### State Superfund Site Reclassification Notice Class 2 to Class 4

The Inactive Hazardous Waste Disposal Site Program (New York State Superfund Program) is the State's program for identifying, investigating, and cleaning up sites where the disposal of hazardous waste may present a threat to public health and/or the environment. The New York State Department of Environmental Conservation (DEC) maintains a list of these sites in the Registry of Inactive Hazardous Waste Disposal Sites (Registry). The site identified above, and located on the attached map, has been reclassified on the Registry as a Class 4 site as it no longer presents a significant threat to public health and/or the environment for the following reasons:

- Remedial actions have been completed in accordance with the Record of Decision and the approved Soil Vapor Intrusion Work Plan. Those actions included:
  - Operation of a Soil Vapor Extraction System within the source area;
  - Continued operation of cooling water supply well to prevent off-site contaminant migration;
  - Installation of a Sub-Slab Depressurization System; and
  - Long-term groundwater monitoring.
- Provisions are in place in the form of a deed restriction and a Site Management Plan to address the potential for future contact with any remaining contamination.

**If you own property adjacent to this site and are renting or leasing your property to someone else, please share this information with them. If you no longer wish to be on the contact list for this site or otherwise need to correct our records, please contact DEC's Project Manager listed below.**
