

February 27, 2026

Ms. Megan Kuczka
Division of Environmental Remediation
NYSDEC, Region 9
700 Delaware Avenue
Buffalo, NY 14209

**Re: National Grid Dewey/Kensington Service Center (Site #915144)
PRR – Version 2**

Dear Ms. Kuczka:

Enclosed for your review is the Periodic Review Report (PRR) for the National Grid Dewey/Kensington Service Center Site (Site No. 915144). This submittal has been updated per your email dated December 5, 2025.

The PRR includes information from the period November 1, 2024 – November 1, 2025.

If you have any questions, please feel free to contact me at 315.540.0829.

Sincerely,

for NAS

Nicholas A. Smith, P.G.
Senior Program Manager

ecc: Lisa Montesano – NG
Devin Shay- Groundwater & Environmental Services, Inc.

**Periodic Review Report – National Grid Dewey/Kensington Service Center (Site #915144)
Reporting Period – November 01, 2024 to November 01, 2025**

I. Introduction

A. Brief Site Summary –

The National Grid Dewey/Kensington Service Center Site (#915144) is located in Buffalo, New York. National Grid owns the property and services its customers from the active facility. Service trucks, equipment, and materials are stored and maintained on-site. A mechanic's shop, several administrative buildings, an above ground fuel island, and an employee parking lot are currently located on-site and are part of the service center.

Prior to 1992, the service center also served as a hazardous waste management facility permitted by the New York State Department of Environmental Conservation (NYSDEC) (Part 373 Permit No. 9-1402-00397/00001-0). National Grid stored spent electrical transformers containing polychlorinated biphenyl- (PCB-) laden oil, various solid wastes, and bulk waste oils on-site. Some liquid wastes were stored within underground storage tanks (USTs). The hazardous waste management facility was closed in December 1992, in accordance with a NYSDEC-approved closure plan.

During excavation activities in the mid-1990s, it was discovered that soil and groundwater were contaminated near a UST identified as Solid Waste Management Unit (SWMU) #7. Multiple USTs were subsequently removed, and an investigation including the advancement of soil borings and the installation of groundwater monitoring wells was completed. A remedial action was completed in 2002 and a long-term groundwater monitoring program was implemented.

On October 3, 2011, National Grid received official notification that the site was deleted from the New York State Registry of Inactive Hazardous Waste Disposal Sites (letter from Ms. Kelly Lewandowski, NYSDEC Chief Site Control Section, to Mr. Chuck Willard, NG SIR Director).

On December 17, 2012, the NYSDEC approved a Declaration of Covenants and Restrictions for the site, which acknowledges the Order on Consent and remedy timeline discussed in Section II B below, and restricts future property use to industrial or commercial in nature, which would have to be compatible with any hazardous constituents present at the site.

B. Remedial Program Effectiveness – During the reporting period (November 01, 2024, to November 01, 2025), the long-term remedial objectives were met for the site.

C. Remedial Program Compliance - The major elements within the Institutional Control/Engineering Control(s) (IC/EC) Plan are in compliance.

**Periodic Review Report – National Grid Dewey/Kensington Service Center (Site #915144)
Reporting Period – November 01, 2024 to November 01, 2025**

- D. **Remedial Program Recommendations** - It is recommended that no changes be made to the IC/EC Plan. It is recommended that the Project Review Report (PRR) submittal frequency (annual) remain the same. The next PRR submittal deadline would be December 1, 2026.

II. Site Overview

A. Site Location and Boundaries –

The Dewey/Kensington Service Center is an active National Grid facility, encompasses approximately 21.2 acres, and is generally located within the center of Buffalo, New York in a predominantly residential area (**Figure 1**). To the west are Delaware Park, Canisius College, and Forest Lawn Cemetery; to the east are Fillmore Junior High School and the Erie County Medical Center; immediately to the west are the St. Mary School and Sisters of Charity Hospital; and to the south is a four-lane expressway.

The site is bordered to south by Kensington Avenue and to the north by Dewey Avenue. The New York Central Railroad tracks border the site to the east. The expressway runs along the western side of the site.

B. Regulatory History and Remedy Features –

In September 1992, excavation activities at the facility, in the vicinity of Building #13, revealed petroleum-impacted gravel and a broken vent line connected to an underground waste oil tank. The former waste oil tank was removed, and four groundwater monitoring wells (ESI-1, ESI-2, ESI-3, and ESI-4) were installed in the vicinity of the former tank to supplement an existing monitoring well (MW-1) and to facilitate periodic groundwater monitoring in this area.

In February 1994, National Grid agreed to conduct a focused Resource Conservation and Recovery Act (RCRA) Facility Assessment- (RFA-) type soil and groundwater investigation, and a Focused Risk Assessment/ Corrective Measures Study (FRA/CMS) to address the concerns identified by the RFA.

During Fall 1994, National Grid conducted soil and groundwater investigation activities in accordance with the NYSDEC-approved *Soil and Groundwater Investigation Work Plan* (1994). These investigations showed the presence of several volatile organic compounds (VOCs) and polychlorinated biphenyls (PCBs) in groundwater at concentrations above NYSDEC Division of Water Technical and Operational Guidance Series (TOGS) 1.1.1 – *Ambient Water Quality Standards and Guidance Values* (NYSDEC, 1998, amended 2000). Based on these results, NYSDEC requested implementation of the quarterly groundwater monitoring program proposed in the *SWMU #7 Soil/Groundwater Investigation Report* (1994).

**Periodic Review Report – National Grid Dewey/Kensington Service Center (Site #915144)
Reporting Period – November 01, 2024 to November 01, 2025**

The *SWMU #7 Focused Risk Assessment and Corrective Measures Study Report* (FRA/CMS Report) (1995, revised 1996) concluded that the limited action alternative (i.e., implementing a groundwater monitoring program) would adequately meet the corrective measure objective of mitigating the offsite migration of impacted groundwater. Following the initial submittal of the FRA/CMS Report, a *Groundwater Sampling and Analysis Plan* (SAP) (1996) was submitted to NYSDEC in May 1996. The May 1996 SAP was then revised based upon NYSDEC comments, and the revised SAP for the groundwater monitoring program was presented in the revised FRA/CMS Report dated June 1996.

In November 1997, National Grid entered into a Consent Order with NYSDEC to guide future site monitoring and to establish a framework for implementing additional site investigation or remediation. As mandated in the Consent Order, annual (fall) groundwater monitoring events are conducted at SWMU #7 monitoring wells. The list of wells sampled during each groundwater monitoring event has been modified through time in response to NYSDEC requirements and the results of investigation/evaluation activities, as agreed to by NYSDEC.

