**Reference: Off-Site Soil Gas Investigation Report  
Former McGraw-Edison Facility, Olean, New York**

Dear Mr. Allen,

Stantec Consulting Services, Inc. (Stantec) has prepared this Report describing the soil gas investigation conducted at the former McGraw-Edison facility located at 1648 Dugan Road, Olean, NY (the "Site") and at an off-site property (identified as Unit 117) located southwest of the Site. This work was conducted in accordance with Stantec's Workplan for Off-Site Soil Gas Investigation (the "Workplan"), dated November 19, 2020, which was approved by the USEPA on November 30, 2020. Note that the field work was conducted in accordance with Stantec's Covid-19 health and safety protocols as detailed in our Health and Safety Plan, dated 11/20/2020. This Report presents descriptions of the Site Background, Work Performed, Results, Updated Conceptual Site Model, Conclusions, and Recommendations.

## **SITE BACKGROUND**

### ***Site Description***

The former McGraw-Edison Facility (Facility) is located on the eastern portion of the Olean Well Field Site, north of East State Street and east of Dugan road, New York (see Figure 1). The general layout of the Site is shown on Figure 2. The property occupies approximately 25 acres, just north of the intersection of East State Street and Dugan Road. Three buildings – the Main Plant (Plant), a smaller plant addition (MOV Building), and a fire pump well house – are located on the Site and used by Cooper Power Systems for the manufacture of surge and lightning arrestors for the electric utility industry. Land uses to the north, south, and west of the Site are residential and/or commercial. Olean Steel borders the Site to the east.

McGraw-Edison Company, a wholly owned subsidiary of Cooper Industries, LLC (Cooper), entered into a Consent Decree with the United States Environmental Protection Agency (EPA) to conduct remedial activities in response to the presence of volatile organic compounds (VOCs) in groundwater at the Olean Well Field Superfund Site. The work activities are defined in the

February 9, 2021  
Mr. Jeffrey Allen  
Page 2 of 7

**Reference:** Off-Site Soil Gas Investigation Report, Former McGraw-Edison Facility, Olean, New York

Operable Unit 2 (OU2) Record of Decision (ROD) and the Statement of Work (SOW), which were included as Appendices A and B to the Consent Decree. The effective date of the Consent Decree is March 17, 1998.

### ***Hydrogeologic Setting***

Previous groundwater investigations at the Site have shown that the upper 100 feet of sediment can be divided into two aquifers, each underlain by an aquitard. The lithologic units that comprise the upper 100 feet of sediment are referred to as the Upper Aquifer (UA), upper aquitard, Lower Aquifer (LA), and lower aquitard. The UA is comprised of glaciofluvial coarse sands and sandy gravels, and recent fluvial deposits of fine sands and silts with some clay and extends to depths ranging from approximately 25 to 29 feet below ground surface (bgs). The water table in this unit generally ranges from 10 to 14 feet bgs, resulting in a saturated thickness in the UA ranging from approximately 11 to 19 feet. As described further below, the data indicate that volatile organic compounds (VOCs) have impacted groundwater in the UA. The soil gas investigation described herein was conducted just above the saturated zone in the UA since the groundwater in the UA was expected to be the source of any potential VOCs in soil gas.

Underlying the UA is the upper aquitard, which is a low permeability lodgement till composed of greater than 50 percent silt and clay. The thickness of the upper aquitard generally ranges from 10 to 13 feet across the Site.

The UA potentiometric surface at the Site is relatively flat. There is a gentle gradient towards the southwest in the direction of the Allegheny River under non-pumping conditions and towards the extraction wells during pumping conditions (described further below).

### ***Summary of Remediation***

As specified in the OU 2 Record of Decision (ROD), groundwater extraction and treatment are the selected remedy for volatile organic compound (VOCs) in groundwater at the Site. As stated in the ROD, EPA has determined that soil at the Property does not constitute a source of groundwater contamination; and, as such, no soil remediation is necessary. As a result, the remedy for OU2 was selected to address VOC contamination in the UA only. The remedial action objectives (RAOs) are the removal and control of the sources of contamination to groundwater and removal of contamination already in shallow groundwater. Groundwater at the Site boundary must have VOC levels equal to, or less than, the maximum contaminant levels (MCLs).

