1.0 EXECUTIVE SUMMARY

1.1 REPORT FINDINGS

The following details the environmental professional's specific findings of LCS' all appropriate inquiries of the above-referenced site in accordance with ASTM E1527-05. It should be noted that this Phase I Environmental Assessment includes only a portion of what is required by the user to comply with all appropriate inquiries (See Appendix 10.13). This section is provided for convenience to the reader. The reader is encouraged to read the entire report.

It is LCS' understanding that this all appropriate inquiries was requested by the user for the purpose of meeting the all appropriate inquiries provisions necessary to qualify for landowner liability protections under CERCLA (See Appendix 10.13).

1.1.1 Site Description

The subject property is identified as a commercial building located at Plant #1/Area "C," 3773 Lake Shore Road (a.k.a. Hoover Road and Old Lake Shore Road), Town of Hamburg, Erie County, New York. The subject property tax map shows the subject property to measure approximately 2.5 acres. The subject property is a portion of a greater 10.3 acre parcel. Refer to the Section 10.2 SITEMAPS. The subject property is almost entirely developed with a one-story, approximately 92,000 square foot structure that was originally constructed in 1941 with additions in the 1950s and 1960s. The structure is currently occupied by three tenants, including Team Freight (storage of inert flux materials in cardboard boxes), an unidentified tenant (storage of waste bubble gum products in cardboard barrels), and a private tenant (airplane reconstruction).

1.1.2 Site Reconnaissance

The subject property is located in a highly developed commercial and industrial area. Public utility companies provide the following services to the subject property: electric; natural gas; water; and sanitary sewer.

The following conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the subject property were identified:

- Hazardous and/or regulated materials, in the form of compressed gas cylinders (associated with lift motors), were noted stored and utilized on the subject property at the time of the site inspection
- Although no hazardous or regulated waste was noted during the LCS site inspection, a space heater within the private tenant space was noted to consist of two 55-gallon drums that may use waste oil as a fuel source.
- According to the site contact, the subject property has been supplied with municipal sanitary sewer since
 approximately the 1950s. Historic operations on the subject property may have produced wastewaters
 that required treatment or monitoring. Floor drains were noted throughout the subject structure; these
 drains were either sealed or plugged with sediment.
- At the time of the site inspection, LCS noted inactive welding hoods in a portion of the subject structure.
- Soil borings were noted on the southwestern portion of the subject property. According to the site
 contact, this was formerly a solvent dumping area used for a vehicle maintenance operation. A
 NYSDEC Order on Consent (No. 915049; draft copy attached) was provided to LCS. This area will be
 remediated by the owner (i.e., Snyder Tank) in accordance with regulatory guidelines.
- An adjacent property was noted to be a former gasoline station and current automotive repair facility.

1.1.3 Site History

The historical use of the subject property has been researched through review of historic maps, historic aerial photographs, municipal records, city directories, and/or other reasonably obtainable documents. In general, the historical site uses were determined to be as follows.

Date Range	Apparent Use	Source
1901, 1938	Undeveloped	Aerial photographs, historical topographic map
1941-present	Developed with the existing structure; historically used as a fuel tank manufacturer, truck brake parts manufacturing, trucking, welding, vehicle maintenance; currently used as warehouse and private airplane restoration. Several additions have been constructed to the original welding shop since the 1950s.	Aerial photographs, city directories, historic topographic maps, municipal information, site inspection, site contact interview

The following conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the subject property were identified based on LCS' historical research:

- The subject property has historically been used as a manufacturer of fuel storage tanks, truck brake parts, and included welding and vehicle maintenance areas.
- Municipal records indicate that gasoline tanks were installed in 1952, 1972, and 1974. As the subject property is a portion of a greater parcel, the location of these tanks is not clear.
- Municipal records include a violation for storage of hazardous materials; this violation was apparently resolved in 2007.

1.1.3 Site History (continued):

Previous investigations: GLE identified a former paint booth area; a dry well on the west side of the building; and an oil-stained area, and recommended further investigation and cleaning of the oilstained area. BEES investigated a "cut out area" at Plant #1 for the presence of USTs. No USTS or visual evidence of impact was noted in this area; however, an analyzed soil sample indicated VOCs at concentrations below regulatory levels. BEES investigated an oil-stained area (previously identified by GLE - see above). No VOCs, PCBs, or metals were detected above regulatory levels via a wipe sample collected from the stained area. BEES investigated the former Paint Booth area (previously identified by GLE - see above) via the collection and analysis of a sediment sample from the associated floor drain. The results of this analysis indicated that no VOCS were detected; however, several metal compounds exceeded regulatory levels. BEES recommended that the floor drains in the paint booth area be cleaned-out. HEI completed a subsurface investigation consisting of test pits and soil borings and groundwater sampling. Based on the results of that investigation, HEI indicated that no volatile organic compounds (VOCs) or semi-volatile organic compounds (SVOCs) were detected in groundwater samples collected from the subject property (i.e., wells #SB-14 and #SB-17 from the building interior). Metal compounds were detected but below regulatory levels in these two wells. VOCS were detected in soil at soil boring #SB-18 associated with solvents (Trichloroethane and Toluene). HEI tested some or the entire floor drains in Plant #1 (subject property) and determined that the discharge point is across the street at Plant #2 and not on the subject property. Test pit excavations along the south side of the Plant #1 building, south of the subject property line, encountered fill materials and an oily odor. Analysis of these fills indicated slightly elevated levels of Cadmium above typical background concentrations. HEI recommended a limited remedial measure in the area of the solvent impact. [Such metal compounds are likely associated with the fill materials and are located adjacent to the subject property.] BEES concluded a second investigation of a previously identified area of concern (i.e., soil boring #SB-18), delineated the remedial area subject to the NYSDEC Order on Consent. Groundwater impact was not detected down-gradient of the proposed remedial area. In addition, no evidence of USTs was noted in the proposed remedial area. BEES suggested that no further action was required. [It is LCS' understanding that the proposed remedial area will be cleaned-up by the owner, Snyder Tank, in accordance with the finalized NYSADEC Order on Consent.] And, BEES completed a subsurface investigation in the area of the former Paint Booth. Based on the detection of competent concrete in the area of the Paint Booth and associated floor drain, and the lack of visual/olfactory evidence of impact, no further investigation was warranted.

1.1.4 Regulatory Information

A review of regulatory database information and any additional regulatory information reviewed by LCS identified the following conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the subject property.

- According to the EDR report, the greater parcel was identified as a NY Spill site. Spill No. 0709817 involved leaking powder material (sodium hydaflouride aluminate); the material was cleaned and removed from the property and this spill is classified as "inactive." [A status of "inactive" indicates the contamination may remain at the subject property but no further remediation is required.]
- The greater property is listed as a CERCLIS NFRAP site, described as a 6 acre former manufacturer of steel and aluminum automobile fuel tanks known to have discharged acid picking wastes onto the beach of Lake Erie. A leaking tank was also noted. This facility was archived in 2002 and is classified as "no further remedial action planned."
- The greater property is a RCR site; pickle liquor and other wastes were generated between 1980 and 2001. The site is currently listed as a conditionally exempt small quantity generator of hazardous wastes. The violations listed for this facility have reached compliance.
- This greater property is included in the FINDS database due to listings as a CERCLIS-NFRAP, RCRA and TRIS facility. Information (attached) obtained through the USEPA website states that this facility generated toluene and xylene air emissions in 1990 through 1992. This facility was also included in the AIR Program and was on the Criteria and Hazardous Air Pollutant Inventory.
- According to the EDR report, an adjacent property (Sewage Treatment Plant at 3680 and 3690 Lake Shore Road) has 20 spills listed, all of which are classified as either "inactive" or "closed." In addition, this adjacent facility is listed as a UST, historic UST, and CBS facility. This facility is located hydraulically down-gradient of the subject property.
- A review of NYSDEC files included the Draft Order on Consent and previous studies (refer to Section 5.4).

1.1.5 Interviews

Interviews were conducted with various municipal representatives and/or other persons knowledgeable about the subject property.

The following conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the subject property were identified based on these interviews:

 According to the property owner, Mr. Joseph Snyder, there are pending administrative proceedings (associated with a solvent release) and the property owner is negotiating an Order on Consent with the NYSDEC.

1.1.6 Other Findings

LCS did not identify significant potential concerns relative to suspect ACMs, lead-based paint, mold, radon or wetland issues.

1.2 SUMMARY

FINDINGS

Based on the assessment completed by LCS, the following is a list of known or suspected recognized environmental conditions (RECs), historic RECs and de minimis conditions.¹

Known or Suspect RECs

- The subject property has historically been used as a manufacturer of fuel storage tanks, truck brake parts, and included welding and vehicle maintenance areas.
- According to the site contact, the subject property has been supplied with municipal sanitary sewer since
 approximately the 1950s. Historic operations on the subject property may have produced wastewaters
 that required treatment or monitoring. Floor drains were noted throughout the subject structure; these
 drains were either sealed or plugged with sediment.
- Soil borings were noted on the southwestern portion of the subject property. According to the site
 contact, this was formerly a solvent dumping area used for a vehicle maintenance operation. A
 NYSDEC Order on Consent (No. 915049; draft copy attached) was provided to LCS. This area will be
 remediated by the owner (i.e., Snyder Tank) in accordance with regulatory guidelines.
- An adjacent property was noted to be a former gasoline station and current automotive repair facility.
- Municipal records indicate that gasoline tanks were installed in 1952, 1972, and 1974. As the subject property is a portion of a greater parcel, the location of these tanks is not clear.

¹ As per ASTM 1527-05, conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions.

FINDINGS (continued):

- Previous investigations: GLE identified a former paint booth area; a dry well on the west side of the building; and an oil-stained area, and recommended further investigation and cleaning of the oil-stained area. BEES investigated a "cut out area" at Plant #1 for the presence of USTs. No USTS or visual evidence of impact was noted in this area; however, an analyzed soil sample indicated VOCs at concentrations below regulatory levels. BEES investigated an oil-stained area (previously identified by GLE - see above). No VOCs, PCBs, or metals were detected above regulatory levels via a wipe sample collected from the stained area. BEES investigated the former Paint Booth area (previously identified by GLE – see above) via the collection and analysis of a sediment sample from the associated floor drain. The results of this analysis indicated that no VOCS were detected; however, several metal compounds exceeded regulatory levels. BEES recommended that the floor drains in the paint booth area be cleaned-out. HEI completed a subsurface investigation consisting of test pits and soil borings and groundwater sampling. Based on the results of that investigation, HEI indicated that no volatile organic compounds (VOCs) or semi-volatile organic compounds (SVOCs) were detected in groundwater samples collected from the subject property (i.e., wells #SB-14 and #SB-17 from the building interior). Metal compounds were detected but below regulatory levels in these two wells. VOCS were detected in soil at soil boring #SB-18 associated with solvents (Trichloroethane and Toluene). HEI tested some or the entire floor drains in Plant #1 (subject property) and determined that the discharge point is across the street at Plant #2 and not on the subject property. Test pit excavations along the south side of the Plant #1 building, south of the subject property line, encountered fill materials and an oily odor. Analysis of these fills indicated slightly elevated levels of Cadmium above typical background concentrations. HEI recommended a limited remedial measure in the area of the solvent impact. [Such metal compounds are likely associated with the fill materials and are located adjacent to the subject property.] BEES concluded a second investigation of a previously identified area of concern (i.e., soil boring #SB-18), delineated the remedial area subject to the NYSDEC Order on Consent. Groundwater impact was not detected down-gradient of the proposed remedial area. In addition, no evidence of USTs was noted in the proposed remedial area. BEES suggested that no further action was required. [It is LCS' understanding that the proposed remedial area will be cleaned-up by the owner, Snyder Tank, in accordance with the finalized NYSADEC Order on Consent.] And, BEES completed a subsurface investigation in the area of the former Paint Booth. Based on the detection of competent concrete in the area of the Paint Booth and associated floor drain, and the lack of visual/olfactory evidence of impact, no further investigation was warranted.
- The greater property is a RCRA site; pickle liquor and other wastes were generated between 1980 and 2001. The site is currently listed as a conditionally exempt small quantity generator of hazardous wastes. The violations listed for this facility have reached compliance.
- This greater property is included in the FINDS database due to listings as a CERCLIS-NFRAP, RCRA and TRIS facility. Information (attached) obtained through the USEPA website states that this facility generated toluene and xylene air emissions in 1990 through 1992. This facility was also included in the AIR Program and was on the Criteria and Hazardous Air Pollutant Inventory.

FINDINGS (continued):

- According to the EDR report, an adjacent property (Sewage Treatment Plant at 3680 and 3690 Lake Shore Road) has 20 spills listed, all of which are classified as either "inactive" or "closed." In addition, this adjacent facility is listed as a UST, historic UST, and CBS facility. This facility is located hydraulically down-gradient of the subject property.
- A review of NYSDEC files included the Draft Order on Consent and previous studies (refer to Section 5.4).
- According to the property owner, Mr. Joseph Snyder, there are pending administrative proceedings (associated with a solvent release) and the property owner is negotiating a consent order with the NYSDEC.

Historic RECs2

- Municipal records include a violation for storage of hazardous materials; this violation was apparently resolved in 2007.
- According to the EDR report, the greater parcel was identified as a NY Spill site. Spill No. 0709817 involved leaking powder material (sodium hydaflouride aluminate); the material was cleaned and removed from the property and this spill is classified as "inactive." [A status of "inactive" indicates the contamination may remain at the subject property but no further remediation is required.]
- The greater property is listed as a CERCLIS NFRAP site, described as a 6 acre former manufacturer of steel and aluminum automobile fuel tanks known to have discharged acid picking wastes onto the beach of Lake Erie. A leaking tank was also noted. This facility was archived in 2002 and is classified as "no further remedial action planned."

De Minimis Conditions

While not considered recognized environmental conditions under the ASTM standard, LCS notes the following:

- Hazardous and/or regulated materials, in the form of compressed gas cylinders (associated with lift motors), were noted stored and utilized on the subject property at the time of the site inspection
- Although no hazardous or regulated waste was noted during the LCS site inspection, a space heater within the private tenant space was noted to consist of two 55-gallon drums that may use waste oil as a fuel source.
- At the time of the site inspection, LCS noted inactive welding hoods in a portion of the subject structure.

² A historical recognized environmental condition is an environmental condition that in the past would have been considered a recognized environmental condition, but that may or may not be considered a recognized environmental condition currently. For example, a spill that has been remediated to the satisfaction of the appropriate regulators would be considered a historical recognized environmental condition.

OPINION

Based on the above known or suspect recognized environmental conditions, their significance and recommendations for additional investigation, if any, are summarized below.

Known or Suspect RECs	Confirmed REC? Rationale	LCS Opinion/ Additional Investigation	
Evidence of soil borings were noted on the southwestern portion of the subject property. This was formerly a solvent dumping area used for a vehicle maintenance operation.	Yes; a NYSDEC Order on Consent (No. 915049; draft copy attached) was provided to LCS.	Remediation is required and this area will be remediated by the owner (i.e., Snyder Tank) in accordance with regulatory guidelines. The borrower and legal counsel should verify with the NYSDEC that all conditions of the finalized Order on Consent have been properly addressed.	
Historic RECs	Rationale	LCS Opinion/ Additional Investigation	
Municipal records include a violation for storage of hazardous materials.	No. Such materials were properly stored on-site during the site inspection.	No further investigation is warranted as this violation was apparently resolved in 2007.	

De Minimis Conditions

A suspect waste oil space heater was noted on one of the tenant spaces. In addition, inactive welding hoods were noted in the same tenant space. If no longer proposed for continued usage, such equipment should be properly decommissioned.

CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527 of Plant #1/Area "C," 3773 Lake Shore Road (a.k.a. Hoover Road and Old Lake Shore Road), Town of Hamburg, Erie County, New York, the subject property. Any exceptions to, or deletions from, this practice are described in Section 1.3 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the property except for the following:

• Evidence of soil borings were noted on the southwestern portion of the subject property. This was formerly a solvent dumping area used for a vehicle maintenance operation.

