-----------------	------

1.0 PURPOSE

This Installation Execution Plan (IEP) is a dynamic planning tool to be jointly used by Fort Drum (hereinafter referred to as the "Installation") and the Selected Executors (hereinafter referred to as the "Executing Agencies"). It supplements other required Army planning documents (Installation Action Plan [IAP], 1383s), summarizes the status of Fort Drum environmental restoration program, and, most important, provides a means of demonstrating intent and documenting commitment between Fort Drum and the Executing Agencies. Review of this document will be made jointly and on a quarterly basis with changes mutually agreed to by each party. Revisions will reflect changes in regulatory requirements, public needs, funding availability, contracting problems, and scope of work. Fort Drum and the Executing Agencies will use this IEP to direct, monitor, integrate, and select optimal environmental response actions to protect human health and the environment and to comply with regulatory enforcement requirements.

2.0 SCOPE

Effective management and coordination of multiple activities and support contractors at Fort Drum are primary concerns of both the Installation and the Executing Agencies. This IEP will help by clearly and specifically identifying:

- Fort Drum restoration objectives and constraints;
- Fort Drum selected project executor (and project team);
- Fort Drum overall restoration strategy and key decision points;
- Fort Drum Master Execution Schedule of current and planned activities;
- The Executing Agencies support services and project/program commitment;
- The Executing Agencies contracting windows and commitment for future activities;
- Fort Drum and the Executing Agencies upward reporting requirements;
- The process for updating and maintaining the IEP and IAP;
- Fort Drum and Executing Agencies coordination and communication process for program management.

11

PROJECT ASSIGNMENTS

3.0 PROJECT ASSIGNMENTS

The following matrix identifies the funding distribution and Executing Agencies for each project associated with an individual site. The Installation will be responsible for updating this chart as appropriate.

PROJECT ASSIGNMENTS

4.0 POINTS OF CONTACT

4.1 Installation

Jim Haynes, Chief, Environmental Division, (315) 772-5708 T; (315) 772-8050 F; DSN 341-5708.

Shelley Spayde, DERP Program Manager, (315) 772-4211 T; (315) 772-8050 F; DSN 341-4211.

Marie Corr, (315) 772-5323.

Michele Altieri, (315) 772-8335.

Ed Stoffer, Public Affairs Office, (315) 772-5461 T.

4.2 Regulatory

Vimal Minocha, Program Manager for New York State Department of Environmental Conservation, Albany Office, 518/457-4857 (x9253).

Wilfred Palamino, EPA Region II, New York

4.3 Executing Agencies

4.3.1 Baltimore District

Dick Strong, Chief of Design Management Section, (410) 962-2252 T; (410) 962-7736 F
Steve Cho, Design Manager, (410) 962-2700 T; (410) 962-7736 F
Joe Phelan, Design Manager, (410) 962-6730 T; (410) 962-7736 F

4.3.2 Kansas City District

George Cornwell, DERP Section Chief, (816) 426-2604 (x3136) T; (816) 426-5949 F
Brian Roberts, Technical Manager, (816) 426-2604 (x3065) T, (816) 426-5949 F

4.3.3 New York District

Frank Santomauro, Deputy District Engineer for Project Management, (212) 264-0100 T; (212) 264-0614 F

Lya Theodoratos, Project Manager, Environmental Project Management Branch, (212) 264-2460; (212) 264-0196 F

Bill Ebersbach, Fort Drum Resident Engineer, (315) 772-6313 T; (315) 772-5834 F; 341-6313 DSN

13

POINTS OF CONTACT

4.3.4 North Atlantic Division

Jack Pickett, IRP Program Manager, (212) 264-6484 T; (212) 264-9511 F

4.4 MACOM

Rudy Stine, Bioenvironmentalist, (404) 669-5751 T; (404) 669-7827 F; 367-5751 DSN

George Gricius, DERP Manager, (404) 669-5761 T; (404) 669-7827 F; 367-5761 DSN

4.5 ARMY ENVIRONMENTAL CENTER

Joe King, DERP Oversight, (410) 671-1535 T; (410) 671-1548 F

5.0 GENERAL POLICIES

5.1 Interface With Regulators. All contact with regulators will be the responsibility of the Installation. Executing Agencies and all associated contractors, AEC, and FORSCOM will not contact regulators without prior approval of the Installation. Executing Agencies will provide technical support to the Installation for regulatory meetings and issues as required.

5.2 Interface With Contractors. The Installation will not task or direct a contractor on matters pertaining to the contract without the approval of the contracting officer.

5.3 Cosigning 1383s. The Installation is responsible for preparing the 1383 exhibits. The Executing Agencies will provide technical assistance in preparation of the 1383 exhibits as required by the Installation. The completed 1383 exhibits will be signed by the Executing Agencies and the Installation prior to submission to MACOM.

5.4 Funding Changes. The Executing Agencies will provide to the Installation written explanations or funding requests for any changes in current and budget year funding requirements. Executing Agencies will shift funds between projects only with written approval from the installation.

5.5 Revising the DSERTS (RMIS). The Installation will take responsibility for updating DSERTS. Executing Agencies will provide assistance when requested by the Installation.

5.6 Execution Changes. The Executing Agencies will provide to the Installation written explanations for any changes to the quarter in which an obligation takes place for the current and budget years.

5.7 Updating the IEP. The Installation and Executing Agencies will be responsible for modifying this document quarterly to reflect any changes or modifications. Quarterly reviews should be performed in person.

15

GENERAL POLICIES

5.8 Upward Reporting Requirements. N/A.

5.9 Special Support.

5.9.1 Army IRP/Installation/MACOM Work Plan. The Installation and Executing Agencies will review the Army IRP work plan and MACOM project spreadsheet to ensure consistency with the execution strategy.

5.9.2 Installation Action Plan. The Fort Drum Installation Action Plan (IAP) will be updated annually by the Installation with assistance from the Executing Agencies. Funding for this update will be the responsibility of the Installation.

5.9.3 Public Participation. The Executing Agencies will provide technical support to the Installation on the Technical Review Committee (TRC) or Restoration Advisory Board (RAB). Any public information will be the responsibility of the Installation.

5.9.4 Press Relations. The Installation will be responsible for all inquiries from the press. Inquiries to the Executing Agencies or any of their contractors will be referred to the Installation Public Affairs Office (PAO).

5.9.5 Decision Documents. Executing Agencies will prepare the draft decision document and submit it to the Installation as required. The Installation is responsible for distribution of the decision document and for the review process. AEC will assist Installation with review prior to submission to FORSCOM if requested. The Executing Agencies will provide to the Installation response to comments obtained during any public review period. The Installation is responsible for the final document preparation and submissions.

5.9.6 Legal Procedures. Executing Agencies are responsible for contractual issues concerning projects under their control. The resolution of all other legal issues is the responsibility of the Installation.

16

GENERAL POLICIES

5.9.7 NEPA. Installation will identify the need for National Environmental Policy Act (NEPA) documentation for assigned projects. Executing Agencies will assist the Installation NEPA Coordinator as requested. The Installation will fund the NEPA requirement and will be responsible for the distribution of NEPA documents.

5.9.8 Installation Access. All Executing Agencies and their contractors, with the exception of the New York District Resident Office, shall notify the Installation DERP Manager or designee in writing two weeks prior to proposed field work. This notification will include who, what, where, and when.

5.9.9 In-Progress Reviews. An In-Progress Review (IPR) will be held monthly to discuss the status of remediation design and construction activities. The IPR will be held at Fort Drum or by conference call and will be sponsored by the New York District Project Manager.

5.9.10 Construction Contract Submittal Review. The Fort Drum Resident Engineer will provide the Installation with selected contractor submittals for review. Prior to award of individual contracts, the Installation will submit a list of submittals they wish to review to the Resident Engineer Office.

5.9.11 Scope of Work. Executing Agencies will submit all scopes of work to the Installation for review/comment.

PROJECT EXECUTION PLANS

6.1 Site FTD-007 Old Sanitary Landfill

6.1.1 Project Description.

6.1.1.1 Site Description. 40 Acre Landfill. See the IAP for further details.

6.1.1.2 Contaminants. DDT, endosulfan, heptachlor, benzene, ethylene, toluene, xylenes, and naphthalene.

6.1.1.3 Site Strategies and Assumptions. Horizontal well, leachate collection system is projected to be installed beginning April 1995. The creek bed sediments will need to be addressed once the leachate collection system is in place.

