area with the FM instrument in an x-y grid pattern. A tone will be generated when a ferrous metal-mass object is detected.

Georeferencing - GPS: All projects performed by Utility Survey Corp. where georeferenced (GPS) positioning of targets is required will be carried out with a portable Trimble Geo-7X GPS system of 1 cm accuracy corrected*.

For regular utility mapping surveys the Trimble is attached to a designator pole that is placed directly over each target to plot its long/lat point.

For Profiler surveys the Trimble is configured to take the place of the Profiler's standard GPS controller. This is to boost the Profiler up to a 1 cm level of accuracy (i.e. plus or minus approximately half-inch) as opposed to its standard operating sub-metre accuracy (i.e. plus or minus approximately three feet).

*_Corrected_ means that the collected GPS field data must be exported to an external satellite base-station data correction service for positional adjustment, or correction. The reason for this is that raw satellite data can be affected by potential errors such as shielding; i.e. tree canopies, high buildings etc. The Geo-7X accesses the highest number of satellites to record multiple date and time-stamped longitude and latitude coordinates. The correcting process correlates and adjusts the data to ensure our data files have the highest available level of accuracy.

THE FIELD REPORT:

Utility Survey Corp. technicians follow our proprietary 10-Step Protocols for all field survey work. This is a strict methodology designed to maximize accuracy and minimize risk in the detection and marking of buried utilities, objects, and features.

The 10- Step Protocols set out the locating procedure and equipment to be used as indicated on the Job Completion Form (JCF) signed off by the client at the conclusion of the field survey work.

The maps show different colored conductivity contours. These are typically red, yellow, blue etc. that stand out from a background of a different color. They are referred to as “hot-spots” and represent potential “targets” of potential interest.

This field report has detailed the equipment and methods of the survey and concludes with an opinion as to what nature the technician believes any detected targets of interest may be. For example, an opinion may be such as, “The target object is of a metal nature and has the approximate dimensions and depth that could be representative of a underground storage tank.” It is not possible, as no

such technology exists, to give any more definitive identifying information than this.

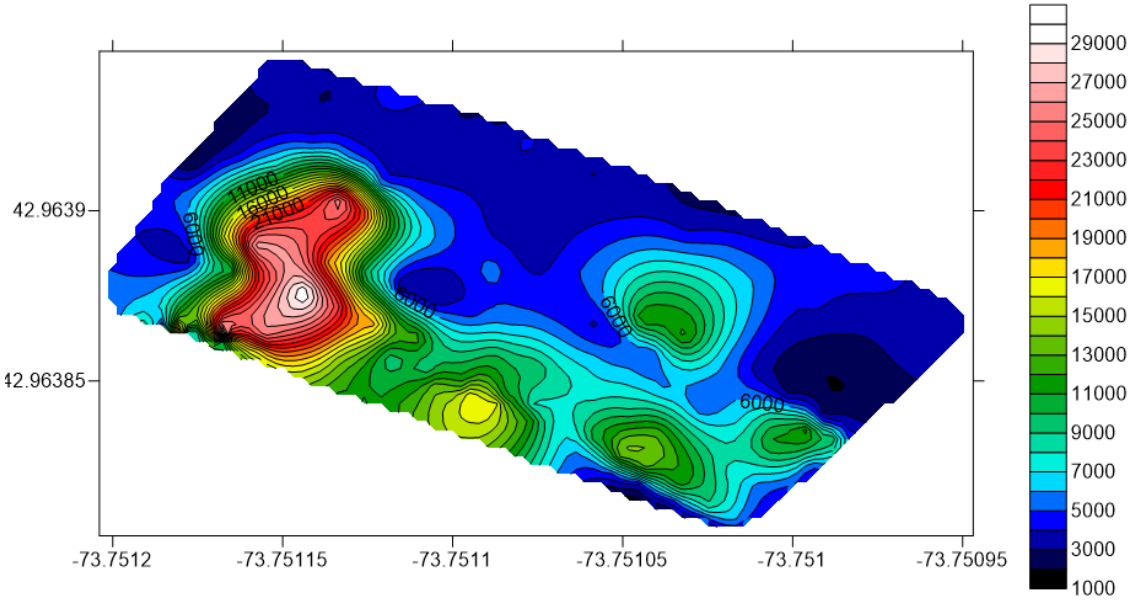
To obtain more of a positive verification of a target, the client would have to arrange for follow-up activities to be carried out such as excavation, soil borings, etc.

The purpose of the technician's opinion is to provide the client with as much helpful information as possible based upon his/her knowledge, experience, and training.

The Technician's Opinion For This Project Is:

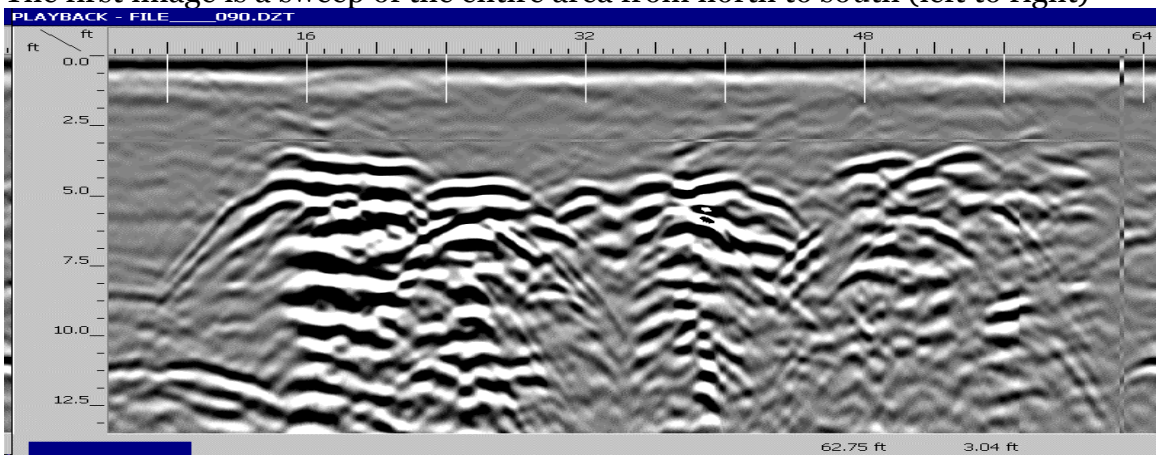
A GPR survey was performed prior to the EM Profiler Survey. The GPR survey revealed multiple subsurface anomalies in area. The area in which the subsurface anomalies were present was marked in purple paint and flags. A EM Profiler Survey was then performed to confirm the information received from the GPR survey. I believe the EM Profiler data received confirms the GPR data. The data received from the EM Profiler survey shows areas of high conductivity and other concentrations of subsurface materials in the area which coincide with the GPR data that was found. Below you will see imagery and color contour maps that show this data.

COLOR CONTOUR MAPS:

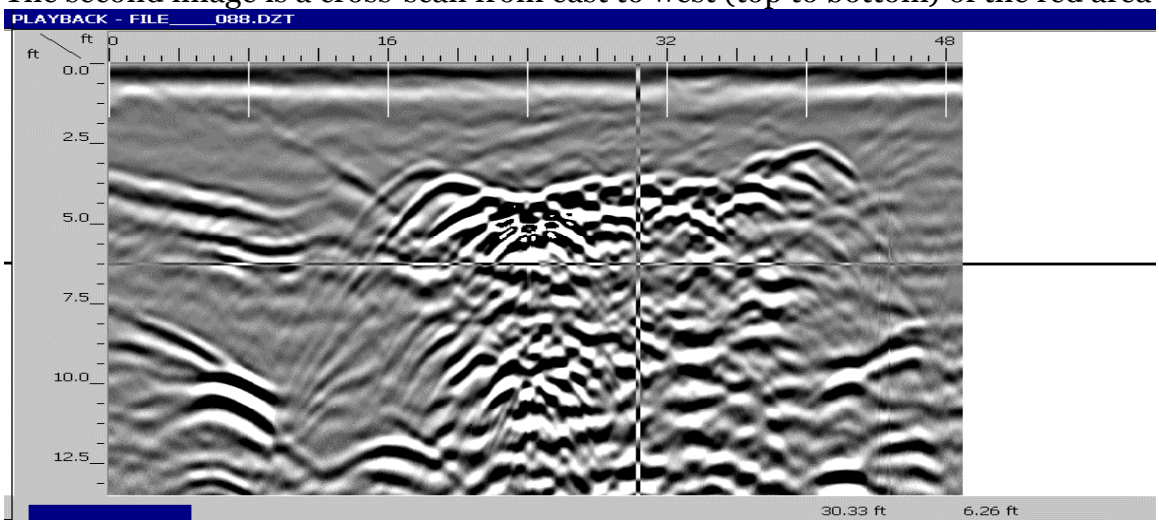


The above image shows the targeted area of interest revealed in the EM Profiler Survey. The area represented by the lighter blue, green, yellow, and red represent areas of interest. GPR of the area revealed subsurface metallic anomalies that coincide with this imagery. The higher (red) areas are believed to be concentrations of these subsurface materials. Two GPR images were provided below to show the GPR data received in the area.

The first image is a sweep of the entire area from north to south (left to right)



The second image is a cross-scan from east to west (top to bottom) of the red area



The EM Profiler survey contour map and the GPR data received confirm the suspicion of subsurface metallic anomalies in the area. Using GPR, in the field, I marked the identifiable boundary of the area in which the subsurface anomalies were present.

Thank you for choosing Utility Survey Corp. It was a pleasure working for you on this important project and I look forward to working for you again in the future.

If you have any questions, or require further information, please contact the office at 845-496-2550.

Sincerely,

Jose Tejada
Survey Technician

Certificate of Analysis

Revised Report - 11/6/2015 1:47:27 PM - See workorder comment section for explanation

Project Name:	**2015-RUSH 3-DAY TAT MALTA, NY**	Workorder:	**2103851**
Purchase Order:	**962015**	Workorder ID:	**CBR004|GE MRFA 154035-04000000**

Dear Mr. Neuman:

Enclosed are the analytical results for samples received by the laboratory on Saturday, October 24, 2015.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Mrs. Vicki A. Forney (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

ALS Spring City: 10 Riverside Drive, Spring City, PA 19475 610-948-4903

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

Vicki Forney

SAMPLE SUMMARY

Workorder: 2103851 CBR004|GE MRFA 154035-04000000

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
-- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits

PROJECT SUMMARY

Workorder: 2103851 CBR004|GE MRFA 154035-04000000

Sample Comments

Lab ID: 2103851001 **Sample ID:** CS-LF010 **Sample Type:** SAMPLE

This sample was analyzed at a dilution in the 8082 PCB analysis due to sample matrix interference. Reporting limits were adjusted accordingly.
This sample was analyzed at a dilution in the 8081 Pesticide analysis due to sample matrix interference. Reporting limits were adjusted accordingly.

Lab ID: 2103851004 **Sample ID:** CS-LF006 **Sample Type:** SAMPLE

One or more of the matrix spike compounds for the EPA 8270 analysis were recovered outside of the quality control limits due to sample matrix interferences. The LCS sample associated to this sample was within control limits.

PARAMETER QUALIFIERS

Lab ID	#	Sample ID	Analytical Method	Analyte
2103851001	1	CS-LF010	SW846 8260C	2-Butanone
The QC sample type LCS for method SW846 8260C was outside the control limits for the analyte 2-Butanone. The % Recovery was reported as 60.4 and the control limits were 64 to 148.				
2103851001	2	CS-LF010	SW846 8260C	2-Hexanone
The QC sample type LCS for method SW846 8260C was outside the control limits for the analyte 2-Hexanone. The % Recovery was reported as 60.3 and the control limits were 62 to 147.				
2103851001	3	CS-LF010	SW846 1030	Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2103851002	1	CS-LF008	SW846 8260C	2-Butanone
The QC sample type LCS for method SW846 8260C was outside the control limits for the analyte 2-Butanone. The % Recovery was reported as 60.4 and the control limits were 64 to 148.				
2103851002	2	CS-LF008	SW846 8260C	2-Hexanone
The QC sample type LCS for method SW846 8260C was outside the control limits for the analyte 2-Hexanone. The % Recovery was reported as 60.3 and the control limits were 62 to 147.				
2103851002	3	CS-LF008	SW846 1030	Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2103851003	1	CS-LF009	SW846 8260C	2-Butanone
The QC sample type LCS for method SW846 8260C was outside the control limits for the analyte 2-Butanone. The % Recovery was reported as 60.4 and the control limits were 64 to 148.				
2103851003	2	CS-LF009	SW846 8260C	2-Hexanone
The QC sample type LCS for method SW846 8260C was outside the control limits for the analyte 2-Hexanone. The % Recovery was reported as 60.3 and the control limits were 62 to 147.				
2103851003	3	CS-LF009	SW846 1030	Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2103851004	1	CS-LF006	SW846 8082A	Aroclor-1016
The QC sample type MSD for method SW846 8082A was outside the control limits for the analyte Aroclor-1016. The RPD was reported as 40.2 and the upper control limit is 40.				
2103851004	2	CS-LF006	SW846 8082A	Aroclor-1260
The QC sample type MSD for method SW846 8082A was outside the control limits for the analyte Aroclor-1260. The RPD was reported as 41.6 and the upper control limit is 40.				
2103851004	3	CS-LF006	SW846 6010C	Magnesium, Total
The recovery of the Matrix Spike (MS) associated to this analyte was outside of the established control limits. The sample was post-digestion spiked, and this matrix spike was within acceptable recovery limits.				
2103851004	48	CS-LF006	SW846 8260C	Freon 113
The QC sample type MS for method SW846 8260C was outside the control limits for the analyte Freon 113. The % Recovery was reported as 145 and the control limits were 42 to 109.				
2103851004	49	CS-LF006	SW846 8260C	Freon 113
The QC sample type MSD for method SW846 8260C was outside the control limits for the analyte Freon 113. The % Recovery was reported as 130 and the control limits were 42 to 109.				
2103851004	50	CS-LF006	SW846 8260C	trans-1,2-Dichloroethene
The QC sample type MS for method SW846 8260C was outside the control limits for the analyte trans-1,2-Dichloroethene. The % Recovery was reported as 138 and the control limits were 69 to 130.				
2103851004	51	CS-LF006	SW846 8260C	Cyclohexane
The QC sample type MS for method SW846 8260C was outside the control limits for the analyte Cyclohexane. The % Recovery was reported as 153 and the control limits were 63 to 151.				
2103851004	52	CS-LF006	SW846 8260C	1,2,4-Trichlorobenzene
The QC sample type MS for method SW846 8260C was outside the control limits for the analyte 1,2,4-Trichlorobenzene. The % Recovery was reported as 223 and the control limits were 61 to 134.				

