Re: SCWP Remediation Outfall Monitoring –December 2008

Dear Tom:

Enclosed are the laboratory reports resulting from samples obtained from three locations (the tower influent, the tower discharge, and the outfall at the cascade) for the month of December 2008. Also enclosed are spreadsheets and graphs that display the data for these sites. For clarity, only the previous 12 months data are graphed. We are also including a table of selected groundwater depths for general reference.

The TCE results were:

System Influent-	4.2 ug/l
Tower Discharge-	2.2 ug/l
Cascade Outfall-	1.1 ug/l

All parameters meet operational guidelines established in Kevin Delaney's (NYSDEC) correspondence of May 10, 2001. Please let me know if there are any questions with the submittal.

Sincerely,

John H. Buck, P.E.
Principal Engineer
