Re: Phase I Environmental Site Assessment  
Commercial Property, 4245 Clark Street, Hamburg, NY  
Project No. e2121

Dear Mr. Waterfield:

Please find attached one electronic copy of the final report for a Phase I Environmental Site Assessment (ESA) completed on the above-referenced site. This Phase I ESA was completed in accordance with our agreement signed on July 1, 2022. The attached report, as noted therein, has been prepared in general accordance with the ASTM Standard E1527-13.

Information accumulated for this assessment will be retained with your project file. The report and information in your file is considered confidential and will not be released without your written authorization.

If you have any questions concerning the information presented in this report, please contact me directly. Thank you for the opportunity to provide these site assessment services.

Very truly yours  
ENVIRONMENTAL ADVANTAGE, INC.

C. Mark Hanna, CHMM  
President

## **PHASE I ENVIRONMENTAL SITE ASSESSMENT**

**Commercial Property  
4245 Clark Street  
Hamburg, New York 14075**

### **EXECUTIVE SUMMARY**

In accordance with the executed agreement, dated July 1, 2022, Environmental Advantage, Inc. (EA) completed a Phase I Environmental Site Assessment (ESA) of the above-referenced property (hereinafter “subject site”) for Bevrich Corp. (hereinafter “Client”). This ESA includes figures in Appendix A, completed user/client and owner questionnaires in Appendix B, site inspection photographs in Appendix C, field notes and various communications in Appendix D, regulatory databases in Appendix E, historical information and requests in Appendix F, report objectives and limitations in Appendix G, professional qualifications in Appendix H, environmental professional(s) statement in Appendix I and references and footnotes in Appendix J.

The subject site consists of one parcel totaling approximately 0.38 acres of land located at 4245 Clark Street in the Village of Hamburg, Erie County, New York. The subject site is located on the southeast side of Clark Street, east of the Clark Street and Old Clark Street intersection (Refer to Figure 1 presented in Appendix A). According to information obtained from the Erie County Geographic Information System (GIS) website and Hamburg Assessor’s Office<sup>1</sup>, the subject site is identified as SBL #183.18-2-6, currently owned by Robert Waterfield.

Approximate Site boundaries and Site features are illustrated in Figure 2. The subject site is developed with a one-story approximate 4,336-square foot structure, as shown in Figure 2. The structure was originally constructed by 1946 with several later additions. According to Mr. Waterfield, the structure has been utilized as a dry cleaning facility since construction in 1946, occupied by Vara’s Dry Cleaning until the present time.

A summary of most probable Site history indicates that the subject site was originally vacant land in the early 1900s. By 1946, the northern portion of the subject site was developed with its current one-story structure. Since 1946, the structure has been utilized as dry cleaners, occupied by Vara’s Dry Cleaners.

EA has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM practice E 1527-13 of the subject site located at 4245 Clark Street in the Village of Hamburg, Erie County, New York. Two data gaps were identified that could have significantly affected EA’s ability to identify recognized environmental conditions associated with the subject site, as described below. Any exceptions to or deletions from this practice are described in Appendix G (Objectives and Limitations) of this report.

This assessment has revealed no evidence of recognized environmental conditions in connection with the subject site, except for the following:

- The subject site has been utilized as a dry cleaner, occupied by Vara's Dry Cleaning, since construction in 1946 through the present. According to Mr. Waterfield, only mineral spirits has been used at the subject site, as opposed to a chlorinated solvent. Historically, mineral spirits has been stored in three ASTs, two previously located along the southeastern exterior of the structure which were installed in 1946 and removed in the 1980s, and one currently located along the southern exterior, which was installed in the 1980s and is still in service. Evidence of staining was observed beneath the current AST and around the dry cleaning equipment.

The concrete floor in the dry cleaning room exhibited staining, limited cracking and deterioration, and one floor drain was present which reportedly discharges to the rear of the property. Stressed vegetation and staining on the asphalt parking lot were observed and appeared to be associated with the boiler blowdown discharge from two pipes along the southwestern corner of the structure. Additionally, small volumes of wastewater from an air vacuum connected to the steamers is directly discharged to the ground surface along the southeastern exterior of the structure.

In that regard, concern exists with respect to possible past release(s) of mineral spirits and other chemicals utilized during routine operations (water-repellant, spot cleaning chemicals, etc.) related to its use, storage, and/or disposal.

- The eastern adjacent property, occupied by Dura Plating Inc., addressed at 4255 Clark Street, was listed on the database for several listings, including a Generator from a Hazardous Waste Manifest for the disposal of chromium. A manifest from 2002 listed the disposal of 800 pounds of "chromium contaminated soil". No spill listing was associated with this manifest. In that regard, concern exists with the respect to possible past release(s) of chromium and other hazardous substances and/or chemicals related to its use, storage, and/or disposal at the eastern adjoining property.

In this context, EA recommends that a Phase II ESA subsurface investigation be completed on the subject site to assess if the soil profile and/or groundwater have been impacted by the historical site and off-site chemical usages.

This assessment has revealed no evidence of controlled or historical recognized environmental conditions in connection with the subject site.

EA did not note any de minimis matters which, although not rising to the level of a recognized environmental condition, present limited liability and/or business risk and should be considered by the Client.

Finally, EA did note the following non-scope consideration which, although addressed as additional issues under the ASTM E1527-13 Standard, presents limited liability and should be considered by the Client:

- A cursory asbestos and lead paint inspection was completed at the time of the site reconnaissance. Two fire doors, pipe wrapping, and boiler tank insulation may contain asbestos. These items were in fair to good condition (non-friable). Some areas of peel and chipping paint were observed. Based on the age of the on-site building (built prior to 1978), additional asbestos containing materials (ACMs) and/or lead paint may have been utilized during construction or renovations. Prior to building renovation and/or demolition, EA recommends appropriate survey of suspect asbestos-containing materials and suspect lead-based paint followed by any necessary abatement.
- The Town of Hamburg study area has an average Radon concentration of 4.95 picocuries/liter, which is above the USEPA Action Level of 4.0 pCi/L. Consideration should be given to completing monitoring of indoor air quality with respect to radon levels to determine if enhanced ventilation or other mitigation methods are warranted.
- The site reconnaissance revealed suspect vapor encroachment conditions at the subject site due to past site usage as a dry cleaner. Based on the current available information, a Vapor Encroachment Screen or Vapor Intrusion Monitoring does appear to be warranted in this case. It should be noted that this Phase I report was not conducted in accordance with ASTM Standard E2600-10 (Vapor Encroachment Screening on Property Involved in Real Estate Transactions).
- PCBs-containing building materials were commonly utilized in the past in commercial buildings prior to 1980. Fluorescent light fixtures possibly containing PCBs-containing ballasts were observed during the site reconnaissance. Based on the age of the structure, it is likely that PCBs-containing building materials, such as window caulk, tar paper and other roofing materials may have been used in its original construction.
- According to NYSDEC, emerging contaminants (ECs) describe pollutants detected in waterbodies that may cause environmental or human health impacts and typically are not regulated under current environmental laws. For example, per- and polyfluoroalkyl substances (PFAS) are man-made chemicals that have been widely used in various consumer, commercial, and industrial products since the 1950s. These chemicals' unique properties make them resistant to heat, oil, stains, grease, and water and useful in a wide variety of everyday products. According to Mr. Waterfield, water-repellent liquid, supplied in 5-gallon containers, were previously used on-site to water proof fabrics. Water-repellant fluids and treatments are likely to contain PFAS chemicals.

# **PHASE I ENVIRONMENTAL SITE ASSESSMENT**

**Commercial Property  
4245 Clark Street  
Hamburg, New York 14075**

## **1.0 INTRODUCTION**

In accordance with the executed agreement, dated July 1, 2022, Environmental Advantage, Inc. (EA) completed a Phase I Environmental Site Assessment (ESA) of the above-referenced property (hereinafter "subject site") for Bevrich Corp. (hereinafter "Client"). This ESA includes figures in Appendix A, completed user/client and owner questionnaires in Appendix B, site inspection photographs in Appendix C, field notes and various communications in Appendix D, regulatory databases in Appendix E, historical information and requests in Appendix F, report objectives and limitations in Appendix G, professional qualifications in Appendix H, environmental professional(s) statement in Appendix I and references and footnotes in Appendix J.

This report is an instrument of service of EA and reflects the use of limited research, a review of specified and reasonably ascertainable listings, and a site reconnaissance upon which to base the identification of "recognized environmental conditions" in conformance with the American Society for Testing and Materials (ASTM) Standard E1527-13. However, this ESA may also reflect additional or reduced service enhancements requested or authorized by the Client. "Recognized environmental conditions" are defined under the ASTM standard as "the presence or likely presence of any hazardous substances or petroleum products on a site under conditions that indicate an existing release, a past release, or a material threat of release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater or surface water of the property." This ESA was completed by EA in accordance with generally accepted practices of the profession undertaken in similar studies within the same time frame and geographic area, and EA observed that degree of care and skill generally exercised by the profession under similar circumstances and conditions.

This ESA and report have been prepared on behalf of, and for the exclusive use of, EA's Client solely for its reliance in the environmental assessment of this site. The Client are the only party to which EA has explained the risks involved and which has been involved in shaping of the scope of services needed to satisfactorily manage those risks, if any, from EA's Client's point of view. Accordingly, reliance on this report by any other party may involve assumptions whose extent and nature lead to a distorted meaning and impact of the findings and opinions related herein. EA's findings and opinions related in this report may not be relied upon by any party except EA's Client.

## **2.0 SUBJECT SITE DESCRIPTION**

### **2.1 Location and Current Use**

The subject site consists of one parcel totaling approximately 0.38 acres of land located at 4245 Clark Street in the Village of Hamburg, Erie County, New York. The subject site is located on the southeast side of Clark Street, east of the Clark Street and Old Clark Street intersection (Refer to Figure 1 presented in Appendix A). According to information obtained from the Erie County Geographic Information System (GIS) website and Hamburg Assessor's Office<sup>1</sup>, the subject site is identified as SBL #183.18-2-6, currently owned by Robert Waterfield.

Approximate Site boundaries and Site features are illustrated in Figure 2. The subject site is developed with a one-story approximate 4,336-square foot structure, as shown in Figure 2. The structure was originally constructed by 1946 with several later additions. According to Mr. Waterfield, the structure has been utilized as a dry cleaning facility since construction in 1946, occupied by Vara's Dry Cleaning until the present time.

### **2.2 Site and Area Features**

The subject site is improved with one structure, described as follows:

- Year Built:** – 1946
- Location:** – Northern portion
- Size (square feet):** – 4,336-sf
- Construction:** – One-story, concrete block and brick construction, with slab-on-grade-foundation.
- Notable Interior Features:** – Includes restrooms, dry cleaning room, maintenance room, office, clothing press room, and clothing storage areas. Specific interior features are included in Section 6.30.
- Additional Site Features:** – Exterior areas consist of an asphalt-paved parking lot surrounding the structure.

### **2.3 Adjoining and Near-by Properties**

The properties surrounding the subject site are currently developed as follows:

- North Clark Street / JP Fitzgeralds Bar & Restaurant (4236 Clark Street)
- South Residential
- West Residential
- East Baker Management, Can and Bottle Return, Therm Tech Plastics Inc., Dura Plating Inc., Hamburg Glass & Window Film, West Competition & Collision, Lee Baker Custom Finish (4255 Clark Street)

### **2.4 Topography and Surface Water Drainage**

The USGS 7.5 minute Topographic Quadrangle Map of Hamburg NY<sup>2</sup> indicates that the subject site's ground surface slopes northeasterly toward Rush Creek located approximately 0.56 miles northeast of the subject site. The surface

elevation for the subject site is approximately 820 feet above mean sea level. Surface water drainage is expected to flow to storm drains located on-site within the parking lot or located along Clark Street.

## **2.5 Utilities**

Based on an interview with Mr. Robert Waterfield, associated with the subject site since at least 1981 and owner of the subject site since 2021, and through field observations, the subject site is serviced with utilities as follows:

- Municipal drinking water through Village of Hamburg supplied by Erie County;
- Sanitary sewer through the Village of Hamburg supplied by Erie County;
- Electricity from NYSEG; and
- Natural gas from National Fuel.

Utilities appear to be underground with the exception of electric which is overhead.

## **3.0 USER PROVIDED INFORMATION**

In accordance with the ASTM Standard, information must be obtained from both the current owners and/or occupants of the subject site, as well as the user of this Phase I ESA. To that end, both a user/client questionnaire and owner/occupant questionnaire were forwarded to Mr. Waterfield, associated with the subject site since at least 1981 and owner of the subject site since 2021. Through completion of the user/client questionnaire, Mr. Waterfield provided the following:

- Indicated the reason for completing the Phase I ESA was for selling the property.
- Was not aware of environmental cleanup liens or activity use limitations (AULs) at the subject site.
- Specified the subject site has been and is currently utilized as a dry cleaner establishment since its construction in 1946.
- Did not have specialized knowledge or experience related to the property or nearby properties.
- Believed the current purchase price reflects the fair market value.
- Was not aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases.
- Indicated the past use(s) of the subject site include a petroleum-use dry cleaning facility since construction in 1946. Mr. Waterfield's family purchased the subject site in 1974.
- Indicated he does not know specific chemicals present or once present at the subject site.
- Was not aware of any spills or other chemical releases that have taken place at the subject site.
- Indicated that based on his knowledge and experience related to the subject site, there are no obvious indicators that point to the presence or likely presence of contamination at the property.

Through completion of the owner/occupant questionnaire, Mr. Waterfield provided the following:

- The subject site is currently and has been utilized as a dry cleaning facility.
- It was unknown if any previous industrial drums or sacks of chemicals were located on the property or at the facility.
- There is currently an aboveground petroleum solvent tank located at the property, and there has been the same in the past.
- Mr. Waterfield answered “no” to all other questions on the questionnaire.

Based on an interview with Mr. Waterfield, the following information was provided:

- Mr. Waterfield indicated the current dry cleaning washer was installed in 1960. The previous petroleum-solvent washer was also located in the same footprint as the current unit.
- Mr. Waterfield indicated that previously, paper lint filters were stored outside at the rear of the building for a period of time to allow the petroleum to evaporate from the filters. Once the petroleum solvent was fully evaporated, the paper lint filters were disposed of in the facility’s general refuse dumpster. Currently, the dry cleaning unit utilizes re-usable stainless steel lint traps. The lint is currently disposed of in the general refuse dumpster.
- Mr. Waterfield indicated two former (smaller) ASTs containing mineral spirits were located along the eastern exterior of the structure on stilts and were originally installed when the structure was constructed in 1946. Mr. Waterfield indicated the current mineral spirits AST was installed in the early 1980s and the two former smaller ASTs were removed sometime in the 1980s.
- Mr. Waterfield provided a list of past petroleum-based solvents used in on-site dry cleaning activities: Kwik-Dri 66, MS Reyalie 66 (624 Solvent), Kensol 30, and Sasol LPA-142.
- Mr. Waterfield indicated water repellent, supplied in 5-gallon buckets, was previously used on-site during routine operations.

## **4.0 HYDROGEOLOGIC CONDITIONS**

### **4.1 Soil, Wetland and Flood Plain Conditions**

According to soils data obtained from the USDA Soil Conservation Service<sup>3</sup>, the soil beneath the subject site is classified as Alton fine gravelly loam (AmA), generally described as gravelly loamy glaciofluvial deposits over sandy and gravelly glaciofluvial deposits, derived mainly from acidic rocks, with some limestone below 40 inches.

A review of the available wetlands maps<sup>4</sup> for this area indicated state or federal regulated wetlands are not located on or adjoining the subject site. According to the available FEMA floodplain maps<sup>4</sup> for this area, the subject site and adjoining properties are not located within the 100 or 500-year flood zones.

#### **4.2 Site Geology**

According to the Geologic Map of New York State<sup>5</sup>, the bedrock in the area of the subject site is identified as Angola and Rhinestreet Shales.

#### **4.3 Regional Groundwater Conditions**

Based on a review of the site topographic conditions as depicted on the USGS 7.5 minute Topographic Quadrangle Map of Hamburg NY<sup>2</sup>, shallow regional groundwater is expected to flow in a northeast direction toward Rush Creek located approximately 0.56 miles northeast of the subject site. The surface elevation for the subject site is approximately 820 feet above mean sea level. EA has assumed that the groundwater table typically conforms to surface and bedrock topography. Localized groundwater flow may vary as a result of underground utilities, site features, or other subsurface conditions.

### **5.0 HISTORICAL INFORMATION**

#### **5.1 Review of Aerial Photographs**

Aerial photographs obtained through various sources<sup>6</sup> were reviewed by EA. It should be noted that EA reviewed aerial photographs from 1926, 1952, 1958, 1963, 1966, 1974, 1995, 2002, 2005, 2006, 2007, 2008, 2009, 2011, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2021, and 2022. The results of the aerial photograph review are summarized below. EA's evaluation of aerial photographs was limited by photographic scale and quality.

