Project No.: 1863R-99

TABLE OF CONTENTS

1.0 INTRODUCTION

Strippit, Inc., (Strippit) implemented an Interim Remedial Measure (IRM) approved by the New York State Department of Environmental Conservation (NYSDEC) at a former disposal area (Site) located south of their facility at 12975 Clarence Center Road in Akron, New York (see Locus Plan, Figure 1). As outlined in a March 1995 Record of Decision (ROD) prepared by the NYSDEC, post-closure monitoring and maintenance is required at the Site to evaluate the effectiveness of the IRM. Specific post-closure monitoring and maintenance requirements are described in a document prepared by Day Engineering, P.C. titled *Post-Closure Monitoring and Maintenance Plan; Interim Remedial Measure; Strippit, Inc.; Akron, New York* dated February 1995. This plan was reviewed and approved by the NYSDEC prior to implementation.

In accordance with a June 24, 1998 letter by the NYSDEC, the frequency of groundwater sampling was reduced from quarterly to bi-annually.

In accordance with a August 21, 2002 letter by the NYSDEC, the testing program outlined in the February 1995 plan was modified to include testing for the following parameters:

- Indicator Parameters: pH, specific conductance, turbidity and temperature
- Total barium, iron, magnesium and manganese
- Total Phenols

This submittal presents the results of the bi-annual groundwater sampling and monitoring conducted on September 25, 2007.

2.0 GROUNDWATER SAMPLING PROCEDURES

Groundwater samples were collected in general accordance with the procedures outlined in the approved post-closure monitoring and maintenance plan. A Site Plan, showing the location of the monitoring wells is included as Figure 2. Groundwater sampling initially included the measurement of static water levels in each of the monitoring wells installed at the Site (designated GW-1 through GW-5) followed by the purging of the wells to remove approximately 3 well volumes (or until wells were dry). The monitoring wells were then allowed to recover so that "fresh" water was retained for testing. Groundwater samples were collected for testing using a dedicated bailer, which is permanently stored above the water within each well casing.

A portion of the groundwater collected from each location was tested in the field for the following parameters using the equipment listed below.

- Specific conductance, temperature, pH, ORP and turbidity: Horiba U-22 Multi-Parameter Water Quality Monitoring System.

In addition to the field-testing, samples were also collected for analytical laboratory testing. These samples were placed in sample containers provided by Paradigm Environmental Services, Inc. (Paradigm), the analytical laboratory. Paradigm also added the necessary preservatives to the sample containers that were provided for the sampling event.

The sample containers were filled by placing approximately equal amounts of sample from the bailer into each container until the container was filled. When the containers were filled they were placed in a plastic cooler containing ice and stored in a locked field vehicle until they were delivered to Paradigm for analytical laboratory testing. Chain-of-custody documentation was maintained throughout the sample collection process. Copies of the executed chain-of-custody forms for the September 25, 2007 sample round are included with the test results presented in Appendix A.

Copies of the monitoring well sample logs prepared for the September 25, 2007 sample round are included in Appendix B. These logs summarize in-situ measurements, groundwater depths, purging information and other relative data.

3.0 GROUNDWATER ELEVATIONS

During the sample round, the depth to groundwater was measured from a monitoring point elevation established on the top of each monitoring well casing using an electronic tape water level indicator. The groundwater depths and elevations measured during the September 25, 2007 sample round are presented in the following table.

WELL	TOP OF CASING ELEVATION (ft.)	DEPTH TO WATER (ft.)	GROUNDWATER ELEVATION (ft.)
GW-1	754.32	44.08	710.24
GW-2	770.62	55.45	715.17
GW-3	742.59	36.23	706.36
GW-4	752.24	41.02	711.22
GW-5	771.26	57.08	714.18

A groundwater contour map developed based upon the groundwater elevations calculated using the measurements obtained during the September 25, 2007 sample round is included as Figure 3.

4.0 ANALYTICAL LABORATORY RESULTS

During the September 25, 2007 sample round, groundwater samples were collected from each of the five monitoring wells (i.e., GW-1 through GW-5). All samples were analyzed by Paradigm for the following parameters.

- Barium, Iron, Magnesium and Manganese via USEPA method 6010 and Total Phenolics via USPEA method 420.1

A copy of Paradigm's report summarizing the test results for the samples collected on September 25, 2007 is included in Appendix A. A historic summary of the parameters detected within the groundwater samples collected from the monitoring wells at the Site is presented in Appendix C.

5.0 SITE INSPECTION REPORT

A copy of the site inspection report completed during the September 25, 2007 sample round is included in Appendix D.

6.0 DISCUSSION

The groundwater level measurements made during the September 25, 2007 sample round range from 1.65 feet (GW-3) to 4.21 feet (GW-5), lower than those measured on the last monitoring event conducted on June 20, 2007. However, the groundwater flow on September 25, 2007 was generally to the northwest, which is consistent with the direction measured during previous monitoring events.

A majority of the parameters detected in the samples collected during the September 25, 2007 sample event were measured at concentrations below Class GA standards (or within the acceptable range) established in 6 NYCRR Part 700-705 for potable groundwater supplies. However, the pH concentrations measured during this monitoring event were outside the acceptable range of 6.5 to 8.5 s.u. except for monitoring well GW-3. A similar trend in pH concentrations was measured during monitoring events conducted on March 8, 2007 and June 20, 2007. The source of the potential impact resulting in the elevated pH concentration is not known, but the other parameters tested do not indicate a similar trend.

During previous site visits, an apparent oil sheen was observed on the standing water located at or near the north face of the IRM closure area, however, no apparent petroleum impact was noted in this area during the September 25, 2007 monitoring event.

