

Primoshield 633027 Site Visit

DER Site Management, 12/20/2011

Photos with Notes

Photo

Description

Photo of Jerry Rawcliff from the Maine, AMEC office. He and Jeri Kiburz were onsite sampling the site groundwater wells.

I had made the trip out to touch base with AMEC and to troubleshoot the PLC.

I couldn't connect to the PLC because I had not connected directly to it before - it always had been connected by Payson, Carl or Frank. In error I was trying to connect through the modem in the panel. I should have used "PORT1" on the PLC.

On 12/22, Jeri Kiburz called to say that she had replaced the 10-amp fuse with a 15-amp fuse and started the plant. The pump ran but cycled irregularly. She turned off the pump and called me. She and Karl will troubleshoot this further.

Photo looking past Jerry towards Jeri Kiburz' truck.

On this trip I met Joel Grimaldi, who owns the property on the west. His business is Metallogix and he makes fabricated metal objects, one current job is for a water treatment plant.

Joel Grimaldi would like a copy of the groundwater results for the wells on his property. He also said he was interested in purchasing the Primoshield property. I recommended he read the notice on the fence and contact the City of Utica for details.

Mr. Grimaldi's contact info:

Joel Grimaldi
Metallogix
1305 Conkling Ave
Utica, NY 13501
