

**NEW YORK STATE DEPARTMENT OF ENVIRONMENTAL  
CONSERVATION  
DIVISION OF ENVIRONMENTAL REMEDIATION  
Inactive Hazardous Waste Disposal Report**

<b>Site Code</b>	828075		
<b>Site Name</b>	Burroughs-UNISYS Site	<b>Address</b>	1225 Ridgeway Avenue
<b>Classification</b>	04	<b>City</b>	Rochester
<b>Region</b>	8	<b>Zip</b>	14615
<b>Latitude</b>	43:11:35:0	<b>County</b>	Monroe
<b>Longitude</b>	77:39:49:0	<b>Town</b>	Rochester (c)
<b>Estimated Size</b>	5		
<b>Site Type</b>	Structure		

### Site Description

The UNISYS Corporation leased and operated this facility from 1979-1986. In the past, underground storage tanks were used to store toluene, MEK (2-Butanone), methanol and isopropyl alcohol (IPA). In 1986, these tanks were replaced with below ground storage vaults. In 1986 and 1987, UNISYS performed two site investigations which focused on these underground tanks. The investigations revealed that there was significant groundwater contamination. Groundwater samples taken from nearby overburden wells revealed contamination by acetone at 6,000 ppm, IPA at 7,400 ppm, MEK at 2,200 ppm and toluene at 29 ppm. UNISYS signed a DEC Consent Order in 1990 to perform an Interim Remedial Measure (IRM) and a Remedial Investigation/Feasibility Study (RI/FS). The IRM system consisted of a dual phase soil vapor/groundwater extraction system and a biological treatment system. A Record of Decision (ROD) was signed in March of 1994. The selected remedy in the ROD calls for enhancement of the existing dual phase extraction system. The remedial action was implemented in March of 1995. The system was shutdown in 1997 and groundwater was monitored until 2000. The dual phase system successfully cleaned up soil and groundwater, and no further actions are required.

### Materials Disposed at Site

ISOPROPANOL	UNKNOWN
ACETONE	UNKNOWN
OTHER VOLATILE ORGANICS	UNKNOWN
TOLUENE	UNKNOWN
2-BUTANONE (A.K.A. METHYL ETHYL KETONE; MEK)	UNKNOWN

**Analytical Data Available for :** Air, Groundwater, Surface Water, Soil

**Applicable Standards Exceeded for:** Groundwater

### Assessment of Environmental Problems

Site soil and groundwater have been successfully remediated. No further actions are required.

### Assessment of Health Problems

This site is located in a heavily industrialized area. The use of groundwater as a potable water source is unlikely as the entire area is served by public water. Exposure to contaminated soil is not expected because the site is predominately capped by asphalt, concrete, or buildings.

**Owners**

**Current Owner(s)**

UNISYS Corporation  
3199 Pilot Knob Road / MS-F1B05  
Eagan MN 55121  
  
KEITH RAPP  
UNISYS Corporation  
3199 PILOT KNOB ROAD, MS-F1B05