The current remediation system consists of two groundwater extraction wells, identified as EW-1 and EW-2 on Figure 2, that are located near the western and southern site boundaries, respectively. The purpose of these wells is to capture groundwater from the portion of the UA

February 9, 2021  
Mr. Jeffrey Allen  
Page 3 of 7

**Reference:** Off-Site Soil Gas Investigation Report, Former McGraw-Edison Facility, Olean, New York

beneath the Property that has been impacted by VOCs, primarily trichloroethene (TCE) and cis-1,2-Dichloroethene (cis-1,2-DCE or cDCE), above ROD-based cleanup levels. The two extraction wells were installed with screens that bisect the entire saturated thickness of the UA.

Extracted groundwater is conveyed from the extraction wells to a water treatment system, located just south of the Plant. Extracted groundwater is treated using a shallow-tray low-profile, diffuse air stripper and re-injected into the LA through an injection well (identified as IW-1) located near the southeast corner of the Site, upgradient of the Plant.

Historical groundwater elevation data show cones of depression around the two extraction wells that are effectively capturing impacted groundwater beneath the Property at the downgradient Property boundaries. An example of a recent groundwater contour map (from June 2020) is presented as Figure 2A.

## **WORK PERFORMED**

This work was conducted in accordance with Stantec's Workplan for Off-Site Soil Gas Investigation, dated November 19, 2020, which was approved by the USEPA on November 30, 2020. This work is described below.

### ***Soil Gas Probe Installation/Abandonment***

Prior to any invasive work, an access agreement was executed between Cooper and the owner of Unit 117. The sampling locations were then located and cleared by DigSafelyNY. Finally, each boring location was screened and cleared by a private utility locator. The boring locations, identified as SG-201 to SG-207, are shown on Figure 3.

Stantec oversaw the installation of these borings/soil gas probes on December 8, 2020. The Geoprobe borings were drilled by SJB Services of Hamburg, New York. As shown on Figure 3, two borings were located in the western portion of the Site and five were completed at the off-site Unit 117 property, located southwest of the Site. Each boring was advanced to approximately 1 to 2 feet above the historic high-water table. Based on historical information, the two on-site borings (SG-201 and SG-202) were advanced to 5 feet below grade (ft bg) and the five off-site borings (SG-203 to SG-207) were advanced to 6 ft bg. One and one-half (1.5) inch inner diameter Geoprobe rods with stainless steel expendable points and soil vapor screens were pushed to the proper depth. Approximately ten-feet of ¼-inch inner diameter Post Run Tubing (PRT) was then attached to each screen and completed with fittings to allow for the soil gas sample collection. Clean filter sand was poured/placed around each screen and the rods were pulled back one foot thereby exposing the screen to the subsurface. The remaining annulus from above the filter sand to ground surface was sealed with bentonite.

February 9, 2021  
Mr. Jeffrey Allen  
Page 4 of 7

**Reference:** Off-Site Soil Gas Investigation Report, Former McGraw-Edison Facility, Olean, New York

No soil cuttings were generated because the Geoprobe rods were pushed into the ground to the prescribed depth and no soil sampling was conducted. All down hole drilling equipment was decontaminated between locations. Decontamination consisted of an Alconox/water wash in one bucket followed by a potable water rinse in a second bucket. Decontamination water was discharged to the ground surface at each location in a manner that did not create ponding, flooding, or erosion.

After the samples were collected (described below), SJB returned to the Site on December 10<sup>th</sup> and abandoned each point by removing the PRT and the rods. Additional bentonite was added to each borehole and allowed to hydrate, and the surface was restored.

### ***Soil Gas Probe Sampling/Analysis***

After the seven points were installed and immediately prior to sampling, Stantec attached a photoionization detector (PID) pump to the PRT to remove stagnant/ambient air from the tubing. Soil gas samples were then collected with 6-liter Summa canisters that were attached to each PRT over a 24-hour time period. Sample collection commenced from 14:50 to 15:12 on the afternoon of December 8, 2020. Stantec observed and documented the pressure for each Cannister at the start of, periodically throughout, and at the end of sampling. These data are presented in Table 1. For quality control purposes, a trip blank was also prepared by the analytical laboratory and kept with the investigative samples throughout the sampling event. After the 24-hour target collection period, the samples were secured and, along with the trip blank, shipped to Eurofins/Test America and analyzed for the presence of volatile organic compounds (VOCs) in air by USEPA Method TO-15.