<b>Year</b>	<b>Subject Site</b>	<b>Adjoining Properties</b>
1926	The subject site appeared to be agricultural land.	Minimal residential development was apparent to the south and west. The eastern and northern adjoining properties appeared to be vacant, undeveloped land.
1952	The subject site appeared to be developed with the current structure.	The western and a portion of the eastern adjoining properties appeared to be developed with their current structures. The western adjoining property appeared to be residential. The eastern adjoining property appeared to be developed commercially. The northwestern and northeastern adjoining property across Clark Street appeared to be residential.
1958, 1963	An additional parking lot area was completed south of the structure.	The eastern adjoining property created additional parking area in the southern portion of the property and constructed an apparent addition to the southern portion of the structure. More residential structures were completed southeast of the subject site.

<b>Year</b>	<b>Subject Site</b>	<b>Adjoining Properties</b>
1966	The parking lot area between the subject site and eastern adjoining property merged to form one larger paved area.	An apparent structure or fenced perimeter was completed in the southern portion of the eastern adjoining property. The western property across Clark Street appeared to be utilized as a commercial car sales property.
1974, 1995	Generally appeared similar to the previous aerial.	Further development was apparent to the east and northwest across Clark Street.
2002	Generally appeared similar to the previous aerial.	The western property across Clark Street appeared to be vacant with no structures and no longer utilized for car sales.
2005, 2006	Generally appeared similar to the previous aerial.	The northwestern property across Clark Street appeared to construct additions to the northern portion of the structure.
2007, 2008	Generally appeared similar to the previous aerial.	The property to the west across Clark Street appeared to be under construction.
2009	Generally appeared similar to the previous aerial.	The western property appeared to be constructed into Clark Street's current configuration.
2011, 2013, 2014, 2015, 2016, 2017, 2019, 2021, 2022	Generally appeared similar to the previous aerial.	The northwestern property across Clark Street constructed additions to the central and northern portions of the structure. The structure to the north across Clark street was demolished and appeared to be utilized as additional parking area for the existing structure. The other surrounding properties appeared to be in their present configuration and appearance.

## 5.2 **Fire Insurance Maps**

Sanborn Fire Insurance Maps (Sanborn maps), dated 1923, 1929, 1948, and 1953 were provided by ERIS<sup>7</sup>. The following was identified on the maps:

<b>Year</b>	<b>Subject Site</b>	<b>Adjoining Properties</b>
1923, 1929	The subject site appeared to be vacant, undeveloped land.	The western and northern properties across Clark Street were developed with residential structures. The eastern and southern adjoining properties were vacant, undeveloped land.
1948, 1953	The current structure was developed and labeled "dry cleaner".	The eastern adjoining property was developed with one structure in the northern portion of the property labeled "auto sales and service". The western adjoining

Year	Subject Site	Adjoining Properties
		property was developed with two dwellings in the northern portion of the property. The property to the south was residential.

### 5.3 Municipal Directories

City Directories were provided by ERIS<sup>7</sup>. City Directories were provided for the years from 1964 to 2020, and were not available prior to 1964. The following historical occupants were listed for the subject site addressed as 4245 Clark Street (post 1985) and historical address 53 Clark Street (prior to 1985):

- 1964, 1967: Vara's Dry Cleaners
- 1971: Vara A G&Son INC., Vara's Dry Cleaning
- 1976: L A Corp., Octopus Rd Safety, Vara A G&Son INC., Vara's Dry Cleaning
- 1980: Tri State Safety Spl, Vara's Dry Cleaning
- 1985: Tri State Safety Spl, Vara's Dry Cleaning
- 1990, 1996, 2000, 2003, 2008, 2012, 2016, 2020: Vara's Dry Cleaning

In addition to the above listings, the following occupants were identified for the eastern adjoining property, addressed as 4255 Clark Street and historically addressed as 65 Clark Street:

- 1964: Not addressed/listed
- 1967: Deck-Décor INC. Floor Covering, Getters Electronics INC., Hines & Kirst INC. General Contracting, Pruden Products Steel
- 1975: C&C Motors, Cortina Importing, Deck Décor INC., Getters Electronics, Hamburg Steel Buildings, Hine & Kirst INC., Milwaukee Cylinder, Residential, Sampson H A Co INC.
- 1976: Allitalia Import Export, Cortina Importing, Hine & Kirst INC., Pastime By Flack, Slippy's Service, Tontine
- 1980: Allworth Heating & Air Conditioning, Boland Sales Co, C&M Coating Corp, Cortina Importing, Hadley's Concrete, Hamburg Offset Printing, Hamburg Sports, I S M S Corp, Pastime by Flack, Schneider Metal Production
- 1985: C&M Contracting INC., Cakes of Distinction, Cortina IM & Distributing, Hamburg Offset Print, Jack West Automotive, Pastime by Flack
- 1990: Angela Mias INC., Dura Plating Co, Floral Gifts, Thompson F Cooling, West Competition, West Jack M 3D
- 1996: Angela Mias INC., Collins Joseph Attorney, Complete Automotive Services, Dura Plating Co, Fresh Start INC., Home Maid Services, My Angel Pizza INC., Restore Gen Contracting, Residential, West Competition
- 2000: Angela Mia's, Collins Joseph A Attorney, Dura Plating Co, Hamburg Glass & Window Film, Jimmy Shine INC., West Competition & Collision
- 2003: Angela's Fine Foods, Collins Joseph A Attorney, Residential, Dura Plating Co, Hamburg Glass & Window Film, Residential, Therm Tech Plastics INC., West Competition & Collision
- 2008: Angela Mias, Collins Lay, Residential, Dura Plating Co, Hamburg Glass & Window Film, Therm Tech Plastics INC., West Competition & Collision

- 2012: Collins, Joseph A Attorney, Dura Plating Co, Hamburg Glass & Window Film, Therm Tech Plastics INC., Park Montesano & Winokur Attorney, West Competition & Collision, Lee Baker Custom Finish
- 2016: Collins, Joseph A Attorney, Dura Plating Co, Hamburg Glass & Window Film, Therm Tech Plastics INC., West Competition & Collision, Lee Baker Custom Finish, Leonard's Express INC.
- 2020: Can Bottle Return, Dura Plating Co, Hamburg Glass & Window Film, Therm Tech Plastics INC., West Competition & Collision, Lee Baker Custom Finish, Leonard's Express INC.

#### **5.4 Prior Site Investigation/Remediation Records**

No prior environmental records were provided to EA for review.

#### **5.5 Environmental Lien and Title Search**

EA requested Environmental Lien Search information and Title Search from the Client. As of the date of the report, Environmental Lien Search nor title search were not provided. The completion of a lien search was not included in the scope of this assessment. According to the Erie County Geographic Information Systems website (<http://gis2.erie.gov/HTML5/ErieCountyNY/PublicLaunchPage.aspx>) the following ownership information was provided:

<b>Owner</b>	VARA ARTHUR JR	<b>Date</b>	09/19/1947
<b>Owner</b>	WATERFIELD RICHARD C	<b>Date</b>	04/30/1979
<b>Owner</b>	WATERFIELD ROBERT C	<b>Date</b>	08/27/2021

#### **5.6 Local Agency Review**

EA visited the Town of Hamburg Assessor's Office and Building Department, Village of Hamburg Hall, and filed a Freedom of Information Law (FOIL) request with the Town of Hamburg Engineering and Planning Departments<sup>1</sup> to obtain additional historical Site information. Information on permits, assessments, USTs or other environmental concerns was requested. Copies of pertinent documents are included in Appendix F.

- o The Assessor's Office provided the following information:
  - Property Address: 4245 Clark Street (53 Clark Street prior to 1985)
  - SBL Number: 183.18-2-6
  - Lot Size: 0.38 acres
  - Current & Historic Owners: Waterfield, Robert C. (2021); Waterfield, Richard C. (1979); Vara, Arthur Jr. (1958); Vara, Arthur Sr. & Jr. (prior to 1958).
  - A property record card dated 1957 through 1991 provided the following information:

- The subject site was historically addressed as 53 Clark Street.
- The current and historical owners as listed above.
- A property record card dated 1977 provided the following information:
  - The subject site classification code is listed as 484: One-story small structure.
  - The subject site was serviced with public water and sewer system and supplied with electric and natural gas.
  - Two undated photographs showed the street view of Vara's Dry Cleaner in its current configuration.
  - A sketch showed the approximate 4,336-square foot structure.
- No Information was available from the Town of Hamburg Building Department, Town of Hamburg Engineering Department, or Town of Hamburg Planning Board.
- No Information was available from the Village of Hamburg offices.

#### **5.7 Site Descriptive Chain of Use**

A summary of most probable Site history indicates that the subject site was originally vacant land in the early 1900s. By 1946, the northern portion of the subject site was developed with its current one-story structure. Since 1946, the structure has been utilized as dry cleaners, occupied by Vara's Dry Cleaners.

#### **5.8 History of Adjoining/Nearby Properties**

The surrounding areas have been utilized agriculturally, residentially, and commercially since at the early 1900s. The eastern adjoining property originally appeared to be utilized agriculturally and was originally developed by 1952, which has been utilized commercially and industrially since that time. The western adjoining property appeared to be developed with a residence and garage structure since at least 1923. The southern adjoining property originally appeared to be utilized residentially in the early 1900s and appeared to be developed with its current structure by 1948. The northern adjoining property, across Clark Street, appeared developed with limited residences since at least 1923 and is currently utilized as a restaurant.

### **6.0 SITE RECONNAISSANCE**

#### **6.1 Description of Site Processes**

A Site reconnaissance was completed on August 4, 2022 by EA Project Scientists Mallory Behlmaier and Jason Kryszak. The Site reconnaissance consisted of a walking observation of the subject site and structure. Mr. Waterfield accompanied EA during the interior Site reconnaissance. Site features are depicted on Figure 2. Photographs and field notes taken of/at the subject site during the site reconnaissance are presented in Appendix C and Appendix D, respectively.

## **6.2 Exterior Observations**

The subject site includes approximately 0.38 acres, located at 4245 Clark Street in the Village of Hamburg, Erie County, New York. The subject is improved with one structure, surrounded by an asphalt-paved parking lot.

**6.2.1 Hazardous Substances and Petroleum Products** – One 1,000-gallon AST labeled ‘mineral spirits’ was located at the rear of the structure to the south. Mr. Waterfield indicated that the AST was still in service and has always stored petroleum-based solvents. No other hazardous substances or petroleum products were observed during the exterior reconnaissance.

**6.2.2 Underground and Aboveground Storage Tanks** – No USTs were observed during the exterior site reconnaissance. One 1,000-gallon AST labeled ‘mineral spirits’ was located at the rear of the structure to the south. The AST appeared to be in fair/good condition, with limited surficial rust and some stained soil beneath the AST. Mr. Waterfield indicated two approximate 800-gallon ASTs on stilts were formerly located along the southeastern exterior of the structure that were utilized for the storage of petroleum solvents.

**6.2.3 Pits, Ponds or Lagoons** – No pits, ponds, or lagoons were observed during the exterior site reconnaissance.

**6.2.4 Stained Soil or Pavement** – An area of darkened/discolored soil was observed at the rear of the structure to the south underneath the existing AST.

The southern portion of the asphalt parking lot appeared to have large areas of evaporated water markings. EA noted that these markings are a result of the apparent discharge of fluids from the boiler system in the rear of the structure.

**6.2.5 Stressed Vegetation** – A limited area of stressed vegetation was observed along the southwestern exterior of the structure where the boiler blowdown apparently discharges.

**6.2.6 Fill/Solid Waste** – General refuse material generated on-site is stored in a general refuse dumpster located in the southern portion of the subject site and is disposed of weekly by Modern Disposal Services, Inc.

**6.2.7 Wastewater and Storm Water Discharge** – Storm drains were observed off-site to the east within the larger parking lot. An enclosure with a Rema Dri-Vac Corp. air vacuum was located along the southeastern exterior of the structure. The air vacuum was placed on plywood on the stone covered ground and a valve labeled “Drain: wastewater must be disposed of per all local and state regulations” was observed at the bottom of the air vacuum. According to Mr. Waterfield, the wastewater from the vacuum is accumulated from the steam presses and only produces a few drops of water a year.

**6.2.8 Wells or Drywells** – No water supply wells or drywells were observed on the subject site during the exterior site reconnaissance. Mr. Waterfield indicated that the potable water provided for the site is supplied by the Village of Hamburg.

**6.2.9 Septic System** – No evidence of a former or existing on-site septic system was observed during the exterior site reconnaissance. Mr. Waterfield indicated that the building is currently serviced by the Village of Hamburg sanitary sewer.

**6.2.10 Pools of Liquids** – No pooled liquids were observed on the subject site exterior during the site reconnaissance.

**6.2.11 Electrical Transformers/Hydraulic Equipment** – Two pole-mounted utility owned transformers were observed on the eastern border of the subject site. No staining or leaking associated with these transformers was observed.

**6.2.12 Other Exterior Observations** – An approximate 2 foot by 2 foot concrete pad was noted in the grass in the southern portion of the subject site. Mr. Waterfield indicated this concrete was dumped, left over from another job, and serves no purpose.

Surficial repairs to the asphalt were noted at the locations of the two former ASTs along the southeastern exterior of the structure. A piece of steel was slightly protruding from the asphalt, which was likely used as a support for one of the ASTs.

### **6.3 Interior Observations**

The subject site includes one-story, approximate 4,336-square foot structure, which has been utilized as a dry cleaner, occupied by Vara's Dry Cleaning, since construction in 1946. The reconnaissance included a walkthrough visual inspection of the structure, including the laundry room, dry cleaning room, offices, steam pressing rooms, maintenance area, and restrooms.

**6.3.1 Current Property Use** – The subject site has been utilized as dry cleaners, occupied by Vara's Dry Cleaners, since construction in 1946.

**6.3.2 Heating/Cooling** – The structure is heated through the boiler system and heat radiated from the equipment. The office portion is heated by electric baseboards.

**6.3.3 Hazardous Waste Generation** – Hazardous waste is not generated on-site.

**6.3.4 Drums and Containers** – Various petroleum products and materials used during routine operation, maintenance, and cleaning activities were located throughout the structure and included, but not limited to the following:

- One approximate 30-gallon container of ‘Condusol’ detergent for petroleum solvents.
- Approximately four 5-gallon buckets of powdered detergents.
- Approximately five 1-gallon paint cans located in the maintenance area.
- Various containers associated with laundry washing including three 1-gallon containers of detergent, three 1-gallon containers of stain/spot removers (Picrin Dry-Side which contains trichloroethylene), and two 1-gallon containers of concentrated bleach.
- Various small containers less than 1-gallon mostly associated with household cleaners and car maintenance/detailing.
- One car battery appearing to be in good condition.

These containers appeared to be in good condition with no leaking or staining noted.

**6.3.5 Underground and Above Ground Storage Tanks** – No current USTs or ASTs were observed during the interior site reconnaissance. Mr. Waterfield was not aware of any current or historical USTs or ASTs, other than those mentioned in Section 6.2.2 above.

**6.3.6 PCBs Usage/Electrical Transformers/Hydraulic Equipment** – No PCBs usage, electrical transformers, or hydraulic equipment were observed during the interior site reconnaissance.

**6.3.7 Stains or Corrosion** – Several areas of floor staining associated with laundry and dry cleaning operations were noted throughout the building. Specific areas of staining are described as follows:

Dry cleaning room – southern portion of the structure:

- The concrete floor between and surrounding the dry cleaning tumbler and dryer.
- An approximate 1 by 2 foot area of light staining/discoloration, which appeared to be generated from the solvent carbon filter system, was observed adjacent to the dry cleaning unit.

Steam press area – central portion of the structure:

- An approximate 2 by 5 foot area of unknown product/stain adjacent to the utility sink on the carpet floor.
- An approximate 4 by 4 foot area of unknown product/stain adjacent to a steam press near the eastern portion of the structure on the carpet floor.
- An approximate 3 by 4 foot area of unknown product/stain adjacent to the fireproof door on the carpet floor.

**6.3.8 Fill/Solid Waste Disposal** – No fill material was observed during the site reconnaissance. General refuse generated on-site during routine operations is stored in a general refuse dumpster, located in the southern portion of the subject site, and is disposed off-site by Modern Disposal Services once weekly.

EA observed lint from stainless steel filters in a 5-gallon container associated with the dry cleaning machine. This waste is added to the general waste stream.

