**Note:** The information presented in this Citizen Participation Plan was current as of the date of its approval by the New York State Department of Environmental Conservation (NYSDEC). Portions of this Citizen Participation Plan may be revised during the site’s remedial process.

## **1. What is New York's Corrective Action Program?**

The objective of a Resource Conservation and Recovery Act (RCRA) Corrective Action Program at a hazardous waste management facility (site) is to evaluate the nature and extent of the releases of hazardous waste or hazardous constituents; to evaluate facility characteristics; and to identify, develop, and implement an appropriate corrective measure or measures to protect human health and the environment. A typical site is a former industrial or commercial property where operations may have resulted in environmental contamination. A site can pose environmental, legal and financial burdens on a community. If site contamination is not addressed, it can reduce property values in the area and affect economic development of nearby properties.

## **2. Citizen Participation Plan Overview**

This Citizen Participation (CP) Plan provides members of the affected and interested public with information about how NYSDEC will inform and involve them during the investigation and remediation of the site identified above. The public information and involvement program will be carried out with assistance, as appropriate, from the Property Owner.

Appendix A contains a map identifying the location of the site.

### *Project Contacts*

Appendix B identifies NYSDEC project contact(s) to whom the public should address questions or request information about the site's remedial program. The public's suggestions about this CP Plan and the CP program for the site are always welcome. Interested people are encouraged to share their ideas and suggestions with the project contacts at any time.

### *Document Repositories*

The locations of the site's document repositories also are identified in Appendix B. The document repositories provide convenient access to important project documents for public review and comment.

### *Site Contact List*

Appendix C contains the Corrective Measures Study (CMS) site contact list. This list has been developed to keep the community informed about, and involved in, the site's investigation and remediation process. The CMS site contact list will be used periodically to distribute fact sheets that provide updates about the status of the project, including notifications of upcoming

remedial activities at the site (such as fieldwork), as well as availability of project documents and announcements about public comment periods.

The CMS site contact list includes, at a minimum:

- Chief executive officer and zoning chairperson of each county, city, town and village in which the site is located;
- Residents, owners, and occupants of the site and properties adjacent to the site;
- The public water supplier which services the area in which the site is located;
- Any person who has requested to be placed on the site contact list;
- The administrator of any school or day care facility located on or near the site for purposes of posting and/or dissemination of information at the facility; and
- Document repositories.

Where the site or adjacent real property contains multiple dwelling units, the Property Owner will work with the NYSDEC to develop an alternative method for providing such notice in lieu of mailing to each individual. For example, the owner of such a property that contains multiple dwellings may be requested to prominently display fact sheets and notices required to be developed during the site's remedial process. This procedure would substitute for the mailing of such notices and fact sheets, especially at locations where renters, tenants, and other residents may number in the hundreds or thousands, making the mailing of such notices impractical.

The CMS site contact list will be reviewed periodically and updated as appropriate. Individuals and organizations will be added to the site contact list upon request. Such requests should be submitted to the NYSDEC project contact(s) identified in Appendix B. Other additions to the site contact list may be made on a site-specific basis at the discretion of the NYSDEC project manager, in consultation with other NYSDEC staff as appropriate.

### *CP Activities*

The CP activities, at a minimum, that have been and will be conducted during the site's remedial program are listed below. The public is informed about these CP activities through fact sheets and notices developed at significant points in the site's remedial process.

- **Notices and fact sheets** help the interested and affected public to understand contamination issues related to a site, and the nature and progress of efforts to investigate and remediate a site.
- **Public forums, comment periods and contact with project managers** provide opportunities for the public to contribute information, opinions and perspectives that have potential to influence decisions about a site's investigation and remediation.

The public is encouraged to contact project staff anytime during the site's remedial process with questions, comments, or requests for information about the remedial program.

This CP Plan may be revised due to changes in major issues of public concern, identified in Section 6, or in the nature and scope of remedial activities. Modifications may include additions to the site contact list and changes in planned citizen participation activities.

### **3. Site Information**

#### *Site Description*

The Corrective Measures Study Site is an approximate 489.4-acre area located at 1951 Hamburg Turnpike (a.k.a New York State Route 5) in the City of Lackawanna (the City), Erie County, New York. The property is located on the site of the former Bethlehem Steel Corporation (BSC) Lackawanna Works in a primarily industrial area of the City. Tecumseh Redevelopment, Inc. acquired the property, along with other BSC assets, out of bankruptcy in 2003. The surrounding properties to the north, west, and south of the Site are industrial. The property uses east of the Site (east of Route 5) are primarily industrial, commercial, and vacant. A site location map is included as Appendix A.