## **RESULTS**

The analytical results for the December 2020 soil gas sampling event are summarized in Table 2. Three of the samples (SG-201, SG-202, and SG-205) underwent additional laboratory analysis following dilution of the samples by a factor of 4 (SG-201), 2 (SG-202), and 15.4 (SG-205). The laboratory reported initial and diluted results for specific compounds initially reported with "J" flags (result reported below LRL but above MDL) or "E" flags (result exceeds instrument calibration range).

The reported results were then compared to Carcinogenic and Noncarcinogenic Soil Gas Screening Levels (SGSLs), which were calculated by dividing the USEPA worker Indoor Air Screening Levels (IASLs) by the EPA default attenuation factor of 0.03. For carcinogens, the SGSLs were adjusted to correspond to an acceptable risk of 1E-05 ( $1 \times 10^{-5}$ ). The composite worker scenario was selected based on the current zoning of the Site/property (Commercial C-1) and site usage (Unit 117 for commercial use as an insurance broker).

February 9, 2021  
Mr. Jeffrey Allen  
Page 5 of 7

**Reference:** Off-Site Soil Gas Investigation Report, Former McGraw-Edison Facility, Olean, New York

As shown on Table 2, there were no detections from the soil gas samples that exceeded the lowest, listed SGSs. This suggests that the contaminants of concern at the Site (i.e., chlorinated volatile organic compounds or cVOCs) are not impacting the soil gas in the areas investigated (the western portion of the site and/or at the off-site Unit 117 property) at levels representing an unacceptable human health vapor intrusion risk or levels requiring any further investigation or remediation.

For the diluted sample at SG-205, note that 1,2-dibromoethane was reported at a concentration of 24  $\mu\text{g}/\text{m}^3$  U (where "U" stands for undetected). Although this concentration was reported as undetected, the reporting limit (24  $\mu\text{g}/\text{m}^3$ ) exceeded its lowest SGS of 6.7  $\mu\text{g}/\text{m}^3$ . However, the level of 1,2-dibromoethane in the undiluted sample was reported at 1.5  $\mu\text{g}/\text{m}^3$  U, which was below its lowest SGS.

### **QA/QC Review**

The laboratory QA/QC report indicates that there were no detections in the method blank; laboratory control sample % recoveries were within acceptance criteria indicating acceptable precision, and all surrogates were recovered within acceptance limits. No VOCs were detected in the trip blank. No other analytical or quality issues were noted in the lab report. Except for 1,2-dibromoethane in the diluted sample at SG-205, sample dilution did not elevate reporting limits above the most stringent SGSs. As noted above, however, the level of 1,2-dibromoethane in the undiluted sample was reported at 1.5  $\mu\text{g}/\text{m}^3$  U, which was below its lowest SGS. Sample collection procedures were consistent with the approved Workplan. Based on this information, Stantec concludes that the data are acceptable for their intended use.

## **UPDATED CONCEPTUAL SITE MODEL**

### ***Nature and Extent of Contamination***

As stated in the ROD, EPA has determined that soil at the Property does not constitute a source of groundwater contamination. The extent of groundwater contamination has consistently been documented by the monthly sampling of the extraction wells and the semi-annual sampling of the monitoring wells. Historically, levels of VOCs have been detected in groundwater and include 1,1,1-trichloroethane (1,1,1-TCA), 1,1-dichloroethane (1,1-DCA), acetone, carbon disulfide, chloroform, cis-1,2-dichloroethene (cDCE), tetrachloroethene (aka perchloroethene or PCE), and trichloroethene (TCE). The data over the past several years show only levels of TCE and cDCE that exceed MCLs and New York State Groundwater Quality Standards (GWQS) in extraction well EW-2 and monitoring wells B-1 and D-1 located in the southern portion of the Site and in extraction well EW-1 located in the western portion of the Site. The compounds of concern at the Site are cVOCs.