1.3 DATA GAPS

The following data gaps³ were encountered in completion of this inquiry:

Type of Data Gap	Details of Data Gap	Sources Consulted	Significance
Historical Use	Historical uses for each five year period were not obtained.	Aerial photographs, topographic maps, municipal records, municipal interviews, site contact/property owner, Polk Directories, Sanborn Maps (not available)	While data for each year was not obtained, the data did provide relatively complete records of site uses.
Site Reconnaissance	LCS' observations of the subject property were limited due to stored materials/equipment and poor lighting.	N/A	Not anticipated to be significant, based on information reviewed to date.
Interviews	LCS was not able to contact the historic owners	Current owners, municipal records for historic ownership information.	Unknown, LCS cannot be liable for information known to the previous owners and not supplied to LCS. However, other historical sources indicted no significant concerns on-site.

To the best of LCS' knowledge, the information contained in this report is true and accurate. LCS personnel have exercised due diligence in the compilation of the information contained herein appropriate to environmental professionals engaged in investigations of this sort. LCS makes no guarantees regarding the accuracy of information gained from other sources.

Refer to Section 10.12 for additional limitations.

³ A data gap is defined by 40 CFR 312.10 as "a lack of or inability to obtain information required by the standards and practices" of preparation of this document "despite good faith efforts by the environmental professional" or others to gather such information.

1.4 RELIANCE AND DECLARATION

LCS authorizes Petch Enterprises, LLC to use the above-referenced LCS report in order to determine his interest in the said subject property.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 CFR Part 312.10. [See Qualifications in Section 11.]

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Andrew J. Kucserik, CPG, PG Environmental Professional

2.0 PURPOSE

The primary purpose of this study was to document the inquiry of the environmental professional for all appropriate inquiries for the subject property. Specifically, this document is intended to provide the "all appropriate inquiries" for the purposes of CERCLA Section 101(35)(B). Such is applicable to persons seeking to qualify for (i) the innocent landowner defense pursuant to CERCLA Sections 101(35) and 107(b)(3); (ii) the bona fide prospective purchaser liability protection pursuant to CERCLA Sections 101(40) and 107(r); and, (iii) the contiguous property owner liability protection pursuant to CERCLA Section 107(q). This report was not intended as part of the site characterization and assessment with use of a grant awarded under CERCLA Section 104(k)(2)(B). More specifically, the scope is intended to identify conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the subject property.

3.0 SCOPE OF WORK

This Environmental Assessment report has been prepared in accordance with "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process," ASTM E 1527-05. This standard was devised to address the site assessment portion for *Innocent Landowners, Standards for Conducting All Appropriate Inquiries* (40 CFR Part 312). The scope of work is intended to identify conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the subject property, via the following task.

- A) Review of information provided by the person seeking liability protection relative to: environmental cleanup liens; specialized knowledge or experience regarding the subject property; relationship of the purchase price to the fair market value of the property, if the property were not contaminated; and, commonly known or reasonably available information about the subject property.
- B) Interviews with past and present owners, operators and occupants.
- C) Review of historical sources of information documenting the subject property's first use.
- D) Review of Federal, State, tribal and local government records, as defined in 40 CFR Part 312.26.
- E) A visual inspection of the subject property and adjoining properties (to the extent possible).
- F) Preparation of this written report on all appropriate inquiries.

4.0 SUBJECT PROPERTY/VICINITY DESCRIPTION

4.1 SITE RECONNAISSANCE

A visual site review of the subject property, a commercial building, was completed to document site conditions and to identify recognized environmental conditions. The site reconnaissance included a walkthrough of all units/spaces on-site, including interior and exterior areas with the exception of the roof of the subject structure. Limitations also included stored product and equipment and poor lighting within the subject structure.

The following summarizes LCS' observations.

Current Owner/Operator Interviews

The owner of the subject property had been identified as 3773 Lake Shore Road, Inc. The Key Site Manager of the subject property had been identified as Mr. Joseph Snyder of 3773 Lakeshore Road Inc., associated with the subject property for over 20 years.

Mr. Snyder provided access and background information about the subject property. Such information has been incorporated herein and is included in the LCS Owner/Operator Questionnaire.

LCS was also accompanied by Mr. Art Petch of Petch Enterprises, LLC (potential purchaser) at the time of the site inspection.

Overview

The subject structure is currently occupied by three tenants, including Team Freight (storage of inert flux materials in cardboard boxes), an unidentified tenant (storage of waste bubble gum products in cardboard barrels), and a private tenant (airplane reconstruction).

General Site Information	
Name of Site	Commercial building
Site Address	Plant #1/Area "C", 3773 Lake Shore Road (a.k.a. Hoover Road and Old Lake Shore Road)
Municipality, County, State	Town of Hamburg, Erie County, New York
Fronting Streets	Lake Shore (a.k.a. Hoover Road and Old Lake Shore Road)
Site Size (acres)	2.5
Site Elevation (feet above mean sea level)	600
Site Topography	Level at grade
Nearest Water Body (Name/Distance)	Lake Erie (0.2 miles west)
Exterior Conditions/Improvements	Asphalt pavement

Overview (continued):

Building Information			
No. Buildings	One		
Square Footage of Building(s)	Approximately 92,000		
No. Stories	One (high bay)		
Basement Present?	None		
Roof Type/Age	Peaked / age unknown		
Building Use(s)/Operations	Warehouse; private airplane renovation		
Heating System	Natural gas		
Building Construction Date	Originally 1941, additions in 1950s and 1960s		
Utilities Provided	Municipal sewer and water, public natural gas and electric		
Wastes Generated	General refuse		

Refer to Sections 10.2 SITE SURVEY/TAX MAP, 10.3 SITE CONDITION REPORT and 10.5 OWNER/ OPERATOR QUESTIONNAIRE.

Storage Tanks

During the LCS site inspection, there was no indication of any on-site USTs or ASTs for the containment of petroleum products (e.g., fill ports, vent pipes, accessways, etc.).

See Regulatory and Municipal information below for additional information on former tanks.

Hazardous or Regulated Materials

Hazardous and/or regulated materials were noted stored and utilized on the subject property at the time of the site inspection. These were as follows:

Material	Storage Location	Approximate Quantities On-
		Site
Compressed gas	Lift motors	Eight 50 lb. containers

There was no evidence of any releases (staining, odors, etc.) in the area of these materials at the time of the site inspection.

There were no visible signs of unidentified substance containers (unlabeled drums, etc.) noted at the time of the site inspection.

Solid, Hazardous or Regulated Waste

Operations on the subject property produce general wastes associated with commercial operations. Refuse is stored in a dumpster and transferred off-site by BFI.

Although no hazardous or regulated waste was noted during the LCS site inspection, a space heater within the private tenant space was noted to consist of two 55-gallon drums that may use waste oil as a fuel source.

There were no visible signs of unidentified substance containers (unlabeled drums, etc.) noted at the time of the site inspection.

Staining, Corrosion, Stressed Vegetation and/or Dead Vegetation

During the LCS site reconnaissance, there were no stained soils, stained pavement, stressed vegetation or corroded surfaces noted on-site. Limitations included stored product/equipment and poor lighting.

Fill Dirt or Land Disposal

During the LCS site reconnaissance, there was no evidence of placement of fill dirt or land disposal activities currently or previously conducted on-site.

Wastewaters

Municipal sanitary and storm sewers service the subject property. According to the site contact, the subject property has been supplied with municipal sanitary sewer since approximately the 1950s. Historic operations on the subject property may have produced wastewaters that required treatment or monitoring. Floor drains were noted throughout the subject structure; these drains were either sealed or plugged with sediment.

There was no evidence of a current or historic private septic system or cesspool on the subject property.

Storm drains are located on the exterior portion of the subject property; these reportedly discharge to Lake Erie.

There was no evidence of any pits, ponds or lagoons used in connection with waste treatment or waste disposal.

Potable Water Supply/Wells

The subject property is served by a municipal water supply system. There was no evidence of an active or abandoned supply well, drywell, monitoring well or irrigation well on-site.

Air Emissions

There was no process exhaust systems noted on-site at the time of the LCS site investigation, except an inactive welding hood noted in a tenant space at the southern portion of the subject building.

PCBs

The following suspect PCB-containing materials were noted on-site:

Suspect PCB Container	Location	Owner	Evidence of Leaks (Y/N)	Labeled (Y/N)
Transformer (pole-mounted)*	East side of property	Utility	No	Yes

^{*}Utility-owned transformers and any subsequent contamination that may result are the responsibility of the utility company.

Pad-mounted transformers located on-site (within the subject building) were noted to be the dry-type (non-PCB).

Suspect ACMs

A cursory visual assessment for ACMs was undertaken as a part of this environmental site assessment. At the time of the cursory inspection, there were suspect ACMs located within this facility. Asbestos may be present in the following partial list of suspect materials:

Materials*	Location	Condition	Approx. Quantity of Damaged Materials
Ceiling Tiles – 2'x2'	Office area	Good	None
Drywall and plaster	Throughout	Good	None
Floor tiles – 12"x12"	Office area	Good	None
Roofing felts and/or materials	Roof	N/A	N/A

^{*}It should be noted that a cursory visual assessment was conducted by LCS; the observations listed above are based on the limited areas observed during the LCS site reconnaissance, additional suspect materials may be present on-site.

Caution is recommended if renovation and/or remodeling of this facility are to take place. Prior to renovation, remodeling or demolition of this facility, a detailed asbestos inspection and sampling protocol is recommended. All federal, state and local government rules, laws and regulations must be followed.

Lead Based Paint

The Consumer Product Safety Commission banned the manufacture of lead-based paints for residential and commercial application in 1978; Federal regulations enforced this ban in 1993. Structures completed prior to 1978 may contain lead-based paints. The subject building was constructed in 1941, according to municipal records. The possibility exists for the presence of lead-based paints in the existing structure.

The painted surfaces observed by LCS were in good condition with no significant peeling or chipping paint. If the painted surface(s) peel, chip and/or is intended to be removed, safety precautions should be taken to prevent inhalation or digestion. This cursory lead-based paint review did not include identification of suspect lead-based paint dust associated with windows, doors, etc.

Lead in Drinking Water

According to public water analysis conducted by the Erie County Water Authority, the 90th percentile for lead for the year 2005 was 0.004 mg/L. According to the USEPA, the action level applicable to municipal potable water supplies and distribution systems is 0.015 mg/L.

It should be noted that at the time of the site inspection, lead pipes were not noted within the subject structure. Such are possible due to the age of the subject structure.

Mold

Mold can germinate and colonize when a food source (i.e., drywall, wood, insulation, paper), a certain temperature and moisture are present. The speed of the growth all depends on the combination of these conditions; roof leaks often lead to accelerated mold growth. The musty odor commonly present with mold is associated with the mVOCs produced by molds. Some, but not all, molds produce a Mycotoxin that is considered a poison and may have negative health effects on humans.

At the time of the site inspection, there were no suspect mold covered areas or mold-related odors noted within the subject structure. This does not preclude the presence of molds in hidden areas (behind walls, moldings, etc.) or the potential for future mold growth.

Other Issues

At the time of the site inspection, LCS noted inactive welding hoods in a portion of the subject structure.

In addition, LCS noted areas of cut out concrete (replaced with gravel); according to the site contact, these were former equipment locations.

Soil borings were noted on the southwestern portion of the subject property. According to the site contact, this was formerly a solvent dumping area used for a vehicle maintenance operation. A NYSDEC Order on Consent (No. 915049; draft copy attached) was provided to LCS. This area will be remediated by the owner (i.e., Snyder Tank) in accordance with regulatory guidelines once the Order on Consent has been finalized.

4.2 ADJACENT SITE USE

The adjacent properties were visually inspected from the subject property and adjacent right-of-ways. There were no signs of significant environmental concern noted on the adjacent properties that would represent a recognized environmental concern on the subject property, other than those identified below.

The surrounding property uses include the following:

Direction	Current Use	Apparent Past Use	Concerns
North:	Tadoro's Restaurant	Commercial	None
South:	Automotive repair	Gasoline station	Potential concern
East:	Fallow land	Fallow land	None
West:	Erie County Wastewater Treatment Plant	Same	None

4.3 SUBJECT SITE PHOTOGRAPHS

Photographs of the subject property were taken by LCS on May 20, 2008. Photographs were taken with the objective of documenting the physical condition of the subject property and any improvements thereon. Photographs are included on the following pages.

4.4 SUMMARY OF OBSERVATIONS OF POTENTIAL CONCERNS

Based solely on observations made during LCS' site reconnaissance, the following conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the subject property were identified:

- Hazardous and/or regulated materials, in the form of compressed gas cylinders (associated with lift motors), were noted stored and utilized on the subject property at the time of the site inspection
- Although no hazardous or regulated waste was noted during the LCS site inspection, a space heater
 within the private tenant space was noted to consist of two 55-gallon drums that may use waste oil as a
 fuel source.
- According to the site contact, the subject property has been supplied with municipal sanitary sewer since
 approximately the 1950s. Historic operations on the subject property may have produced wastewaters
 that required treatment or monitoring. Floor drains were noted throughout the subject structure; these
 drains were either sealed or plugged with sediment.
- At the time of the site inspection, LCS noted inactive welding hoods in a portion of the subject structure.
- Soil borings were noted on the southwestern portion of the subject property. According to the site
 contact, this was formerly a solvent dumping area used for a vehicle maintenance operation. A
 NYSDEC Order on Consent (No. 915049; draft copy attached) was provided to LCS. This area will be
 remediated by the owner (i.e., Snyder Tank) in accordance with regulatory guidelines once the Order on
 Consent has been finalized.
- An adjacent property was noted to be a former gasoline station and current automotive repair facility.

5.0 SUBJECT PROPERTY HISTORY AND USE

The historical use of the subject property has been researched through review of historic maps, historic aerial photographs, municipal records, city directories, historic topographic maps, and/or other reasonably obtainable documents. The following summarizes LCS' historical research.

5.1 HISTORIC AERIAL PHOTOGRAPHS

Historical aerial photographs serve to reveal former topography, buildings, structures and man-made works such as canals, lagoons and railroads that may have been altered or may no longer be in existence.

Historical aerial photographs were reviewed at the Erie County Soil and Water Conservation Service in East Aurora, New York on May 30, 2008. Changes in land use and general subject property characteristics were noted and are described below. Copies of the aerial photographs, if available, are included in Section 10.8 AERIAL PHOTOGRAPHS. LCS' observations of the subject property and surrounding properties are detailed below.

YEAR/SITE	OBSERVATIONS/PROPERTY USES
1938	
Subject Property	Fallow land
North	Fallow land
South	Fallow land
East	Fallow land
West	Fallow land
1958	
Subject Property	Developed with a portion of the existing structure
North	Suspect commercial
South	Fallow land, possibly small commercial buildings
East	Suspect agricultural and residential
West	Residential
1966	
Subject Property	Developed with the existing structure
North	Suspect commercial
South	Fallow land, possibly small commercial buildings
East	Suspect agricultural and residential
West	Residential
1978	
Subject Property	Developed with the existing structure
North	Suspect commercial
South	Parking lot, suspect industrial/commercial
East	Suspect agricultural and residential
West	Sports field, small structures, wooded
1990	
Subject Property	Developed with the existing structure
North	Wastewater treatment plant, commercial
South	Parking lot, suspect industrial/commercial
East	Commercial, residential
West	Sports field, small structures, wooded

None of the aerial photographs suggest environmental concerns, such as exterior storage areas, fill, disturbed areas, etc.

5.2 HISTORICAL MAPS/DIRECTORIES

Sanborn Maps

Historical Sanborn Maps were ordered by LCS through EDR for information regarding the subject property and surrounding area. However, EDR forwarded a letter to LCS indicating that there is no Sanborn coverage for the subject property. This letter is included in the appendix of this report.

City Directories/Atlases

Historic Polk Directories, available through the Buffalo & Erie County Public Library, were reviewed for additional information regarding the subject property. Past occupants of the subject property and those of adjacent/nearby properties have been identified through the Polk Directories as listed below.

