1.0 INTRODUCTION

This report addresses the semiannual groundwater sampling event that was completed in December 2012. The period of time covered by this report is from June 2012 to December 2012. This report is organized into the following sections:

- Site Background
- Recent Site Activities
- Groundwater Sampling
- Groundwater Quality
- Site Inspections
- Site Maintenance
- Report Summary

A site map showing the location of site monitoring wells, recovery wells, and piezometers is attached as Figure 1.

2.0 SITE BACKGROUND

The groundwater treatment system at the Stauffer Management Company (SMC) Maestri Site began operation in 1996. On behalf of SMC, on May 8, 2008, Envirospec Engineering, PLLC (Envirospec) submitted a request to the New York State Department of Environmental Conservation (NYSDEC) to shut down the treatment system. As stated in the request, levels of contaminants remaining in the site groundwater were low, the system was no longer effective as shown by the consistency of the results, and the groundwater treatment system had achieved the goals of the ROD. NYSDEC approved this request in a letter dated May 14, 2008, and the groundwater treatment system was shut down on May 27, 2008.

SMC agreed to conduct weekly site inspections and monthly sampling of eight (8) perimeter monitoring wells for the first three months following shutdown, from June to August 2008. The elevations of site monitoring wells were also monitored on a monthly basis during this time. After the three month period, sampling and reporting was conducted quarterly from November 2008 to June 2009.

In June 2009, a new monitoring well (PZ-20) was installed downgradient of the site in the Alhan Parkway residential area (153 Alhan Parkway) to verify that the Maestri site groundwater contamination plume was not migrating towards this residential area. A second downgradient monitoring well (PZ-21) was installed in June 2012. The locations of PZ-20 and PZ-21 are shown on Figures 2 and 3.

Based on groundwater monitoring results, in November 2009, Envirospec requested NYSDEC approval to change the groundwater sampling frequency from quarterly to semiannual. On

November 13, 2009, the NYSDEC granted the request.

3.0 GROUNDWATER SAMPLING – DECEMBER 2012

The December 2012 groundwater sampling event was conducted on December 4th, 2012. Prior to monitoring well purging, all site monitoring wells were gauged for static water level. A table of groundwater elevations from the December 4th 2012 sampling event is included as Table 1 below. A groundwater contour map depicting calculated site groundwater elevations is provided as Figure 2.

Table 1- Groundwater Elevations – December 4th, 2012

Well Number	Measuring Point Elevation	Depth to Water	Groundwater Elevation
MW-9	408.87	18.64	390.23
MW-10	413.82	16.55	397.27
MW-12	418.28	12.15	406.13
MW-14	405.17	18.42	386.75
PZ-2	407.23	12.62	394.61
PZ-3	409.60	19.41	390.19
PZ-4	394.37	8.81	385.56
PZ-5	393.37	7.4	385.97
PZ-6	410.15	19.95	390.20
PZ-7	409.13	19.39	389.74
PZ-20	386.00	4.1	381.90
PZ-21	386.70	2.1	384.60
MW-2A (formerly RW-2)	406.40	19.21	387.19
RW-3	407.01	19.54	387.47
RW-5	409.18	18.71	390.47
RW-6	393.64	7.3	386.34
RW-7	405.76	18.35	387.41
RW-8	406.81	18	388.81
PZ-9	408.69	18.47	390.22
PZ-10	407.04	17.66	389.38
PZ-12	408.17	15.62	392.55
PZ-13	407.12	14.95	392.17
PZ-14	408.44	12.49	395.95
PZ-15	406.74	18.98	387.76
PZ-18	406.30	19.11	387.19
PZ-19	406.88	18.67	388.21

A minimum of three (3) monitoring well volumes were purged from each of the monitoring wells scheduled for sampling. Monitoring wells were purged with either a two (2)-inch submersible Grundfos pump and poly tubing, a two (2)-inch disposable polyethylene bailer, or internal well pumps controlled from the treatment shed. Purged water was collected and containerized in a mobile poly tank. The containerized water was brought to the Skaneateles Falls Site and sent through the onsite Waste Water Treatment Plant (WWTP) for treatment. Field data, including pH, temperature, conductivity, and total dissolved solids (TDS), were recorded after each well volume removed. A summary of the field data and the total volume of groundwater purged are presented in Table 4. Samples were collected using disposable bailers. The monitoring well sampling field reports are included as Attachment 1.