**6.3.9 Wastewater** – No wastewater discharge was observed during the interior site inspection.

**6.3.10 Drains and Sumps** – Several floor drains were noted during the interior site inspection. Specific areas and details are described as follows:

- One approximate 10-inch diameter floor drain, located in the center of the dry cleaning room between the dry cleaning unit and dryer in the southern portion of the structure. Observations to the drain were limited due to stored equipment.
- One approximate 4-inch diameter floor drain, located north of the dry cleaning room near the utility sink.
- One approximate 4-inch diameter drain, located in the maintenance room in the southwest portion of the structure.

Mr. Waterfield indicated to his knowledge, the floor drains discharge to the rear of the property; however, the exact discharge location is not known.

**6.3.11 Odors** – No unusual odors were noted during the site reconnaissance.

**6.3.12 Other Interior Observations** – A hot water tank was observed within the laundry room in the western portion of the structure.

Two carbon vessels and a water treatment system were observed in the hallway adjacent to the restrooms in the western portion of the structure.

An air compressor and boiler system was observed in the maintenance room in the southwest portion of the structure.

One approximate 3-inch diameter black pipe and one approximate 1-inch pipe, both of which discharge water from the boiler system to the southwestern exterior of the structure were observed.

## **6.4 Non-Scope Considerations**

**6.4.1 Asbestos** – A cursory asbestos survey was completed at the time of the site reconnaissance. EA observed several wrapped pipes throughout the building, boiler insulation, and two fireproof doors which may contain asbestos. The pipe wrap and doors appeared to be in good condition (not friable). Based

on the age of the structure (built pre-1978) it is likely that other asbestos containing materials (ACMs) were most likely originally used within the structure.

**6.4.2 Lead Paint** – Due to the age of the structure, it is likely that lead paint was used in its original construction. Limited areas of peeling and chipping paint were observed within the structure during the site reconnaissance.

**6.4.3 Lead in Drinking Water** – Due to the age of the structure, it is likely that lead, galvanized, and/or soldered copper piping may have been used. Mr. Waterfield indicated the potable water is provided from the Village of Hamburg through Erie County.

**6.4.4 Radon** – Radon is a gas that is generated from the breakdown of uranium in soil, rock and/or water and can be a potential issue when built up indoors. The potential for Radon gas to be present in the breathing space within the buildings, near openings (e.g., floor drains, joints, cracks, etc.), can be a concern. According to basement readings prepared by the New York State Department of Health<sup>8</sup>, the Town of Hamburg study area has an average Radon concentration of 4.93 picocuries/liter. This level is above the USEPA Action Level of 4.0 pCi/L; however, these levels are based on a limited number of measurements of basement dwellings in the Town of Hamburg and may or may not reflect the actual conditions at the subject site.

**6.4.5 Mold and Mildew** – No areas of mold were observed.

**6.4.6 Vapor Encroachment Conditions** – The site reconnaissance revealed suspect vapor encroachment conditions at the subject site due to past site usage as a dry cleaner. Based on the current available information, a Vapor Encroachment Screen or Vapor Intrusion Monitoring does appear to be warranted in this case. It should be noted that this Phase I report was not conducted in accordance with ASTM Standard E2600-10 (Vapor Encroachment Screening on Property Involved in Real Estate Transactions).

**6.4.7 PCBs and Building Materials** – PCBs-containing building materials were commonly utilized in the past in commercial buildings prior to 1980. Fluorescent light fixtures possibly containing PCBs-containing ballasts were observed during the site reconnaissance. Based on the age of the structure, it is likely that PCBs-containing building materials, such as window caulk, tar paper and other roofing materials may have been used in its original construction.

**6.4.8 Emerging Contaminants** – According to NYSDEC, emerging contaminants (ECs) describe pollutants detected in waterbodies that may cause environmental or human health impacts and typically are not regulated under current environmental laws. For example, per- and polyfluoroalkyl substances

(PFAS) are man-made chemicals that have been widely used in various consumer, commercial, and industrial products since the 1950s. These chemicals' unique properties make them resistant to heat, oil, stains, grease, and water and useful in a wide variety of everyday products. According to Mr. Waterfield, water-repellent liquid, supplied in 5-gallon containers, were previously used on-site to waterproof fabrics. Water-repellant fluids and treatments are likely to contain PFAS chemicals.

## **7.0 REGULATORY INFORMATION**

### **7.1 Background**

The purpose of the regulatory review is to obtain and review reasonably ascertainable records to help identify recognized environmental conditions regarding the subject site. For this review, records were obtained from Environmental Risk Information Service (ERIS)<sup>7</sup>. Under ASTM, information requested and not received within 20 days of the report date will not be incorporated into this report. The approximate minimum search distance (MSD) for the site vicinity review is noted for each database listed below. The regulatory database report for facilities with recognized environmental conditions is presented in Appendix E. A summary of the database information for the subject site vicinity is presented below.

### **7.2 Federal Database Review**

The subject site address of 4245 Clark Street, identified as Vara's Dry Cleaners, was identified on the following federal databases.

- Facility Registry Service/Facility Index (FINDS / FRS) database listing on November 19, 2004, which identifies facilities, sites, or places subject to environmental regulations or of environmental interest. Enforcement / Compliance Activity and State Master were listed on the database as the Site's "interest types" for dry cleaning plants, except rug cleaning. EPA Registry ID: 110019209587. No further information was provided.
- Intergraded Compliance Information System (ICIS) database listing with EPA ID: 110019209587.

The following nearby facilities were identified on the federal databases reviewed, either adjoining the subject site or in a potential upgradient direction, based on an estimated northeasterly groundwater flow direction, as listed below:

- Dura Plating Co. / West Competition & Collision Inc. / Angela's, addressed at 4255 Clark Street, adjoining the subject site to the east, was listed on the following databases:

#### Dura Plating Co.:

- RCRA Large Quantity Generator (LQG) in 1994 and 2001, Small Quantity Generator (SQG) in 1993, Very Small Quantity Generator (VSQG) in 2006 and 2007, and Non-Generator in 1990 for the generation of Chromium (D007). Several violations were listed for this facility in 1993, 1996, and 1999. The violations appear to have been satisfied and were most likely associated with on-site waste management.
- FINDS / FRS database listing on March 1, 2000, which identifies facilities, sites, or places subject to environmental regulations or of environmental interest. Air Minor, CESQG, Risk and Technology Review, and State Master were listed on the database as the “interest types” for electroplating, plating, polishing, anodizing, and coloring. EPA Registry ID: 110001602310.
- Air Facility System (AFS) database listing with NAICS code 332813 and SIC Code 3471 (electroplating, plating, polishing, anodizing, and coloring). According to the listing, the facility is privately owned and operated with the potential of less than 100 tons per year of uncontrolled emissions of hexavalent chromium (Chromium Vi). The facility was listed as in compliance in 1998, 1999, and 2000, with a “notification” in 1995.
- ICIS database listing associated with the AFS listing.

#### West Competition & Collision:

- FINDS/FRS database listing on November 19, 2004 with EPA Registry ID: 110019107134, which identifies facilities, sites, or places subject to environmental regulations or of environmental interest. State Master was listed on the database as the “interest type”. No further information was provided.

#### Angela's:

- FINDS/FRS database listing on February 20, 2007 with EPA Registry ID: 110028208302, which identifies facilities, sites, or places subject to environmental regulations or of environmental interest. Enforcement / Compliance Activity was listed on the database as the “interest type”. No further information was provided.
- ICIS database listing associated with the FINDS/FRS listing.

Based on the available information and lack of spill listing associated with this property, these listings do not appear to present a readily-apparent threat to the subject site.

- Paul's Village Collision, addressed at 4258 Clark Street, located approximately 0.02 miles north-northeast of the subject site, was identified as a RCRA Very Small Quantity Generator (VSQG) in 1995, 1996, 2006, and 2007 for the generation of 2-propanone or acetone (U002), N-Butyl alcohol (U031), benzene or toluene (U220), methyl isobutyl ketone (U161), xylene (U239), spent non-

halogenated solvents (F003 and F005), acetic acid (U112), propanol (U140), methyl ethyl ketone (U160), peroxide (U160), and ignitable waste (D001). No violations were recorded. Based on the available information, this listing does not appear to present a readily-apparent threat to the subject site.

- CVS Pharmacy #0649 addressed at 358 Buffalo Street, approximately 0.12 miles west-southwest of the subject site, was listed as a RCRA Large Quantity Generator (LQG) in 2012, 2014, 2016, and 2018, Small Quantity Generator (SQG) in 2012, and Very Small Quantity Generator (VSQG) in 2019 for the generation of ignitable waste (D001), corrosive waste (D002), mercury (D009), 2H-1-benzopyran-2-one, 4-hydroxy-3-(3-oxo-1-phenylbutyl)-, & salts (P001), silver (D011), m-cresol (D024), epinephrine (P042), nitroglycerine (P081), cyclohexane (U129), benzoic acid (P188), nicotine & salts (P075), 2-propanone (U002), and selenium sulfide (U205). Based on the available information, this listing does not appear to present a readily-apparent threat to the subject site.
- Ramsdell Dry Cleaners, addressed at 4276 Clark Street, approximately 0.07 miles northeast of the subject site, was listed on the following databases:
  - RCRA Large Quantity Generator (LQG) in 1985, Small Quantity Generator (SQG) in 1999, and Very Small Quantity Generator (VSQG) in 2006 and 2007 for the generation of spent halogenated solvents including chlorinated solvents (F002).
  - FED Dry Cleaner listing associated with NAICS Code 812320 (dry cleaning and laundry services) and SIC Code 7216 (dry cleaning plants, except rug cleaning). FED Dry Cleaner listings are dry cleaner facilities from Enforcement and Compliance History Online (ECHO) online search; the EPA tracks facilities that possess NAIC and SIC codes that classify businesses as dry cleaner establishments. No further information was provided.

Based on the available information and downgradient position of the facility, this listing does not appear to present a readily-apparent threat to the subject site.

In addition to the above listings, the following listings were identified on the federal databases reviewed within the indicated search radii: two RCRA Non Generator facility listings, one RCRA VSQG listing, and one RCRA TSD listing. However, based on the facilities regulatory status and/or distance/direction from the subject site, these listings do not appear to present a readily-apparent environmental threat to the subject site.

### **7.3 State Database Review**

The subject site address of 4245 Clark Street, identified as Vara's Dry Cleaners, was identified on the following state databases:

- Delisted Drycleaners database listing on October 28, 2019. Delisted dry cleaners are sites that were removed from the list of dry cleaner facilities registered with the New York State Department of Environmental Conservation

(NYSDEC) Division of Air Resources. The NYSDEC ID was identified as 9-1448-00224 and the installation year was dated 1999. No further information was provided on this listing.

The following nearby facilities were identified on the state databases reviewed, either adjoining the subject site or in a potential upgradient direction, based on an estimated westerly to west-northwesterly groundwater flow direction, as listed below:

- Sewer Line, addressed at 4036 Clark Street, adjoining the subject site to the north, was listed as Spill #1011862 associated with a manhole surcharge on February 28, 2011. NYSDEC remarked the sewer overflow was referred to water division and no further action was necessary. The spill was closed on March 1, 2011. Based on the available information, this listing does not appear to present a readily-apparent environmental threat to the subject site.
- Duraplating, addressed at 4255 Clark Street, adjoining the subject site to the east, was listed on the database as Generator from Hazardous Waste Manifest in 1993, 1996, 1999, 2002, and 2003 for disposal of Chromium (D007) and Generic (F005) wastes. Based on the available information, this listing does not appear to present a readily-apparent environmental threat to the subject site.
- North Tonawanda Car Wash, addressed at 4258-4266 Clark Street, approximately 0.01 miles north of the subject site, was listed as Spill #9508239 associated with three (3) 55-gallon and one (1) 10-gallon waste oil drums abandoned on the property on September 27, 1995. NYSDEC remarked that the drums were abandoned at George Lardo's vacant building. The trail of spilled oil indicated the drums were offloaded at the Hamburg Car Wash (current the Tops filling station) and transported by handcart to Mr. Lardo's property. Mr. Christian, owner of the car wash, signed a STIP saying he will dispose of the drums. NYSDEC received copies of the disposal slip and declared no further action is required. The spill was closed on November 27, 1995. Based on the available information, this listing does not appear to present a readily-apparent environmental threat to the subject site.
- Oil on Lardo Property / Agostini, addressed at 4258 Clark Street, approximately 0.02 miles north-northeast of the subject site, was listed for the following:
  - NY Spill #9505283 associated with three (3) abandoned drums of waste oil were found at the property on July 7, 1995. NYSDEC remarked that the responsible party, Mike Agostini, excavated the contaminated area and temporarily stored the removed soil in a roll off to await disposal. NYSDEC received the disposal receipts, the excavation was backfilled, and no further action was required. The spill was closed October 30, 1995.
  - NY Spill #9510288 associated with a prospective buyer notifying that contamination was found in 5 by 40-foot area behind the building and sample results exceed STARS on November 1, 1995. NYSDEC

remarked that visible oil contamination existed down 1-foot and under concrete pad. Approximately two to three drums of contaminated soil was excavated by shovel and disposed of as part of the previous spill referenced above. NYSDEC inspected the property after cleanup and determined the cleanup was satisfactory. Once NYSDEC received the disposal receipt, the spill was closed on May 23, 1996.

Based on the status and available information, these listings do not appear to present a readily-apparent environmental threat to the subject site.

- NYSDOT – UST, addressed at the corner of Clark Street and Buffalo Street, approximately 0.03 miles west of the subject site, was listed as Spill #0850291 associated with the discovery of a UST during road construction on June 9, 2008. NYSDEC remarked that the DOT will sub out the environmental services to pull the tank and excavate contaminated soil. The contractor removed the tank and approximately one truckload of soil for disposal. The three sidewalls and bottom were sampled and analyzed for 8260 STARS and results were non-detect. The NYSDEC determined that no further action was required and the spill was closed September 29, 2008. Based on the available information, this listing does not appear to present a readily-apparent environmental threat to the subject site.
- Hamburg CTR Assoc / Hamburg Center Associates / CVS Pharmacy #0649 / Erich Fischer addressed at 358 Buffalo Street, approximately 0.12 miles west-southwest of the subject site, was listed on the following databases:
  - NY Spill #1802623 associated with the removal of two (2) USTs on March 8, 2018. NYSDEC remarked that two USTs 550 to 1,000-gallons were identified in a phase II provided by Labella Associates. Labella Associates submitted the closure report for the site. Two USTs were closed in place and the excavation analytical results were below CP51 levels. NYSDEC deemed no further action was necessary and the site was closed July 11, 2018.
  - NY UST site with PBS registration number 9-601779 associated with two (2) 1,000-gallon steel tanks installed prior to December 27, 1986. The two USTs were closed-removed June 13, 2018.
  - Generator from Hazardous Waste Manifest each year from 2012-2018 for the disposal of ignitable waste (D001), mercury (D009), silver (D011), m-cresol (D024), corrosive waste (D002), chromium (D007), selenium (D010), 1,2-dichloroethane (D028), lindane (U129), selenium sulfide (U205), 2-propanone (I) (U002), warfarin (P001), pyridine (P075), 1,2,3-propanetriol (P081), and physostigimine salicylate (P188)
  - Generator from Hazardous Waste Manifest in 1983 for the disposal of 1,078-gallons of petroleum refining material associated with tank bottoms (lead) (K052).

Based on the available information, these listings do not appear to present a readily-apparent environmental threat to the subject site.

- Ramsdell's Drycleaners addressed at 4276 Clark Street, approximately 0.07 miles northeast of the subject site, was listed on the following databases:
  - Delisted Drycleaners database listing on October 28, 2019. Delisted dry cleaners are sites that were removed from the list of dry cleaner facilities registered with the NYSDEC Division of Air Resources. The NYSDEC ID was identified as 9-1448-00206 and the installation year was dated 1995 and 1997.
  - Generator from Hazardous Waste Manifest each year from 1986-2018 for the disposal of 1,1-dichloroethylene (D029), tetrachloroethylene (D039), trichloroethylene (D040), chromium (D007), 2,4-dinitrotoluene (D030), hexachlorobutadiene (D033), generic spent halogenated solvents (F002), and sill bottoms from the recovery of spent solvents (F001, F004 or F005).
  - Drycleaners listing with NYSDEC ID: 9144800206 with inspections each year from 2000-2021. No further information was provided.

Based on the availability of information and downgradient position of the property, these listings do not appear to present a readily-apparent environmental threat to the subject site.

In addition to the above listings, the following listings were identified on the state databases reviewed within the indicated search radii: eight UST sites, two AST sites, two generators from hazardous waste manifests, and nine NY Spill sites (LUST/SPILLS) and one RCRA TSD listing. However, based on the facilities regulatory status and/or distance/direction from the subject site, these listings do not appear to present a readily-apparent environmental threat to the subject site.

