Re: Sale of 1130-1144 Niagara Street, Buffalo, NY
Our File No.: 04341-22491 G

Dear Linda:

As we discussed in our telephone conversation, enclosed please find the Phase I Environmental Site Assessment prepared for Rich Products Corporation in connection with their attempt to purchase the property at 1130 Niagara Street, Buffalo, NY. I have also given a copy of this document to our environmental attorney, John Kolaga.

If you have any questions on this matter, just let me know.

Very truly yours,

BROWN & KELLY, LLP
William P. Wiles

EXECUTIVE SUMMARY

Conestoga-Rovers & Associates (CRA) was retained by Rich Products Corporation (Rich Products) to complete a Phase I Environmental Site Assessment (ESA) of the Leisure Living Inc. (Leisure Living) property and buildings located at 1130 Niagara Street in Buffalo, New York (Property or Site). Rich Products is considering acquiring the Leisure Living property. The purpose of the Phase I ESA was to identify Recognized Environmental Conditions (RECs), as defined in ASTM Standard E152705 (the Standard), at the Site. In addition to identifying RECs at the Site, this ESA included an evaluation of specific non-scope considerations as defined in the Standard. This ESA was conducted to assist Rich Products in conducting all appropriate inquiries into previous ownership and use of the Site to qualify for specific landowner liability protections under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and to evaluate business environmental risk, as defined in the Standard, for the Site. The Phase I ESA Site inspection was conducted by CRA on April 7, 2009.

The Site consists of an approximate 3-acre parcel of land occupied by one 63,000 square-foot warehouse building and a 1,200 square-foot storage garage. The Site is currently owned by Leisure Living for use as a pool supply warehouse. Leisure Living is currently removing the Site's inventory to their new location.

FINDINGS & OPINION

Based on the Phase I ESA including the Site inspection, database search, historic records reviewed, information provided by Site personnel, and interviews, the following potential issues were identified regarding RECs, historic RECs, de minimis conditions, and business environmental risk as defined in the Standard, at the Site.

- i) **Historic Site Usage:** Based on the historic industrial Site usage since prior to 1889, chemicals and petroleum products have likely been used on the Site. There are Site features, including former floor drains, sumps, and an oil/water separator that could have acted as conduits for potential chemical releases to migrate into site soils and groundwater. Additionally, there is significant floor staining throughout the warehouse floor. There is insufficient evidence that a release to the environment occurred. Information regarding historic spills, use, storage or disposal of chemicals was not available. The unknown nature of historic chemical storage, usage, and disposal would not be considered an REC. However, consideration should be given to the potential presence of these

chemicals when evaluating business environmental risk and future uses of the Site.

- ii) **Potential Fire Fighting Runoff Impacts:** A fire occurred at Site on June 2, 2008. The portion of the building that burned down contained pool chemicals and vinyl pool liners. Water runoff from the fire fighting would likely have mobilized chemical contamination into the Site's soil. The NYSDEC issued spill number 0802424 to the Site because of these potential impacts. The spill number was closed on June 4, 2008; however, no confirmatory environmental samples were collected. Because of the lack of analytical data to prove no impacts occurred to Site soils and/or groundwater due to the fire fighting water runoff, the potential runoff impacts would be considered an REC.
- iii) **Historic UST Leaks:** According to the EDR database search the Site had three USTs that were previously located on-Site. The USTs were utilized by Curtis Screw. The USTs are listed as two 10,000-gallon #2 fuel oil USTs and one cutting oil UST of unknown capacity. A leak was detected in the fill port of the cutting oil UST in 1987, opening spill number 8707193. This spill number was closed on January 15, 1988. These USTs were removed on July 1, 1995 and during the removal activities, contamination was identified. This caused the NYSDEC to issue spill number 9504353. This spill was closed by the NYSDEC on July 17, 1995. The NYSDEC stated that residual contamination exists, but remedial action is not required at this time. The identified residual contamination from these removed UST would be considered an REC.
- iv) **Historic Residences:** The Site previously contained several residences. No information regarding the type of heating, UST or AST use, or the presence of a septic system, cesspool or water wells was available. While no evidence exists to identify this as an REC, insufficient information exists to evaluate potential adverse impact to soil and groundwater at the Site. Therefore, consideration should be given to these items as a business environmental risk.
- v) **Site Fill:** According to Site personnel, fill was brought on Site to fill the basement of the portion of the Site that was destroyed by fire. The source of this fill is unknown and there is no analytical data or certification that the source of this fill is clean. While no evidence exists to identify this as an REC, insufficient information exists to evaluate potential adverse impact to soil and groundwater at the Site. Therefore, consideration should be given to this item as a business environmental risk.

CONCLUSIONS

CRA has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard E152705 of the Leisure Living property located at 1130 Niagara Street in Buffalo, New York. Any exceptions to, or deletions from this practice are described in Section 1.0 of this report. This assessment has revealed no evidence of RECs at this Site, except for the following as described above:

- **Potential Fire Fighting Runoff Impacts; and**
- **Historic UST Leaks.**

BUSINESS ENVIRONMENTAL RISK

While not considered to be an REC, the following issues described above may have resulted in environmental impairment to the Site and should be considered when evaluating environmental risk associated with the Site:

- **Site Fill**
- **Historic Site Usage; and**
- **Historic Residences**

NONSCOPE CONSIDERATIONS

The following potential issues were identified regarding non-scope considerations:

- i) **Radon:** Estimated radon concentrations in Erie County are greater than 4 pCi/L, which is the level at which USEPA identifies that further evaluation is warranted. Potential radon levels should be considered based on planned use of the Site.
- ii) **LBP:** A LBP survey was not conducted as part of the Phase I ESA. Exterior building materials consist primarily of concrete, brick, metal, and glass. Most interior surfaces are painted. Chipped or flaking paint was observed in the warehouse area during the Site inspection. Additional painted surfaces may be present in areas not accessible during the Site inspection. Lead content of paint cannot be verified without laboratory analysis. The Site structure could potentially contain LBP based on construction occurring prior to 1949.

1.0 INTRODUCTION

Conestoga-Rovers & Associates (CRA) was retained by Rich Products Corporation (Rich Products) to complete a Phase I Environmental Site Assessment (ESA) of the Leisure Living Inc. (Leisure Living) property and building located at 1130 Niagara Street in Buffalo, New York (Property or Site). Rich Products is considering acquiring the Leisure Living property. The purpose of the Phase I ESA was to identify Recognized Environmental Conditions (RECs), as defined in ASTM Standard E1527-05 (the Standard), at the Site. In addition to identifying RECs at the Site, this ESA included an evaluation of specific non-scope considerations as defined in the Standard. This ESA was conducted to assist Rich Products in conducting all appropriate inquiries into previous ownership and use of the Site to qualify for specific landowner liability protections under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and to evaluate business environmental risk, as defined in the Standard, for the Site. The Phase I ESA Site inspection was conducted by CRA on April 7, 2009. A Site location map is provided on Figure 1. A Site plan is provided on Figure 2.

The Phase I ESA was conducted in general accordance with ASTM Standard E1527-05 for conducting environmental assessments. The assessment included an environmental database search, historical records review, a Site inspection of accessible areas, a review of relevant Site records made available to CRA, and interviews with individuals associated with the Site. No exceptions to the Standard were taken during this Phase I ESA, except that the interior of the storage garage was not inspected because no key could be located to open the garage. This Phase I ESA was prepared by John Raby and Brian Boevers of CRA, both of whom are considered environmental professionals as defined in the Standard. Copies of curricula vitae outlining their qualifications are contained in Appendix A.

The following tasks were conducted during the assessment:

- interviews with personnel associated with the Site;
- review of Federal and State environmental databases and historical records (e.g., fire insurance maps, city directory, etc.);
- review of historical aerial photographs of the Site;
- review of past and current property use and adjacent property occupancy;
- inspection of the facilities, equipment, utility services, operations, and associated Site records;
- observations of conditions that represent potential environmental concerns;

- review of chemical use and storage and spill/ release incidents;
- review of the results of prior inspections conducted at the Site;
- review of waste handling, accumulation, storage, and disposal practices;
- review of air emissions and wastewater discharges;
- review of equipment that potentially contain polychlorinated biphenyls (PCBs);
- observation of potential asbestos-containing materials (ACM);
- review of aboveground and underground storage tank records; and
- review of previous environmental reports prepared for the Site.

CRA relied on information received during the ESA interviews as accurate unless contradicted by written documentation or field observations.

The following report summarizes the information gathered by CRA during the Phase I ESA and identifies RECs, as defined in the Standard at the Site.

In addition to identifying RECs at the Site, this Phase I ESA included a preliminary evaluation of the following non-scope considerations as defined in the Standard:

- asbestos containing materials;
- lead based paint; and
- radon.

Evaluation of the Site for these criteria was performed for the purpose of providing a general indication of potential issues. This assessment does not serve as a substitute for an ACM, lead based paint, or radon survey.

The Phase I ESA has been prepared for the use of Rich Products and may not be relied upon by any other party without CRA's written consent.

2.0 SITE DESCRIPTION AND LOCATION

2.1 SITE DESCRIPTION

The Site structures consist of a 63,000 square-foot warehouse building and a 1,200 square-foot storage garage. The Site buildings are located on 3 parcels of land. The Site is bisected by Gull Street separating parcels 99.41-1-12 and 99.41-1-11 from parcel 99.41-1-3.1. The Site is currently owned by Leisure Living for use as a pool supply warehouse. Leisure Living is currently removing the Site's inventory to their new location. The property was initially developed prior to 1889 based on the information reviewed.

2.2 SITE LOCATION

The Site is located in a predominantly light industrial and residential area in the western portion of Buffalo, Erie County, New York. All of the active areas of the Site utilized for storage activities are located within the Site buildings or on asphalt-surfaced areas. General topographic gradient at the Site and surrounding area is to the west-northwest, based on the USGS topographic map and information provided in the database search.

The Site is bordered by the following properties:

- North: by Rich Products Corp. with Robert Rich Way and additional commercial properties located beyond;
- East: by Niagara Street with Rich Products Corp. and residential properties located beyond;
- South: by Oliver Gear with additional commercial properties located beyond and; and
- West: by railroad tracks with Interstate 190 and the Black Rock Canal located beyond.

3.0 **ENVIRONMENTAL DATABASES SEARCH AND HISTORICAL RECORDS REVIEW**

3.1 **ENVIRONMENTAL DATABASES SEARCH**

CRA contracted Environmental Data Resources, Inc. (EDR) to conduct a search of federal and state environmental databases. Based on the address of the Site, the database searches were completed to assist in the identification of conditions at the Site and within a radius distance specified in ASTM Standard E152705 as follows:

<i>Database</i>	<i>Search Radius</i>
National Priority List (NPL) - The NPL is a United States Environmental Protection Agency (USEPA) listing of the nation's worst uncontrolled or abandoned hazardous waste sites. NPL Sites are targeted for possible long-term remedial action under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980. In addition, the NPL Report includes information concerning cleanup agreements between the USEPA and potentially responsible parties, any liens filed against contaminated properties, as well as the past and current USEPA budget expenditures tracked within the Superfund Consolidated Accomplishments Plan (SCAP).	1 mile
Delisted NPL Database - The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.	1 mile
Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) - The CERCLIS List contains data on potentially hazardous waste sites that may have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of CERCLA. CERCLIS contains sites which are either proposed to or on the NPL and sites which are in the screening and assessment phase for possible inclusion on the NPL.	0.5 mile
CERCLIS No Further Remedial Action Planned (CERCLIS-NFRAP) - Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the NPL, unless information indicates this decision was not appropriate or other	0.5 mile

<i>Database</i>	<i>Search Radius</i>
<p>considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.</p>	
<p>Corrective Action Report (CORRACTS) - The CORRACTS Database identifies hazardous waste handlers with RCRA corrective action activity.</p>	1 mile
<p>Resource Conservation and Recovery Act Information (RCRA) Treatment, Storage or Disposal Facility (TSDF) - The RCRA-TSDF Database contains information regarding those facilities that treat, store, or dispose of USEPA-regulated hazardous waste. The following information also is included in the RCRA-TSDF Report: information regarding the status of facilities tracked by the RCRA Administrative Action Tracking System (RAATS); inspections and evaluations conducted by Federal and State Agencies; all reported facility violations, the environmental statutes violated and any proposed and actual penalties; and a complete listing of USEPA-regulated hazardous wastes which are generated or stored on site.</p>	0.5 mile
<p>RCRA Large Quantity Generator (RCRALQG) - The RCRALQG Database contains information regarding facilities that either generate more than 1,000 kilograms (kg) of USEPA-regulated hazardous waste per month or meet other applicable requirements of RCRA. The following information also is included in the RCRA-LQG Database: information regarding the status of facilities tracked by the RAATS; inspections and evaluations conducted by Federal and State Agencies; all reported facility violations, the environmental statutes violated and any proposed and actual penalties; information pertaining to corrective actions undertaken by the facility or the USEPA; and a complete listing of USEPA-regulated hazardous wastes which are generated or stored on site.</p>	Site/ Adjacent Property
<p>RCRA Small Quantity Generator (RCRASQG) - The RCRA-SQG Database contains information regarding facilities that either generate between 100 kg and 1,000 kg of USEPA-regulated hazardous waste per month or meet other applicable requirements of RCRA. The following information also is included in the RCRA-SQG Database: information regarding the status of facilities tracked by the RAATS; inspections and evaluations conducted by Federal and State Agencies; all reported facility violations, the environmental statutes violated and any proposed and actual penalties; information pertaining to corrective actions undertaken by the facility or the USEPA; and a complete listing of USEPA-regulated</p>	Site/ Adjacent Property

<i>Database</i>	<i>Search Radius</i>
hazardous wastes which are generated or stored on site.	
RCRA -Conditionally Exempt Small Quantity Generators (RCRA-CESQG) -RCRA Info is EPA's comprehensive information system, providing access to data supporting the RCRA of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the RCRA. CESQGs generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.	Site/ Adjacent Property
Emergency Response Notification System (ERNS) - ERNS records and stores information on reported releases of oil and hazardous substances	Site only
Toxic Chemical Release Inventory System (TRIS) - The TRIS Database identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.	Site only
US Engineering Controls - The US Engineering Controls Database is a listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or affect human health.	0.5 mile
US Institutional Controls - A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.	0.5 mile
US Brownfields List - Included in the listing are Brownfields properties addresses by Cooperative Agreement Recipients and Brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities -especially those without EPA Brownfields Assessment Demonstration Pilots -minimize the uncertainties of contamination often associated with Brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at Brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of Brownfields. Cooperative Agreement	0.5 mile

<i>Database</i>	<i>Search Radius</i>
<p>Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified Brownfields-related cleanup activities.</p>	
<p>Superfund (CERCLA) Consent Decrees (Consent) - Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.</p>	1 mile
<p>Records of Decision (ROD) -ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.</p>	1 mile
<p>Department of Defense (DOD) -This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.</p>	1 mile
<p>CERCLA Lien Information (LIENS 2) - A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.</p>	Site only
<p>Hazardous Substance Waste Disposal Site Inventory (HSWDS) - The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.</p>	0.5 mile

<i>Database</i>	<i>Search Radius</i>
Inactive Hazardous Waste Disposal Sites in New York State (SHWS) Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites.	1 mile
Solid Waste Facilities (SWF) Landfill (LF) Sites - The SWF/LF Database contains an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.	0.5 mile
Petroleum Bulk Storage (PBS) Database (UST) -Facilities that have petroleum storage capacities in excess of 1,100 gallons and less than 400,000 gallons.	Site/Adjacent Property
Chemical Bulk Storage Database (CBS UST) - Facilities that store regulated hazardous substances in underground tanks of any size.	Site/Adjacent Property
Major Oil Storage Facilities Database (MOSF UST) - Facilities that may be onshore facilities or vessels, with petroleum storage capacities of 400,000 gallons or greater.	Site/Adjacent Property
Historical Petroleum Bulk Storage Database (HIST UST) - These facilities have petroleum storage capacities in excess of 1,100 gallons and less than 400,000 gallons. This database contains detailed information per site. It is no longer updated due to the sensitive nature of the information involved. See UST for more current data.	Site/Adjacent Property
Spills Information Database (LTANKS) -Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills.	0.5 mile
Listing of Leaking Storage Tanks (HIST LTANKS) - A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database.	0.5 mile
Spills Information Database (Spills) - Data collected on spills reported to	Site only

<i>Database</i>	<i>Search Radius</i>
NYSDEC as required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.	
Engineering Controls (Eng Controls) - Environmental remediation sites that have engineering controls in place.	0.5 mile
Institutional Controls (Inst Controls) - Environmental remediation sites that have institutional controls in place.	0.5 mile
Voluntary Cleanup Program Sites (VCP) - New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of Brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.	0.5 mile
Drycleaners - A listing of all registered drycleaner facilities.	0.25 mile
Brownfields - A Brownfield is any real property where redevelopment or re-use may be complicated by the presence or potential presence of a hazardous waste, petroleum, pollutant, or contaminant.	0.5 mile
Environmental Restoration Program (ERP) Listing - In an effort to spur the cleanup and redevelopment of Brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.	0.5 mile
Indian Reservations - The Indian Reservations Database identifies Indian administered lands of the United States that have any area equal to or greater than 640 acres.	1 mile
Indian UST -The Indian UST Database identifies USTs on Indian land.	Site/Adjacent Property
Indian LUST -The Indian LUST Database identifies LUSTs on Indian land.	0.5 mile

A copy of the database search is included as Appendix B. The following is a summary of the databases searched with the findings as noted.