6.1.1.4 Special Considerations. There is currently no agreement with the POTW to accept a leachate from Ft. Drum. A treatment system will be installed. Potential for Gas Alley GW to be treated through the same system. The landfill is part of the watershed for the town of Evans Mills.

6.1.1.5 Estimated Costs. See cost breakdowns at end of Subsection 6.1.

6.1.2 Execution/Acquisition Strategy. Kansas City District awarded the Interim Corrective Measure Contract (leachate collection system) in 4th quarter FY94. Monitoring program will start January 1995 for one year with CDM. New York District will oversee the leachate collection system construction contract starting in FY95.

6.1.3 Current Actions. Exposed drums will be removed from the face of the landfill.

18

PROJECT EXECUTION PLANS

6.1.4 Assumptions and Future Actions. Kansas City will carry the project through the current phase (Interim Corrective Measure) as per current design. Baltimore District will assume responsibility for any further action. Omaha District Rapid Response will be requested to remove exposed drums.

6.2 Site FTD-022 EOD Site (Range 17)

6.2.1 Project Description.

6.2.1.1 Site Description. Former Explosive Ordnance Disposal Site (Range 17). See the IAP for further details.

6.2.1.2 Contaminants. Lead, chlordane, PAHs and DNT.

6.2.1.3 Site Strategies and Assumptions. Groundwater investigation to determine if contaminants have migrated off site.

6.2.1.4 Special Considerations. Limited access. Dangerous drilling conditions due to potential UXO.

6.2.1.5 Estimated Costs. See cost breakdowns at end of Subsection 6.2.

6.2.2 Execution/Acquisition Strategy. RI for groundwater is combined with Range 35. Oversight by Baltimore District in FY94.

6.2.3 Current Actions. Baltimore awarded contract in 4Q FY94.

6.2.4 Assumptions and Future Actions.

6.3 Site FTD-024 Explosive Ordnance Disposal Sites (Range 35)

6.3.1 Project Description.

6.3.1.1 Site Description. Explosive Disposal Site adjacent to firing range. See the IAP for further details.

6.3.1.2 Contaminants. Lead, PAHs.

6.3.1.3 Site Strategies and Assumptions. Through groundwater sampling determine whether contaminants are migrating toward the Antwerp water supply.

6.3.1.4 Special Considerations. Limited access to site. Full access two weeks a year and weekly access on Mondays.

6.3.1.5 Estimated Costs. See cost breakdowns at end of Subsection 6.3.

6.3.2 Execution/Acquisition Strategy. Baltimore District will oversee a limited groundwater investigation using an Indefinite Delivery Contract (IDT).

6.3.3 Current Actions. Baltimore District awarded RI contract in 4th Quarter FY94.

6.3.4 Assumptions and Future Actions. Limited migration of heavy metals and explosives.

6.4 Site FTD-025 Old Hosford Swimming Pool EOD

6.4.1 Project Description.

6.4.1.1 Site Description. Abandoned Swimming Pool that was used for Explosive Ordnance Disposal. See the IAP for further details.

6.4.1.2 Contaminants. Heavy Metals, PAH.

6.4.1.3 Site Strategies and Assumptions. No release and no migration, which will be confirmed by monitoring.

6.4.1.4 Special Considerations. Limited Access, Range 24 (Training Area 14).

6.4.1.5 Estimated Costs. See cost breakdowns at end of Subsection 6.4.

6.4.2 Execution/Acquisition Strategy. Baltimore District will conduct groundwater investigation and monitoring.

6.4.3 Current Actions. Preparing modification to RI contract.

6.4.4 Assumptions and Future Actions. Assuming no further action except monitoring.

6.5 Site FTD-030 Gas Alley

6.5.1 Project Description.

6.5.1.1 Site Description. Approx. 2 miles long stretch of multiple fueling points with groundwater and soil contamination. See the IAP for further details.