#### **7.4 Unplottable Summary Report**

Unplottable Listings are records that could not be mapped due to various reasons, including limited geographic information. Eighteen (18) Unplottable Listings were identified on the databases reviewed within the indicated search radii. EA reviewed these listings which do not appear to be associated with the subject site.

#### **7.5 Regulatory Agency File and Records Review**

The purpose of the regulatory agency file/records review is to obtain sufficient information to help determine if a recognized environmental condition, controlled recognized environmental condition, or a de minimis condition exist at the subject site in connection with any listings identified on the subject site or adjoining properties. Based on the information identified above and the Freedom of Information Law (FOIL) request already submitted to NYSDEC, a regulatory file review of the subject site is not warranted due the sufficient regulatory information provided by ERIS.

## 8.0 INTERVIEWS AND INFORMATION REQUESTS

### 8.1 Owners/Operators

Interviews with persons familiar with the site are completed to obtain information pertinent to the environmental evaluation of the site. Information from interviews conducted during the site reconnaissance is included in Section 6.0 and referenced throughout the text of the report. To that end, an owner/occupant questionnaire was completed by Mr. Waterfield, which is described in Section 3.0 above.

### 8.2 Federal and State Agencies

EA searched USEPA websites <https://www3.epa.gov/enviro/facts/myproperty/> and <https://enviro.epa.gov/facts/multisystem.html> for Site records. The subject site address, 4245 Clark Street, was identified on the website as Vara's Dry Cleaners on the Facility Registry Service (FRS) database, as described in Section 7.2 above. Additionally, the eastern adjoining property, addressed at 4255 Clark Street, , was identified as Dura Plating, Inc. on the FRS database as also described in Section 7.2 above. Based on the subject listing, a Freedom of Information Law (FOIL) request was submitted to the USEPA. As of the date of this report, EA has not received a response from the Agency.

According to the NYSDEC, applicable information is available through DECInfo Locator at <https://gisservices.dec.ny.gov/gis/dil/>, Manifest Search Database at <http://ny.formax.us/manifest/manifest.aspx>, and through database searches at <http://www.dec.ny.gov>. The subject site was not identified on the websites reviewed. However, Dura Plating, Inc., adjoining property to the east, was identified on the Air Facility Registration (AFS) for chromium VI (hexavalent chromium) plating operation, as described in Section 7.3 above. Several Hazardous Waste Manifests were identified for the disposal of chromium wastes including the disposal of 800 pounds (two drums) of "chromium contaminated soil" in 2002.

EA also forwarded a written inquiry to the NYSDEC regarding the subject site. The purpose of this inquiry was to obtain information with regard to the presence of hazardous materials, underground bulk storage tanks, known environmental releases, prior environmental studies and the past asbestos remediation work, if any, at or near the subject site. As of the date of this report, EA has not received a response from the Department.

### 8.3 Local Agencies

EA forwarded a written inquiry to the Erie County Department of Health regarding the subject site. The purpose of the inquiry was to obtain information with regard to the presence of hazardous materials, underground bulk storage tanks, known environmental releases, prior environmental studies, septic system records and the past asbestos remediation work, if any, at or near the subject site. As of the date of this report, EA has not received a response from the Department.

## 9.0 FINDINGS AND CONCLUSIONS

EA has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM practice E 1527-13 of the subject site located at 4245 Clark Street in the Village of Hamburg, Erie County, New York. Two data gaps were identified that could have significantly affected EA's ability to identify recognized environmental conditions associated with the subject site, as described below. Any exceptions to or deletions from this practice are described in Appendix G (Objectives and Limitations) of this report.

This assessment has revealed no evidence of recognized environmental conditions in connection with the subject site, except for the following:

- The subject site has been utilized as a dry cleaner, occupied by Vara's Dry Cleaning, since construction in 1946 through the present. According to Mr. Waterfield, only mineral spirits has been used at the subject site, as opposed to a chlorinated solvent. Historically, mineral spirits has been stored in three ASTs, two previously located along the southeastern exterior of the structure which were installed in 1946 and removed in the 1980s, and one currently located along the southern exterior, which was installed in the 1980s and is still in service. Evidence of staining was observed beneath the current AST and around the dry cleaning equipment.

The concrete floor in the dry cleaning room exhibited staining, limited cracking and deterioration, and one floor drain was present which reportedly discharges to the rear of the property. Stressed vegetation and staining on the asphalt parking lot were observed and appeared to be associated with the boiler blowdown discharge from two pipes along the southwestern corner of the structure. Additionally, small volumes of wastewater from an air vacuum connected to the steamers is directly discharged to the ground surface along the southeastern exterior of the structure.

In that regard, concern exists with respect to possible past release(s) of mineral spirits and other chemicals utilized during routine operations (water-repellant, spot cleaning chemicals, etc.) related to its use, storage, and/or disposal.

- The eastern adjacent property, occupied by Dura Plating Inc., addressed at 4255 Clark Street, was listed on the database for several listings, including a Generator from a Hazardous Waste Manifest for the disposal of chromium. A manifest from 2002 listed the disposal of 800 pounds of "chromium contaminated soil". No spill listing was associated with this manifest. In that regard, concern exists with the respect to possible past release(s) of chromium and other hazardous substances and/or chemicals related to its use, storage, and/or disposal at the eastern adjoining property.

In this context, EA recommends that a Phase II ESA subsurface investigation be completed on the subject site to assess if the soil profile and/or groundwater have been impacted by the historical site and off-site chemical usages.

This assessment has revealed no evidence of controlled or historical recognized environmental conditions in connection with the subject site.

EA did not note any de minimis matters which, although not rising to the level of a recognized environmental condition, present limited liability and/or business risk and should be considered by the Client.

Finally, EA did note the following non-scope consideration which, although addressed as additional issues under the ASTM E1527-13 Standard, presents limited liability and should be considered by the Client:

- A cursory asbestos and lead paint inspection was completed at the time of the site reconnaissance. Two fire doors, pipe wrapping, and boiler tank insulation may contain asbestos. These items were in fair to good condition (non-friable). Some areas of peel and chipping paint were observed. Based on the age of the on-site building (built prior to 1978), additional asbestos containing materials (ACMs) and/or lead paint may have been utilized during construction or renovations. Prior to building renovation and/or demolition, EA recommends appropriate survey of suspect asbestos-containing materials and suspect lead-based paint followed by any necessary abatement.
- The Town of Hamburg study area has an average Radon concentration of 4.95 picocuries/liter, which is above the USEPA Action Level of 4.0 pCi/L. Consideration should be given to completing monitoring of indoor air quality with respect to radon levels to determine if enhanced ventilation or other mitigation methods are warranted.
- The site reconnaissance revealed suspect vapor encroachment conditions at the subject site due to past site usage as a dry cleaner. Based on the current available information, a Vapor Encroachment Screen or Vapor Intrusion Monitoring does appear to be warranted in this case. It should be noted that this Phase I report was not conducted in accordance with ASTM Standard E2600-10 (Vapor Encroachment Screening on Property Involved in Real Estate Transactions).
- PCBs-containing building materials were commonly utilized in the past in commercial buildings prior to 1980. Fluorescent light fixtures possibly containing PCBs-containing ballasts were observed during the site reconnaissance. Based on the age of the structure, it is likely that PCBs-containing building materials, such as window caulk, tar paper and other roofing materials may have been used in its original construction.

- According to NYSDEC, emerging contaminants (ECs) describe pollutants detected in waterbodies that may cause environmental or human health impacts and typically are not regulated under current environmental laws. For example, per- and polyfluoroalkyl substances (PFAS) are man-made chemicals that have been widely used in various consumer, commercial, and industrial products since the 1950s. These chemicals' unique properties make them resistant to heat, oil, stains, grease, and water and useful in a wide variety of everyday products. According to Mr. Waterfield, water-repellent liquid, supplied in 5-gallon containers, were previously used on-site to water proof fabrics. Water-repellant fluids and treatments are likely to contain PFAS chemicals.

If information is received through the Freedom of Information Letter requests, which identify any further environmental concerns, EA will contact our Client immediately with the revised conclusions. Field notes and other information relating to this project are available for review at EA in Orchard Park, New York.

## **10.0 DEVIATIONS AND ADDITIONAL SERVICES**

### **10.1 Data Gaps**

EA has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM practice E 1527-13 of the subject site. EA did identify the following data gaps that could have significantly affected EA's ability to identify recognized environmental conditions associated with the subject site.

- EA did not receive a response from the FOIL request submitted to the New York State Department of Environmental Conservation (NYSDEC).
- EA did not receive a response from the FOIL request submitted to the Erie County Health Department.

### **10.2 Deviations**

Except for the limitations and exceptions noted in Appendix G, this Phase I ESA is generally compliant with ASTM Standard 1527-13.

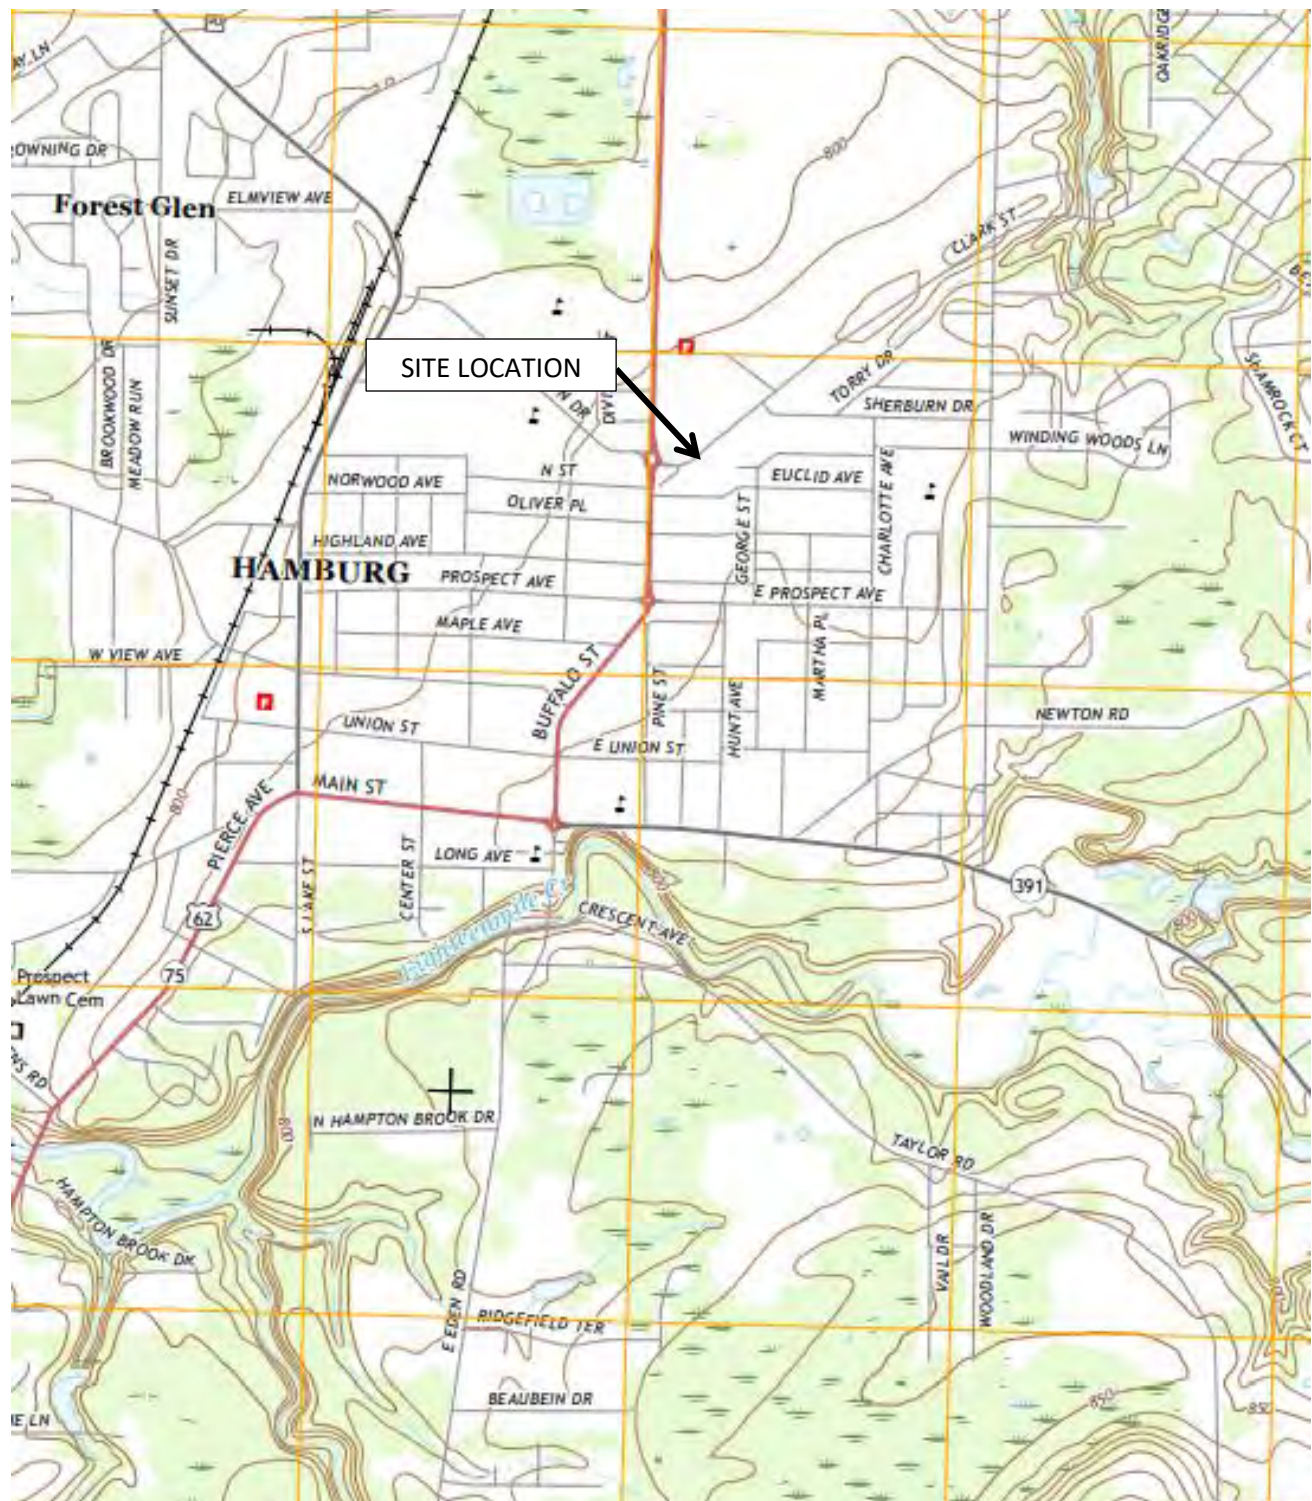

### **10.3 Additional Services**

No additional services beyond the scope of the ASTM Standard 1527-13 other than the limited non-scope items listed above were conducted as part of this Phase I ESA.

## **APPENDIX B**

### **COMPLETED USER/CLIENT and/or OWNER QUESTIONNAIRES**

PHASE I ESA  
USER/CLIENT QUESTIONNAIRE

Site Name/Address: *Vara's Dry Cleaning 4245 Clark St Hamburg NY 14675*

User (Business) Name: *SAME*

User Address:

Name & Title of Representative: *Robert C Waterfield President/Owner*

Reason for Conducting Phase I: *Selling property*

- 1) Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? *NO*
  
- 2) Are you aware of any Activity Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? *NO*
  
- 3) As the user of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? *NO*
  
- 4) Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? *YES*

5) Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? *NO*

6) Do you know the past uses(s) of the property? *Since 1946 (built) it has always been a Petroleum O/C facility We purchased it in 1974*

7) Do you know of specific chemicals that are present or once were present at the property? *NO*

8) Do you know of any spills or other chemical releases that have taken place at the property? *NO*

9) Do you know of any environmental cleanups that have taken place at the property? *NO*

10) As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property? *NO*

# Phase I ESA Owner/Occupant Questionnaire

Re: Property at 4245 Clark St Hamburg NY 14075

Please indicate yes or no to each of the following questions based on your knowledge of the subject site. If you are unsure about an answer and/or cannot provide an accurate response, indicate unknown. For questions answered yes, provide sufficient details to explain your response (i.e., Is the property used for an industrial use? Yes, site currently used for steel manufacturing).