3.1.1 DATABASE LISTING FOR THE SITE

The Site address was listed in the following aforementioned databases searched with the status as noted.

<i>Property Address</i>	<i>Listed Entity</i>	<i>Listing/Status</i>
1130 Niagara Street	Curtis Screw Company, Inc.	Spills (Closed) UST (3 Removed) LTANKS (Closed) HIST LTANKS
1130 Niagara Street	Leisure Pool Supply	Spills (Closed)

In addition to the above, the Site address was listed in the FINDS, CBS AST, AST, Manifest, HIST AST, CBS, and RCRA-Non-Gen Databases.

Please refer to Section 4.0 for further details.

3.1.2 DATABASE LISTINGS FOR ADJACENT PROPERTIES

No adjacent properties were listed in any of the aforementioned databases searched.

3.1.3 ADDITIONAL AREA PROPERTIES

The following properties within the ASTM-designated radii of the Site were listed in the databases searched with the status as noted.

<i>Property Address</i>	<i>Listed Entity</i>	<i>Listing/ Status</i>
1073 Niagara Street (1/8 - 1/4 mile SSE)	Cosuma	LTANKS (Closed)
1073 Niagara Street (1/8 - 1/4 mile SSE)	Niagara-Fargo Sunoco	LTANKS (Closed) HIST LTANKS
Niagara Street (1/8 - 1/4 mile SSE)	Pratt and Lambert	LTANKS (Closed) HIST LTANKS
1318 Niagara Street (1/4 - 1/2 mile NNE)	Not Reported	ERP
1345 Niagara Street (1/4 - 1/2 mile NNE)	Buffalo Sewer Authority	CERCLIS-NFRAP
118 Hampshire Street (1/4 - 1/2 mile SE)	School #18	LTANKS (Closed)
35 Hampshire Street (1/4 - 1/2 mile SSE)	Ultimate Auto Service	LTANKS (Closed) HIST LTANKS
1315 Niagara Street (1/4 - 1/2 mile NNE)	Dickies Donuts	LTANKS (Closed) HIST LTANKS
1379 Niagara Street (1/4 - 1/2 mile NNE)	Hoffstetter Service	LTANKS (Closed) HIST LTANKS
1382 Niagara Street (1/2 - 1 mile NNE)	Chemcore, Inc.	SHWS

No RECs were identified with respect to the above-mentioned properties.

3.1.4 UNMAPPED PROPERTIES

In addition to the above, the database search identified a number of properties that could not be mapped by EDR based on the address information within the database system, also referred to as "orphan" sites in the database search results. A complete listing of the unmapped properties is included in Appendix B.

CRA reviewed the list of unmapped properties and confirmed that none of the listed properties are located adjacent to or in close proximity to the Site based on the available information.

3.2 HISTORICAL RECORDS REVIEW

CRA also reviewed the following information, where available, to identify the historical usage of the Site and adjacent properties:

- Sanborn Fire Insurance Maps;
- Environmental Lien Search;
- Historical Aerial Photographs;
- City Directories; and
- Historical Topographic Maps.

3.2.1 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance Maps assist in the identification of historical land use and commonly indicate the existence and location of ASTs and USTs, structures, improvements, and facility operations. Sanborn Maps were available from EDR and were reviewed by CRA for the years 1889, 1899, 1895, 1925, 1951, 1981, and 1986. Copies of available Sanborn Maps including the Site are presented in Appendix C. Following is a summary of observations based on review of the Sanborn maps.

1889: The 1889 Sanborn Map depicts the Site as having nine wood framed dwellings, a boarding house, and the Wiesbauer Manufacturing Company (Wiesbauer). Wiesbauer is located just south of Gull Street at the western edge of the Site. Wiesbauer utilized the Site for the sawing and planing of coverings for jewelry cases and manufacture of paper boxes. The Sanborn map states that the Wiesbauer's fuel was coal. Adjacent properties are predominately dwellings with railroad tracks located on the western Site boundary.

1899: The 1899 Sanborn Map depicts the Site and surrounding properties in a similar configuration as the 1889 Sanborn Map with the exception that Wiesbauer is now the Burns Typewriter Company (Burns). According to the information presented on the 1889 Sanborn Map Burns utilized the building's first floor as a machine shop and the second floor for assembly. The Burns facility heated with coal had an oil engine for power and had gas lights.

1925: The 1925 Sanborn Map depicts the Site as being developed with a mixture of dwellings and commercial properties. South of Gull Street the Site is developed with the Curtis Screw Company Inc. (Curtis) in the former

Wiesbauer / Burns buildings, four dwellings, a manufacturer of medical supplies, and a Contractors yard. Curtis conducted machining and had a coal shed on their portion of the Site. North of Gull Street the Site is developed with Lawler Iron Work, Inc., a store and eight dwellings. Lawler Iron Work, Inc., utilized their portion of the Site for foundry operations. The properties surrounding the Site are a mixture of residential and commercial uses. The commercial uses of the surrounding land are a garage, grain and feed supply house, stables, and hotels. The railroad tracks are still present to the west of the Site.

- 1951: The 1951 Sanborn Map depicts the Site, south of Gull Street as having the Curtis building expanded and the current Site building has been constructed. The listed use for the current Site building is an Auto Car Company truck sales and service operation in the eastern portion of the building and a restaurant and bowling alley in the western portion. North of Gull Street the Site is occupied by a building that contains hardening and annealing furnaces, a store and five dwellings. A.F. Oliver Gear and Machine Company (a machine shop) is now located directly to the south of the Site. The surrounding properties are more of commercial use than the 1925 Sanborn Map, however; dwellings are still located in the vicinity of the Site. The railroad tracks are still present to the west of the Site.
- 1981: The 1981 Sanborn Map depicts the Site as being occupied entirely by Curtis. The storage garage has been constructed north of Gull Street and the furnace building is also present. South of Gull Street two buildings are present; the current Site building and the historic Curtis building that was destroyed by fire in 2008. The area properties are entirely commercial. West of the railroad tracks Interstate 190 has been constructed.
- 1986: The 1986 Sanborn Map depicts the Site and surrounding properties in a similar configuration as the 1981 Sanborn Map.

The review of the Sanborn Maps shows industrial development since the late 1800s, and there are Site and area buildings which depicted uses that could indicate the potential for environmental impact to the Site.

3.2.2 PROPERTY TITLE SEARCH

Property title information was not available from Leisure Living or Rich Products.

3.2.3 HISTORICAL AERIAL PHOTOGRAPHS

Aerial photographs assist in the identification of Site features and outdoor activities of potential environmental concern. CRA contracted EDR to obtain aerial photographs of the Site and surrounding lands. Photographs for the years 1927, 1959, 1966, 1978, 1983, 1985, 1995, and 2006 were obtained. Following is a summary of observations based on the review of the aerial photographs.

- 1927 (scale 1" = 500'): The 1927 aerial photograph indicates that the Site is commercially developed; however, the aerial photograph has poor resolution and no significant observations can be made. The surrounding appears to be a mixture of commercial and residential properties.
- 1959 (scale 1" = 500'): The 1959 aerial photograph indicates that the Site is developed with the current Site building south of Gull Street and north of Gull Street has several buildings including the current garage. The surrounding appears to be a mixture of commercial and residential properties.
- 1966 (scale 1" = 500'): The 1966 aerial photograph indicates that the Site is developed similar to the 1959 aerial photograph south of Gull Street and only two buildings remain north of Gull Street. The surrounding appears to be a mixture of commercial and residential properties.
- 1978 (scale 1" = 833'): The 1978 aerial photograph depicts the Site and surrounding properties in a similar configuration to the 1966 aerial photograph.
- 1983 (scale 1" = 750'): The 1983 aerial photograph depicts the Site and surrounding properties in a similar configuration to the 1978 aerial photograph.
- 1985 (scale 1" = 1,000'): The 1985 aerial photograph depicts the Site and surrounding properties in a similar configuration to the 1983 aerial photograph.
- 1995 (scale 1" = 750'): The 1995 aerial photograph depicts the Site and surrounding properties in a similar configuration to the 1985 aerial photograph.
- 2006 (scale 1" = 505'): The 2006 aerial photograph depicts the Site and surrounding properties in a similar configuration to the 1995 aerial photograph, with the exception of the building north of Gull Street to the east has been removed.

Copies of the aerial photographs are included in Appendix D.

3.2.4 CITY DIRECTORIES

CRA contracted EDR to conduct a search of city directories from the earliest available directory to the present. Based on the address of the Site, the city directories search was completed to assist in the identification of historical occupants of the Site and adjacent properties. A copy of the directories search results is included as Appendix E.

Business directories including city, cross-reference and telephone directories were reviewed, at approximately five-year intervals for the years spanning 1938 through 2008. The address of 1130 Niagara Street is not listed until some time before 1957. Namor Products of NY Inc. is first identified as occupying 1130 Niagara Street in 1957. The address was listed as vacant in 1962 and 1967. Curtis Screw Company Inc. is listed as occupying the Site address from prior to 1972 to prior to 2008. Leisure Living is identified as occupying the Site in 2008.

A city directory search was also conducted for the properties surrounding the Site (specifically businesses located along Niagara Street). The following commercial businesses were reported to be either adjoining or located within close proximity to the Site during the specified time periods:

3.2.5 HISTORICAL TOPOGRAPHIC MAPS

Historical topographic maps were reviewed to assist in the identification of historical land use, to document the general development of the Site and properties in the vicinity of the Site, and to identify potential on-Site fill activities. Historical topographic maps of the Site and surrounding areas for the years 1901, 1948, 1949, 1950 (two maps), and 1965 were available from EDR and were reviewed by CRA. Following is a summary of observations based on review of the historical maps.

- 1901: The 1901 map was reviewed at a scale of 1:62,500 and shows the Site and surrounding properties as being within the City of Buffalo. The scale of the map does not allow for significant observations about the Site or surrounding areas.
- 1948: The 1948 map was reviewed at a scale of 1:62,500 and shows the Site and surrounding properties as developed land. Commercial buildings are depicted on the map, but the scale of the map does not allow for significant observations about the Site or surrounding areas.
- 1949: The 1949 topographic map was reviewed at a scale of 1:25,000 and depicts the Site as having the main Site building constructed and railroad tracks are located on the Site's western boundary. Commercial buildings are located along Niagara Street.
- 1950: The 1950 topographic maps were reviewed at a scale of 1:24,000 and depicts the Site and adjacent properties in the same basic configuration as the 1949 map.
- 1965: The 1965 topographic map was reviewed at a scale of 1:24,000 and depicts the Site as within the developed area of Buffalo. No buildings are depicted around the Site.

No areas of concern indicative of environmental impact were observed in the topographic maps.

Copies of available historical topographic maps of the Site are presented in Appendix F.

3.3 GOVERNMENT RECORDS REVIEW

CRA contacted and/or submitted Freedom of Information Act (FOIA) requests to the following regulatory agencies:

- New York State Department of Environmental Conservation;
- USEPA;
- Erie County Department of Health;
- Buffalo City Clerk; and
- Buffalo Fire Department.

CRA requested information regarding any USTs, spill notifications, notices of violation (NOV), leaking underground storage tanks, air permits, septic tanks and any other potential environmental concerns regarding the Site location.

No agency responses have been received as of the date of this Phase I ESA. The documentation will be reviewed once received. Once reviewed, if it is determined that the documentation affects or contributes to RECs identified in this Phase I ESA, the documentation will be summarized and provided in a separate letter. It should be noted that if the FOIA documentation is not received within 30 days of the date of this Phase I ESA, the requested information is considered not reasonably ascertainable.

3.4 RECORDED ENVIRONMENTAL CLEANUP LIENS

CRA contracted NCO Financial Systems, Inc. (NCO) to conduct a search of environmental liens, associated with the ownership or occupation of the Site. According to NCO, information was found for Parcel Numbers 99.41-1-3.1, 99.41-1-12, and 99.41-1-11.

Based on documentation provided by NCO, Gerspach Properties, LLC purchased the Site's three parcels from Curtis Screw Corporation, Inc. on January 18, 2005.

The environmental lien search conducted by NCO indicated that no environmental liens were found recorded at the Erie County, New York Public Records Office affecting the "subject real property asset" during the period searched (effective January 18, 2005 to April 3, 2009).

The Site address was not listed in the environmental lien search or in the EDR Report as having any Activity and Use Limitations (AULs). Site personnel were unaware of any environmental liens or AULs associated with the Site address.

A copy of the NCO Environmental Lien Report is provided in Appendix G.

3.5 USER INFORMATION

A User Questionnaire was submitted to Mr. Darryl R. Burgess of Rich Products for completion, in accordance with ASTM E152705. The completed questionnaire has been received by CRA. Mr. Burgess completed the User Questionnaire, which is provided in Appendix H. Based on the answers to the questionnaire, Mr. Burgess has no knowledge of past or present environmental issues or liability at the Site, with the exception of the potential impacts caused by fire fighting water runoff.

3.6 PREVIOUS SITE INVESTIGATIONS/ESAs

No previous investigative reports were available to be reviewed by CRA.

4.0 SITE INSPECTION

On April 7, 2009, Mr. John Raby of CRA completed an inspection of the buildings and related property that comprise the Site. The inspection included an inspection of the Site and Site structures, review of relevant Site records available to CRA, visual observations of adjacent properties as viewed from the Site and surrounding roadways, and interviews with individuals associated with the Site. CRA was accompanied during the Site inspection by:

<i>Site Personnel</i>	<i>Position</i>	<i>Years at Site</i>
Mr. Garry Williams	Custom Sales	3

In addition to Mr. Williams, CRA interviewed Mr. Paul Gerspach and Mr. William Lang, Leisure Living's President and Chief Financial Officer, respectively. The interviews were conducted at Leisure Living's new location in Tonawanda, New York.

