RE: Fourth Quarter 2023 Discharge Monitoring Report
Groundwater Remediation Operation
25A Walter Winter Drive, Lancaster, New York 14086
NYSDEC Site 9-15-149
EC/BPDES Permit No. 21-10-E4054

Dear Ms. Surdej:

AVOX Systems Inc owns the subject property. Scott Figgie LLC (Scott Figgie) is currently responsible for certain environmental activities at that property, including compliance with Erie County/Buffalo Pollution Discharge Elimination System (EC/BPDES) Permit No. 21-10-E4054. Scott Figgie is pleased to provide you with the enclosed Fourth Quarter 2023 Discharge Monitoring Report for the groundwater remediation operation located on that property. This report is submitted in partial fulfillment of EC/BPDES Permit No. 21-10-E4054, effective October 1, 2021.

GSF Management Company LLC (GSF), an affiliate of Scott Figgie, is managing the remediation of groundwater on the subject property on behalf of Scott Figgie. Scott Figgie/GSF commissioned AECOM Technical Services, Inc. (AECOM), with an office located in Buffalo, New York, to perform the required EC/BPDES quarterly sampling during the month of October 2023 and to prepare the enclosed report with the results.

Figures 1 and 2 in the report depict the entire groundwater collection and treatment system that is covered by the subject permit.

I certify under the penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the systems, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of a fine and imprisonment for known violations.

Scott Figgie or AVOX Systems Inc will continue to monitor the influent and effluent of the active remediation system located at the site on a quarterly basis. The next quarterly discharge monitoring report is due by February 29, 2024.

Ms. Laura Surdej November 8, 2023 Page 2

If you have any questions regarding this submittal, please do not hesitate to contact me or Troy Chute at the above address, or to send an email either to me at <a href="mailto:stuart.rixman@gsfmanagementco.com">stuart.rixman@gsfmanagementco.com</a> or to Mr. Chute at <a href="mailto:troy.chute@gsfmanagementco.com">troy.chute@gsfmanagementco.com</a>.