The Consent Order specifies that a contingency plan must be implemented to evaluate additional remedial activities if analytical results from monitoring wells located at the property boundary indicate an exceedance of NYSDEC groundwater quality standards presented in TOGS 1.1.1 for two consecutive monitoring events. The monitoring wells designated as property boundary wells have changed, as new monitoring wells have been installed as part of the contingency plan implementation. For example, monitoring wells MW-7 and MW-9 were designated as property boundary wells in the Consent Order. In 1999, the property boundary wells included monitoring wells MW-6, MW-7, MW-11, MW-12, and MW-14. The current property boundary well arrangement includes monitoring wells MW-6, MW-11, MW-12, MW-20, MW-21, and MW-24 (installed spring 2002).

III. Evaluate Remedy Performance, Effectiveness, and Protectiveness

- A. **Evaluation of Remedy Performance** - The wells are part of the remedy performance. However, there is no current requirement for a site inspection of the existing facility buildings, fences, or fuel tanks. Based on the well inspections and analytical data, the remedy performance has been effective in protecting facility workers and the public.

**Periodic Review Report – National Grid Dewey/Kensington Service Center (Site #915144)
Reporting Period – November 01, 2024 to November 01, 2025**

IV. IC/EC Plan Compliance Report

A. IC/EC Requirements and Compliance

1. IC/EC Controls

The ICs/ECs included:

- Semi-annual groundwater monitoring well inspections of the following wells: MW-1, MW-2, MW-5, MW-6, MW-7, MW-9, MW-10, MW-11, MW-12, MW-13, MW-15, MW-16, MW-17, MW-19, MW-20, MW-21, MW-24, MW-25, and ESI-1.
- Annual groundwater monitoring well sampling and analysis of the following wells: MW-1, MW-6, MW-9, MW-11, MW-12, MW-20, MW-21, MW-24. Wells MW-16 and ESI-1 will be sampled for volatile organic compounds if LNAPL is not detected.

2. IC/EC Goals - Each goal is being met and/or working effectively.

3. IC/EC Corrective Measures – No deficiencies were noted during the semi-annual inspections, or during the inspection completed during the June 2025 monitoring event.

4. IC/EC Conclusions/Recommendations – The program is in compliance and there are no recommendations at this time. During the June 2025 monitoring event, all monitoring wells that were sampled (MW-1, MW-6, MW-9, MW-11, MW-12, MW-20, MW-21, and MW-24) exhibited concentrations below laboratory detection limits for PCBs.

B. IC/EC Certification – Refer to PRR Form - **Attachment 1**, for the certification.

V. Monitoring Plan Compliance Report – The next Annual Monitoring Report will be submitted to the NYSDEC by November 30, 2026.

VI. Operation & Maintenance (O&M) Plan Compliance Report - Not Applicable

VII. Overall PRR Conclusions and Recommendations

A. Compliance with Site Management Plan (SMP)

- 1. Requirements** - All IC/EC Plan requirements were met during this reporting period.
- 2. Exposure Pathways** – There are no new completed exposure pathways resulting in unacceptable risk.

**Periodic Review Report – National Grid Dewey/Kensington Service Center (Site #915144)
Reporting Period – November 01, 2024 to November 01, 2025**

3. **Proposed Plans and Schedule to Meet Compliance** – No plan proposed.

B. Performance and Effectiveness of the Remedy – The remedy as described by the Consent Order and executed by National Grid has been effective in meeting the program goals.

C. Future PRR Submittals – The frequency of PRR Submittals should remain annual. Therefore, the next PRR submittal deadline will be December 1, 2026.

VIII. Additional Guidance – Additional relevant activities conducted at the site during the reporting period covered under this PRR include the installation of a new substation, catch basin and lift gate repairs, storm sewer improvements, and renovations to Building 2's bathroom. No sheen, hazardous materials, or slag were unearthed during any of these excavations. These additional activities are discussed below.

A. Station 162

Excavation was required to install a new substation and associated electrical equipment north of Building 14 (DK-14, Figure 2). Although this area was not previously identified as a solid waste management unit (SWMU), NYSDEC was notified of initial excavation activities on April 15, 2024, via email and verification was confirmed by Environmental Program Specialist 1, Division of Environmental Remediation (Megan Kuczka).

For this reporting period, the following waste was generated:

1. Approximately 1,060 tons of excavated material were shipped to Waste Management Chaffee Landfill in Chaffee, New York between November 18, 2024, and November 6, 2025. Waste profiles for excavation spoils were created based on samples collected on December 21, 2022, and included in the 2023 PRR.
2. 57 drums of material derived from grounding electrode installation were shipped Reworld disposal facility in Niagara Falls, New York on November 25, 2024.

Manifests and associated documentation for waste generated by the excavation activities are included in **Attachment 3**.

Requests to Import/Reuse Fill or Soil were submitted to NYSDEC and approved on April 11 and June 20, 2024. The approval letter is included in the 2024 PRR.

B. Catch Basin Repair

Excavation was necessary in order to repair a damaged catch basin west of Building 19 (DK-19, Figure 2). NYSDEC was notified of excavation activities on November 21, 2024, via email and verification was confirmed by Megan Kuczka.

**Periodic Review Report – National Grid Dewey/Kensington Service Center (Site #915144)
Reporting Period – November 01, 2024 to November 01, 2025**

No subsurface soil was disturbed during project activities. No imported backfill was required during restoration activities.

C. Lift Gate Replacement

Excavation was anticipated but not necessary in order to replace a lift gate in Building 14 (DK-14, Figure 2). NYSDEC was notified of excavation activities on January 29, 2025, via email and verification was confirmed by Megan Kuczka.

No subsurface soil was disturbed during project activities. No imported backfill was required during restoration activities.

D. Storm Sewer Improvements

Excavation was necessary in order to repair storm sewer infrastructure in 2 areas (north of DK-4 and north of DK-3, Figure 2). NYSDEC was notified of pre-construction waste characterization soil boring activities on July 18, 2025, and on August 5, 2025, for excavation activities, via email. Verification was confirmed via email by Megan Kuczka (July 18, 2025, and August 5, 2025, respectively).

The Area 4 storm sewer repairs, mentioned in the July and August 2025 notification emails to the NYSDEC were not completed during this reporting period. These repairs are tentatively scheduled for Spring 2026, and a notification to the NYSDEC will be made prior to the start of work.

Waste characterization samples of subsurface soil were collected via soil borings in excavation areas (see samples DK-SS-Area 1.2 and DK-SS-Area 2.2 in the Paradigm Analytical Report 253458, included in **Attachment 4**). Additional samples included in the Paradigm Analytical report 253458 were collected for potential waste characterization in Area 2 (DK-SS-Area-2.1) and for Area 4 (DK-SS-Area-4.1 and DK-SS-Area-4.2).

For this reporting period, the following waste was generated:

1. Approximately 273 tons of excavated material were shipped to Waste Management Chaffee Landfill in Chaffee, New York between September 2, 2025 and September 8, 2025.

Waste manifests and associated disposal documentation for material generated by the excavation activities are included in **Attachment 4**.

Requests to Import/Reuse Fill or Soil were submitted to NYSDEC (**Attachment 4**) on August 28, 2025, and approved August 28, 2025, via email. Only approved materials were used for backfill on this project.