Site personnel provided information regarding plant operations and historic Site uses.

4.1 SITE OVERVIEW

The Site consists of an approximate 63,000 square-foot warehouse building and a 1,200 square-foot storage garage on three acres of land at 1130 Niagara Street in Buffalo, New York. The Site is currently owned by Leisure Living for warehouse space for residential pool supplies. Site personnel stated that the building was constructed in the early 1900's. Based on information reviewed by CRA in historical information, the main Site building was constructed prior to 1949 and portions of the Site have been in industrial use since prior to 1889. According to Site personnel and based on information reviewed by CRA, Leisure Living has occupied the Site since 2005 and is currently removing their products to their new facility in Tonawanda, New York. Prior to that, the Site address was occupied by Curtis Screw from 1972 to 2005 and Namor Products from prior to 1957 to prior to 1962. Various industrial facilities and residences since prior to 1889 have occupied portions of the Site. Leisure Living utilized the Site as a warehouse and internet sales office for residential pool supplies, including pool chemicals. Historical Site industrial usage include wood working, machining activities, foundry activities, and vehicle repair.

The Site building is constructed with a steel frame and brick and block walls, a slab-on-grade concrete floor, and a flat steel deck roof. There is a small basement area in the main building that contains the heating boiler. There are two sumps with pumps located

in the basement apparently used to keep groundwater from infiltrating the basement. In the warehouse area of the building there is a pit with a pump that is apparently part of the floor drain system of the warehouse. The floor drains in the warehouse are currently sealed, however, it is not known how long they were in service or where they discharges when they were in use. Additionally there is pit in the warehouse that according to Site personnel was used by Curtis as some type of oil collection or oil separator for their machining operations. At the time of the Site inspection this pit was empty however the pit was mostly covered by metal plates so a through inspection of the pits contents or integrity could not be made.

The storage garage is constructed with block walls, a slab-on-grade concrete floor, and a flat steel deck roof. Site personnel did not have access to the interior of the garage so it could not be inspected by CRA. According to Site personnel the garage is used for aluminum storage.

The Site is bisected by Gull Street crating a northern portion and southern portion of the Site. The northern portion of the Site contains the storage garage and asphalt covered parking and storage lot. The Southern portion of the Site contains the warehouse building, which occupies the majority of the property, asphalt covered loading dock area and gravel covered area that was the site of the June 2008 fire. Both portions of the Site are bordered by railroad tracks on the west. Three pad-mounted electrical transformers are located outside the west wall of the warehouse building in the loading dock area.

Operations conducted, by Leisure Living in the building are associated with sales and distribution of residential pool supplies. Leisure Living does not re-package any pool chemicals and the largest containers of chemicals are 50 pounds. There is storage of metal shelving on the asphalt-covered lot in the northern portion of the Site.

On June 2, 2008 a four-alarm fire occurred at the Site. The fire occurred in the portion of the main Site building that was the original Curtis Screw building. That portion of the Site building was separate from the main Site building, but connected through covered walkways. The portion of the building that was burned was damaged severely enough to require demolition after the fire was extinguished. After demolition the basement of the building was filled in with fill imported from an off-Site source. According to Site personnel, the burned building contained pool chemicals and vinyl pool liners.

A copy of photographs taken during the Site inspection is presented as Appendix I.

4.2 ENVIRONMENTAL SETTING/ADJACENT PROPERTIES

The Site is located in the City of Buffalo, New York in a mixed-use area. The surrounding area is a mix of residential, commercial, and industrial use. No pits, ponds, lagoons or areas of stressed vegetation were observed by CRA during the Site Inspection. The Site is relatively flat and is bordered by the following properties:

- North: by Rich Products Corp. with Robert Rich Way and additional commercial properties located beyond;
- East: by Niagara Street with Rich Products Corp. and residential properties located beyond;
- South: by Oliver Gear with additional commercial properties located beyond and;
- West: by railroad tracks with Interstate 190 and the Black Rock Canal located beyond.

Site personnel were not aware of any adverse environmental impact to the Site from the adjacent properties. No evidence of adverse impact to the Site from surrounding properties was observed by CRA during the Site inspection. The following adjacent properties were identified on the EDR database report, which were of environmental interest. Cosuma, Niagara-Fargo Sunoco, Pratt and Lambert, School #18, Ultimate Auto Service, Dickies Donuts, and Hoffstetter Service are listed in the LTANKS database with a closed status. Chemcore, Inc .is listed on the SHWS database. Buffalo Sewer Authority is listed in the CERCLIS-NFRAP database.

There are no surface water bodies or water courses located on or immediately adjacent to the Site. The nearest surface water body/water course is the Black Rock Canal, located approximately 100 yards to the west.

The EDR database search indicates that soils underlying the Site consist of urban land. The direction of groundwater flow could not be determined from available information; however, it is likely to the west towards the Black Rock Canal. None of the Site is located within a 100year flood zone according to information provided by EDR. No Site-specific information was available regarding soil stratigraphy, depth to groundwater, or groundwater flow direction.

4.3 UTILITY SERVICES

Potable water is provided to the Site by the City of Buffalo municipal supply system. Water supply wells have not been operated on Site according to facility personnel. Wastewater generated at the Site is discharged to the municipal sanitary sewer system. According to facility personnel, septic leaching fields have never been present at the Site to their knowledge. No evidence of septic systems or groundwater wells was observed by CRA during the Site inspection. Electrical service to the Site is provided by National Grid while natural gas is supplied to the Site by National Fuel. Comfort heating is provided by a mixture of gas-fired radiant heaters and gas-fired hot water heaters.

Stormwater generated at the Site either infiltrates into the ground surface or is routed by overland flow to catch basins that ultimately discharge to storm sewers beneath Niagara Street and Gull Street.

4.4 UNDERGROUND STORAGE TANKS (USTs)

According to Site personnel, no USTs have been or are presently operated at the Site. No evidence of active or abandoned on-Site USTs (e.g., fill pipes, vent pipes, etc.) was observed by CRA at the time of the Site inspection. The Site is listed in the UST related databases discussed in Section 2.0 as having USTs and releases therefrom.

According to the EDR database search the Site has had three USTs located on Site during Curtis Screw's ownership of the Site. The USTs are listed as two 10,000-gallon #2 fuel oil USTs and one cutting oil UST of unknown capacity. A leak was detected in the fill port of the cutting oil UST in 1987, opening spill number 8707193. This spill number was closed on January 15, 1988. These USTs were removed on July 1, 1995 and during the removal activities contamination was identified. This caused the NYSDEC to issue spill number 9504353. This spill was closed by the NYSDEC on July 17, 1995. The NYSDEC stated that residual contamination exists, but remedial action is not required at this time. No additional information regarding these USTs is available from Site personnel.

4.5 ABOVEGROUND STORAGE TANKS (ASTs)

According to Site personnel, no ASTs have been or are presently operated at the Site. No evidence of active or abandoned on-Site ASTs was observed by CRA at the time of the Site inspection. The Site is listed in the AST related databases discussed in Section 2.0.

According to the information in the EDR search, the Site had at least two ASTs. One AST was a 1,200-gallon 1,1,1-trichloroethane AST removed in 1995. The other listed AST was a 1,500-gallon AST with no listed contents and was removed in 2005. No additional information regarding these ASTs is available from Site personnel.

4.6 RAW MATERIAL AND CHEMICAL USE AND STORAGE

Based on information provided by facility personnel, a review of facility records, and observations made by CRA during the Site inspection, chemicals presently stored at the Site by Leisure Living include the following:

- pool spring start up/fall closing chemicals;
- pool algaecides;
- pool sanitizers;
- pool pH ballancers;
- bromine;
- pool clarifiers;
- pool chlorinating chemicals;
- pool stain removers;
- pool shock;
- pool testing kits;
- spray cans of touch-up paint; and
- general building maintenance chemicals.

Liquid pool chemicals are stored in the heated warehouse section on the east end of the warehouse south of the office. Solid pool chemicals are stored throughout the warehouse area. Leisure Living does not re-pack any chemicals. The largest containers of chemicals at the Site are 50-pound pails of chlorinating tablets. The touch-up paint is stored in a cabinet in the warehouse. General building maintenance chemicals are stored in janitorial closets throughout the facility. All floor drains in the warehouse area are sealed. Leisure Living is in the process of re-locating their operations to their new facility and is removing all stored products.

According to Site personnel, no significant spills or releases of any of the chemicals stored at the Site have occurred in the past. Significant floor staining is present

throughout the warehouse area, however; it does not appear to be related to the Site's chemical storage. The staining appears to be oil type staining and most likely was caused by the Site's previous owners. No other visual evidence of releases was observed by CRA in the vicinity of the chemical storage areas.

4.7 SOLID AND SPECIAL WASTE

Solid wastes currently generated at the Site consist of the following materials:

- scrap metal;
- used pallets; and
- cardboard.

General office and lunchroom wastes are currently not being generated at the Site due to the re-location activities. Scrap metal is consolidated on the north portion of the Site, either in the storage garage or asphalt lot. Scrap metal removed on an as-needed basis for salvaging by local scrap metal dealers. Used pallets are either re-used by Leisure Living or are removed by employees for use as firewood. Used cardboard and paper are removed for recycling.

Facility personnel reported that any damaged pool chemical containers are given away to a local pool maintenance contractor for his use.

Facility personnel stated that, to their knowledge, there has been no on-Site disposal of solid waste. CRA observed evidence of fill in the area that was demolished due to fire damage in 2008. Facility personnel stated that the demolition contractor brought the fill on-Site to fill the basement of the burned portion of the building. The source of this fill is unknown. No additional evidence of on-Site solid waste disposal was observed by CRA during the Site inspection.

4.8 HAZARDOUS WASTE

According to Site personnel, no hazardous wastes are generated at the Site. This is consistent with the findings of the environmental databases search which did not identify Leisure Living as a hazardous waste generator. However, the Site is listed in the RCRA-Non-Gen Database as Curtis Screw located at 1130 Niagara Street as a non-generator of hazardous waste. No evidence of hazardous waste generation was observed at the Site by CRA.

According to Site personnel, there has been no on-Site disposal of hazardous waste to the best of their knowledge. No evidence of on-Site disposal of hazardous waste was observed by CRA during the Site inspection.

4.9 WASTEWATER/SEWERS

Based on information provided by facility personnel, a review of facility environmental files, and observations made by CRA, wastewater generated at the Site is limited to sanitary wastewater from facility washrooms. No process wastewater is generated at the Site according to facility personnel. This is consistent with observations made by CRA at the time of the Site inspection. However, there is a pit that according to Site personnel was used by Curtis as some type of oil recovery system. It is unknown whether or not the contents of this pit were ever discharged to a sewer. The interior of this pit could not be thoroughly inspected due to the pit's metal covering.

Site personnel reported that septic systems have never been operated at the Site to the best of their knowledge. No other sources of wastewater generation were observed by CRA at the time of the Site inspection.

4.10 STORM WATER

Storm water generated at the Site either infiltrates into the ground or is routed by overland flow to on-Site and off-Site catch basins and discharged to the municipal storm sewer. On the basis of outdoor material storage practices Leisure Living may be required to maintain a State Pollutant Discharge Elimination System (SPDES) Permit. Facility personnel were unaware of SPDES permit requirements and could not provide a copy of a SPDES permit. The database review completed as part of this assessment and discussed in Section 2.0 did not identify the existence of a SPDES permit for the Site.

4.11 AIR EMISSIONS

The Site does not currently operate any regulated air emission sources according to facility personnel. Sources of atmospheric emissions observed by CRA at the time of the Site inspection were limited to gas-fired heating systems.

4.12 ASBESTOS CONTAINING MATERIALS (ACM)

The presence of ACM at the Site was investigated through discussions with facility personnel and visual observations made by CRA. An ACM survey was not conducted as part of this ESA and no intrusive investigations were conducted to examine areas of concealed space. Facility representatives were not aware of any ACM being present in the buildings or any ACM surveys that have been conducted at the Site. Facility representatives indicated that to their knowledge, no asbestos has been removed from the Site.

Based on observations during the Site inspection, labeled asbestos was found on the piping insulation on the boiler in the basement. Additional potential ACM observed by CRA was limited to ceiling tile and floor tile/mastic office areas. All materials were observed to be in good condition. Additional potential ACM may be present in areas that were inaccessible to CRA during the Site inspection.

4.13 POLYCHLORINATED BIPHENYLS (PCBs)

Electrical service to the Site is provided by National Grid from Gull Street through three electrical transformers. There are also several old out-of-service electrical transformers located throughout the warehouse. There are several pieces of old switch gear located throughout the warehouse. Leisure Living does not use the transformers and switch gear. According to Site personnel, transformers have never been tested for PCB content.

According to Site personnel, no PCB-containing equipment has been or is currently being used, stored, or handled at the Site. At the time of the Site inspection, potential PCB-containing equipment observed by CRA included the electrical transformers. Site personnel were unable to provide documentation of the age of the transformers or analytical testing for PCBs in the dielectric fluid. Potential PCB equipment also included the ballasts in the fluorescent lighting and high intensity discharge fixtures in the buildings.

The potential PCB-containing equipment observed by CRA was not in operation and appeared to be in poor condition.

4.14 IONIZING RADIATION

According to Site personnel, the Site has not used any ionizing sources of radiation in plant operations. No labeled radiation sources were observed by CRA during the Site inspection. Site personnel were unaware of any radon gas testing having been conducted at the Site. The USEPA has determined Erie County to be in a Level 1 Radon Zone, with indoor air concentrations of radon anticipated to be greater than 4 pCi/L. The USEPA established action level for radon gas is 4 pCi/L. There is a basement at the Site.

4.15 SPILLS/RELEASES

According to Site personnel, no spills or releases have occurred at the Site. However, the Site has a Spill listing for Leisure Pool Supply located at 1130 Niagara Street. The NYSDEC spill number is 0802424 and the spill occurred on June 2, 2008. According to the information in the EDR search, the spill number was issued because of the potential contamination from fire fighting water runoff that occurred during the extinguishing of the Site fire that occurred on June 2, 2008. No additional evidence of any significant spills or releases was observed by CRA during the Site inspection with the exception of floor staining and knowledge of the fire.

4.16 CERCLA LIABILITY POTENTIAL

The Site is not listed on the NPL or in the State Hazardous Waste Site Database. The Site has never defended any environmental-related claims or litigation asserted by any governmental agency or third party, and no potential claims or litigation presently exist to the best knowledge of Mr. Williams. According to Mr. Williams, the Site has never received notification from any government agency or third party of liability as a potential responsible party for any hazardous waste treatment, storage, or disposal Site.

4.17 LEAD-BASED PAINT (LBP)

A LBP survey was not conducted as part of the Phase I ESA. Exterior building materials consist primarily of concrete, brick, metal, and glass. Most interior surfaces are painted. Chipped or flaking paint was observed in the warehouse area during the Site inspection. Additional painted surfaces may be present in areas not accessible during the Site inspection. Lead content of paint cannot be verified without laboratory analysis. The

Site structure could potentially contain LBP based on construction occurring prior to 1949.

5.0 SUMMARY OF IDENTIFIED ENVIRONMENTAL ISSUES

5.1 FINDINGS & OPINION

Based on the Phase I ESA including the Site inspection, database search, historic records reviewed, information provided by Site personnel, and interviews, the following potential issues were identified regarding RECs, historic RECs, de minimis conditions, and business environmental risk as defined in the Standard, at the Site.