**Reference:** Off-Site Soil Gas Investigation Report, Former McGraw-Edison Facility, Olean, New York

The data also show that the extraction wells are creating cones of depression that are effectively capturing contaminated groundwater at the downgradient property boundaries (see Figure 2A). This is further shown by no detections of VOCs above MCLs or GWQS at two off-site monitoring wells, CW-7A and CW-18A (located west and southwest of the Site across Dugan Road). CW-18A is located between the Site and the structures on, and adjoining, the Unit 117 property.

The VOCs detected historically in groundwater at the Site that were also detected above reporting limits at the soil gas sampling locations are shown below.

| Soil Gas Point | 1,1,1-TCA (µg/m³) | 1,1-DCA (µg/m³) | Acetone (µg/m³) | Carbon Disulfide (µg/m³) | Chloroform (µg/m³) | cDCE (µg/m³) | PCE (µg/m³) | TCE (µg/m³) |
|----------------|-------------------|-----------------|-----------------|--------------------------|--------------------|--------------|-------------|-------------|
| SG-201         | 53                | 32              | 24              | 23                       | 0.94 J             | 10           | 540 D       | 24          |
| SG-202         | 1.1 U             | 0.81 U          | 6.6 J           | 1.6                      | 0.16 J             | 0.20 U       | 14          | 1.3         |
| SG-203         | 0.32 J            | 0.81 U          | 4.7 J           | 12                       | 0.43 J             | 0.20 U       | 8.1         | 0.42        |
| SG-204         | 1.1 U             | 0.81 U          | 11 J            | 4.4                      | 0.25 J             | 0.20 U       | 1.9         | 10          |
| SG-205         | 3.4               | 0.81 U          | 24              | 12                       | 0.46 J             | 0.20 U       | 2,900 D     | 69          |
| SG-206         | 1.1 U             | 0.81 U          | 23              | 7.9                      | 0.98 U             | 0.20 U       | 220         | 12          |
| SG-207         | 1.1 U             | 0.81 U          | 12              | 3.3                      | 0.98 U             | 0.20 U       | 1.3 J       | 0.31        |

D = Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples.

J = Result is less than the Reporting Limit (RL) but greater than or equal to the Method Detection Limit (MDL) and the concentration is an approximate value.

U = Indicates the analyte was analyzed for but not detected.

As mentioned above, only TCE and cDCE are currently detected in groundwater at concentrations exceeding MCLS and/or GWQS. In fact, no other VOCs have been detected above MCLS and/or GWQS at the Site since 2010.

An inspection of the distribution of the cVOCs in the soil gas shows low levels of TCE in the western portion of the Site (24 µg/m³ at SG-201 and 1.3 µg/m³ at SG-202) and at the off-Site Unit 117 property (ranging from 0.31 µg/m³ at SG-207 to 69 µg/m³ at SG-205). cDCE is shown at 10 µg/m³ at only SG-201 in the western portion of the property, and at 0.20 µg/m³ U at the remaining sampled

February 9, 2021  
Mr. Jeffrey Allen  
Page 7 of 7

**Reference:** Off-Site Soil Gas Investigation Report, Former McGraw-Edison Facility, Olean, New York

locations. Note that there are no established SGSs for cDCE. PCE is reported on the Site at 540  $\mu\text{g}/\text{m}^3$  at SG-201 and at 14  $\mu\text{g}/\text{m}^3$  at SG-202, and at the off-site Unit 117 property at levels ranging from 1.3  $\mu\text{g}/\text{m}^3$  at SG-207 to 2,900  $\mu\text{g}/\text{m}^3$  at SG-205. The data show that, for all but PCE and TCE, the highest VOC levels are reported at the on-Site location SG-201. The highest concentrations of PCE and TCE were found at the off-site location SG-205. No other notable trends in the data were observed. Regardless, all of these levels are below their lowest, listed SGSs.

## CONCLUSIONS

Based on the information collected from this soil gas investigation, Stantec draws the following conclusions:

- Soil gas is not impacted with VOCs above EPA calculated SGSs in the western portion of the Site or in the off-site property (Unit 117) located to the southwest of the Site.