E. Building 2 Bathroom Renovation

**Periodic Review Report – National Grid Dewey/Kensington Service Center (Site #915144)
Reporting Period – November 01, 2024 to November 01, 2025**

Excavation was necessary for bathroom renovations inside Building 2 (DK-2, Figure 2). NYSDEC was notified of excavation activities on July 1, 2025, via email. Verification was confirmed via email by Megan Kuczka on July 18, 2025.

The excavated material was containerized, staged onsite, and sampled for waste characterization purposes on September 5, 2025. The Paradigm Analytical Report 25430 is included in **Attachment 5**.

For this reporting period, the following waste was generated:

- 15.81 tons of excavated material were shipped to Waste Management Chaffee Landfill in Chaffee, New York on September 22, 2025.

Waste manifests and associated disposal documentation for material generated by the excavation activities are included in **Attachment 5**.

Requests to Import/Reuse Fill or Soil were submitted to NYSDEC (**Attachment 5**) on August 28, 2025, and approved August 28, 2025, via email.

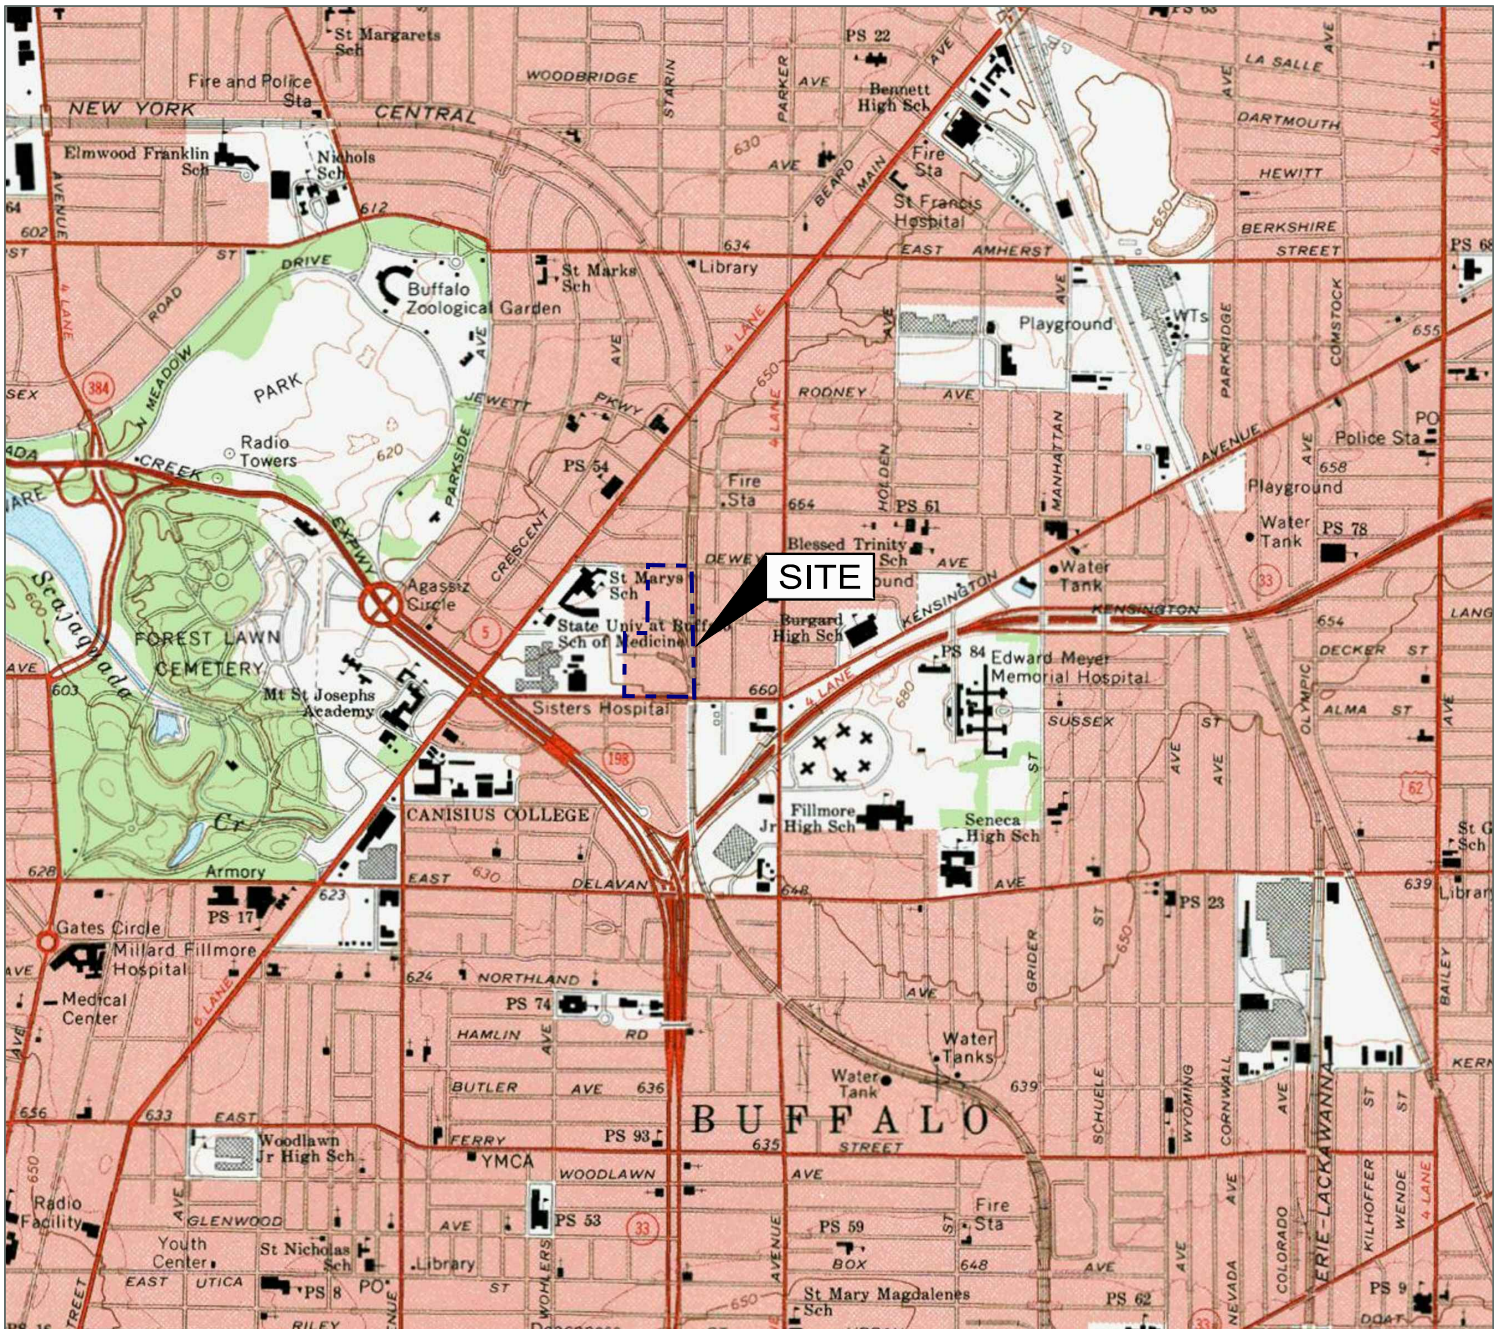

F. DK-21 SWMU Assessment

As summarized in the 2024 PRR, National Grid completed site characterization activities and conducted a pre-design investigation to define the horizontal and vertical extent of PCBs in soil within an outdoor storage yard area northeast of building DK-21. Potential technologically enhanced naturally occurring radioactive materials (TENORM) in the storage yard area were also evaluated as part of the PDI.

