Project Manager

Subject: Progress Report – June/July 2024
Delphi Automotive Systems NYSDEC Site No. 828064
1000 Lexington Avenue
Rochester, New York 14606

Dear Mr. Ramsey:

H & A of New York Engineering and Geology, LLP (Haley & Aldrich of New York) is submitting this progress report on behalf of our client, GM Components Holdings, LLC (GMCH), for activities conducted for the Delphi Automotive Systems Site No. 828064 (Site) located at the GM Rochester Operations Facility, 1000 Lexington Avenue, Monroe County, Rochester, New York. This report provides a summary of project activities conducted at the Site from 1 June through 31 July 2024.

ACTIVITIES CONDUCTED DURING THE REPORTING PERIOD

The remedial measures installed at the Site: Building 22 light non-aqueous phase liquid (LNAPL) recovery system, North Parking Lot groundwater migration control trench (MCT), the Eastside Water Treatment Area (EWTA) groundwater recovery and treatment system (GRTS), Building 1 sub-slab depressurization system (SSDS) and automated LNAPL recovery systems operated throughout the reporting period with the following exceptions:

- The EWTA GRTS was shut down on 26 July 2024 due to a leak in the Oil/Water Separator (OWS) system. The OWS was repaired and the EWTA GRTS system returned to normal operations on 20 August 2024.

SAMPLING/TESTING RESULTS DURING REPORTING PERIOD

Wastewater discharge samples were collected from the EWTA and AWT sampling ports by Paradigm Environmental Services, Inc. for laboratory analysis in accordance with the facility's sewer use permit on 3 June and 15 July 2024. The laboratory reports are attached for your information.

REMEDIAL SYSTEM PERFORMANCE

During the reporting period, the volume of groundwater recovered for treatment and discharge to the Monroe County sewer system under the facility's sewer use permit was approximately:

- EWTA Groundwater Recovery System: 66,150 gallons
- Bldg. 22 LNAPL / North Parking Lot MCT: 927,000 gallons

The total volume of LNAPL recovered from the automated LNAPL recovery systems and the manual LNAPL recovery efforts from the existing monitoring wells was approximately 40 gallons. The recovered LNAPL was placed within satellite collection drums for disposal by the Facility.

REGULATORY COMMUNICATIONS

On 10 July 2024, GM submitted a letter to the Department requesting guidance for compliance with the Excavation Work Plan (EWP); Appendix E of the SMP).

On 17 July 2024, GM and NYSDEC staff participated in a virtual meeting to discuss the project status and communications regarding facility operations and maintenance activities subject to the requirements of the approved Site Management Plan.

On 1 August 2024, the Department provided a letter to GM providing guidance on personnel training and oversight requirements for compliance with the EWP.

ACTIVITIES ANTICIPATED FOR UPCOMING REPORTING PERIOD

Future project activities anticipated include:

- The implementation of repairs to the facility perimeter security fence.
- The continued operation of the Bldg. 22 LNAPL recovery system, EWTA GRTS, Building 1 SSDS, automated LNAPL recovery systems and the North Parking Lot groundwater MCT,
- The collection of treatment system discharge monitoring samples for analysis by a NYSDOH certified environmental laboratory,
- The manual recovery of LNAPL from the existing monitoring wells with recoverable quantities of LNAPL present; and,
- Implementation of the 2024 groundwater elevation and sampling program including notification of adjacent properties and subcontractor coordination.

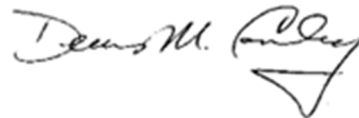

CLOSING

If you have any questions concerning this information, please do not hesitate to contact us via electronic mail at dconley@haleyaldrich.com or cmondello@haleyaldrich.com or via telephone at 585-359-9000.

Sincerely yours,
HALEY & ALDRICH OF NEW YORK

Claire L. Mondello, CHMM