YEAR	OCCUPANTS/PROPERTY USES
1969, 1974, 1979	
Subject Property	No listing
Adjacent/Nearby	No listing
Properties (address)	
1984	
Subject Property	Snyder Tank Corp.
Adjacent/Nearby	Southtowns Sewage Treatment (3690 Lake Shore), Hi-Tech Imports foreign car
Properties (address)	repair (3790 Lake Shore)
1989	
Subject Property	Snyder Tank Corp.
Adjacent/Nearby	Southtowns Sewage Treatment (3690 Lake Shore), restaurant (3751 Lake Shore),
Properties (address)	South Caroline Wholesale Used Cars (3790 Lake Shore)
1994	
Subject Property	B & D Transfer (trucking), Snyder Tank Corp. (pump manufacturing and distribution)
Adjacent/Nearby	Southtowns Sewage Treatment (3690 Lake Shore), restaurant (3751 Lake Shore)
Properties (address)	

LCS also reviewed a City Directory Abstract provided by EDR, which researches former on-site occupants through available street directories. Based on EDR's research, the following occupants were listed:

- 1976: no listing
- 1981, 1986: Snyder Tank Corp.
- 1991, 1995, 2000: B & D Transfer, Snyder Tank Corp.
- 2007: Borgwarner Automotive

Historic Topographic Maps

The subject property is included on the Buffalo Southeast Quadrangle Topographic Map dated 1965. According to this map, the subject property was developed with the subject structure at that time.

Historic topographic maps, available through http://historical.maptech.com, were reviewed for additional information regarding the subject property. The subject property is included on the Buffalo Southeast Quadrangle Topographic Map dated 1901 (surveyed 1893 and 1901) and 1948 (surveyed 1942, aerials 1944 and 1948). These maps indicate that the subject property was undeveloped in 1901 and developed with the original portion of the existing structure by 1965.

Other Sources

Other historical sources were not readily ascertainable from local sources.

5.3 MUNICIPAL RECORDS

Municipal research available through local municipalities was completed by LCS and is summarized below.

Subject Property Information	
Sources	Town of Hamburg municipal office, real-info.com, propertyshark.com
SBL No.	159.11-1-8.1
Size (acres)	10.3 (greater parcel); subject property approximately 2.5 acres
Current Owner	3773 Lake Shore Road Inc.
Past Owners	Kuhlman Corp., Helen Dubey, Snyder Manufacturing, Snyder Tank
Square Footage of Buildings	Several listed; not clear which are on the subject property portion of the
	greater parcel
Date of Construction	1941
Utilities Provided	Municipal sewer and water, public natural gas and electric

Permits for the subject property include the following:

Permit Date	Nature of Permit
1943, 1944	Snyder Manufacturing storage, loading
1946	Snyder Manufacturing; add welding plant
1952	Three 4,000-gallon USTs
1959	Snyder Tank – office, addition
1960	Snyder Tank – maintenance building
1961	Snyder Tank –addition
1964	Snyder Tank – office
1965	Snyder Tank – warehouse
1972	Gasoline tank at Snyder Tank
1974	Three gasoline tanks at Snyder Tank
2001	Occupant: Fuel Systems Inc.

5.3 MUNICIPAL RECORDS (continued):

A code violation dated 2007 listed warehousing of Class 6 hazardous materials as an un-permitted use; this violation was apparently resolved. It is not known which USTs were installed on the subject or greater properties; however, previous investigations (refer to Section 5.4) did not encounter USTs on the subject property (i.e., Plant #1/Area "C")

The Abstract-of-Title Search for the subject property was not available for review.

5.4 PREVIOUS STUDIES

LCS reviewed "Phase I Environmental Site Assessment, Former Snyder Tank Corporation, 3773 and 3774 Lake Shore Road, Buffalo, New York" prepared by Great Lakes Environmental & Safety Consultants, Inc. (GLE) for Harter Secrest & Emery, LLP, dated August 9, 2005. GLE concluded that, the subject property (Plant #1) and the greater property (Plant #2) were investigated for potential environmental concerns. GLE identified the following areas of concern for the subject property (Plant #1 referenced in this report only): an unfilled floor drain in the building near the overhead door; a former paint booth area; a dry well on the west side of the building; and an oil-stained area. GLE recommended soils borings and sampling to address the areas of concern, and cleaning of the oil-stained area.

LCS reviewed "Geophysical Survey Results – Snyder Tank Site, Buffalo, New York," prepared by GeoMatrix for Panamerican Environmental, Inc., dated November 16, 2005. Based on that study the subject property was not included in the survey.

LCS reviewed "Phase II Investigation, 3773 Lake Shore Road, Blasdell, New York," prepared by Benchmark Environmental Engineering and Science, PLLC (BEES) prepared for Harter Secrest & Emery, LLP, dated May 2, 2006. BEES concluded that, a "cut out area" at Plant #1 (subject property) was investigated for the presence of USTs. No USTS or visual evidence of impact was noted in this area; however, an analyzed soil sample indicated VOCs at concentrations below regulatory levels. BEES investigated an oil-stained area (previously identified by GLE – see above). No VOCs, PCBs, or metals were detected above regulatory levels via a wipe sample collected from the stained area. BEES investigated the former Paint Booth area (previously identified by GLE – see above) via the collection and analysis of a sediment sample from the associated floor drain. The results of this analysis indicated that no VOCS were detected; however, several metal compounds exceeded regulatory levels. BEES recommended that the floor drains in the paint booth area be cleaned-out.

LCS reviewed "Phase II Environmental Site Assessment, Industrial Property, 3774 Lake Shore Road, Hamburg, New York," prepared by Hazard Evaluations, Inc. (HEI) for Neville Lumber Company, Inc., dated November 21, 2006. HEI stated that, a subsurface investigation consisting of test pits and soil borings and groundwater sampling was completed on the subject property and the greater parcel (i.e., Plant #2). Based on the results of that investigation, HEI indicated that no volatile organic compounds (VOCs) or semi-volatile organic compounds (SVOCs) were detected in groundwater samples collected from the subject property (i.e., wells #SB-14 and #SB-17 from the building interior). Metal compounds were detected but below regulatory levels in these two wells. VOCS were detected in soil at soil boring #SB-18 associated with solvents (Trichloroethane and Toluene). HEI tested some or the entire floor drains in Plant #1 (subject property) and determined that the discharge point is across the street at Plant #2 and not on the subject property. Test pit excavations along the south side of the Plant #1 building, south of the subject property line, encountered fill materials and an oily odor. Analysis of these fills indicated slightly elevated levels of Cadmium above typical background concentrations. HEI recommended a limited remedial measure in the area of the solvent impact.

5.4 PREVIOUS STUDIES (continued):

LCS reviewed "Area C – Phase II Investigation, 3773 Lake Shore Road, Blasdell, New York," prepared by Benchmark Environmental Engineering and Science, PLLC (BEES) for Mr. Jaspal Walia, NYSDEC, dated March 26, 2008. BEES concluded that, an additional investigation of a previously identified area of concern (i.e., soil boring #SB-18), delineated the remedial area subject to the NYSDEC Order on Consent. Groundwater impact was not detected down-gradient of the proposed remedial area. In addition, no evidence of USTs was noted in the proposed remedial area. BEES suggested that no further action was required. [It is LCS' understanding that the proposed remedial area will be cleaned-up by the owner, Snyder Tank, in accordance with the finalized NYSADEC Order on Consent.]

LCS reviewed "Plant #1 Paint Booth Area, Subslab Investigation Report, 3773 Lake Shore Road, Blasdell, New York," prepared by Benchmark Environmental Engineering and Science, PLLC (BEES) prepared for Petch Enterprises, LLC, dated August 14, 2008. BEES stated that a subsurface investigation conducted in the area of the former Paint Booth was completed to investigation potential subsurface soil impact. [The results of the investigation were presented to LCS prior to completion of the BEES report.] Based on the detection of competent concrete in the area of the Paint Booth and associated floor drain, and the lack of visual/olfactory evidence of impact, no further investigation was warranted. [LCS concurred with the results of the investigation.]

5.5 SUMMARY OF HISTORIC USES

The historical use of the subject property has been researched through review of historic maps, historic aerial photographs, municipal records, city directories and/or other reasonably obtainable documents, as detailed below.

Date Range	Apparent Use	Source
1901, 1938	Undeveloped	Aerial photographs, historical
		topographic map
1941-present	Developed with the existing structure; historically used as a fuel tank manufacturer, truck brake parts manufacturing, trucking, welding, vehicle maintenance; currently used as warehouse and private airplane restoration.	Aerial photographs, city directories, historic topographic maps, municipal information, site inspection, site contact interview

The following conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the subject property were identified based on LCS' historical research:

- The subject property has historically been used as a manufacturer of fuel storage tanks, truck brake parts, and included welding and vehicle maintenance areas.
- Municipal records indicate that gasoline tanks were installed in 1952, 1972, and 1974. As the subject property is a portion of a greater parcel, the location of these tanks is not clear.
- Municipal records include a violation for storage of hazardous materials; this violation was apparently resolved in 2007.

5.5 SUMMARY OF HISTORIC USES (continued):

Previous investigations: GLE identified a former paint booth area; a dry well on the west side of the building; and an oil-stained area, and recommended further investigation and cleaning of the oilstained area. BEES investigated a "cut out area" at Plant #1 for the presence of USTs. No USTS or visual evidence of impact was noted in this area; however, an analyzed soil sample indicated VOCs at concentrations below regulatory levels. BEES investigated an oil-stained area (previously identified by GLE - see above). No VOCs, PCBs, or metals were detected above regulatory levels via a wipe sample collected from the stained area. BEES investigated the former Paint Booth area (previously identified by GLE - see above) via the collection and analysis of a sediment sample from the associated floor drain. The results of this analysis indicated that no VOCS were detected; however, several metal compounds exceeded regulatory levels. BEES recommended that the floor drains in the paint booth area be cleaned-out. HEI completed a subsurface investigation consisting of test pits and soil borings and groundwater sampling. Based on the results of that investigation, HEI indicated that no volatile organic compounds (VOCs) or semi-volatile organic compounds (SVOCs) were detected in groundwater samples collected from the subject property (i.e., wells #SB-14 and #SB-17 from the building interior). Metal compounds were detected but below regulatory levels in these two wells. VOCS were detected in soil at soil boring #SB-18 associated with solvents (Trichloroethane and Toluene). HEI tested some or the entire floor drains in Plant #1 (subject property) and determined that the discharge point is across the street at Plant #2 and not on the subject property. Test pit excavations along the south side of the Plant #1 building, south of the subject property line, encountered fill materials and an oily odor. Analysis of these fills indicated slightly elevated levels of Cadmium above typical background concentrations. HEI recommended a limited remedial measure in the area of the solvent impact. [Such metal compounds are likely associated with the fill materials and are located adjacent to the subject property.] BEES concluded a second investigation of a previously identified area of concern (i.e., soil boring #SB-18), delineated the remedial area subject to the NYSDEC Order on Consent. Groundwater impact was not detected down-gradient of the proposed remedial area. In addition, no evidence of USTs was noted in the proposed remedial area. BEES suggested that no further action was required. [It is LCS' understanding that the proposed remedial area will be cleaned-up by the owner, Snyder Tank, in accordance with the finalized NYSADEC Order on Consent.] And, BEES completed a subsurface investigation in the area of the former Paint Booth. Based on the detection of competent concrete in the area of the Paint Booth and associated floor drain, and the lack of visual/olfactory evidence of impact, no further investigation was warranted.

6.0 PHYSICAL AND HYDROGEOLOGIC SETTING

The subject property is included on the Buffalo Southeast Quadrangle Topographic Map dated 1965. Regional groundwater would appear to flow in a northwesterly direction based on a review of geological/soils and USGS quadrangle maps.

6.1 GEOLOGY

Bedrock mapping indicates the underlying bedrock to be of the Ludlow Formation of the Hamilton Group. Ludlow Formation members include Deep Run Shale, Tichenor Limestone, Wanakah and Ledyard Shales and Centerfield Limestone. The thickness of bedrock ranges from 60 to 150 meters.

Mapping indicates the surficial geology of the area to consist primarily of lacustrine silt and clay. Lacustrine silt and clay was deposited in pro-glacial lakes and is generally laminated and calcareous. It has the potential for land instability. The thickness varies up to 100 meters. Lacustrine silt and clay typically is not conducive to contamination migration.

6.2 HYDROLOGY

The subject property is situated regionally in the Lake Erie-Niagara River Major Drainage Basin and locally within the Eastern Lake Erie Sub-Basin.

The subject property does not appear to have any open water bodies or surficial water bodies located on-site. Surface drainage appears to flow in a direction toward the lowest elevated points on-site and/or toward the closest storm drains on-site. Localized groundwater flow would be influenced by utilities, subsurface structures, etc. A site-specific hydrogeologic study is warranted to confirm specific on-site groundwater flow direction.

7.0 REGULATORY INFORMATION

Regulatory information involving the subject property was obtained through a commercial database search company, interviews with local municipalities and/or other knowledgeable persons, FOIA requests, and user-supplied information. The following summarizes LCS' regulatory research.

The following environmental records sources were reviewed:

Source	Date Contacted	Comment
EDR	Dates for the databases are provided	See 7.1 below
	within the EDR report.	
NYSDEC FOIA	June 12, 2008	See 7.3 below

7.1 DATABASE

Federal and state environmental regulatory information was provided by EDR. The following databases were reviewed at the following radii as defined in 40 CFR Part 312.26.

		Search

NOTES:	NOTES:							
TP = Target Property								
NR = Not Requested at this Search Distance								
Sites may be listed in more than one database								

Any sites unplottable by EDR were also reviewed, to the extent practical based on site name and address, to assess whether they are also present within their appropriate radii. Any listings for the subject property or any adjacent sites are included in the details below.

No sites were identified within the appropriate radii, except for the following:

SUBJECT PROPERTY:

According to the EDR report, the greater parcel was identified as follows:

- NY Spill: Spill No. 0709817 involved leaking powder material (sodium hydaflouride aluminate); the
 material was cleaned and removed from the property and this spill is classified as "inactive." [A status
 of "inactive" indicates the contamination may remain at the subject property but no further remediation is
 required.]
- CERCLIS NFRAP: The property is described as a 6 acre former manufacturer of steel and aluminum automobile fuel tanks known to have discharged acid picking wastes onto the beach of Lake Erie. A leaking tank was also noted. This facility was archived in 2002 and is classified as "no further remedial action planned."
- RCRA: Pickle liquor and other wastes were generated between 1980 and 2001. The site is currently
 listed as a conditionally exempt small quantity generator of hazardous wastes. The violations listed for
 this facility have reached compliance.
- FINDS: This site is included in the FINDS database due to listings as a CERCLIS-NFRAP, RCRA and TRIS facility. Information (attached) obtained through the USEPA website states that this facility generated toluene and xylene air emissions in 1990 through 1992. This facility was also included in the AIR Program and was on the Criteria and Hazardous Air Pollutant Inventory.

7.1 DATABASE (continued):

ADJACENT SITES:

The following adjacent property was also identified in the EDR report:

Sewage Treatment Plant at 3680 and 3690 Lake Shore Road. This facility has 20 spills listed, all of which are classified as either "inactive" or "closed." In addition, this adjacent facility is listed as a UST, historic UST, and CBS facility. This facility is located hydraulically down-gradient of the subject property.

OTHER LISTINGS:

The following sites were also identified in the EDR report:

According to the EDR report, there is one RCRA CORRACTS listed facility located within a one-mile radius of the subject property. This site is located over on-half mile from the subject property. This information is not considered a recognized environmental condition at the subject property based on the listed site due to the distance to the subject property.

In addition to the subject property and adjacent site described above, there is one NYSDEC listed spill site attributed to an LTANK and seven additional spill sites located within a one-half mile radius of the subject property. [It should be noted that EDR also includes some of these spills in historic LTANK and historic NY Spills databases.] These spill sites are classified as either "inactive" or "closed." [A status of "closed" indicates the spill was remediated and the NYSDEC file closed with no further remediation required. A status of "inactive" indicates the contamination may remain at the subject property but no further remediation is required. A status of "active" indicates further remediation or investigation is necessary.] This information is not a recognized environmental condition at the subject property based on the listed spill sites due to the status of the listed spills and the distance to the subject property.