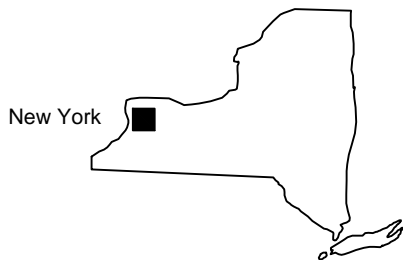

On December 18, 2024, National Grid submitted a self-implementing cleanup plan (SIP) for addressing PCBs in the DK21 storage yard area in accordance with the self-implementing cleanup option presented in Title 40 of the Code of Federal Regulations (40 CFR) Part 761.61(a). USEPA comments on the SIP were discussed during a conference call on March 28, 2025, attended by personnel from the USEPA, National Grid, and Arcadis of New York, Inc. (Arcadis). National Grid's response to the USEPA comments discussed during the March 28, 2025, call was presented in an April 21, 2025, letter to the agency. In response to a request from the USEPA, a revised SIP was submitted on July 17, 2025, and minor additional agency comments were transmitted in a July 30 e-mail. The revised SIP was subsequently presented to the agency on August 19, 2025, and final USEPA approval of the SIP was provided in a September 9, 2025, letter from the agency (**Attachment 6**).

Arcadis is completing a 95% Remedial Design Report to implement the remedial activities as outlined in the USEPA-approved SIP. The report is currently under review by National Grid.

Periodic Review Report (PRR) Certification Statements

1. I certify by checking "YES" below that:

a) the Periodic Review report and all attachments were prepared under the direction of, and reviewed by, the party making the Engineering Control certification;

b) to the best of my knowledge and belief, the work and conclusions described in this certification are in accordance with the requirements of the site remedial program, and generally accepted engineering practices; and the information presented is accurate and complete.

YES NO

2. For each Engineering control listed in Box 4, I certify by checking "YES" below that all of the following statements are true:

(a) The Engineering Control(s) employed at this site is unchanged since the date that the Control was put in-place, or was last approved by the Department;

(b) nothing has occurred that would impair the ability of such Control, to protect public health and the environment;

(c) access to the site will continue to be provided to the Department, to evaluate the remedy, including access to evaluate the continued maintenance of this Control;

(d) nothing has occurred that would constitute a violation or failure to comply with the Site Management Plan for this Control; and

(e) if a financial assurance mechanism is required by the oversight document for the site, the mechanism remains valid and sufficient for its intended purpose established in the document.

YES NO

IF THE ANSWER TO QUESTION 2 IS NO, sign and date below and DO NOT COMPLETE THE REST OF THIS FORM. Otherwise continue.

Periodic Review Report – National Grid Dewey/Kensington Service Center (Site #915144)
Reporting Period – November 01, 2024 to November 01, 2025

**Attachment 4 – Waste Manifests, Analytical Data Reports, and Requests to Import
Soil Form from Storm Sewer Improvements**

PARADIGM
ENVIRONMENTAL SERVICES, INC.

Analytical Report For

National Grid

For Lab Project ID

253458

Referencing

WO# 90000027250 (DK-Storm Sewer)

Prepared

Friday, July 25, 2025

Any noncompliant QC parameters or other notes impacting data interpretation are flagged or documented on the final report or are noted below.

Emily Farmer

Certifies that this report has been approved by the Technical Director or Designee

179 Lake Avenue • Rochester, NY 14608 • (585) 647-2530 • Fax (585) 647-3311 • ELAP ID# 10958

This report is part of a multipage document and should only be evaluated in its entirety. The Chain of Custody provides additional sample information, including compliance with the sample condition requirements upon receipt.

Client: National Grid

Project Reference: WO# 90000027250 (DK-Storm Sewer)

Analytical Report Appendix

The reported results relate only to the samples as they have been received by the laboratory.

Each page of this document is part of a multipage report. This document may not be reproduced except in its entirety, without the prior consent of Paradigm Environmental Services, Inc.

All soil/sludge samples have been reported on a dry weight basis, unless qualified "reported as received". Other solids are reported as received.

Low level Volatiles blank reports for soil/solid matrix are based on a nominal 5 gram weight. Sample results and reporting limits are based on actual weight, which may be more or less than 5 grams.

The Chain of Custody provides additional information, including compliance with sample condition requirements upon receipt. Sample condition requirements are defined under the 2003 NELAC Standard, sections 5.5.8.3.1 and 5.5.8.3.2.

NYSDOH ELAP does not certify for all parameters. Paradigm Environmental Services or the indicated subcontracted laboratory does hold certification for all analytes where certification is offered by ELAP unless otherwise specified. Aliquots separated for certain tests, such as TCLP, are indicated on the Chain of Custody and final reports with an "A" suffix.

Data qualifiers are used, when necessary, to provide additional information about the data. This information may be communicated as a flag or as text at the bottom of the report. Please refer to the following list of analyte-specific, frequently used data flags and their meaning:

"<" = Analyzed for but not detected at or above the quantitation limit.

"E" = Result has been estimated, calibration limit exceeded.

"H" = Denotes a parameter analyzed outside of holding time.

"Z" = See case narrative.

"D" = Sample, Laboratory Control Sample, or Matrix Spike Duplicate results above Relative Percent Difference limit.

"M" = Matrix spike recoveries outside QC limits. Matrix bias indicated.

"B" = Method blank contained trace levels of analyte. Refer to included method blank report.

"J" = Result estimated between the quantitation limit and half the quantitation limit.

"L" = Laboratory Control Sample recovery outside accepted QC limits.

"P" = Concentration differs by more than 40% between the primary and secondary analytical columns.

"NC" = Not calculable. Applicable to RPD if sample or duplicate result is non-detect or estimated (see primary report for data flags). Applicable to MS if sample is greater or equal to ten times the spike added. Applicable to sample surrogates or MS if sample dilution is 10x or higher.