#### *Site History*

The ArcelorMittal Tecumseh property is located on a portion of the site of the former Bethlehem Steel Corporation (BSC) Lackawanna Works in a primarily industrial area. The property was formerly used for the production of steel, coke and related products by Bethlehem Steel Corporation (BSC). Steel production on the property was discontinued in 1983 and the coke ovens ceased activity in 2000. Tecumseh acquired the property, along with other BSC assets, out of bankruptcy in 2003.

The CMS Site is generally characterized as a flat area covered by sparse brush and low lying vegetation. The Site is transected by Smokes Creek (though not included in the Site). The Site contains no discernable features, except for the remaining buildings of the former coke production facility and tank farm, former slag-filled access roads, electrical power lines, and railroad tracks.

#### *Environmental History*

A Resource Conservation and Recovery Act (RCRA) Facility Investigation (RFI) of all solid waste management units (SWMUs) located within the 1,100-acre parcel was initiated by BSC under an Administrative Order issued by the United States Environmental Protection Agency (USEPA) in 1990. Tecumseh completed the RFI in October 2004. USEPA and the NYSDEC

have approved the RFI. A number of SWMUs are present on the Tecumseh property.

Tecumseh has signed a Memorandum of Understanding (MOU) with Erie County and the City of Lackawanna to promote and implement redevelopment of the former BSC property following cleanup. The conceptual redevelopment plans for the entire 1,100-acre site incorporates a Business Park area along NYS Route 5.

#### **4. Remedial Process**

The focus of Corrective Action is on “solid waste management units (SWMUs), including any unit at a facility where solid and/or hazardous waste was or is now managed, regardless of whether such management was intended.

The five main components of the NYSDEC’s RCRA Corrective Action Program and their objectives are as follows:

- RCRA Facility Assessment (RFA) - to evaluate SWMU information by reviewing all available records, conducting a visual site inspection to observe the SWMUs, and, if necessary, requiring the facility to perform a sampling visit when releases are suspected.
- Interim Corrective Measures (ICMs) - to control or abate threats to human health and/or the environment from releases and/or to prevent or minimize the further spread of contamination while long-term remedies are pursued.
- RCRA Facility Investigation (RFI) - to evaluate thoroughly the nature and extent of the releases of hazardous waste and hazardous constituents and to gather necessary data to support the Corrective Measures Study and/or interim corrective measures.
- Corrective Measures Study (CMS) - to develop and evaluate a corrective measure alternative or alternatives and to recommend the final corrective measure(s).
- Corrective Measures Implementation (CMI) - to design, construct, operate, maintain, and monitor the performance of the corrective measure(s) selected.

#### *Remedy Selection*

If remediation is required a Corrective Measures (CMS) Work Plan will be developed. The CMS Work Plan describes how the Property Owner would address the contamination related to the site.

The public will have the opportunity to review and comment on the draft Corrective Measures Work Plan. The site contact list will be sent a fact sheet that describes the draft CMS Work Plan and announces a minimum 45-day public comment period. NYSDEC will factor this input into

its decision to approve, reject or modify the draft CMS Work Plan. A public meeting will be held by NYSDEC to discuss the proposed Corrective Measures Work.

### *Construction*

Approval of the CMS Work Plan and any associated ICMs by NYSDEC and the New York State Department of Health (NYSDOH) will allow for the design and construction of the corrective measures selected to remediate the site. The site contact list will receive notification before the start of site remediation. When the Property Owner completes the corrective measures, it will prepare a final corrective measures report certifying that remediation requirements have been achieved or will be achieved within a specific time frame. NYSDEC will review the report to be certain that the remediation is protective of public health and the environment for the intended use of the site. The site contact list will receive a fact sheet that announces the completion of remedial activities and the review of the final corrective measures report.

## **5. Citizen Participation Activities**

All CP activities are conducted to provide the public with significant information about site findings and planned remedial activities, and some activities announce comment periods and request public input about important draft documents such as the Proposed CMS Work Plan.

All written materials developed for the public will be reviewed and approved by NYSDEC for clarity and accuracy before they are distributed. Notices and fact sheets can be combined at the discretion, and with the approval, of NYSDEC.

## **6. Major Issue of Public Concern**

This section of the CP Plan identifies major issues of public concern, if any, that relate to the site. Additional major issues of public concern may be identified during the site's remedial process.