The discussion included above regarding adjacent and/or nearby properties is based on information supplied to LCS as well as LCS' observations of nearby properties at the time of the site reconnaissance. It should be noted that any property can be affected by various sources of point and non-point source pollution. The number of reported spills and complaints in the vicinity of the subject property may be an indicator of point source pollution in the area of the subject property. Non-point sources are common in rural areas (e.g., runoff from agricultural fields). Further study would be required to positively confirm whether the subject property has been impacted by nearby properties. Refer to Section 10.6 REGULATORY INFORMATION.

7.2 ENFORCEMENT ACTIONS/PERMITTED ACTIVITIES/INSTITUTIONAL CONTROLS

According to obtainable information to date, there have been enforcement actions, orders or institutional controls imposed against the referenced subject property. Refer to Sections 4.1 Other Issues, Section 5.4 Previous Studies and Section 7.1 Subject Property.

According to obtainable information to date, the subject property appears to be subject to environmental permit activities associated with the RCRA and TRIS listings.

7.3 INTERVIEWS/USER PROVIDED INFORMATION

Local Regulators

LCS was not granted an interview with the Town of Hamburg Building Inspector. A review of Building Department files was conducted and a summary is included in Section 5.3.

State Regulators

To augment the information provided by EDR, a FOIA request was forwarded to the appropriate regulatory agencies for information concerning the subject property. A response (attached) indicates that Environmental Remediation, Air and Water files were available for the subject property. Based on a review of those files, the draft Order on Consent indicates that the subject and greater properties will require remediation. As of this report, it is not known whether the Order on Consent has been finalized by the NYSDEC.

Person Seeking Liability Protection

As required under 40 CFR Part 312, those seeking liability protection under CERCLA, for which this report is prepared, must provide the environmental professional certain information and documentation (See Appendix 10.13). LCS has requested that information from the appropriate party and the response to that inquiry is as follows (See Appendix 10.11).

Environmental Liens

According to Mr. Art Petch of Petch Enterprises, LLC, there are no environmental cleanup liens against the subject property that are filed or recorded under federal, tribal, state or local law.

Specialized knowledge or experience

According to Mr. Petch, he has no specialized knowledge or experience regarding the subject property, the area surrounding the subject property, the conditions of adjoining properties or other experience relative to this inquiry indicative of releases or threatened releases at the subject property.

Person Seeking Liability Protection

Purchase Price

According to Mr. Petch, he has concluded that the purchase price of the subject property reflects the fair market value of that property, if the property were not contaminated.

Commonly Known or Reasonably Ascertainable Information

Mr. Petch has provided the following commonly known or reasonably ascertainable information regarding the subject property which may be indicative of releases or threatened releases at the subject property.

- The past history of the facility as a manufacturer of fuel tanks and brake parts.
- Previous studies have identified an area of impact requiring remediation by the owner.

Current Owner/Operators

LCS also requested information from the current property owner and site contact relative to pending, threatened or past litigation, administrative proceedings or any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products. According to Mr. Joseph Snyder, there are pending administrative proceedings (associated with a solvent release) and the property owner is negotiating a consent order with the NYSDEC.

Former Owner/Operators

As required by 40 CFR Part 312.23, LCS has attempted to contact and interview the former owners and/or operators of the subject property to discuss historic use and storage of hazardous substances. LCS identified Mr. Joseph Snyder as one of the former site owners and/or operators and, on May 20,, 2008, interviewed this person in person. The following is a list of relevant information from that interview.

Previous subsurface investigations have identified are area requiring remediation in accordance with a
draft Order on Consent, where solvent impact has been identified. [On the date of the interview, the
Order was not finalized by the owner (Snyder Tank) and the NYSDEC.]

7.4 SUMMARY OF REGULATORY AND USER PROVIDED INFORMATION

The following conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the subject property were identified based on LCS' review of regulatory information.

- According to the EDR report, the greater parcel was identified as a NY Spill site. Spill No. 0709817 involved leaking powder material (sodium hydaflouride aluminate); the material was cleaned and removed from the property and this spill is classified as "inactive." [A status of "inactive" indicates the contamination may remain at the subject property but no further remediation is required.]
- The greater property is listed as a CERCLIS NFRAP site, described as a 6 acre former manufacturer of steel and aluminum automobile fuel tanks known to have discharged acid picking wastes onto the beach of Lake Erie. A leaking tank was also noted. This facility was archived in 2002 and is classified as "no further remedial action planned."
- The greater property is a RCR site; pickle liquor and other wastes were generated between 1980 and 2001. The site is currently listed as a conditionally exempt small quantity generator of hazardous wastes. The violations listed for this facility have reached compliance.
- This greater property is included in the FINDS database due to listings as a CERCLIS-NFRAP, RCRA and TRIS facility. Information (attached) obtained through the USEPA website states that this facility generated toluene and xylene air emissions in 1990 through 1992. This facility was also included in the AIR Program and was on the Criteria and Hazardous Air Pollutant Inventory.
- According to the EDR report, an adjacent property (Sewage Treatment Plant at 3680 and 3690 Lake Shore Road) has 20 spills listed, all of which are classified as either "inactive" or "closed." In addition, this adjacent facility is listed as a UST, historic UST, and CBS facility. This facility is located hydraulically down-gradient of the subject property.
- Based on a review of those files, the draft Order on Consent indicates that the subject and greater properties will require remediation. As of this report, it is not known whether the Order on Consent has been finalized by the NYSDEC.
- According to the property owner, Mr. Joseph Snyder, there are pending administrative proceedings (associated with a solvent release) and the property owner is negotiating a consent order with the NYSDEC.

8.0 RADON

Radon is a radioactive gas that occurs naturally from the breakdown of uranium in rock. Radon can be found in high concentrations in soils and rock containing uranium, shale, granite, phosphate and pitchblende. Radon may also be found in soils contaminated with certain types of industrial wastes such as the byproducts from uranium or phosphate mining. Radon gas can move through small fractures in soil and rock and can seep into a structure through dirt floors, cracks in the floors and walls, drains, sumps pipes and pores. Radon has been associated with increased risks of developing lung cancer.

The subject structure is a slab-on-grade construction. The USEPA reports that the average indoor radon concentration is estimated to be about 1.3 pCi/L and about 0.4 pCi/L of radon is normally found in the outside air. The NYSDOH Radon Detector Distribution Program report for February 2007 suggests an average basement radon reading of 5.01 pCi/L for Hamburg. The NYSDOH recommends taking measures to reduce basement radon concentration to below 4.0 pCi/L. Although the average radon concentration for the Town of Hamburg is slightly elevated, radon is not anticipated to pose a concern due to the nature of the on-site operations and the lack of potential radon-accumulation spaces (i.e., basements).

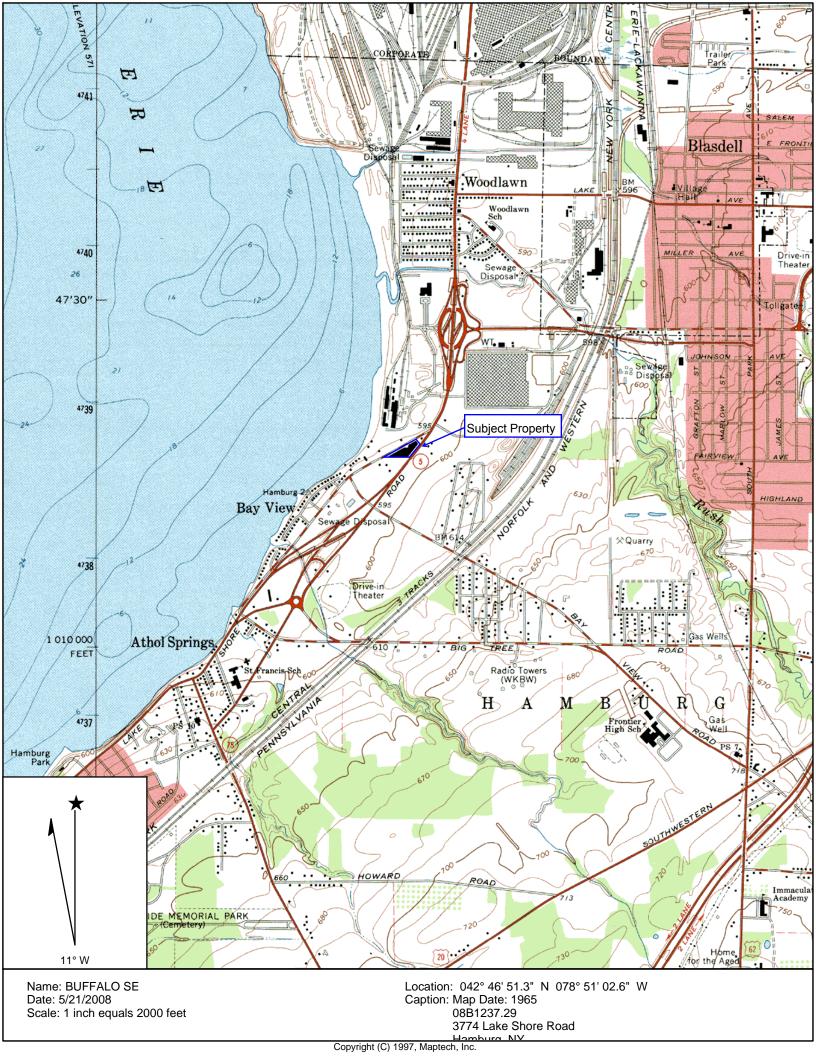

9.0 WETLANDS

The subject property is not delineated as a wetland on the NEW YORK STATE *FWM*, *map 12 of 31*; or on the USFWS, *NWI*, Buffalo Southeast Quadrangle. The approximate distances to the nearest wetlands as delineated on the *FWM* and the *NWI* are one miles northeast (BU-4) and 0.4 miles north (PFOIE), respectively.

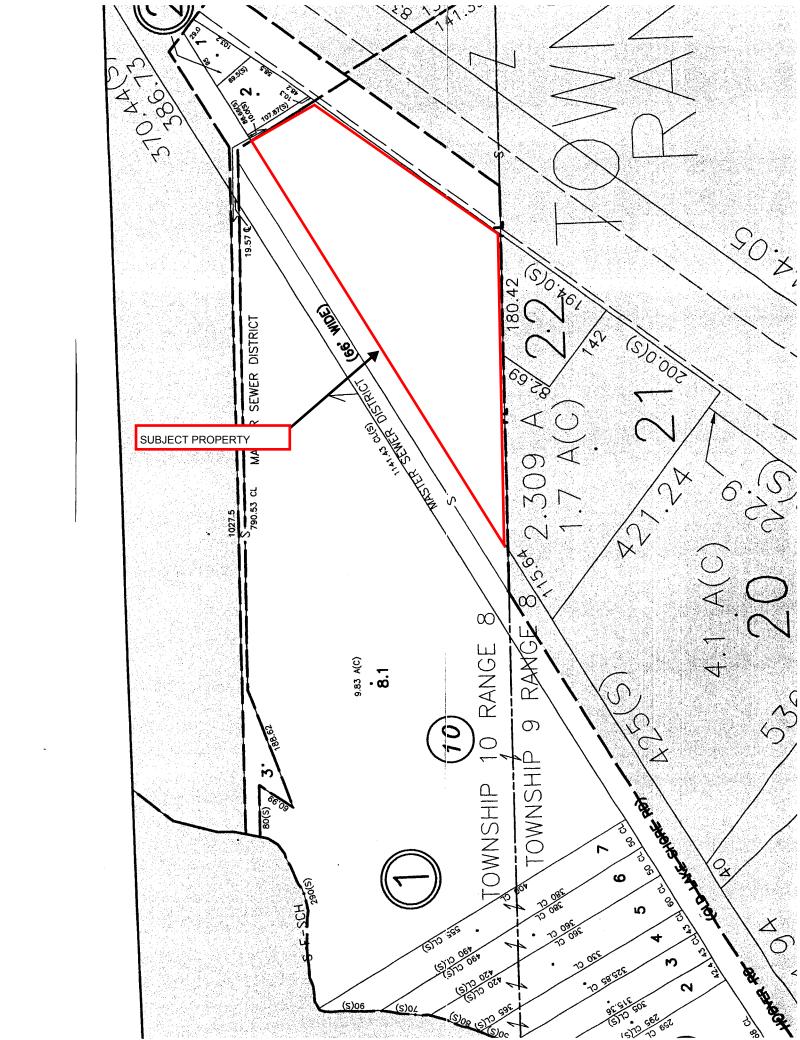

Not all wetlands are mapped; rather, they are identified using soil types, vegetation and hydrology. Mapped soil units, Urban land and Brockport silty clay loam, reportedly present at the subject property, are not included on the list "New York Hydric Soils and Soils with Potential Hydric Inclusions" as hydric soils or as soils with the potential for having hydric inclusions. Therefore, there is little to no potential for the presence of wetlands on the subject property. Refer to the Erie County Soil Survey for the soil descriptions.

RE: Records Review Request for File 08B1237.29 PLEASE REFERENCE THIS # WHEN RESPONDING

Dear Ms. Elaine Butler:

Our firm is performing an Environmental Assessment of a real property located within the jurisdiction of NYS region 9. Under the Freedom of Information Law (FOIL), I am writing to request that a review be made of NYSDEC region 9 department records, which are relevant to the purpose of this Environmental Assessment. Please forward this FOIL request to the following NYSDEC departments for review of department records, if available with regards to the subject site or facility (referenced below).

1) Law Enforcement/Legal Affairs/Env. Enforcement - complaint/notice of violation files, legal proceedings. 2) Solid and Hazardous Waste - site files for active and inactive sites associated with the subject address. NEW YORK CITY NEW YORK

3) NYSDEC Site Inspection Reports associated with the subject address.

4) Spills Division - record of petroleum/chemical releases.

June 17, 2008

Ms. Stephanie LaPlaca LCS Inc. P.O. Box 406 Buffalo, NY 14205

Dear Ms. LaPlaca:

This letter acknowledges receipt of your request(s) dated 6/16/2008 for access to records relative to:

3773 Lake Shore Road, Inc.; 3774 Lake Shore Road, Hamburg (08B1237.29)

Your request(s) has been forwarded to the appropriate individual program(s) within DEC.

If your request is related to spill information, you can access information immediately through DEC's online "Spills Incidents' Database" at www.dec.ny.gov/chemical/8437.html. If you locate a spill number from the database, please reference the spill number when requesting information.

If your request is related to bulk storage tank information, you can access information immediately through DEC's online search engine for bulk storage programs (petroleum and chemical) at www.dec.ny.gov/cfmx/extapps/derfoil/. If you locate a petroleum or bulk storage registration number from the database, please reference the number when requesting information.

Following the necessary file search, you will be contacted as to whether such records are in our custody. If all records are not provided because the records are excepted from disclosure, you will be notified of the reasons and of your right to appeal the determination.

Due to the large volume of requests we receive, you may expect a reply by 7/15/2008.

Sincerely,

Laurie A. Knight Principal Clerk

Ms. Stephanie LaPlaca LCS Inc. P.O. Box 406 Buffalo, NY 14205

Dear Ms. LaPlaca:

3773 Lake Shore Road, Inc.; 3774 Lake Shore Road, Hamburg (08B1237.29);

Your request(s) of 6/16/2008 has been reviewed for the above referenced records under the New York State's Freedom of Information Law (FOIL). Please note that most of our records are filed by names of individuals or corporations. We have no way of locating or retrieving records if they are filed under names or addresses other than those you have provided. If no records have been located, this does not necessarily mean, and should not be interpreted to mean that there have never been any violations, complaints, claims, investigations, or inquiries involving those names or addresses. We cannot make any representations as to whether there are or have been any such violations, complaints, claims, investigations, or inquiries.

Responsive records will be available for your inspection/photocopying until July 31, 2008 after which time the documents will be returned to the files and the request will be considered closed. Please note: Unless you gave us a spill number, we did not do a search of the spill files.

The arrow(s) below indicate the response(s) for your particular request.