"" = Indicates any recoveries outside associated acceptance windows. Surrogate outliers in samples are presumed matrix effects. LCS demonstrates method compliance unless otherwise noted.*

"(1)" = Indicates data from primary column used for QC calculation.

"A" = denotes a parameter for which ELAP does not offer approval as part of their laboratory certification program.

"F" = denotes a parameter for which Paradigm does not carry certification, the results for which should therefore only be used where ELAP certification is not required, such as personal exposure assessment.

This report is part of a multipage document and should only be evaluated in its entirety. The Chain of Custody provides additional sample information, including compliance with the sample condition requirements upon receipt.

GENERAL TERMS AND CONDITIONS

LABORATORY SERVICES

These Terms and Conditions embody the whole agreement of the parties in the absence of a signed and executed contract between the Laboratory (LAB) and Client. They shall supersede all previous communications, representations, or agreements, either verbal or written, between the parties. The LAB specifically rejects all additional, inconsistent, or conflicting terms, whether printed or otherwise set forth in any purchase order or other communication from the Client to the LAB. The invalidity or unenforceability in whole or in part of any provision, term or condition hereof shall not affect in any way the validity or enforceability of the remainder of the Terms and Conditions. No waiver by LAB of any provision, term, or condition hereof or of any breach by or obligation of the Client hereunder shall constitute a waiver of such provision, term, or condition on any other occasion or a waiver of any other breach by or obligation of the Client. This agreement shall be administered and interpreted under the laws of the state which services are procured.

Warranty.

Recognizing that the nature of many samples is unknown and that some may contain potentially hazardous components, LAB warrants only that it will perform testing services, obtain findings, and prepare reports in accordance with generally accepted analytical laboratory principles and practices at the time of performance of services. LAB makes no other warranty, express or implied.

Scope and Compensation.

LAB agrees to perform the services described in the chain of custody to which these terms and conditions are attached. Unless the parties agree in writing to the contrary, the duties of LAB shall not be construed to exceed the services specifically described. LAB will use LAB default method for all tests unless specified otherwise on the Work Order.

Payment terms are net 30 days from the date of invoice. All overdue payments are subject to an interest charge of one and one-half percent (1-1/2%) per month or a portion thereof. Client shall also be responsible for costs of collection, including payment of reasonable attorney fees if such expense is incurred. The prices, unless stated, do not include any sale, use or other taxes. Such taxes will be added to invoice prices when required.

Prices.

Compensation for services performed will be based on the current Lab Analytical Fee Schedule or on quotations agreed to in writing by the parties. Turnaround time based charges are determined from the time of resolution of all work order questions. Testimony, court appearances or data compilation for legal action will be charged separately. Evaluation and reporting of initial screening runs may incur additional fees.

Limitations of Liability.

In the event of any error, omission, or other professional negligence, the sole and exclusive responsibility of LAB shall be to re-perform the deficient work at its own expense and LAB shall have no other liability whatsoever. All claims shall be deemed waived unless made in writing and received by LAB within ninety (90) days following completion of services.

LAB shall have no liability, obligation, or responsibility of any kind for losses, costs, expenses, or other damages (including but not limited to any special, direct, incidental or consequential damages) with respect to LAB's services or results.

All results provided by LAB are strictly for the use of its clients and LAB is in no way responsible for the use of such results by clients or third parties. All reports should be considered in their entirety, and LAB is not responsible for the separation, detachment, or other use of any portion of these reports. Client may not assign the lab report without the written consent of the LAB.

Client covenants and agrees, at its/his/her sole expense, to indemnify, protect, defend, and save harmless the LAB from and against any and all damages, losses, liabilities, obligations, penalties, claims, litigation, demands, defenses, judgments, suits, actions, proceedings, costs, disbursements and/or expenses (including, without limitation attorneys' and experts' fees and disbursements) of any kind whatsoever which may at any time be imposed upon, incurred by or asserted or awarded against client relating to, resulting from or arising out of (a) the breach of this agreement by this client, (b) the negligence of the client in handling, delivering or disclosing any hazardous substance, (c) the violation of the Client of any applicable law, (d) non-compliance by the Client with any environmental permit or (e) a material misrepresentation in disclosing the materials to be tested.

Hazard Disclosure.

Client represents and warrants that any sample delivered to LAB will be preceded or accompanied by complete written disclosure of the presence of any hazardous substances known or suspected by Client. Client further warrants that any sample containing any hazardous substance that is to be delivered to LAB will be packaged, labeled, transported, and delivered properly and in accordance with applicable laws.

Sample Handling.

Prior to LAB's acceptance of any sample (or after any revocation of acceptance), the entire risk of loss or of damage to such sample remains with Client. Samples are accepted when receipt is acknowledged on chain of custody documentation. In no event will LAB have any responsibility for the action or inaction of any carrier shipping or delivering any sample to or from LAB premises.

Client authorizes LAB to proceed with the analysis of samples as received by the laboratory, recognizing that any samples not in compliance with all current DOH-ELAP-NELAP requirements for containers, preservation or holding time will be noted as such on the final report.

Disposal of hazardous waste samples is the responsibility of the Client. If the Client does not wish such samples returned, LAB may add storage and disposal fees to the final invoice. Maximum storage time for samples is 30 days after completion of analysis unless modified by applicable state or federal laws. Client will be required to give the LAB written instructions concerning disposal of these samples.

LAB reserves the absolute right, exercisable at any time, to refuse to receive delivery of, refuse to accept, or revoke acceptance of any sample, which, in the sole judgment of LAB (a) is of unsuitable volume, (b) may be or become unsuitable for or may pose a risk in handling, transport, or processing for any health, safety, environmental or other reason whether or not due to the presence in the sample of any hazardous substance, and whether or not such presence has been disclosed to LAB by Client or (c) if the condition or sample date make the sample unsuitable for analysis.

Legal Responsibility.

LAB is solely responsible for performance of this contract, and no affiliated company, director, officer, employee, or agent shall have any legal responsibility hereunder, whether in contract or tort including negligence.

Assignment.

LAB may assign its performance obligations under this contract to other parties, as it deems necessary. LAB shall disclose to Client any assignee (subcontractor) by ELAP ID # on the submitted final report.

Force Majeure.

LAB shall have no responsibility or liability to the Client for any failure or delay in performance by LAB, which results in whole or in part from any cause or circumstance beyond the reasonable control of LAB. Such causes and circumstances shall include, but not limited to, acts of God, acts or orders of any government authority, strikes or other labor disputes, natural disasters, accidents, wars, civil disturbances, difficulties or delays in transportation, mail or delivery services, inability to obtain sufficient services or supplies from LAB's usual suppliers, or any other cause beyond LAB's reasonable control.

Law.

This contract shall be continued under the laws of the State of New York without regard to its conflicts of laws provision.

This report is part of a multipage document and should only be evaluated in its entirety. The Chain of Custody provides additional sample information, including compliance with the sample condition requirements upon receipt.