ANALYTICAL RESULTS

2103851004	53	CS-LF006	SW846 8260C	1,2,4-Trichlorobenzene
The QC sample type MSD for method SW846 8260C was outside the control limits for the analyte 1,2,4-Trichlorobenzene. The % Recovery was reported as 210 and the control limits were 61 to 134.				
2103851004	54	CS-LF006	SW846 8260C	1,2,3-Trichlorobenzene
The QC sample type MS for method SW846 8260C was outside the control limits for the analyte 1,2,3-Trichlorobenzene. The % Recovery was reported as 324 and the control limits were 41 to 143.				
2103851004	55	CS-LF006	SW846 8260C	1,2,3-Trichlorobenzene
The QC sample type MSD for method SW846 8260C was outside the control limits for the analyte 1,2,3-Trichlorobenzene. The % Recovery was reported as 324 and the control limits were 41 to 143.				
2103851004	56	CS-LF006	SW846 8260C	Methyl cyclohexane
The QC sample type MS for method SW846 8260C was outside the control limits for the analyte Methyl cyclohexane. The % Recovery was reported as 141 and the control limits were 70 to 130.				
2103851004	57	CS-LF006	SW846 8260C	Methyl cyclohexane
The QC sample type MSD for method SW846 8260C was outside the control limits for the analyte Methyl cyclohexane. The % Recovery was reported as 140 and the control limits were 70 to 130.				
2103851004	58	CS-LF006	SW846 8260C	Methyl acetate
The QC sample type MS for method SW846 8260C was outside the control limits for the analyte Methyl acetate. The % Recovery was reported as 136 and the control limits were 70 to 130.				
2103851004	59	CS-LF006	SW846 1030	Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2103851005	7	CS-LF005	SW846 1030	Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2103851006	7	CS-LF011	SW846 1030	Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2103851007	1	CS-LF004	SW846 8260C	2-Butanone
The QC sample type LCS for method SW846 8260C was outside the control limits for the analyte 2-Butanone. The % Recovery was reported as 60.4 and the control limits were 64 to 148.				
2103851007	2	CS-LF004	SW846 8260C	2-Hexanone
The QC sample type LCS for method SW846 8260C was outside the control limits for the analyte 2-Hexanone. The % Recovery was reported as 60.3 and the control limits were 62 to 147.				
2103851007	3	CS-LF004	SW846 1030	Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2103851008	7	CS-LF003	SW846 1030	Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2103851009	1	CS-LF007	SW846 8260C	2-Butanone
The QC sample type LCS for method SW846 8260C was outside the control limits for the analyte 2-Butanone. The % Recovery was reported as 60.4 and the control limits were 64 to 148.				
2103851009	2	CS-LF007	SW846 8260C	2-Hexanone
The QC sample type LCS for method SW846 8260C was outside the control limits for the analyte 2-Hexanone. The % Recovery was reported as 60.3 and the control limits were 62 to 147.				
2103851009	3	CS-LF007	SW846 1030	Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)

Field Notes

Field Activity Daily Log

DATE	05	23	16
NO.			
SHEET	1	OF	1

Project Name: GE-Luther Forest Drum Excavation
Project No. 154035/155446 GE LF
Field Activity Subject: Site Orientation / Site Setup
Description of Daily Activities and Events:

0700 - Onsite at southgate but told to go to Stonebreak gate and Projects Building by the security gaurd.
0830 - Meet Hepaco and Joe Naselli (JN) outside south gate and mob onsite; wait for Brian Newman (BN) and EPA at gravel parking lot (staging); mob as group to Projects building for badges and safety orientation with GE security. A.N.
~~0900~~ -
0900 - Back at staging; go through HASP and JSA during tailgate/safety meeting.
1000 - Start site walk with Hepaco to walk through logistics.
1040 - Greg McElroy (GM) onsite; BN take through badging process.
1200 - Lunch break, all offsite.
1300 - End lunch, back onsite. Start moving equipment down to excavation area; start grubbing with chainsaw/excavator; remove section of fence for support zone/decon line;
1540 - Hepaco secures fence with straps to pull closed; Hepacco offsite
1545 - Security informs us that fence security is not adequate; we add sheet of plywood to gap and secure with two additional straps that cannot be reached from outside fence
1600 - All offsite

A.N.

Field Activity Subject: Site setup

Description of Daily Activities and Events:

0800 - Onsite with Greg McElroy (GM), Joe Naselli (JS), Weston, and Hepaco; tailgate/safety meeting; discuss securing fence better for security.
0845 - Resume site setup operations including brush clearing and staging area/support zone.
1130 - Hepaco offsite for lunch.
1230 - Hepaco back onsite; mob chipper, which arrived during lunch, down to excavation; do JSA for chipping and start chipping of brush.
1350 - Issues with chipper, stop to try and repair possible jam.
1430 - Brian Neuman (BN) onsite, talk about status and wait for Kris Goodman
1500 - Kris onsite, talk about logistics and issues/plan moving forward; start laying down decon area and closing fence gap.
1645 - Call security to inspect fence closure and to lock double-gate.
1710 - All personnel offsite; Gate closed and fence given the okay by David. B. with GF Security

Field Activity Subject: Drum excavation/sampling

Description of Daily Activities and Events:

0600 - Onsite with Hepaco, Weston, Joe Naselli (JN), & Brian Newmann (BN),

0630 - Tailgate/safety meeting; setup for excavation/sampling; go through JSA and breathing air checklist.
- Start excavations - continue from SE corner of anomaly.
- John Uruskyj with GE onsite

0840 - Potential ~~off~~ cylinder while digging - uncovered further confirms it is a drum.

0910 - Sample sludge from LF012 (CS-LF012) - not enough material for EPA split sample.

1010 - Take perimeter PID measurements due to odor from uncovered leaking drum - 0.0 to 0.1 ppm

1015 - Two liquid drums uncovered one leaking LF013 and LF014 (leaking).

1055 - Crew exits EZ, doff Level B/decon; prep for taking lunch

~~1130~~ 1115 AM - Stop for lunch

1215 - Setup for cleaning up soil from leaking drum; pack samples and fill out COC for CS-LF012.

1330 - Offsite to pick up liquid sample bottles in Albany; BN will transfer sample cooler to carrier at 1400.

1410 - Bottles not available yet; head back to office to print/finish paperwork

- End Day

5/27/16

06:00 on site.
06:15 tailgate H&S meeting
07:00 Hepaco gets ready to start excavating
07:15 Inspect breathing system. Perform checklist
07:30 start excavation
8:00 GE John on site
8:40 Discover drum (LF012) in excavation
8:50 Mike Relyea (LF) on site. Drum exposed, assessed. contents appear empty with some residual soil. Contents sampled
0920 Drum LF012 put into overpack and secured.
0930 Ground crew leaves EZ and decons SCBA bottles I & II are spent
10:15 Discover drum (LF-013) and drum (LF-014). Remove soil around drums LF013 is leaking green fluid. Mike Relyea leaves site
10:45 John (GE) leaves site. Perform assessment on drums LF012 & LF013 Place drums in overpacks. Plan on sampling liquid from drum LF013 on Tuesday
10:55 Ground crew leaves EZ and decons. Excavator removes impacted soil from leaking drum LF013
11:05 Exc operator leaves EZ and decons.
11:15-12:15 lunch
12:15 Change cascade air bottle on Excavator. Inspect bottle mount welds & bolts. Check hoses. Everything O.K. and secure
12:45 Excavator operator enters EZ to excavate impacted soil from leaking drum LF014. Approximately 1/2 cubic yard of soil generated and temporarily stockpiled on poly sheeting. Pile covered
1:15 Hepaco crew decon's and leaves EZ
Start cleaning up site
2:00 Site secure. Leave site

Field Activity Subject:

Description of Daily Activities and Events:

07:00 - onsite

07:00 - 08:30 Safety talk. Breathing air checklist & Cascade air bottle mount inspected. New Hepaco employee (Cameron Carter) onsite. Check Cameron's certs. Everything ok.

09:00 HEPACO starts excavation

10:35 Drum LF015 discovered. Ground crew suits up

10:50 Ground crew enters to perform assessment. Drum empty but soil has strong odor and PID readings of 38.4 ppm and 28.2ppm. LF015 overpacked

11:21 Another drum (LF016) is discovered. Impacted soil being placed on poly as new drum is exposed

11:40 Drum LF016 has initial assessment performed. Appears empty. Drum LF016 put into overpack for security until it is opened and sampled later today.

11:55 Poly bags encountered in excavation. Ground crew running out of air.

12:00 Ground crew decons and exits EZ. Will assess bags after lunch.

12:30 - 1:06 lunch

1:30 HEPACO supervisor Ed L. states that the poly bags are just buried poly sheeting Excavator operator going to excavate the poly and any impacted soil Ground crew getting ready to enter the EZ to sample drum LF014. Cascade bottle mount on excavator checked and cleared.

2:30 Discover drum LF-017 (empty drum carcass). Hepaco begins sampling liquid from LF014

3:40 Ground crew finish sampling liquid from drum LF014. Decon & leave area HEPACO starts cleaning up site.

4:00 David from security comes out to inspect fence closure. David oks the closure

4:25 site secure. Leave site

Description of Daily Activities and Events:

0700 - Onsite with Joe Nasell: (JN), Weston, and Hepaco; waiting on all of Hepaco crew to show up.

0730 - Safety meeting / tailgate; go over gameplan for the day; mob to excavation and setup for excavation / sampling.

0830 - Bonnie (EPA) onsite; Hepaco starts to unpack drums for puncture (LF013, 15, and 16)

- Issues encountered with how spike is mounted (keeps rotating); continue excavation and wait to puncture drums once a better process is developed. A.N.
- ~~LF017 removed discovered~~

1330 - LF018 discovered

- Drum carcasses and 5-gal pail debris discovered in single general area and labeled collectively as LF019
- LF020 discovered; may contain enough solids for sample
- Strong odors come sporadically from excavation area; can not identify definite source; PID max = 2.2ppm in support zone
- Likely stainless steel drum discovered with Acetone hand-written on top lid.

1400 - Start sampling LF020

1440 - Sample collection complete for ~~EF~~ A.N. CS-LF020; only enough volume for one sludge set; pack samples and prepare COC.

1500 - Offsite to deliver sample to ALS in Albany

1530 - Drop off samples with Dina (ALS); collect 2 empty small coolers

1600 - End Day A.N.

Description of Daily Activities and Events:

07:00 Arrive on site.

07:30 HEPACO on site

07:30 - 08:30 Daily tool box safety talk. Perform breathing air checklist & cascade bottle mount inspection.

08:30 HEPACO gets ready to enter EZ

09:00 - 10:00 HEPAC mounts brass drum punch to excavator bucket and plans to punch holes in drums LF012, LF013, LF015 & LF016. Mount doesn't hold. HEPACO is going to come up with a different plan and switch tasks to digging.

10:00 HEPACO begins excavation.

10:20 LF018 discovered and removed. This is a crushed drum carcass.

Air test

	O_2	H_2S	CO_2	LEL
11:00 W92172 - cascade bottle	20.9	0	0	0

check air bottle paperwork and bottle mounts on excavator

11:30 - 12:30 lunch

1:00 HEPACO provides paperwork from B-LAND for new air bottles

1:30 Ground crew enters to assess LF018, LF019 & LF020

2:00 Discover drum LF021. Very strong mercaptin type odor. clear area. Ground crew sent in w/ Level B. Drum is empty. LF021 is a stainless steel drum labeled "Acetone From Primevent" see photo. Crew also sampling contents of drum LF020

2:30 HEPACO stops digging for the day.

Project Name: MRFA Drum Excavation
Project No. 154035 / 155446 GE LF
Field Activity Subject: Drum Excavation and Sampling
Description of Daily Activities and Events:

0700 - Onsite with Weston and Hepaco; Joe Naselli (JN) offsite until afternoon; tailgate/safety meeting; discuss Stainless/Acetone labled drum found yesterday; need to get larger overpack (like a plastic 95 gal) for the stainless drum LF021.

0830 - Run through breathing air checklist, all clear; resume excavation; stockpile/consolidate carcasses and pails for LF019 area; prepare to sample LF022

0900 - LF023 discovered, liquid likely in drum; bung cracked on LF021 results in a hiss and spike in LEL to 100% - shut down equipment and all personel exit EZ and CRZ to support zone. Wait for LF021 to bleed off pressure and for LEL to dissipate.

0950 - Talked with JN and Greg McElroy (GM) about LF021 - Hepaco needs to figure out brass punch mount so that drum can be opened with excavator only

1020 - Brass punch remounted and team reenters to position LF021 for puncture. Hepaco notices side bung that was cracked is now popped off entirely. Vapor observed exiting bung; punch no longer necessary for LF021; leave LF021 to continue offgassing; start sampling of solids from LF022 @1030

1050 - LF022 sample collection complete @ 1100 (CS-LF022 and DUP1-SOIL); solids appear to be mostly soil - likely infiltrated sand.

1130 - Lunch

1230 - Resume excavation; JN onsite, go through tailgate/safety meeting and bring up to speed.

Description of Daily Activities and Events:

0700 on site

0730 - 0830 Tailgate H2S talk, perform breathing air checklist. Inspect cascade bottle mount on excavator. HEPACO installs cascade tank CW94068 that was filled on 6/1/16. Check bottle paperwork. Everything ok. Test air at mask - O_2 = 20.9, H_2S = 0ppm, CO_2 = 0ppm, LEL = 0ppm

0900 HEPACO mounts brass punch to excavator bucket. EO enters EZ with excavator and punches holes in drums LF015, LF016.

0930 Ground crew enters EZ to verify contents of punctured drums and to sample contents of LF021. Drum LF024 discovered and pulled out of ground.

1030 Ground crew assesses and samples LF024

1130 HEPACO decons + exits EZ.

1130 - 1230 lunch

1300 Crew enters EZ. Discover drum LF025 (half drum). Drum is empty with a little dirt inside. Dirt placed in soil stockpile and drum placed in empty drum pile.

1330 Drum LF026 discovered. HEPACO assesses drum and finds it has a greasy oily liquid inside.

2000 HEPACO collects sample of LF026 liquid. Only enough to fill 1 Amber + VOA

2120 HEPACO crew decons + exits EZ

2130 HEPACO starts to clean up site.

2145 Call security to have them inspect fence.

3000 Security arrives and checks perimeter fence. All ok.

3130 leave site.

Field Activity Daily Log

DATE	06	07	16
NO.			
SHEET	1	OF	2

Project Name: MRFA Drum Excavation
Project No. 154035/155446 GE LF
Field Activity Subject: Drum excavation and sampling
Description of Daily Activities and Events:

0700 - onsite with Joe Nasell (JN), Hepaco, and weston.
0730 - tailgate/safety meeting, setup for work, mob down to excavation
0830 - Breathing air checklist, start entry to finish inspecting drums discovered yesterday; Brian Neumann (BN) onsite; JN offsite for other work.
0900 - LF037, 38, and 39 have sufficient liquid for sampling
0910 - LF042 pulled and is leaking; team goes in to immediately overpack; strong odor downwind.
1000 - Discovered what looks like small gas cylinders with attached valve and part of line it may have been attached to; pictures taken and personell exit excavation to assess; Hepaco goes to Ace Hardware for buckets (5-gal) to contain the "cylinders".
1030 - Hepaco reenters to sample LF037 (with split for EPA), LF038, and LF039.
1040 - Hepaco back onsite with 5-gal buckets; continue unearthing cylinders; more than 15 discovered so far, several sizes but otherwise they look the same; some are clearly drilled all the way through (i.e. empty); 1-gal buckets with some weight to them discovered (x2).
1100 - Start sampling CS-LF037, 38, and 39. (CS-LF037@1100) and EPA split
1200 - Sample complete for LF037, may not be enough volume for LF038 and haven't started LF039. Break for lunch. BN offsite.
1300 - Hepaco and JN back onsite; resume sampling LF038 and LF039 and start containerizing cylinders (empty/drilled bulked as LF04 and undrilled/unknown contents as LF04).
1430 - Sampling complete for LF037 (CS-LF037@1100), LF038 (CS-LF038@1330),

Description of Daily Activities and Events:

0700 Arrive on site
0730 Tailgate HASP
0800 Brian Neuman on site. HEPACO prepares to start
0830 I leave site to go to another project bid walk. Brian Neuman is acting supervisor
1300 I arrive back on site, Brian Neumann leaves site. Crew discovered approximately 30 small stainless steel cylinders while I was away. HEPACO is currently packing the cylinders into 5-gallon DOT approved buckets. 20 cylinders that have holes piercing through are ID'd as LF046. 14 cylinder that are intact and sealed are given the ID of LF047. HEPACO also discovered TWO 8 1-gallon pails with a gray chalky solid inside and drums LF037, LF038, LF039, LF040, LF041, LF042, LF043, LF044, LF045, LF048 and LF049.
1330 HEPACO samples LF038 & LF039
1430 HEPACO begins exiting the work area & decon'ing due to approaching thunder storm
1500 Security checks fence. All ok.
1530 leave site.