- i) **Historic Site Usage:** Based on the historic industrial Site usage since prior to 1889, chemicals and petroleum products have likely been used on the Site. There are Site features, including former floor drains, sumps, and an oil/water separator that could have acted as conduits for potential chemical releases to migrate into site soils and groundwater. Additionally, there is significant floor staining throughout the warehouse floor. There is insufficient evidence that a release to the environment occurred. Information regarding historic spills, use, storage or disposal of chemicals was not available. The unknown nature of historic chemical storage, usage, and disposal would not be considered an REC. However, consideration should be given to the potential presence of these chemicals when evaluating business environmental risk and future uses of the Site.
- ii) **Potential Fire Fighting Runoff Impacts:** A fire occurred at Site on June 2, 2008. The portion of the building that burned down contained pool chemicals and vinyl pool liners. Water runoff from the fire fighting would likely have mobilized chemical contamination into the Site's soil. The NYSDEC issued spill number 0802424 to the Site because of these potential impacts. The spill number was closed on June 4, 2008; however, no confirmatory environmental samples were collected. Because of the lack of analytical data to prove no impacts occurred to Site soils and/or groundwater due to the fire fighting water runoff, the potential runoff impacts would be considered an REC.
- iii) **Historic UST Leaks:** According to the EDR database search the Site had three USTs that were previously located on-Site. The USTs were utilized by Curtis Screw. The USTs are listed as two 10,000-gallon #2 fuel oil USTs and one cutting oil UST of unknown capacity. A leak was detected in the fill port of the cutting oil UST in 1987, opening spill number 8707193. This spill number was closed on January 15, 1988. These USTs were removed on July 1, 1995 and during the removal activities, contamination was identified. This caused the NYSDEC to issue spill number 9504353. This spill was closed by the NYSDEC on July 17, 1995. The NYSDEC stated that residual contamination exists, but remedial action

is not required at this time. The identified residual contamination from these removed UST would be considered an REC.

- iv) **Historic Residences:** The Site previously contained several residences. No information regarding the type of heating, UST or AST use, or the presence of a septic system, cesspool or water wells was available. While no evidence exists to identify this as an REC, insufficient information exists to evaluate potential adverse impact to soil and groundwater at the Site. Therefore, consideration should be given to these items as a business environmental risk.
- v) **Site Fill:** According to Site personnel, fill was brought on Site to fill the basement of the portion of the Site that was destroyed by fire. The source of this fill is unknown and there is no analytical data or certification that the source of this fill is clean. While no evidence exists to identify this as an REC, insufficient information exists to evaluate potential adverse impact to soil and groundwater at the Site. Therefore, consideration should be given to this item as a business environmental risk.

5.2 CONCLUSIONS

CRA has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard E152705 of the Leisure Living property located at 1130 Niagara Street in Buffalo, New York. Any exceptions to, or deletions from this practice are described in Section 1.0 of this report. This assessment has revealed no evidence of RECs at this Site, except for the following as described above:

- **Potential Fire Fighting Runoff Impacts; and**
- **Historic UST Leaks.**

5.3 BUSINESS ENVIRONMENTAL RISK

While not considered to be an RECs, the following issues described above may have resulted in environmental impairment to the Site and should be considered when evaluating environmental risk associated with the Site:

- **Site Fill;**
- **Historic Site Usage; and**
- **Historic Residences.**

5.4 NONSCOPE CONSIDERATIONS

The following potential issues were identified regarding non-scope considerations.

- i) **Radon:** Estimated radon concentrations in Erie County are greater than 4 pCi/L, which is the level at which USEPA identifies that further evaluation is warranted. Potential radon levels should be considered based on planned use of the Site.
- ii) **LPB:** A LBP survey was not conducted as part of the Phase I ESA. Exterior building materials consist primarily of concrete, brick, metal, and glass. Most interior surfaces are painted. Chipped or flaking paint was observed in the warehouse area during the Site inspection. Additional painted surfaces may be present in areas not accessible during the Site inspection. Lead content of paint cannot be verified without laboratory analysis. The Site structure could potentially contain LBP based on construction occurring prior to 1949.

5.5 DATA GAPS

A data gap, as defined in the ASTM Standard E152705, is an absence of information that affects the ability of the environmental professional to identify recognized environmental conditions. The following data gaps were identified in this Phase I ESA.

- i) **Historical Source Interval:** Standard historical sources reviewed for this ESA were not available at the five-year intervals described in Section 8.3.2.1 of the Standard. Additional information sources were not considered reasonably ascertainable. Based on the unknown nature of the historical industrial use of the Site since prior to 1889, the lack of this information could impact the conclusions of this report.
- ii) **Requested FOIA Documentation:** Not all FOIA information from the regulatory agencies has been received as of the date of the report. Based on the remaining documentation reviewed, the historic industrial use of the Site the lack of this information may result in changes to the conclusions for this report.
- iii) **Limited Site Operator Knowledge:** The Site contact and Leisure Living have only been associated with the Site for the past three years and had no knowledge of previous occupant operations or chemical handling activity. The lack of knowledge of previous operations may have an impact on the potential environmental issues at the Site

6.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

This Phase I ESA was completed by or under the direct supervision of an Environmental Professional (EP), who to the best of our professional knowledge and belief, meets the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. The EP has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries (AAI) in conformance with the standards and practices set forth in 40 CFR 312. Under the final AAI Standard, certain aspects of the Phase I ESA (interviews, onsite visual inspection, the historical records review, and the search for environmental liens) may require an update if the timeframe between their completion and acquisition of the property exceeds 180 days.

ASSESSOR QUALIFICATIONS

EDUCATION

B.S. St. John's University, Collegeville, Minnesota, 1977, Cum Laude
M.B.A. College of St. Thomas, St. Paul, Minnesota, 1986

EMPLOYMENT

1995 - Present Principal, Minnesota Branch Manager
Conestoga-Rovers & Associates
1993-95 Associate, Minnesota Branch Manager, Conestoga-Rovers & Associates
1988-92 Project Manager, Minnesota Branch Manager, Conestoga-Rovers & Associates
1985-88 Remedial Project Manager, Honeywell Defense Systems Group
1983-85 Senior Environmental Engineer, Honeywell Defense Systems Division
1981-83 Environmental Engineer, Honeywell Defense Systems Division
1979-81 Project Manager, U.S. Army Toxic and Hazardous Materials Agency
1978-79 Chemical Staff Officer, Department of the Army, Project Manager for Chemical
Demilitarization and Installation Restoration
1977-78 Ordinance Officer, Munitions Materiel Management, U.S. Army

PROFILE OF PROFESSIONAL ACTIVITIES

Remedial Investigations/Site Investigations/RCRA Facility Investigations and Feasibility Studies

- Served as Project Manager for all aspects from work plan development through final report preparation for investigation of the following facilities:
 - Electronic component manufacturing plant - New Brighton, Minnesota (NPL site)
 - Metal parts manufacturing plant - New Brighton, Minnesota (NPL site)
 - Engineering and testing facility - Anoka County, Minnesota
 - Precision metals fabricating plant - Niles, Michigan
 - Tennessee chemical company plant - Copperhill, Tennessee
 - Demolition landfill - New Brighton, Minnesota
 - Private dump - New Brighton, Minnesota
 - Trio solvents plant - New Brighton, Minnesota
 - Sporting goods manufacturing facility - Tennessee
 - Vehicle maintenance facility - Minnesota
 - Metal parts manufacturing facilities - Germany, Czech Republic, England
 - Electro-mechanical components facility - New York
 - Industrial landfills - Michigan, Texas

- Served as Project Manager for all aspects of remedial investigations at propellant and explosives manufacturing and loading plants. The specific areas of investigation included explosive and propellant manufacture, explosive loading, red and pink water disposal, detonation sites, and explosives burning at the following plants:
 - Joliet Army Ammunition Plant - Elwood, Illinois (NPL site)
 - Iowa Army Ammunition Plant - Burlington, Iowa
 - Badger Army Ammunition Plant - Baraboo, Wisconsin
 - Louisiana Army Ammunition Plant - Doyline, Louisiana (NPL site)
 - Cornhusker Army Ammunition Plant - Grand Island, Nebraska (NPL site)
 - Twin Cities Army Ammunition Plant - New Brighton, Minnesota (NPL site)

Environmental Assessments/Audits

- Performed environmental assessments for acquisition, secured financing or compliance at the following facilities:
 - Flour mills in Minnesota, North Dakota, Iowa, Wisconsin, Pennsylvania, Texas, Louisiana, Utah, Massachusetts, Tennessee, Virginia, Kansas, California, Florida
 - Animal feed mills in Minnesota, Texas, Virginia, North Carolina, Georgia, Pennsylvania, Kentucky, Arizona
 - Animal slaughtering/food processing facilities in Texas, Virginia, North Carolina, Kentucky, California
 - Electronic component manufacturing facilities - Minnesota, Pennsylvania
 - Explosive loading plants - Illinois, Iowa, Tennessee, Arkansas
 - Solid fiberboard and paper mills - California, Vermont, Michigan, Minnesota, Illinois, Missouri
 - Metals fabrication and die casting plants - Illinois, North Carolina
 - Metals fabrication facilities - Ohio, South Carolina, Illinois, Brazil, Germany, England, Czech Republic, Missouri, Nevada, New York, Indiana
 - Chemical formulation plants - Illinois, England, Ireland
 - Manufacturing and warehouse facilities - Illinois, Indiana, Wisconsin, Georgia, Texas, Pennsylvania, California
 - Food production, processing, and packaging plants - Indiana, Louisiana, Minnesota, Ohio, New York, California, Illinois
 - Construction equipment maintenance facilities - Georgia, Minnesota, Washington, Illinois
 - Industrial equipment manufacturing facilities - Ohio
 - Soft drink bottling plants - Arkansas, North Carolina, South Carolina, Tennessee, Belgium
 - Soft drink distribution facilities - Arkansas, North Carolina, South Carolina, Tennessee, Texas, Belgium
 - Heavy equipment manufacturing plants - Illinois, Wisconsin, Indiana
 - Commercial munitions, production and testing facilities - Ohio, Pennsylvania, Florida, New Mexico, Tennessee
 - Medical equipment manufacturing facilities - Connecticut, Puerto Rico
 - Cement plants - Iowa, Mississippi, Missouri
 - Precision metals fabrication plants - Michigan, Illinois, Indiana, Pennsylvania

- Chemical manufacturing plants - Tennessee, Wisconsin
- Athletic and swimming facilities - Minnesota
- Waste derived fuel plants - Missouri, Kansas, Indiana, Pennsylvania, Maryland
- Cabinet manufacturing plants - Texas, Kentucky, Iowa, Minnesota, Ohio
- Photo processing facilities - Minnesota, Missouri, Netherlands, Kansas
- Photographic film manufacturing facilities - United Kingdom, Germany, Switzerland
- Corrugated box plants - South Carolina, Georgia, Alabama, Tennessee
- Fiberboard partition plants - Maine, New Jersey, Wisconsin, Quebec, Iowa, Minnesota, Massachusetts
- Hazardous waste blending facilities - Ohio
- Plastic extrusion and molding plants - Germany, Michigan, Minnesota
- Window and door manufacturing facilities - Wisconsin, Michigan, Iowa
- Furniture manufacturing facilities - North Carolina, Ohio, Pennsylvania, Virginia
- Foundries - Michigan, Illinois, Ohio, Pennsylvania, Tennessee, Mexico
- Photographic chemical and plate manufacturing - Germany, Switzerland, England
- Chemical processing facilities - United States, Australia, Korea, Japan

Remedial Designs or Remedial Construction Supervision

- Served as Project Manager for the design and/or construction of the following remedial actions:
 - Groundwater collection tile, extraction, and VOC treatment system - (NPL site) New Brighton, Minnesota
 - Extraction well and VOC treatment system - (NPL site) New Brighton, Minnesota
 - 2,900 GPM groundwater extraction, VOC treatment and recharge system - (NPL site) New Brighton, Minnesota
 - Excavation and on-site contained storage of 12,000 tons of PCB contaminated soil - (NPL site) New Brighton, Minnesota
 - Groundwater Extraction and Discharge System - New Brighton, Minnesota
 - Excavation and off-site disposal of metals contaminated soils - New Brighton, Minnesota
 - Decontamination and off-site disposal of PCB equipment and oils - New Brighton, Minnesota
 - Decontamination of PCB contaminated plant areas - Lafayette, Indiana
 - Excavation and off-site disposal of over 100,000 tons of organics contaminated soil (NPL site) - New Jersey
 - Industrial sewer cleaning and sludge handling project involving VOCs, PCBs and metals - (NPL site) New Brighton, Minnesota
 - Excavation and off-site disposal of lead contaminated soils - Minneapolis, Minnesota
 - PCB soil contamination site - Iowa
 - Soil vapor extraction system for VOC removal - Wisconsin
 - Air sparging system for VOC removal - Minnesota
 - VOC air stripping water treatment system - New Jersey
 - Excavation, on-site separation and off-site disposal of contaminated soils - Fridley, Minnesota
 - Soil vapor extraction system for VOC removal - Germany

- Wastewater lagoon closure - Michigan

Environmental Compliance at Industrial Facilities

- Responsible for environmental compliance at multi-facility division of Honeywell, Inc. including:
 - Prepared permit applications for hazardous waste treatment and storage facilities
 - Developed in-plant hazardous waste management procedures for division
 - Developed RCRA training programs for treatment and storage facilities
 - Managed in-house hazardous waste generation, treatment, storage, and disposal program for six manufacturing facilities
 - Developed in-plant spill response procedures for manufacturing facilities
 - Prepared industrial discharge (POTW) permit applications for manufacturing plants and remedial actions
 - Prepared NPDES permits for remedial actions
- Performed multi-media compliance audits at the following types of industrial facilities:
 - Chemical manufacturing, chemical formulation, explosives loading, metal parts manufacturing, primary and secondary steel manufacturing, paper manufacturing, furniture and cabinet manufacturing, and miscellaneous manufacturing

Technical Support for Litigation and Administrative Orders

- Provided the following technical expert services in conjunction with permitting and litigation issues:
 - Assisted PRP at VOC contaminated groundwater site consisting of review and comment on; remedial investigations, feasibility studies, risk assessment, groundwater modeling, records of decision, consent orders - NPL site in Minnesota
 - Assisted PRP at VOC and PCB contaminated site consisting of review and comment on; remedial investigations, feasibility studies, risk assessment and administrative orders - Illinois
 - Assisted PRP group at mixed municipal and demolition landfill consisting of review and comment on; remedial investigation, remedial objectives and remedial cost estimates - NPL site in Minnesota
 - Assisted industrial client in negotiation of administrative and judicial orders for investigation and implementation of corrective actions at a mining and chemical manufacturing facility - Tennessee
 - Assisted township in removing a potential landfill site from final consideration list - Minnesota
 - Assisted PRP group at mixed municipal landfill consisting of RD/RA Scope of Work negotiations, remedial cost estimates, allocation negotiations and mediation - NPL site in Minnesota
 - Assisted industrial clients in negotiation of contribution claims for past releases on property - Iowa, Texas, Tennessee, Minnesota, Wisconsin, Idaho, Pennsylvania, Illinois, Indiana
 - Assisted industrial client with evaluation of compliance and recommended corrective measures in response to potential litigation - Mississippi
 - Technical expert for an industrial client with PCB risk issues from former industrial disposal site under litigation - Michigan
 - Technical expert for industrial client regarding acquisition due diligence

EDUCATION

B.A. Geology, University at Buffalo, New York, 1996

Other

Courses: 40-Hour Personal Protection and Safety Training (as per CFR 1910-120), June 1996
8-Hour Refresher in Personal Protection and Safety (as per CFR 1910-120), update as required

EMPLOYMENT

1997- Geologist

Present Conestoga-Rovers & Associates

1996-97 Engineering Technician/ Drilling Assistant, Maxim Technologies

PROFILE OF PROFESSIONAL ACTIVITIES

- Supervision and analysis of hydrogeologic investigations to determine aquifer characteristics including single well response tests, constant-rate and step drawdown pumping tests and down hole geophysical equipment in unconfined and confined aquifers
- Supervision and coordination of field investigations including drilling and sampling programs conducted at various hazardous waste disposal sites and other industrial facilities
- Supervision of overburden and bedrock monitoring well installations
- Supervision and implementation of groundwater monitoring and sampling programs undertaken in conjunction with hydrogeologic investigations
- Surface and subsurface soil sampling
- Construction inspection, well installation, and soils lab experience
- Project coordination/ management of several gas satiation sites. Responsibilities include: scheduling of sampling events, remediation events, selection of remedial actions, and report writing
- Over 5 years of experience in completing various Environmental Site Assessments (Phase I) and Environmental Site Investigations (Phase II) for the United States Postal Service and various clients

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 12/03/2007 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 11/12/2008 has revealed that there are 2 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the SHWS list, as provided by EDR, and dated 03/10/2009 has revealed that there is 1 SHWS site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal leaking storage tank lists

LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the LTANKS list, as provided by EDR, and dated 03/10/2009 has revealed that there are 7 LTANKS sites within approximately 0.5 miles of the target property.