**NEW YORK STATE
DEPARTMENT OF ENVIRONMENTAL CONSERVATION**

Request to Import/Reuse Fill or Soil

This form is based on the information required by DER-10, Section 5.4(e) and 6NYCRR Part 360.13. Use of this form is not a substitute for reading the applicable regulations and Technical Guidance document.

SECTION 1 – SITE BACKGROUND

The allowable site use is:

Have Ecological Resources been identified?

Is this soil originating from the site?

How many cubic yards of soil will be imported/reused?

If greater than 1000 cubic yards will be imported, enter volume to be imported:

SECTION 2 – MATERIAL OTHER THAN SOIL

Is the material to be imported gravel, rock or stone?

Does it contain less than 10%, by weight, material that passes a size 100 sieve?

Is this virgin material from a permitted mine or quarry?

Is this material recycled concrete or brick from a DEC registered processing facility?

SECTION 3 - SAMPLING

Provide a brief description of the number and type of samples collected in the space below:

See attached for product data for Clean No. 1 Stone and certification from source of fill (New Enterprise Stone & Lime Co Inc)

Example Text: 5 discrete samples were collected and analyzed for VOCs. 2 composite samples were collected and analyzed for SVOCs, Inorganics & PCBs/Pesticides.

If the material meets requirements of DER-10 section 5.4(e)5 (other material), no chemical testing needed.

SECTION 3 CONT'D - SAMPLING

Provide a brief written summary of the sampling results or attach evaluation tables (compare to DER-10, Appendix 5):

Example Text: Arsenic was detected up to 17 ppm in 1 (of 5) samples; the allowable level is 16 ppm.

If Ecological Resources have been identified use the "If Ecological Resources are Present" column in Appendix 5.

SECTION 4 – SOURCE OF FILL

Name of person providing fill and relationship to the source:

Robert Warrington (New Enterprise Stone & Lime Co Inc)

Location where fill was obtained:

New Enterprise Stone & Lime Co., Inc - Wehrle Dr. Quarry

Identification of any state or local approvals as a fill source:

Facility DEC ID 9-1499-00064

If no approvals are available, provide a brief history of the use of the property that is the fill source:

Provide a list of supporting documentation included with this request:

**NYSDEC Permit ID 9-1499-00064, Sieve analysis, Mining Permit, New Enterprise Letter
Clean Fill Certification Letter**

The information provided on this form is accurate and complete.

Re: Sewer Improvement 144 Kensington Ave

Dear Jacob,

The Stone to be supplied to the above referenced project was extracted, crushed & screened at our Lancaster, NY facility. The material is produced from a virgin stone source, un-impacted by hazardous materials or contaminants and free of loom, organic matter including clay. The quarry is a NYSDOT approved source; the Wehrle Drive source number is 5-3R and our mining permit # is 90018.

Sincerely,

Robert Warrington

Date Sampled: 9/5/2025 14:00

Matrix: TCLP Extract

Date Received 9/8/2025

TCLP Mercury

Analyte	Result	Units	Regulatory Limit	Qualifier	Date Analyzed
Mercury	< 0.00200	mg/L	0.2		9/9/2025 14:52

The TCLP extraction temperature was outside of the method prescribed range.

Method Reference(s): EPA 7470A
EPA 1311
Preparation Date: 9/9/2025
Data File: Hg250909A

TCLP RCRA Metals (ICP)

Analyte	Result	Units	Regulatory Limit	Qualifier	Date Analyzed
Arsenic	< 0.500	mg/L	5		9/10/2025 08:13
Barium	< 0.500	mg/L	100		9/10/2025 08:13
Cadmium	< 0.0250	mg/L	1		9/10/2025 08:13
Chromium	< 0.500	mg/L	5		9/10/2025 08:13
Lead	< 0.500	mg/L	5		9/10/2025 08:13
Selenium	< 0.200	mg/L	1		9/10/2025 08:13
Silver	< 0.500	mg/L	5		9/10/2025 08:13

The TCLP extraction temperature was outside of the method prescribed range.

Method Reference(s): EPA 6010C
EPA 1311 / 3005A
Preparation Date: 9/9/2025
Data File: 250910A

Analytical Report Appendix

The reported results relate only to the samples as they have been received by the laboratory.

Each page of this document is part of a multipage report. This document may not be reproduced except in its entirety, without the prior consent of Paradigm Environmental Services, Inc.

All soil/sludge samples have been reported on a dry weight basis, unless qualified "reported as received". Other solids are reported as received.

Low level Volatiles blank reports for soil/solid matrix are based on a nominal 5 gram weight. Sample results and reporting limits are based on actual weight, which may be more or less than 5 grams.

The Chain of Custody provides additional information, including compliance with sample condition requirements upon receipt. Sample condition requirements are defined under the 2003 NELAC Standard, sections 5.5.8.3.1 and 5.5.8.3.2.

NYSDOH ELAP does not certify for all parameters. Paradigm Environmental Services or the indicated subcontracted laboratory does hold certification for all analytes where certification is offered by ELAP unless otherwise specified. Aliquots separated for certain tests, such as TCLP, are indicated on the Chain of Custody and final reports with an "A" suffix.

Data qualifiers are used, when necessary, to provide additional information about the data. This information may be communicated as a flag or as text at the bottom of the report. Please refer to the following list of analyte-specific, frequently used data flags and their meaning:

"<" = Analyzed for but not detected at or above the quantitation limit.

"E" = Result has been estimated, calibration limit exceeded.

"H" = Denotes a parameter analyzed outside of holding time.

"Z" = See case narrative.

"D" = Sample, Laboratory Control Sample, or Matrix Spike Duplicate results above Relative Percent Difference limit.

"M" = Matrix spike recoveries outside QC limits. Matrix bias indicated.

"B" = Method blank contained trace levels of analyte. Refer to included method blank report.

"J" = Result estimated between the quantitation limit and half the quantitation limit.

"L" = Laboratory Control Sample recovery outside accepted QC limits.

"P" = Concentration differs by more than 40% between the primary and secondary analytical columns.

"NC" = Not calculable. Applicable to RPD if sample or duplicate result is non-detect or estimated (see primary report for data flags). Applicable to MS if sample is greater or equal to ten times the spike added. Applicable to sample surrogates or MS if sample dilution is 10x or higher.

"" = Indicates any recoveries outside associated acceptance windows. Surrogate outliers in samples are presumed matrix effects. LCS demonstrates method compliance unless otherwise noted.*

"(1)" = Indicates data from primary column used for QC calculation.

"A" = denotes a parameter for which ELAP does not offer approval as part of their laboratory certification program.

"F" = denotes a parameter for which Paradigm does not carry certification, the results for which should therefore only be used where ELAP certification is not required, such as personal exposure assessment.

This report is part of a multipage document and should only be evaluated in its entirety. The Chain of Custody provides additional sample information, including compliance with the sample condition requirements upon receipt.