Project Name: MRFA Drum Excavation
Project No. 154035/155446 GE LF
Field Activity Subject: Drum excavation and sampling
Description of Daily Activities and Events:

0700 - Pick up additional liquid sample containers from ALS in Albany and mob to site.
0725 - Onsite with Joe Naselli (JN), Weston, and Hepaco. Safety stand down until after 8 am meeting concerning cylinders found yesterday
0945 - Decision made to continue with caution and to stop work if needed pending additional discovery of cylinders. Tailgate/safety meeting; reinforce authority to stop work for any safety concern.
1015 - Setup and resume excavations. Prep sample bottles for LF044 (liquid).
1215 - Sample collection of LF044 complete (CS-LF044@1150); break for lunch.
1315 - Excavation limits have been reached, start regrading/backfilling and cleanup operations; pack sample for courier drop-off.
1500 - Drop off sample with courier and inform Dina of one more "acetone" sample.
1515 - End Day

Description of Daily Activities and Events:

0700 - Arrive on site
0715 - on safety stand down due to cylinders. Discuss details of HEPACO's findings with HEPACO. Discuss potential hazards and plan moving forward.
0800 - Brian Newman to have meeting with clients.
0900 - Brian Newman calls to tell me that we can move forward with excavation. He says to leave the cylinders already discovered, alone until further notice. Speak to Greg McElroy. Greg is ok with work continuing as long as HEPACO is comfortable and the work plan is followed.
0930 - Discuss plan forward with HEPACO. ~~They~~ Ed & Max both say they are comfortable and prepared to continue. Ground crew will not handle any cylinders going forward. HEPACO to communicate their findings in real time.
10:00 - HEPACO prepares to ~~ete~~ enter EZ and continue digging. Discover drums LF050, LF051, LF052.
12:30-1:30 lunch
1:30 HEPACO enters work area and continues excavation. Discover drums LF053, LF054 & LF055.
2:30 HEPACO decons and exits EZ.
3:00 HEPACO starts cleaning up site. Fence secure
3:15 Security checks fence. All ok.
3:30 leave site.

Field Activity Daily Log

DATE	09	14	16
NO.	Wednesday		
SHEET	1	OF	1

Project Name: MRFA Project No. 154035

Field Activity Subject: Soil Borings/Sampling

Description of Daily Activities and Events:

0730 – Onsite with Cascade and Brian Neumann; EPA and Weston onsite; proceed to Admin 1 for badges

0800 – Tailgate/safety meeting and JSA; walk site and setup for drilling/sampling; Take EQ2-Water rinse sample at 0945 from drillstoc

1000 – ERS contractor for EPA onsite to pick up cylinders; start drilling/sampling SB-1. ERS offsite at ~1100

1230 – Boring SB-1 complete; samples collected at:
SB-1 (0ft-4ft) @1030
SB-1 (4ft-8ft) @1130 + EPA split sample
SB-1 (8ft-12ft) @1200
Setup for water sample due to PID ~20ppm during boring; water first encountered at ~14' bgs; drillers take lunch while water equilibrates in drill pipe.

1310 – Start sampling groundwater including split for EPA (GW-SB-1@1810); Parameters for the grab groundwater sample are:
Temp: 17.26°C pH: 5.14 Sp. Cond: 0.343 mS/cm
ORP: 308.2 mV DO: 4.08 mg/L Turb: 746.8 NTU

1445 – Sampling complete, not enough time to start new boring; pack up and secure site.

1500 – Cascade offsite; complete paperwork/COCs and pack samples

1600 – Mob to ALS service center in Albany to drop off samples.

1700 – Back at office, unload truck, finish paperwork

1730 – End Day

A.N.

Field Activity Daily Log

DATE	09	15	16
NO.	Thursday		
SHEET	1	OF	2

Project Name: MRFA Project No. 154035

Field Activity Subject: Soil Borings/Sampling

Description of Daily Activities and Events:

0700 - Load truck, get ice for samples, mob to site.
0730 - Onsite with Cascade and Mike from Weston (EPA rep); tailgate/safety meeting; setup for drilling.
0830 - Start drilling/sampling at SB-2
~~1330~~ AM. 1010 - Boring SB-2 complete; samples collected at:
SB-2 (0ft-4ft) @ 0910 + DUP2-SOIL
SB-2 (4ft-8ft) @ 0930
SB-2 (8ft-12ft) @ 0950 + EPA Split Sample
Setup for water sample due to elevated PID in soils; water first encountered at ~14' bgs
1020 - Start sampling groundwater (GW-SB-2@1020 + MS/MSD); parameters for grab sample:
Temp: 15.71°C pH: 7.32 5.93 Sp.Cond: 0.167 mS/cm
ORP: 99.5 mV DO: ~~3.71~~ 3.41 mg/L Turb: 7.7 NTU
1300 - Start drilling/Sampling SB-3
1420 - Boring SB-3 complete; samples collected at:
SB-3 (0ft-4ft) @ 1330 + EPA Split Sample
SB-3 (4ft-8ft) @ 1345
SB-3 (8ft-12ft) @ 1400 + EPA Split Sample
1430 - Start sampling groundwater (GW-SB-3@1430 + DUP2-WATER); water encountered at ~14' bgs; parameters for grab sample:
Temp: 16.08°C pH: 7.15 Sp.Cond: 0.112 mS/cm
ORP: -20.1 mV DO: 3.71 mg/L Turb: 7.0 NTU
1530 - Soil/Water/PPE drummed and labeled; Cascade and Weston offsite; re-secure drum area, pack samples for shipment, and prepare COCs.
1720 - Leave site; mob to ~~Albany~~ AM. FedEx in Albany to drop off samples

9-14-16

Step-back 5 X 5

1. Step Though the Task	Yes	No
Is the task new to you?		✓
Is there potential for uncontrolled movement of equipment?		✓
Is there restricted access to and around the work area?	✓	
Has the job or job conditions changed from what was originally planned?		✓
Are there any injury hazards present for which you don't have the adequate controls? **If yes STOP and update the JSA before proceeding.**		✓
On the back of this card identify the hazards of this task and their controls. Has this step been completed?	✓	
2. Hazard Checklist	**Yes**	**No**
Do you have and know the plan of action in case of an emergency?	✓	
Have you read and do you understand the JSA?	✓	
Are your tools and equipment in good condition and correct for the task?	✓	
Have you read and do you understand the requirements of the Work Permits? (if not applicable mark NA)	✓	
Can the task you are about to begin proceed safety? **If no STOP and contact your supervisor.**	✓	
On completion have you left a hazard for those following you? **If yes STOP and contact your supervisor.**		✓
Review the job on an ongoing basis – stop work and reassess if conditions change.	—	

CMS-710-05-FM-01706 (Front) 30 JUN 2010

Has the job or job conditions changed from what was originally planned?		✓
Are there any injury hazards present for which you don't have the adequate controls? **If yes STOP and update the JSA before proceeding.**		✓
On the back of this card identify the hazards of this task and their controls. Has this step been completed?	✓	
2. *Hazard Checklist*	**Yes**	**No**
Do you have and know the plan of action in case of an emergency?	✓	
Have you read and do you understand the JSA?	✓	
Are your tools and equipment in good condition and correct for the task?	✓	
Have you read and do you understand the requirements of the Work Permits? (if not applicable mark NA)	✓	
Can the task you are about to begin proceed safety? **If no STOP and contact your supervisor.**	✓	
On completion have you left a hazard for those following you? **If yes STOP and contact your supervisor.**		✓
Review the job on an ongoing basis – stop work and reassess if conditions change.	✓	

CMS-710-05-FM-01706 (Front) 30 JUN 2010

Step-back 5 X 5

HAZARD	CONTROL
1. Site Contaminants (VOCs)	PPE / air monitoring
2. Dehydration	Drink water
3. Heavy Equipment (rig)	Qualified Operator
4. Noise (rig)	Earplugs
5. Bugs / Ticks	Check clothes / avoid brush
6. Slips / Trips / Falls	Proper footing
7.	
8.	
9.	

Job Safety Analysis (JSA)

Date: 9-14-16 to 9-15-16

Pre-Job Preparation	Safety Access / Location	Employee Authorization to STOP Work
1. Get Permit for Job 2. Fill out JSA 3. Review JSA (EVERYONE) 4. Sign JSA (EVERYONE)	Eye Wash / Safety Shower: NA Wind Direction: Evacuation Route: Road up to South Gate gravel lot Assembly Point: South gate gravel lot	I have been given authorization, without fear of reprimand or retaliation, to immediately **STOP** any work activity that presents a danger to me, my co-worker or the public; get involved, question and rectify any situation that is identified as not being in compliance with our safety and health policies; to report any unsafe conditions or acts to supervision and question any activity that involves violation of established Safety and Health policies.

Job Tasks: (What are you doing?)	Potential Hazards:	Recommended Action or Procedure to eliminate / mitigate Hazards
Drilling and soil/groundwater sampling	Slips/trips/falls; site contaminants (VOCs); rain/lightning; heavy equipment (drill rig); noise (drill rigs); pinch points; heavy objects; bugs/ticks	Good Housekeeping; proper footing; proper PPE; drink water; be aware of rain/lightning; check for ticks; air monitoring

Job Close Out

Any incidents / Injuries / Near miss / STOP work reported? List:	**Job Audited** Time: Supervisor / Auditor Signature:	**Recommendations:**

Before starting work: *Is this the SAFEST way to do this JOB?*

"I will not put myself or let my co-workers perform any task that I would not allow my son or daughter in, on or around."

Consider the following and check the items which apply to the job, then review with the work crew.

Job Safety Analysis (JSA)

PERMITS
- ☐ Excavation / Trench ("One Call" made)
- ☐ Cold Work
- ☐ Hot Work
- ☐ Entry Permit / Confined Space
- ☐ Line Breaking
- ☐ Signed Off When Complete
- ☐ LO/TO
- ☐ Other

ACCESS
- ☐ Scaffold (properly inspected ____)
- ☐ Ladder (Tied off ____)
- ☐ Man lift (inspected)
- ☐ Personnel Basket (inspected & approved ____)
- ☐ Operator Training

WELDING
- ☐ Flash burns
- ☐ Combustibles
- ☐ Spark Containment
- ☐ Shields
- ☐ Grounding
- ☐ Fire Extinguisher
- ☐ Water Hose
- ☐ Fire Blanket
- ☐ Fire Watch
- ☐ Leads routed overhead 7' / not in walk way
- ☐ Sewer Covers

OVERHEAD WORK
- ☐ Barricades
- ☐ Hole Cover
- ☐ Signs
- ☐ Handrail

Worksite Stretches:
- Before shift / Pre-task / End of shift
- Stretch to a point where you feel a mild tension and relax as you hold the stretch.
- **Stretches should be held for 10-30 seconds.**
- Always stretch within your comfort limits, never to the point of pain.

HAZARDS (ENVIRONMENTAL)
- ☐ Electrical Shock
- ☒ Heat Stress
- ☒ Heavy Objects
- ☐ Hot / Cold Surf. or Mat.
- ☐ Inadequate Lighting
- ☐ Line Breaking –
- ☐ **Check List attached**
- ☐ Noise
- ☐ Sharp Objects
- ☐ Other
- ☐ Poor Access / Egress

TOOLS
- ☒ Proper Tools for the Job
- ☒ Good Tool Condition
- ☐ Qualifications
- ☐ Current Inspection
- ☐ Tool Tethers
- ☐ Tool Lanyards

ELECTRICAL
- ☐ Locked & Tagged out
- ☐ Try Start / Stop Switch
- ☐ GFCI Test
- ☐ Assured Grounding
- ☐ Extension Cord Inspection

Certificate of Analysis

Project Name:	**2016-MALTA NY SITE-WASTE**	Workorder:	**2147287**
Purchase Order:		Workorder ID:	**CBR012|MaltaRocketFuelArea/154**

Dear Mr. Neuman:

Enclosed are the analytical results for samples received by the laboratory on Saturday, May 28, 2016.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Mrs. Vicki A. Forney (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

ALS Spring City: 10 Riverside Drive, Spring City, PA 19475 610-948-4903

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

Vicki Forney

Mrs. Vicki A. Forney

SAMPLE SUMMARY

Workorder: 2147287 CBR012|MaltaRocketFuelArea/154

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
-- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
-- For microbiological analyses, the "Prepared" value is the date/time into the incurbator and the "Analyzed" value is the date/time out the incubator.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits

PROJECT SUMMARY

Workorder: 2147287 CBR012|MaltaRocketFuelArea/154

Sample Comments

Lab ID: 2147287001 **Sample ID:** EQ 1-Water **Sample Type:** SAMPLE

This sample was analyzed at a dilution in the 8081 Pesticide analysis due to sample matrix interference. Reporting limits were adjusted accordingly.
Methods for the analysis of volatile organics require that the sample be preserved to a pH less than 2 using HCl. This sample had a pH greater than 2 when received by the lab.

Lab ID: 2147287002 **Sample ID:** Trip Blank **Sample Type:** SAMPLE

Methods for the analysis of volatile organics require that the sample be preserved to a pH less than 2 using HCl. This sample had a pH greater than 2 when received by the lab.

PARAMETER QUALIFIERS

Lab ID	#	Sample ID	Analytical Method	Analyte
2147287001	1	EQ 1-Water	SW846 7196A	Hexavalent Chromium
Analyte was analyzed past the 24 hour holding time.				
2147287001	2	EQ 1-Water	SW846 9040C	Corrosivity as pH
The corrosivity analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.

Latham, NY 12110

Certificate of Analysis

Project Name:	**2016-MALTA NY SITE-WASTE**	Workorder:	**2147286**
Purchase Order:		Workorder ID:	**CBR006|Malta Rocket Fuel Area**

Dear Mr. Neuman:

Enclosed are the analytical results for samples received by the laboratory on Saturday, May 28, 2016.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Mrs. Vicki A. Forney (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

ALS Spring City: 10 Riverside Drive, Spring City, PA 19475 610-948-4903

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

Vicki Forney

Mrs. Vicki A. Forney
Project Coordinator

SAMPLE SUMMARY

Workorder: 2147286 CBR006|Malta Rocket Fuel Area

Lab ID	Sample ID	Matrix	Date Collected	Date Received	Collected By
2147286001	CS-LF012	Solid	5/27/2016 09:10	5/28/2016 10:00	Collected by Client

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
-- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
-- For microbiological analyses, the "Prepared" value is the date/time into the incurbator and the "Analyzed" value is the date/time out the incubator.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits

PROJECT SUMMARY

Workorder: 2147286 CBR006|Malta Rocket Fuel Area

Sample Comments

Lab ID: 2147286001 **Sample ID:** CS-LF012 **Sample Type:** SAMPLE

This sample was analyzed at a dilution in the 8082 PCB analysis due to sample matrix interference. Reporting limits were adjusted accordingly.
This sample was analyzed at a dilution in the 8081 Pesticide analysis due to sample matrix interference. Reporting limits were adjusted accordingly.