Question	Owner/Occupant			Details
1a. Is the <i>property</i> used for an industrial use?	Yes	<input checked="" type="radio"/> No	Unk	
1b. Is any <i>adjoining property</i> used for an industrial use?	Yes	<input checked="" type="radio"/> No	Unk	
2a. Did you observe evidence or do you have any prior knowledge that the <i>property</i> has been used for an industrial use in the past?	Yes	<input checked="" type="radio"/> No	Unk	
2b. Did you observe evidence or do you have any prior knowledge that any adjoining property has been used for an industrial use in the past?	Yes	<input checked="" type="radio"/> No	Unk	
3a. Is the <i>property</i> used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	<input checked="" type="radio"/> Yes	No	Unk	dry cleaners
3b. Is any <i>adjoining property</i> used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes	<input checked="" type="radio"/> No	Unk	
4a. Did you observe evidence or do you have any prior knowledge that the property has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	<input checked="" type="radio"/> Yes	No	Unk	dry cleaners
4b. Did you observe evidence or do you have any prior knowledge that any <i>adjoining property</i> has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes	<input checked="" type="radio"/> No	Unk	

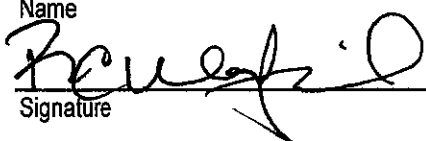

Question	Owner/Occupant			Details
5a. Are there currently any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of >5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the <i>property</i> or at the facility?	Yes	<input checked="" type="radio"/> No	Unk	
5b. Did you observe evidence or do you have any prior knowledge that there have been previously any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of >5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the <i>property</i> or at the facility?	Yes	<input checked="" type="radio"/> No	Unk	
6a. Are there currently any industrial <i>drums</i> (typically 55 gal (208 L)) or sacks of chemicals located on the <i>property</i> or at the facility?	Yes	<input checked="" type="radio"/> No	Unk	
6b. Did you observe evidence or do you have any previous knowledge that there have been previously any industrial <i>drums</i> (typically 55 gal (208 L)) or sacks of chemicals located on the <i>property</i> or at the facility?	Yes	No	<input checked="" type="radio"/> Unk	
7a. Did you observe evidence or do you have any prior knowledge that <i>fill dirt</i> has been brought onto the <i>property</i> that originated from a contaminated site?	Yes	<input checked="" type="radio"/> No	Unk	
7b. Did you observe evidence or do you have any prior knowledge that <i>fill dirt</i> has been brought onto the <i>property</i> that is of an unknown origin?	Yes	<input checked="" type="radio"/> No	Unk	
8a. Are there currently any <i>pits, ponds, or lagoons</i> located on the <i>property</i> in connection with waste treatment or waste disposal?	Yes	<input checked="" type="radio"/> No	Unk	
8b. Did you observe evidence or do you have any prior knowledge that there have been previously any <i>pits, ponds, or lagoons</i> located on the <i>property</i> in connection with waste treatment or waste disposal?	Yes	<input checked="" type="radio"/> No	Unk	
9a. Is there currently any stained soil on the <i>property</i> ?	Yes	<input checked="" type="radio"/> No	Unk	
9b. Did you observe evidence or do you have any prior knowledge that there have been previously any stained soil on the <i>property</i> ?	Yes	<input checked="" type="radio"/> No	Unk	
10a. Are there currently any registered or unregistered storage tanks (above or underground) located on the <i>property</i> ?	<input checked="" type="radio"/> Yes	No	Unk	above ground Solvent tank
10b. Did you observe evidence or do you have any prior knowledge that there have been previously, any registered or unregistered storage tanks (above or underground) located on the <i>property</i> ?	<input checked="" type="radio"/> Yes	No	Unk	
11a. Are there currently any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the <i>property</i> or adjacent to any structure located on the <i>property</i> ?	Yes	<input checked="" type="radio"/> No	Unk	

Question	Owner/Occupant			Details
11b. Did you observe evidence or do you have any prior knowledge that there have been previously, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the <i>property</i> or adjacent to any structure located on the <i>property</i> ?	Yes	<input checked="" type="radio"/> No	Unk	
12a. Is there currently evidence of leaks, spills or staining by substances other than water, or foul odors, associated with any flooring, drains, walls, ceilings, or exposed grounds on the <i>property</i> ?	Yes	<input checked="" type="radio"/> No	Unk	
12b. Did you observe evidence or do you have any prior knowledge that there have been previously, any leaks, spills or staining by substances other than water, or foul odors, associated with any flooring, drains, walls, ceilings, or exposed grounds on the <i>property</i> ?	Yes	<input checked="" type="radio"/> No	Unk	
13a. If the <i>property</i> is served by a private well or non-public water system, is there evidence or do you have prior knowledge that contaminants have been identified in the well or system that exceed guidelines applicable to the water system?	Yes	<input checked="" type="radio"/> No	Unk	
13b. If the <i>property</i> is served by a private well or non-public water system, is there evidence or do you have prior knowledge that the well has been designated as contaminated by any government environmental/health agency?	Yes	<input checked="" type="radio"/> No	Unk	
14 Does the <i>owner</i> or <i>occupant</i> of the <i>property</i> have any knowledge of <i>environmental liens</i> or governmental notification relating to past or recurrent violations of environmental laws with respect to the <i>property</i> or any facility located on the <i>property</i> ?	Yes	<input checked="" type="radio"/> No	Unk	
15a. Has the <i>owner</i> or <i>occupant</i> of the <i>property</i> been informed of the past existence of <i>hazardous substances</i> or <i>petroleum products</i> with respect to the <i>property</i> or any facility located on the <i>property</i> ?	<input checked="" type="radio"/> Yes	No	Unk	Petroleum Solvent
15b. Has the <i>owner</i> or <i>occupant</i> of the <i>property</i> been informed of the current existence of <i>hazardous substances</i> or <i>petroleum products</i> with respect to the <i>property</i> or any facility located on the <i>property</i> ?	<input checked="" type="radio"/> Yes	No	Unk	"
15c. Has the <i>owner</i> or <i>occupant</i> of the <i>property</i> been informed of past existence of environmental violations with respect to the <i>property</i> or any facility located on the <i>property</i> ?	Yes	<input checked="" type="radio"/> No	Unk	
15d. Has the <i>owner</i> or <i>occupant</i> of the <i>property</i> been informed of the current existence of environmental violations with respect to the <i>property</i> or any facility located on the <i>property</i> ?	Yes	<input checked="" type="radio"/> No	Unk	
16 Does the <i>owner</i> or <i>occupant</i> of the <i>property</i> have any knowledge of any <i>environmental site assessment</i> of the <i>property</i> or facility that indicated the presence of <i>hazardous substances</i> or <i>petroleum products</i> on, or contamination of, the <i>property</i> or recommended further assessment of the <i>property</i> ?	Yes	<input checked="" type="radio"/> No	Unk	

Question	Owner/Occupant	Details
17 Does the <i>owner</i> or <i>occupant</i> of the <i>property</i> know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any <i>hazardous substance</i> or <i>petroleum products</i> involving the <i>property</i> by any owner or occupant of the <i>property</i> ?	Yes <input checked="" type="radio"/> No Unk	
18a. Does the <i>property</i> discharge wastewater (not including sanitary waste or storm water) onto or adjacent to the <i>property</i> and/or into a storm water system?	Yes <input checked="" type="radio"/> No Unk	
18b. Does the <i>property</i> discharge wastewater (not including sanitary waste or storm water) onto or adjacent to the <i>property</i> and/or into a sanitary sewer system?	Yes <input checked="" type="radio"/> No Unk	
19 Did you observe evidence or do you have any prior knowledge that any <i>hazardous substances</i> or <i>petroleum products</i> , unidentified waste materials, tires, automotive or industrial batteries, or any other waste material have been dumped above grade, buried and/or burned on the <i>property</i> ?	Yes <input checked="" type="radio"/> No Unk	
20 Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs?	Yes <input checked="" type="radio"/> No Unk	

\*\*\* Owner/Occupant Certification\*\*\*

"I, the owner/occupant of the above referenced subject site, certify that the answers and information provided in this questionnaire are, to the best of my knowledge, true, accurate and complete".

## Building Description and Notable Features (year built, # stories, heat source, basement?)

- Structure built in 1946 and is one-story flat roof with no basement. The structure has operated as a Dry Cleaner since the construction.
- Mr. Waterfield has been an employee of Vara's Dry Cleaner since 1981 around the time his father purchased the building/business.
- Two petroleum solvent 800-gallon ASTs were removed.
- The old dry cleaning unit was replaced in 1960. Mr. Waterfield indicated both the previous and current units used mineral spirits for operations.
- The Boiler system was installed in 1984.

Type	Ext.	Int.	<u>Details:</u> ( <u>usage</u> , <u>size</u> , <u>type</u> , <u>full/empty</u> , <u>staining?</u> )
Hazardous Substances			None
Petroleum Products			None
Drums / Containers			Spot cleaners, Laundry detergent powders and liquids, 30-gallon solvent detergent, various small containers of paint and car detailing items, previously had 5-gallon container of water-repellant.
Stains / Corrosion	X	X	-Boiler pipes and equipment. -Stained floor in washer dryer room. -Dark soil under existing AST and pavement.
USTs / ASTs	X		1000-gallon AST labeled mineral spirits.
Oil / Water Separator			None
Grease Trap			None
PCBs / Transformers / Hydraulic Equip.	X		Pole mounted on east side of parcel.
Hazardous Waste Generation			No record of hazardous waste disposal since 1946.
Fill / Solid Waste Disposal			Dumpster is emptied weekly by Modern Disposal Services. Located in south end of parcel.
Wastewater / Stormwater Discharge			None on site. Storm drain to the east.
Drains / Sumps		X	Three known floor drains in building likely to discharge to soil south of the building.

Septic System			None
Pits / Ponds / Lagoons			None
Pools of Liquids			None
Stressed Vegetation	X		Dead/brown grass near 1-inch discharge pipe at southwest corner of the building.
Wells / Drywells			None
Odors			None
Mold / Mildew			None
Asbestos (tiles; fire doors; pipe insulation)		X	<ul style="list-style-type: none"> <li>- Not aware of any surveys.</li> <li>- Pipe on the ceiling throughout the building appears to be asbestos wrapped.</li> <li>- Fire doors near utility sink.</li> <li>- Boiler may be asbestos insulated.</li> </ul>
Lead (peeling/chipping paint; steel/copper pipe)			<ul style="list-style-type: none"> <li>- Not aware of any surveys.</li> </ul>

#### **Caller Remark:**

"CALLER IS PROSPECTIVE BUYER - FOUND CONTAMINATION IN 40 FT BY 5FT AREA BEHIND BUILDING - SAMPLE RESULTS EXCEED STARS MEMO # 1"

#### **DEC Remark:**

"Prior to Sept, 2004 data translation this spill Lead\_DEC Field was MNP 11/16/95: MNP INSP. & MEETING W/ PAUL PECCIA. HE SHOWED ME PARTIALLY EXPOSED SPILL AREA . VISIBLE OIL CONTAMINATION DOWN 1 FOOT & UNDER CONCRETE PAD. PECCIA SAID SPILLAGE CAME FROM HOUSE KEEPING & PREVIOUS SPILL, DISCOUNT MUFFLER HANDLED BY JFO. PECCIA ALSO MENTIONED OLD DRAIN PIPE TO LEACH BED REMAINS, SUSPECTS CONTAMINATION. I WAS UNABLE TO DETERMINE EXTENT OF SURFACE SPILL CONTAMINATION DUE TO SNOW COVER. BEFORE LEAVING SITE PECCIA SHOWED ME SMALL OIL-CONTAMINATED PILE (< 1 YD.) ON CONCRETE PAD. SOIL CAME

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

FROM PREVIOUS DISCOUNT MUFFLER SPILL, SUPPOSEDLY WHEN JFO ASKED RP TO DIG OUT CONTAMINATION FROM UNDER PAD., THE NEVER PUT IN ROLLOFF W/ OTHER CONTAMINATED SOIL. NOTE: REVIEW OTHER SPILL FILE W/ JFO BEFORE PROCEEDING. 11/20/95: MNP & JFO DISCUSSION. MINOR SURFACE SPILL AT SITE REQUIRING MINIMAL CLEANUP. I WILL FOLLOWUP. TO REINSPECT SITE AFTER THAW TO DETERMINE CLEANUP NEEDED, IF ANY. 11/30/95: MNP INSP. MINOR SPILLAGE NE CORNER OF PROPERTY & NEXT TO CONCRETE PAD. ALSO, SMALL PILE ( 2 DRUMS WORTH) OF OIL CONTAMINATED SOIL ON CONCRETE PAD. 2 SPILL AREAS CAN BE CLEANED UP W/ SHOVEL & DISPOSED W/ PILE OF CONTAMINATED SOIL. ESTIMATE 2-3 DRUMS OF OIL CONTAM. SOIL. SEE PICTURES. 11/30/95: MNP TELECON W/ PAUL PECCIA. JUST NEED SURFACE CLEANUP, CAN BE DONE W/ SHOVEL IN BOTH AREAS. ALL SOIL CAN BE DISPOSED AS PART OF PREVIOUS SPILL. SHOULD NOT REQUIRE ADDITIONAL TESTING, IF OK W/ LANDFILL. TO SEND LETTER. 03/22/96: MNP TELECONS W/ PAUL PECCIA. HE NOW OWNS THIS PROPERTY & OPERATES HIS BUSINESS PAUL'S VILLAGE COLLISION AT THIS LOCATION. HE AGREED TO CLEANUP THE SPILL. HE EXPECTS TO COMPLETE THE WORK WITHIN 30 DAYS & WILL CALL ME WHEN READY FOR AN INSPECTION. I CHECKED PREVIOUS SPILL FILE & INFORMED MR. PECCIA THAT THE SOIL WAS DISPOSED AT BFI THE LAST TIME & SUGGESTED HE DISPOSE SOIL THERE USING THE OLD SAMPLE RESULTS & APPROVAL. 04/08/96: MNP TELECON W/ PAUL PECCIA - PAUL'S COLLISION. HE CLEANED UP MOST OF OIL CONTAMINATION & PUT IN BFI DUMPSTER. BFI DID REQUIRE ANY ADDITIONAL SAMPLING. I PLAN TO INSP. SITE THIS WEEK. 04/12/96: MNP INSP. CLEANUP SATISFACTORY, ALL CONTAMINATED SOIL IN ROLLOF. SPOKE W/ PAL PECCIA, BFI WILL PICKUP ROLLOFF, NO ADDITIONAL SAMPLING NEEDED BECAUSE DEBRIS FROM PREVIOUS SPILL AT SITE. HOLD FOR DISPOSAL RECEIPTS. 04/29/96: RECEIVED DISPOSAL RECEIPT. SOIL DISPOSED 4/17/96 AT BFI LANDFILL. 5/23/96: MNP REVIEWED FILE CLEANUP SATISFACTORY & DISPOSAL RECEIPTS RECEIVED. SENDING CLOSURE LETTER TO PAUL PECCIA, COMPLETE. "

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

"Prior to Sept, 2004 data translation this spill Lead\_DEC Field was MEL / / : . 10/03/89: MEL INSPECTION. MET MR. CINO ON SITE. TOP OF TANK EXPOSED. NO VISIBLE SIGNS OF CONTAMINATION OBSERVED. TANK AND LINES TO BE SEPARATED AND TESTED SEPARATELY. TO WAIT FOR RESULTS. 10/16/89: MEL TELCON WITH RICHARD DIVITA. TANK RETESTED BY MARSHALL TANK. LEAK FOUND IN LINE TO SUCTION PUMP. FAULTY LINE REPAIRED AND TAKEN OUT OF SERVICE. TEST RESULTS TO BE SENT TO OFFICE. 10/17/89: MEL INSPECTION. NO SOIL CONTAMINATION OBSERVED. ON SITE MONITORING WELL APPEARED TO BE FREE OF PETROLEUM CONTAMINATION. 10/17/89: MEL INSPECTION. NO SOIL CONTAMINATION OBSERVED. ON SITE MONITORING WELL APPEARED TO BE FREE OF PETROLEUM CONTAMINATION. WELL TO BE MONITORED. 02/06/90: MEL INSP..UNABLE TO CHECK MW AS EMPLOYEES COULD NOT FIND KEY. 04/09/90: MEL INSP.. MW FREE OF OBSERVABLE CONTAMINATION. NO FURTHER ACTION NECESSARY, RECOMMEND FILE BE CLOSED. "

#### Violation/Evaluation Summary

**Note:** NO RECORDS: As of Apr 2022, there are no Compliance Monitoring and Enforcement (violation) records associated with this facility (EPA ID).