## RECOMMENDATIONS

Stantec recommends the following:

- No additional vapor intrusion investigation at the Site or at the off-site (Unit 117) property are warranted.

We hope this information meets your needs. Please call the undersigned with any questions or comments.

Regards,

## ANALYTICAL REPORT

Job Number: 200-56451-1

SDG Number: 200-56451-1

Job Description: Easton Cooper Industries

For:

Stantec Consulting Services Inc

5 Burlington Woods Dr

Suite 210

Burlington, MA 01803

Attention: Mr. Craig Gendron

Approved for release.  
Kathryn A Kelly  
Project Manager II  
12/31/2020 1:50 PM

The test results in this report relate only to sample(s) as received by the laboratory. These test results were derived under a quality system that adheres to the requirements of NELAC. Pursuant to NELAC, this report may not be produced in full without written approval from the laboratory

The test results in this report relate only to the samples as received by the laboratory and will meet all requirements of the methodology, with any exceptions noted. This report shall not be reproduced except in full, without the express written approval of the laboratory. All questions should be directed to the Eurofins TestAmerica Project Manager.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

## Qualifiers

### Air - GC/MS VOA

| Qualifier | Qualifier Description                                                                                                               |
|-----------|-------------------------------------------------------------------------------------------------------------------------------------|
| D         | Sample results are obtained from a dilution; the surrogate or matrix spike recoveries reported are calculated from diluted samples. |
| E         | Result exceeded calibration range.                                                                                                  |
| J         | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.                      |
| U         | Indicates the analyte was analyzed for but not detected.                                                                            |

## Glossary

| Abbreviation   | These commonly used abbreviations may or may not be present in this report.                                 |
|----------------|-------------------------------------------------------------------------------------------------------------|
| α              | Listed under the "D" column to designate that the result is reported on a dry weight basis                  |
| %R             | Percent Recovery                                                                                            |
| CFL            | Contains Free Liquid                                                                                        |
| CFU            | Colony Forming Unit                                                                                         |
| CNF            | Contains No Free Liquid                                                                                     |
| DER            | Duplicate Error Ratio (normalized absolute difference)                                                      |
| Dil Fac        | Dilution Factor                                                                                             |
| DL             | Detection Limit (DoD/DOE)                                                                                   |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC            | Decision Level Concentration (Radiochemistry)                                                               |
| EDL            | Estimated Detection Limit (Dioxin)                                                                          |
| LOD            | Limit of Detection (DoD/DOE)                                                                                |
| LOQ            | Limit of Quantitation (DoD/DOE)                                                                             |
| MCL            | EPA recommended "Maximum Contaminant Level"                                                                 |
| MDA            | Minimum Detectable Activity (Radiochemistry)                                                                |
| MDC            | Minimum Detectable Concentration (Radiochemistry)                                                           |
| MDL            | Method Detection Limit                                                                                      |
| ML             | Minimum Level (Dioxin)                                                                                      |
| MPN            | Most Probable Number                                                                                        |
| MQL            | Method Quantitation Limit                                                                                   |
| NC             | Not Calculated                                                                                              |
| ND             | Not Detected at the reporting limit (or MDL or EDL if shown)                                                |
| NEG            | Negative / Absent                                                                                           |
| POS            | Positive / Present                                                                                          |
| PQL            | Practical Quantitation Limit                                                                                |
| PRES           | Presumptive                                                                                                 |
| QC             | Quality Control                                                                                             |
| RER            | Relative Error Ratio (Radiochemistry)                                                                       |
| RL             | Reporting Limit or Requested Limit (Radiochemistry)                                                         |
| RPD            | Relative Percent Difference, a measure of the relative difference between two points                        |
| TEF            | Toxicity Equivalent Factor (Dioxin)                                                                         |
| TEQ            | Toxicity Equivalent Quotient (Dioxin)                                                                       |
| TNTC           | Too Numerous To Count                                                                                       |

## **CASE NARRATIVE**

**Client: Stantec Consulting Services Inc**

**Project: Easton Cooper Industries**

**Report Number: 200-56451-1**

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

### **RECEIPT**

The samples were received on 12/10/2020; the samples arrived in good condition.