PARAMETER QUALIFIERS

Lab ID	#	Sample ID	Analytical Method	Analyte
2147286001	1	CS-LF012	SW846 1030	Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2147286001	2	CS-LF012	SW846 8081B	gamma-BHC
The detection of this compound was confirmed on an alternate analytical column. The difference between the primary column and confirmation column was greater than 40% RPD.				
2147286001	3	CS-LF012	SW846 8260C	Methylene Chloride
The Method Blank for method SW846 8260C reported a value greater than the reporting level for the analyte Methylene Chloride.

Certificate of Analysis

Project Name:	**2016-MALTA NY SITE-WASTE**	Workorder:	**2147928**
Purchase Order:		Workorder ID:	**CBR008|MALTANYSITE-WASTECHAR**

Dear Mr. Neuman:

Enclosed are the analytical results for samples received by the laboratory on Wednesday, June 1, 2016.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Mrs. Vicki A. Forney (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

ALS Spring City: 10 Riverside Drive, Spring City, PA 19475 610-948-4903

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

Vicki Forney

Mrs. Vicki A. Forney
Project Coordinator

SAMPLE SUMMARY

Workorder: 2147928 CBR008|MALTANYSITE-WASTECHARA

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
-- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
-- For microbiological analyses, the "Prepared" value is the date/time into the incurbator and the "Analyzed" value is the date/time out the incubator.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits

PROJECT SUMMARY

Workorder: 2147928 CBR008|MALTANYSITE-WASTECHARA

Sample Comments

Lab ID: 2147928001 **Sample ID:** CS-LF014 **Sample Type:** SAMPLE

This sample was collected in a soil jar for the volatile analysis. The sample was prepared by Method 5035 after the 48-hour holding time.

PARAMETER QUALIFIERS

Lab ID	#	Sample ID	Analytical Method	Analyte
2147928001	1	CS-LF014	SW846 8270D	4-Chloroaniline
The QC sample type LCS for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 29.5 and the control limits were 50 to 200.				
2147928001	2	CS-LF014	SW846 8270D	4-Chloroaniline
The QC sample type LCSD for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 35.7 and the control limits were 50 to 200.				
2147928001	3	CS-LF014	SW846 8081B	Endrin
Method criteria requires continuing calibration verification (CCV) standards be less than or equal to 20% of the initial calibration for the 8081 analysis. This compound was biased low 27% in the bracketing CCV. Data for this compound may have been impacted.				
2147928001	4	CS-LF014	SW846 8081B	4,4'-DDT
Method criteria requires continuing calibration verification (CCV) standards be less than or equal to 20% of the initial calibration for the 8081 analysis. This compound was biased low 22% in the bracketing CCV. Data for this compound may have been impacted.				
2147928001	5	CS-LF014	SW846 8081B	Methoxychlor
Method criteria requires continuing calibration verification (CCV) standards be less than or equal to 20% of the initial calibration for the 8081 analysis. This compound was biased low 27% in the bracketing CCV. Data for this compound may have been impacted.				
2147928001	6	CS-LF014	SW-846 1010A	Flashpoint/Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2147928001	7	CS-LF014	SW-846 1010A	Flashpoint/Ignitability
Sample did not flash up to 200 degrees F				
2147928001	8	CS-LF014	SW846 9045D	Corrosivity as pH
The corrosivity analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.

Certificate of Analysis

Project Name:	**2016-MALTA NY SITE-WASTE**	Workorder:	**2147927**
Purchase Order:		Workorder ID:	**CBR007|MALTANYSITE-WASTECHAR**

Dear Mr. Neuman:

Enclosed are the analytical results for samples received by the laboratory on Wednesday, June 1, 2016.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Mrs. Vicki A. Forney (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

ALS Spring City: 10 Riverside Drive, Spring City, PA 19475 610-948-4903

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

Vicki Forney

Mrs. Vicki A. Forney
Project Coordinator

SAMPLE SUMMARY

Workorder: 2147927 CBR007|MALTANYSITE-WASTECHARA

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
-- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
-- For microbiological analyses, the "Prepared" value is the date/time into the incurbator and the "Analyzed" value is the date/time out the incubator.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits

PROJECT SUMMARY

Workorder: 2147927 CBR007|MALTANYSITE-WASTECHARA

Sample Comments

Lab ID: 2147927001 **Sample ID:** DUP1-Water **Sample Type:** SAMPLE

This sample was collected in a soil jar for the volatile analysis. The sample was prepared by Method 5035 after the 48-hour holding time.

PARAMETER QUALIFIERS

Lab ID	#	Sample ID	Analytical Method	Analyte
2147927001	1	DUP1-Water	SW846 8270D	4-Chloroaniline
The QC sample type LCS for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 29.5 and the control limits were 50 to 200.				
2147927001	2	DUP1-Water	SW846 8270D	4-Chloroaniline
The QC sample type LCSD for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 35.7 and the control limits were 50 to 200.				
2147927001	3	DUP1-Water	SW-846 1010A	Flashpoint/Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2147927001	4	DUP1-Water	SW-846 1010A	Flashpoint/Ignitability
Sample did not flash up to 200 degrees F				
2147927001	5	DUP1-Water	SW846 9045D	Corrosivity as pH
The corrosivity analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.

Certificate of Analysis

Project Name:	**2016-MALTA NY SITE-WASTE**	Workorder:	**2147996**
Purchase Order:		Workorder ID:	**CBR009|MALTANYSITE-WASTECHAR**

Dear Mr. Neuman:

Enclosed are the analytical results for samples received by the laboratory on Thursday, June 2, 2016.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Mrs. Vicki A. Forney (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

ALS Spring City: 10 Riverside Drive, Spring City, PA 19475 610-948-4903

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

Vicki Forney

Mrs. Vicki A. Forney
Project Coordinator

SAMPLE SUMMARY

Workorder: 2147996 CBR009|MALTANYSITE-WASTECHARA

Lab ID	Sample ID	Matrix	Date Collected	Date Received	Collected By
2147996001	CS-LF020	Solid	6/1/2016 14:00	6/2/2016 08:57	Collected by Client

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
-- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
-- For microbiological analyses, the "Prepared" value is the date/time into the incurbator and the "Analyzed" value is the date/time out the incubator.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits

PROJECT SUMMARY

Workorder: 2147996 CBR009|MALTANYSITE-WASTECHARA

Sample Comments

Lab ID: 2147996001 **Sample ID:** CS-LF020 **Sample Type:** SAMPLE

This sample was analyzed at a dilution in the 8082 PCB analysis due to sample matrix interference. Reporting limits were adjusted accordingly.
This sample was analyzed at a dilution in the 8081 Pesticide analysis due to sample matrix interference. Reporting limits were adjusted accordingly.

PARAMETER QUALIFIERS

Lab ID	#	Sample ID	Analytical Method	Analyte
2147996001	1	CS-LF020	SW846 1030	Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2147996001	2	CS-LF020	SW846 8260C	Benzyl Chloride
The QC sample type LCS for method SW846 8260C was outside the control limits for the analyte Benzyl Chloride. The % Recovery was reported as 60 and the control limits were 67 to 125.

Certificate of Analysis

Project Name:	**2016-MALTA NY SITE-WASTE**	Workorder:	**2149112**
Purchase Order:		Workorder ID:	**CBR014|MaltaRocketFuelArea/154**

Dear Mr. Neuman:

Enclosed are the analytical results for samples received by the laboratory on Tuesday, June 7, 2016.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Mrs. Vicki A. Forney (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

ALS Spring City: 10 Riverside Drive, Spring City, PA 19475 610-948-4903

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

SAMPLE SUMMARY

Workorder: 2149112 CBR014|MaltaRocketFuelArea/154

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
-- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
-- For microbiological analyses, the "Prepared" value is the date/time into the incurbator and the "Analyzed" value is the date/time out the incubator.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits

PROJECT SUMMARY

Workorder: 2149112 CBR014|MaltaRocketFuelArea/154

Sample Comments

Lab ID: 2149112001 **Sample ID:** CS-LF021 **Sample Type:** SAMPLE

The GCMS volatiles analysis was performed at a dilution due to the level of target compounds.

Lab ID: 2149112002 **Sample ID:** TB5 **Sample Type:** SAMPLE

Methods for the analysis of volatile organics require that the sample be preserved to a pH less than 2 using HCl. This sample had a pH greater than 2 when received by the lab.

PARAMETER QUALIFIERS

Lab ID	#	Sample ID	Analytical Method	Analyte
2149112001	1	CS-LF021	SW846 8270D	3,3-Dichlorobenzidine
The QC sample type LCS for method SW846 8270D was outside the control limits for the analyte 3,3-Dichlorobenzidine. The % Recovery was reported as 41.1 and the control limits were 50 to 200.				
2149112001	2	CS-LF021	SW846 8270D	3,3-Dichlorobenzidine
The QC sample type LCSD for method SW846 8270D was outside the control limits for the analyte 3,3-Dichlorobenzidine. The % Recovery was reported as 38.6 and the control limits were 50 to 200.				
2149112001	3	CS-LF021	SW846 8270D	4-Chloroaniline
The QC sample type LCS for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 42.3 and the control limits were 50 to 200.				
2149112001	4	CS-LF021	SW846 8270D	4-Chloroaniline
The QC sample type LCSD for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 41.6 and the control limits were 50 to 200.				
2149112001	5	CS-LF021	SW-846 1010A	Flashpoint/Ignitability
According to Pa/USEPA regulations, this sample is considered to be ignitable. (Ref 40 CFR 261.21)				
2149112001	6	CS-LF021	SW-846 1010A	Flashpoint/Ignitability
Sample flashed at 82 degrees F (Acetone)				
2149112001	7	CS-LF021	SW846 9045D	Corrosivity as pH
The corrosivity analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.

Certificate of Analysis

Project Name:	**2016-MALTA NY SITE-WASTE**	Workorder:	**2148418**
Purchase Order:		Workorder ID:	**CBR010|2016-MALTA NY SITE-WAST**

Dear Mr. Neuman:

Enclosed are the analytical results for samples received by the laboratory on Friday, June 3, 2016.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Mrs. Vicki A. Forney (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

ALS Spring City: 10 Riverside Drive, Spring City, PA 19475 610-948-4903

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

Vicki Forney

Mrs. Vicki A. Forney
Project Coordinator

SAMPLE SUMMARY

Workorder: 2148418 CBR010|2016-MALTA NY SITE-WAST

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
-- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
-- For microbiological analyses, the "Prepared" value is the date/time into the incurbator and the "Analyzed" value is the date/time out the incubator.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits

PROJECT SUMMARY

Workorder: 2148418 CBR010|2016-MALTA NY SITE-WAST

Sample Comments

Lab ID: 2148418001 **Sample ID:** CS-LF022 **Sample Type:** SAMPLE

This sample was analyzed at a dilution in the 8081 Pesticide analysis due to sample matrix interference. Reporting limits were adjusted accordingly.

Lab ID: 2148418002 **Sample ID:** DUP1-SOIL **Sample Type:** SAMPLE

One of the GCMS semi-volatile internal standards were recovered at <50% in the sample duplicate. The sample and sample duplicate shared similar results indicating a sample matrix interference.
This sample was analyzed at a dilution in the 8081 Pesticide analysis due to sample matrix interference. Reporting limits were adjusted accordingly.
This sample was analyzed at a dilution in the 8151 Pesticide analysis due to sample matrix interference. Reporting limits were adjusted accordingly.

PARAMETER QUALIFIERS

Lab ID	#	Sample ID	Analytical Method	Analyte
2148418001	1	CS-LF022	SW846 8260C	Acrolein
The QC sample type LCSD for method SW846 8260C was outside the control limits for the analyte Acrolein. The % Recovery was reported as 8.7 and the control limits were 18 to 139.				
2148418001	2	CS-LF022	SW846 8260C	Methylene Chloride
The QC sample type LCS for method SW846 8260C was outside the control limits for the analyte Methylene Chloride. The % Recovery was reported as 160 and the control limits were 68 to 133.				
2148418001	3	CS-LF022	SW846 8260C	Methylene Chloride
The QC sample type LCSD for method SW846 8260C was outside the control limits for the analyte Methylene Chloride. The % Recovery was reported as 134 and the control limits were 68 to 133.				
2148418001	4	CS-LF022	SW846 8260C	Methyl acetate
The QC sample type LCS for method SW846 8260C was outside the control limits for the analyte Methyl acetate. The % Recovery was reported as 163 and the control limits were 70 to 130.				
2148418001	5	CS-LF022	SW846 8260C	Methyl acetate
The QC sample type LCSD for method SW846 8260C was outside the control limits for the analyte Methyl acetate. The % Recovery was reported as 424 and the control limits were 70 to 130.				
2148418001	6	CS-LF022	SW846 8260C	Methyl acetate
The QC sample type LCSD for method SW846 8260C was outside the control limits for the analyte Methyl acetate. The RPD was reported as 88.8 and the upper control limit is 40.				
2148418001	7	CS-LF022	SW846 8260C	Methyl t-Butyl Ether
The QC sample type LCS for method SW846 8260C was outside the control limits for the analyte Methyl t-Butyl Ether. The % Recovery was reported as 127 and the control limits were 70 to 118.				
2148418001	8	CS-LF022	SW846 8260C	Vinyl Acetate
The QC sample type LCSD for method SW846 8260C was outside the control limits for the analyte Vinyl Acetate. The % Recovery was reported as 23.1 and the control limits were 30 to 154.				
2148418001	9	CS-LF022	SW846 8260C	Ethyl Acetate
The QC sample type LCSD for method SW846 8260C was outside the control limits for the analyte Ethyl Acetate. The RPD was reported as 86.2 and the upper control limit is 40.				
2148418001	10	CS-LF022	SW846 8270D	Resorcinol
The QC sample type MS for method SW846 8270D was outside the control limits for the analyte Resorcinol. The % Recovery was reported as 0 and the control limits were 38 to 130.				
2148418001	11	CS-LF022	SW846 8270D	Aniline
The QC sample type MS for method SW846 8270D was outside the control limits for the analyte Aniline. The % Recovery was reported as 8.84 and the control limits were 39 to 110.				
2148418001	12	CS-LF022	SW846 8270D	Benzyl Alcohol
The QC sample type MS for method SW846 8270D was outside the control limits for the analyte Benzyl Alcohol. The % Recovery was reported as 0 and the control limits were 57 to 107.				
2148418001	13	CS-LF022	SW846 8270D	Nitrobenzene
The QC sample type MS for method SW846 8270D was outside the control limits for the analyte Nitrobenzene. The % Recovery was reported as 115 and the control limits were 53 to 108.				
2148418001	14	CS-LF022	SW846 8270D	bis(2-Chloroethoxy)methane
The QC sample type MS for method SW846 8270D was outside the control limits for the analyte bis(2-Chloroethoxy)methane. The % Recovery was reported as 109 and the control limits were 56 to 108.				
2148418001	15	CS-LF022	SW846 8270D	2,6-Dichlorophenol
The QC sample type MS for method SW846 8270D was outside the control limits for the analyte 2,6-Dichlorophenol. The % Recovery was reported as 47.8 and the control limits were 53 to 108.				
2148418001	16	CS-LF022	SW846 8270D	Hexachlorocyclopentadiene
The QC sample type MS for method SW846 8270D was outside the control limits for the analyte Hexachlorocyclopentadiene. The % Recovery was reported as 2.34 and the control limits were 33 to 109.				

ANALYTICAL RESULTS

Workorder: 2148418 CBR010|2016-MALTA NY SITE-WAST

2148418001	17	CS-LF022	SW846 8270D	2-Naphthylamine

The QC sample type MS for method SW846 8270D was outside the control limits for the analyte 2-Naphthylamine. The % Recovery was reported as .93 and the control limits were 15 to 116.