The next scheduled monitoring event at the Site is on or about December 20, 2007 (i.e., this event will include measurement of water levels measurement of pH and observing and documenting the condition of the IRM closure).

Analytical Report Cover Page

For Lab Project # 07-3503

The reported results relate only to the samples as they have been received by the laboratory.

Any noncompliant QC parameters having impact on the data are flagged or documented on the final report.

All soil or solid samples have been reported on a dry weight basis, unless qualified "reported as received".

The Chain of Custody provides additional information, including compliance with sample condition requirements upon receipt. Sample condition requirements are defined under the 2003 NELAC Standard, sections 5.5.8.3.1 and 5.5.8.3.2.

NYSDOH ELAP does not certify for all parameters. Paradigm Environmental Services or the indicated subcontracted laboratory does hold certification for all analytes where certification is offered by ELAP unless otherwise specified.

Data qualifiers are used, when necessary, to provide additional information about the data. This information may be communicated as a flag or as text at the bottom of the report. Please refer to the following list of frequently used data flags and their meaning:

"ND" = analyzed for but not detected.
"E" = Result has been estimated, calibration limit exceeded.
"D" = Duplicate results outside QC limits. May indicate a non-homogenous matrix.
"M" = Matrix spike recoveries outside QC limits. Matrix bias indicated.
"B" = Method blank contained trace levels of analyte. Refer to included method blank report.

This report contains a total of 8 pages.

41.02	14.58	10.19	1.08	113.7	7.13	98	Clear

DAY ENVIRONMENTAL, INC.
MONITORING WELL SAMPLING LOG

WELL GW-5

SECTION 1 - SITE INFORMATION

SITE LOCATION: Akron, New York **JOB #:** 1863R-99

PROJECT NAME: Strippit **DATE :** 9-25-07

SAMPLE COLLECTOR(S): M. Dickinson

WEATHER CONDITIONS: 78º F, Sunny **PID IN WELL (PPM)**: NC

SECTION 2 - PURGE INFORMATION

DEPTH OF WELL [FT]: 74.30 (MEASURED FROM TOP OF CASING - T.O.C.)

STATIC WATER LEVEL (SWL) [FT]: 57.08 (MEASURED FROM T.O.C.)

THICKNESS OF WATER COLUMN [FT]: 17.22 (DEPTH OF WELL - SWL)

CALCULATED VOL. OF H_2O PER WELL CASING [GAL]: ~2.81 **CASING DIA.:** 2

CALCULATIONS:

CASING DIA. (FT)	WELL CONSTANT(GAL/FT)
¾" (0.0625)	0.023
1" (0.0833)	0.041
1¼" (0.1041)	0.063
2" (0.1667)	0.1632
3" (0.250)	0.380
4" (0.3333)	0.6528
4½" (0.375)	0.826
6" (0.5000)	1.4688
8" (0.666)	2.611

CALCULATIONS
VOL. OF H_2O IN CASING = DEPTH OF WATER COLUMN X WELL CONSTANT

CALCULATED PURGE VOLUME [GAL]: ~8.43 (3 TIMES CASING VOLUME)

ACTUAL VOLUME PURGED [GAL]: ~8.50

PURGE METHOD: 3' Disposable Bailer **PURGE START:** 13:00 **END:** 13:50

SECTION 3 - SAMPLE IDENTIFICATION AND TEST PARAMETERS

SAMPLE ID #	DATE / TIME	SAMPLING METHOD	ANALYTICAL SCAN(S)
GW-5	9-25-07 / 14:04	Grab	Total Phenols Total Ba, Fe, Mg, Mn

Notes:
- values shown in **BOLD** print indicate parameter was "not detected" at the detection limit presented on this table
- values left blank indicate sample was either not collected or not tested
- soluble metals and volatile organic compounds have not been tested since June 20, 2002 (as approved in a letter from the NYSDEC dated August 21, 2002).

Notes:
- values shown in **BOLD** print indicate parameter was "not detected" at the detection limit presented on this table
- values left blank indicate sample was either not collected or not tested
- soluble metals and volatile organic compounds have not been tested since June 20, 2002 (as approved in a letter from the NYSDEC dated August 21, 2002).

Notes:
- values shown in **BOLD** print indicate parameter was "not detected" at the detection limit presented on this table
- values left blank indicate sample was either not collected or not tested
- soluble metals and volatile organic compounds have not been tested since June 20, 2002 (as approved in a letter from the NYSDEC dated August 21, 2002).

APPENDIX D

SITE INSPECTION REPORT
SEPTEMBER 25, 2007 SAMPLE ROUND

LONG-TERM QUARTERLY MONITORING REPORT
INTERIM REMEDIAL MEASURE
STRIPPIT, INC.
AKRON, NEW YORK

Date of Inspection: 9-25-07

Inspected By: Matt Dickinson

Summary of Observation:
General Condition of Cover: Cover in OK condition - Overgrowth present about 6 inches high

Evidence of Erosion, sloughing or other degradation: ☐ Yes ☒ No

Explain: None

Evidence of cracking: ☐ Yes ☒ No

Explain (include measurements and site sketch): None

Evidence of water seepage: ☐ Yes ☒ No

Explain: None

Evidence of Settlement: ☐ Yes ☒ No

Explain: None

Condition of monitoring wells and gas wells: Monitoring wells, gas wells in OK condition.

Condition of Vegetative Cover: Vegetative cover in good condition. About 6 inches high

Condition of drainage ways (discuss amount of water/sediments present, vegetative growth unusual staining, blockage, etc.). Drain ways in OK condition. Stream flowing unobstructed.

Additional Comments: None

Action Item(s) Required: None

Action Item(s) completed since last inspection: None

Signatures: Matth Dick