There is no charge to review records or for copies of seven or fewer pages. By law, copy charges will not exceed 25 cents per page or the actual cost of copying. Photographs, maps, oversized documents, videotapes, or audio tapes generally cost more than 25 cents per page to copy. You may be required to pay a deposit prior to copies being made and/or to pay all copy charges prior to copies being sent. Depending on the volume of copies requested, you may have to use an outside copy service to make the copies.

NEW YORK STATE DEPARTMENT OF ENVIRONMENTAL CONSERVATION

In the Matter of the
Development and Implementation
of a Remedial Program for an
Inactive Hazardous Waste Disposal
Site under Article 27, Title 13
of the Environmental Conservation Law
by 3773 Lake Shore Road, Inc.

ORDER ON CONSENT and ADMINISTRATIVE SETTLEMENT

Index #

Site #915049

Respondent.

WHEREAS,

- 1. A. The New York State Department of Environmental Conservation ("Department") is responsible for inactive hazardous waste disposal site remedial programs pursuant to Article 27, Title 13 of the Environmental Conservation Law ("ECL") and Part 375 of Title 6 of the Official Compilation of Codes, Rules and Regulations ("6 NYCRR") and may issue orders consistent with the authority granted to the Commissioner by such statute.
- B. The Department is responsible for carrying out the policy of the State of New York to conserve, improve and protect its natural resources and environment and control water, land, and air pollution consistent with the authority granted to the Department and the Commissioner by Article 1, Title 3 of the ECL.
- C. This Order is issued pursuant to the Department's authority under, *inter alia*, ECL Article 27, Title 13 and ECL 3-0301, and resolves Respondent's liability to the State as provided at 6 NYCRR 375-1.5(b)(5).
- 2. 3773 Lake Shore Road, Inc. ("Respondent") is a New York domestic business corporation which owns the Site. The Site is located at 3773-3774 Lake Shore Road in the Town of Hamburg, County of Erie (hereinafter the "Site"). Exhibit "A" is a map of the Site showing its general location.
- 3. The Site is not currently listed in the Registry of Inactive Hazardous Waste Disposal Sites in New York State.
- 4. Respondent consents to the issuance of this Order without (i) an admission or finding of liability, fault, wrongdoing, or violation of any law, regulation, permit, order, requirement, or standard of care of any kind whatsoever; (ii) an acknowledgment that there has been a release or threatened release of hazardous waste at or from the Site; and/or (iii) an acknowledgment that a

release or threatened release of hazardous waste at or from the Site constitutes a significant threat to the public health or environment.

5. Solely with regard to the matters set forth below, Respondent hereby waives any right to a hearing as may be provided by law, consents to the issuance and entry of this Order, and agrees to be bound by its terms. Respondent consents to and agrees not to contest the authority or jurisdiction of the Department to issue or enforce this Order, and agrees not to contest the validity of this Order or its terms or the validity of data submitted to the Department by Respondent pursuant to this Order.

NOW, having considered this matter and being duly advised, IT IS ORDERED THAT:

I. Initial Submittal

Within thirty (30) Days after the effective date of this Order, Respondent shall submit to the Department a Records Search Report prepared in accordance with Exhibit "B" attached hereto. The Records Search Report can be limited if the Department notifies Respondent that prior submissions satisfy specific items required for the Records Search Report.

II. Development, Performance, and Reporting of Work Plans

A. Work Plans

All activities at the Site that comprise any element of an Inactive Hazardous Waste Disposal Site Remedial Program shall be conducted pursuant to one or more Department-approved work plans ("Work Plan" or "Work Plans") and this Order and all activities shall be consistent with the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), 40 C.F.R. Part 300, as required under CERCLA, 42 U.S.C. § 9600 et seq. The Work Plan(s) under this Order shall address both on-Site and off-Site conditions and shall be developed and implemented in accordance with 6 NYCRR § 375-1.6(a). All Department-approved Work Plans shall be incorporated into and become enforceable parts of this Order. Upon approval of a Work Plan by the Department, Respondent shall implement such Work Plan in accordance with the schedule contained therein. Nothing in this Subparagraph shall mandate that any particular Work Plan be submitted.

Each Work Plan submitted shall use one of the following captions on the cover page:

- 1. Site Characterization ("SC") Work Plan: a Work Plan whose objective is to identify the presence of any hazardous waste disposal at the Site;
- 2. Remedial Investigation/Feasibility Study ("RI/FS") Work Plan: a Work Plan whose objective is to perform a Remedial Investigation and a Feasibility Study;
- 3. Interim Remedial Measure ("IRM") Work Plan: a Work Plan whose objective is to provide for an Interim Remedial Measure;

- 4. Remedial Design/Remedial Action ("RD/RA")Work Plan: a Work Plan whose objective is to provide for the development and implementation of final plans and specifications for implementing the remedial alternative set forth in the ROD; or
- 5. Site Management Plan: a Work Plan whose objective is to identify and implement the institutional and engineering controls required for the Site, as well as any necessary monitoring and/or operation and maintenance of the remedy.

B. Submission/Implementation of Work Plans

- 1. (a) The RI/FS Work Plan shall be submitted to the Department within sixty (60) Days after the effective date of this Order.
- (b) The Department may request that Respondent submit additional or supplemental Work Plans for the Site. Within thirty (30) Days after the Department's written request, Respondent shall advise the Department in writing whether it will submit and implement the requested additional or supplemental Work Plan or whether it elects to terminate this Order pursuant to Paragraph XIII. If Respondent elects to submit and implement such Work Plan, Respondent shall submit the requested Work Plan within sixty (60) Days after such election. If Respondent elects to terminate this Order or fails to make a timely election, this Order shall terminate pursuant to Paragraph XIII.
- (c) Respondent may opt to propose one or more additional or supplemental Work Plans (including one or more IRM Work Plans) at any time, which the Department shall review for appropriateness and technical sufficiency.
- (d) Any request made by the Department under Subparagraph II.B.1.(b) shall be subject to dispute resolution pursuant to Paragraph XII.
- 2. A Professional Engineer must stamp and sign all Work Plans other than SC or RI/FS Work Plans.
- 3. During all field activities conducted under this Order, Respondent shall have on-Site a representative who is qualified to supervise the activities undertaken. Such representative may be an employee or a consultant retained by Respondent to perform such supervision.

C. Modifications to Work Plans

The Department shall notify Respondent in writing if the Department determines that any element of a Department-approved Work Plan needs to be modified in order to achieve the objectives of the Work Plan as set forth in Subparagraph II.A or to ensure that the Remedial Program otherwise protects human health and the environment. Upon receipt of such notification, Respondent shall, subject to Respondent's right to terminate pursuant to Paragraph XIII, provide written notification

as provided at 6 NYCRR 375-1.6(d)(3) as to whether it will modify the Work Plan, or invoke dispute resolution

D. Submission of Final Reports and Annual Reports

- 1. In accordance with the schedule contained in a Work Plan, Respondent shall submit a final report as provided at 6 NYCRR 375-1.6(b) and a final engineering report as provided at 6 NYCRR 375-1.6(c).
- 2. Any final report or final engineering report that includes construction activities shall include "as built" drawings showing any changes made to the remedial design or the IRM.
- 3. In the event that the final engineering report for the Site requires Site management, Respondent shall submit an annual report by the 1st Day of the month following the anniversary of the start of the Site management. Such annual report shall be signed by a Professional Engineer or by such other qualified environmental professional as the Department may find acceptable and shall contain a certification as provided at 6 NYCRR 375-1.8(h)(3). Respondent may petition the Department for a determination that the institutional and/or engineering controls may be terminated. Such petition must be supported by a statement by a Professional Engineer that such controls are no longer necessary for the protection of public health and the environment. The Department shall not unreasonably withhold its approval of such petition.

E. Review of Submittals other than Progress Reports and Health and Safety Plans

- 1. The Department shall make a good faith effort to review and respond in writing to each submittal Respondent makes pursuant to this Order within sixty (60) Days. The Department's response shall include an approval or disapproval of the submittal, in whole or in part. All Department-approved submittals shall be incorporated into and become an enforceable part of this Order.
- 2. If the Department disapproves a submittal, it shall specify the reasons for its disapproval. Within fifteen (15) Days after the date of the Department's written notice that Respondent's submittal has been disapproved, Respondent shall, subject to Respondent's right to terminate pursuant to Paragraph XIII in the event the rejected submittal is a Work Plan submitted prior to the Department's approval of the RD/RA Work Plan, elect as provided at 6 NYCRR 375-1.6(d)(4). If Respondent elects to modify the submittal, Respondent shall, within thirty (30) Days after such election, make a revised submittal that addresses all of the Department's stated reasons for disapproving the first submittal. In the event that Respondent's revised submittal is disapproved, the Department shall set forth its reasons for such disapproval in writing and Respondent shall be in violation of this Order unless it invokes dispute resolution pursuant to Paragraph XII and its position prevails. Failure to make an election or failure to comply with the election is a violation of this Order.

3. Within thirty (30) Days after the Department's approval of a final report, Respondent shall submit such final report, as well as all data gathered and drawings and submittals made pursuant to such Work Plan, in an electronic format acceptable to the Department. If any document cannot be converted into electronic format, Respondent shall submit such document in an alternative format acceptable to the Department.

F. Department's Issuance of a ROD

Respondent shall cooperate with the Department and provide reasonable assistance, consistent with the Citizen Participation Plan, in soliciting public comment on the proposed remedial action plan ("PRAP"), if any. After the close of the public comment period, the Department shall select a final remedial alternative for the Site in a ROD. Nothing in this Order shall be construed to abridge any rights of Respondent, as provided by law, to judicially challenge the Department's ROD.

G. Release and Covenant Not to Sue

Upon the Department's issuance of a Certificate of Completion as provided at 6 NYCRR 375-1.9 and 375-2.9, Respondent shall obtain the benefits conferred by such provisions, subject to the terms and conditions described therein.

III. Progress Reports

Respondent shall submit written progress reports to the parties identified in Subparagraph XI.A.1 by the 10th Day of each month commencing with the month subsequent to the approval of the first Work Plan and ending with the Termination Date, unless a different frequency is set forth in an approved Work Plan. Such reports shall, at a minimum, include: all actions taken pursuant to this Order during the reporting period and those anticipated for the upcoming reporting period; all approved modifications to work plans and/or schedules; all results of sampling and tests and all other data received or generated by or on behalf of Respondent in connection with the Site during the reporting period, including quality assurance/quality control information; information regarding percentage of completion, unresolved delays encountered or anticipated that may affect the future schedule, and efforts made to mitigate such delays; and information regarding activities undertaken in support of the Citizen Participation Plan during the reporting period and those anticipated for the upcoming reporting period.

IV. Penalties

A. 1. Respondent's failure to comply with any term of this Order constitutes a violation of this Order, the ECL, and 6 NYCRR 375-2.11(a)(4). Nothing herein abridges Respondent's right to contest any allegation that it has failed to comply with this Order.

- 2. Payment of any penalties shall not in any way alter Respondent's obligations under this Order.
- B. 1. Respondent shall not suffer any penalty or be subject to any proceeding or action in the event it cannot comply with any requirement of this Order as a result of any Force Majeure Event as provided at 6 NYCRR 375-1.5(b)(4). Respondent must use best efforts to anticipate the potential Force Majeure Event, best efforts to address any such event as it is occurring, and best efforts following the Force Majeure Event to minimize delay to the greatest extent possible. "Force Majeure" does not include Respondent's economic inability to comply with any obligation, the failure of Respondent to make complete and timely application for any required approval or permit, and non-attainment of the goals, standards, and requirements of this Order.
- 2. Respondent shall notify the Department in writing within five (5) Days of the onset of any Force Majeure Event. Failure to give such notice within such five (5) Day period constitutes a waiver of any claim that a delay is not subject to penalties. Respondent shall be deemed to know of any circumstance which it, any entity controlled by it, or its contractors knew or should have known.
- 3. Respondent shall have the burden of proving by a preponderance of the evidence that (i) the delay or anticipated delay has been or will be caused by a Force Majeure Event; (ii) the duration of the delay or the extension sought is warranted under the circumstances; (iii) best efforts were exercised to avoid and mitigate the effects of the delay; and (iv) Respondent complied with the requirements of Subparagraph IV.B.2 regarding timely notification.
- 4. If the Department agrees that the delay or anticipated delay is attributable to a Force Majeure Event, the time for performance of the obligations that are affected by the Force Majeure Event shall be extended for a period of time equivalent to the time lost because of the Force majuere event, in accordance with 375-1.5(4).
- 5. If the Department rejects Respondent's assertion that an event provides a defense to non-compliance with this Order pursuant to Subparagraph IV.B, Respondent shall be in violation of this Order unless it invokes dispute resolution pursuant to Paragraph XII and Respondent's position prevails.

V. Entry upon Site

A. Respondent hereby consents, upon reasonable notice under the circumstances presented, to entry upon the Site (or areas in the vicinity of the Site which may be under the control of Respondent) by any duly designated officer or employee of the Department or any State agency having jurisdiction with respect to matters addressed pursuant to this Order, and by any agent, consultant, contractor, or other person so authorized by the Commissioner, all of whom shall abide by the health and safety rules in effect for the Site, for inspecting, sampling, copying records related to the contamination at the Site, testing, and any other activities necessary to ensure Respondent's

compliance with this Order. Upon request, Respondent shall (i) provide the Department with suitable work space at the Site, including access to a telephone, to the extent available, and (ii) permit the Department full access to all non-privileged records relating to matters addressed by this Order. Raw data is not considered privileged and that portion of any privileged document containing raw data must be provided to the Department. In the event Respondent is unable to obtain any authorization from third-party property owners necessary to perform its obligations under this Order, the Department may, consistent with its legal authority, assist in obtaining such authorizations.

B. The Department shall have the right to take its own samples and scientific measurements and the Department and Respondent shall each have the right to obtain split samples, duplicate samples, or both, of all substances and materials sampled. The Department shall make the results of any such sampling and scientific measurements available to Respondent.

VI. Payment of State Costs

- A. Within forty-five (45) Days after the effective date of this Order, Respondent shall pay to the Department a sum of money which shall represent reimbursement for past State Costs as provided at 6 NYCRR 375-1.5(b)(3).
- B. Within forty-five (45) Days after receipt of an itemized invoice from the Department, Respondent shall pay to the Department a sum of money which shall represent reimbursement for State Costs, other than those identified in Subparagraph VI.A, for work performed at or in connection with the Site through and including the Termination Date, as provided at 6 NYCRR 375-1.5(b)(3).
- C. Personal service costs shall be documented as provided by 6 NYCRR 375-1.5(b)(3(ii). The Department shall not be required to provide any other documentation of costs, provided however, that the Department's records shall be available consistent with, and in accordance with, Article 6 of the Public Officers Law.
 - D. Such invoice shall be sent to Respondent at the following address:

Patrick J. Murray 3301 Ransom Road Lancaster, New York 14086

E. Each such payment shall be made payable to the Department of Environmental Conservation and shall be sent to:

Bureau of Program Management Division of Environmental Remediation New York State Department of Environmental Conservation 625 Broadway

Albany, New York 12233-7012

- F. Each party shall provide written notification to the other within ninety (90) Days of any change in the foregoing addresses.
- G. Respondent may contest invoiced costs as provided at 6 NYCRR 375-1.5(b)(3)(v) and (vi).

VII. Reservation of Rights

- A. Except as provided at 6 NYCRR 375-1.9 and 375-2.9, nothing contained in this Order shall be construed as barring, diminishing, adjudicating, or in any way affecting any of the Department's rights or authorities, including, but not limited to, the right to require performance of further investigations and/or response action(s), to recover natural resource damages, and/or to exercise any summary abatement powers with respect to any person, including Respondent.
- B. Except as otherwise provided in this Order, Respondent specifically reserves all rights and defenses under applicable law respecting any Departmental assertion of remedial liability and/or natural resource damages against Respondent, and further reserves all rights respecting the enforcement of this Order, including the rights to notice, to be heard, to appeal, and to any other due process. The existence of this Order or Respondent's compliance with it shall not be construed as an admission of liability, fault, wrongdoing, or breach of standard of care by Respondent, and shall not give rise to any presumption of law or finding of fact, or create any rights, or grant any cause of action, which shall inure to the benefit of any third party. Further, Respondent reserves such rights as it may have to seek and obtain contribution, indemnification, and/or any other form of recovery from its insurers and from other potentially responsible parties or their insurers for past or future response and/or cleanup costs or such other costs or damages arising from the contamination at the Site as may be provided by law, including but not limited to rights of contribution under section 113(f)(3)(B) of CERCLA, 42 U.S.C. § 9613(f)(3)(B).