2148418001	18	CS-LF022	SW846 8270D	2-Methyl-4,6-dinitrophenol

The QC sample type MS for method SW846 8270D was outside the control limits for the analyte 2-Methyl-4,6-dinitrophenol. The % Recovery was reported as 52.8 and the control limits were 53 to 131.

2148418001	19	CS-LF022	SW846 8270D	Benzidine

The QC sample type MS for method SW846 8270D was outside the control limits for the analyte Benzidine. The % Recovery was reported as 0 and the control limits were 10 to 114.

2148418001	20	CS-LF022	SW846 8270D	3,3-Dichlorobenzidine

The QC sample type MS for method SW846 8270D was outside the control limits for the analyte 3,3-Dichlorobenzidine. The % Recovery was reported as 22.6 and the control limits were 27 to 106.

2148418001	21	CS-LF022	SW846 8270D	Benzo(k)fluoranthene

The QC sample type MS for method SW846 8270D was outside the control limits for the analyte Benzo(k)fluoranthene. The % Recovery was reported as 130 and the control limits were 62 to 113.

2148418001	22	CS-LF022	SW846 8270D	Indeno(1,2,3-cd)pyrene

The QC sample type MS for method SW846 8270D was outside the control limits for the analyte Indeno(1,2,3-cd)pyrene. The % Recovery was reported as 156 and the control limits were 62 to 113.

2148418001	23	CS-LF022	SW846 8270D	Dibenzo(a,h)anthracene

The QC sample type MS for method SW846 8270D was outside the control limits for the analyte Dibenzo(a,h)anthracene. The % Recovery was reported as 128 and the control limits were 64 to 117.

2148418001	24	CS-LF022	SW846 8270D	Benzo(g,h,i)perylene

The QC sample type MS for method SW846 8270D was outside the control limits for the analyte Benzo(g,h,i)perylene. The % Recovery was reported as 123 and the control limits were 61 to 118.

2148418001	25	CS-LF022	SW846 8270D	N-Nitrosodiethylamine

The QC sample type MS for method SW846 8270D was outside the control limits for the analyte N-Nitrosodiethylamine. The % Recovery was reported as 55.7 and the control limits were 57 to 104.

2148418001	26	CS-LF022	SW846 1030	Ignitability

According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)

2148418002	1	DUP1-SOIL	SW846 8260C	Acrolein

The QC sample type LCSD for method SW846 8260C was outside the control limits for the analyte Acrolein. The % Recovery was reported as 8.7 and the control limits were 18 to 139.

2148418002	2	DUP1-SOIL	SW846 8260C	Methylene Chloride

The QC sample type LCS for method SW846 8260C was outside the control limits for the analyte Methylene Chloride. The % Recovery was reported as 160 and the control limits were 68 to 133.

2148418002	3	DUP1-SOIL	SW846 8260C	Methylene Chloride

The QC sample type LCSD for method SW846 8260C was outside the control limits for the analyte Methylene Chloride. The % Recovery was reported as 134 and the control limits were 68 to 133.

2148418002	4	DUP1-SOIL	SW846 8260C	Vinyl Acetate

The QC sample type LCSD for method SW846 8260C was outside the control limits for the analyte Vinyl Acetate. The % Recovery was reported as 23.1 and the control limits were 30 to 154.

2148418002	5	DUP1-SOIL	SW846 8260C	Ethyl Acetate

The QC sample type LCSD for method SW846 8260C was outside the control limits for the analyte Ethyl Acetate. The RPD was reported as 86.2 and the upper control limit is 40.

2148418002	6	DUP1-SOIL	SW846 8270D	bis(2-Ethylhexyl)phthalate

The QC sample type DUP for method SW846 8270D was outside the control limits for the analyte bis(2-Ethylhexyl)phthalate. The RPD was reported as 129 and the upper control limit is 21.

Certificate of Analysis

Project Name:	**2016-MALTA NY SITE-WASTE**	Workorder:	**2148419**
Purchase Order:		Workorder ID:	**CBR011|2016-MALTA NY SITE-WAST**

Dear Mr. Neuman:

Enclosed are the analytical results for samples received by the laboratory on Friday, June 3, 2016.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Mrs. Vicki A. Forney (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

ALS Spring City: 10 Riverside Drive, Spring City, PA 19475 610-948-4903

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

Vicki Forney

SAMPLE SUMMARY

Workorder: 2148419 CBR011|2016-MALTA NY SITE-WAST

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
-- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
-- For microbiological analyses, the "Prepared" value is the date/time into the incurbator and the "Analyzed" value is the date/time out the incubator.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits

PARAMETER QUALIFIERS

Lab ID	#	Sample ID	Analytical Method	Analyte
2148419001	1	CS-LF023	SW846 8270D	4-Chloroaniline
The QC sample type LCS for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 29.5 and the control limits were 50 to 200.				
2148419001	2	CS-LF023	SW846 8270D	4-Chloroaniline
The QC sample type LCSD for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 35.7 and the control limits were 50 to 200.				
2148419001	3	CS-LF023	SW846 8081B	Endrin
Method criteria requires continuing calibration verification (CCV) standards be less than or equal to 20% of the initial calibration for the 8081 analysis. This compound was biased low 27% in the bracketing CCV. Data for this compound may have been impacted.				
2148419001	4	CS-LF023	SW846 8081B	4,4'-DDT
Method criteria requires continuing calibration verification (CCV) standards be less than or equal to 20% of the initial calibration for the 8081 analysis. This compound was biased low 22% in the bracketing CCV. Data for this compound may have been impacted.				
2148419001	5	CS-LF023	SW846 8081B	Methoxychlor
Method criteria requires continuing calibration verification (CCV) standards be less than or equal to 20% of the initial calibration for the 8081 analysis. This compound was biased low 27% in the bracketing CCV. Data for this compound may have been impacted.				
2148419001	6	CS-LF023	SW-846 1010A	Flashpoint/Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2148419001	7	CS-LF023	SW-846 1010A	Flashpoint/Ignitability
Sample did not flash up to 200 degrees F				
2148419001	8	CS-LF023	SW846 9045D	Corrosivity as pH
The corrosivity analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.

Certificate of Analysis

Project Name:	**2016-MALTA NY SITE-WASTE**	Workorder:	**2149113**
Purchase Order:		Workorder ID:	**CBR015|MaltaRocketFuelArea/154**

Dear Mr. Neuman:

Enclosed are the analytical results for samples received by the laboratory on Tuesday, June 7, 2016.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Mrs. Vicki A. Forney (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

ALS Spring City: 10 Riverside Drive, Spring City, PA 19475 610-948-4903

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

SAMPLE SUMMARY

Workorder: 2149113 CBR015|MaltaRocketFuelArea/154

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
-- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
-- For microbiological analyses, the "Prepared" value is the date/time into the incurbator and the "Analyzed" value is the date/time out the incubator.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits

PROJECT SUMMARY

Workorder: 2149113 CBR015|MaltaRocketFuelArea/154

Sample Comments

Lab ID: 2149113001 **Sample ID:** CS-LF024 **Sample Type:** SAMPLE

This sample was analyzed at a dilution in the 8151 herbicide analysis due to sample matrix interference. Reporting limits were adjusted accordingly.
The GCMS volatiles analysis was performed at a dilution due to the level of target compounds.

Lab ID: 2149113002 **Sample ID:** TB6 **Sample Type:** SAMPLE

Methods for the analysis of volatile organics require that the sample be preserved to a pH less than 2 using HCl. This sample had a pH greater than 2 when received by the lab.

PARAMETER QUALIFIERS

Lab ID	#	Sample ID	Analytical Method	Analyte
2149113001	1	CS-LF024	SW846 8270D	3,3-Dichlorobenzidine
The QC sample type LCS for method SW846 8270D was outside the control limits for the analyte 3,3-Dichlorobenzidine. The % Recovery was reported as 41.1 and the control limits were 50 to 200.				
2149113001	2	CS-LF024	SW846 8270D	3,3-Dichlorobenzidine
The QC sample type LCSD for method SW846 8270D was outside the control limits for the analyte 3,3-Dichlorobenzidine. The % Recovery was reported as 38.6 and the control limits were 50 to 200.				
2149113001	3	CS-LF024	SW846 8270D	4-Chloroaniline
The QC sample type LCS for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 42.3 and the control limits were 50 to 200.				
2149113001	4	CS-LF024	SW846 8270D	4-Chloroaniline
The QC sample type LCSD for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 41.6 and the control limits were 50 to 200.				
2149113001	5	CS-LF024	SW-846 1010A	Flashpoint/Ignitability
According to Pa/USEPA regulations, this sample is considered to be ignitable. (Ref 40 CFR 261.21)				
2149113001	6	CS-LF024	SW-846 1010A	Flashpoint/Ignitability
Sample flashed at 62 degrees F (Acetone)				
2149113001	7	CS-LF024	SW846 9045D	Corrosivity as pH
The corrosivity analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.

Certificate of Analysis

Project Name:	**2016-MALTA NY SITE-WASTE**	Workorder:	**2149111**
Purchase Order:		Workorder ID:	**CBR013|Malta Rocket Fuel Area**

Dear Mr. Neuman:

Enclosed are the analytical results for samples received by the laboratory on Tuesday, June 7, 2016.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Mrs. Vicki A. Forney (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

ALS Spring City: 10 Riverside Drive, Spring City, PA 19475 610-948-4903

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

Vicki Forney

SAMPLE SUMMARY

Workorder: 2149111 CBR013|Malta Rocket Fuel Area

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
-- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
-- For microbiological analyses, the "Prepared" value is the date/time into the incurbator and the "Analyzed" value is the date/time out the incubator.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits

PROJECT SUMMARY

Workorder: 2149111 CBR013|Malta Rocket Fuel Area

Sample Comments

Lab ID: 2149111001 **Sample ID:** CS-LF026 **Sample Type:** SAMPLE

The reporting limits for GCMS volatile analytes were raised due to the dilution of the sample caused by the level of non-target compounds.
This sample was collected in a soil jar for the volatile analysis. The sample was received and prepared by Method 5035 after the 48-hour holding time.

Lab ID: 2149111002 **Sample ID:** TB7 **Sample Type:** SAMPLE

Methods for the analysis of volatile organics require that the sample be preserved to a pH less than 2 using HCl. This sample had a pH greater than 2 when received by the lab.

PARAMETER QUALIFIERS

Lab ID	#	Sample ID	Analytical Method	Analyte
2149111001	1	CS-LF026	SW-846 1010A	Flashpoint/Ignitability
According to Pa/USEPA regulations, this sample is considered to be ignitable. (Ref 40 CFR 261.21)				
2149111001	2	CS-LF026	SW-846 1010A	Flashpoint/Ignitability
Sample flashed at 94 degrees F (Acetone)				
2149111001	3	CS-LF026	SW846 9045D	Corrosivity as pH
The corrosivity analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.				
2149111001	4	CS-LF026	SW846 8270D	3,3-Dichlorobenzidine
The QC sample type LCS for method SW846 8270D was outside the control limits for the analyte 3,3-Dichlorobenzidine. The % Recovery was reported as 41.1 and the control limits were 50 to 200.				
2149111001	5	CS-LF026	SW846 8270D	3,3-Dichlorobenzidine
The QC sample type LCSD for method SW846 8270D was outside the control limits for the analyte 3,3-Dichlorobenzidine. The % Recovery was reported as 38.6 and the control limits were 50 to 200.				
2149111001	6	CS-LF026	SW846 8270D	4-Chloroaniline
The QC sample type LCS for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 42.3 and the control limits were 50 to 200.				
2149111001	7	CS-LF026	SW846 8270D	4-Chloroaniline
The QC sample type LCSD for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 41.6 and the control limits were 50 to 200.

Certificate of Analysis

Project Name:	**2016-MALTA NY SITE-WASTE**	Workorder:	**2149548**
Purchase Order:		Workorder ID:	**CBR016|MaltaRocketFuelArea/154**

Dear Mr. Neuman:

Enclosed are the analytical results for samples received by the laboratory on Wednesday, June 8, 2016.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Mrs. Vicki A. Forney (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

ALS Spring City: 10 Riverside Drive, Spring City, PA 19475 610-948-4903

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

SAMPLE SUMMARY

Workorder: 2149548 CBR016|MaltaRocketFuelArea/154

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
-- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
-- For microbiological analyses, the "Prepared" value is the date/time into the incurbator and the "Analyzed" value is the date/time out the incubator.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits

PROJECT SUMMARY

Workorder: 2149548 CBR016|MaltaRocketFuelArea/154

Sample Comments

Lab ID: 2149548001 **Sample ID:** CS-LF036 **Sample Type:** SAMPLE

The reporting limits for GCMS volatile analytes were raised due to the dilution of the sample caused by the level of non-target compounds.
This sample was collected in a soil jar for the volatile analysis. The sample was received and prepared by Method 5035 after the 48-hour holding time.

Lab ID: 2149548002 **Sample ID:** TB8 **Sample Type:** SAMPLE

Methods for the analysis of volatile organics require that the sample be preserved to a pH less than 2 using HCl. This sample had a pH greater than 2 when received by the lab.

PARAMETER QUALIFIERS

Lab ID	#	Sample ID	Analytical Method	Analyte
2149548001	1	CS-LF036	SW846 8270D	3,3-Dichlorobenzidine
The QC sample type LCS for method SW846 8270D was outside the control limits for the analyte 3,3-Dichlorobenzidine. The % Recovery was reported as 41.1 and the control limits were 50 to 200.				
2149548001	2	CS-LF036	SW846 8270D	3,3-Dichlorobenzidine
The QC sample type LCSD for method SW846 8270D was outside the control limits for the analyte 3,3-Dichlorobenzidine. The % Recovery was reported as 38.6 and the control limits were 50 to 200.				
2149548001	3	CS-LF036	SW846 8270D	4-Chloroaniline
The QC sample type LCS for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 42.3 and the control limits were 50 to 200.				
2149548001	4	CS-LF036	SW846 8270D	4-Chloroaniline
The QC sample type LCSD for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 41.6 and the control limits were 50 to 200.				
2149548001	5	CS-LF036	600/4-81-045	Aroclor-1016
The QC sample type MS for method 600/4-81-045 was outside the control limits for the analyte Aroclor-1016. The % Recovery was reported as 242 and the control limits were 49 to 169.				
2149548001	6	CS-LF036	600/4-81-045	Aroclor-1016
The QC sample type MSD for method 600/4-81-045 was outside the control limits for the analyte Aroclor-1016. The % Recovery was reported as 249 and the control limits were 49 to 169.				
2149548001	7	CS-LF036	600/4-81-045	Aroclor-1260
The QC sample type MS for method 600/4-81-045 was outside the control limits for the analyte Aroclor-1260. The % Recovery was reported as 157 and the control limits were 68 to 150.				
2149548001	8	CS-LF036	600/4-81-045	Aroclor-1260
The QC sample type MSD for method 600/4-81-045 was outside the control limits for the analyte Aroclor-1260. The % Recovery was reported as 160 and the control limits were 68 to 150.				
2149548001	9	CS-LF036	600/4-81-045	Tetrachloro-m-xylene
The surrogate Tetrachloro-m-xylene for method 600/4-81-045 was outside of control limits. The % Recovery was reported as 256 and the control limits were 74 to 152. This result was reported at a dilution of 1.				
2149548001	10	CS-LF036	SW-846 1010A	Flashpoint/Ignitability
According to Pa/USEPA regulations, this sample is considered to be ignitable. (Ref 40 CFR 261.21)				
2149548001	11	CS-LF036	SW-846 1010A	Flashpoint/Ignitability
Sample flashed at 54 degrees F (acetone)				
2149548001	12	CS-LF036	SW846 9045D	Corrosivity as pH
The corrosivity analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.

