New York State Department of Environmental Conservation  
Division of Hazardous Waste Remediation  
Region 9  
270 Michigan Avenue  
Buffalo, NY 14203-2999

**Re: Monthly Status Report, October 2014  
NYSDEC Site 9-15-066, Cheektowaga, New York**

Dear Mr. Loey:

On behalf of CBS Corporation (CBS) and the Niagara Frontier Transportation Authority (NFTA), CBS submits this monthly progress report on activities undertaken in October 2014 at New York State Department of Environmental Conservation (NYSDEC) Site No. 9-15-066 in Cheektowaga, New York (the Site) pursuant to the Order on Consent and Settlement Agreement, Index No. B9-0381-91-8, entered with NYSDEC (the Order). Under agreements among the Respondents to the Order, CBS is managing the Remedial Program, including the closure of the Operable Unit 2 (OU2) groundwater collection and treatment system.

**1. Site Activities and Status**

- A. On October 17, 2014, CBS submitted to NYSDEC a monthly report on the status of activities at the Site in September 2014.
- B. Conestoga-Rovers & Associates (CRA) completed closure of the OU2 groundwater collection system. The final work activity was closing the lower portion of the 002 segment that had been left open to allow time to observe the effects on 002 segment water levels following closure of the upper portion of this system. The work completed was the following:
  - Partially filling with flowable fill the piping between MH-002-01 and MH-002-02 and between MH-002-01 and CSMH-002;

- Plugging CSMH-002, MH-002-01, and MH-002-02 with Portland cement concrete; and
  - Topping off MH-002-03, MH-002-10, and MH-002-15 with flowable fill.
- C. CRA drained the piping and vessels (except for one carbon adsorber) at the groundwater water treatment system. Drained liquids were treated and discharged.
- D. The groundwater treatment plant was operated on October 16, 2014 as needed to treat water drained from piping and vessels associated with this system.

## **2. Sampling Results and Other Site Data**

- A. The groundwater system treated and discharged an estimated 1,000 gallons as part of the system decommissioning.
- B. Attachment A provides the discharge monitoring report for October 2014 based on the effluent sample collected on October 16, 2014. Attachment B provides the analytical laboratory report for this effluent sample (Sample No. WG-18036-102614-002).
- C. Attachment B also provides the analytical laboratory report for an influent (Sample No. WG-18036-102614-001) collected on October 16, 2014 (*i.e.*, water accumulated in equalization tank prior to treatment).
- D. In reviewing the treatment system monitoring information for October 2014, please note the following:
- All of the discharge for the month occurred on October 16, 2014;
  - Flow data were estimated based on the volumes of the treatment vessel drained; and
  - The pH data are provided by the submitted laboratory sample.
- E. For the October 2014 reporting period, the effluent complied with all discharge limitations.
- F. Attachment C provides the analytical laboratory report for a sample of treatment solids from the groundwater treatment system. Testing of this sample was used to characterize this material for off-site disposal. Testing confirmed prior results that the treatment solids do not exhibit the characteristics of a hazardous waste.

- G. No other sampling or test data were developed during the October 2014 reporting period.

**3. Upcoming Activities**

- A. Encotech, Inc. will dismantle the groundwater treatment system, thereby completing the OU2 groundwater collection and treatment system closure.<sup>1</sup>
- B. Waste materials generated in system closure will be transported off-site for proper disposal.
- C. CRA will conduct the first round of post-closure groundwater and surface water monitoring.
- D. CRA will submit outstanding electronic data deliverables for incorporation in the NYSDEC EQuIS database.<sup>2</sup>

**4. Technical and Schedule Issues**

- A. There are no unresolved technical or operational issues affecting the completion of the OU2 groundwater collection and treatment system closure.

We trust this submittal satisfies your requirements at this time. If you have questions regarding this status report or other project matters, please do not hesitate to contact me.

Respectfully submitted,

Leo M. Brausch  
Consultant/Project Engineer

## Case Narrative

Client: Leo Brausch Consulting  
Project/Site: Buffalo Airport

TestAmerica Job ID: 180-37818-1

**Job ID: 180-37818-1**

**Laboratory: TestAmerica Pittsburgh**

### Narrative

**Job Narrative**  
**180-37818-1**

### Receipt

The samples were received on 10/17/2014 9:00 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 5.1° C.

### GC/MS VOA

The following sample was diluted to bring the concentration of target analytes within the calibration range: WG-18036-101614-001 (180-37818-1). Elevated reporting limits (RLs) are provided.

### Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

### General Chemistry

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

## Definitions/Glossary

Client: Leo Brausch Consulting  
Project/Site: Buffalo Airport

TestAmerica Job ID: 180-37818-1

### Qualifiers

#### GC/MS VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

#### Metals

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

#### General Chemistry

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
HF	Field parameter with a holding time of 15 minutes. Test performed by laboratory at client's request.

### Glossary

**Abbreviation** These commonly used abbreviations may or may not be present in this report.

¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

## Login Sample Receipt Checklist

Client: Leo Brausch Consulting

Job Number: 180-37818-1

**Login Number:** 37818

**List Source:** TestAmerica Pittsburgh

**List Number:** 1

**Creator:** Watson, Debbie

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

## Case Narrative

Client: Leo Brausch Consulting  
Project/Site: Buffalo Airport

TestAmerica Job ID: 180-37601-1

### Job ID: 180-37601-1

Laboratory: TestAmerica Pittsburgh

#### Narrative

##### Job Narrative 180-37601-1

#### Receipt

The sample was received on 10/10/2014 10:30 AM; the sample arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 4.6° C.

#### GC/MS VOA

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### GC/MS Semi VOA

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### GC Semi VOA

The following sample appears to contain polychlorinated biphenyls (PCBs); however, due to weathering or other environmental processes, the PCBs in the sample do not closely match any of the laboratory's Aroclor standards used for instrument calibration: SL-18036-100914-001 (180-37601-1). The sample has been quantified and reported as Aroclor 1016. Due to the poor match with the Aroclor standards, there is increased qualitative and quantitative uncertainty associated with this result.

#### Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### General Chemistry

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

## Definitions/Glossary

Client: Leo Brausch Consulting  
Project/Site: Buffalo Airport

TestAmerica Job ID: 180-37601-1

### Qualifiers

#### GC/MS VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

#### GC/MS Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

#### GC Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
F1	MS and/or MSD Recovery exceeds the control limits

#### Metals

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

#### General Chemistry

Qualifier	Qualifier Description
F2	MS/MSD RPD exceeds control limits
U	Indicates the analyte was analyzed for but not detected.

### Glossary

#### Abbreviation

These commonly used abbreviations may or may not be present in this report.

□	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

## Certification Summary

## Login Sample Receipt Checklist

Client: Leo Brausch Consulting

Job Number: 180-37601-1

**Login Number:** 37601

**List Source:** TestAmerica Pittsburgh

**List Number:** 1

**Creator:** Watson, Debbie

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A