A duplicate sample was collected from PZ-20 for laboratory and sampling quality assurance/quality control purposes. The result of the duplicate sample, as shown in Table 3, was within a reasonable margin of the original sample. A trip blank was generated to ensure no cross contamination or outside contamination was present.

4.0 GROUNDWATER QUALITY

Samples were sent to Certified Environmental Services Laboratory (CES) in Syracuse, NY following typical chain of custody procedures for xylene analysis via EPA Method 624. The analytical results are included as Attachments 2. A summary of results from this sampling round is presented in Tables 2 below as well as in the attached Table 3.

Table 2- Summary of Xylene Concentration in Groundwater

Monitoring well Number	December 2012 Xylene Concentration (ppb)
MW-9	NS
MW-2A	2,903
RW-3	ND < 3.0
RW-5	13
RW-6	511
RW-7	145
RW-8	7.2
PZ-4	ND < 3.0
PZ-20	ND < 3.0 (ND < 3.0)
PZ-21	ND < 3.0
TRIP	ND < 3.0

Note: Duplicate sample represented in (parentheses).

NS- Not Sampled

For the December 2012 sampling event MW-2A, RW-5, RW-6, RW-7, RW-8 had xylene concentrations above the method detection limit. The xylene levels at RW-5, RW-7, RW-8 and MW-9 indicate an increase in total xylene since June 2012, while RW-6 indicates a slight decrease in total xylene, since June 2012. Off-site monitoring wells PZ20 and 21 were both non-detect for xylenes during the December 2012 sample event.

The December 2012 sampling results are comparable to historical xylene concentrations obtained prior to the groundwater treatment system shutdown. Based on the current sampling results, site groundwater quality continues to show fluctuations in total xylene concentrations across sampling events and remains consistent with historic total xylene concentration across the site.

As discussed in Envirospec's May 8, 2008 letter, the monitoring wells selected for sampling after shutdown present a true cross section of the property and continued sampling of these monitoring wells remains adequate for plume migration monitoring.

6.0 SITE INSPECTIONS

Since August 2008, site inspections were conducted during each groundwater sampling event. Items reviewed during the site inspections include site security, recovery and monitoring well water elevations, general site maintenance, erosion control, condition of neighboring properties and general observations of site conditions (i.e. appearance of sink holes, odors, vegetation growth, etc). A copy of the site inspection report completed during the December 2012 sampling event is included as Attachment 3.

7.0 SUMMARY

There have been no flooding events that compromised the effectiveness of the Engineering Controls (i.e. soil cover and vegetation) in place at the Site since the groundwater treatment system shutdown. No elevated xylene concentrations were observed in the downgradient offsite monitoring wells PZ-20 and PZ-21.

The next semiannual sampling and site inspection will be completed in Spring 2013. The NYSDEC will be notified two (2) weeks prior to sampling.

Well Sampling Field Record

Project	SMC Maestri	Project No.	E12-621
Location	904 State Fair Blvd, Syracuse, NY		

Well Info

Well #:	PZ-20	Well Location:	Off-Site
Well Diameter (in):	2"	Well Condition:	
A. Total Well Depth (ft bgs):	20'	Depth to Bedrock (ft):	
B. TOC to Grade (ft):	--	TOC Elevation (ft):	
C. Depth to Water TOC (ft):	4.10	G. Volume Factors:	2-inch well = 0.163 gal/ft
D. Water Column Height (ft):	15.90	= (A + B) - C	4-inch well = 0.653 gal/ft
E. Total Well Volume (gal):	2.56	= D * G	6-inch well = 1.468 gal/ft
F. Purge (3 volumes) (gal):	7.78	= E * 3	8-inch well = 2.609 gal/ft

Purge

Purge Date:	12/4/12	Pump/Method:	Bailer
Purge Start Time:	1015	Avg Approx Flow Rate:	
Purge Stop Time:	1029	Total Volume Removed (approx):	8 gallons
Did well dry out?	no		

Sampling		Date; Time:	12/4/12 1430
Sample ID:	PZ-20	pH	5.79
Sample Method:	Grab	Temp (°C)	16.9
Sample Date:	12/4/12	Conductivity (mS/cm)	1518
Sample Time:		TDS (ppm)	748

Appearance

Clear to slightly cloudy

Comments

Duplicate collected from PZ-20.