### **VOLATILE ORGANIC COMPOUNDS**

Samples SG-201, SG-202, SG-203, SG-204, SG-205, SG-206, SG-207 and TRIP BLANK were analyzed for Volatile Organic Compounds in accordance with EPA Method TO-15. The samples were analyzed on 12/18/2020, 12/19/2020 and 12/21/2020.

Samples SG-201[4X], SG-202[2X] and SG-205[15.4X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

This Detection Summary does not include radiochemical test results.

Eurofins TestAmerica, Burlington

# Detection Summary

Client: Stantec Consulting Services Inc  
Project/Site: Easton Cooper Industries

Job ID: 200-56451-1  
SDG: 200-56451-1

Client Sample ID: SG-201 (Continued)

Lab Sample ID: 200-56451-1

# Client Sample Results

Client: Stantec Consulting Services Inc  
Project/Site: Easton Cooper Industries

Job ID: 200-56451-1  
SDG: 200-56451-1

**Client Sample ID: SG-201**

**Lab Sample ID: 200-56451-1**

**Date Collected: 12/09/20 14:58**

**Matrix: Air**

**Date Received: 12/10/20 10:35**

**Sample Container: Summa Canister 6L**

## Method: TO-15 - Volatile Organic Compounds in Ambient Air (Continued)

# Client Sample Results

Client: Stantec Consulting Services Inc  
Project/Site: Easton Cooper Industries

Job ID: 200-56451-1  
SDG: 200-56451-1

**Client Sample ID: SG-202**

**Lab Sample ID: 200-56451-2**

**Date Collected: 12/09/20 14:59**

**Matrix: Air**

**Date Received: 12/10/20 10:35**

**Sample Container: Summa Canister 6L**

## Method: TO-15 - Volatile Organic Compounds in Ambient Air - DL (Continued)

# Client Sample Results

Client: Stantec Consulting Services Inc  
Project/Site: Easton Cooper Industries

Job ID: 200-56451-1  
SDG: 200-56451-1

**Client Sample ID: SG-203**

**Lab Sample ID: 200-56451-3**

**Date Collected: 12/09/20 14:50**

**Matrix: Air**

**Date Received: 12/10/20 10:35**

**Sample Container: Summa Canister 6L**

## Method: TO-15 - Volatile Organic Compounds in Ambient Air (Continued)

# Client Sample Results

Client: Stantec Consulting Services Inc  
Project/Site: Easton Cooper Industries

Job ID: 200-56451-1  
SDG: 200-56451-1

**Client Sample ID: SG-205**

**Lab Sample ID: 200-56451-5**

**Date Collected: 12/09/20 14:53**

**Matrix: Air**

**Date Received: 12/10/20 10:35**

**Sample Container: Summa Canister 6L**

## Method: TO-15 - Volatile Organic Compounds in Ambient Air - DL (Continued)

# Client Sample Results

Client: Stantec Consulting Services Inc  
Project/Site: Easton Cooper Industries

Job ID: 200-56451-1  
SDG: 200-56451-1

**Client Sample ID: SG-206**

**Lab Sample ID: 200-56451-6**

**Date Collected: 12/09/20 14:54**

**Matrix: Air**

**Date Received: 12/10/20 10:35**

**Sample Container: Summa Canister 6L**

## Method: TO-15 - Volatile Organic Compounds in Ambient Air (Continued)

# QC Sample Results

Client: Stantec Consulting Services Inc  
Project/Site: Easton Cooper Industries

Job ID: 200-56451-1  
SDG: 200-56451-1

## Method: TO-15 - Volatile Organic Compounds in Ambient Air (Continued)

Lab Sample ID: MB 200-162293/5

Matrix: Air

Analysis Batch: 162293

Client Sample ID: Method Blank

Prep Type: Total/NA

# QC Sample Results

Client: Stantec Consulting Services Inc  
Project/Site: Easton Cooper Industries

Job ID: 200-56451-1  
SDG: 200-56451-1

## Method: TO-15 - Volatile Organic Compounds in Ambient Air (Continued)

Lab Sample ID: LCS 200-162293/4

Matrix: Air

Analysis Batch: 162293

Client Sample ID: Lab Control Sample

Prep Type: Total/NA

## Accreditation/Certification Summary

Client: Stantec Consulting Services Inc  
Project/Site: Easton Cooper Industries

Job ID: 200-56451-1  
SDG: 200-56451-1

### Laboratory: Eurofins TestAmerica, Burlington

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

| Authority | Program | Identification Number | Expiration Date |
|-----------|---------|-----------------------|-----------------|
| New York  | NELAP   | 10391                 | 04-01-21        |

