EC/BPDES Permit No. 21-10-E4054

Dear Ms. Surdej:

AVOX Systems Inc owns the subject property. Scott Figgie LLC (Scott Figgie) is currently responsible for certain environmental activities at that property, including compliance with Erie County/Buffalo Pollution Discharge Elimination System (EC/BPDES) Permit No. 21-10-E4054. Scott Figgie is pleased to provide you with the enclosed Second Quarter 2022 Discharge Monitoring Report for the groundwater remediation operation located on that property. This report is submitted in partial fulfillment of EC/BPDES Permit No. 21-10-E4054, effective October 1, 2021.

GSF Management Company LLC (GSF), an affiliate of Scott Figgie, is managing the remediation of groundwater on the subject property on behalf of Scott Figgie. Scott Figgie/GSF commissioned AECOM Technical Services, Inc. (AECOM), with an office located in Amherst, New York, to perform the required EC/BPDES quarterly sampling during the month of April 2022 and to prepare the enclosed report with the results.

Figures 1 and 2 in the report depict the entire groundwater collection and treatment system that is covered by the subject permit.

Comments

GWCT remedial system running at time of sample collection. The DPE system was partially off line to accommodate the September 2021 bioaugmentation injection. Samples collected at equally spaced intervals over an 8-hour period.

Maintained samples at <4 degrees C. Hand delivered samples to Eurofins Environment Testing Northeast, LLC (Amherst, NY) under COC for analysis. Requested laboratory to composite 40-ml samples and analyze for VOCs (8260C). Requested laboratory to analyze influent and effluent samples for TEH (1664A), TSS (SM 2540D), and pH (SM 4500 H+).

Receipt
The samples were received on 4/5/2022 5:35 PM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 5.3º C.

GC/MS VOA
Method 8260C: The following Volatile sample(s) was composited by the laboratory on 4/6/2022 as requested by the client: EFFLUENT (480-196421-1) and INFLUENT (480-196421-2). Regulatory defined guidance for in-laboratory compositing of samples, is currently not available. Laboratory sample compositing was performed using established project specifications and/or laboratory standard operating procedures.

Method 8260C: The continuing calibration verification (CCV) associated with batch 480-620665 recovered above the upper control limit for 2-Hexanone, trans-1,3-Dichloropropene, 4-Methyl-2-pentanone (MIBK) and 2-Butanone (MEK). The samples associated with this CCV were non-detects or below the reporting limits (RL) for the affected analytes; therefore, the data have been reported. The associated samples are impacted: EFFLUENT (480-196421-1), INFLUENT (480-196421-2) and Trip Blank (480-196421-3).

Method 8260C: The laboratory control sample (LCS) for analytical batch 480-620665 recovered outside control limits for the following analyte: 2-Hexanone. This analyte was biased high in the LCS and was not detected in the associated samples; therefore, the data have been reported. The associated samples are impacted: EFFLUENT (480-196421-1), INFLUENT (480-196421-2) and Trip Blank (480-196421-3).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

General Chemistry
Method SM 4500 H+ B: This analysis is normally performed in the field and has a method-defined holding time of 15 minutes. The following samples has been qualified with the "HF" flag to indicate analysis was performed in the laboratory outside the 15 minute timeframe: EFFLUENT (480-196421-1) and INFLUENT (480-196421-2).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.