#### Handler Summary

**Importer Activity:** No  
**Mixed Waste Generator:** No  
**Transporter Activity:** No  
**Transfer Facility:** No  
**Onsite Burner Exemption:** No  
**Furnace Exemption:** No  
**Underground Injection Activity:** No  
**Commercial TSD:** No  
**Used Oil Transporter:** No  
**Used Oil Transfer Facility:** No  
**Used Oil Processor:** No  
**Used Oil Refiner:** No  
**Used Oil Burner:** No  
**Used Oil Market Burner:** No  
**Used Oil Spec Marketer:** No

#### Hazardous Waste Handler Details

**Sequence No:** 2  
**Receive Date:** 20060101  
**Handler Name:** RAMSDELL DRY CLEANERS INC  
**Federal Waste Generator Code:** 3  
**Generator Code Description:** Very Small Quantity Generator  
**Source Type:** Implementer

#### Hazardous Waste Handler Details

**Sequence No:** 1  
**Receive Date:** 19850506  
**Handler Name:** RAMSDELL DRY CLEANERS INC  
**Federal Waste Generator Code:** 1  
**Generator Code Description:** Large Quantity Generator  
**Source Type:** Notification

#### Waste Code Details

**Hazardous Waste Code:** F002  
**Waste Code Description:** THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

LETTER TO RP TO DEFINE CONTAMINATION. SCHEDULE BY 9/13/96. 09/13/96: MF LETTER FROM LAWYER, WANTS FINE DROPPED. 09/19/96: MF T/C LAWYER, SHE WILL SET UP OFFICE MEETING. 09/25/96: MF FAX FROM ANGELA DEMERLE, RP'S LAWYER, SHE WANTS OFFICE MEETING 10/9/96 9:30 AT OUR OFFICE. FILE & COPY OF LETTER TO ABBY. 10/09/96: MF RNL FG, ABBY SNYDER, RUSS SAVAGE, TED KOSIOREK, ANGELA DEMERLY, OFFICE MEETING. 1. THE SVES SYSTEM WILL BE EVALUATED, IE INFLUENCE OF MW'S, RANGE OF INFLUENCE, IMPROVEMENT IF NECESSARY. 2. OUTLINE OF A PLAN FOR RBCA. 3. ANALYSIS OF MW'S, UPDATE CONTAMINANT PLUME, ADDITIONAL MW'S OR OTHER METHOD TO DETERMINE PLUME. OFFICE MEETING SCHEDULED FOR 11/22/96. ALSO DISCUSSED FINE, NO RESOLUTION. 10/16/96: MF LETTER FROM ANGELA CONFIRMING ABOVE. 11/22/96: MF MESSAGE FROM RUSS SAVAGE. NO SENSE OF MEETING TODAY, HE DID NOT GET INFORMATION TO US AT AGREED TO DURING 10/9/96 MEETING (INFO WAS TO BE IN BY 11/15/96). 04/09/97: MF LETTER TO RP, CANNOT USE RBCA. ASKED ONCE AGAIN FOR QUARTERLY REPORTS BEGINNING 6/1/97. 06/11/97: MF RECEIVED SITE REPORT, CONTRACTOR REQUESTED PLUME NOT BE DEFINED ONLY MONITORED. ONLY DATA IN REPORT WAS MW SAMPLING & GUAGING. 4/9/97 LETTER TO RP ASKED FOR SVES DATA(FLOW RATES, VACUUM ETC), SUMMERY OF SITE ACTIVITES, THESE WERE NOT INCLUDED. 07/08/97: MF LETTER TO RP, SCHEDULE TO DEFINE PLUME REQUESTED BY 7/31/97 OR STATE WILL DO WORK. ALSO NEXT REPORT DUE 9/1/97. 08/07/97: MF S/V JASON, NATURES WAY. SPOTTED LOCATIONS FOR 2 ADDITIONAL MW'S. TO BE INSTALLED 8/14/97. CHECKED SVES, 0 DRAGGER, EFFECTIVENESS OF SYSTEM WILL BE ALSO CHECKED. 08/14/97: MF RNL S/V JASON, NATURES WAY, INSTALLING 2 MW'S & WILL CHECK EFFECTIVENESS OF SVES. 12/09/97: MF LETTER TO RP. STATE WILL DO OFF SITE WORK AS WE HAVE NOT RECEIVED ANY INFORMATION WE ASKED FOR IN 7/8/97 LETTER. 12/17/97: MF RECEIVED JULY 97 & NOV 97 REPORTS. JULY 97 ALL RESULTS IN PPB STARS. MW#1-ND MW#3-ND MW#4-52658 MW#9-ND MW#11-72 MW#12-ND MW#13-1752.8 MW#14-149.7 MW#16-ND SVES INEFFECTIVE, PIPING TO BE CHECKED. NOV 97 MW'S 17 & 18 INSTALLED, PIPING ON SVES RECONFIGURED. CONNECTED TO MW'S 8, 3 & 4. NATURES WAY SUSPECTS BREAK ON THE PIPING WILL DO ADDITIONAL WORK. MW#2-ND MW#4-9465.4 MW#5-533 MW#8-376.3 MW#9-ND MW#11-20.7 MW#12-17 MW#13-2292.8 MW#15-ND MW#16-ND MW#17-ND MW#18-5123.9 ALL HEAVILY CONTAMINATED MW'S ON SITE EXCEPT FOR MW'S 13, 17 12/22/97: MF LETTER TO RP, REMEDIATION NECESSARY IN THE AREA OF MW'S 13 & 17 [OFFSITE]. PLAN BY 1/30/98. 02/05/98: T/C JASON THEY WILL SAMPLE MW#4, 13, 17 & 18, TODAY. THEY DID A SEARCH ON TASTE FREEZE, NO INDICATION IT WAS EVER A GAS STATION. 02/27/98: MF LETTER TO RP, WE WILL DO OFFSITE WORK. 03/04/98: MF T/C RUSS SAVAGE, THEY WORKING CONTACTING OWNER TO INSTALL SVES. 04/06/98: MF T/C JASON KELLEY, NATURES WAY, CLAIMED OWNERS OF BIG CHILL ARE SELLING FACILITY & THEY DONT WANT ANY INVASIVE WORK DONE ON THRIE PROPERTY. T/C GENE ROMANYSHYN, 675-2737, ONE OF THE OWNERS. TOLD HIM REMEDIATION NECESSARY & THAT THERE ARE LESS INVASIVE METHODS THEY SVS. HE WILL PERSUE WITH NATURES WAY. 08/14/98: MF S/V SVES INSTALLED AT BIG CHILL, NOW CHARLAPS. SVES NOT IN OPERATION AT BIG CHILL. CHECKED SVS AT WINSLOWS, .5 HNU, TRACE DRAGER, 45 VACUUM. 08/24/98: MF RECEIVED REPORT. 4 MW'S SAMPLED, 3 AT BIG CHILL; MW#13-496.8 PPB MW#17 & 18- OK MW#4 AT WINSLOWS- 25.6 PPM 11/13/98: MF RECEIVED REPORT, 4 MW'S SAMPLED 10/09/98, 3 AT BIG CHILL; MW#13-<.01 PPM MW#17-<.01 PPM MW#18-ND MW#4 AT WINSLOWS - 19.13 PPM. CONTRACTOR WANT TO SHUT DOWN SYSTEM AT THE BIG CHILL. 11/15/98: MF LETTER TO RP, KEEP SYSTEM AT BIG CHILL IN OPERATION. 12/04/98: MF S/V TO BIG CHILL, SVES IN OPERATION. SHED LOCKED. UNABLE TO CHECK OUTPUT. 3/19/99 DEBORAH BELGIN 992-9444 CALLED THIS OFFICE. SHE SAID SHE TRIPPED OVER A PIPE STICKING UP FROM THE SIDEWALK IN FRONT OF SUNSET CLEANERS ON SUNDAY MARCH 14, 1999 AT 1:00 PM. SHE SAID THAT THE VILLAGE OF HAMBURG AND SUNSET CLEANERS TOLD HER IT WAS A NYSDEC PIPE. SHE CALLED THIS OFFICE REQUESTING REIMBURSEMENT OF HER MEDICAL BILLS. SHE HURT HER KNEE AND HER HAND, MISSED TWO DAYS OF WORK AND HAD TO GET X-RAYS. I EXPLAINED THAT THE OWNER OF THE PROPERTY AT THE FORMER GAS STATION ACROSS THE STREET INSTALLED THE PIPE AND SHE WOULD HAVE TO CONTACT THEM. I TOLD HER I WOULD CALL HER BACK WITH THE NAME. 3/19/99 FG SPOKE TO TED KOSIOREK 854-8000 WITH IRF. HE SAID A CONSULTANT FOR A COMPANY THAT IS POSSIBLY INTERESTED IN PURCHASING THE PROPERTY HAS RECENTLY SAMPLED THE WELLS. HE SAID NATURE'S WAY ALSO RECENTLY SAMPLED THE WELLS. THIS WELL IS MW16. I EXPLAINED THAT MS. BELGIN HAS A CLAIM AND I WOULD GIVE HER HIS NUMBER. HE SAID OK. I TOLD HIM TO REPAIR WHATEVER IS WRONG WITH THE WELL. HE SAID THAT HE WILL. 3/19/99 MESSAGE WAS LEFT ON MS. BELGIN'S ANSWERING MACHINE TO CALL MR. KOSIOREK AT 854-8000. 06/09/99: MF T/C TED KOSIOEK, HE WILL CHECK INTO REPORT. 08/12/99: MF RECEIVED 2/18/99 MW ANALYSIS. IN PPB STARS 8021 2/18/99 SAMPLING MW#4 - 106 MW'S 13, 17 & 18 OK 4/1/99 SAMPLING MW#4 - 3020 7/2/99 SAMPLING MW#4 - 6487 MW#13 - 29 MW#17 - 116 MW#17- 73 08/13/99: MF S/I SVES IN OPERATION., 0 ON DRAGER & HNU. SVES AT TASTY FREEZE, OFF. 12/16/99: MF

POINT REPAIRED 10/26/01 & PLACED BACK IN SERVICE. 05/07/02: MF RECEIVED MAINTENANCE LOG FOR 11/1/01 THRU 4/29/02. PUMP RUNNING ALL THE TIME. 09/05/02: MF S/I SYSTEM ON LINE, DOOR LOCKED. NO ODOR AT DISCHARGE. 02/05/03: MF RECEIVED 1/31/03 REPORT. CONTRACTOR CHECKED FILTERS 7 TIME BETWEEN 5/13/02 & 8/19/02, NO WATER. PUMP RUNNING. 02/06/03: MF T/C BILL HEITZENRATER 283-7645, HE WILL SEND HNU READINGS. 02/10/03: MF RECEIVED HNU READINGS, 0 FROM 5/13/02 TO 2/7/03, CHECKED 8 TIMES. 03/24/03: MF T/C BILL H, HE WILL SEND PREVIOUS MW SAMPLING DATA & MW WILL AGAIN BE SAMPLED. IF GOOD THEN SOIL BORING SAMPLES, IF GOOD WILL EVALUATE SPILL. 05/27/03: MF RECEIVED 5/20/03 REPORT. MW'S SAMPLED 4/10/03, IN PPB. GW APPX 4'. 8021 RESULTS: MW#3 - BDL'S MW#4 - 1.24 AT 349 BUFFALO ST. MW#18 - AT BIG CHILL - 50.26 8270 RESULTS - BDL'S. WANTS SITE 'I'. 09/22/03: MF LETTER TO RP. MUST TAKE SOIL SAMPLES BEFORE SITE CAN BE EVALUATED. 12/18/03: MF RECEIVED REPORT, 3 SOIL BORINGS COMPLETED & SAMPLED. BORINGS ADVANCED TO 5', PID READINGS TAKEN (NOT ALL INCLUDED) SOIL SAMPLED AT .5-1'. LOCATION 1 - CHRYSENE - 860 BENZO(b)FLOURANTHENE - 1300 LOCATION 2 - CHRYSENE - 800 IN PPB 01/02/04: MF DISCUSSION/TED. RECOMMENDED WE GET PID READINGS FOR FULL DEPTH OF BORINGS & SAMPLE INTERVAL, BY 2/15/04. 01/07/04: MF LETTER TO RP REQUESTING ALL PID READINGS FOR THE ENTIRE DEPTH OF BORINGS. 01/20/04: MF RECEIVED PID READINGS, NOTHING NEW. 03/09/04: MF RETURNED JOE JENOWSKI'S CALL, 310-5635. LEFT MESSAGE. 03/15/04: MF LETTER TO RP, 4 BORINGS MUST BE ADVANCED TO THE WATER TABLE. SPLIT SPOON SAMPLING, BORING LOGS & 8260 SAMPLING. SCHEDULE BY 3/31/04. 07/16/04: MF RECEIVED 7/04 REPORT. SUBSURFACE SOIL INVESTIGATION COMPLETED 5/5/04. 4 SOIL BORING ADVANCED TO 12'. HI PID READINGS; SB-1 - 521 SB-2 - 1519 SB-3 - 32 SB-4 - 1300 CONTRACTOR RECOMMENDS SOIL REMOVAL IN THE AREA OF SB-2. SB'S SAMPLED 5/5/04 IN PPB TOTAL 8260 COMPOUNDS. ANALYZED AT PSC ANALYTICAL SERVICES, BURLINGTON ONT. SB-1 12-16' - 13400 SB-2 0-4' - 925070 SB-3 8-12' - 11190 SB-4 12-16' - 4980 LOG'S SB-1 - STRONG PETROLEUM ODOR/VISIBLE CONTAMINATION 12-16' SB-2 - VERY STRONG PETROLEUM ODOR 0-4' SB-3 - PETROLEUM ODOR 8-12' SB-4 - STRONG PETROLEUM ODOR/VISIBLE CONTAMINATION 12-16' 07/19/04: MF LETTER TO RP, REMEDIATION NECESSARY AT ALL SB LOCATIONS. PLAN BY 8/15/04. 08/02/04: MF T/C DAVE WEBER, OWNER OF 11 EUCLID. COVER CAME OFF THE MW IN HIS DRIVE WAY. HE WANTS IT REPAIRED. T/C TED K, LEFT MESSAGE. 09/22/04: MF S/I/ALBE, AFI, REMOVING & STOCKPILING CONTAMINATED SOIL. AT 1' SOIL HAS A STRONG ODOR. 09/23/04: MF S/I/MARY H, EXCAVATION APPX 20'x40'x8'. STRONG ODOR. EXCAVATION BEING BACKFILLED. 10/06/04: MF RECEIVED FAX OF EXCAVATION SAMPLING RESULTS, IN PPB TOTAL. 8260 8270 EAST WALL - BDL'S BDL'S WEST WALL - BDL'S BDL'S SOUTH WALL - BDL'S BDL'S FLOOR - 7.55 BDL'S NORTH WALL - BDL'S BDL'S 12/10/04: MF RECEIVED 10/04 REPORT. SEE 10/6/04 NOTES FOR EXCAVATION SAMPLING RESULTS. RECEIPTS FOR 207.4 TONS OF SOIL DISPOSED OF. THEY WANT SPILL CLOSED. 12/24/04: MF LETTER TO RP, BASED ON 7/04 REPORT VISUAL CONTAMINATION & STRONG PETROLEUM ODORS WERE NOTED 12-16' IN SB-1 & 4, SB-3 HAD A PERTOLEUM ODOR @ 8-12'. EXCAVATION ONLY DUG DOWN TO 8'. THESE AREAS HAVE TO BE ADDRESSED. SCHEDULE BY 1/28/05. 01/04/05: MF LETTER FROM AFI, THEY WANT SITE MADE 'I'. 02/03/05: MF LETTER TO RP, FURTHER WORK IS NECESSARY IN THE 12-16' DEPTH OF SB-1 & SB-4 DUE TO STRONG ODOR & VISIBLE CONTAMINATION. PLAN BY 2/28/05. 1/9/06 BILL HEITZENRATER CALLED TO INQUIRE ABOUT THE SITE. I TOLD HIM THAT REMEDIATION IS NECESSARY AT THE 8 TO 16 FT BGS INTERVAL AT THE SITE BASED ON MF'S REQUIREMENTS AND LETTER. MR. HEITZENRATER HAS REQUESTED TO REVIEW THE FILE ON WED, 1/11/06 AT 9AM. 1/31/06:SAC TELECON ELBY BENTON - AFI ENVIRONMENTAL. THEY ARE LOOKING TO START WORK AND WANT TO DISCUSS WORKPLAN. SAC TO NOTIFY MF. PHONE NUMBER FOR BILL HEITZENREITER IS 283-7645 OR CELL PHONE IS 940-2725. 01/31/06: MF RECEIVED SUPPLEMENTAL EXCAVATION & DISPOSAL REPORT. THEY PROPOSE REMOVING SOIL 12-16' DEEP. 02/16/06: MF LETTER TO RP, SOIL MUST BE REMOVED IN THE AREAS OF SB-1, 3 & 4 TO A DEPTH OF 12-16'. SCHEDULE BY 3/15/06. 03/17/06: MF LETTER FROM AFI, WORK TO BEGIN LAST WEEK IN APRIL 2006. 04/05/06 RMC/BILL HEITZENRATER/PHONE. HE WILL CALL DEC A FEW DAYS PRIOR TO STARTING WORK. UPDATE 4/30/06. 4/13/2006: ELBY BENTON,AFI,TELECON RJJ,HE SAID THAT THEY WILL BEGIN THEIR REMEDIATION ON TUESDAY,4/18/2006...I TOLD ELBY THAT I WOULD INSPECT EXCAVATION IF NEEDED...ELBY WILL CALL NEXT WEEK AND KEEP US INFORMED. 4/18/2006: RJJ AT SITE AT 1000...AFI HAS BEGUN TO EXCAVATE...SINCE THEY HAVE ENCOUNTERED GROUNDWATER AT ~17',THEIR PLAN IS TO BRING A BAKER TANK TOMORROW,PUMP OUT THE WATER,THEN DYKE UP THE EXCAVATION AND EXCAVATE ANOTHER SECTION...IN EACH SECTION,THEY WILL TAKE THE APPROPRIATE FLOOR SAMPLES...AFI WILL KEEP ME INFORMED AND I WILL INSPECT EXCAVATION AS NEEDED. 4/19/2006: RECEIVED A FAXED LETTER FROM AFI EXPLAINING THE ABOVE REMEDIATION PLAN. 4/20/2006: RJJ AT SITE AT 0930...AFI IS CONTINUING TO REMOVE THE PETROLEUM CONTAMINATED SOIL,THUS FAR,THEY HAVE REMOVED ~300 TONS...IN THE EXCAVATION,THERE IS A 3' LAYER OF WEATHERED FUEL BETWEEN 13-16' DEEP,WHICH THEY ARE EXCAVATING...THEY ALSO HAVE A BAKER TANK ON SITE TO PUMP OUT ANY GROUNDWATER THEY ENCOUNTER. 04/25/06 RMC/AFI ENV./SITE. DIGGING CONTINUES. REMOVED ABOUT 500 TONS SO FAR. AS CLOSE AS CAN GET TO THE ROADS. IMPACTS REMAIN ALONG EUCLID 10 TO 15 FOOT DEEP. 3 FOOT LAYER OF IMPACTED SOILS. MORE EXCAVATION NEEDED AND WILL BE DONE ON THE EAST SIDE OF THE LOT. 04/26/06 RMC/FILE. RECEIVED CALL FROM BILL HEITZENRATER, AFI, HE WANTS TO MAKE SURE THEY ARE DOING ENOUGH FOR INACTIVE STATUS. REVIEWED FILE AND TALKED WITH MIKE FRANKS. GW WAS WITH IN INACTIVE GUIDANCE. SOILS WERE THE PROBLEM. POST EXCAVATION SOILS SAMPLES WILL BE EVALUATED FOR INACTIVE STATUS WHEN RECEIVED. LEFT MESSAGE FOR BILL H. 05/22/06 RMC/FILE. RECEIVED AFI EXCAVATION REPORT. 933 TONS IMPACTED SOILS REMOVED. 6 POST EXCAVATION SAMPLES TAKEN. EAST WALL SHOWED MINOR SVOC TAGM EXCEEDANCE. DISPOSAL DOCUMENTED AT ENSOL. WATER COLLECTED WAS TREATED AND SENT TO ERIE COUNTY SEWER UNDER PERMIT. SITE TO BE MADE INACTIVE DUE TO PETROLEUM TYPE ODORS REMAINING ON THE EAST WALL REPORTED BY THE CONTRACTOR AND MINOR TAGM EXCEEDANCE. LETTER INACTIVE. "