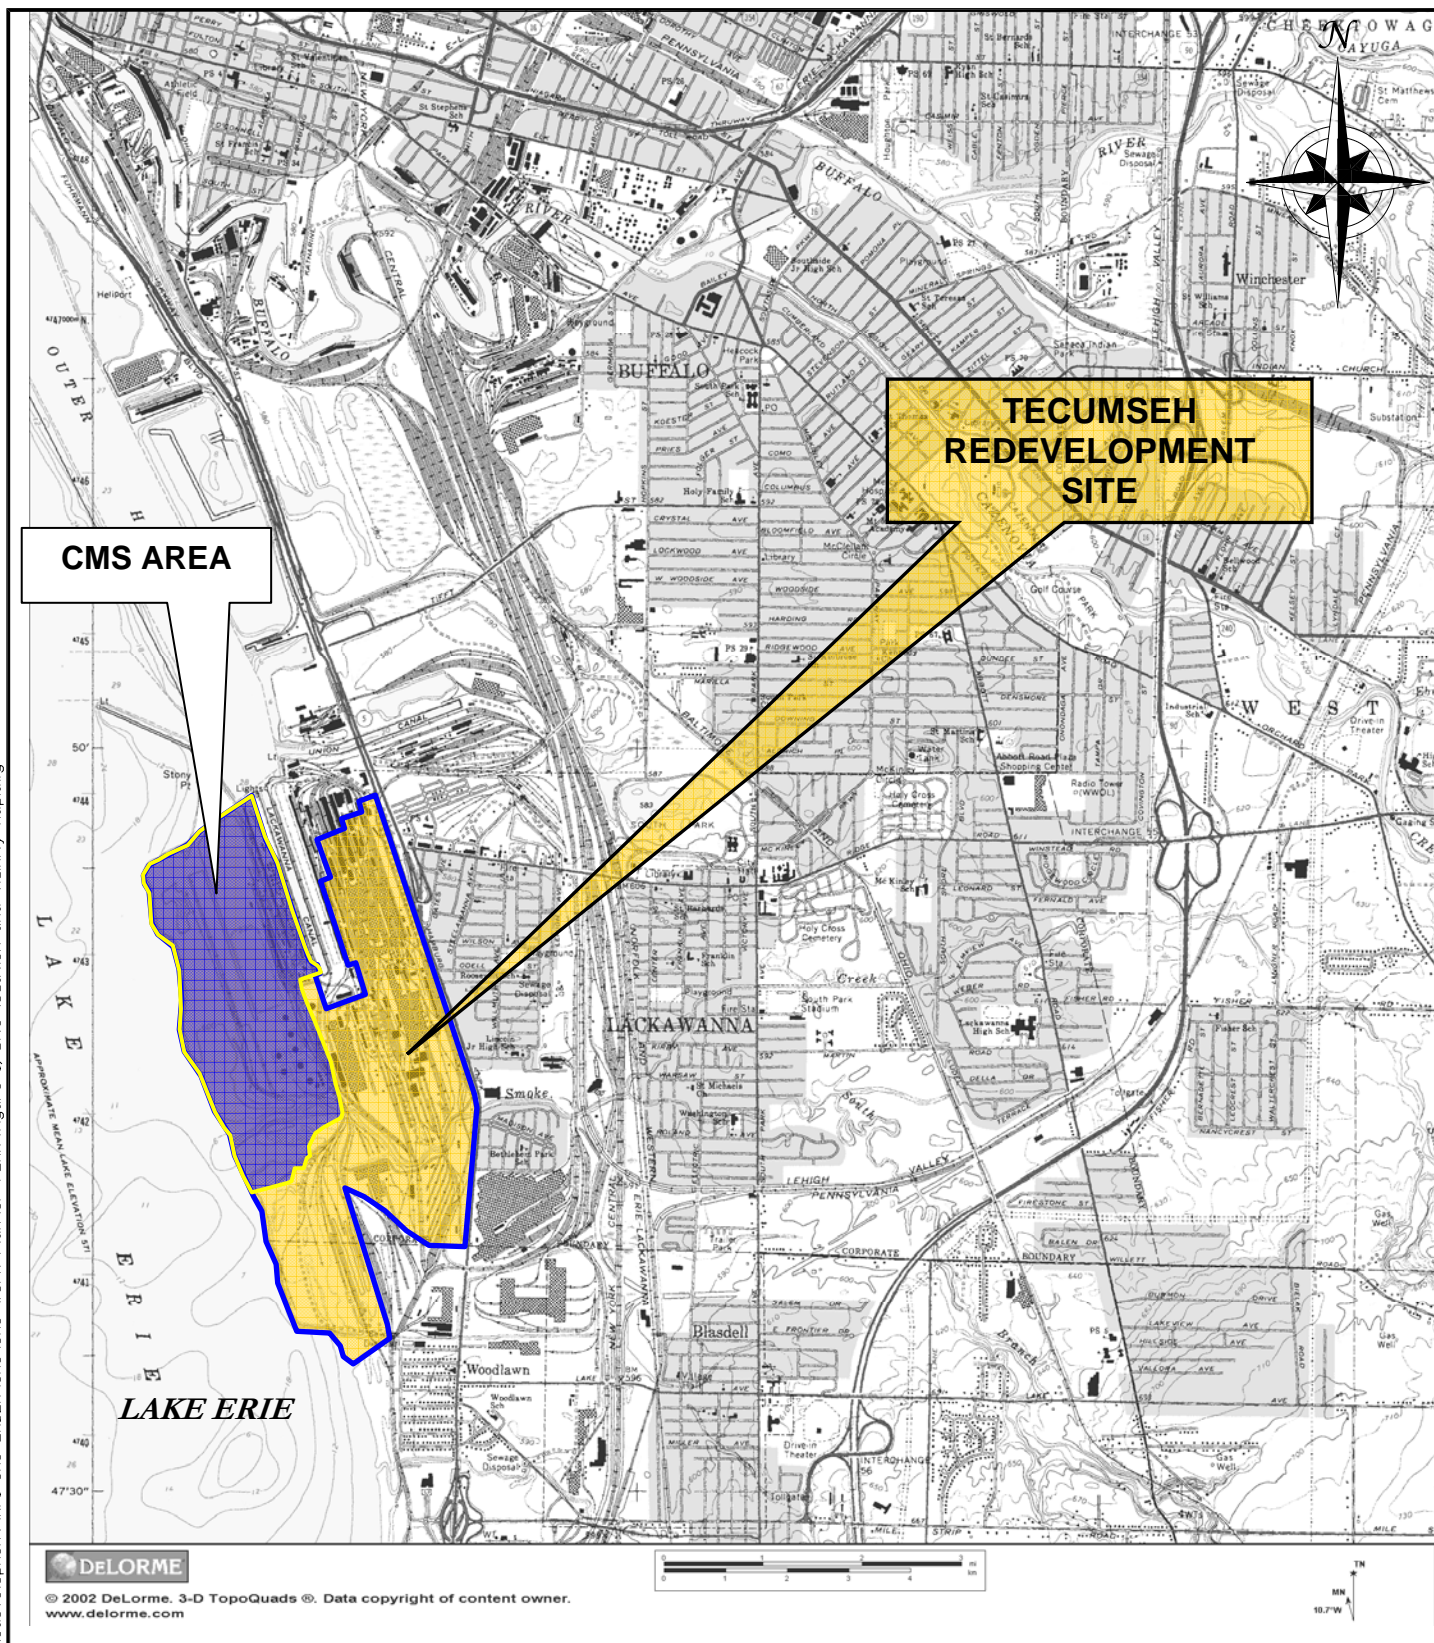

In general, the portion of the Site that will be subject to Corrective Measures is more than a half mile from Route 5 and is therefore located a significant distance from the surrounding community. However, the potential exists for noise, odor, dust, and traffic concerns as a result of planned remedial activities. To address these potential concerns, the Corrective Measures Study Work Plan provides for specific mitigation measures to be implemented to reduce these impacts. All work will be conducted under a Site-Wide Health and Safety Plan and Community Air Monitoring Program approved by the NYSDEC and NYSDOH. The planned Corrective

Measures will be conducted over a limited duration and during normal business hours. In addition, the planned Corrective Measures will not result in large-scale or short-term equipment mobilization or off-site trucking; hence, there will be no appreciable change in traffic patterns.

## **Appendix B – Project Contacts and Document Repositories**

### **Project Contacts**

For information about the site's remedial program, the public may contact the following NYSDEC project contacts:

Mr. Stanley Radon, CPG  
Project Manager  
NYSDEC Region 9  
Division of Environmental Remediation  
270 Michigan Avenue  
Buffalo, NY 14203  
(716) 851-7220

Mr. Mark Batezhold  
Citizen Participation Specialist  
NYSDEC Region 9  
270 Michigan Avenue  
Buffalo, NY 14203  
(716) 851-7220

### **New York State Department of Health (NYSDOH)**

Mr. Cameron O'Conner  
Project Manager  
NYSDOH  
584 Delaware Avenue  
Buffalo, New York 14202  
(716) 847-4501

### **Document Repositories**

The document repositories identified below have been established to provide the public with convenient access to important project documents:

Lackawanna Public Library  
560 Ridge Road  
Lackawanna, NY 14218  
Attn: Jennifer Hoffman, Librarian  
Phone: (716) 823-0630  
Hours: M, W 1-9  
T, Th-Sat. 10-5  
Sun. (closed)

NYSDEC Region 9 Office  
270 Michigan Avenue  
Buffalo, NY 14203  
Attn: Mr. Mark Batezhold  
Phone: (716) 851-7220  
Hours: M-F 8:30-4:45  
(Call for appointment)