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

| Analysis Method | Prep Method | Matrix | Analyte                          |
|-----------------|-------------|--------|----------------------------------|
| TO-15           |             | Air    | 4-Ethyltoluene                   |
| TO-15           |             | Air    | 4-Isopropyltoluene               |
| TO-15           |             | Air    | Chlorodifluoromethane            |
| TO-15           |             | Air    | Cumene                           |
| TO-15           |             | Air    | Methyl Butyl Ketone (2-Hexanone) |
| TO-15           |             | Air    | n-Butane                         |
| TO-15           |             | Air    | n-Butylbenzene                   |
| TO-15           |             | Air    | n-Propylbenzene                  |
| TO-15           |             | Air    | sec-Butylbenzene                 |
| TO-15           |             | Air    | tert-Butylbenzene                |
| TO-15           |             | Air    | Tetrahydrofuran                  |

Reagent

---

**ATTO15CALs\_00042**

**Reagent ID: 40XX200tankD\_00001**

Description: 200ppb v/v Tank D Bur Recert  
 No. of Bottles: 1  
 Storage Location: Ambient Air Canister Reagent Storage  
 Reagent Volume: 36.700 psi absolute  
 Creation Date: 12/07/2020  
 Open Date:  
 Container(s): 343746  
 Comment: Adjusted for nominal value of 200 ppb v/v can SN1652

Expiration Date: 02/07/2021  
 Laboratory: Eurofins TestAmerica, Knoxville  
 Prepared By: Barlozhetskaya, Anna F  
 Solvent: Nitrogen  
 Solvent Lot: Dewar

**Reagent ID: 40XX200tankD\_00001**

Description: 200ppb v/v Tank D Bur Recert  
 No. of Bottles: 1  
 Storage Location: Ambient Air Canister Reagent Storage  
 Reagent Volume: 36.700 psi absolute  
 Creation Date: 12/07/2020  
 Open Date:  
 Container(s): 343746  
 Comment: Adjusted for nominal value of 200 ppb v/v can SN1652

Expiration Date: 02/07/2021  
 Laboratory: Eurofins TestAmerica, Knoxville  
 Prepared By: Barlozhetskaya, Anna F  
 Solvent: Nitrogen  
 Solvent Lot: Dewar

**ATTO15CALs\_00043**

**Reagent ID: 40XX200tankD\_00001**

Description: 200ppb v/v Tank D Bur Recert  
 No. of Bottles: 1  
 Storage Location: Ambient Air Canister Reagent Storage  
 Reagent Volume: 36.700 psi absolute  
 Creation Date: 12/07/2020  
 Open Date:  
 Container(s): 343746  
 Comment: Adjusted for nominal value of 200 ppb v/v can SN1652

Expiration Date: 02/07/2021  
 Laboratory: Eurofins TestAmerica, Knoxville  
 Prepared By: Barlozhetskaya, Anna F  
 Solvent: Nitrogen  
 Solvent Lot: Dewar

**Reagent ID: 40XX200tankD\_00001**

Description: 200ppb v/v Tank D Bur Recert  
 No. of Bottles: 1  
 Storage Location: Ambient Air Canister Reagent Storage  
 Reagent Volume: 36.700 psi absolute  
 Creation Date: 12/07/2020  
 Open Date:  
 Container(s): 343746  
 Comment: Adjusted for nominal value of 200 ppb v/v can SN1652

Expiration Date: 02/07/2021  
 Laboratory: Eurofins TestAmerica, Knoxville  
 Prepared By: Barlozhetskaya, Anna F  
 Solvent: Nitrogen  
 Solvent Lot: Dewar