VIII. Indemnification

Respondent shall indemnify and hold the Department, the State of New York, the Trustee of the State's natural resources, and their representatives and employees harmless as provided by 6 NYCRR 375-2.5(a)(3)(i).

IX. Public Notice

A. Within thirty (30) Days after the effective date of this Order, Respondent shall provide notice as required by 6 NYCRR 375-1.5(a). Within sixty (60) Days of such filing, Respondent shall provide the Department with a copy of such instrument certified by the recording officer to be a true and faithful copy.

B. If Respondent proposes to transfer by sale or lease the whole or any part of Respondent's interest in the Site, or becomes aware of such transfer, Respondent shall, not fewer than forty-five (45) Days before the date of transfer, or within forty-five (45) Days after becoming aware of such conveyance, notify the Department in writing of the identity of the transferee and of the nature and proposed or actual date of the conveyance, and shall notify the transferee in writing, with a copy to the Department, of the applicability of this Order. However, such obligation shall not extend to a conveyance by means of a corporate reorganization or merger or the granting of any rights under any mortgage, deed, trust, assignment, judgment, lien, pledge, security agreement, lease, or any other right accruing to a person not affiliated with Respondent to secure the repayment of money or the performance of a duty or obligation.

X. Environmental Easement

- A. If a Department-approved final engineering report for the Site relies upon one or more institutional and/or engineering controls, Respondent (or the owner of the Site) shall submit to the Department for approval an Environmental Easement to run with the land in favor of the State which complies with the requirements of ECL Article 71, Title 36, and 6 NYCRR 375-1.8(h)(2). Upon acceptance of Environmental Easement by the State, Respondent shall comply with the requirements of 6 NYCRR 375-1.8(h)(2).
- B. If the ROD provides for no action other than implementation of one or more institutional controls, Respondent shall cause an environmental easement to be recorded under the provisions of Subparagraph X.A. If Respondent does not cause such environmental easement to be recorded in accordance with 6 NYCRR 375-1.8(h)(2), Respondent will not be entitled to the benefits conferred by 6 NYCRR 375-1.9 and 375-2.9.

XI. Communications

- A. All written communications required by this Order shall be transmitted by United States Postal Service, by private courier service, or hand delivered as follows:
 - 1. Communication from Respondent shall be sent to:

Martin Doster, P.E.

Division of Environmental Remediation
New York State Department of Environmental Conservation
270 Michigan Avenue
Buffalo, New York 14203-2999
mldoster@gw.dec.state.ny.us

Note: three hard copies (one unbound) of work plans are required, as well as one electronic copy.

with copies to:

Gary Litwin

Correspondence only

2. Communication to be made from the Department shall be sent to:

Craig A. Slater, Esq. Harter Secrest & Emery LLP Twelve Fountain Plaza, Suite 400 Buffalo, New York 14202-2293

- B. The Department and Respondent reserve the right to designate additional or different addressees for communication upon written notice to the other.
- C. Each party shall notify the other within ninety (90) Days after any change in the addresses in this Paragraph XI or in Paragraph VI.

XII. Dispute Resolution

In the event disputes arise under this Order, Respondent may, within fifteen (15) Days after Respondent knew or should have known of the facts which are the basis of the dispute, initiate dispute resolution in accordance with the provisions of 6 NYCRR 375-1.5(b)(2). Nothing contained in this Order shall be construed to authorize Respondent to invoke dispute resolution with respect to the remedy selected by the Department in the ROD or any element of such remedy, nor to impair any right of Respondent to seek judicial review of the Department's selection of any remedy.

XIII. Termination of Order

- A. This Order will terminate upon the earlier of the following events:
- 1. Respondent's election to terminate pursuant to Subparagraphs II.B.1.b, II.C or II.E.2 so long as such election is made prior to the Department's approval of the RD/RA Work Plan. In the event of termination in accordance with this Subparagraph XIII.A.1, this Order shall terminate effective the 5th Day after the Department's receipt of the written notification terminating this Order or the 5th Day after the time for Respondent to make its election has expired, whichever is earlier, provided, however, that if there are one or more Work Plan(s) for which a final report has not been approved at the time of Respondent's notification of its election to terminate this Order pursuant to Subparagraphs II.B.1.b or II.E.2 or its failure to timely make such an election pursuant to Subparagraphs II.B.1.b or II.E.2, Respondent shall promptly complete the activities required by such previously approved Work Plan(s) consistent with the schedules contained therein. Thereafter, this Order shall terminate effective the 5th Day after the Department's approval of the final report for all previously approved Work Plans; or
- 2. The Department's written determination that Respondent has completed all phases of the Remedial Program (including Site Management), in which event the termination shall be effective on the 5th Day after the date of the Department's approval of the final report relating to the final phase of the Remedial Program.
- B. Notwithstanding the foregoing, the provisions contained in Paragraphs VI and VIII shall survive the termination of this Order and any violation of such surviving Paragraphs shall be a violation of this Order, the ECL, and 6 NYCRR 375-2.11(a)(4), subjecting Respondent to penalties as provided under Paragraph IV so long as such obligations accrued on or prior to the Termination Date.
- C. If the Order is terminated pursuant to Subparagraph XIII.A.1, neither this Order nor its termination shall affect any liability of Respondent for remediation of the Site and/or for payment of State Costs, including implementation of removal and remedial actions, interest, enforcement, and any and all other response costs as defined under CERCLA, nor shall it affect any defenses to such liability that may be asserted by Respondent. Respondent shall also ensure that it does not leave the Site in a condition, from the perspective of human health and environmental protection, worse than that which existed before any activities under this Order were commenced. Further, the Department's efforts in obtaining and overseeing compliance with this Order shall constitute reasonable efforts under law to obtain a voluntary commitment from Respondent for any further activities to be undertaken as part of a Remedial Program for the Site.

XIV. Miscellaneous

A. Respondent agrees to comply with and be bound by the provisions of 6 NYCRR Subparts 375-1 and 375-2; the provisions of such Subparts that are referenced herein are referenced

for clarity and convenience only and the failure of this Order to specifically reference any particular regulatory provision is not intended to imply that such provision is not applicable to activities performed under this Order.

- B. The Department may exempt Respondent from the requirement to obtain any state or local permit or other authorization for any activity conducted pursuant to this Order in accordance with 6 NYCRR 375-1.12(b), (c), and (d).
- C. 1. Respondent shall use best efforts to obtain all Site access, permits, easements, approvals, institutional controls, and/or authorizations necessary to perform Respondent's obligations under this Order, including all Department-approved Work Plans and the schedules contained therein. If, despite Respondent's best efforts, any access, permits, easements, approvals, institutional controls, or authorizations cannot be obtained, Respondent shall promptly notify the Department and include a summary of the steps taken. The Department may, as it deems appropriate and within its authority, assist Respondent in obtaining same.
- 2. If an interest in property is needed to implement an institutional control required by a Work Plan and such interest cannot be obtained, the Department may require Respondent to modify the Work Plan pursuant to 6 NYCRR 375-1.6(d)(3) to reflect changes necessitated by Respondent's inability to obtain such interest.
- D. The paragraph headings set forth in this Order are included for convenience of reference only and shall be disregarded in the construction and interpretation of any provisions of this Order.
- E. 1. The terms of this Order shall constitute the complete and entire agreement between the Department and Respondent concerning the implementation of the activities required by this Order. No term, condition, understanding, or agreement purporting to modify or vary any term of this Order shall be binding unless made in writing and subscribed by the party to be bound. No informal advice, guidance, suggestion, or comment by the Department shall be construed as relieving Respondent of Respondent's obligation to obtain such formal approvals as may be required by this Order. In the event of a conflict between the terms of this Order and any Work Plan submitted pursuant to this Order, the terms of this Order shall control over the terms of the Work Plan(s). Respondent consents to and agrees not to contest the authority and jurisdiction of the Department to enter into or enforce this Order.
- 2. i. Except as set forth herein, if Respondent desires that any provision of this Order be changed, Respondent shall make timely written application to the Commissioner with copies to the parties listed in Subparagraph XI.A.1.
- ii. If Respondent seeks to modify an approved Work Plan, a written request shall be made to the Department's project manager, with copies to the parties listed in Subparagraph XI.A.1.

- iii. Requests for a change to a time frame set forth in this Order shall be made in writing to the Department's project attorney and project manager; such requests shall not be unreasonably denied and a written response to such requests shall be sent to Respondent promptly.
- F. 1. If there are multiple parties signing this Order, the term "Respondent" shall be read in the plural, the obligations of each such party under this Order are joint and several, and the insolvency of or failure by any Respondent to implement any obligations under this Order shall not affect the obligations of the remaining Respondent(s) under this Order.
- 2. If Respondent is a partnership, the obligations of all general partners (including limited partners who act as general partners) under this Order are joint and several and the insolvency or failure of any general partner to implement any obligations under this Order shall not affect the obligations of the remaining partner(s) under this Order.
- 3. Notwithstanding the foregoing Subparagraphs XIV.F.1 and 2, if multiple parties sign this Order as Respondents but not all of the signing parties elect to implement a Work Plan, all Respondents are jointly and severally liable for each and every obligation under this Order through the completion of activities in such Work Plan that all such parties consented to; thereafter, only those Respondents electing to perform additional work shall be jointly and severally liable under this Order for the obligations and activities under such additional Work Plan(s). The parties electing not to implement the additional Work Plan(s) shall have no obligations under this Order relative to the activities set forth in such Work Plan(s). Further, only those Respondents electing to implement such additional Work Plan(s) shall be eligible to receive the Liability Limitation referenced in Paragraph VI.
- G.. Respondent shall be entitled to receive contribution protection and/or to seek contribution to the extent authorized by ECL 27-1421(6) and 6 NYCRR 375-1.5(b)(5).
- H. Unless otherwise expressly provided herein, terms used in this Order which are defined in ECL Article 27 or in regulations promulgated thereunder shall have the meaning assigned to them under said statute or regulations.
- I. Respondent's obligations under this Order represent payment for or reimbursement of response costs, and shall not be deemed to constitute any type of fine or penalty.
- J. Respondent and Respondent's successors and assigns shall be bound by this Order. Any change in ownership or corporate status of Respondent shall in no way alter Respondent's responsibilities under this Order.

K.	This Order may be executed for the convenience of the parties hereto, individually o
in combinati	ion, in one or more counterparts, each of which shall be deemed to have the status of as
executed ori	iginal and all of which shall together constitute one and the same.

L.	The effective date of this Order is the 10 th Day after it is signed by the Commissione
or the Commis	sioner's designee.

DATED:

ALEXANDER B. GRANNIS
COMMISSIONER
NEW YORK STATE DEPARTMENT OF
ENVIRONMENTAL CONSERVATION

R	†7 *
_	у.

Dale A. Desnoyers, Director
Division of Environmental Remediation

CONSENT BY RESPONDENT

Respondent hereby consents to the issuing and entering of this Order, waives Respondent's right to a hearing herein as provided by law, and agrees to be bound by this Order.

EXHIBIT "B"

RECORDS SEARCH REPORT

- 1. Detail all environmental data and information within Respondent's or Respondent's agents' or consultants' possession or control regarding environmental conditions at or emanating from the Site.
- 2.A comprehensive list of all existing relevant reports with titles, authors, and subject matter, as well as a description of the results of all previous investigations of the Site and of areas immediately surrounding the Site which are or might be affected by contamination at the Site, including all available topographic and property surveys, engineering studies, and aerial photographs.
 - 3.A concise summary of information held by Respondent and Respondent's attorneys and consultants with respect to:
 - (i)a history and description of the Site, including the nature of operations;
- (ii)the types, quantities, physical state, locations, methods, and dates of disposal or release of hazardous waste at or emanating from the Site;
 - (iii)a description of current Site security (i.e. fencing, posting, etc.); and
- (iv)the names and addresses of all persons responsible for disposal of hazardous waste, including the dates of such disposal and any proof linking each such person responsible with the hazardous wastes identified.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 12/03/2007 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Dist / Dir	Map ID	Page
SNYDER TANK CORP	3773 LAKE SHORE RD	0 - 1/8 SE	2	7

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/26/2008 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Dist / Dir	Map ID	Page
TECUMSEH REDEVELOPMENT INC	2600 HAMBURG TURNPIKE	1/2 - 1 N	28	86

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/06/2008 has revealed that there is 1 RCRA-CESQG site within approximately 0.125 miles of the target property.

SNYDER TANK CORP	3773 LAKE SHORE RD	0 - 1/8 SE	2	7

STATE AND LOCAL RECORDS

LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the LTANKS list, as provided by EDR, and dated 02/05/2008 has revealed that there are 3 LTANKS sites within approximately 0.5 miles of the target property.

Lower Elevation	Address	Dist / Dir	Map ID	Page
SOUTH TOWNS TREATMENT PLN Date Closed: 03/11/03	3690 LAKE SHORE ROAD	0 - 1/8 NE	A12	47

FORD MOTOR COMPANY Date Closed: 12/02/86	3663 LAKESHORE ROAD	0 - 1/8 NE	B21	64

HIST LTANKS: A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database.

A review of the HIST LTANKS list, as provided by EDR, and dated 01/01/2002 has revealed that there

are 2 HIST LTANKS sites within approximately 0.5 miles of the target property.

MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

A review of the MANIFEST list, as provided by EDR, and dated 02/15/2008 has revealed that there is 1 MANIFEST site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Dist / Dir	Map ID	Page
SNYDER TANK CORP	3773 LAKE SHORE RD	0 - 1/8 SE	2	7

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 02/05/2008 has revealed that there are 24 NY Spills sites within approximately 0.5 miles of the target property.

NY Hist Spills: This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database.

A review of the NY Hist Spills list, as provided by EDR, and dated 01/01/2002 has revealed that there are 9 NY Hist Spills sites within approximately 0.5 miles of the target property.