HIST LTANKS: A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database.

A review of the HIST LTANKS list, as provided by EDR, and dated 01/01/2002 has revealed that there are 5 HIST LTANKS sites within approximately 0.5 miles of the target property.

CBS UST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the CBS UST list, as provided by EDR, and dated 01/01/2002 has revealed that there are 9 CBS UST sites within approximately 0.25 miles of the target property.

State and tribal Brownfields sites

ERP: In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

A review of the ERP list, as provided by EDR, and dated 03/10/2009 has revealed that there is 1 ERP site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC, is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 03/10/2009 has revealed that there are 14 NY Spills sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

NY Hist Spills: This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database.

A review of the NY Hist Spills list, as provided by EDR, and dated 01/01/2002 has revealed that there are 11 NY Hist Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 11/12/2008 has revealed that there are 14 RCRA-NonGen sites within approximately 0.25 miles of the target property.

DEC Memo: 12/23/04:SAC telecon Paul Meosky - Hodgson Russ. Mr. Meosky reported contamination that was found around the former location of 3 tanks where there was a previous spill and clean up. The spill number was 9504353. 2 tanks were #2 fuel oil and the other tank was a cutting oil. Per Mr. Meosky, the contaminant of concern was cutting oil for Spill Number 9504353 and he believes this time it is the fuel oil. He will send in the analytical results, boring logs, and site map showing the boring locations. Mr. Meosky said for now he would be the contact person. 1/27/05 CALL INTO MR. MEOSKY REQUESTING SUBMISSION OF THE INFORMATION HE INDICATED HE WAS TO HAVE PROVIDED ON 12/23/04. REQUESTED A CALL BACK. 2/22/05 RECD THE BORING LOGS FOR TWO BORINGS AND THE ANALYSIS OF SOIL AND GROUNDWATER FROM THESE LOCATIONS. THE SOIL EXCEEDS TAGMS FOR THE SVOC BENZO COMPOUNDS AND THE GROUNDWATER EXCEEDS FOR THE SAME COMPOUNDS. THE SAMPLES WERE COLLECTED FROM A FORMER UST REMOVAL THAT THE DEC MADE INACTIVE. CALL INTO MR. MEOSKY ASKING WHAT CURTIS SCREW PLANS ON DOING. 6/27/05 LETTER REQUESTING INVESTIGATION AND REMEDIATION SENT TO CURTIS SCREW. A RESPONSE IS DUE BY 7/13/05. 7/13/05 PAUL MEOSKY CALLED AND INDICATED HE WILL REVIEW THE STATUS OF THE SITE AND GET BACK TO ME WITHIN TWO WEEKS. 10/27/05 EVAN CASEY WITH GREAT LAKES ENVIRONMENTAL NOTIFIED THIS OFFICE THAT HE COMPLETED SITE SAMPLING ON SATURDAY AND DIDN'T NOTIFY THIS OFFICE. HE SAID SAMPLES HAD BEEN SUBMITTED TO THE LABORATORY AND RESULTS ARE EXPECTED NEXT WEEK. HE SAID THE SAMPLES LOOKED CLEAN. 1/23/06 DKK REVIEWED 11/3/05 AND 11/23/06 SOIL CLOSURE REPORTS, SUPPLEMENTAL FILE INFORMATION AND SPILL NO. 9504353(1995 TANK PULL & SOIL INVESTIGATION AT THIS SITE). RESIDUAL CONTAMINATION EXISTS BUT REMEDIAL ACTION IS NOT REQUIRED AT THIS TIME. SPILL SITE CAN BE MADE INACTIVE - LETTER SENT.

Remarks: GZA, inc. was doing a Phase II site assessment, a based on analytical results were STARS guidance values. Area where this was found is former tank location where there was a previous spill and was made "inactive."

Other Pertinent Environmental Activity Identified at Site

Registry ID: 110000900598

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DAVID MEGASON, PLANT MANAGER, AND A GROUP OF WORKERS FROM THE BUFFALO SEWER AUTHORITY...DAVE TOOK US UP TO ON THE ROOF OF RICH PRODUCTS, WHERE ABOUT 50-70 GAL. OF PCB TRANSFORMER OIL SLOWLY LEAKED INTO THEIR SECONDARY CONTAINMENT AREA...THEY FIRST NOTICED THIS ON 8/26/2000, THEY HIRED DRAIN DOCTOR TO CONTAIN THE SPILL, THEY PUT SPEEDI-DRY ALL OVER THE AREA...THEY ALSO WILL BE HIRING AN ENVIRONMENTAL FIRM TO COMPLETE THE CLEAN UP AND DISPOSAL OF THE 243 PPM PCB OIL, SINCE IT IS OVER 50 PPM, IT IS HAZARDOUS...SINCE IT DIDN'T RAIN, IT DOESN'T APPEAR THAT ANY OIL RAN DOWN THE ROOF DRAIN, HOWEVER THEY WILL PUT AN ABSORBANT AROUND THE DRAIN, TO MAKE SURE THAT NO PRODUCT DOES GO DOWN THE DRAIN...THE TRANSFORMER IS OUT-OF-SERVICE AND THEY HAVE ALREADY CONNECTED A NEW ONE TO RUN THEIR COOLING SYSTEM...THEY COVERED THE LEAKING ONE WITH PLASTIC, SO THAT IF IT RAINS, NO OIL WILL BE ABLE TO WASH AWAY...AFTER THEY CLEAN UP THE ROOF AND DRAIN, THEY WILL TAKE SWAB TESTS TO DETERMINE IF ANY PCB'S ARE STILL PRESENT, IF THEY ARE, THEN MORE CLEAN UP WILL HAVE TO BE DONE...DAVE WILL SEND ME ALL THE TEST RESULTS AND THE DISPOSAL RECEIPTS...THE BUFFALO SEWER AUTHORITY WAS SATISFIED WITH THE ACTIONS TAKEN, THEY DO NOT SEE ANY PROBLEMS WITH THE SEWER LINES...I WILL DRAFT AND SEND A 'RESPONSIBLE PARTY NOTIFICATION' LETTER. 08/30/2000: DAVE MEGASON E-MAILED RJJ STATING ME THAT THEY WILL BE USING THE DRAIN DOCTOR FOR THE GENERAL CLEANUP, AND THEN THE CONTAMINATES WILL BE HANDED OFF TO CHEMICAL WASTE MANAGEMENT FOR DISPOSAL...HE ALSO CALLED EPA AND THE EPA REPORT # IS 540365. 09/07/2000: RJJ SITE INVESTIGATION AT 1300...MEET WITH DAVE MEGASON ON THE ROOF...HE GAVE ME THE PCB-IN-WIPES ANALYSIS THAT CHOPRA-LEE DID...OF THE 25 PCB-IN-WIPES TESTED, THE HIGHEST RESULTS WERE 2.36 PPB...THIS WAS BEFORE THEY CLEANED UP THE AREA, THEY WILL RETEST AFTER CLEAN UP...ALSO, THE EAST SIDE DRAIN CAME BACK ON...DAVE ALSO SAID THAT THEY WILL GET A LARGE CRANE TO REMOVE THE CLEANED AND EMPTY TRANSFORMER IN NOVEMBER...I TOLD HIM THAT THIS WOULD BE ACCEPTABLE...THEY PLAN TO HAVE THE TRANSFORMER INCINERATED...DAVE WILL KEEP ME INFORMED OF ANY OTHER ACTIONS. 11/02/2000: RJJ RECEIVED THE ANALYTICAL RESULTS FROM THE TRANSFORMER AREA TAKEN 9/15 AND 10/25...THE PCB LEVELS WERE ALL BELOW OUR ACCEPTABLE LIMITS...THEY WILL REMOVE THE TRANSFORMERS AROUND THANKSGIVING, AND SEND ME ALL CERTIFICATES OF DESTRUCTION. 12/08/2000: RJJ TELECON DAVE MEGASON, HE SAID THAT DUE TO THE STORM, THEY COULDN'T REMOVE THE TRANSFORMERS, BUT THEY WILL AS SOON AS THE SNOW MELTS IN THEIR PARKING LOT...HE WILL CALL ME WHEN THEY DO THIS. 04/24/2001: RJJ RECEIVED THE DISPOSAL RECEIPTS FOR THE TRANSFORMERS WHICH WERE TAKEN TO WASTE MANAGEMENT, INC...NO FURTHER ACTION NEEDED...SPILL CLOSED OUT.

Remarks: CALLER SAID THAT THEY HAD A SLOW PCB TRANSFORMER LEAK, ON THEIR ROOF, AND SOME OF THE OIL MIGHT HAVE RAN DOWN THE DRAIN INTO THE STREET SEWER...SPILL HAS BEEN CONTAINED AND BUFFALO SEWER HAS BEEN NOTIFIED.

DEC Remarks: 08/29/2000: RJJ SITE INVESTIGATION AT 1330...MEET WITH DAVID MEGASON, PLANT MANAGER, AND A GROUP OF WORKERS FROM THE BUFFALO SEWER AUTHORITY...DAVE TOOK US UP TO ON THE ROOF OF RICH PRODUCTS, WHERE ABOUT 50-70 GAL. OF PCB TRANSFORMER OIL SLOWLY LEAKED INTO THEIR SECONDARY CONTAINMENT AREA...THEY FIRST NOTICED THIS ON 8/26/2000, THEY HIRED DRAIN DOCTOR TO CONTAIN THE SPILL, THEY PUT SPEEDI-DRY ALL OVER THE AREA...THEY ALSO WILL BE HIRING AN ENVIRONMENTAL FIRM TO COMPLETE THE CLEAN UP AND DISPOSAL OF THE 243 PPM PCB OIL, SINCE IT IS OVER 50 PPM, IT IS HAZARDOUS...SINCE IT DIDN T RAIN, IT DOESN T APPEAR THAT ANY OIL RAN DOWN THE ROOF DRAIN, HOWEVER THEY WILL PUT AN ABSORBANT AROUND THE DRAIN, TO MAKE SURE THAT NO PRODUCT DOES GO DOWN THE DRAIN...THE TRANSFORMER IS OUT-OF-SERVICE AND THEY HAVE ALREADY CONNECTED A NEW ONE TO RUN THEIR COOLING SYSTEM...THEY COVERED THE LEAKING ONE WITH PLASTIC, SO THAT IF IT RAINS, NO OIL WILL BE ABLE TO WASH AWAY...AFTER THEY CLEAN UP THE ROOF AND DRAIN, THEY WILL TAKE SWAB TESTS TO DETERMINE IF ANY PCB S ARE STILL PRESENT, IF THEY ARE, THEN MORE CLEAN UP WILL HAVE TO BE DONE...DAVE WILL SEND ME ALL THE TEST RESULTS AND THE DISPOSAL RECEIPTS...THE BUFFALO SEWER AUTHORITY WAS SATISFIED WITH THE ACTIONS TAKEN, THEY DO NOT SEE ANY PROBLEMS WITH THE SEWER LINES...I WILL DRAFT AND SEND A RESPONSIBLE PARTY NOTIFICATION LETTER. 08/30/2000: DAVE MEGASON E-MAILED RJJ STATING ME THAT THEY WILL BE USING THE DRAIN DOCTOR FOR THE GENERAL CLEANUP, AND THEN THE CONTAMINATES WILL BE HANDED OFF TO CHEMICAL WASTE MANAGEMENT FOR DISPOSAL...HE ALSO CALLED EPA AND THE EPA REPORT IS 540365. 09/07/2000: RJJ SITE INVESTIGATION AT 1300...MEET WITH DAVE MEGASON ON THE ROOF...HE GAVE ME THE PCB-IN-WIPES ANALYSIS THAT CHOPRA-LEE DID...OF THE 25 PCB-IN-WIPES TESTED, THE HIGHEST RESULTS WERE 2.36 PPB...THIS WAS BEFORE THEY CLEANED UP THE AREA, THEY WILL RETEST AFTER CLEAN UP...ALSO, THE EAST SIDE DRAIN CAME BACK ND...DAVE ALSO SAID THAT THEY WILL GET A LARGE CRANE TO REMOVE THE CLEANED AND EMPTY TRANSFORMER IN NOVEMBER...I TOLD HIM THAT THIS WOULD BE ACCEPTABLE...THEY PLAN TO HAVE THE TRANSFORMER INCINERATED...DAVE WILL KEEP ME INFORMED OF ANY OTHER ACTIONS. 11/02/2000: RJJ RECEIVED THE ANALYTICAL RESULTS FROM THE TRANSFORMER AREA TAKEN 9/15 AND 10/25...THE PCB LEVELS WERE ALL BELOW OUR ACCEPTABLE LIMITS...THEY WILL REMOVE THE TRANSFORMERS AROUND