GENERAL TERMS AND CONDITIONS

LABORATORY SERVICES

These Terms and Conditions embody the whole agreement of the parties in the absence of a signed and executed contract between the Laboratory (LAB) and Client. They shall supersede all previous communications, representations, or agreements, either verbal or written, between the parties. The LAB specifically rejects all additional, inconsistent, or conflicting terms, whether printed or otherwise set forth in any purchase order or other communication from the Client to the LAB. The invalidity or unenforceability in whole or in part of any provision, term or condition hereof shall not affect in any way the validity or enforceability of the remainder of the Terms and Conditions. No waiver by LAB of any provision, term, or condition hereof or of any breach by or obligation of the Client hereunder shall constitute a waiver of such provision, term, or condition on any other occasion or a waiver of any other breach by or obligation of the Client. This agreement shall be administered and interpreted under the laws of the state which services are procured.

Warranty.

Recognizing that the nature of many samples is unknown and that some may contain potentially hazardous components, LAB warrants only that it will perform testing services, obtain findings, and prepare reports in accordance with generally accepted analytical laboratory principles and practices at the time of performance of services. LAB makes no other warranty, express or implied.

Scope and Compensation.

LAB agrees to perform the services described in the chain of custody to which these terms and conditions are attached. Unless the parties agree in writing to the contrary, the duties of LAB shall not be construed to exceed the services specifically described. LAB will use LAB default method for all tests unless specified otherwise on the Work Order.

Payment terms are net 30 days from the date of invoice. All overdue payments are subject to an interest charge of one and one-half percent (1-1/2%) per month or a portion thereof. Client shall also be responsible for costs of collection, including payment of reasonable attorney fees if such expense is incurred. The prices, unless stated, do not include any sale, use or other taxes. Such taxes will be added to invoice prices when required.

Prices.

Compensation for services performed will be based on the current Lab Analytical Fee Schedule or on quotations agreed to in writing by the parties. Turnaround time based charges are determined from the time of resolution of all work order questions. Testimony, court appearances or data compilation for legal action will be charged separately. Evaluation and reporting of initial screening runs may incur additional fees.

Limitations of Liability.

In the event of any error, omission, or other professional negligence, the sole and exclusive responsibility of LAB shall be to re-perform the deficient work at its own expense and LAB shall have no other liability whatsoever. All claims shall be deemed waived unless made in writing and received by LAB within ninety (90) days following completion of services.

LAB shall have no liability, obligation, or responsibility of any kind for losses, costs, expenses, or other damages (including but not limited to any special, direct, incidental or consequential damages) with respect to LAB's services or results.

All results provided by LAB are strictly for the use of its clients and LAB is in no way responsible for the use of such results by clients or third parties. All reports should be considered in their entirety, and LAB is not responsible for the separation, detachment, or other use of any portion of these reports. Client may not assign the lab report without the written consent of the LAB.

Client covenants and agrees, at its/his/her sole expense, to indemnify, protect, defend, and save harmless the LAB from and against any and all damages, losses, liabilities, obligations, penalties, claims, litigation, demands, defenses, judgments, suits, actions, proceedings, costs, disbursements and/or expenses (including, without limitation attorneys' and experts' fees and disbursements) of any kind whatsoever which may at any time be imposed upon, incurred by or asserted or awarded against client relating to, resulting from or arising out of (a) the breach of this agreement by this client, (b) the negligence of the client in handling, delivering or disclosing any hazardous substance, (c) the violation of the Client of any applicable law, (d) non-compliance by the Client with any environmental permit or (e) a material misrepresentation in disclosing the materials to be tested.

Hazard Disclosure.

Client represents and warrants that any sample delivered to LAB will be preceded or accompanied by complete written disclosure of the presence of any hazardous substances known or suspected by Client. Client further warrants that any sample containing any hazardous substance that is to be delivered to LAB will be packaged, labeled, transported, and delivered properly and in accordance with applicable laws.

Sample Handling.

Prior to LAB's acceptance of any sample (or after any revocation of acceptance), the entire risk of loss or of damage to such sample remains with Client. Samples are accepted when receipt is acknowledged on chain of custody documentation. In no event will LAB have any responsibility for the action or inaction of any carrier shipping or delivering any sample to or from LAB premises.

Client authorizes LAB to proceed with the analysis of samples as received by the laboratory, recognizing that any samples not in compliance with all current DOH-ELAP-NELAP requirements for containers, preservation or holding time will be noted as such on the final report.

Disposal of hazardous waste samples is the responsibility of the Client. If the Client does not wish such samples returned, LAB may add storage and disposal fees to the final invoice. Maximum storage time for samples is 30 days after completion of analysis unless modified by applicable state or federal laws. Client will be required to give the LAB written instructions concerning disposal of these samples.

LAB reserves the absolute right, exercisable at any time, to refuse to receive delivery of, refuse to accept, or revoke acceptance of any sample, which, in the sole judgment of LAB (a) is of unsuitable volume, (b) may be or become unsuitable for or may pose a risk in handling, transport, or processing for any health, safety, environmental or other reason whether or not due to the presence in the sample of any hazardous substance, and whether or not such presence has been disclosed to LAB by Client or (c) if the condition or sample date make the sample unsuitable for analysis.

Legal Responsibility.

LAB is solely responsible for performance of this contract, and no affiliated company, director, officer, employee, or agent shall have any legal responsibility hereunder, whether in contract or tort including negligence.

Assignment.

LAB may assign its performance obligations under this contract to other parties, as it deems necessary. LAB shall disclose to Client any assignee (subcontractor) by ELAP ID # on the submitted final report.

Force Majeure.

LAB shall have no responsibility or liability to the Client for any failure or delay in performance by LAB, which results in whole or in part from any cause or circumstance beyond the reasonable control of LAB. Such causes and circumstances shall include, but not limited to, acts of God, acts or orders of any government authority, strikes or other labor disputes, natural disasters, accidents, wars, civil disturbances, difficulties or delays in transportation, mail or delivery services, inability to obtain sufficient services or supplies from LAB's usual suppliers, or any other cause beyond LAB's reasonable control.

Law.

This contract shall be continued under the laws of the State of New York without regard to its conflicts of laws provision.

This report is part of a multipage document and should only be evaluated in its entirety. The Chain of Custody provides additional sample information, including compliance with the sample condition requirements upon receipt.

Request to Import/Reuse Fill or Soil

This form is based on the information required by DER-10, Section 5.4(e) and 6NYCRR Part 360.13. Use of this form is not a substitute for reading the applicable regulations and Technical Guidance document.

SECTION 1 – SITE BACKGROUND

The allowable site use is:

Have Ecological Resources been identified?

Is this soil originating from the site?

How many cubic yards of soil will be imported/reused?

If greater than 1000 cubic yards will be imported, enter volume to be imported:

SECTION 2 – MATERIAL OTHER THAN SOIL

Is the material to be imported gravel, rock or stone?