Site Inspection Report

Client: Stauffer Management Company LLC

Project No.: E12-621

Location: Maestri Site, 904 State Fair Blvd, Geddes, NY

Inspected By: B. Heeseman / F. Zart

Please note any deficiencies, issues, or actions taken at the bottom of the page or on continuation pages

Site Security	Circle one			Comments/Action Required
1. Was gate closed and locked when arriving at site?	☒ Y	☐ N	☐ NA	
2. Are there any holes or breaks in the fencing?	☒ Y	☒ N	☐ NA	
3. Was the door to the treatment shed locked?	☒ Y	☐ N	☐ NA	
4. Is the back gate closed and locked?	☒ Y	☐ N	☐ NA	
5. Are there any signs of vandalism or unauthorized entry (odd tire tracks, damage to fence, strange debris [bottles, cans, etc])?	☒ Y	☒ N	☐ NA	
5a. If so, explain below and notify SMC and Envirospec immediately				
Wells				
6. Are wells intact? (except PZ-10 which has been damaged)	☒ Y	☒ N	☐ NA	PZ-9 (unlocked), PZ-10 (locked)
7. Are all wells covered (with lid or cap)? (except wells noted below)	☒ Y	☒ N	☐ NA	
8. Are all wells locked? (except wells noted below)	☒ Y	☒ N	☐ NA	
Site Maintenance				
9. Is there any garbage or debris? If so, please remove/discard.	☒ Y	☒ N	☐ NA	
10. Is there visible dust?	☒ Y	☒ N	☐ NA	
11. Does the grass need to be mowed?	☒ Y	☐ N	☐ NA	
12. Do any areas need to be weeded or shrub cleared?	☒ Y	☒ N	☐ NA	
13. Are there any bald spots in grassy areas?	☒ Y	☒ N	☐ NA	
14. Are the access roads clear?	☒ Y	☐ N	☐ NA	
15. Do any areas (site roads or access to wells) need to be plowed?	☒ Y	☒ N	☐ NA	
16. Are there any sink holes throughout the site?	☒ Y	☒ N	☐ NA	
17. Any odors onsite?	☒ Y	☒ N	☐ NA	
18. Are site signs still up and visible?	☒ Y	☐ N	☐ NA	
Erosion Control				
19. Is silt fence still intact and upright?	☒ Y	☐ N	☒ NA	
19a. If areas need repair or erosion control installed, indicate below and contact Abscope for repairs.				
20. Is there any evidence of runoff? (i.e. water flow paths on ground)	☒ Y	☒ N	☐ NA	
21. Is there any standing, ponded, or pools of water?	☒ Y	☒ N	☐ NA	
22. Are there any signs of runoff at the northeast corner? (stone area)	☒ Y	☒ N	☐ NA	
23. Is there currently any surface water runoff?	☒ Y	☒ N	☐ NA	
23a. If so, describe where, approximate flow, and appearance of water below.				
Treatment System				
24. Are the breakers for the pumps still in the off position?	☒ Y	☐ N	☐ NA	
25. Does effluent totalizer on the wall for still read 2846902?	☒ Y	☐ N	☐ NA	
25a. If not, contact Envirospec or SMC immediately and check that effluent valve is closed.				
26. Are all critical valves in the closed position?	☒ Y	☐ N	☐ NA	
27. Are there any system status alarms on the computer?	☒ Y	☐ N	☒ NA	Not present
27a. If so, describe below how they have been handled. (this does not include well level alarms)				
28. Are all flow values on computer "zero"?	☒ Y	☐ N	☒ NA	Not present
("Flow to sewer," "Tot flow to sewer," "tot daily flow," and "TGAL" for each well should each be "zero")				
28. Check level of sump. Does sump need to be pumped out?	☒ Y	☒ N	☐ NA	
29. List water level for each recovery well as shown on computer: (total depth of well is shown in brackets)				
RW-7 [27.5']	☒ N/A		RW-5 [24.5']	☒ N/A
RW-2 (not online)	☒ N/A		RW-8 [24.5']	☒ N/A
RW-3 [25.3']	☒ N/A		RW-6 [21.8']	☒ N/A
30. Are any recovery wells at close to overtopping? (ref total depth above)	☒ Y	☐ N	☒ NA	
Upon leaving the site, check the following:				
31. Is the treatment shed locked?	☒ Y	☐ N	☐ NA	
32. Were the gates closed and locked after leaving site?	☒ Y	☐ N	☐ NA	

Note: Some wells cannot be locked including PZ-10, RW-3, RW-4, and RW-5.