6.5.1.2 Contaminants. Degraded fuels, benzene, ethyl benzene, toluene, xylene (BTEX), and lead.

6.5.1.3 Site Strategies and Assumptions. Removal of underground storage tanks and most associated piping completed. Seven separate plumes that eventually comingle with other site contamination have been identified.

(
6.5.1.4 Special Considerations. N/A.

6.5.1.5 Estimated Costs. See cost breakdowns at end of Subsection 6.5.

6.5.2 Execution/Acquisition Strategy. Kansas City District is responsible for the installation and sampling of groundwater monitoring wells that are currently contracted with CDM and Radian. Baltimore District will be responsible for contracting for final site closure. New York District is responsible for the administration of remediation contracts. Current remediation contracts for Gas Alley are under both firm fixed price and Preplaced Remedial Action Contract (PPRAC) contracts. Baltimore District will evaluate the use of a Total Environmental Restoration Contract (TERC) for all further remedial actions for Gas Alley. TERC will be in place at Baltimore in FY 95.

PROJECT EXECUTION PLANS

6.5.3 Current Actions. New York District is overseeing the removal of USTs and Contaminated Vadose Zone Soil. Kansas City District is overseeing the groundwater portion of the investigation.

6.5.4 Assumptions and Future Actions. Additional sites associated with Gas Alley are 3805, 1595, 1599 and the WWII Landfill. Above listed sites have their own RMIS and 1383 number and have been treated as separate projects, and are geologically interconnected to Gas Alley.

6.6 Site FTD-031 Bldg T91 (UST)

6.6.1 Project Description.

6.6.1.1 Site Description. See the IAP for further details.

6.6.1.2 Contaminants. Petroleum and PAHs.

6.6.1.3 Site Strategies and Assumptions. IRA will be the final remedy.

6.6.1.4 Special Considerations. Groundwater contamination source still unknown.

6.6.1.5 Estimated Costs. See cost breakdowns at end of Subsection 6.6.

6.6.2 Execution/Acquisition Strategy. Baltimore District will be overseeing IRAs.

6.6.3 Current Actions. Completing the RI.

6.6.4 Assumptions and Future Actions. PAH contamination is assumed to be related to the railroad that formerly ran between T91 and T93.

36

6.7 Site FTD-053 Building 2140

6.7.1 Project Description.

6.7.1.1 Site Description. Removed abandoned leaking USTs at the AAFES Gas Station. See the IAP for further details.

6.7.1.2 Contaminants. BTEX.

6.7.1.3 Site Strategies and Assumptions. Phase I will be groundwater treatment and Phase II will be soil treatment.

6.7.1.4 Special Considerations. High potential for off site contamination going into the Black River. Current regulator lead is under local Spill Response, expect lead to go eventually to Albany.

6.7.1.5 Estimated Costs. See cost breakdowns at end of Subsection 6.7.

6.7.2 Execution/Acquisition Strategy. Baltimore District will be responsible for groundwater and soil investigations. Pilot Studies will be used on site under the direction of Baltimore. New York District will be responsible for oversight of the remediation.

6.7.3 Current Actions. RI Report completed. IRA was awarded by Baltimore District in 4th Quarter FY94.

6.7.4 Assumptions and Future Actions. IRAs will probably be the final remedies.

6.10 Site FTD-076 Bldg 4002 Pesticide Site

6.10.1 Project Description.

6.10.1.1 Site Description. Former pesticide and herbicide mixing and storage area. WWII wooden structure which will be removed as part of an interim remedial action. See the IAP for further details.

6.10.1.2 Contaminants. Pesticides, herbicides, lead, dioxin.

6.10.1.3 Site Strategies and Assumptions. Interim Remedial Action to remove source (building), line area (to prevent migration in soils), and groundwater. Install monitoring wells.

6.10.1.4 Special Considerations. Contaminated building was occupied, therefore, Occupational Health Study will be performed prior to demolition.

6.10.1.5 Estimated Costs. See cost breakdowns at end of Subsection 6.10.

6.10.2 Execution/Acquisition Strategy. The Interim Remedial Action will be awarded 2nd Quarter FY95 by Kansas City District and will be administered by New York District. The Occupational Hazard Analysis effort was awarded 4th Quarter FY94. CDM Federal Programs shall install Monitoring Wells and determine the extent of soil contamination after removal of the source and prior to installation of the geomembrane cover.