Certificate of Analysis

Project Name:	**2016-MALTA NY SITE-WASTE**	Workorder:	**2149984**
Purchase Order:		Workorder ID:	**CBR018|MaltaRocketFuelArea/154**

Dear Mr. Neuman:

Enclosed are the analytical results for samples received by the laboratory on Thursday, June 9, 2016.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Mrs. Vicki A. Forney (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

SAMPLE SUMMARY

Workorder: 2149984 CBR018|MaltaRocketFuelArea/154

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
-- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
-- For microbiological analyses, the "Prepared" value is the date/time into the incurbator and the "Analyzed" value is the date/time out the incubator.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits

PROJECT SUMMARY

Workorder: 2149984 CBR018|MaltaRocketFuelArea/154

Sample Comments

Lab ID: 2149984001 **Sample ID:** CS-LF037 **Sample Type:** SAMPLE

The reporting limits for GCMS volatile analytes were raised due to the dilution of the sample caused by the level of non-target compounds.

Lab ID: 2149984002 **Sample ID:** TB9 **Sample Type:** SAMPLE

Methods for the analysis of volatile organics require that the sample be preserved to a pH less than 2 using HCl. This sample had a pH greater than 2 when received by the lab.

Lab ID: 2149984003 **Sample ID:** CS-LF038 **Sample Type:** SAMPLE

The reporting limits for GCMS volatile analytes were raised due to the dilution of the sample caused by the level of non-target compounds.

PARAMETER QUALIFIERS

Lab ID	#	Sample ID	Analytical Method	Analyte
2149984001	1	CS-LF037	SW846 8270D	3,3-Dichlorobenzidine
The QC sample type LCS for method SW846 8270D was outside the control limits for the analyte 3,3-Dichlorobenzidine. The % Recovery was reported as 33 and the control limits were 50 to 200.				
2149984001	2	CS-LF037	SW846 8270D	3,3-Dichlorobenzidine
The QC sample type LCSD for method SW846 8270D was outside the control limits for the analyte 3,3-Dichlorobenzidine. The % Recovery was reported as 36.5 and the control limits were 50 to 200.				
2149984001	3	CS-LF037	SW846 8270D	4-Chloroaniline
The QC sample type LCS for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 39.7 and the control limits were 50 to 200.				
2149984001	4	CS-LF037	SW846 8270D	4-Chloroaniline
The QC sample type LCSD for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 38.5 and the control limits were 50 to 200.				
2149984001	5	CS-LF037	600/4-81-045	Tetrachloro-m-xylene
The surrogate Tetrachloro-m-xylene for method 600/4-81-045 was outside of control limits. The % Recovery was reported as 260 and the control limits were 74 to 152. This result was reported at a dilution of 1.				
2149984001	6	CS-LF037	SW-846 1010A	Flashpoint/Ignitability
According to Pa/USEPA regulations, this sample is considered to be ignitable. (Ref 40 CFR 261.21)				
2149984001	7	CS-LF037	SW-846 1010A	Flashpoint/Ignitability
Sample flashed at 50 degrees F				
2149984001	8	CS-LF037	SW846 9045D	Corrosivity as pH
The corrosivity analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.				
2149984003	1	CS-LF038	SW846 8270D	3,3-Dichlorobenzidine
The QC sample type LCS for method SW846 8270D was outside the control limits for the analyte 3,3-Dichlorobenzidine. The % Recovery was reported as 33 and the control limits were 50 to 200.				
2149984003	2	CS-LF038	SW846 8270D	3,3-Dichlorobenzidine
The QC sample type LCSD for method SW846 8270D was outside the control limits for the analyte 3,3-Dichlorobenzidine. The % Recovery was reported as 36.5 and the control limits were 50 to 200.				
2149984003	3	CS-LF038	SW846 8270D	4-Chloroaniline
The QC sample type LCS for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 39.7 and the control limits were 50 to 200.				
2149984003	4	CS-LF038	SW846 8270D	4-Chloroaniline
The QC sample type LCSD for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 38.5 and the control limits were 50 to 200.				
2149984003	5	CS-LF038	600/4-81-045	Tetrachloro-m-xylene
The surrogate Tetrachloro-m-xylene for method 600/4-81-045 was outside of control limits. The % Recovery was reported as 271 and the control limits were 74 to 152. This result was reported at a dilution of 1.				
2149984003	6	CS-LF038	SW-846 1010A	Flashpoint/Ignitability
According to Pa/USEPA regulations, this sample is considered to be ignitable. (Ref 40 CFR 261.21)				
2149984003	7	CS-LF038	SW-846 1010A	Flashpoint/Ignitability
Sample flashed at 64 degrees F				
2149984003	8	CS-LF038	SW846 9045D	Corrosivity as pH
The corrosivity analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.

Certificate of Analysis

Project Name:	**2016-MALTA NY SITE-WASTE**	Workorder:	**2149983**
Purchase Order:		Workorder ID:	**CBR017|MaltaRocketFuelArea/154**

Dear Mr. Neuman:

Enclosed are the analytical results for samples received by the laboratory on Thursday, June 9, 2016.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Mrs. Vicki A. Forney (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

ALS Spring City: 10 Riverside Drive, Spring City, PA 19475 610-948-4903

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

SAMPLE SUMMARY

Workorder: 2149983 CBR017|MaltaRocketFuelArea/154

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
-- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
-- For microbiological analyses, the "Prepared" value is the date/time into the incurbator and the "Analyzed" value is the date/time out the incubator.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits

PROJECT SUMMARY

Workorder: 2149983 CBR017|MaltaRocketFuelArea/154

Sample Comments

Lab ID: 2149983001 **Sample ID:** CS-LF039 **Sample Type:** SAMPLE

The reporting limits for GCMS volatile analytes were raised due to the dilution of the sample caused by the level of non-target compounds.

Lab ID: 2149983002 **Sample ID:** CS-LF042 **Sample Type:** SAMPLE

The reporting limits for GCMS volatile analytes were raised due to the dilution of the sample caused by the level of non-target compounds.

Lab ID: 2149983003 **Sample ID:** TB10 **Sample Type:** SAMPLE

Methods for the analysis of volatile organics require that the sample be preserved to a pH less than 2 using HCl. This sample had a pH greater than 2 when received by the lab.

PARAMETER QUALIFIERS

Lab ID	#	Sample ID	Analytical Method	Analyte
2149983001	1	CS-LF039	SW846 8260C	1,2,3-Trichlorobenzene
The Method Blank for method SW846 8260C reported a value greater than the reporting level for the analyte 1,2,3-Trichlorobenzene.				
2149983002	1	CS-LF042	SW846 8270D	3,3-Dichlorobenzidine
The QC sample type LCS for method SW846 8270D was outside the control limits for the analyte 3,3-Dichlorobenzidine. The % Recovery was reported as 33 and the control limits were 50 to 200.				
2149983002	2	CS-LF042	SW846 8270D	3,3-Dichlorobenzidine
The QC sample type LCSD for method SW846 8270D was outside the control limits for the analyte 3,3-Dichlorobenzidine. The % Recovery was reported as 36.5 and the control limits were 50 to 200.				
2149983002	3	CS-LF042	SW846 8270D	4-Chloroaniline
The QC sample type LCS for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 39.7 and the control limits were 50 to 200.				
2149983002	4	CS-LF042	SW846 8270D	4-Chloroaniline
The QC sample type LCSD for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 38.5 and the control limits were 50 to 200.				
2149983002	5	CS-LF042	600/4-81-045	Tetrachloro-m-xylene
The surrogate Tetrachloro-m-xylene for method 600/4-81-045 was outside of control limits. The % Recovery was reported as 256 and the control limits were 74 to 152. This result was reported at a dilution of 1.				
2149983002	6	CS-LF042	SW-846 1010A	Flashpoint/Ignitability
According to Pa/USEPA regulations, this sample is considered to be ignitable. (Ref 40 CFR 261.21)				
2149983002	7	CS-LF042	SW-846 1010A	Flashpoint/Ignitability
Sample flashed at 69 degrees F				
2149983002	8	CS-LF042	SW846 9045D	Corrosivity as pH
The corrosivity analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.				
2149983003	1	TB10	SW846 8260C	Methyl acetate
The QC sample type LCS for method SW846 8260C was outside the control limits for the analyte Methyl acetate. The % Recovery was reported as 187 and the control limits were 70 to 130.

Project Name:	**2016-MALTA NY SITE-WASTE**	Workorder:	**2150468**
Purchase Order:		Workorder ID:	**CBR020|Malta Rocket Fue/154035**

Dear Mr. Neuman:

Enclosed are the analytical results for samples received by the laboratory on Friday, June 10, 2016.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Mrs. Vicki A. Forney (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

ALS Spring City: 10 Riverside Drive, Spring City, PA 19475 610-948-4903

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

SAMPLE SUMMARY

Workorder: 2150468 CBR020|Malta Rocket Fue/154035

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
-- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
-- For microbiological analyses, the "Prepared" value is the date/time into the incurbator and the "Analyzed" value is the date/time out the incubator.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits

PROJECT SUMMARY

Workorder: 2150468 CBR020|Malta Rocket Fue/154035

Sample Comments

Lab ID: 2150468001 **Sample ID:** CS-LF044 **Sample Type:** SAMPLE

This sample was collected in a soil jar for the volatile analysis. The sample was received and prepared by Method 5035 after the 48-hour holding time.

Lab ID: 2150468002 **Sample ID:** TB11 **Sample Type:** SAMPLE

Methods for the analysis of volatile organics require that the sample be preserved to a pH less than 2 using HCl. This sample had a pH greater than 2 when received by the lab.

PARAMETER QUALIFIERS

Lab ID	#	Sample ID	Analytical Method	Analyte
2150468001	1	CS-LF044	SW846 8270D	3,3-Dichlorobenzidine
The QC sample type LCS for method SW846 8270D was outside the control limits for the analyte 3,3-Dichlorobenzidine. The % Recovery was reported as 33 and the control limits were 50 to 200.				
2150468001	2	CS-LF044	SW846 8270D	3,3-Dichlorobenzidine
The QC sample type LCSD for method SW846 8270D was outside the control limits for the analyte 3,3-Dichlorobenzidine. The % Recovery was reported as 36.5 and the control limits were 50 to 200.				
2150468001	3	CS-LF044	SW846 8270D	4-Chloroaniline
The QC sample type LCS for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 39.7 and the control limits were 50 to 200.				
2150468001	4	CS-LF044	SW846 8270D	4-Chloroaniline
The QC sample type LCSD for method SW846 8270D was outside the control limits for the analyte 4-Chloroaniline. The % Recovery was reported as 38.5 and the control limits were 50 to 200.				
2150468001	5	CS-LF044	600/4-81-045	Aroclor-1016
The QC sample type MS for method 600/4-81-045 was outside the control limits for the analyte Aroclor-1016. The % Recovery was reported as 244 and the control limits were 49 to 169.				
2150468001	6	CS-LF044	600/4-81-045	Aroclor-1016
The QC sample type MSD for method 600/4-81-045 was outside the control limits for the analyte Aroclor-1016. The % Recovery was reported as 266 and the control limits were 49 to 169.				
2150468001	7	CS-LF044	600/4-81-045	Aroclor-1260
The QC sample type MS for method 600/4-81-045 was outside the control limits for the analyte Aroclor-1260. The % Recovery was reported as 154 and the control limits were 68 to 150.				
2150468001	8	CS-LF044	600/4-81-045	Aroclor-1260
The QC sample type MSD for method 600/4-81-045 was outside the control limits for the analyte Aroclor-1260. The % Recovery was reported as 174 and the control limits were 68 to 150.				
2150468001	9	CS-LF044	600/4-81-045	Tetrachloro-m-xylene
The surrogate Tetrachloro-m-xylene for method 600/4-81-045 was outside of control limits. The % Recovery was reported as 209 and the control limits were 74 to 152. This result was reported at a dilution of 1.				
2150468001	10	CS-LF044	SW-846 1010A	Flashpoint/Ignitability
According to Pa/USEPA regulations, this sample is considered to be ignitable. (Ref 40 CFR 261.21)				
2150468001	11	CS-LF044	SW-846 1010A	Flashpoint/Ignitability
Sample flashed at 50 degrees F				
2150468001	12	CS-LF044	SW846 9045D	Corrosivity as pH
The corrosivity analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.

Rev 01-2013

WARNING: Sample CS-LF044 is highly volatile and likely is composed of or contains acetone.

Drum / Container Sampling Log

Project Name / Number: Luther Forest-GE MRFA Drum Excavation / 155446

Project Location: Malta Rocket Fuel Area – Northeast Debris Area, Malta, NY

Date	6-8-16
Container ID #	LF044
Original Container Location	
Original Container Type	55-gallon 2 ring steel
Original Container Size	55-gallon
Original Container Condition	damaged
Original Container Labels / Markings	5-1
Outer / Overpack Container Type	
Spill or Leak? (Y/N)	No
Vapor? (Y/N)	No
PID Reading (ppm)	100 (~500 ppm from headspace of sample container)
LEL Reading (%)	100
Oxygen Reading (%)	20.9
Physcial State (Liquid / Solid / Sludge / Powder)	liquid
Color	Clear to very light brown
Notes	Solvent characteristics; likely acetone due to similarities with LF021; highly volatile.
Sampler Name	A. Norvelle
Inside Container Sample ID # / Time	CS-LF044 / 6-8-16 @ 1150
Soil Under Contaner Sample ID # / Time	—
Terrain	
Weather Conditions

Certificate of Analysis

Project Name:	**2016-MALTA NY SITE-WASTE**	Workorder:	**2150380**
Purchase Order:		Workorder ID:	**CBR019|Malta Rocket Fue/154035**

Dear Mr. Neuman:

Enclosed are the analytical results for samples received by the laboratory on Friday, June 10, 2016.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Mrs. Vicki A. Forney (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

ALS Spring City: 10 Riverside Drive, Spring City, PA 19475 610-948-4903

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

Vicki Forney

Mrs. Vicki A. Forney

SAMPLE SUMMARY

Workorder: 2150380 CBR019|Malta Rocket Fue/154035

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
-- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
-- For microbiological analyses, the "Prepared" value is the date/time into the incurbator and the "Analyzed" value is the date/time out the incubator.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits

PARAMETER QUALIFIERS

Lab ID	#	Sample ID	Analytical Method	Analyte
2150380001	1	CS-LF048-LF049	SW846 1030	Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2150380001	2	CS-LF048-LF049	SW846 8260C	Benzyl Chloride
The QC sample type LCS for method SW846 8260C was outside the control limits for the analyte Benzyl Chloride. The % Recovery was reported as 65 and the control limits were 67 to 125.				
2150380002	1	SS-LF001-COMPOSITE	SW846 1030	Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2150380002	12	SS-LF001-COMPOSITE	SW846 8260C	Benzyl Chloride
The QC sample type LCS for method SW846 8260C was outside the control limits for the analyte Benzyl Chloride. The % Recovery was reported as 65 and the control limits were 67 to 125.

