ADDRESS:	1000 Turk Hill Road, Fairport, Monroe County, New York
PREPARED BY:	Roux Environmental Engineering and Geology, D.P.C.
DATE:	July 11, 2025
WEATHER:	Temp: 87° Fair, Wind: SW @ 4 mph

Remedial Action Work Summary

Work Activities Performed Onsite:

- Installation of proposed injection point
- Mobile CAMP monitoring

Roux was onsite to coordinate with the subcontractor performing the injection remedy. TREC Environmental, Inc. activity related to the injection remedy at two injection locations in the vicinity of monitoring wells MW-2S/M/D: 2-IP-1 and 2-IP-3. A Geoprobe direct push drill rig was used to inject the ABC+ and ZVI into the points.

- Injection point 2-IP-1 was installed to 16' below grade and received ~705 gallons of injection fluid.
- Injection point 2-IP-3 was installed to 13' below grade and received ~705 gallons of injection fluid.

Due to the relatively small area and mobile nature of groundwater injection work, ambient air was monitored at each injection location using a handheld five-gas meter and personal dust monitor. Volatile organic compounds (VOCs) levels were monitored throughout the day and compared to the action limits of both the Site-specific HASP and Generic NYSDOH CAMP guidelines. No exceedances were observed. Dust was not observed at any point during the course of the work and not detected above background levels.

CAMP

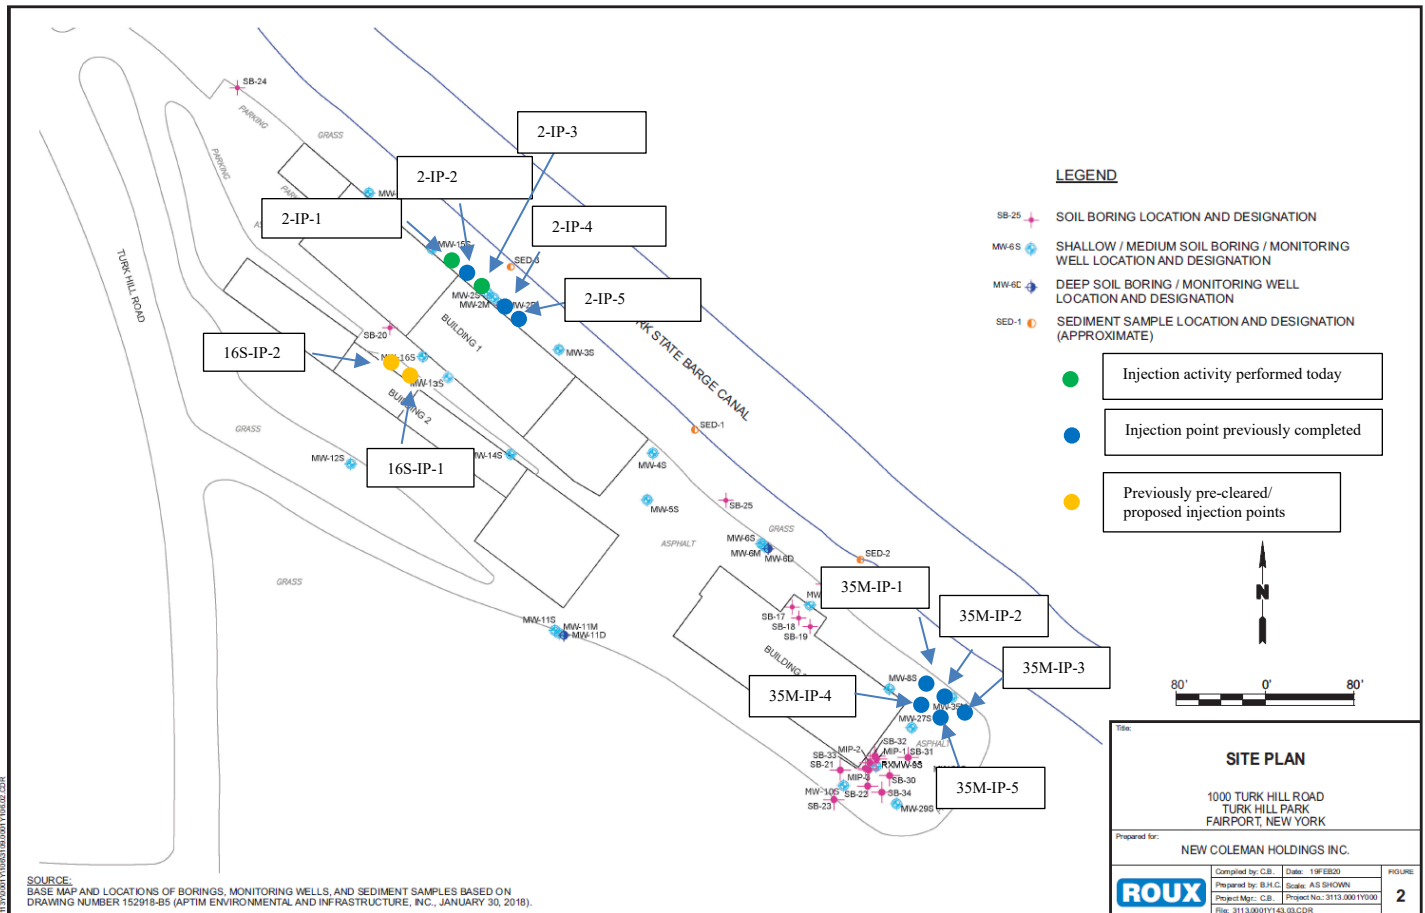

Time	PID (ppm)	Dust (mg/m ³)
8:15 AM	0.0	0.037
9:30 AM	0.0	0.029
11:45 AM	0.0	0.031
13:30 PM	0.0	0.034

Anticipated Upcoming Work:

- Continue the 2nd phase of injections.