AND MARK SIKORSKI TEAM FREIGHT. FOUND THE 30 PALLETS OF SODIUM FLUORIDE STACKED TWO HIGH. SOME OF THE BAGS HAD TEARS AND THE WHITE POWDER HAD SPILLED TO THE GROUND. FG TOLD MR. SIKORSKI THAT HE WOULD HAVE TO PICK UP THE MATERIAL AND DISPOSE AT A LANDFILL BUT WOULD FIRST HAVE TO GET THE LANDFILL APPROVAL. 12/13/07 FG SPOKE TO CINDY SHIRLEY WITH SOLVAY CHEMICALS 618-274-0755 EXT 257. SHE SAID THE MATERIAL SHOULD BE LANDFILLED AND IT IS NOT HAZARDOUS. SHE SAID THE PACKAGING SHOULD BE REPAIRED BEFORE SHIPPING. FG SPOKE TO MARK SIKORSKI 432-8326 WHO SAID HE WILL CONTACT BFI TO GET APPROVAL FOR DISPOSAL AND HE WILL REPAIR THE PACKAGING. 1/10/08 FG SPOKE TO MARK SIKORSKI WHO SAID THAT SOLVAY CHEMICALS REMOVED ALL THE PRODUCT STAGED IN THE WAREHOUSE. THEY ALSO PICKED UP THE SPILLED POWDER ON THE FLOOR AND PROPERLY DISPOSEDOF IT. DUE TO BUILDING CODES, THE TOWN OF HAMBURG TOLD MR. SIKORSKI HE CAN'T STORE THE SODIUM FLUORIDE ANY LONGER AND HE INDICATED THAT HE WILL NOT. NO FURTHER

ACTION REQUIRED. SPILL IS CLOSED. END DECRemark - 0709817

Actual: 596 ft.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D000
Waste name: Not Defined

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D007
Waste name: CHROMIUM

Waste code: D018
Waste name: BENZENE

Waste code: F002

Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE,

DEC Field was "JFO" 06/20/03 JFO ON SITE MET WITH ED MCDONNELL DIRECTOR OF FLIGHT DIRECTOR OF OPERATIONS FOR MERCY FLIGHT, JENNIFER BIRACH ENV ENG FOR FORD MOTOR CO ANDBOB DUKE HLTH AND SAFETY OFFICER FOR FORD. THE FIRE DEPT IS ALSO ON THE SCENE. SPEEDY DRY HAS BEEN PLACED ON THE BLACKTOP AROUND AND UNDER THE AIRCRAFT. THE CRAFT IS STILL LEAKING CREATING A LARGER SPILL AREA AND MORE SPEEDY DRY NEEDS TO BE APPLIED. THE MECHANIC FROM MERCY FLIGHT IS OFFLOADING THE FUEL SO THE CRAFT CAN BE PLACED ON A FLATBED AND MOVED. JENNIFER SAID THAT FORD CO WILL COMPLETE THE CLEANUP WHEN THE CRAFT IS REMOVED. 06/23/03 JFO ON SCENE NO ONE AVAILABLE. THE SPEEDY DRY HAS BEEN PLACED IN 4-55 GALLON DRUMS

FOR DISPOSAL. THE PARKING LOT LOOKS FINE. RECEIPTS TO FOLLOW. 06/27/03 JFO TELCON WITH JENNIFER B. THERE ARE 4 DRUMS FOR DISPOSAL. THE ANALYTICAL RESULTS CAME BACK NON HAZARDOUS. THE DRUMS WILL BE PICKED UP TUESDAY. SHE WILL FAX ME A COPY OF THE MANIFEST FOR CLOSURE. 08/08/03 JFO CALL TO

JENNIFER B. LEFT A MESSAGE ON HER MACHINE REGARDING THE DISPOSAL RECEIPTS. 08/11/03 JFO RECEIVED THE DISPOSAL RECEIPTS FOR THE 4 DRUMS OF CLEANUP MATERIAL. NO FURTHER ACTION REQUIRED. CLOSED END DECRemark - 0302990

Remarks: Start CallerRemark - 0302990 helicopter crashed causing spill - fire dept on

DEC Field was "MF" 05/02/97: MF S/V AFTER A REQUEST BY DAN JUDD, SPDES ENGINEER FOR FORD TO MONITOR CLEAN UP ACTIVITIES. FORD UNDER COAST GUARD ORDER TO CLEAN CULVERTS &DITCH TO RUSH CREEK FROM THEIR SPDES DISCHARGE. MET/BRAD HOMAN & PAUL HUGHES, COAST GUARD/MIKE POPA, MARINE POLLUTION CONTROL, FORD'S CONTRACTOR/BOB MISZTAL, FORD/EPS, SUB CONTRACTOR FOR FORD. DITCH BEING DEWATERED & CLEANED (BOTTOM & SIDES SCRAPPED), SOIL STAGED IN LUGGERS. DISCUSSED WITH BOB MITSZAL THAT ADDITIONAL SOIL REMOVAL NECESSARY IN THE AREA OF SPDES CULVERT DISCHARGE. SOIL AT THE SIDES OF THE DITCH (AFTER SOIL REMOVED) SHEENING IN THIS AREA. BOB CLAIMED THIS WILL BE DONE. COAST GUARD IS LEAD AGENCY FOR THIS SPILL 05/07/97: MF S/V/CAOST GUARD/MPC/EPS/FORD. PRODUCT COMING OUT OF LAKE SIDE OF DITCH AFTER SOIL WAS REMOVED IN THIS AREA. SITE MEETING: BRAD HOMAN, JOE **GLEASON-COAST GUARD** JENNY DEPA, RANDY MARTIN, DONCOLLEY, BOB MIKE POPA, MIKE RANCHIO, MPC JOE GLEASON DISCUSSED MITSZAL-FORD DEFINING EXTENT OF CONTAMINATION LAKE SIDE OF DITCH WHERE PRODUCT IS SEEPING IN ALONG WITH ADDITIONAL SOIL REMOVAL IN THIS AREA. I SUGGESTED CONFIRITORY SAMPLINGIN DITCH, JENNY DEPA DISCUSSED THAT THERE IS BURIED CONTAMINATION IN THIS AREA THAT IS CAUSING SEEPAGE AND ROAD RUN OFF MAY HAVE CONTRIBUTED TO OR CAUSED PROBLEM. JOE SUGGESTED A MEETING THIS AFTERNOON AS TO FORDS POSITION. FORD WANTS IT TOMORROW.05/08/97: MF T/C BRAD HOMAN, FORD WILL NOT DO ADDITIONAL WORK, THEY WILL LEAVE CONTAMINATION IN PLACE. COAST GUARD MEETING SCHEDULED FOR 5/9/97 WITH PARKS/ARMY CORP OF ENGINEERS. BRIEFED PJB. 05/09/97: MF T/C/DENNIS KARL, FORD 313-845-2532. CLAINED BURIED CONTAMINATION IN AREA CAUSED PROBLEM, WILL NOT DO ADDITIONAL WORK. T/C BRAD HOMAN, MEETING RESCHEDULED FOR 5/12/97. RNL TO ATTEND. 05/19/97: MF T/C/BRAD HOMAN, FORD AGREED TO CLEAN UP, SITE MEETING SCHEDULED 1000 TODAY. 05/19/97: MFS/V/DAN JUDD, DEC/BRAD, PAUL, COAST GUARD/WAYNE TOTH, BOB MISZTEL, FORD. FORD DID ADDITIONAL REMEDIATION ALONG DITCH. THERE WAS A HEAVY RAIN LAST NITE & THERE IS A SHEEN FROM THE SPDES OUTFALL. FORD CLAIMED IT IS FROM THEIR PARKING LOT STORM DRAIN BASIN. THIS BASIN IS PUMPED TO THEIR LAGOON IN DRY WEATHER (THERE IS GROUND WATER INFILTRATION TO THIS DRAIN). THEY ARE GOING TO PUT A 1 FOOT PLATE IN THE BASIN TO BLOCK OIL. THERE IN A 4" PLATE IN THERE NOW. I ASKED TO BANK SAMPLING 8021 & 8270BN. FORD TO ARRANGE MEETING FOR NEXT WEEK, DETROIT TO ATTEND. 05/27/97: MF MEETING AT FORD OFFICE BUILDING, SEE 5/27/97 SIGN IN SHEET FOR ATTENDEES. DENNIS KARL, FORD DETROIT, TOLD US THEY DID ALL THE WORK THEY ARE GOING TO DO ON THE DITCH, COAST GUARD TOLD HIM BANKS STILL SHEEN & THERE STILL IS A SHEEN FROM THEIR SPDES DISCHARGE. THEY ARE INSTALLING A 1' PLATE IN THERE PARKING LOT STORM DRAIN CATCH BASIN, EVERYONE BUT FORD CONVINCED THIS WILL NOT WORK. THEY HAVE NO PLAN IF IT DOSN'T. THEY WILLALSO CLEAN HOLDING POND. THIS IS NOT LINED & THEY HAVE NO PLANS TO LINE IT. THEY ALSO CLAIMED OIL INS BEING PICKED UP BY 'S' SEWER THAT TAKES IN ROOF DRAINS & TRAVELS UNDER THE BUILDING. THEY HAVE NO IDEA HOW OR WHY OIL IN ENTERING DRAIN. THEY DONTPLAN TO FIND OUT. WE REQUESTED AN INVESTIGATION TO DETERMINE THIS. COAST GUARD CAUTIONED THEY REGARDING SLOWNESS OF PROJECT. COAST GUARD WOULD ALSO LIKE THEM TO FIND SOURCE OF PROBLEM. SITE MEETING SCHEDULED FOR 5/28/97. 05/28/97: MF RNL S/V AT FORD STAMPLING PLANT/DON COLLEY, WAYNE TOTH, BOB MISZTAL, FORD/TIM WELCH, BFI/BRAD HOMAN, PAUL HUGHES, USCG. WALKED THRU PLANT LOOKING FOR POSSIBLE OIL PROBLEMS. OIL OVER MOST OF THE FLOORS AT ONE TIME. ROOF STORM SEWERS RUN UNDER PLANT FLOOR. SUSPECT INFILTRATION, WAS TOLD FLOOR CONCRETE IS 6" THICK. OIL WAS TRACKED BY CONTRACTOR TO S SEWER BRAKE, BRAKE HAS BEEN REPAIRED, OIL SHEEN IN LAGOON. 07/27/97: MF S/V TO OUTFALL AFTER RAIN, NEW BOOMS IN PLACE. SHEEN

Other Pertinent Environmental Activity Identified at Site

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Next Scheduled EDR Contact: 06/16/2008 Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/06/2008 Date Data Arrived at EDR: 03/06/2008 Date Made Active in Reports: 04/18/2008

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Next Scheduled EDR Contact: 06/09/2008 Data Release Frequency: Annually

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Elevation: 593 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 42078-G7 BUFFALO SE, NY

Most Recent Revision: 1965

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

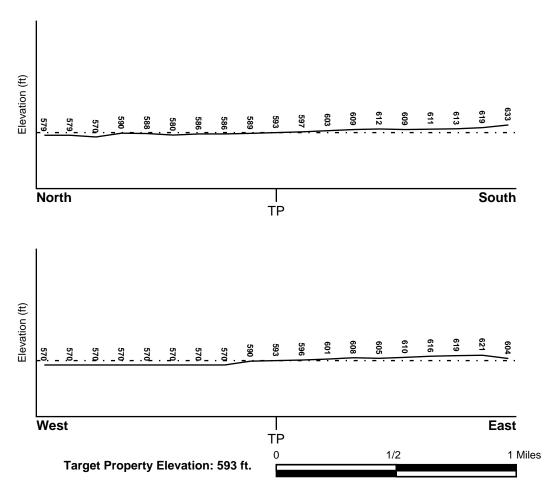

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

BUFFALO SE

YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:

Hydrologic Group: Not reported

Soil Drainage Class: Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Canadice

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high

water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 15 inches

	Soil Layer Information						
	Boundary			Classification		Saturated hydraulic	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	Soil Reaction (pH)
1	0 inches	7 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 0 Min: 0	Max: 8.4 Min: 6.6
2	7 inches	44 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 0 Min: 0	Max: 8.4 Min: 6.6
3	44 inches	59 inches	channery silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 0 Min: 0	Max: 8.4 Min: 6.6

Soil Map ID: 3

Soil Component Name: Udorthents

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high

water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 137 inches

No Layer Information available.

Soil Map ID: 4

Soil Component Name: Brockport

Soil Surface Texture: silty clay loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high

water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

	Boundary			r Information Classification		Saturated	
Layer	Upper	Lower	Soil Texture Class		Unified Soil	hydraulic conductivity micro m/sec	Soil Reaction (pH)
1	0 inches	7 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:
2	7 inches	31 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

EDR Site Report™

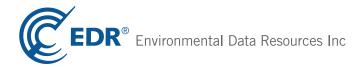

TABLE OF CONTENTS

The EDR-Site Report[™] is a comprehensive presentation of government filings on a facility identified in a search of federal, state and local environmental databases. The report is divided into three sections:

Section	n 1: Facility Summary	Page 3
S w	Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.	
	All available detailed information from databases where sites are identified.	Page 4
Section	3: Databases and Update Information	Page 25
	Name, source, update dates, contact phone number and description of each of the databases or this report.	

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Hazardous Waste Summary:

D000 Waste code: Not Defined Waste name:

Waste code:

Waste name:

IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code:

A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A Waste name:

CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

MULTIMEDIA

Facility is listed in EPA's index system

DATABASE: Facility Index System (FINDS)

BORG WARNER FUEL SYSTEMS 3773 LAKE SHORE RD BUFFALO, NY 14219 EDR ID #1000187753

This site is listed in the Federal FINDS database. The FINDS database may contain references to records from government

databases included elsewhere in the report.

Please note: the FINDS database may also contain references to out of date records formerly associated with the site.

Registry ID: 110000327165

Facility Name: CARBON ACTIVATED CORP Facility Address: 3774 LAKESHORE ROAD BUFFALO, NY 14219

Facility County: ERIE EPA Region: Fed. Gov. Facility: 02

Not reported Indian Tribal Land: No

EPA Records Indicate Facility Is Listed In

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release

directly to air, water, land, or that are transported off-site.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA

SECTION 3: DATABASES AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

DATABASES FOUND IN THIS REPORT

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generator

Source: Environmental Protection Ágency

Telephone: 703-308-0035

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Last EDR Contact: 08/21/2008 Date of Government Version: 05/12/2008 Database Release Frequency: Varies Date of Next Scheduled Update: 11/17/2008

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Source: EPA

Telephone: 703-412-9810

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given cite; it not included to site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Last EDR Contact: 06/17/2008 Date of Government Version: 12/03/2007 Database Release Frequency: Quarterly Date of Next Scheduled Update: 09/15/2008

FINDS: Facility Index System/Facility Registry System

Source: EPA

Telephone: Not reported

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 07/01/2008 Date of Last EDR Contact: 06/30/2008 Database Release Frequency: Quarterly Date of Next Scheduled Update: 09/29/2008

NY NY MANIFEST: Facility and Manifest Data
Source: Department of Environmental Conservation
Telephone: 518-402-8651
Manifest is a document that lists and tracks hazardous waste from the generator through transporters

to a TSD facility.

Date of Last EDR Contact: 08/28/2008 Date of Government Version: 05/27/2008 Database Release Frequency: Annually Date of Next Scheduled Update: 11/24/2008 **ERIE CTY SOUTHTOWN**SOUTH 3690 LAKE SHORE RD
BLASDELL, NY

Inquiry Number: September 2, 2008

EDR Site Report™

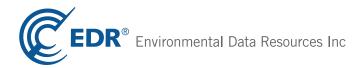

TABLE OF CONTENTS

The EDR-Site Report[™] is a comprehensive presentation of government filings on a facility identified in a search of federal, state and local environmental databases. The report is divided into three sections:

Section	on 1: Facility Summary	ge 3
	Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.	
Section	on 2: Facility Detail Reports	ge 4
	All available detailed information from databases where sites are identified.	
Section	on 3: Databases and Update InformationPa	ige 5
	Name, source, update dates, contact phone number and description of each of the databases for this report.	

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SECTION 1: FACILITY SUMMARY

FACILITY	FACILITY 1 SOUTHTOWNS AWT S-3690 LAKE SHORE RD BUFFALO, NY 14219 EDR ID #U003318105
WASTE MANAGEMENT Facility generates hazardous waste (RCRA)	NO
Facility treats, stores, or disposes of hazardous waste on-site (RCRA/TSDF)	NO
Facility has received Notices of Violations (RCRA/VIOL)	NO
Facility has been subject to RCRA administrative actions (RAATS)	NO
Facility has been subject to corrective actions (CORRACTS)	NO
Facility handles PCBs (PADS)	NO
Facility uses radioactive materials (MLTS)	NO
Facility manages registered aboveground storage tanks (AST)	NO
Facility manages registered underground storage tanks (UST)	NO
Facility has reported leaking underground storage tank incidents (LUST)	NO
Facility has reported emergency releases to the soil (ERNS)	NO
Facility has reported hazardous material incidents to DOT (HMIRS)	NO
WASTE DISPOSAL Facility is a Superfund Site (NPL)	NO
Facility has a known or suspect abandoned, inactive or uncontrolled hazardous waste site (CERCLIS)	NO
Facility has a reported Superfund Lien on it (LIENS)	NO
Facility is listed as a state hazardous waste site (SHWS)	NO
Facility has disposed of solid waste on-site (SWF/LF)	NO
MULTIMEDIA Facility uses toxic chemicals and has notified EPA under SARA Title III, Section 313 (TRIS)	NO
Facility produces pesticides and has notified EPA under Section 7 of FIFRA (SSTS)	NO
Facility manufactures or imports toxic chemicals on the TSCA list (TSCA)	NO
Facility has inspections under FIFRA, TSCA or EPCRA (FTTS)	NO
Facility is listed in EPA's index system (FINDS)	NO
Facility is listed in a county/local unique database (LOCAL)	YES - p4
POTENTIAL SUPERFUND LIABILITY Facility has a list of potentially responsible parties PRP	NO
TOTAL (YES)	1

MULTIMEDIA

Facility is listed in a county/local unique database

EDR Site Report™

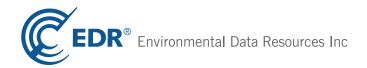

TABLE OF CONTENTS

The EDR-Site Report[™] is a comprehensive presentation of government filings on a facility identified in a search of federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary	3
Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.	
Section 2: Facility Detail Reports	4
Section 3: Databases and Update Information	18
Name, source, update dates, contact phone number and description of each of the databases for this report.	