Certificate of Analysis

Project Name:	**2016-MALTA NY SITE-WASTE**	Workorder:	**2175429**
Purchase Order:	**962015**	Workorder ID:	**CBR021|2016-MALTA NY SITE-WAST**

Dear Mr. Neuman:

Enclosed are the analytical results for samples received by the laboratory on Friday, September 16, 2016.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Mrs. Vicki A. Forney (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

ALS Spring City: 10 Riverside Drive, Spring City, PA 19475 610-948-4903

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

Vicki Forney

Mrs. Vicki A. Forney
Project Coordinator

SAMPLE SUMMARY

Workorder: 2175429 CBR021|2016-MALTA NY SITE-WAST

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
-- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
-- For microbiological analyses, the "Prepared" value is the date/time into the incurbator and the "Analyzed" value is the date/time out the incubator.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits

PARAMETER QUALIFIERS

Lab ID	#	Sample ID	Analytical Method	Analyte
2175429001	1	SB-1(0-4ft)	SW846 8260C	Acrolein
The QC sample type LCS for method SW846 8260C was outside the control limits for the analyte Acrolein. The % Recovery was reported as 6.71 and the control limits were 18 to 139.				
2175429001	2	SB-1(0-4ft)	SW846 8260C	Acrolein
The QC sample type LCSD for method SW846 8260C was outside the control limits for the analyte Acrolein. The % Recovery was reported as 16 and the control limits were 18 to 139.				
2175429001	3	SB-1(0-4ft)	SW846 7196A	Hexavalent Chromium
The recovery of the Matrix Spike (MS) Soluble and Insoluble associated to this analyte was outside of the established control limits.				
2175429001	4	SB-1(0-4ft)	SW846 1030	Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2175429002	1	SB-1(4-8ft)	SW846 8260C	Acrolein
The QC sample type LCS for method SW846 8260C was outside the control limits for the analyte Acrolein. The % Recovery was reported as 6.71 and the control limits were 18 to 139.				
2175429002	2	SB-1(4-8ft)	SW846 8260C	Acrolein
The QC sample type LCSD for method SW846 8260C was outside the control limits for the analyte Acrolein. The % Recovery was reported as 16 and the control limits were 18 to 139.				
2175429002	3	SB-1(4-8ft)	SW846 1030	Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2175429003	1	SB-1(8-12ft)	SW846 8260C	Acrolein
The QC sample type LCS for method SW846 8260C was outside the control limits for the analyte Acrolein. The % Recovery was reported as 6.71 and the control limits were 18 to 139.				
2175429003	2	SB-1(8-12ft)	SW846 8260C	Acrolein
The QC sample type LCSD for method SW846 8260C was outside the control limits for the analyte Acrolein. The % Recovery was reported as 16 and the control limits were 18 to 139.				
2175429003	3	SB-1(8-12ft)	SW846 8260C	Methyl acetate
The QC sample type MS for method SW846 8260C was outside the control limits for the analyte Methyl acetate. The % Recovery was reported as 288 and the control limits were 70 to 130.				
2175429003	4	SB-1(8-12ft)	SW846 8260C	Methyl acetate
The QC sample type MSD for method SW846 8260C was outside the control limits for the analyte Methyl acetate. The % Recovery was reported as 245 and the control limits were 70 to 130.				
2175429003	5	SB-1(8-12ft)	SW846 8260C	Freon 113
The QC sample type MS for method SW846 8260C was outside the control limits for the analyte Freon 113. The % Recovery was reported as 127 and the control limits were 40 to 109.				
2175429003	6	SB-1(8-12ft)	SW846 8260C	Freon 113
The QC sample type MSD for method SW846 8260C was outside the control limits for the analyte Freon 113. The % Recovery was reported as 124 and the control limits were 40 to 109.				
2175429003	7	SB-1(8-12ft)	SW846 8260C	Vinyl Acetate
The QC sample type MS for method SW846 8260C was outside the control limits for the analyte Vinyl Acetate. The % Recovery was reported as 22.2 and the control limits were 30 to 154.				
2175429003	8	SB-1(8-12ft)	SW846 8260C	Vinyl Acetate
The QC sample type MSD for method SW846 8260C was outside the control limits for the analyte Vinyl Acetate. The RPD was reported as 41.3 and the upper control limit is 40.				
2175429003	9	SB-1(8-12ft)	SW846 8260C	Ethyl Acetate
The QC sample type MS for method SW846 8260C was outside the control limits for the analyte Ethyl Acetate. The % Recovery was reported as 39.3 and the control limits were 43 to 152.				
2175429003	10	SB-1(8-12ft)	SW846 8260C	Ethyl Methacrylate
The QC sample type MS for method SW846 8260C was outside the control limits for the analyte Ethyl Methacrylate. The % Recovery was reported as 56.6 and the control limits were 78 to 126.				

ANALYTICAL RESULTS

Workorder: 2175429 CBR021|2016-MALTA NY SITE-WAST

2175429003	11	SB-1(8-12ft)	SW846 8260C	Ethyl Methacrylate

The QC sample type MSD for method SW846 8260C was outside the control limits for the analyte Ethyl Methacrylate. The % Recovery was reported as 62.3 and the control limits were 78 to 126.

2175429003	190	SB-1(8-12ft)	SW846 6010C	Magnesium, Total

One of the two matrix spike analyses performed on this sample failed to meet acceptable recovery limits. The other matrix spike was within acceptable recovery limits. Matrix interferences are the possible cause for the failure.

2175429003	191	SB-1(8-12ft)	SW846 6010C	Potassium, Total

One of the two matrix spike analyses performed on this sample failed to meet acceptable recovery limits. The other matrix spike was within acceptable recovery limits. Matrix interferences are the possible cause for the failure.

2175429003	192	SB-1(8-12ft)	SW846 1030	Ignitability

According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)

2175429003	193	SB-1(8-12ft)	SW846 8270D	Hexachlorocyclopentadiene

The QC sample type MS for method SW846 8270D was outside the control limits for the analyte Hexachlorocyclopentadiene. The % Recovery was reported as 32.1 and the control limits were 33 to 109.

2175429003	194	SB-1(8-12ft)	SW846 8270D	2-Methyl-4,6-dinitrophenol

The QC sample type MS for method SW846 8270D was outside the control limits for the analyte 2-Methyl-4,6-dinitrophenol. The % Recovery was reported as 49.2 and the control limits were 53 to 131.

2175429003	195	SB-1(8-12ft)	SW846 8270D	Benzidine

The QC sample type MS for method SW846 8270D was outside the control limits for the analyte Benzidine. The % Recovery was reported as 0 and the control limits were 10 to 114.

2175429003	196	SB-1(8-12ft)	SW846 8270D	Benzidine

The QC sample type MSD for method SW846 8270D was outside the control limits for the analyte Benzidine. The % Recovery was reported as 0 and the control limits were 10 to 114.

Certificate of Analysis

Project Name:	**2016-MALTA NY SITE-WASTE**	Workorder:	**2175452**
Purchase Order:	**962015**	Workorder ID:	**CBR022|2016-MALTA NY SITE-WAST**

Dear Mr. Neuman:

Enclosed are the analytical results for samples received by the laboratory on Friday, September 16, 2016.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Mrs. Vicki A. Forney (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

ALS Spring City: 10 Riverside Drive, Spring City, PA 19475 610-948-4903

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

Vicki Forney

SAMPLE SUMMARY

Workorder: 2175452 CBR022|2016-MALTA NY SITE-WAST

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
-- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
-- For microbiological analyses, the "Prepared" value is the date/time into the incurbator and the "Analyzed" value is the date/time out the incubator.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits

Certificate of Analysis

Project Name:	**2016-MALTA NY SITE-WASTE**	Workorder:	**2175699**
Purchase Order:	**962015**	Workorder ID:	**CBR023|Rocket Fuel Area 154035**

Dear Mr. Neuman:

Enclosed are the analytical results for samples received by the laboratory on Friday, September 16, 2016.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Mrs. Vicki A. Forney (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

ALS Spring City: 10 Riverside Drive, Spring City, PA 19475 610-948-4903

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

Vicki Forney

SAMPLE SUMMARY

Workorder: 2175699 CBR023|Rocket Fuel Area 154035

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
-- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
-- For microbiological analyses, the "Prepared" value is the date/time into the incurbator and the "Analyzed" value is the date/time out the incubator.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits

PROJECT SUMMARY

Workorder: 2175699 CBR023|Rocket Fuel Area 154035

Sample Comments

Lab ID: 2175699002 **Sample ID:** GW-SB-1 **Sample Type:** SAMPLE

A positive residual chlorine result was detected in the preservation check for the volatile organics analysis of this sample. This may be due to the presence of residual chlorine or another oxidizing agent.

PARAMETER QUALIFIERS

Lab ID	#	Sample ID	Analytical Method	Analyte
2175699001	1	EQ2 - Water	SW846 8270D	2,4,6-Tribromophenol
The surrogate 2,4,6-Tribromophenol for method SW846 8270D was outside of control limits. The % Recovery was reported as 43.7 and the control limits were 47 to 128. This result was reported at a dilution of 1.				
2175699001	2	EQ2 - Water	SW846 8270D	Pyridine
The Method Blank for method SW846 8270D reported a value greater than the reporting level for the analyte Pyridine.				
2175699001	3	EQ2 - Water	SW846 8270D	Aniline
The Method Blank for method SW846 8270D reported a value greater than the reporting level for the analyte Aniline.				
2175699001	4	EQ2 - Water	SW846 8270D	4-Chloroaniline
The Method Blank for method SW846 8270D reported a value greater than the reporting level for the analyte 4-Chloroaniline.				
2175699001	5	EQ2 - Water	SW846 7196A	Hexavalent Chromium
Analyte was analyzed past the 24 hour holding time.				
2175699001	6	EQ2 - Water	SW846 9040C	Corrosivity as pH
The corrosivity analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.				
2175699001	7	EQ2 - Water	SW-846 1010A	Flashpoint/Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2175699001	8	EQ2 - Water	SW-846 1010A	Flashpoint/Ignitability
Sample did not flash at up to 200 degrees F				
2175699001	9	EQ2 - Water	SW846 8270D	2,4,6-Tribromophenol
The surrogate 2,4,6-Tribromophenol for method SW846 8270D was outside of control limits. The % Recovery was reported as 46.2 and the control limits were 47 to 128. This result was reported at a dilution of 4.				
2175699002	1	GW-SB-1	SW846 8270D	Pyridine
The Method Blank for method SW846 8270D reported a value greater than the reporting level for the analyte Pyridine.				
2175699002	2	GW-SB-1	SW846 8270D	Aniline
The Method Blank for method SW846 8270D reported a value greater than the reporting level for the analyte Aniline.				
2175699002	3	GW-SB-1	SW846 8270D	4-Chloroaniline
The Method Blank for method SW846 8270D reported a value greater than the reporting level for the analyte 4-Chloroaniline.				
2175699002	4	GW-SB-1	SW846 7196A	Hexavalent Chromium
Analyte was analyzed past the 24 hour holding time.				
2175699002	5	GW-SB-1	SW846 9040C	Corrosivity as pH
The corrosivity analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.				
2175699002	6	GW-SB-1	SW846 7.3	Sulfide, Reactive
The lack of homogeneity in the sample caused the replicate analysis of this analyte to exceed the established control limits for precision.				
2175699002	7	GW-SB-1	SW-846 1010A	Flashpoint/Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2175699002	8	GW-SB-1	SW-846 1010A	Flashpoint/Ignitability
Sample did not flash at up to 200 degrees F

Certificate of Analysis

Project Name:	**2016-MALTA NY SITE-WASTE**	Workorder:	**2175701**
Purchase Order:	**962015**	Workorder ID:	**CBR024|Rocket Fuel Area 154035**

Dear Mr. Neuman:

Enclosed are the analytical results for samples received by the laboratory on Friday, September 16, 2016.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Mrs. Vicki A. Forney (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

ALS Spring City: 10 Riverside Drive, Spring City, PA 19475 610-948-4903

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

SAMPLE SUMMARY

Workorder: 2175701 CBR024|Rocket Fuel Area 154035

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
-- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
-- For microbiological analyses, the "Prepared" value is the date/time into the incurbator and the "Analyzed" value is the date/time out the incubator.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits

PARAMETER QUALIFIERS

Lab ID	#	Sample ID	Analytical Method	Analyte
2175701001	1	GW-SB-3	SW846 8270D	Pyridine
The Method Blank for method SW846 8270D reported a value greater than the reporting level for the analyte Pyridine.				
2175701001	2	GW-SB-3	SW846 8270D	Aniline
The Method Blank for method SW846 8270D reported a value greater than the reporting level for the analyte Aniline.				
2175701001	3	GW-SB-3	SW846 8270D	4-Chloroaniline
The Method Blank for method SW846 8270D reported a value greater than the reporting level for the analyte 4-Chloroaniline.				
2175701001	4	GW-SB-3	SW846 7196A	Hexavalent Chromium
Analyte was analyzed past the 24 hour holding time.				
2175701001	5	GW-SB-3	SW846 9040C	Corrosivity as pH
The corrosivity analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.				
2175701001	6	GW-SB-3	SW-846 1010A	Flashpoint/Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2175701001	7	GW-SB-3	SW-846 1010A	Flashpoint/Ignitability
Sample did not flash at up to 200 degrees F				
2175701002	1	DUP2-Water	SW846 8270D	Pyridine
The Method Blank for method SW846 8270D reported a value greater than the reporting level for the analyte Pyridine.				
2175701002	2	DUP2-Water	SW846 8270D	Aniline
The Method Blank for method SW846 8270D reported a value greater than the reporting level for the analyte Aniline.				
2175701002	3	DUP2-Water	SW846 8270D	4-Chloroaniline
The Method Blank for method SW846 8270D reported a value greater than the reporting level for the analyte 4-Chloroaniline.				
2175701002	4	DUP2-Water	SW846 7196A	Hexavalent Chromium
Analyte was analyzed past the 24 hour holding time.				
2175701002	5	DUP2-Water	SW846 9040C	Corrosivity as pH
The corrosivity analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.				
2175701002	6	DUP2-Water	SW-846 1010A	Flashpoint/Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2175701002	7	DUP2-Water	SW-846 1010A	Flashpoint/Ignitability
Sample did not flash at up to 200 degrees F

Certificate of Analysis

Project Name:	**2016-MALTA NY SITE-WASTE**	Workorder:	**2175704**
Purchase Order:	**962015**	Workorder ID:	**CBR025|Rocket Fuel Area 154035**

Dear Mr. Neuman:

Enclosed are the analytical results for samples received by the laboratory on Friday, September 16, 2016.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Mrs. Vicki A. Forney (Project Coordinator) at (717) 944-5541.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state requirements. The test results meet requirements of the current NELAP standards or state requirements, where applicable. For a specific list of accredited analytes, refer to the certifications section of the ALS website at www.alsglobal.com/en/Our-Services/Life-Sciences/Environmental/Downloads.

ALS Spring City: 10 Riverside Drive, Spring City, PA 19475 610-948-4903

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

Vicki Forney

SAMPLE SUMMARY

Workorder: 2175704 CBR025|Rocket Fuel Area 154035

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are preformed in the laboratory and are therefore analyzed out of hold time.
-- Method references listed on this report beginning with the prefix “S” followed by a method number (such as S2310B-97) refer to methods from “Standard Methods for the Examination of Water and Wastewater”.
-- For microbiological analyses, the "Prepared" value is the date/time into the incurbator and the "Analyzed" value is the date/time out the incubator.

Standard Acronyms/Flags

J	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
LOD	DoD Limit of Detection
LOQ	DoD Limit of Quantitation
DL	DoD Detection Limit
I	Indicates reported value is greater than or equal to the Method Detection Limit (MDL) but less than the Report Detection Limit (RDL)
(S)	Surrogate Compound
NC	Not Calculated
*	Result outside of QC limits

PROJECT SUMMARY

Workorder: 2175704 CBR025|Rocket Fuel Area 154035

Sample Comments

Lab ID: 2175704001 **Sample ID:** GW-SB-2 **Sample Type:** SAMPLE

A positive residual chlorine result was detected in the preservation check for the volatile organics analysis of this sample. This may be due to the presence of residual chlorine or another oxidizing agent.

