Re: Monthly Monitoring Report – January 2025
1000 Turk Hill Road, Fairport, New York
NYSDEC Site ID No. 828161

Dear Ms. Lovell:

On behalf of New Coleman Holdings, Inc., Roux Environmental Engineering and Geology, D.P.C. (Roux) has prepared this Monthly Monitoring Report (MMR) to summarize the ongoing monitoring and remediation activities, including operation and maintenance of the sub-slab depressurization systems (SSDSs), at 1000 Turk Hill Road, Fairport, New York. Roux has engaged a local subcontractor (Trec Environmental Inc. [Trec]) to perform the monthly monitoring of the SSDSs.

The MMR for November and December 2024 was submitted to the New York State Department of Environmental Conservation (NYSDEC) and the New York State Department of Health (NYSDOH) on January 6, 2025.

SSDS Monitoring

The monthly SSDS monitoring event was performed by Trec on January 31, 2025. Eight of the 12 SSDS vacuum monitoring points were inspected, measured, and confirmed to be operating within the pre-established parameters. During the visit, the monitoring points associated with Systems C1 and C2 in Building 1 (located in tenant space formerly occupied by Nat's Nuts) and Systems C and E in Building 3 (located in the tenant space formally occupied by Spartacus and CrossFit Fairport) could not be accessed. The vacuum measurements from all accessible monitoring points were consistent with previous monitoring events and within the required performance ranges for those systems.

The exterior components of each of the five SSDSs on Building 1 and Building 3 were also inspected. As previously noted, the mounting brackets for System A in Building 3 are broken, but the vent pipe remains fastened and will continue to be inspected monthly to ensure operation is not impacted.

The vacuum measurements and other pertinent information documented during the inspection are provided on the attached Monthly SSDS Monitoring and Inspection Checklist – January 2025 (Table 1). The locations and designations of the various SSDS systems and monitoring points are shown on the attached SSDS As-Built Drawings prepared by Envirosafe Inspections & Consulting (Attachment 1).

The next SSDS monitoring event is planned to occur during the week of February 24, 2025, and will be documented in a future Monthly Monitoring Report.

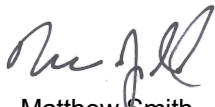

Remedial Injection Program

As was noted in September's MMR, Phase 1 of the remedial injection program was completed between September 27 and October 2, 2024. The first groundwater performance monitoring event to evaluate the injection program performance was completed on November 11 and 12, 2024. The results of this sampling event are pending and will be reported in conjunction with a future MMR.

If you have any questions or require additional information, please do not hesitate to contact me at (917) 825-1108 or via email at masmith@rouxinc.com.

Sincerely,

ROUX ENVIRONMENTAL ENGINEERING AND GEOLOGY, D.P.C.
