Problem Status:		
Comments/Changes/Attachments: By the 1996 Record of Decision, DER-R9 North staff have performed the required OM&M inspections and sampling of the monitoring wells. Up through 2005, residential wells were part of the LTM program. Historical results indicate that there was no impact from the landfill relative to the drinking water quality supply wells. Thus, year 2005 was the last year for residential water well sampling. Site monitoring well data does not indicate a significant off site release or continued degradation of ground water quality. Leachate continues to be removed as necessary from the two on site leachate tanks and disposed at the Hornell wastewater treatment plant. The Division of Operations mows the site once per year and maintains the gate and roads. OM&M to continue.
