State Superfund Site Reclassification Notice Class 2 to Class 4

The Inactive Hazardous Waste Disposal Site Program (the State Superfund Program) is the State's program for identifying, investigating, and cleaning up sites where the disposal of hazardous waste may present a threat to public health and/or the environment. The New York State Department of Environmental Conservation (DEC) maintains a list of these sites in the Registry of Inactive Hazardous Waste Disposal Sites (Registry). The site identified above, and located on the attached map, has been reclassified on the Registry as a Class 4 site as it no longer presents a significant threat to public health and/or the environment for the following reason(s):

- Cleanup actions are complete, including excavation of waste from the East Landfill Cell and consolidation into the West Landfill Cell and placement of a two-foot soil cover.
- An environmental easement has been recorded limiting future property use. Property use will be limited to commercial or industrial use only.
- A long-term Site Management Plan has been developed which establishes an inspection & maintenance program, groundwater monitoring program, and soil management plan.
- The site is required to comply with the approved Site Management Plan and the property owner will annually certify to DEC that the institutional and engineering controls in place at the site to protect human health and the environment remain effective.

If you own property adjacent to this site and are renting or leasing your property to someone else, please share this information with them. If you no longer wish to be on the contact list for this site or otherwise need to correct our records, please contact DEC's Project Manager listed below.