THANKSGIVING, AND SEND ME ALL CERTIFICATES OF DESTRUCTION. 12/08/2000: RJJ TELECON DAVE MEGASON, HE SAID THAT DUE TO THE STORM, THEY COULDN T REMOVE THE TRANSFORMERS, BUT THEY WILL AS SOON AS THE SNOW MELTS IN THEIR PARKING LOT...HE WILL CALL ME WHEN THEY DO THIS. 04/24/2001: RJJ RECEIVED THE DISPOSAL RECEIPTS FOR THE TRANSFORMERS WHICH WERE TAKEN TO WASTE MANAGEMENT, INC...NO FURTHER ACTION NEEDED...SPILL CLOSED OUT.
Remark: CALLER SAID THAT THEY HAD A SLOW PCB TRANSFORMER LEAK, ON THEIR ROOF, AND SOME OF THE OIL MIGHT HAVE RAN DOWN THE DRAIN INTO THE STREET SEWER...SPILL HAS BEEN CONTAINED AND BUFFALO SEWER HAS BEEN NOTIFIED.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DISPOSAL IN THE ROLLOFF ON SITE. WHEN IT IS REMOVED THEY WILL TAKE SWIPE TESTS FROM THE CONCRETE. 09/20/01 JFO CALL FROM MARTY BORYSZAK. 80 OF THE SWIPE TESTS FAILED FOR PCB'S. HE WANTS TO MEET MONDAY THE 24TH @ 10:00 WITH FG AND REPRESENTATIVES FROM STERLING ENVIRONMENTAL AND R & D ENGINEERING. STERLING AND R&D WILL PRESENT OPTIONS TO BSA. MARTY B. WANTS TO BE SURE THEY ARE ACCEPTABLE TO DEC. 09/24/01 JFOMEETING WITH REPS. FROM BSA, FERGUSON ELECTRIC, R&D & STERLING. SINCE THIS IS A RESTRICTED AREA THAT GETS VERY LITTLE TRAFFIC, MR LANG OF FURGUSON ELECTRIC WANTS TO INCAPSULATE THE CONTAMINATED FLOOR. I WILL CONVEY THIS TO PJB AND MLD AND GET BACK TO HIM TODAY OR TOMORROW WITH AN ANSWER. OPTION 2, WILL BE TO TRY TO CLEAN THE FLOOR AGAIN TO REDUCE THE PCB LEVELS BUT THIS MAY SPREAD THE CONTAMINATION TO CLEAN AREAS ON THE FLOOR. 09/25/01 JFO SPOKE WITH MLD. HE SAID IF THE BSA FOLLOWED THE TSCA REQUIREMENTS IT WOULD NOT BE NECESSARY TO DO FURTHER WORK ON THE FLOOR OF THE ROOF. HE WILL CONTACT MR LANG TODAY AND EXPLAIN THIS TO HIM. I SPOKE WITH MARTY BORYSZAK OF BSA AND INFORMED HIM. NOW THEY WILL BE RINSING THE DOWN SPOUT WITH A SOLVENT TO CLEAN IT AND THEN RINSE WITH WATER. THEY WILL BE RECOVERING THE SOLVENT AND WATER AS THEY RINSE. EXCAVATION OF THE SOIL WILL TAKE PLACE WHEN THE DRAIN IS CLEAN. MARTY B WILL NOTIFY ME WHEN THE WORK WILL BEGIN. 09/25/01 MLD SPOKE WITH ANDREW ENGLISH, BILL YEMAN AND DAVID GREENLAW (EPA-TSCA) AND CONCLUDED THAT THE CLEANUP RESULTS PROVIDED BY BSA (9/24/01) ARE HIGHER THAN EPA'S PCB SPILL CLEANUP POLICY. HOWEVER, EPA DOES GIVE WAIVERS ON ROOFTOPS ETC. WHERE EXPOSURE IS LIMITED. THEREFORE, MLD CALLED TIM LANG OF FERGUSON ELECTRIC AND EXPLAINED THAT STERLING ENV. MUST CERTIFY THAT THEIR REMEDIATION EFFORT IS IN COMPLIANCE WITH EPA TSCA POLICY (PART 761.61...). ONCE THEY FORWARD EPA'S CONCURRENCE THEN DEC WILL BE FINISHED WITH THE ROOF PORTION OF THE SPILL. LANG WILL DISCUSS WITH WAYNE CAMERON (STERLING). MLD TELCON WITH WAYNE CAMERON. HE UNDERSTANDS THAT STERLING WILL CONTACT EPA AND GET WAIVER. HE WILL FORWARD CONCURRENCE AND CERTIFICATION REPORT TO OUR ATTENTION. 10/22/01 JFO REC'D A COPY OF THE WAIVER REQUEST FROM THE BSA TO EPA DATED OCT 18, 2001. 05/29/02 JFO CALL FROM DAN KOKEMAN OF R&D ENGINEERING. THEY WILL BE DIGGING TODAY AND TOMORROW. 06/07/02 JFO ON SITE THE SOIL IS REMOVED AND THE HOLE LOOKS OK NO ODORS. THEY WILL SAMPLED THE EAST WALL AND SOUTH WALL FOR PCB'S, NO SAMPLES FOR THE NORTH AND WEST WALLS THEY ARE CONCRETE OR THE BOTTOM IT IS BEDROCK. RESULTS TO FOLLOW. 07/09/02 JFO REC'D THE PCB REPORT: THE EAST WALL TOTAL PCB 1ppm THE SOUTH WALL TOTAL PCB <0.1ppm NEED RECEIPTS TO CLOSE 08/08/02 JFO CALL TO WAYNE CAMERON OF STERLING. I TOLD HIM WE NEED THE RECEIPTS. 08/12/02 JFO RECEIVED THE DISPOSAL RECEIPT FOR 7.5 TONS OF PCB CONTAMINATED SOIL. NO FURTHER ACTION REQUIRED. CLOSED TRANSFORMER FAILED ON ROOF OF SETTLE WASTE WATER BUILDING, SOME OIL MAY HAVE ENTERED A STORM DRAIN TO THE NIAGARA RIVER

BUILDING. ALL AREAS WERE IMPACTED BY THIS SPILL. THE SPILL WENT THROUGH THE ELECTRICAL BUSHINGS FROM THE ROOF ALL THE WAY TO THE BASEMENT AND LANDED ON TOP OF THE AIR HEAD UNIT. THE BUSHING DUCT AND INSULATION IS ALL CONTAMINATED. THE ROOF TOP IS ALL CONTAMINATED. CLEANUP WILL CONTINUE NOW AND NEXT WEEK. THEY ARE TRYING TO GET THE BACKUP POWER GOING FIRST. THE CONTAMINATION LEVEL OF THE PCB OIL IS 550,000 PPM PCB S. AN ORDER WAS APPARENT IN THE AREAS OF THE SPILLAGE. GE, WHO RECENTLY REPAIRED THE UNIT, IS RESPONSIBLE FOR THE SPILL BECAUSE THE SPILL CAME FROM AN IMPROPER REPAIR. GE, ACCORDING TO DAN BENTIVOGLI, AGREES AND THEY WILL COMPLETE THE REMEDIATION. MR. BENTIVOGLI SAID THAT THEY WILL SUBMIT A PLAN OF THE WORK THEY INTEND ON HAVING DONE SOMETIME NEXT WEEK. THE TRANSFORMER IS TO BE REMOVED IN APPROX 6 MONTHS ONCE THE BID PROCESS TO REMOVE IT IS FINAL. 12/5/00 LINDA SCOTT FROM OP TECH CALLED AND SAID THAT THE PANELS WERE TAKEN OFF THE BUSBAR AND EVERYTHING WAS WIPED DOWN. THE TRANSFORMER WAS WIPED DOWN AND THE SPILL PADS ON THE ROOF WERE CHANGED. THE BASEMENT WAS ALSO WIPED DOWN. THEY ARE CONSIDERING WHAT NEEDS TO BE DONE AT THE BASEMENT CEILING. THEY MAY EPOXY OR CHIP OUT THE CONTAMINATION. GE IS TO REPLACE THE INSULATION AFTER OP TECH IS DONE WITH THEIR CLEANUP. 12/7/00 DAN BENTIVOGLI CALLED AND UPDATED THIS OFFICE ON THE STATUS OF THE REMEDIATION. HE SAID THAT OP TECH HAS COMPLETED ALL THE WORK THEY CAN RIGHT NOW. THEY ARE LETTING THE CEILING IN THE BASEMENT LEAK AND THEN WILL CHIP IT OUT THEN EPOXY IT. THEY WILL DO THIS WORK SOME TIME NEXT WEEK. THE ELECTRICAL BUSBARS AND RAILS IN THE DUCT WILL HAVE THE INSULATION REMOVED BY NEXT TUESDAY BY GE. DAN SAID THEY WILL THEN GET THE TRANSFORMER RUNNING AGAIN. HE WILL SUBMIT A REPORT NEXT WEEK. 12/28/00 MARTY BORZAK WITH BSA CALLED AND SAID THAT DAN BENTIVOGLI HAS RETIRED. MARTY BORZAK WILL BE THE CONTACT NOW. HE REQUESTED AN ON SITE MEETING TO DECIDE ON WIPE SAMPLE LOCATIONS. WE AGREED TO INCLUDE THE NYSDOH IN THIS MEETING. 1/3/01 FG, CAMERON OCONNOR - NYSDOH, MARTY BORZAK, SAL LOTEMPIO - BSA AND LINDA SCOTT - OP TECH, MET ON SITE AND DECIDED ON WIPE SAMPLE LOCATIONS. THERE WILL BE ONE TAKEN INSIDE THE BUS BAR, 6 IN THE BASEMENT AND 2 ON THE 1ST FLOOR, ONE ON THE FLOOR AND ONE ON THE PANEL. MR. LOTEMPIO SAID THAT THE TRANSFORMERS WILL BE REPLACED IN AUGUST OR SEPTEMBER 2001. AT THAT TIME, THE ROOF AND DRAIN WILL BE REMEDIATED. 1/9/01 RECD WIPE SAMPLES FROM BSA. THREE OF THE SAMPLES WERE ABOVE 100 UG/WIPE AND FOUR WERE BELOW. 1 OUTSIDE COVER 1ST FLOOR 512 UG/WIPE 2 FLOOR IN FRONT OF BUSBAR 594 3 INSIDE BUSBAR 949 4 CRACK 3 BASEMENT) 5.1 5 INSIDE AIR VENT 7.0 6 TOP OF HIGHER AIR VENT 6.0 7 TOP OF LOWER AIR 17.4 FG SPOKE TO LINDA SCOTT WITH OP TECH WHO SAID SHE WILL TRY TO CLEAN AT S 1, 2 3 AND RESAMPLE. 8/30/01 MARTY BORYZAK WITH BSA CALLED AND SAID THAT THEY WILL BEGIN WORK ON THE TRANSFORMERS. HE WILL SEND OVER A WORK PLAN FOR THE DRAINING AND REMOVAL OF THE TRANSFORMERS THEMSELVES. A REMEDIATION PLAN FOR THE ROOF FLOOR AND DRAIN WILL BE SUBMITTED AT A LATER DATE. 8/31/01 THE WORK PLAN FOR THE REMOVAL OF THE TRANSFORMERS HAS BEEN SUBMITTED. BSA WILL NOTIFY JOHN OTTO WHEN WORK WILL BEGIN. BSA WILL SUBMIT THE WORK PLAN FOR THE ROOF REMEDIATION BY 9/5/01. 09/07/01 JFO ON SITE WITH MARTY BORYZAK. HE SHOWED ME WHERE THE PROBLEM IS AND EXPLAINED WHAT THEY ARE GOING TO DO. THEY WILL BE REMOVING THE TRANSFORMERS NEXT WEEK. THEY WILL THEN REMOVE THE STONE AND FLOOR DOWN TO THE CONCRETE. AFTER THIS IS COMPLETE THEY WILL EXCAVATE AROUND THE DOWNSPOUT. 09/14/01 JFO ON SITE MET WITH MARTY BORYSZAK AND WAYNE CAMERON OF R D ENGINEERING. THE ROOF FLOOR IS BEING REMOVED AND PLACED IN PLASTIC BAGS FOR DISPOSAL IN THE ROLLOFF ON SITE. WHEN IT IS REMOVED THEY WILL TAKE SWIPE TESTS FROM THE CONCRETE. 09/20/01 JFO CALL FROM MARTY BORYSZAK. 80 OF THE SWIPE TESTS FAILED FOR PCB S. HE WANTS TO MEET MONDAY THE 24TH @ 10:00 WITH FG AND REPRESENTATIVES FROM STERLING ENVIRONMENTAL AND R D ENGINEERING. STERLING AND R D WILL PRESENT OPTIONS TO BSA. MARTY B. FUDS:

Federal Facility ID: NY9799F1307
FUDS #: C02NY0977
Facility Name: STERLING ENGINE CO
City: BUFFALO
State: NY
EPA Region: 2
County: ERIE
Congressional District: 27
US Army District: New England District (NAE)
Fiscal Year: 2007
Telephone: 978-318-8238
NPL Status: Not Listed
RAB: Not reported
CTC: 442.77760
Current Owner: PRIVATE

Actual:
611 ft.

FUDS Description Details:

The Navy used 1 acre of land at the Naval Industrial Reserve Plant, Sterling Engine Plant, in Buffalo, New York. The building constructed on the site was used for testing marine engines. The buildings on the site are beneficially used by the current owner. There is a vault with three 5,000-gal. tanks in the northern portion of the site. The tanks are no longer in use. The current owner uses the area of the vault (and possibly inside the vault as well) for waste disposal.

FUDS History Details:

On 18 June 1943, the Navy purchased 1.00 acre of unimproved land for expansion of the Sterling Engine Company. On 8 February 1960, the site was transferred to the General Services Administration. On 20 October 1960, the GSA conveyed the site to a private party with no restrictive, recapture, or restoration clauses.

FUDS Current Program Details:

On 18 June 1943, the Navy purchased 1.00 acre of unimproved land for expansion of the Sterling Engine Company. On 8 February 1960, the site was transferred to the General Services Administration. On 20 October 1960, the GSA conveyed the site to a private party with no restrictive, recapture, or restoration clauses.

FUDS Future Program Details:

On 18 June 1943, the Navy purchased 1.00 acre of unimproved land for expansion of the Sterling Engine Company. On 8 February 1960, the site was transferred to the General Services Administration. On 20 October 1960, the GSA conveyed the site to a private party with no restrictive, recapture, or restoration clauses.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

DEC Remarks: 4/2/97 SITE VISIT. SITE IS AN EXISTING SPILL. OWNER IS G G PETROLEUM. MET MICHAEL GEIGER ON SITE, STATION OWNER. HE SAID CARMEN COSTA IS CLEANING UP SOIL STAGED BEHIND STATION. SOIL PILE IS MASSIVE AND LOOKS VERY OLD. DOES NOT LOOK LIKE ANY WORK HAS BEEN DONE ON SITE FOR A LONG TIME. WENT TO SPEAK TO THE CALLER, ARTHUR SMITH. HE SAID THAT GASOLINE WAS RUNNING OFF THE PILE THAT BUTTS UP ALONG THE BACK OF HIS PROPERTY. HIS CHILDREN WERE IN THE YARD PLAYING. mR. SMITH SAID THAT HIS CHILDREN S CLOTHES SMELLED LIKE GASOLINE WHENEVER THEY WENT OUT TO PLAY. HE SAID HE MAY CALL CALL 4 ACTION BECAUSE HE IS CONCERNED ABOUT HIS CHILDREN S WELFARE AND HIS PROPERTY. HE IS UNHAPPY ABOUT A SHED BEING PUT UP ON THE SOIL PILES. 4/3/97 SITE REFERRED TO SPILL 9400660. SITE CAN BE CLOSED.

