Laboratory Task Order - Revised

Date: 7/26/2013

Laboratory Name: Accutest

WSP Project Name: Emerson Power Transmission, Ithaca, New York

WSP Project Manager Contact Information: Scott Haitz

Terms & Conditions/Cost Reference: Master Services Agreement between WSP and Laboratory (MSA; executed on April 16, 2013). Note: this Task Order is incorporated by reference into the MSA and is subject to all terms and conditions therein.

WSP Project & Task Numbers: 4255/05

Task Description: Real-Estate Transaction Due Diligence Oversight

The following work is to be completed under this Task Order:

The Laboratory will provide sampling containers and supplies including coolers, sample containers, preservatives (as required), chain-of-custody forms, trip blanks, custody seals, return labels, packing material, and 1 liter of analyte-free water for the following analysis and number of samples:

Parameters	Method	Number of Samples
Soil		
VOCs	*EPA Method 5035/8260 (en-cores)*	*10*
SVOCs	*EPA Method 8270*	*10*
RCRA Metals & Cyanide	*EPA 6010/7471*	*10*
PCBs	*EPA 8082*	*5*
Pesticides	*EPA 8081*	*5*

The Laboratory shall ship the containers and supplies to the location listed below for delivery no later than Tuesday July 30, 2013 at 9:00 A.M.

Erik Reinert c/o Lenny Dodge
Emerson Power Transmission
620 South Aurora Street
Ithaca, NY 14850

The following are project-specific details to be followed:

If samples are analytically screened and results indicate an elevated level of an analyte, the sample must be analyzed without dilution. Samples within the calibration range of the undiluted sample are to be reported from the initial analysis (i.e., undiluted sample). For analytes with concentrations outside the calibration range, the sample is to be diluted and then analyzed. The

results for the diluted analysis also are to be reported. If the laboratory has a concern about the analyte concentration, the purge amount of the sample may be changed to reduce the reporting limits. For example, a sample may be purged at 25 ml instead of 5 ml; however, the laboratory still must achieve the required reporting limit. In summary, the laboratory must make every effort to meet the required reporting limits for the majority of the analytes. Any results with reporting limits greater than the screening criteria require prior notification and an explanation as to the effort taken by the laboratory.

In addition:

- Detection limits outlined in the specific analytical methods are to be used.
- Bottle requirements shall be in accordance with method requirements.
- VOCs reporting list shall be Accutest's TCL list (TCL42) plus up to 20 Tentatively Identified Compounds (TICs).
- Metals to be reported shall be the Resource Conservation and Recovery Act (RCRA) metals + cyanide.
- SVOCs reporting list shall be Accutest's TCL list (ABTCL ALL) plus up to the 20 TICs.
- PCBs reporting shall be from Accutest's PCB List (PCB All).
- Pesticides reporting shall be from Accutest's Pesticide TCL List (PTCL All).
- The Data Package will include a full WSP Level III package in compliance with NYSDEC ASP Category B requirements. The electronic data deliverable (EDD) shall be in the format of the NYSDEC EQUIS guidelines, including all data qualifiers. The EDD and final data package are to be sent to Erik Reinert via electronic submission (e.g., Lablink).
- The data MUST BE reported to the Method Detection Limit.
- A QA check of the data deliverable summary form and the EDD shall be performed before the package or EDD is sent, to ensure the following:
  1. results appear in EDD exactly as they appear in the final Data Package
  2. consistency in concentrations, qualifiers, and detection limits reported
  3. no rounding error discrepancies occur
  4. **sample identifications must appear in the EDD exactly as they appear on the chain-of-custody**, no additional text is added to sample identifications; do not truncate sample identifications; if a sample identification, as recorded on the chain-of-custody, is too long for the character restriction for the corresponding EDD field, increase the number of characters to accommodate the sample identification for this field
  5. limit 1 and limit 2 fields are correctly populated (MDL reported in the Limit1 field and Reporting Limit in the Limit2 field)
  6. no extraneous text in the concentration field
  7. detection limits always completed
  8. dilution column always completed when required

Task Invoicing:

Laboratory is to submit invoices to WSP USA Corp., Attention: **Environmental Accounts Payable**, 512 Seventh Avenue, 13th Floor, New York, NY 10018.

A copy of the final invoice should also be e-mailed to Erik Reinert (erik.reinert@wspgroup.com).

Task Schedule: Sampling will commence on July 30, 2013. A standard turn-around time of 7 business days is requested.