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

SECTION 3: DATABASES AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

DATABASES FOUND IN THIS REPORT

NY UST: Petroleum Bulk Storage (PBS) Database

Source: Department of Environmental Conservation

Telephone: 518-402-9549

Facilities that have petroleum storage capacities in excess of 1,100 gallons and less than

400,000 gallons.

Date of Last EDR Contact: 08/07/2008 Date of Government Version: 08/07/2008

Database Release Frequency: No Update Planned Date of Next Scheduled Update: 10/20/2008

NY CORTLAND CO. UST: Cortland County Storage Tank Listing

Source: Cortland County Health Department Telephone: 607-753-5035

A listing of underground storage tank sites located in Cortland County.

Date of Government Version: 10/25/2007 Date of Last EDR Contact: 05/28/2008 Date of Next Scheduled Update: 08/25/2008 Database Release Frequency: Quarterly

NY NASSAU CO. UST: Registered Tank Database

Source: Nassau County Health Department Telephone: 516-571-3314

A listing of underground storage tank sites located in Nassau County.

Date of Government Version: 05/21/2003 Date of Last EDR Contact: 07/31/2008 Database Release Frequency: No Update Planned Date of Next Scheduled Update: 10/27/2008

NY ROCKLAND CO. UST: Petroleum Bulk Storage Database

Source: Rockland County Health Department

Telephone: 914-364-2605

A listing of underground storage tank sites located in Rockland County.

Date of Government Version: 07/10/2008 Date of Last EDR Contact: 06/30/2008 Database Release Frequency: Quarterly Date of Next Scheduled Update: 09/29/2008

NY SUFFOLK CO. UST: Storage Tank Database

Source: Suffolk County Department of Health Services Telephone: 631-854-2521

A listing of underground storage tank sites located in Suffolk County.

Date of Government Version: 09/13/2006 Date of Last EDR Contact: 08/28/2008 Database Release Frequency: Annually Date of Next Scheduled Update: 11/24/2008

NY NCFM UST: Storage Tank Database

Source: Nassau County Office of the Fire Marshal Telephone: 516-572-1000

A listing of underground storage tank sites located in Nassau County.

Date of Government Version: 08/20/2007 Date of Last EDR Contact: 08/14/2008 Date of Next Scheduled Update: 11/03/2008 Database Release Frequency: Varies

NY WESTCHESTER CO. UST: Listing of Storage Tanks

Source: Westchester County Department of Health Telephone: 914-813-5161

A listing of underground storage tank sites located in Westchester County.

Date of Government Version: 05/05/2005 Date of Last EDR Contact: 08/28/2008 Database Release Frequency: Varies Date of Next Scheduled Update: 11/24/2008

Zoning

Sorry, we don't have a zoning map for this area, but we'd like to add one. If you know where we can get one, please contact ashleigh@propertyresearchpartners.com. We prefer to get zoning maps in electronic format (PDF, CAD files, shapefiles, etc), but we can also work with paper maps.

The EDR-City Directory Abstract

440 Wheelers Farms Road Milford, CT 06461 800.352.0050 www.edrnet.com

EDR City Directory Abstract

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening report designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Thank you for your business.

Please contact EDR at 1-800-352-0050 with any questions or comments.

10.11 USER PROVIDED INFORMATION

Schedule B

In order to qualify for one of the Landowner Liability Protections (LLPs)³⁵ offered by the Small Business Liability Relief and Brownfield Revitalization Act of 2001 (the "Brownfields Amendments"),³⁶ the user (LCS' client) must provide the following information (if available) to the environmental professional (LCS). Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete. (Please provide relevant documentation and/or explanation of any affirmative answers.)

- (1) Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal state of local law?
- (2) Are you aware of any activity and use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal state of local law?
- (3) As the user of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you have specialized knowledge of the chemicals and processes used by this type of business?
- (4) Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower price is because contamination is known or believed to be present at the property?
- (5) Are you aware of commonly known or reasonably ascertainable information about the property that would help environmental professional to identify conditions indicative of releases or threatened releases? For Example, as user.
 - (a.) Do you know the past uses of the property? Yes
 - (b.) Do you know of specific chemicals that are present or once were present at the property? No
 - (c.) Do you know of spills or other chemical releases that have taken place at the property?
 - (d.) Do you know of any environmental cleanups that have taken place at the property?
- (6) As user of the ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?
- (7) Are you, as user of the EM, aware of any previous Environment Site Assessments, Environment compliance audit reports, Geotechnical studies, Risk assessments, Reports regarding hydrogeological conditions on the property or surrounding area, Underground Storage Tanks (UST) installation and closure documents, monitoring reports or similar documents?

 NO CIRCLE ONE
- (8) Are you as user of the ESA, aware of any environment permits, including but not limited to, solid waste disposal permits, hazardous waste disposal permits, NPDES permits, underground injection permits, oil/water separators, air, water waste, USTs ASTS, etc?

 YES

 NO

 CIRCLE ONE
- (9) Are any disposal receipts and/or transporter information for hazardous and/or regulated materials available?
 YES NO CIRCLE ONE
- (10) Are you as keer of the ESA, aware of any registrations for USTs, ASTs, Underground Injection systems?
 YES (0) CIRCLE ONE

Landowner Liability Protections, or LLPs is a term used to describe the three types of potential defenses to Superfund liability in EPA's Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations of CERCLA Liability ("Common Elements" Guide) issued on March 6, 2003.

10.12 LIMITATIONS

This **ENVIRONMENTAL SITE ASSESSMENT PHASE I, IN ACCORDANCE WITH ASTM E1527-05**, is based on the SCOPE OF SERVICES contained within this report. This report is not to be considered as an environmental audit of the subject property or a complete environmental investigation of the subject property.

We have prepared this report for the exclusive use of our client. LCS' liability is limited to use by this client for a period of six months. Use by any other party is strictly prohibited except by authorization in writing from this consultant. LCS has no liability for others' use of this report.

The purpose of this assessment is not to proclaim a property is devoid of environmental impact but rather to identify recognized environmental concerns. This is defined by as "the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to the public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions."

While performance of this Phase I Environmental Site Assessment of the subject property was intended to constitute all appropriate inquiry for purposes of the CERCLA innocent landowner defense by identifying RECs in connection with the subject property, this assessment (as defined by ASTM) is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a subject property. This assessment does not include any testing or sampling of materials.

This **ENVIRONMENTAL SITE ASSESSMENT PHASE I, IN ACCORDANCE WITH ASTM E1527-05,** makes no warranties nor implies any liability regarding:

- 1) Site specific practices and/or disposal methods of the past or future owners.
- 2) The presence of lead containing materials, asbestos, radon and/or environmental impact of such substances on the subject property or buildings and structures on the subject property, other than noted here in.
- 3) Adjacent property owners, their environmental practices and/or impact of such properties and practices on the subject property other than observed from the subject property.
- 4) Unreported spills.
- 5) Practices, waste disposal, environmental concerns and/or modifications to waste site indexes after the date on this report.
- 6) Site groundwater or soil conditions.
- 7) Accuracy or completeness of information supplied to LCS by others.
- 8) Environmental conditions in areas that were not accessible or not otherwise shown to LCS (locked rooms, behind walls or ceilings, etc.).
- 9) Accuracy of previous studies provided to LCS.

10.12 LIMITATIONS (continued)

This report is also subject to any and all limitations defined within ASTM E1527-05. This includes, but is not limited to, the limitation that this report is intended to identify environmental conditions at a specific time and the report is only valid for a period of six months from the date of issuance. According to ASTM, asphalt pavement is considered a limitation.

08B1237.29

The principles defined within ASTM E1527-05, and followed within this study, include the following:

- This practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a property.
- All appropriate inquiry does not mean an exhaustive assessment of a clean property. One of the
 purposes of this practice is to identify a balance between limiting costs/time and the reduction of
 uncertainty about unknown conditions.
- The level of inquiry is variable and depends on the type of property, risk level of the user and information developed in the course of the inquiry.
- Subsequent environmental assessments should not be used as standards to evaluate the appropriateness of prior inquiries based on hindsight, new information or new techniques.

10.13 USER REPONSIBILITIES

The following information is the responsibility of the user and not of the environmental professional. This information may be provided by the user to the environmental professional for use in the final opinion of the all appropriate inquiry. If the information is not provided by the user, the environmental professional's ability to render such an opinion may be hindered and identified as a data gap.

- Searches for environmental cleanup liens against the subject property that are filed or recorded under any federal, tribal, state or local law, as required by 40 CFR Part 312.25.
- Assessments of any specialized knowledge or experience on the part of the landowner, as required by 40 CFR Part 312.28.
- An assessment of the relationship of the purchase price to the fair market value of the subject property, if the property was not contaminated, as required by 40 CFR Part 312.29.
- An assessment of commonly known or reasonably ascertainable information about the subject property, as required by 40 CFR Part 312.30.

In addition, there are other requirements within 40 CFR Part 312 of the user post-purchase regarding maintaining use limitations, providing access for studies from off-site sources and other matters. The user should review these requirements, which depend on the specific liability protection that may apply to the use.

10.14 USER PROTECTIONS

Persons claiming the liability protections under CERCLA must meet the statutory requirements of one of the following landowner liability protections. [It should be noted that the user must also satisfy certain continuing obligations outside the scope of this Phase I Environmental Assessment, as required by CERCLA].

• The innocent landowner defense pursuant to CERCLA Sections 101(35) and 107(b)(3).

08B1237.29

- The bona fide prospective purchaser liability protection pursuant to CERCLA Sections 101(40) and 107(r).
- The contiguous property owner liability protection pursuant to CERCLA Section 107(q).

Certified Lead Designer, Planner and Inspector Certified HUD/EPA Inspector and DELEADER

ASTM Conference on Environmental Site Assessments for Property Transfer

Experience: Mr. LiPuma is a graduate of Canisius College with a Bachelors Degree of

Science. Over the years, Mr. LiPuma has developed and administered

the operations of LCS, Inc.

As the President and Chief Executive Officer of LCS, Mr. LiPuma retains overall responsibility for all environmental investigation projects. Mr. LiPuma is knowledgeable of applicable environmental laws, rules and regulations; and is well recognized in Western New York as well as with select national companies throughout the United States.

Mr. LiPuma recently prepared the asbestos abatement plans and specifications for a \$2,000,000 project involving the removal of sprayed-on fireproofing in a facility. Scaffold decking, tight containment requirements and difficult working conditions added to the challenges of this project. The project was recently completed successfully.

Mr. LiPuma has prepared and assisted in the development of asbestos inspection reports for over 800 clients encompassing over 22,000,000 square feet of building space. Additionally, Mr. LiPuma has supervised the inspection, specifications design and project management for LBP and asbestos abatement in over 20 Public housing projects.

Mr. LiPuma's experience is sought after by many lenders and developers. He has assisted in designing environmental policies and has experience in property redevelopment. This includes asbestos inspection and removal projects through building demolition.

Name: Mary Facklam

Title: Vice President, Due Diligence Services

Years with Firm: Sever

Education: Masters of Arts degree in Science Education, State University of New York at Buffalo,

Buffalo, New York

Bachelor of Arts degree in Geology and Anthropology, University of Rochester,

Rochester, New York

Affiliations: Buffalo Association of Professional Geologists

NYS Association of Professional Geologists

Experience: Ms. Facklam is currently Vice President of Environmental Due Diligence Services. She

is responsible for the management, preparation and/or review of every environmental

report prepared by LCS.

Prior to joining LCS, Ms. Facklam held a position with a local environmental consulting firm where she performed various duties as Geologist and Environmental Specialist.

Ms. Facklam has conducted over 500 Phase I Environmental Site Assessments of commercial properties, including automotive dealerships, office buildings and apartment complexes. In addition, she maintained databases for environmental information, coordinated operations for drilling and environmental fieldwork, classified soil and rock samples, performed physical laboratory soil testing and wrote final reports.

While at LCS, Ms. Facklam has been involved with over 5,000 Environmental Site Assessments. In addition, she is knowledgeable in environmental laws.

Name: Andrew J. Kucserik, CPG, PG
Title: General Manager, Buffalo Office

Years with firm: Six

Education: Bachelors of Arts degree in Geological Sciences, State University of New York at

Buffalo (1977), Buffalo, New York

Registrations: American Institute of Professional Geologists, Certified Professional Geologist #7951

Commonwealth of Pennsylvania, Professional Geologist #PG002551G

Buffalo Association of Professional Geologists, President 1988, V. Pres. 1987

Certifications: Site Assessment of Hazardous Waste Sites (October 1987)

OSHA 1910.120 40-Hour Hazardous Waste Certification (December 1987)

IAH Symposium, Modern Trends in Hydrogeology (May 1992) Asbestos Handlers & Supervisors Course (February 1989)

ASCE Course on Foundation Design (April 1997)

ASTM Seminar, Risk-Based Corrective Action (June 1997) Federal and State Spill Reporting Requirements (October 1997)

Wetlands Identification & Delineation (December 2000) USEPA Fractured Bedrock Symposium (February 2001)

Radiation Worker II Safety Refresher (May 2003)

HAZWOPER Recertification (April 2008)

Experience:

Mr. Kucserik brings more than 25 years of geologic and environmental consulting capabilities to the firm. As the General Manager of the Buffalo Office, Mr. Kucserik is involved with scheduling and management of all Phase I and transaction screen environmental site assessment projects in the Western New York area. Mr. Kucserik is responsible for providing professional services with regards to Phase I and II Environmental Site Assessments, remedial investigations and system designs, soil and groundwater sampling, geophysical investigations, construction oversight monitoring, regulatory agency interfacing, business development, and report preparations.

Mr. Kucserik's education and experience have helped him become proficient in soil, groundwater and air sampling, drilling and well installation methods and applications, underground storage tank (UST) removals, remedial investigations/feasibility studies, as well as technical reporting and data analysis.

In addition, Mr. Kucserik has completed over 1,500 Phase I and Phase II Environmental Site Assessments, over 200 remedial investigations and geophysical surveys utilizing magnetometer, ground penetrating radar, seismic blast monitoring and reflection/refraction equipment for state, commercial, and financial institutions.

Name: **Megan E. Kahabka**Title: Environmental Analyst

Years with Firm: One

Education: Bachelors of Science in Environmental Science, St. Bonaventure University, Olean, New

York (2002)

Experience: Currently, Ms. Kahabka is an Environmental Technician working in the Corporate Office of LCS, primarily assigned as technical report preparation/writer of EAQuick,

Transaction Screen, and Phase I Environmental Site Assessments.

While studying at St. Bonaventure University, Ms. Kahabka participated in two Wastewater Treatment Plant internships at the Brocton, NY and Olean, NY Wastewater Treatment Plants. She was involved in a re-circulation study at the Brocton plant to determine whether to re-circulate 60% of the plant's water in order to raise dissolved oxygen levels before releasing the water back into the environment. At the conclusion of these internships, a comparison of the two plants was presented to department heads and fellow students as part of her senior project. Both internships required daily tests of dissolved oxygen measurements, pH measurements, chlorine detection, and ammonia detection. Also, tasks like cleaning digester heads, weekly testing of effluent and influent, and operating the sludge press. Megan also has experience as a HAZMAT officer in the U.S. Army, requiring her to insure that warehouses and motorpool facilities were storing materials according to state and Army regulations.