Spill Cause: CALLER STATES THAT CONTAMINATED SOIL IS BEHIND HIS PROPERTY AND IS RUNNING OFF INTO HIS PROPERTY CALLER STATED THAT MOBIL REPLACED UST S LAND THE SOIL WAS AFFECTED AT THAT TIME

WIESMORE REQUESTING A RESPONSE TO THE 9/9/99 LTR BY 12/20/99.
1/31/00 LTR SENT TO MR. WIESMORE REQUESTING REMEDIATION OR
SUBMISSION OF A SIGNED RIGHT OF ENTRY BY 2/18/00. 7/11/00
RECEIVED RIGHT OF ENTRY FROM CAROL WIESMORE, PROPERTY OWNER.
RECEIVED A COPY OF THE DEED WHICH INDICATES THAT TEXACO WAS THE
PREVIOUS OWNER AND OPERATOR. CONTACTED MR. ROGER HADLEY OF
TEXACO, (713)752-3162, MANAGER ENVIRONMENTAL PROJECT MANAGEMENT
SERVICES, POB 1404, HOUSTON, TEXAS 77251. HE SAID TO SEND HIM
THE INFORMATION WE HAVE AND HE WILL SEARCH HIS RECORDS FOR
INFORMATION. I TOLD HIM WE HAVE THE SIGNED RIGHT OF ENTRY. HE
SAID HE WILL LOOK AT HIS RECORDS AN OURS AND GET BACK TO US ON
REMEDATION. LTR SENT REQUESTING HIS RESPONSE BY 8/2/00. 7/19/00
RECD THE LCS PHASE I/II WHICH SHOWS SOILS AND BEDROCK
GROUNDWATER CONTAMINATION. NO ANALYTICAL WAS COMPLETED. COPY OF
THE REPORT WAS SENT TO ROGER HADLEY WITH TEXACO. 8/7/00 RECD
TEXACO RESPONSE. THEY INDICATED THAT THEY WILL COMPLETE A SITE
ASSESSMENT AND EXPECT A WORK PLAN TO BE SUBMITTED BY EARLY
SEPTEMBER 2000. 9/21/00 JUDSON POLIKOFF WITH TEXACO CALLED AND
SAID THAT MRS. WIESMORE RECEIVED THE RIGHT OF ENTRY BUT HASN'T
RETURNED IT TO THEM YET. HE SAID TEXACO IS READY TO BEGIN WORK
AS SOON AS SHEDOES. 10/20/00 RECD THE SIGNED AGREEMENT WITH
TEXACO. CAROL WIESMORE SIGNED IT AND IT NOW NEEDS TEXACO'S
SIGNATURE. THIS DOCUMENT WAS MAILED TO TEXACO AND THEY WILL SIGN
IT AND PROVIDE AN INVESTIGATION PLAN FOR THE SITE. 11/6/00 RECD
A LTR FROM TEXACO STATING THAT THEY SIGNED THE AGREEMENT AND
RETURNED IT TO THE WIESMORE'S. TEXACO WILL PROVIDE A WORK PLAN
BY 11/6/00. 12/12/00 FG SPOKE TO DOUG LIDDELL WITH GES. HE SAID
THAT HE BEGAN THE SITE INVESTIGATION YESTERDAY. THEY COMPLETED A
BORING INTO ROCK AND DIDN'T FIND WATER AFTER DRILLING 35 FT. THEY
LET THE BORING SIT OVERNIGHT AND DISCOVERED WATER AT 18 FT WHEN
THEY CHECKED IT THIS MORNING. 2/20/01 JUDSON POLIKOFF CALLED AND
SAID THAT HE WILL HAVE AN UPDATE REPORT IN BY THE END OF NEXT
WEEK. 3/7/01 RECD SITE ASSESSMENT. 11 BORINGS COMPLETED ON SITE.
3 BEDROCK WELLS AND ONE OVERBURDEN WELL INSTALLED. THE ONLY
STARS EXCEEDANCE FOR SOIL IS AT SB6. ALL 4 WELLS HAVE SLIGHT
EXCEEDANCES OF STARS/GROUNDWATER STANDARDS. TEXACO HAS PROPOSED
TO SAMPLE THE WELLS QUARTERLY FOR A YEAR TO DETERMINE IF THESE
LEVELS REMAIN STABLE. 11/03/01: MF FOR FG, LETTER TO TEXACO
REQUESTING QUARTERLY MONITORING, RESPONSE BY 12/3/01. 11/20/01:

SUBMITTED A LETTER INDICATING THEY ARE THE CONTRACTOR FOR THIS
SITE AND ALL CORRESPONDENCE SHOULD BE DIRECTED TO THEM. 11/26/03
SAIC SUBMITTED THE QUARTERLY REPORT FOR THIS SITE. SAMPLES WERE
COLLECTED FROM THE ONSITE GROUNDWATER WELLS ON 7/29/03. MW3
EXCEEDED STANDARDS FOR BENZENE, ISOPROPYLBENZENE, AND
NPROPYLBENZENE. MW4 EXCEEDED STANDARDS FOR BENZENE, TOLUENE,
ETHYLBENZENE, XYLENES, NBUTYLBENZENE, SEC BUTYLBENZENE
ISOPROPYLBENZENE, NPROPYLBENZENE AND 124TRIMETHYLBENZENE. MW 5
EXCEEDED STANDARDS FOR BENZENE, TOLUENE, ETHYLBENZENE, XYLENE,
SEC BUTYLBENZENE, ISOPROPYLBENZENE, NPROPYLBENZENE,
124TRIMETHYLBENZENE, AND M,PXYLENE. MW6 WASCLOSED IN PLACE AND A
NEW WELL MW6A WAS INSTALLED. MW6A HAD NO CONTAMINATION DETECTED
ABOVE STANDARDS. 1/30/04 SAIC SUBMITTED THE QUARTERLY REPORT FOR
THE SITE. THE GROUNDWATER SAMPLES WERE COLLECTED ON 10/21/03.
THE RESULTS EXCEEDED GROUNDWATER STANDARDS IN MW3, MW4 & MW5.
7/15/04 RECD THE SAIC LETTER REPORT REQUESTING SITE
INACTIVATION. THE GROUNDWATER RESULTS SLIGHTLY EXCEED
GROUNDWATER STANDARDS. NONE OF THE SOIL SAMPLES EVER EXCEEDED
TAGM 4046 LEVELS. THE SITE IS INACTIVE WITH NO FURTHERWORK
REQUIRED.

Remarks: UPON INTRUSIVE INVESTIGATION SQIL CONTAMINATION WAS DETECTED. GROUND WATER
CONTAMINATION MAY ALSO BE PRESENT.

Env Problem: An environmental assessment is planned for this Site to be completed in 2008 to determine the nature and extent of potential environmental contamination.

Site Description: The 1318 Niagara Street Site encompasses 0.77-acres in the western portion of the City of Buffalo, Erie County, New York. The Site is located in an urban setting, and is bounded to the east by Niagara Street, to the west by Penn Central Railroad, and beyond by New York State I-190 and the Black Rock Canal. The Site is bordered to the north and south by commercial properties. The Site was utilized as a brewery from before 1909 until 1987. The Site was held by private owners from 1987 to 2004, and is now owned by the City of Buffalo. The City of Buffalo began demolition of the Site buildings in May of 2006. During the demolition activities in January of 2007, two 20,000-gallon underground storage tanks were discovered and excavated from the Site. Chemical analysis of the tank contents indicated the presence of polychlorinated biphenyls (PCBs) at elevated concentrations, as well as other chlorinated solvents. The tank contents were removed and sent off site for disposal. Upon removal of the tanks it was discovered that one of the tanks had leaked. The remains of the demolished Site buildings have been disposed of off-site, and the two empty USTs have been staged on a portion of the Site. The Site is currently inactive, and has been secured with a chain link fence. In July of 2007, the City of Buffalo entered into an Environmental Restoration Program to investigate the Site. The City of Buffalo is currently in the process of entering a State Assistance Contract (SAC) with the New York State Department of Environmental Conservation. Once the SAC is initiated, the City of Buffalo will begin the investigation of the Site for potential environmental contamination.

Site Description:

ChemCore, Inc. is a two story, 39,000 sq./ft. warehouse/office building. The building's primary occupant(s) were ChemCore, Inc. which operated a chemical bulk sales operation until going bankrupt in 1998 and Crandall Filling Machine which was a toolmaking operation for the bottle filling industry until moving its operation in May 1999. The facility has been used for chemical storage and sales since approximately 1920. As part of the bankruptcy agreement ChemCore completed a Phase I, Environmental Assessment to determine the value of the facility as collateral. As a result of the recommendations a Phase II, Limited Site Evaluation was completed which included several soil borings. Toxicity Characteristic Leaching Procedure (TCLP) samplestaken from these borings indicated the presence of hazardous waste. The hazardous waste as identified consisted of primarily, tetrachloroethene, 1,1,1-trichloroethane, and trichloroethene. A subsequent Immediate Investigative Work Assignment

(IIWA) completed by the Department verified soil contamination at depth under the facility and under parking areas directly to the north and south of the facility. Installation and sampling of monitoring wells has indicated that the groundwater under the facility is also contaminated. Water level measurements from these wells and from nearby Black Rock Channel suggests a hydraulic connection between the two. The site has been referred by DEE to implement a Remedial Investigation / Feasibility Study (RI/FS) under State Superfund. A consultant was selected in January 2001 and the RI/FS is complete. A ROD has been issued that includes complete demolition of the buildings, excavation of the highest contamination areas and a groundwater pump and treatment systems with a five year review. Included in the remedial effort is a pilot test of enhanced bioremediation of groundwater. The remedial design was completed in August 2005. The remedial construction is completed and the on-site pump and treat system is in operation.

Environmental Problems: Contamination has been found in site soils and groundwater, under the building and outside of the building to the north. It has also been indicated that there is a hydraulic connection between the contaminated groundwater and Black Rock Channel. The remedial action has removed the contaminated soil and the on-site groundwater pump and treat system is in operation. This action has eliminated the migration of contaminants from the soil and the pump and treat system will remediate the groundwater over time.

Health Problems Assessment: The site is fenced, thus limiting access. Most of the property is occupied by the building and parking areas cover the remainder of the property. Exposures via drinking water are not expected because nearby residences and businesses are served by public water.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/07/2008	Source: EPA
Date Data Arrived at EDR: 10/16/2008	Telephone: 703-412-9810
Date Made Active in Reports: 12/08/2008	Last EDR Contact: 01/30/2009
Number of Days to Update: 53	Next Scheduled EDR Contact: 04/13/2009
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/03/2007	Source: EPA

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

VAPOR REOPENED: Vapor Intrusion Legacy Site List

"Vapor intrusion" refers to the process by which volatile chemicals move from a subsurface source into the indoor air of overlying or adjacent buildings. The subsurface source can either be contaminated groundwater or contaminated soil which releases vapors into the pore spaces in the soil. Improvements in analytical techniques and knowledge gained from site investigations in New York and other states has led to an increased awareness of soil vapor as a medium of concern and of the potential for exposures from the soil vapor intrusion pathway. Based on this additional information, New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

State and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

State and tribal Brownfields sites

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities—especially those without EPA Brownfields Assessment Demonstration Pilots—minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 10/28/2008	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/29/2008	Telephone: 202-343-9775
Date Made Active in Reports: 12/08/2008	Last EDR Contact: 01/30/2009
Number of Days to Update: 40	Next Scheduled EDR Contact: 04/27/2009
	Data Release Frequency: Quarterly

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 10/30/2008	Source: EPA
Date Data Arrived at EDR: 10/31/2008	Telephone: (212) 637-3000
Date Made Active in Reports: 12/23/2008	Last EDR Contact: 03/30/2009
Number of Days to Update: 53	Next Scheduled EDR Contact: 06/29/2009
	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2005	Source: EPA/NTIS
Date Data Arrived at EDR: 03/06/2007	Telephone: 800-424-9346

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2006

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation

Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Day Care Providers

Source: Department of Health

Telephone: 212-676-2444

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

GEOCHECK® - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

055833-01 - BUFFALO, NY
1130 NIAGARA STREET
BUFFALO, NY 14213

TARGET PROPERTY COORDINATES

Latitude (North):	42.91450 - 42° 54' 52.2"
Longitude (West):	78.9007 - 78° 54' 2.5"
Universal Tranverse Mercator:	Zone 17
UTM X (Meters):	671355.2
UTM Y (Meters):	4753243.5
Elevation:	604 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	42078-H8 BUFFALO NW, NY
Most Recent Revision:	1965

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> ERIE, NY	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	3602300015B
Additional Panels in search area:	Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> BUFFALO NW	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:
Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Aleris, Inc, Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Water

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Udorthents

Soil Surface Texture:
Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 137 inches

No Layer Information available.

Soil Map ID: 4

Soil Component Name: Urban

Soil Surface Texture:
Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 54 inches

No Layer Information available.

Soil Map ID: 5

Soil Component Name: Urban

Soil Surface Texture:
Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 69 inches

No Layer Information available.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Certified Sanborn® Map Report Enhancements for 2009

The accompanying Certified Sanborn Map Report reflects a number of enhancements that make it easier for you to review these historical maps. EDR has digitally joined together the more than one million fire insurance maps from the Sanborn Library collection so that your target property is centered, making it easier for you to review adjoining properties. Here is a list of the new features:

- Your target property is centered on each map. You can quickly locate your target property and view adjoining properties. Plus, adjoining properties are included more often, reducing your need to refer to additional maps.
- All maps are now displayed at a uniform scale. This makes it easier for you to view changes to the property over time.
- We've increased coverage by adding thousands of new maps from 40 cities for years 1994-2007.
- A new Map Key and Sheet Thumbnails let you reference sheet numbers, year and volume of original Sanborn Map panels used for this report.

For more information about the new enhancements to the Certified Sanborn Map Report, contact your EDR representative at 800-352-0050.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDRs professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.'s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