PARAMETER QUALIFIERS

Lab ID	#	Sample ID	Analytical Method	Analyte
2175704001	1	GW-SB-2	SW846 8260C	Acetonitrile
The QC sample type MS for method SW846 8260C was outside the control limits for the analyte Acetonitrile. The % Recovery was reported as 136 and the control limits were 19 to 130.				
2175704001	2	GW-SB-2	SW846 8260C	Acetonitrile
The QC sample type MSD for method SW846 8260C was outside the control limits for the analyte Acetonitrile. The % Recovery was reported as 136 and the control limits were 19 to 130.				
2175704001	3	GW-SB-2	SW846 8260C	Methylene Chloride
The QC sample type MS for method SW846 8260C was outside the control limits for the analyte Methylene Chloride. The % Recovery was reported as 122 and the control limits were 76 to 121.				
2175704001	4	GW-SB-2	SW846 8260C	Methylene Chloride
The QC sample type MSD for method SW846 8260C was outside the control limits for the analyte Methylene Chloride. The % Recovery was reported as 125 and the control limits were 76 to 121.				
2175704001	5	GW-SB-2	SW846 8260C	Freon 113
The QC sample type MS for method SW846 8260C was outside the control limits for the analyte Freon 113. The % Recovery was reported as 135 and the control limits were 50 to 130.				
2175704001	6	GW-SB-2	SW846 8260C	Freon 113
The QC sample type MSD for method SW846 8260C was outside the control limits for the analyte Freon 113. The % Recovery was reported as 140 and the control limits were 50 to 130.				
2175704001	7	GW-SB-2	SW846 8260C	trans-1,2-Dichloroethene
The QC sample type MSD for method SW846 8260C was outside the control limits for the analyte trans-1,2-Dichloroethene. The % Recovery was reported as 125 and the control limits were 71 to 122.				
2175704001	8	GW-SB-2	SW846 8260C	Bromochloromethane
The QC sample type MS for method SW846 8260C was outside the control limits for the analyte Bromochloromethane. The % Recovery was reported as 129 and the control limits were 73 to 117.				
2175704001	9	GW-SB-2	SW846 8260C	Bromochloromethane
The QC sample type MSD for method SW846 8260C was outside the control limits for the analyte Bromochloromethane. The % Recovery was reported as 130 and the control limits were 73 to 117.				
2175704001	10	GW-SB-2	SW846 8260C	1,1-Dichloropropene
The QC sample type MSD for method SW846 8260C was outside the control limits for the analyte 1,1-Dichloropropene. The % Recovery was reported as 129 and the control limits were 76 to 126.				
2175704001	11	GW-SB-2	SW846 8260C	Cyclohexane
The QC sample type MS for method SW846 8260C was outside the control limits for the analyte Cyclohexane. The % Recovery was reported as 137 and the control limits were 66 to 130.				
2175704001	12	GW-SB-2	SW846 8260C	Cyclohexane
The QC sample type MSD for method SW846 8260C was outside the control limits for the analyte Cyclohexane. The % Recovery was reported as 142 and the control limits were 66 to 130.				
2175704001	13	GW-SB-2	SW846 8260C	2-Chloroethylvinyl ether
The QC sample type MSD for method SW846 8260C was outside the control limits for the analyte 2-Chloroethylvinyl ether. The RPD was reported as 69.6 and the upper control limit is 40.				
2175704001	17	GW-SB-2	SW846 7196A	Hexavalent Chromium
Analyte was analyzed past the 24 hour holding time.				
2175704001	18	GW-SB-2	SW846 9040C	Corrosivity as pH
The corrosivity analysis is an "analyze immediately" analysis. Parameters identified as "analyze immediately" require analysis within 15 minutes of collection, and are therefore analyzed outside of the method holding time when analyzed in the laboratory.				
2175704001	19	GW-SB-2	SW-846 1010A	Flashpoint/Ignitability
According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)				
2175704001	20	GW-SB-2	SW-846 1010A	Flashpoint/Ignitability
Sample did not flash at up to 200 degrees F				

ANALYTICAL RESULTS

Workorder: 2175704 CBR025|Rocket Fuel Area 154035

2175704001	21	GW-SB-2	SW846 8270D	Benzoic acid

The QC sample type MSD for method SW846 8270D was outside the control limits for the analyte Benzoic acid. The RPD was reported as 37.3 and the upper control limit is 30.

2175704001	22	GW-SB-2	SW846 8270D	Benzidine

The QC sample type MSD for method SW846 8270D was outside the control limits for the analyte Benzidine. The RPD was reported as 30.4 and the upper control limit is 30.

RE: Data Usability Summary Report (DUSR)
Validation of the Malta Rocket Fuel Area (MRFA) Site Analytical Laboratory Data
ALS SDG Nos. CBR-021, CBR-022, CBR-023, CBR-024, and CBR-025

Dear Mr. Neumann:

Review has been completed for the data packages generated by ALS Environmental that pertain to samples collected 09/14/16 and 09/15/16 at the MFRA site. Nine soil samples, three aqueous samples, and field duplicates of each matrix were processed for TCL volatiles, TCL semivolatiles, TCL PCBs, TCL pesticides, nine herbicides, TAL metals, hexavalent chromium, reactive cyanide, and reactive sulfide. The soil samples were also processed for ignitibility and the aqueous samples were also processed for corrosivity and flashpoint. Analytical methodologies are those of the USEPA SW846.

The data package submitted by the laboratory contains full deliverables for validation. This usability report is generated from review of the QC summary form information, with full review of sample raw data and limited review of associated QC raw data. The reported QC summary forms and sample raw data have been reviewed for application of validation qualifiers, in accordance with the project QAPP of February 2, 2016, with guidance from the USEPA national and regional validation documents, and in consideration for the specific requirements of the analytical methodology. The following items were reviewed:

* Data Completeness
* Case Narrative
* Custody Documentation
* Holding Times
* Surrogate and Internal Standard Recoveries
* Equipment/Trip/Method Blanks
* Matrix Spikes/Laboratory Duplicates
* Laboratory Control Sample (LCS)
* Instrumental Tunes
* Calibration Standards
* ICP Serial Dilution Evaluations
* ICP Interference Check Samples
* Method Compliance
* Sample Result Verification

The data review includes evaluation of the specific items noted in The NYS DER-10 Appendix B section 2.0 (c). The items listed above that show deficiencies are discussed within the text of this narrative. The laboratory QC forms illustrating the excursions can be found within the laboratory data package.

In summary, most sample results are usable either as reported or with minor qualification or edit. However, the following significant item is noted:

- the result for dinoseb in one sample is not usable due to an apparent matrix effect

Accuracy, precision, data completeness, sensitivity, representativeness, and the analytical method comparability are acceptable. The laboratory data packages underwent revisions to report proper analyte lists and to correct deliverable errors.

Copies of the client sample identifications are attached to this text, and should be reviewed in conjunction with this report. Also attached are laboratory excel files, with recommended qualifiers and edits applied in red.

Chain-of-Custody/Sample Receipt

The custody form associated with samples reported in SDG CBR-022 does not indicate all of the required analytical fractions. The samples were processed properly; this variance or the resolution thereof was not noted in the laboratory data package.

The year was omitted from the laboratory receipt relinquish entry on the custody associated with samples reported in SDG CBR-025.

Bind Field Duplicates

The blind field duplicate correlations of SB-2(0-4ft) and GW-SB-3 show the following outliers, the results for which are qualified as estimated in the indicated parent sample and its duplicate: Carbon tetrachloride (39%RPD) and potassium (36%RPD) in SB-2(0-4ft)

TCL Volatile Analyses by EPA8260C

The detections of 1,2-dichoroethane in the soil samples are edited to reflect non-detection due to very poor mass spectral quality.

The detections of toluene in the soil samples are considered external contamination due to presence in the associated equipment and trip blanks, and those results have been edited to reflect non-detection.

The matrix spikes of SB-1 (8-12ft) and GW-SB-2 show recoveries and correlations that are within validation guidelines.

Holding times were met. Surrogate and internal standard recoveries are within required limits. Calibration standards show responses within validation guidelines.

TCL Semivolatiles by EPA8270D

The equipment blank shows a high concentration of dimethylphthalate, an analyte not detected in the project samples. The source of that contaminant has not been ascertained.

The detection of di-n-butylphthalate in GW-SB-1 is considered external contamination due to presence in the associated method blank, and that sample result has been edited to reflect non-detection.

The matrix spikes of SB-1 (8-12ft) and GW-SB-2 show recoveries and correlations that are within validation guidelines, with the exception of an elevated recovery that does not affect the results of the parent sample.

The results for analytes initially reported with the "E" flag have been replaced by dilution analysis concentrations, thus reflecting responses within the established linear range of the instrument.

Holding times were met. Surrogate and internal standard recoveries are within validation guidelines.

Calibration standards show acceptable responses, with the following exceptions, results for which are qualified as estimated in the indicated samples:

- hexachlorocyclopentadiene (51%RSD) and 2,4-dinitrophenol (47%RSD) in the samples reported in SDG CBR-022

TCL Pesticides, Aroclor PCBs, and Herbicides by EPA Methods 8081B, 8082A, and 8151

The matrix spikes of pesticides, herbicides, and Aroclors 1660 in SB-1 (8-12ft) and GW-SB-2 show recoveries and correlations that are within validation guidelines.

Holding times were met. Blanks show no contamination affecting sample reported results. Surrogate and LCS standard recoveries are acceptable. Calibration standards show compliant responses. Instrument performance wass compliant.

TAL Metals Analyses by EPA 6010C, 7470, and 7471

The matrix spikes of SB-1 (8-12ft) and GW-SB-1 show recoveries and correlations that are within validation guidelines, with the exceptions of elevated correlations for aluminum and potassium (37%RPD and 53%RPD, respectively) in the soil. The results for those two elements in that parent sample have been qualified as estimated in value.

The detection of barium in GW-SB-2 is considered external contamination due to presence in the associated equipment blank, and that result has been edited to reflect non-detection.

The laboratory did not process ICP serial dilutions, although one should have been processed for the soil matrix. The effect of the matrix has therefore not been thoroughly evaluated.

Instrument performance is compliant.

Wet Chemistry Analyses for Hexavalent Chromium, Ignitability, Corrosivity, Reactive Cyanide, and Reactive Sulfide

Review was conducted for method compliance, holding times, transcription, calculations, standard and blank acceptability, accuracy and precision, etc., as applicable to each procedure. All were found acceptable for the validated samples, unless noted specifically within this text.

The aqueous samples were processed for hexavalent chromium beyond the allowable, and sometimes well beyond the usable, timeframe. However, the reported results for that analyte can be found usable based upon the total chromium results, which include that of the hexavalent form. One of the samples has been edited to reflect an elevated hexavalent chromium reporting limit (19 ug/L, above 10ug/L) corresponding to the detected concentration of total chromium. This limit is still below the GW Standard concentration of 50 ug/L, and is therefore usable.

All corrosivity values have been qualified as estimated due to outlying holding time. The analysis should be performed immediately, but was done after laboratory receipt, sometime as much as two days after collection.

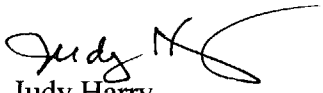
The detections of reactive sulfide in the soil and aqueous samples are considered external contamination or false positives due to consistent reported detections in the associated equipment and method blanks. Those sample detections have been edited to reflect non-detection.

The hexavalent chromium matrix spikes on the soluble and insoluble fractions of SB-1(0-4ft) show low recoveries (67% and 57%), and the result for that analyte in the parent sample has been qualified as estimated, with a likely low bias.

The hexavalent chromium matrix spikes of GW-SB-2 show acceptable recoveries and duplicate correlations. The laboratory duplicate evaluation of reactive sulfide in GW-W-SB1 shows acceptable correlations.

Please do not hesitate to contact me if questions or comments arise during your review of this report.

Very truly yours,



Judy Harry

VALIDATION DATA QUALIFIER DEFINITIONS

U	The analyte was analyzed for, but was not detected above the level of the associated reported quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J-	The analyte was positively identified; the associated numerical value is an estimated quantity that may be biased low.
J+	The analyte was positively identified; the associated numerical value is an estimated quantity that may be biased high.
UJ	The analyte was analyzed for, but was not detected. The associated reported quantitation limit is approximate and may be inaccurate or imprecise.
NJ	The detection is tentative in identification and estimated in value. Although there is presumptive evidence of the analyte, the result should be used with caution as a potential false positive and/or elevated quantitative value.
R	The data are unusable. The sample results are rejected due to serious deficiencies in meeting Quality Control limits. The analyte may or may not be present.
EMPC	The results do not meet all criteria for a confirmed identification. The quantitative value represents the Estimated Maximum Possible Concentration of the analyte in the sample.

Land Disposal Restriction Notification Form

Generator Name **MALTA RFA**

EPA ID Number **NYD980535124** Manifest **001120359VES**

This notice is being provided in accordance with 40 CFR 268.7 to inform you that this shipment contains waste restricted from land disposal by the USEPA under the land disposal restriction program. Identified below for each container is the designation of the waste as a wastewater or non-wastewater, the Clean Water Act (CWA) permit status associated with the treatment/disposal facility, applicable waste codes and any corresponding subcategories, list of any F001-F005 solvent constituents that are present in the waste, and any underlying hazardous constituents (UHC) that are present.

This notice is also being provided in accordance with 6 NYCRR 376.1(g)(1).

Container Number: **KN-2862554000-003 (1/ 1)**

WIP / Approval Code:	**025684 / MARFS**
Form Designation / CWA Status:	**Non-Wastewater / Non-CWA**
Waste Codes (Subcategories):	**D001 (IGNITABLE CHARACTERISTIC WASTE, LIQUIDS >= 10% TOC PER 261.2 1(a)(1)), D010, D018, D022, D035, D039**
Constituents (F001 - F005):	**None**
UHCs Present:	**None**
Treatment Requirements:	**Restricted waste requires treatment to applicable standards.**
Additional Notices:	

Container Number: **KN-2862554000-004 (1/ 2)**

WIP / Approval Code:	**025686 / MARCSWFUEL**
Form Designation / CWA Status:	**Non-Wastewater / Non-CWA**
Waste Codes (Subcategories):	**D018, D019, D022**
Constituents (F001 - F005):	**None**
UHCs Present:	**None**
Treatment Requirements:	**Restricted waste requires treatment to applicable standards.**
Additional Notices:

Land Disposal Restriction Notification Form

Generator Name MALTA RFA

EPA ID Number NYD986535124 Manifest 001120101VES

This notice is being provided in accordance with 40 CFR 268.7 to inform you that this shipment contains waste restricted from land disposal by the USEPA under the land disposal restriction program. Identified below for each container is the designation of the waste as a wastewater or non-wastewater, the Clean Water Act (CWA) permit status associated with the treatment/disposal facility, applicable waste codes and any corresponding subcategories, list of any F001-F005 solvent constituents that are present in the waste, and any underlying hazardous constituents (UHC) that are present.

This notice is also being provided in accordance with 6 NYCRR 376.1(g)(1).

Container Number: KN-20119770000-002 (1/ 1)

WIP / Approval Code:	025084 / MARFS
Form Designation / CWA Status:	Non-Wastewater / Non-CWA
Waste Codes (Subcategories):	D001 (IGNITABLE CHARACTERISTIC WASTE, LIQUIDS >= 10% TOC PER 261.2 1(a)(1)), D010, D018, D022, D035, D039
Constituents (F001 - F005):	None
UHCs Present:	None
Treatment Requirements:	Restricted waste requires treatment to applicable standards.
Additional Notices:	

I hereby certify that all information in this and associated land disposal restriction documents is complete and accurate to the best of my knowledge and information.
