Subject: **Subsurface Gas Line Upgrade Excavation Oversight Report**  
Madison Avenue Former Manufactured Gas Plant Site  
Elmira, New York  
NYSDEC Site No. 808018

Dear Mr. Garland,

On behalf of New York State Electric & Gas Company (NYSEG), Arcadis of New York, Inc. (Arcadis) is submitting this report to summarize activities observed during subsurface gas line upgrades conducted by NYSEG, adjacent to and on the Madison Avenue Former Manufactured Gas Plant (MGP) Site in Elmira, New York (the Site) (New York State Department of Environmental Conservation [NYSDEC] Site No. 808018).

On April 23, 2025, NYSEG notified the NYSDEC that underground gas utility work was planned to occur adjacent to the Site. The work was to occur west of the Site and under the sidewalk along the eastern side of Madison Avenue in an area that is offsite and outside of the limits of the Site Management Plan<sup>1</sup> (SMP) Institutional Control Boundary/Site Boundary (SMP Figure 3) and the Area of Potentially Impacted Soil (SMP Figure 7). The SMP is currently under NYSDEC review.

Excavation activities occurred from May 9, 2025, through May 15, 2025. As the project progressed, it became necessary to expand the excavation activities onsite thus requiring that the SMP<sup>1</sup> be followed. NYSEG retained Arcadis to observe the excavation activities, monitor excavated material for potential MGP residuals, ensure procedures in the SMP were followed when working onsite, and conduct community air monitoring during onsite subsurface disturbances. Final backfilling onsite was completed on July 9, 2025, after the new gas main was connected to the existing infrastructure. Approximate locations for the excavation areas are shown on Figure 1.

## Offsite Excavation

Excavation began on May 9, 2025, under the eastern sidewalk along Madison Avenue and west of the Site. Arcadis observed the excavation activities and performed visual and photoionization detector (PID) screening of the excavated materials to identify potential MGP residuals.

---

<sup>1</sup> Arcadis. 2024. Site Management Plan. Prepared for NYSEG, Madison Avenue Former MGP Site, Chemung County, Elmira, New York. June.

Tracey Garland, GIT  
New York State Department of Environmental Conservation  
October 6, 2025

On May 12, 2025, excavation continued within the offsite sidewalk area. Due to existing underground utilities, NYSEG's gas line contractor determined that the sidewalk excavation area would not be suitable for the new gas utility work as planned. Therefore, the sidewalk excavation was backfilled and the excavation was moved onsite.

No MGP residuals or elevated PID readings (greater than 0 parts per million) were observed during the offsite sidewalk excavation.

## Onsite Excavation and Offsite Trenching

On May 13, 2025, an alternate location (onsite) was selected for the underground utility work that was approximately 60 feet northwest of the sidewalk excavation. The onsite area was located within the Area of Potentially Impacted Soil (SMP<sup>1</sup> Figure 7) but outside of the Institutional Control Boundary/Site Boundary (SMP Figure 3). With this change in the scope of work, NYSEG notified Mr. Tracey Garland (NYSDEC project manager) and discussed appropriate procedures for continuing work. The NYSDEC approved the excavation continuing onsite as long as protocols in the SMP were followed, including, but not limited to, community air monitoring, soil screening, soil staging, and cover system restoration. The NYSDEC also approved using the excavated soil as backfill as long as no MGP residuals were observed and the soil was backfilled to the same depth it was removed (e.g. last-out/first-in).

The onsite excavation began the afternoon of May 13, 2025. Arcadis screened soil, using visual, olfactory, and instrument-based (PID) methods, and conducted community air monitoring. The existing underground utility was encountered at approximately 6 feet below ground surface (bgs), and groundwater was encountered at approximately 8 feet bgs. Once the utility was located, the excavation was extended to approximately 8 feet by 6 feet with a depth of 8 feet bgs, and a trench box was placed within the excavation. Soil was not excavated below the encountered water table.

From May 14 to 15, 2025, following installation of the trench box, an approximately 3-foot-wide and 5-foot-deep trench was excavated heading offsite toward Madison Avenue. This trench connected the existing onsite excavation to a planned offsite excavation (under the sidewalk on the eastern side of Madison Avenue) where the project would continue outside of the Site limits. Excavated material was screened in the manner described above, and community air monitoring was conducted. Soil from the Site was stockpiled on polyethylene sheeting and kept separate from soil excavated from the trench outside of the Site limits (identified by the fence line).

No MGP residuals or elevated PID readings (greater than 0 parts per million) were observed during the onsite excavation or offsite trenching work. A photograph log is included as Attachment 1.

## Community Air Monitoring

Community air monitoring was conducted from May 13, 2025, to May 15, 2025, during active onsite subsurface intrusion (excavation and trenching), and on July 9, 2025, during backfilling of the onsite excavation area. No community air monitoring criteria, defined in the SMP<sup>1</sup>, were exceeded. Tabulated community air monitoring data is included as Attachment 2.

## Soil Staging

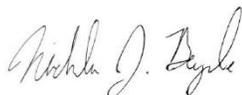

Soil excavated from the Site that was not immediately used as backfill was staged onsite. The staged soil was stockpiled and placed on polyethylene sheeting, continuously encircled with a berm consisting of hay bales and filter socks, and covered by polyethylene sheeting when not in use. The stockpiled soil was inspected weekly until

Tracey Garland, GIT  
New York State Department of Environmental Conservation  
October 6, 2025

the material was ultimately used to backfill the onsite excavation area on July 9, 2025. All stockpiled material was used as backfill in accordance with the SMP<sup>1</sup> and as approved by the NYSDEC. Weekly soil stockpile inspection logs are included as Attachment 3.

Please contact John Ruspantini of NYSEG at 607.725.3801 or [jjruspantini@nyseg.com](mailto:jjruspantini@nyseg.com) with any questions or comments.

Sincerely,  
Arcadis of New York, Inc.
