State Superfund Site Reclassification Notice Class 2 to Class 4

The Inactive Hazardous Waste Disposal Site Program is New York State's superfund program for identifying, investigating, and cleaning up sites where the disposal of hazardous waste may present a threat to public health and/or the environment. The New York State Department of Environmental Conservation (DEC) maintains a list of these sites in the Registry of Inactive Hazardous Waste Disposal Sites (Registry). The site identified above, and located on the attached map, has been reclassified on the Registry as a Class 4 site as it no longer presents a significant threat to public health and/or the environment for the following reason(s):

- Remedial activities associated with the site included the sampling and off-site disposal of drummed waste, excavation and off-site disposal of hazardous levels of polychlorinated biphenyls, excavation and on-site consolidation of landfill waste that extended off-site, covering and regrading of landfill waste on-site to meet design specifications, construction of a modified 6 NYCRR Part 360 low permeability cover system with gas ventilation and stormwater management systems, and construction of perimeter fencing to restrict access. Redevelopment of the site into a solar field is planned.

If you own property adjacent to this site and are renting or leasing your property to someone else, please share this information with them. If you no longer wish to be on the contact list for this site or otherwise need to correct our records, please contact DEC's Project Manager listed below.
