Photo

Description

George Momberger and I visited the site on 5/3/2012 at 9:25 AM. I turned the pump on and left it in hand. The meter read 001115 00 gallons.

Notice how the grass has been mowed. I assumed that Steve Bateman had come in and mowed. Odd, I hadn't been aware that he was coming to mow. The mystery was solved when we chatted with Joel Grimaldi, neighbor on the south.

The grass has been mowed and according to Joel, the City of Utica has been mowing the site because a nearby resident had complained about the height of the grass.

Continuing panorama sweep.

George and I left at 9:30 AM to travel north to Hailesboro to check his spill site.

We returned at 4:08 PM to check on the pump. The motor was still running but no water was flowing. I moved the selector from "Hand" to "off."

End of panorama sweep.

Meter: 001120 00 gallons.
There is a difference of 500 gallons with a margin of error of 100 gallons, plus or minus.

I locked the door and gate at 4:10 PM. George had engaged Joel Grimaldi in conversation so we remained to talk for another fifteen minutes. Joel wants to buy Primoshield. We left the street at about 4:30 PM.
