Petroleum Bulk Storage (PBS) Update and Renewal Application

version 3.40

(Submission #: HQQ-10R5-JPWQP, version 1)

Details

Submitted	9/17/2026 (0 days ago) by Lauren Richardson
PBS Number	8-227277 Erwin (Steuben) (5142)
Submission ID	HQQ-10R5-JPWQP

Form Input

Overview

Your Registration expires on the date below. Please note that renewals are only available to facilities which are within 1 year of expiring.
05/07/2027

Are you looking to renew your facility at this time?
Yes

Before submitting your application for renewal, please review the sections of this application to ensure that all information is accurate.
You may make changes on this application before submitting.

PBS Number
8-227277

Facility Name
NYSDOT - Coopers Plains Facility

Town and County
Erwin (Steuben) (5142)

Type of Facility
Other

Facility

Would you like to modify any Facility information on this page?
Yes

PBS Number
8-227277

Facility Name
NYSDOT - Coopers Plains Facility

Facility's Address
3863 MEADS CREEK ROAD
Painted Post, NY 14870

Town and County
Erwin (Steuben) (5142)

Facility Location - Please enter your facility's address in order to calculate its Latitude and Longitude. Alternatively, find your facility on the map to automatically generate the Latitude and Longitude.
42.188126223293,-77.14379879924635

Facility's Phone Number
(607) 962-4639

Facility Type
Other: STATE TRANSPORTATION

Some information is "read-only". If you want to make any updates to "read-only" information, please reach out to your NYSDEC regional office*, bulk storage program. Contact information for each region can be found below:

Tanks (1 of 5)

Tank Number: 6203

Modification Type
No change needed

Warning: If "No change needed" is selected, information for this tank will not be updated.

Name of Tank
6203

Tank storage capacity (gallons)
275

Is this tank aboveground or underground?
Aboveground on saddles, legs, stilts, rack or cradle

Type of petroleum stored
motor oil

Tank installation date
01/01/1997

Tank status
In Service

Tank design/construction material
Steel/Carbon Steel/Iron

Tanks (2 of 5)

Tank Number: 6206

Modification Type
Tank repair/modification

Name of Tank
6206

Is this tank aboveground or underground?
Aboveground on saddles, legs, stilts, rack or cradle

Type of petroleum stored
waste oil/used oil

Tank installation date
08/16/2012

Tank status
In Service

Tank storage capacity (gallons)
300

Tank design/construction material
Galvanized Steel Alloy

Tank internal corrosion protection
None

Tank external corrosion protection
Painted/Asphalt Coating

Tank secondary containment
Vault (w/access)

Tank leak detection
Interstitial - Manual Monitoring

Tank overfill prevention
High Level Alarm
Product Level Gauge (A/G)

Tank spill prevention
Other: Double Walled

If this tank has dispenser(s), do they have under dispenser containment?
Yes

Pumping/dispensing method
None

Does this tank have piping?
Yes

Piping install date
NONE PROVIDED

Is the piping aboveground or underground?
Aboveground

Piping design/construction material
Galvanized Steel

Piping secondary containment
None

Piping external corrosion protection
None

Piping leak detection
None

Tanks (3 of 5)

Tank Number: 6208

Modification Type
Tank repair/modification

Name of Tank
6208

Is this tank aboveground or underground?
Aboveground on saddles, legs, stilts, rack or cradle

Type of petroleum stored
diesel

Tank installation date
05/31/2017

Tank status
In Service

Tank storage capacity (gallons)
4000

Tank design/construction material
Steel/Carbon Steel/Iron

Tank internal corrosion protection
None

Tank external corrosion protection
Painted/Asphalt Coating

Tank secondary containment
Modified Double-Walled (Aboveground)

Tank leak detection
Interstitial - Electronic Monitoring

Tank overfill prevention
High Level Alarm

Tank spill prevention
Catch Basin

If this tank has dispenser(s), do they have under dispenser containment?
Yes

Pumping/dispensing method
Suction Dispenser

Does this tank have piping?
Yes

Piping install date
NONE PROVIDED

Is the piping aboveground or underground?
Aboveground

Piping design/construction material
Steel/Carbon Steel/Iron

Piping secondary containment
None

Piping external corrosion protection
Painted/Asphalt Coating

Piping leak detection
Exempt Suction Piping

Tanks (4 of 5)

Tank Number: 6210

Modification Type

No change needed

> **Warning:** If "No change needed" is selected, information for this tank will not be updated.

Name of Tank
6210

Tank storage capacity (gallons)
250

Is this tank aboveground or underground?
Aboveground on saddles, legs, stilts, rack or cradle

Type of petroleum stored
used oil (heating, on-site consumption)

Tank installation date
10/16/2017

Tank status
In Service

Tank design/construction material
Steel/Carbon Steel/Iron

Tanks (5 of 5)

Tank Number: 6211

Name of Tank
6211

> A unique tank number is required for each tank. Enter the number of the tank, using the tank numbering system at the facility. If none exists, establish one (for example, 001, 002, etc.). Duplicate tank numbers at the same facility or “000" are not acceptable. For replacement tanks, the newly installed tank must have a different number than the tank it is replacing.
>
> For compartmented tanks, treat each compartment as a separate tank and add each compartment to the registration as if they were an independent tank. Also, compartmented tank names should be grouped together with letter suffixes. For example, if you have a tank with 3 individual compartments, the tanks should be named 1A, 1B, and 1C.

Is this tank aboveground or underground?
Aboveground on saddles, legs, stilts, rack or cradle

Type of petroleum stored

asphaltic emulsions

Tank installation date
09/03/2024

Tank status
In Service

Tank storage capacity (gallons)
1000

Tank design/construction material
Steel/Carbon Steel/Iron

Tank internal corrosion protection
None

Tank external corrosion protection
Jacketed

Tank secondary containment
Diking (Aboveground)

Tank leak detection
Interstitial - Manual Monitoring

Tank overfill prevention
High Level Alarm

Tank spill prevention
Catch Basin

If this tank has dispenser(s), do they have under dispenser containment?
Yes

Pumping/dispensing method
Gravity

Does this tank have piping?
No

Fee

Attention applicants looking to pay online:
Credit cards, debit cards, and e-check payments are available. Credit cards have a 2.25% fee associated with all transactions and debit cards have a 1.25% fee associated with all transactions. E-checks, which draw directly from your bank account, are also available and have a flat $0.20 fee associated with all transactions.

Fee Schedule

Total Storage Capacity	5-Year Fee for Facility
0 - 1,100 gallons	$0 - Fee not required
1,101 - 2,000 gallons	$100 per storage facility
2,001 - 4,999 gallons	$300 per storage facility
5,000 - 399,999 gallons	$500 per storage facility
400,000 gallons and greater	Registration not required but license is required under the Major Oil Storage Facilities Program (MOSF)

Calculated Fee Due ($) - This will be made payable upon submitting the application
500

Fees are based on the total storage volume of all tanks on site storing petroleum. Fees can be manually calculated using the following form:
https://www.dec.ny.gov/docs/remediation_hudson_pdf/pbsform.pdf

Are you a State government/entity that will be paying using the Statewide Financial System (SFS)?
Yes

ATTENTION
If you are paying through SFS, upon submitting your application, please select the "Pay by Mail" option. This will allow you to download a pdf copy of the payment voucher. On this voucher will be information required for SFS payments.

Certification Statement