6.10.3 Current Actions. Awaiting contract award.

6.10.4 Assumptions and Future Actions. No significant migration of contaminants to groundwater has occurred. It is assumed that the geomembrane cover will restrict any migration. Additional soil may be required to be removed at a later date.

6.11 Site FTD-087 Sage Complex

6.11.1 Project Description.

6.11.1.1 Site Description. Closure of Tank Farm and removal of associated contamination. See the IAP for further details.

6.11.1.2 Contaminants. Petroleum and solvents.

6.11.1.3 Site Strategies and Assumptions. Closure of Tank Farm via tank removal.

6.11.1.4 Special Considerations. Limited access.

6.11.1.5 Estimated Costs. See cost breakdowns at end of Subsection 6.11.

6.11.2 Execution/Acquisition Strategy. FY 94 through FY 95 Kansas City District intends to contract IDT services for completion of the tank closure design. New York District will oversee RA actions at the site. On-post tank will be done with Kansas City District PRAC.

6.11.3 Current Actions. Work to prepare existing tank closure design and complete facility investigation. Baltimore District is conducting off-post RI.

6.11.4 Assumptions and Future Actions. Army has not determined liability for off-site contamination. DASA approved to take investigation actions and construct no-access fence. Current Kansas City District A/E has limited capacity in their contract. Any actions beyond those stated in this document will be the Baltimore District's mission.

6.12 Site FTD-088 T-4006 UST

6.12.1 Project Description.

6.12.1.1 Site Description. Removal of Underground Storage Tank revealed soil contamination that couldn't be removed at time of excavation. See the IAP for further details.

6.12.1.2 Contaminants. BTEX, naphthalene, solvents, and POLs.

6.12.1.3 Site Strategies and Assumptions. Currently site is regulated under local DEC UST Regulations. Quarterly monitoring has revealed TCE contamination in one well, unknown source. Pesticide and herbicide levels seen in wells are most likely attributed to Site 4002.

6.12.1.4 Special Considerations. High potential for site to fall under Albany Hazardous Waste DEC Regulatory Requirements.

6.12.1.5 Estimated Costs. See cost breakdowns at end of Subsection 6.12.

6.12.2 Execution/Acquisition Strategy. Baltimore District is overseeing a long term monitoring program.

6.12.3 Current Actions. Monitoring groundwater.

6.12.4 Assumptions and Future Actions. Expected to be no further action.

6.13 Site FTD-089 Bldg 1245 UST Contamination

6.13.1 Project Description.

6.13.1.1 Site Description. Contamination in soil and groundwater in the 1245 Motor Pool from former leaking USTs. See the IAP for further details.

6.13.1.2 Contaminants. Diesel fuel and mo gas

6.13.1.3 Site Strategies and Assumptions. Pilot Study will be conducted to address the soil and groundwater contamination.

6.13.1.4 Special Considerations. High traffic area.

6.13.1.5 Estimated Costs. See cost breakdowns at end of Subsection 6.13.

6.13.2 Execution/Acquisition Strategy. Baltimore District will oversee Pilot Study to remediate the site.

6.13.3 Current Actions. In process of scoping Pilot Study.

6.13.4 Assumptions and Future Actions. Pilot Study will be final remedy.

6.14 Airfield Sanitary Landfill

6.14.1 Project Description.

6.14.1.1 Site Description. This site was formerly known as Existing Sanitary Landfill. See the IAP for further details.

6.14.1.2 Contaminants. Benzene, Phenol, and Manganese.

6.14.1.3 Site Strategies and Assumptions. The wells will be monitored for three years.

6.14.1.4 Special Considerations. The landfill needs a formal closure.

6.14.1.5 Estimated Costs. See cost breakdowns at end of Subsection 6.14.

6.14.2 Execution/Acquisition Strategy. Kansas City District is currently monitoring the wells around the Landfill. Baltimore District is going to have a follow-on monitoring program.

6.14.3 Current Actions. Kansas City District is currently conducting GW monitoring program.

6.14.4 Assumptions and Future Actions. Baltimore District will assume responsibility for any further action beginning 3rd Quarter FY95.
