State Superfund Site Reclassification Notice Class 2 to Class 4

The Inactive Hazardous Waste Disposal Site Program (the State Superfund Program) is the State's program for identifying, investigating, and cleaning up sites where the disposal of hazardous waste may present a threat to public health and/or the environment. The New York State Department of Environmental Conservation (DEC) maintains a list of these sites in the Registry of Inactive Hazardous Waste Disposal Sites (Registry).

The site identified above, and located on the attached map, has been reclassified on the Registry as a Class 4 site as it no longer presents a significant threat to public health and/or the environment for the following reason(s):

- Soil and groundwater contamination has been effectively addressed through soil removal, construction of soil consolidation cells, and placement of a site cover.
- The emplacement of institutional controls (i.e. deed restriction) and development of a long-term Site Management Plan (SMP) to address potential exposures to remaining site contamination.
- The SMP requires Institutional Control (deed restriction) and Engineering Controls (consolidation cells and site cover), site inspection and maintenance of consolidation cells and site cover and a Periodic Review Report that summarizes the site remedy and certifies that controls are performing as designed.

If you own property adjacent to this site and are renting or leasing your property to someone else, please share this information with them. If you no longer wish to be on the contact list for this site or otherwise need to correct our records, please contact DEC's Project Manager listed below.