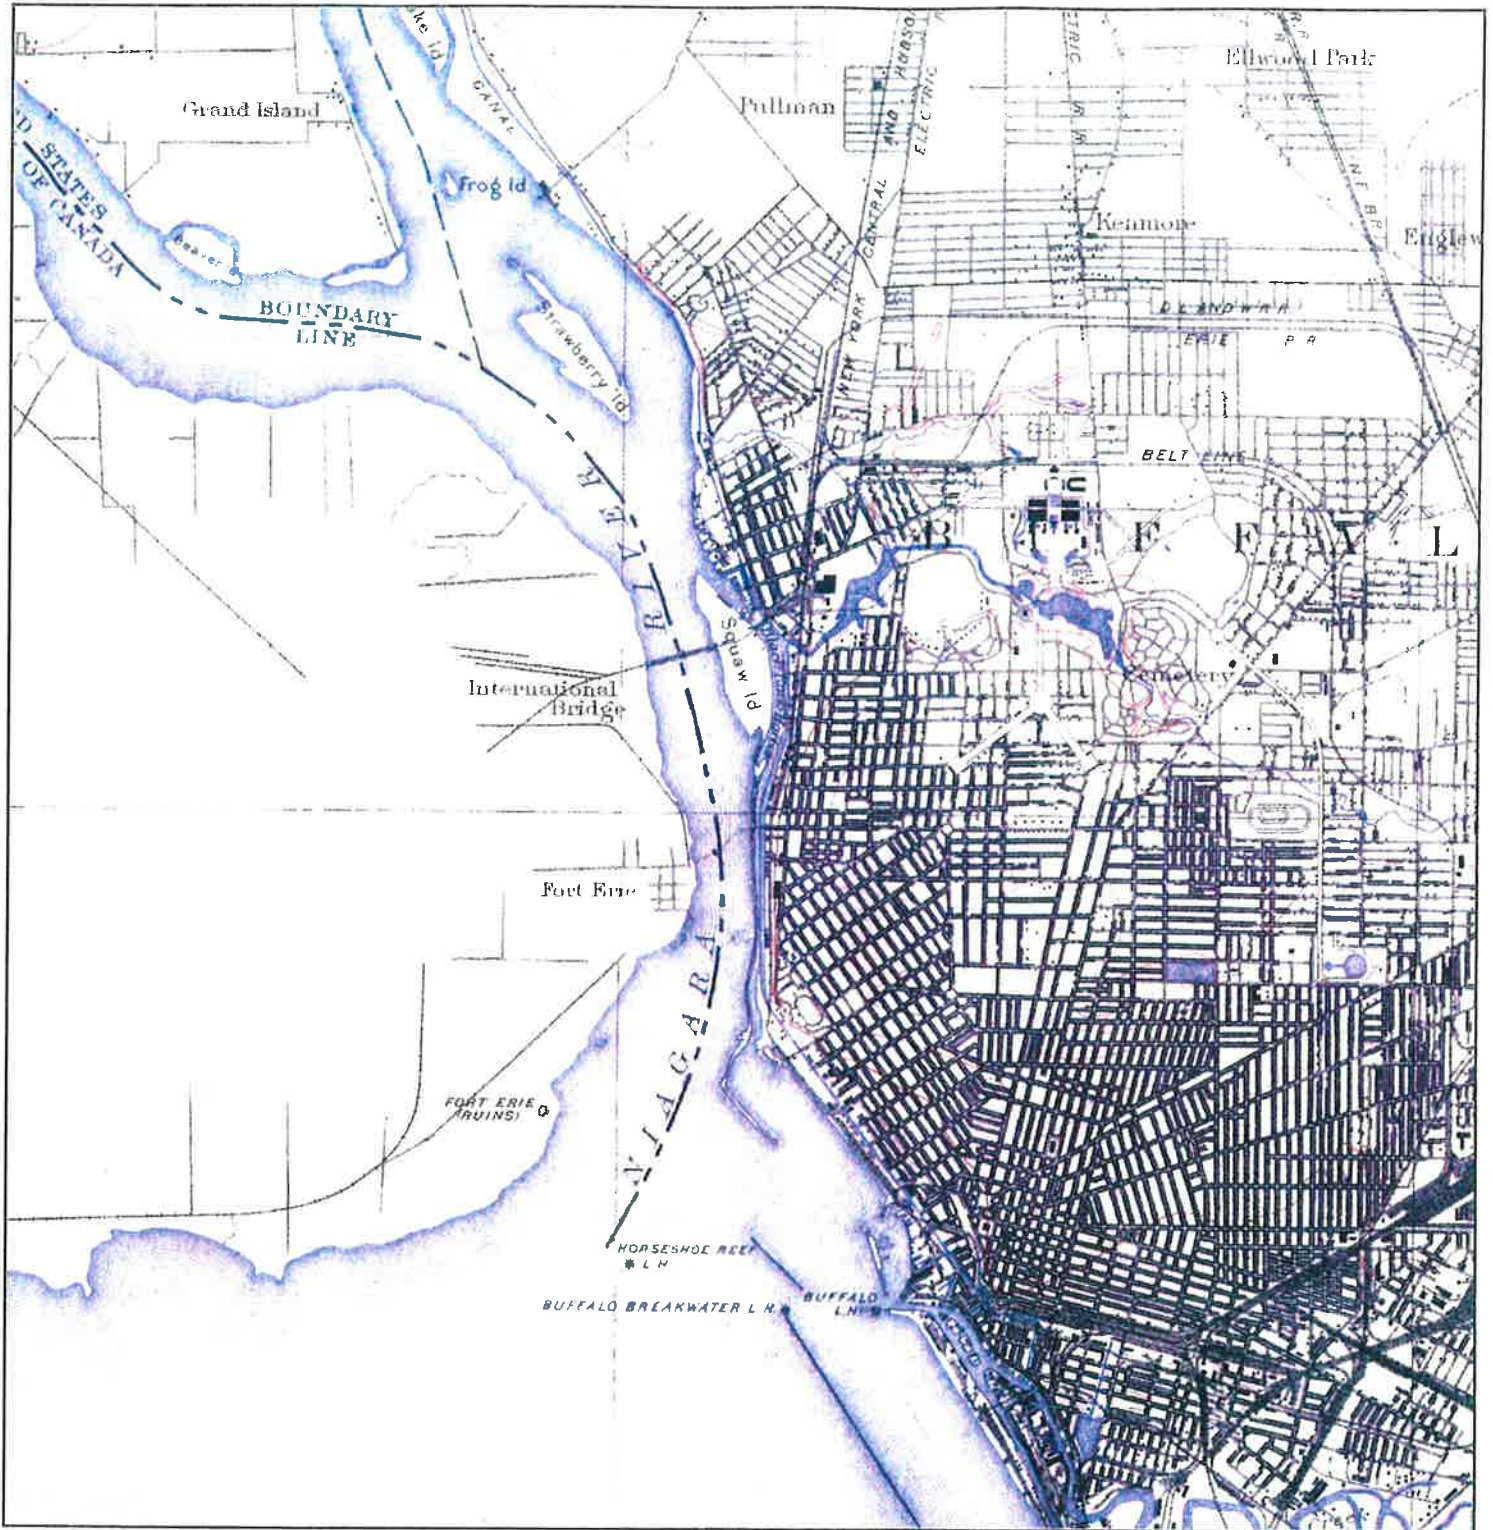

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

BARGAIN AND SALE DEED

THIS INDENTURE, is made as of the 18th day of January, 2005, by CURTIS SCREW CO., INC., formerly known as Coulter-Curtis Screw Co., a Delaware corporation having an office at 50 Thistman Drive, Buffalo, NY 14206 (the "Grantor") to GERSPACH PROPERTIES, LLC, a New York limited liability company having an office at 1865 Grand Island Boulevard, Grand Island, NY 14072 (the "Grantee"). *By Screw Co., Inc.*

WITNESSETH that Grantor, for one dollar and other good and valuable consideration, does hereby grant and release unto Grantee, its successors and assigns forever, all right, title and interest of Grantor in and to the real property described in Schedule A attached hereto.

TOGETHER with the appurtenances and all the estate and rights of Grantor in and to said premises.

AND THE GRANTOR COVENANTS that, in compliance with Section 13 of the Lien Law, it will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

AND THE GRANTOR FURTHER COVENANTS that it has not done or suffered anything whereby the said premises have been encumbered in any way whatsoever.

AND THE GRANTOR FURTHER COVENANTS that the foregoing conveyance does not represent all or substantially all of the assets of the Grantor and is made in the ordinary course of business of Grantor.

TO HAVE AND TO HOLD the premises herein granted unto Grantee, its successors and assigns forever.

IN WITNESS WHEREOF, Grantor has caused this Bargain and Sale Deed to be executed as of the day and year first above written.

CURTIS SCREW CO., INC.

SCHEDULE A

PARCEL A

All that tract or parcel of land situate in the City of Buffalo, County of Erie and State of New York, described as follows:

Beginning at a point in the southerly line of Gull Street at the distance of 194 feet westerly from the point of intersection of the said southerly line of Gull Street with the westerly line of Niagara Street; running thence westerly along the said southerly line of Gull Street 35 feet; then southerly at right angles to Gull Street 84 1/2 feet; thence easterly parallel with Gull Street, 35 feet and thence northerly at right angles to Gull Street 84 1/2 feet to the southerly line of Gull Street and the place of beginning.

PARCEL B

All that tract or parcel of land situate in the City of Buffalo, County of Erie and State of New York, described as follows:

Beginning at a point in the southerly line of Gull Street at the distance of 229 feet westerly from the point of intersection of the southerly line of Gull Street with the westerly line of Niagara Street; running thence westerly along said southerly line of Gull Street 35 feet; thence southerly at right angles to Gull Street 84 1/2 feet; thence easterly parallel with Gull Street 35 feet and thence northerly at right angles to Gull Street 84 1/2 feet to the southerly line of Gull Street and the place of beginning.

PARCEL C

All that tract or parcel of land situate in the City of Buffalo, County of Erie and State of New York, being part of Lot No. 4 in Block No. 203, described as follows:

Beginning at a point in the southerly line of Gull Street distant 136 feet westerly from the point of its intersection with the westerly line of Niagara Street; running thence westerly along said southerly line of Gull Street 58 feet; thence southerly at right angles about 84-1/2 feet to the south line of said Lot No. 4 in Block No. 203; thence easterly along the said south line of Lot No. 4 in Block 203, 58 feet to a line drawn at right angles to Gull Street southerly from the place of beginning; thence northerly along the last mentioned right angle line to the south line of Gull Street at the place of beginning.

PARCEL D

All that tract or parcel of land situate in the City of Buffalo, County of Erie and State of New York, being part of Block No. 203, described as follows:

Beginning at a point where the southerly line of Gull Street intersects the westerly line of Niagara Street; thence southerly along the westerly line of Niagara Street 42 feet; thence westerly parallel with Gull Street 132.1 feet to a stake; thence northerly 40.86 feet to the south line of Gull Street; thence easterly along said south line of Gull Street 136 feet to the place of beginning.

PARCEL E

All that tract or parcel of land situate in the City of Buffalo, County of Erie and State of New York, being part of Subdivision Lot No. 4 in Block No. 203, described as follows:

Beginning at a point in the westerly line of Niagara Street 42 feet south of the intersection of Niagara Street with the southerly line of Gull Street; thence westerly and parallel with Gull Street 131.67 feet; thence southerly at right angles with Gull Street 41.89 feet to the southerly line of said Subdivision Lot No 4; thence easterly along the southerly line of said Subdivision Lot No. 4, 127.3 feet to the westerly line of Niagara Street; thence northerly along said westerly line of Niagara Street 43.51 feet to the place of beginning.

PARCEL F

All that tract or parcel of land situate in the City of Buffalo, County of Erie and State of New York, being Lot No. 5 in Block No. 203 of the Village of Black Rock as the same is designated on the map of the said Village filed in the Office of the Secretary of the State of New York

Excepting premises conveyed by William A. Bird to Buffalo & Lockport Railroad Company and to New York Central Railroad Company

Also excepting such lands as were taken by the State of New York for canal purposes under a canal award recorded in the Erie County Clerk's Office in Liber 196 of Deeds at page 48, being a strip of land 99 feet wide fronting on Niagara Street and extending to the lands of the New York Central Railroad Company and also a strip of land lying between the north and south line of Lot No. 5, Block No. 203 fronting on the west line of the New York Central Railroad Company's land and extending to the lands taken by the State of New York under said canal award and being the same premises conveyed by Robert S. Donaldson and George C. Miller, as executors of the Last Will and Testament of Grace E. Bird deceased to Joseph F. Staboll by deed dated November 3, 1910 and recorded in the said Clerk's Office in Liber 1169 at page 306, November 3, 1910

PARCEL G

All that tract or parcel of land situate in the City of Buffalo, County of Erie and State of New York, being part of Block No. 203, described as follows:

Commencing at a point in the southerly line of Gull Street distant 299 feet westerly from the westerly line of Niagara Street; thence westerly along the southerly line of Gull Street 30 feet; thence southerly at right angles 84-1/2 feet; thence easterly and parallel with the southerly line of Gull Street 30 feet; thence at right angles northerly 84-1/2 feet to the southerly line of Gull Street to the place of beginning

PARCEL H

All that tract or parcel of land situate in the City of Buffalo, County of Erie and State of New York described as follows:

Beginning at a point in the southerly line of Gull Street 264 feet westerly from the point of intersection of the westerly line of Niagara Street with the said southerly line of Gull Street; running thence southerly and at a right angle to Gull Street 84-1/2 feet; thence westerly and parallel with Gull Street 35 feet; thence northerly and at right angles 84-1/2 feet to the southerly line of Gull Street and thence easterly along the southerly line of Gull Street 35 feet to the place of beginning

PARCEL I

All that tract or parcel of land situate in the City of Buffalo, County of Erie and State of New York, being part of Lot No. 3 Block No. 203 in the late South Village of Black Rock, described as follows:

Beginning at the point of intersection of the northerly line of Gull Street with the easterly boundary of lands owned by the New York Central & Hudson River Railroad Company; running thence northerly along said boundary line 84.39 feet to the northerly line of said Lot No. 3; thence easterly along the northerly line of said Lot No. 3, 173.56 feet to the northwesterly corner of lands conveyed by the City of Buffalo to Frank Feind and Emil A. Reinhard by Quit Claim Deed dated September 20, 1938 and recorded in Erie County Clerk's office in Liber 2804 of Deeds at page 451 on September 20, 1938; thence southerly along the westerly line of said lands so conveyed by the City of Buffalo by said deed 83.2 feet to the northerly line of Gull Street, thence westerly along the northerly line of Gull Street 172.38 feet to the point or place of beginning

PARCEL J

ORDER 231274

thence northerly along the easterly bounds of said Railroad lands 84-1/2 feet to the southerly line of Gull Street and thence easterly along the southerly line of Gull Street 67 feet to the place of beginning

ORDER 231274

All that tract or parcel of land situate in the City of Buffalo, County of Erie and State of New York, being part of Block No 203, being 50 feet front and rear by 108 feet in depth, situate on the southerly side of West Ferry Street, commencing at the easterly corner of the New York Central Railroad Company's land.

PARCEL K

All that tract or parcel of land situate in the City of Buffalo, County of Erie and State of New York described as follows:

Beginning at a point in the southerly line of Ferry Street distant 288 feet westerly from its intersection with the westerly line of Niagara Street; running thence westerly along the southerly line of Ferry Street 66 feet; running thence southerly parallel with Niagara Street 112 feet; running thence easterly parallel with Ferry Street 66 feet; running thence northerly parallel with Niagara Street 112 feet to the place of beginning

PARCEL L

All that tract or parcel of land situate in the City of Buffalo, County of Erie and State of New York, being part of Lot No. 3 in Block No. 203 in the late South Village of Black Rock, described as follows:

Beginning at the point of intersection of the northerly line of Gull Street with the westerly line of Haggart Alley; running thence westerly along northerly line of Gull Street 40 feet; thence northerly on a line parallel with the westerly line of Haggart Alley, 85.55 feet to the northerly line of said Lot No. 3; thence easterly along the northerly line of said Lot No. 3, 40 feet to the westerly line of Haggart Alley; thence southerly along the westerly line of Haggart Alley 85.55 feet to the northerly line of Gull Street at the point or place of beginning

PARCEL M

All that tract or parcel of land situate in the City of Buffalo, County of Erie and State of New York, being part of Subdivision Lot Nos. 1 and 2 of Block No. 203 in the late South Village of Black Rock, described as follows:

Beginning at a point in the southerly line of Ferry Street at its intersection with the westerly line of Haggart Alley, and running thence westerly along said line of Ferry Street 109 feet; thence southerly parallel with Haggart Alley 108 feet; thence easterly 109 feet; thence northerly along Haggart Alley 108 feet to the place of beginning

PARCEL N

All that tract or parcel of land situate in the City of Buffalo, County of Erie and State of New York being part of Block No. 203, described as follows:

Beginning at a point in the southerly line of Gull Street at the distance of 329 feet westerly from the point of intersection of the westerly line of Niagara Street with the said southerly line of Gull Street; running thence southerly at right angles to Gull Street 84-1/2 feet; thence westerly and parallel with Gull Street 66 feet to the easterly bounds of lands owned by The New York Central and Hudson River Railroad Company; thence northerly along the easterly bounds of said Railroad lands 84-1/2 feet to the southerly line of Gull Street and thence easterly along the southerly line of Gull Street 67 feet to the place of beginning

APPENDIX H

USER QUESTIONNAIRE

**CONESTOGA-ROVERS
& ASSOCIATES**

Date: April 3, 2009

Reference No. 055833-98

PHASE I ESA USER QUESTIONNAIRE

Description of Site/Address: Office/Warehouse Structure located at
1130 Niagara Street in Buffalo. Property extends from
Niagara to CSX Rail line.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?
Not aware of any liens or pending clean up actions.

2. Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?
Not aware of any AULs.

3. As the user of this ESA do you have specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
Owner of adjoining property located North of Subject site. Past property uses include pool supply warehouse and machine shop activities. Chemical storage thought to be primarily oxidizers.

4. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?
Price offered is reasonable for vacant property in the Niagara section of Buffalo

5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,
 - a. Do you know the past uses of the property?
Machine shop oils + Degreasers
 - b. Do you know of specific chemicals that are present or once were present at the property?
None specific

CONESTOGA-ROVERS
& ASSOCIATES

2

c. Do you know of spills or other chemical releases that have taken place at the property?

Runoff from a significant fire 2008

d. Do you know of any environmental cleanups that have taken place at the property?

None that I am aware

6. As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

Fine Run off West property boundary

Preparer represents that, to the best of the Preparer's knowledge, the above statements and facts are true and correct; and, to the best of the Preparer's actual knowledge, no material facts have been suppressed or misstated.