Does it contain less than 10%, by weight, material that passes a size 100 sieve?

Is this virgin material from a permitted mine or quarry?

Is this material recycled concrete or brick from a DEC registered processing facility?

SECTION 3 - SAMPLING

Provide a brief description of the number and type of samples collected in the space below:

See attached for product data for Clean No. 1 Stone and certification from source of fill (New Enterprise Stone & Lime Co Inc)

Example Text: 5 discrete samples were collected and analyzed for VOCs. 2 composite samples were collected and analyzed for SVOCs, Inorganics & PCBs/Pesticides.

If the material meets requirements of DER-10 section 5.4(e)5 (other material), no chemical testing needed.

SECTION 3 CONT'D - SAMPLING

Provide a brief written summary of the sampling results or attach evaluation tables (compare to DER-10, Appendix 5):

Example Text: Arsenic was detected up to 17 ppm in 1 (of 5) samples; the allowable level is 16 ppm.

If Ecological Resources have been identified use the "If Ecological Resources are Present" column in Appendix 5.

SECTION 4 – SOURCE OF FILL

Name of person providing fill and relationship to the source:

Robert Warrington (New Enterprise Stone & Lime Co Inc)

Location where fill was obtained:

New Enterprise Stone & Lime Co., Inc - Wehrle Dr. Quarry

Identification of any state or local approvals as a fill source:

Facility DEC ID 9-1499-00064

If no approvals are available, provide a brief history of the use of the property that is the fill source:

Provide a list of supporting documentation included with this request:

**NYSDEC Permit ID 9-1499-00064, Sieve analysis, Mining Permit, New Enterprise Letter
Clean Fill Certification Letter**

The information provided on this form is accurate and complete.

Re: Sewer Improvement 144 Kensington Ave

Dear Jacob,

The Stone to be supplied to the above referenced project was extracted, crushed & screened at our Lancaster, NY facility. The material is produced from a virgin stone source, un-impacted by hazardous materials or contaminants and free of loom, organic matter including clay. The quarry is a NYSDOT approved source; the Wehrle Drive source number is 5-3R and our mining permit # is 90018.

Sincerely,

Robert Warrington

PERMIT
Under the Environmental Conservation Law (ECL)

Permittee and Facility Information

Permit Issued To:

NEW ENTERPRISE STONE & LIME CO INC
NEW ENTERPRISE STONE & LIME CO INC
PO BOX 77

Facility Principal Reference Point: NYTM-E: 202.09 NYTM-N: 4762.37
Latitude: 42°57'20.5" Longitude: 78°39'07.8"

Authorized Activity: This permit authorizes the operation of a limestone quarry from a 678.3 acre permit term area within a 763.5 acre Life of Mine facility, with material processing by screens, crushers and wash plant. The reclamation objective is to create a lake surrounded by meadow habitat.

This permit includes an administrative revision to the overall Life of Mine acreage from 762 acres to 763.5 acres to account for newer and more accurate mapping.

Permit Authorizations

Mined Land Reclamation - Under Article 23, Title 27

Permit ID 9-1499-00064/00003 (Mined Land ID 90018)
Renewal Effective Date: 4/4/2022 Expiration Date: 4/3/2027

NYSDEC Approval

By acceptance of this permit, the permittee agrees that the permit is contingent upon strict compliance with the ECL, all applicable regulations, and all conditions included as part of this permit.

Re: Niagara Mohawk Power Corporation d/b/a National Grid, Dewey/Kensington Service Center, Buffalo, New York; Approval for Cleanup and Disposal of PCB Remediation Waste under 40 CFR §761.61(a), Approval for Characterization and Verification under 40 CFR §761.61(c) and Approval for Alternative Decontamination under 40 CFR §761.79(h)

Dear Mr. Stearns:

This is in response to the August 16, 2025 document entitled "Self-Implementing Cleanup and Disposal Notification for PCB Remediation Waste" prepared by Arcadis on behalf of Niagara Mohawk Power Corporation d/b/a National Grid (National Grid) for polychlorinated biphenyl (PCB)-contaminated soil in the outdoor storage area located northeast of Building DK-21 (the DK-21 storage yard) at the above-referenced site. This document will be referred to as the "Application." The PCB contaminated soil in the DK-21 storage yard is considered to be PCB remediation waste that is subject to the applicable cleanup levels under the federal regulations at 40 CFR §761.61(a)(4).

PCBs were detected in soils at estimated concentrations up to 50,000 parts per million (ppm). The proposed remedial action is excavation of PCB-contaminated soil above 100 ppm and on-site management of PCB-contaminated soil less than or equal to 100 ppm for low occupancy with implementation of a cap and deed restriction in accordance with 40 CFR §761.61(a)(7) and §761.61(a)(8), respectively. Soil containing PCBs greater than 50 ppm will be disposed of at a permitted hazardous waste facility in accordance with 40 CFR §761.61(a)(5)(i)(B)(2)(iii).

With the exception of the characterization and verification sampling requirements under 40 CFR Part 761 Subparts N and O, the proposed removal of PCB remediation waste meets the self-implementing cleanup and disposal requirements under 40 CFR §761.61(a). In addition, in accordance with 40 CFR §761.61(c), the United States Environmental Protection Agency (EPA) finds that the characterization

and proposed verification sampling is acceptable for the purposes of determining compliance with the low occupancy are PCB cleanup standards of less than or equal to 100ppm, with the implementation of a cap and deed restriction in accordance with 40 CFR §761.61(a)(7) and (8), respectively.

National Grid has also requested, in accordance with 40 CFR §761.79(h), approval for an alternative procedure and standard for decontamination of equipment and tools. Wipe samples will be collected for verification to confirm compliance with a decontamination standard of 10 micrograms per 100 square centimeters (i.e., the unrestricted use standard for non-porous surfaces previously in contact with liquid PCBs). EPA finds that the proposed alternative decontamination procedure is acceptable for the cleanup activities that will be performed in the DK-21 storage yard.

EPA hereby approves National Grid's Application, and it may proceed with the cleanup and disposal under 40 CFR §761.61(a) and (c) and the Application, subject to this Approval. This approval only specifies the applicable requirements under the Toxic Substances Control Act (TSCA) and does not cite to or make any determinations regarding the requirements that may be applicable under other federal, state, or local law. TSCA disposal requirements do not supersede other, more stringent, applicable federal, state or local laws.

Please note that this Approval does not constitute a determination by EPA that the transporters or the disposal facilities selected by National Grid are authorized to conduct the activities set forth in the Application. National Grid is responsible for ensuring that its selected transporters and disposal facilities are authorized to conduct any such activities in accordance with all applicable federal, state and local statutes and regulations.

Should you have any questions concerning this matter, please feel free to contact me at (212) 637-3315 or have your staff contact Sage Renninger at 212-637-3473 or at Renninger.sage@epa.gov.

Sincerely,

Ariel Iglesias, Director
Land, Chemicals and Redevelopment Division