Very truly yours, Scott Figgie LLC

Strat l. Rixman

#### Notes:

SU standard units

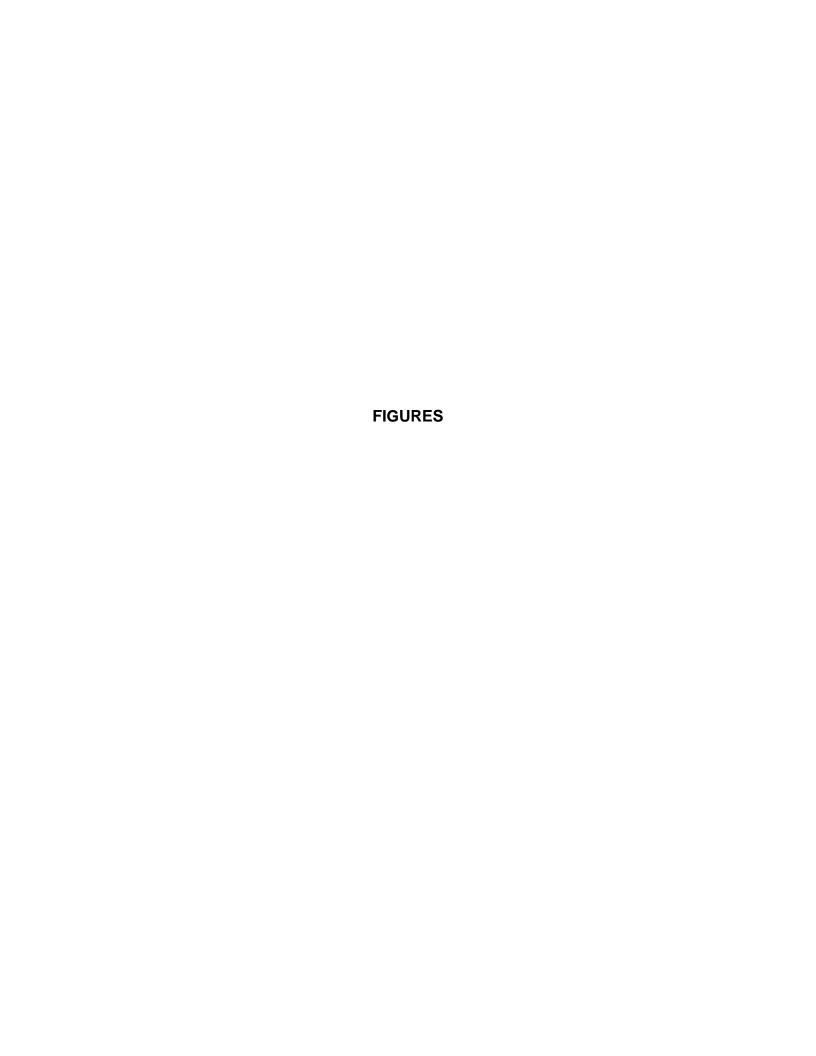

mg/L milligrams per liter

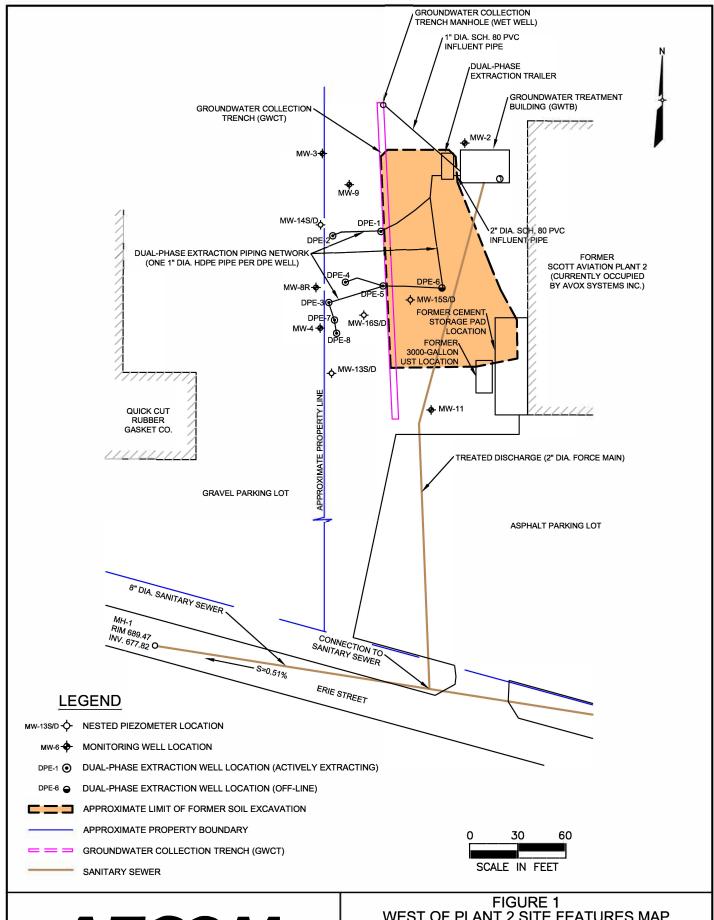

ug/L micrograms per liter

lbs/day pounds per day

J Indicates analyte result was reported as an estimated concentration.

(value) Indicates calculated concentration less than the reported value, using effluent reporting limit as maximum possible concentration.
 New totalizer installed following the 3Q23 compliance sampling event.

Water quality is clear with no discernable odor or sheen.

DPE and GWCT remedial systems running at time of sample collection. Samples collected at equally spaced intervals over an 8-hour period.

Maintained samples at <4 degrees C. Hand delivered samples to Eurofins Environment Testing Northeast, LLC (Amherst, NY) under COC for analysis. Requested laboratory to composite 40-ml samples and analyze for VOCs (8260C). Requested laboratory to analyze influent and effluent samples for TEH (1664A), TSS (SM 2540D), and pH (SM 4500 H+).

#### **Qualifiers**

#### **General Chemistry**

Qualifier **Qualifier Description** 

HF Parameter with a holding time of 15 minutes. Test performed by laboratory at client's request. Sample was analyzed outside of hold time.

J Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

#### **Glossary**

Abbreviation These commonly used abbreviations may or may not be present in this report. Listed under the "D" column to designate that the result is reported on a dry weight basis

%R Percent Recovery **CFL** Contains Free Liquid CFU Colony Forming Unit CNF Contains No Free Liquid

Duplicate Error Ratio (normalized absolute difference) DER

Dil Fac **Dilution Factor** 

Detection Limit (DoD/DOE) DΙ

DL, RA, RE, IN Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample

Decision Level Concentration (Radiochemistry) DLC

**EDL** Estimated Detection Limit (Dioxin) LOD Limit of Detection (DoD/DOE) LOQ Limit of Quantitation (DoD/DOE)

MCL EPA recommended "Maximum Contaminant Level" MDA Minimum Detectable Activity (Radiochemistry) MDC Minimum Detectable Concentration (Radiochemistry)

MDL Method Detection Limit MLMinimum Level (Dioxin) MPN Most Probable Number MQL Method Quantitation Limit

NC Not Calculated

ND Not Detected at the reporting limit (or MDL or EDL if shown)

NEG Negative / Absent POS Positive / Present

PQL **Practical Quantitation Limit** 

**PRES** Presumptive QC **Quality Control** 

Relative Error Ratio (Radiochemistry) RER

RL Reporting Limit or Requested Limit (Radiochemistry)

**RPD** Relative Percent Difference, a measure of the relative difference between two points

**TEF** Toxicity Equivalent Factor (Dioxin) Toxicity Equivalent Quotient (Dioxin) **TEQ** 

**TNTC** Too Numerous To Count

Job Narrative 480-213503-1

#### Receipt

The samples were received on 10/10/2023 9:00 AM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 2.7° C.

#### **GC/MS VOA**

Method 8260C: The continuing calibration verification (CCV) associated with batch 480-686907 recovered above the upper control limit for Isopropylbenzene. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are impacted: EFFLUENT (480-213503-1), INFLUENT (480-213503-2) and Trip Blank (480-213503-3).

Method 8260C: The following Volatile samples were composited by the laboratory on 10/11/23 as requested by the client: EFFLUENT (480-213503-1) and INFLUENT (480-213503-2).

Regulatory defined guidance for in-laboratory compositing of samples, is currently not available. Laboratory sample compositing was performed using established project specifications and/or laboratory standard operating procedures.

Method 8260C: The results reported for the following sample do not concur with results previously reported for this site: EFFLUENT (480-213503-1). Reanalysis was performed, and the result(s) confirmed.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### **General Chemistry**

Methods 9040B, 9040C, SM 4500 H+ B: This analysis is normally performed in the field and has a method-defined holding time of 15 minutes. The following samples has been qualified with the "HF" flag to indicate analysis was performed in the laboratory outside the 15 minute timeframe: EFFLUENT (480-213503-1) and INFLUENT (480-213503-2).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

|--|--------|---------|
| Question   | Answer | Comment |
| Radioactivity either was not measured or, if measured, is at or below background | True   |         |
| The cooler's custody seal, if present, is intact.                                | True   |         |
| The cooler or samples do not appear to have been compromised or tampered with.   | True   |         |
| Samples were received on ice.  | True   |         |
| Cooler Temperature is acceptable.  | True   |         |
| Cooler Temperature is recorded.  | True   |         |
| COC is present.  | True   |         |
| COC is filled out in ink and legible.  | True   |         |
| COC is filled out with all pertinent information.                                | True   |         |
| Is the Field Sampler's name present on COC?                                      | True   |         |
| There are no discrepancies between the sample IDs on the containers and the COC. | True   |         |
| Samples are received within Holding Time (Excluding tests with immediate HTs)    | True   |         |
| Sample containers have legible labels.   | True   |         |
| Containers are not broken or leaking.  | True   |         |
| Sample collection date/times are provided.                                       | True   |         |
| Appropriate sample containers are used.  | True   |         |
| Sample bottles are completely filled.  | True   |         |
| Sample Preservation Verified   | True   |         |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs | True   |         |
| VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.     | True   |         |
| If necessary, staff have been informed of any short hold time or quick TAT needs | True   |         |
| Multiphasic samples are not present.   | True   |         |
| Samples do not require splitting or compositing.                                 | True   |         |
| Sampling Company provided.   | True   |         |
| Samples received within 48 hours of sampling.                                    | True   | AECOM   |
| Samples requiring field filtration have been filtered in the field.              | True   |         |
| Chlorine Residual checked.   | N/A    |         |
