**Site Name:** Former Kaplan Container

**June 2025**

**Site No.** 828222 **Tax Map No.** 139.77-4-1

**Site Location:** 130 Despatch Drive, East Rochester, NY 14445

### State Superfund Site Classification Notice

The Inactive Hazardous Waste Disposal Site Program is New York State's superfund program for identifying, investigating, and cleaning up sites where the disposal of hazardous waste may present a threat to public health and/or the environment. The New York State Department of Environmental Conservation (DEC) maintains a list of these sites in the Registry of Inactive Hazardous Waste Disposal Sites (Registry). The site identified above, and located on a map on the reverse side of this page, has been added to the Registry as a Class 2 site that presents a significant threat to public health and/or the environment for the following reason(s):

- Available information, including the July 2024 Site Characterization Report, indicates past uses of the site have resulted in contamination of soils, groundwater, soil vapor and indoor air. On-site soil is contaminated with volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, and per- and polyfluoroalkyl substances (PFAS). Groundwater is contaminated with VOCs, SVOCs, metals, PFAS, and petroleum light non-aqueous phase liquid (LNAPL). Soil vapor and indoor air are contaminated with chlorinated and petroleum-related volatile organic compounds at levels that warrant actions to address potential exposures.
- People who enter the site could come into contact with site contaminants in the soil by digging or otherwise disturbing the soil. VOCs in the groundwater and soil may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. Environmental sampling indicates actions are needed to address soil vapor intrusion in on-site buildings. The site is close to residential homes and there is potential for off-site soil vapor intrusion. Additional sampling is necessary to further define the nature and extent of contamination and to better understand how people may contact contaminants within and near the site.

DEC will keep you informed throughout the investigation and cleanup of the site.

**If you own property adjacent to this site and are renting or leasing your property to someone else, please share this information with them. If you no longer wish to be on the contact list for this site or otherwise need to correct our records, please contact the DEC Project Manager listed below.**

#### FOR MORE SITE INFORMATION

Additional information about this site can be found using DEC's Environmental Site Remediation Database Search with site number 828222: <https://appfactory.dec.ny.gov/DERExternalSearch/>

Site specific documents may be found online through the DECinfo Locator:
