Re: Mr. C's Dry Cleaners Site, Contract # D004442.DC13, Site # 9-15-157
May 2010 Operations, Maintenance, and Monitoring Report

Dear Mr. Welling:

Ecology and Environment Engineering, P.C. (EEEPC) is pleased to provide the May 2010 Operations, Maintenance, and Monitoring (OM&M) Report for the Mr. C's Dry Cleaners Site, NYSDEC Site # 9-15-157, located in East Aurora, New York. Copies of weekly inspection reports prepared by EEEPC's subcontractor, Iyer Environmental Group, PLLC (IEG) are provided in Attachment A. Selected pages from the individual analytical data package prepared by Mitkem Laboratories, Inc. (MLI) on May 28, 2010 are provided as Attachment B. The full analytical report along with QA/QC information will be retained by EEEPC. Preliminary analytical data information for June 2010 were obtained from MLI for review of possible laboratory or bottle contamination issues are provided as Attachment C. Remedial treatment system utility costs for the Mr. C's and Agway sites are provided as Attachment D.

In review of the on-site treatment system operations, monitoring and maintenance for May 2010, EEEPC offers the following comments and highlights:

Operational Summary

Mr. C's Site – Remedial Operations Information

- Checklists for weekly system inspections from IEG are provided as Attachment A for 4/27, 5/3, 5/11, 5/19, 5/24, and 6/2/10.
- Based on the weekly inspection results performed by IEG, the remedial treatment system had a 94.44% operational up-time (Table 1) for May 2010 and the treatment of contaminated groundwater totaling of 322,174 gallons (Table 2). The 5% downtime was caused by a power outage due to a wind storm, which caused the system to shut down twice from May 8th to May 9th. IEG responded to the alarm to restart the system as soon as possible. The volume of groundwater processed during this time period was affected by pumping wells PW-7 and PW-8, which were shut down for repairs during the first two weeks of May.

Mr. William Welling PE, Project Manager

June 10, 2010

Page 2 of 3

- The analytical samples for the monthly compliance were taken on May 5, 2010. The sampling results were received by EEEPC on May 28, 2010. Excerpts from the Analytical Data package for the May 5, 2010 sampling event are presented in Attachment B.
- A review of the analytical data revealed the influent concentration to be 434.2 ug/L or 434.2 ppb, and 0.0 ug/L or 0.0 ppb of treated effluent. However, the treated effluent also contained 340 ug/L or 340 ppb of acetone and 310 ug/L or 310 ppb of 2-butanone that were not present in the influent sample. The summary of influent and effluent contaminant concentrations for May 2010 is presented in Table 4. Neither acetone nor 2-butanone are degradation byproducts of PCE, nor have they been detected in levels of this magnitude in samples before. It is suspected that their presence is due to laboratory or sample jar contamination. Preliminary analytical information was obtained from the June 2010 sampling event to determine if the results were consistent or only an anomaly based on bottle or laboratory contamination. The preliminary June 2010 analytical results are provided as Attachment C. The review of the preliminary June 2010 results indicates that acetone and 2-butanone are not detected in the effluent results, indicating either bottle or laboratory contamination. A further review by the laboratory on the May 2010 analytical data was inconclusive.
- Overall cleanup efficiency for the contaminants of concern at the site during the reporting period 4/27/10 to 6/2/10 was 100.00%. IEG cleaned pumping well RW-1 around the time of sample collection, which likely affected the decrease in contaminant concentrations, since this well has had consistently lower or non-detect concentrations of the contaminants of concern than the other pumping wells in the annual groundwater sampling.
- Although acetone and 2-butanone were observed in the effluent water sample from May 5, 2010, neither chemical has an applicable discharge criterion. The air stripper unit on the Mr. C's property is in compliance and MLI continues to provide analytical data to sub-ppb accuracy, supporting the accurate determination of effluent contaminant levels. The summary of Effluent Discharge Criteria & Analytical Compliance Results for May 2010 is presented in Table 3.
- The Mr. C's treatment system based on the total monthly flows has effectively removed 1.17 lbs of targeted contaminants from the groundwater below the site in the month of May 2010. The calculations and data for the month and entire year of 2010 are presented in Table 5.

The air stripper unit on Mr. C's property continues to be in compliance and provide analytical data to sub-ppb accuracy, supporting the accurate determination of effluent contaminant levels. Based on analytical results for the May 5, 2010 sampling event, the Mr. C's treatment system continues to effectively remove targeted contaminants from the groundwater below the site in accordance with the SPDES Equivalency permit.

Agway Site Remedial Information

- No current operational issues.

Mr. William Welling PE, Project Manager

June 10, 2010

Page 3 of 3

Subslab Depressurization Systems (SSDS) – First Presbyterian Church and 27 Whaley Ave. sites

- No current operational issues.

Mr. C's and Agway Energy Usage Information

A copy of the site utility costs from the Mr. C's and Agway remedial operations for May 2010 and year to date are provided as Attachment D.

If you have questions regarding the May 2010 OM&M report summary, please do not hesitate to contact me at 716-684-8060.

Very Truly Yours,
Ecology and Environment Engineering, P. C.

Manganese	2,000	$\mu\text{g/L}$	NA ⁹
Silver	100	$\mu\text{g/L}$	NA ⁹
Vanadium	28	$\mu\text{g/L}$	NA ⁹
Zinc	230	$\mu\text{g/L}$	NA ⁹
Total Dissolved Solids	830	mg/L	NA ⁹
Total Suspended Solids	20	mg/L	NA ⁹
Hardness	N/A	mg/L	590
Cyanide, Free	10	$\mu\text{g/L}$	NA ⁹

NOTES:

- "Daily Maximum" excerpted from Attachment E of Addendum 1 to the Construction Contract Documents dated October 2000.
- Analytical report did not differentiate between o-Xylene and m, p-Xylene. Total Xylene value reported is given in each line.
- Shaded cells indicate that analytical value exceeds the "Daily Maximum".
- "ND" indicates that the compound was not detected and lists the practical quantitation limit in parentheses.
- "NA" indicates that analyses were not performed and data is unavailable.
- Average flows based on effluent readings taken April 27, 2010 through June 2, 2010. Total gallons: 322,174 divided by 34 operating days (816 actual operating hours).
- "B" indicates an estimated value below the detection limit.
- Removed from the required analysis list by NYSDEC Region 9 in February 2005.

40 Indicates non-compliance with the NYSDEC effluent discharge requirements
NR Indicates Not Reported by Lab

Table 4

Mr. C's Dry Cleaners Site Remediation
NYSDEC Site #9-15-157
May 2010 VOC Analytical Summary

Compound	Based on the 5/5/10 Effluent Sampling Results		
	Influent Concentration*	Effluent Concentration*	Cleanup Efficiency**
	(ug/L)	(ug/L)	(%)
Acetone	ND (<20.0)	U	340
Benzene	ND (<4.0)	U	ND (<1.0)
2-Butanone	ND (<4.0)	U	310
cis-1, 2-Dichloroethene	16.0		ND (<1.0)
Methylene chloride	ND (<4.0)	U	ND (<1.0)
Methyl tert-butyl ether (MTBE)	5.2		ND (<1.0)
Tetrachloroethene	390.0		ND (<1.0)
Toluene	ND (<4.0)	U	ND (<1.0)
Trichloroethene	23.0		ND (<1.0)
Carbon Disulfide	ND (<4.0)	U	ND (<1.0)
1,1,2 Trichloro-1,2,2-trifluorotrithane	ND (<4.0)	U	ND (<1.0)
Cyclohexane	ND (<4.0)	U	ND (<1.0)
trans-1,2-dichloroethene	ND (<4.0)	U	ND (<1.0)
Methylcyclohexane	ND (<4.0)	U	ND (<1.0)
Methyl acetate	ND (<4.0)	U	ND (<1.0)
Total Xylenes	ND (<4.0)	U	ND (<1.0)
May 5, 2010 TOTALS (in ug/L) =	434.2	0.00	100.00%

Notes:

1. "NA" = Not applicable
2. "ND" or "U" = Compound analyzed, but was not detected. Detection limit in parentheses
3. "U" indicates an estimated value below the practical quantitation limit but above the method detection limit.
4. Non-detect values are assumed to be equal to zero for calculation of monthly average concentrations.
5. "D" = Compounds identified in analysis required secondary dilution factoring.
6. "B" indicates analyte found in the associated blank.

* (<50) - Detection Limit

** Contaminants of Concern only

SDG Narrative

Mitkem Laboratories submits the enclosed data package in response to Ecology & Environment, Inc's Mr. C's Dry Cleaners (Compliance) project. Under this deliverable, analyses results are presented for two aqueous samples that were received on May 6, 2010. Analyses were performed per specifications in the project's contract and the chain of custody form. Following the narrative is the Mitkem Work Order for cross-referencing client sample ID and laboratory sample ID.

The analyses were performed according to NYSDEC ASP protocols (2000 update) and reported per NYSDEC ASP requirement for Category A deliverable with the exception of hardness and pH. The analysis results for hardness and pH are presented in the standard Mitkem format.

The following observation and/or deviations are observed for the following analyses:

1. Overall observation:

The enclosed report includes the originals of all data with the exception of logbook pages and certain initial calibrations. Photocopies of logbook pages are included, with the originals maintained on file at the laboratory. The originals of initial calibrations that are shared among several cases are maintained on file at the laboratory, with photocopies included in the data package.

2. Volatile Analysis:

To meet specific project requirements, a 1 ppb standard was analyzed in the initial calibration to achieve a lower reporting limit. All the target analytes, with the exception of the ketones have been reported to 1 ppb. The ketones have been reported to 5 ppb.

Trap used for instrument V1: OI Analytical #10 trap containing 8 cm each of Tenax, silica gel and carbon molecular sieve.

GC column used: 30 m x 0.25 mm id (1.4 um film thickness) DB-624 capillary column.

Aqueous samples were hydrochloric acid preserved, pH <2.

Surrogate recovery: recoveries were within the QC limits.

Laboratory control sample: spike recoveries were within the QC limits.

Sample analysis: due to high concentration of tetrachloroethene, sample INFLUENT was analyzed at 4x dilution. Sample EFFLUENT was re-analyzed at 5x dilution. No other unusual observation was made for this analysis.

2. Wet Chemistry Analyses:

Sample analysis: no unusual observation was made for the analysis.

All pages in this report have been numbered consecutively, starting with the title page and ending with a page saying only "Last Page of Data Report".

I certify that this data package is in compliance, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this hardcopy data package has been authorized by the laboratory manager or his designee, as verified by the following signature.

1,2-Dibromoethane	ND		1.0	µg/L		1 06/08/2010 19:54	52153
Chlorobenzene	ND		1.0	µg/L		1 06/08/2010 19:54	52153
Ethylbenzene	ND		1.0	µg/L		1 06/08/2010 19:54	52153
Xylene (Total)	ND		1.0	µg/L		1 06/08/2010 19:54	52153
Styrene	ND		1.0	µg/L		1 06/08/2010 19:54	52153
Bromoform	ND		1.0	µg/L		1 06/08/2010 19:54	52153
Isopropylbenzene	ND		1.0	µg/L		1 06/08/2010 19:54	52153
1,1,2,2-Tetrachloroethane	ND		1.0	µg/L		1 06/08/2010 19:54	52153

Qualifiers:

ND - Not Detected at the Reporting Limit

J - Analyte detected below quantitation limits

B - Analyte detected via associated Method [B]

DF - Dilution Factor

S - Spike Recovery outside accepted recovery limits

R - RD outside accepted recovery limits

L - Value above quantitation range

RL - Reporting Limit

PRELIMINARY

Mitkem Laboratories

Date: 10-Jun-10

Client: Ecology and Environment Engineering P.C.
Client Sample ID: EFFLUENT
Lab ID: J1150-02

Project: Mr. C's Dry Cleaning
Collection Date: 06/02/10 15:00

Analyses	Result	Qual	RL	Units	DF	Date Analyzed	Batch ID

PRELIMINARY: Here are the preliminary results for your project submitted to Mitkem Laboratories. Please note: Data contained within this report have undergone preliminary review but may be subject to change pending final QA/QC review.

Qualifiers:

ND - Not Detected at the Reporting Limit

J - Analyte detected below quantitation limits

B - Analyte detected in the assistance Method B

DF - Dilution Factor

S - Spike Recovery outside accepted recovery limits

R - RPD outside accepted recovery limits

V - Value outside quantitation range

RL - Reporting Limit