**Caller Remark:**

"WHILE REMOVING THE TANK THEY DISCOVERED CONTAMINATION NEAR THE SUCTION LINE."

**DEC Remark:**

"NATURE'S WAY IS REMOVING THE TANK 11/7/08 FG SITE INSPECTION. UST REMOVED. MINOR CONTAMINATION LOCATED AROUND THE FORMER DISPENSER. NATURE'S WAY REMOVED THE SOIL AND STAGED IT ON PLASTIC. THE SOIL WILL BE DISPOSED PROPERLY AND A RECEIPT PROVIDED. THE HAMBURG CENTRAL SCHOOL DISTRICT WAS TO BACKFILL IMMEDIATELY BECAUSE THE SIDEWALK WAS UNDERMINED DURING THE REMOVAL. EXCAVATION SAMPLES HAVE BEEN COLLECTED AND WILL BE ANALYZED. A REPORT WILL BE PROVIDED TO THE DEPT. 1/23/09 FG SPOKE TO GREG WEBER WITH NATURE'S WAY. HE SAID A CLOSURE REPORT HAS BEEN PREPARED AND HE WILL GET A COPY TO ME. THE SOIL HAS BEEN DISPOSED OF. 1/27/09 NATURE'S WAY PROVIDED THE CLOSURE REPORT WHICH INCLUDES DISPOSAL RECEIPTS AND EXCAVATION SAMPLE RESULTS WHICH WERE ALL ND. NO FURTHER WORK IS REQUIRED. THE SITE IS CLOSED."

**Caller Remark:**

"two tanks 550-1000 gallons will be removed next week after investigation confirms loss to soil"

**DEC Remark:**

"6/8/18 Labella provided the phase II: Francine, As per our conversation, attached is the Phase II ESA for 358 Buffalo Street, Hamburg, NY. We identified two orphaned USTs on the north portion of the Site. We are scheduled to close the USTs in-place, due to the location of Site utilities and the proximity of the Site Building, on Wednesday June 13th. Adam Zebrowski from our office mentioned that he had a general conversation with you a few weeks ago regarding your thoughts on in-place closure of USTs with Site conditions similar to this Site. Let me know if you have any comments or questions. Thank you Andrew Benkleman LaBella Associates - Environmental Engineer 7/11/18 Labella submitted the closure report for the site. Two usts were closed in place. The excavation analytical results were below cp51 levels. No further action is necessary. The site is closed."

**Caller Remark:**

"COMPLAINT OF GASOLINE VAPORS IN TOWN HALL BASEMENT."

**Dec Remark:**

"Prior to Sept, 2004 data translation this spill Lead\_DEC Field was MF 05/03/89: MF 5/1/89, 5/2/89 & 5/3/89 SITE VISIT IN AM & PM CHECKED BASEMENT AREA WITH EXPLOSION & HNU METER, NO READING ON EXPLOSION METER HI OF 50 PPM ON HNU. LEAK IN TANK PIPING HAS BEEN REPAIRED. 05/08/89: MF SITE VISIT, CHECKED THE BASEMENT AREA WITH AN HNU METER, VERY LOW TO ZERO READINGS IN VARIOUS LOCATIONS. 06/12/89: MF SITE VISIT, CHECKED THE BASEMENT AREA WITH AN HNU & LEL METER. NO READING ON LEL METER, HIGH OF 7 PPM ON THE HNU. 07/12/89: MF 7/10/89 SITE VISIT, CHARLEY FASSO INSTALLED 2 MW'S & WILL TEST TANKS. ONE WELL HAS BEEN PUMPED BECAUSE OF PRODUCT. I CHECKED THE WELLS & NO PRODUCT/SHEEN WAS NOTICED. 07/12/89: MF 7/11/89 SITE VISIT, ONE TANK PASSED & THE OTHER FAILED A SYSTEM TEST. TANK WILL BE ISOLATED & RETESTED. NO PRODUCT OR SHEEN WAS NOTICED IN THE WELLS. ADDITIONAL WELLS TO BE INSTALLED. 07/13/89: MF SITE VISIT, A HOLE WAS FOUND IN A CLOSED NIPPLE IN THE VENT LANE. THE HOLE APPEARS TO BE FROM AN INTERMENT. G/O SERVICES WILL REPLACE LINES. FREE PRODUCT IN SUMP PUMP. 07/14/89: MF SITE VISIT, WORK CONTINUING. 07/18/89: MF 7/12/89 SITE VISIT, 5 MW'S INSTALLED NO PRODUCT/SHEEN NOTICED. SOUTH TANK PASSED AN ISOLATION TEST, LINES TO BE UNCOVERED. FREE PRODUCT IN SUMP PIT. THEY WILL BE PUMPED. 07/18/89: MF SITE VISIT, LINES BEING REPLACED. SUMP PIT WILL BE PUMPED AGAIN. NO PRODUCT/SHEEN IN THE WELLS. 08/09/89: MF SITE VISIT, CHECKED MW'S, NO PRODUCT/SHEEN. ONE WELL HAD A GAS ODOR. CHECKED WILL WORKERS IN BUILDING. NO FUMES HAVE BEEN NOTICED SINCE PIPING HAS BEEN REPAIRED. 10/10/89: MF SITE VISIT, CHECKED THE MW'S, NO PRODUCT/SHEEN NOTICED. I THEN MET WITH RICK CUVIELLO, HE CLAIMED NO ODORS HAVE BEEN NOTICED IN THE BUILDING SINCE THE VENT LINE WAS REPAIRED. 02/07/90: MF 2/7/90 SITE VISIT, CHECKED THE MW'S. ALL CLEAR EXCEPT MW#3, IT HAS 1/4 OF PRODUCT IN IT. SENT LETTER TO HAMBURG REQUESTING REMEDIATION. 02/12/90: MF SITE VISIT WITH TOM GILMARTIN, RECOMMENDED WELL BE PUMPED EVERYDAY INTO 55 GALLON DRUM. HE CLAIMED HE WILL DO THIS. IF THIS DOESN'T WORK ADDITIONAL WORK WILL BE REQUIRED. 02/15/90: MF 2/14/90 SITE VISIT WITH TOM GILMARTIN, CHECKED MW#3, NO PRODUCT/SHEEN NOTICED. TOM CLAIMED THIS WELL IS PUMPED EVERYDAY. 03/06/90: MF 3/1/90 SITE VISIT, CHECKED MW#3, NO PRODUCT/SHEEN NOTICED. 04/20/90: MF 4/19/90 SITE VISIT, CHECKED THE MW'S, NO PRODUCT/SHEEN NOTICED. 06/12/90: MF 6/11/90 SITE VISIT, CHECKED MW #3, NO PRODUCT/SHEEN NOTICED. 07/09/90: MF 7/3/90 SITE VISIT, CHECKED THE MW'S, NO PRODUCT/SHEEN. UNABLE TO CHECK MW'S 3 & 4. CAR OVER THEM. 08/29/90: MD 8/28/90 SITE VISIT, CHECKED MWS 3 & 4, MW#3 HAS APPX 1 PRODUCT. SPOKE TO TOM MARTIN, TOLD HIM WHAT MUST BE DONE. WILL SEND A LETTER. 12/28/90: MF 8/29 - 12/28 SITE VISIT AT VARIOUS TIMES, UNABLE TO CHECK WELL, CARS ALWAYS OVER IT. 12/28/90 LETTER TO THE TOWN REQUESTING UPDATE ON THE REMEDIATION. 01/11/91: MF 1/9/91 SITE INSPECTION, THE AREA OF THE CONTAMINATED WELL HAS BEEN EXCAVATED. THE GROUNDWATER IS SHEENLESS, HOWEVER THE SOIL SHEENS. SOIL DISPOSAL LETTER SENT. 03/27/91: MF 3/26/91 SITE VISIT/TOM GILMARTIN. CHECKED THE MW'S. NO PRODUCT/SHEEN NOTICED. TOM WILL CHECK BIOREMEDIATION FOR YHE CONTAMINATED SOIL. 05/21/91: MF 5/21/91 SITE VISIT, CHECKED THE MW'S. NO PRODUCT/SHEEN NOTICED. 06/10/91: MF 6/5/91 MET/ROD

**Caller Remark:**

"DURING CONSTRUCTION IN PARKING LOT, ENCOUNTERED SOIL THAT HAS STRONG PETROLEUM ODOR. NO VISUAL CONTAMINATION PRESENT. CONTRACTOR, JOE HIGGINS OF D.V. BROWN, ADVISED MR. PALMER TO CONTACT US. MR. PALMER HAS AGREED TO LEAVE THE EXCAVATION OPEN AND THE SOIL STAGED ON PLASTIC UNTIL MONDAY. REQUESTS THAT WE CONTACT HIM MONDAY TO SCHEDULE SITE INSPECTION."

**DEC Remark:**

"Prior to Sept. 2004 data translation this spill Lead\_DEC Field was RMC 07/09/01 RMC/MIKE PALMER, SORRENTO/BILL GALLOWAY, GTS/MARC SCHNECKENBERGER, ECI/SITE. UNKNOWN PETROLEUM CONTAMINATION FOUND WHILE EXCAVATING FOR FOOTER OF 40 BY 50 BUILDING, MAY BE FROM OLD ASTS REMOVED LONG AGO, OR FROM FILL BROUGHT TO THE SITE IN THE 50'S, MINOR VISUAL IMPACT NOTED AT 3 TO 4 FOOT LEVEL FOR 40 LINEAR FEET OF FOOTER, 120 TONS SOIL STOCKPILED, PLANS ON BIOTREATING, RMC REQUESTED TWO SAMPLES, FULL STARS, OF WORST CASE EXCAVATION TO SEE IF ANY ADDITIONAL SOILS REQUIRE REMOVAL. ALSO LEAD AND PCBS AS UNKNOWN SOURCE, RESULTS DUE 7/30/01 07/12/01 RMC/FILE CONTACTED SCHNECKENBERGER AND REQUESTED DATA 07/13/01 RMC/FILE. RECEIVED DATA REVIEWED WITH SAC, FURTHER WORK REQUIRED, TAGM EXCEEDANCES, SCHNECKENBERGER/PHONE. RP TO REMOVE WHAT CAN BE AND DO GW ASSESSMENT, UPDATE 7/30/01 7/18/01:SAC INSPECT, MET W/MIKE PALMER AND MARK HASSAN/ECI, ADDITIONAL EXCAVATION OCCURRED TOWARD CENTER OF THE BUILDING FOOTPRINT, RAIN WATER COLLECTED IN BOTTOM OF BOTH EXCAVATIONS DID HAVE SHEEN, INSPECTED FILL IN AREAS ABOVE EXCAVATIONS, PETROLEUM ODORS OBSERVED, PID READINGS REACHED OVER 100 ppm, SAC REQUESTED FURTHER EXCAVATION IN THESE AREAS, MR. PALMER WILL TRY TO COMPLETE WORK TOMORROW, HE SAID HE SENT SAMPLE RESULTS IN THAT THAT SHOW AREAS WERE CLEAN, SAC FOUND SAMPLE RESULTS, ALL PARAMETERS WERE BELOW DETECTION LIMITS, IT WAS AGREED TO TAKE AN ADDITIONAL SAMPLE ON THE WALL AFTER THE EXCAVATION WAS COMPLETED, THE WATER WILL BE PUMPED OUT AND POSSIBLY PUT THROUGH THE PLANT PRETREATMENT PROCESS BEFORE BEING PUMPED INTO THE SEWER, SAC RECOMMENDED MR. PALMER CONTACT BSA BEFORE PUMPING INTO THE SEWER. 7/19/01:SAC TELECON MIKE PALMER, THEY HAVE THE CONTRACTOR THAT DUG THE FOUNDATION ON SITE DO FURTHER REMOVAL, THE WATER FROM THE EXCAVATION HAS BEEN PUMPED INTO PLASTIC DRUMS FOR FUTURE DISPOSAL TO THE SEWER AND MR. PALMER WILL CONTACT BSA TO ARRANGE FOR THIS. 7/19/01:SAC INSPECT SITE, MET WITH MIKE PALMER & MARK HASSAN, EXCAVATION WAS ENLARGED, SOIL PILED NEXT TO EXCAVATION CAME FROM THE TOP, THE FLOOR OF THE EXCAVATION WAS BROWN/TAN COLORED AND WAS SILTY AND GRITTY, IT WAS HARD PACKED AND APPEARED TO BE FAIRLY TIGHT AND ALSO NATIVE SOIL, PETROLEUM ODORS WERE OBSERVED IN AREA AND IN SOME OF THE BOTTOM SAMPLES HOWEVER, SAC USED PHOTOVAC TO FIELD SCREEN SOIL AND NO READING WAS FOUND OVER 10 ppm, SAC CHECKED AREA WHERE SIDE SAMPLE WAS TAKEN, SOIL WAS GREY CLAYEY MATERIAL, NO PETROLEUM ODORS WERE APPARENT, UTILITY LINE RAN NEAR EXCAVATION HERE, SAMPLE WILL BE ANALYZED W/24 HOUR TURNAROUND, PID RESULTS IN THIS AREA WERE AROUND 1 ppm, SAC CHECKED SOIL THAT WAS STAGED ON TOP NEXT TO EXCAVATION, SOIL APPEARED TO BE FILL, NO ODORS WERE APPARENT AND PID READINGS SHOWED LESS THAN 1 ppm, THEY WILL USE THIS MATERIAL AT THE PLANT SITE AND NOT NEAR ADJACENT RESIDENTIAL AREA TO THE PLANT, IF RESULTS FROM SIDE SAMPLE COME BACK LESS THAN TAGM LEVELS IT WAS AGREED TO ALLOW BACKFILLING OF THE AREA TO TAKE PLACE BASED ON ANALYTICAL RESULTS BEING NON-DETECT FROM BOTTOM SAMPLES THAT WERE TAKEN FROM EXCAVATION A FEW DAYS EARLIER, NO VISUAL STAINING OF BOTTOM AND PID READINGS BEING LESS THAN 10 ppm, SAC DID EXPLAIN THAT SITE MUST REMAIN ACTIVE AS LONG AS BIOTREATMENT IS TAKING PLACE., 08/19/02 RMC/MARK SCHNECKENBERGER/PHONE. WANTED SPECS FOR SAMPLING BIO CELL. CELL HAS NOT BEEN TILLED REGULARLY, RMC ADVISED IT MUST BE TILLED WITH NO WEEDS GROWING ON IT. TO MEET ON SITE. UPDATE 8/30/02 12/02/02 RMC/MIKE PALMER/PHONE. SOIL STILL NOT DONE. WILL SAMPLE IN SPRING. RESULTS DUE 4/15/03 05/22/03 RMC/MARK SCHNECKENBERGER/PHONE. AGREED BIOSAMPLES AT THREE. UPDATE 6/30/03 10/09/03 RMC/FILE. NO BIO TREATMENT RESULTS, LETTER, REPOSE DUE 10/30/03 10/20/03 RMC/FILE. RECEIVED BIO-SAMPLE RESULTS. SHOWS NUMEROUS ESTIMATED VALUES ABOVE TAGM AND STARS FOR SEMI-VOL. APPEAR BIOREMEDIATION NOT WORKING. RMC LEFT MESSAGE FOR MIKE PALMER. 10/20/03 RMC/MIKE PALMER/PHONE. RMC REMINDED ON TWO YEAR LIMIT. TO RESAMPLE SOIL AS LAB MAY BE IN ERROR. RESULTS DUE 11/30/03 12/16/03 RMC/FILE. NO RESULTS LETTER, RESPONSE DUE 12/30/03 01/14/04 RMC/FILE. RECEIVED SOIL UNDER TREATMENT RESULTS RECEIVED 1/12/04 WITH SAC. RESULTS DO NOT MEET TAGM. LEFT MESSAGE FOR MARK PALMER ADVISING SUCH AND AGAIN ABOUT THE TWO YEAR LIMIT ON BIOREMEDIATION. UPDATE 1/30/04. 01/14/04 RMC/MIKE PALMER/PHONE. HE WILL GET PLAN TOGETHER TO GET SOILS TREATED, DUE 4/30/04. 03/17/04 RMC/FILE. MARK HANNA ASKED SAC ABOUT PETROLEUM CONTAMINATED SOILS. HE SAID THAT TAGM MUST BE MET OR THEY NEED A BUD FROM SOLID WASTE. DEC UNSURE IF HE HAS BEEN HIRED BY RP OR NOT. TREATMENT PLAN DUE 4/30/04. 05/27/04 RMC/FILE. LEFT MESSAGE FOR MIKE PALMER ASKING FOR DISPOSAL OR BIO PLAN. UPDATE 6/15/04. 06/15/04 RMC/FILE. DISCUSSED SITE WITH MIKE PALMER A FEW DAYS AGO. SORRENTO WILL EITHER DISPOSE OR TREAT. LETTER ON TREATMENT OR DISPOSAL RECEIPTS DUE 7/15/04. REVISED TO 8/15/04. 09/09/04 RMC/BOB PLANTER, 823-6262 1484, SORRENTO/PHONE. SOIL WILL BE DISPOSED OF. RECEIPTS DUE 10/30/04. 11/24/04 RMC/BOB PLANTER/PHONE. SOIL DISPOSED OF RECEIPTS IN MAIL. \ 11/26/04 RMC/FILE RECEIVED DISPOSAL RECEIPTS FOR 183 TONS. NO FURTHER ACTION REQUIRED, CLOSE OUT. "

## Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:*

*"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."*

### Standard Environmental Record Sources

#### Federal

##### Formerly Utilized Sites Remedial Action Program:

DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

**Government Publication Date:** Mar 4, 2017

##### National Priority List:

NPL

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

**Government Publication Date:** Mar 30, 2022

##### National Priority List - Proposed:

PROPOSED NPL

Sites proposed - by the EPA, the state agency, or concerned citizens - for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

**Government Publication Date:** Mar 30, 2022

##### Deleted NPL:

DELETED NPL

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

**Government Publication Date:** Mar 30, 2022

**SEMS List 8R Active Site Inventory:**

SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

**Government Publication Date:** Apr 27, 2022

**Inventory of Open Dumps, June 1985:**

ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

**Government Publication Date:** Jun 1985

**SEMS List 8R Archive Sites:**

SEMS ARCHIVE

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

**Government Publication Date:** Apr 27, 2022

**EPA Report on the Status of Open Dumps on Indian Lands:**

IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

**Government Publication Date:** Dec 31, 1998

**Comprehensive Environmental Response, Compensation and Liability Information System -**

CERCLIS

**CERCLIS:**

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

**Government Publication Date:** Oct 25, 2013

**CERCLIS - No Further Remedial Action Planned:**

CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

**Government Publication Date:** Oct 25, 2013

**CERCLIS Liens:**

CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

**Government Publication Date:** Jan 30, 2014

**RCRA CORRACTS-Corrective Action:**

RCRA CORRACTS

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

**Government Publication Date:** Apr 11, 2022

**RCRA non-CORRACTS TSD Facilities:**[RCRA TSD](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

**Government Publication Date:** Apr 11, 2022

**RCRA Generator List:**[RCRA LQG](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

**Government Publication Date:** Apr 11, 2022

**RCRA Small Quantity Generators List:**[RCRA SQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

**Government Publication Date:** Apr 11, 2022

**RCRA Very Small Quantity Generators List:**[RCRA VSQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

**Government Publication Date:** Apr 11, 2022

**RCRA Non-Generators:**[RCRA NON GEN](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

**Government Publication Date:** Apr 11, 2022

**RCRA Sites with Controls:**[RCRA CONTROLS](#)

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

**Government Publication Date:** Apr 11, 2022

**Federal Engineering Controls-ECs:**[FED ENG](#)

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date:** May 25, 2022

**Federal Institutional Controls- ICs:**[FED INST](#)

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

**Government Publication Date:** May 25, 2022

**Land Use Control Information System:**

LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

**Government Publication Date:** Sep 1, 2006

**Institutional Control Boundaries at NPL sites:**

NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

**Government Publication Date:** Mar 30, 2022

**Emergency Response Notification System:**

ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

**Government Publication Date:** 1982-1986

**Emergency Response Notification System:**

ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

**Government Publication Date:** 1987-1989

**Emergency Response Notification System:**

ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

**Government Publication Date:** Jun 5, 2022

**The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:**

FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

**Government Publication Date:** Aug 20, 2021

**FEMA Underground Storage Tank Listing:**

FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

**Government Publication Date:** Dec 31, 2017

**Facility Response Plan:**

FRP

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

**Government Publication Date:** Dec 31, 2021

**Delisted Facility Response Plans:**

DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

**Government Publication Date:** Dec 31, 2021

**Historical Gas Stations:****HIST GAS STATIONS**

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

**Government Publication Date:** Jul 1, 1930

**Petroleum Refineries:****REFN**

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

**Government Publication Date:** Feb 4, 2022

**Petroleum Product and Crude Oil Rail Terminals:****BULK TERMINAL**

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

**Government Publication Date:** Feb 4, 2022

**LIEN on Property:****SEMS LIEN**

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

**Government Publication Date:** Apr 27, 2022

**Superfund Decision Documents:****SUPERFUND ROD**

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

**Government Publication Date:** May 3, 2022

**State****Registry of Inactive Hazardous Waste Disposal Sites in New York State:****SHWS**

State-and tribal- equivalent CERCLIS. State Superfund Program (Inactive Hazardous Waste Disposal Site Remedial Program) (IHWDS) - Oversees the identification, investigation and cleanup of sites where consequential amounts of hazardous waste exist. These sites go through a process of investigation, evaluation, cleanup and monitoring that has several distinct stages. This list is made available by New York State Department of Environmental Conservation's State Superfund Program.

**Government Publication Date:** Jun 1, 2022

**Delisted Registry of Inactive Hazardous Waste Disposal Sites in New York:****DELISTED SHWS**

This database contains a Registry of Inactive Hazardous Waste Disposal sites which have been removed from New York Department of Environmental Conservation's Environmental Site Remediation database.

**Government Publication Date:** Jun 1, 2022

**Hazardous Substance Waste Disposal Sites:****HSWDS**

A list of sites included in Hazardous Substance Waste Disposal Site Study reports made available by the New York Department of Environmental Conservation Division of Hazardous Waste Remediation. Provides information regarding the evolving status of hazardous substance waste disposal sites in New York.

**Government Publication Date:** Oct 24, 2003

**Vapor Intrusion Legacy Site List:****VAPOR**

New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion. This list is made available by Department of Environmental Conservation's Vapor Intrusion Legacy Site List. This database is state equivalent CERCLIS.

**Government Publication Date:** Dec 31, 2018

**Solid Waste Facilities and Landfills:**

SWF/LF

Solid Waste Information Management System (SWIMS) is an inventory containing active and inactive facilities throughout the state. This list is made available by Department of Environmental Conservation's Solid Waste Information Management System (SWIMS).

**Government Publication Date: Dec 22, 2021**

**Inactive Landfill Facilities:**

LANDFILL INACTIVE

List of inactive landfills in the State of New York. This data is made available by the New York State Department of Environmental Conservation (DEC). DEC notes that these are preliminary data and should not be regarded as a complete inventory of all landfills in the State, and also that site locations and attributes are preliminary and should not be relied upon without independent verification.

**Government Publication Date: Nov 1, 2021**

**Waste Tire Facilities:**

WASTE TIRE

This list of active Waste Tire Facilities is maintained by the New York State Department of Environmental Conservation. Waste tire storage facilities (WTSF) store waste tires or portions of waste tires. Most of these facilities require Part 360 permits, but under certain conditions a registration may be available.

**Government Publication Date: Apr 7, 2022**

**Recycling Facilities:**

RECYCLING

The Department of Environmental Conservation (DEC), Division of Materials Management (DMM), Bureau of Permitting and Planning regulates solid waste management facilities in accordance with 6 NYCRR Part 360. Information pertaining to those facilities is maintained with the Division's Solid Waste Information Management System (SWIMS) database. The Facility List is a dataset related to solid waste management facilities operating in the state, and includes such information as facility location, contact names and associated information, waste types managed, and regulatory information.

**Government Publication Date: Apr 7, 2022**

**Leaking Storage Tanks:**

LST

This database contains records of chemical and petroleum spill incidents. They include leaking aboveground storage tanks or leaking underground storage tanks, with incidents of tank test failures, tank failures and tank overfill. This list is made available by New York State Department of Environmental Conservation's Spill Response Program.

**Government Publication Date: Jun 16, 2022**

**Delisted Leaking Storage Tanks:**

DELISTED LST

List of Leaking Storage Tank sites which has been removed from New York Department of Environmental Conservation's Spill Response Program

**Government Publication Date: Jun 16, 2022**

**Underground Storage Tanks- UST-Petroleum Bulk Storage (PBS):**

UST

Facilities within the Petroleum Bulk Storage (PBS) that have underground storage tanks. Underground petroleum storage facilities with a combined storage capacity over eleven hundred (1,100) gallons. This list is made available by New York Department of Environmental Conservation's Environmental Site Database Search.

**Government Publication Date: Jun 6, 2022**

**The Bulk Storage Program Database - AST:**

AST

Facilities within the Petroleum Bulk Storage (PBS) that have aboveground storage tanks. Aboveground petroleum storage facilities with a combined storage capacity over eleven hundred (1,100) gallons. This list is made available by New York State Department of Environmental Conservation's Petroleum Bulk Storage (PBS) program.

**Government Publication Date: Jun 6, 2022**

**Petroleum Bulk Storage:**

TANKS

The Bulk Storage Program Database maintains the registrations of active and inactive bulk storage sites statewide. This database includes Petroleum Bulk Storage (PBS) tanks where no information is available on whether they are ASTs or USTs. This list is made available by Department of Environmental Conservation's Petroleum Bulk Storage (PBS) program.

**Government Publication Date: Jun 6, 2022**

**Major Oil Storage Facilities (MOSF):**

MOSF

In 1977, the New York State Legislature passed the "Oil Spill Prevention, Control and Compensation Act" (Article 12 of the Navigation Law). This law regulates all oil terminals and transport vessels operating in the waters of the State which have a storage capacity of 400,000 gallons or more. (Terminals and vessels with a capacity of 400,000 gallons or more are commonly referred to as major oil storage facilities or MOSFs). This list is made available by Department of Environmental Conservation's Major Oil Storage Facility (MOSF) Program.

**Government Publication Date: Jun 6, 2022**

**Chemical Bulk Storage (CBS):**

CBS

Facilities that store regulated hazardous substances in underground tanks. "Hazardous substance" means any substance listed as hazardous or acutely hazardous in 6 NYCRR Part 597 or a mixture thereof. This list is made available by Department of Environmental Conservation's Chemical Bulk Storage (CBS) Program.

**Government Publication Date:** Jun 6, 2022

**Delisted Storage Tanks:**

DELISTED TANKS

List of Storage Tank sites which has been removed from New York Department of Environmental Conservation's Environmental Site Database.

**Government Publication Date:** Jun 6, 2022

**Delisted County Records:**

DELISTED COUNTY

Records removed from county databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

**Government Publication Date:** Apr 22, 2022

**Registry of Engineering Controls in New York State:**

ENG

Registry of Engineering Controls in New York State taken from the Environmental Site Remediation Database.

**Government Publication Date:** Jun 1, 2022

**Registry of Institutional Controls in New York State:**

INST

Registry of Institutional Controls in New York State taken from the Environmental Site Remediation Database.

**Government Publication Date:** Jun 1, 2022

**Voluntary Cleanup Agreements:**

VCP

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites. This list is made available by Department of Environmental Conservation's Voluntary Cleanup Program.

**Government Publication Date:** Jun 1, 2022

**Environmental Restoration Program Listing:**

ERP

Environmental Restoration Program - Provides municipalities with financial assistance for site investigation and remediation at eligible brownfield sites. In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (Bond Act). Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. This list is made available by Department of Environmental Conservation's Environmental Restoration Program.

**Government Publication Date:** Jun 1, 2022

**Brownfields Site List (Subset of Site Remediation):**

BROWNFIELDS

Brownfield Cleanup Program was developed to enhance private-sector cleanups of brownfields and to reduce development pressure on "Greenfields". A Brownfield site is real property, the redevelopment or reuse of which may be complicated by the presence or potential presence of a contaminant. Contaminants include hazardous waste and/or petroleum. This list is made available by Department of Environmental Conservation's Brownfield Cleanup Program.

**Government Publication Date:** Jun 1, 2022

**Tribal****Leaking Underground Storage Tanks (LUSTs) on Tribal/Indian Lands:**

INDIAN LUST

LUSTs on Tribal/Indian Lands in Region 2, which includes New York and New Jersey. There are no LUST records in New York at this time.

**Government Publication Date:** Jan 28, 2016

**Underground Storage Tanks (USTs) on Indian Lands:**

INDIAN UST

USTs on Tribal/Indian Lands in Region 2, which includes New York and New Jersey.

**Government Publication Date:** Apr 04, 2016

**Delisted Tribal Leaking Storage Tanks:**

DELISTED ILST

Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.

**Government Publication Date:** Apr 7, 2022

**Delisted Tribal Underground Storage Tanks:**

DELISTED IUST

Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.

**Government Publication Date:** Jan 30, 2022

**County**

**No County databases were selected to be included in the search.**

**Additional Environmental Record Sources****Federal****Facility Registry Service/Facility Index:**

FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

**Government Publication Date:** Nov 2, 2020

**Toxics Release Inventory (TRI) Program:**

TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

**Government Publication Date:** Aug 24, 2021

**Perfluorinated Alkyl Substances (PFAS) Releases:**

PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

**Government Publication Date:** Aug 24, 2021

**PFOA/PFOS Contaminated Sites:**

PFAS NPL

List of National Priorities List (NPL) and related Superfund Alternative Agreement (SAA) sites where PFOA or PFOS contaminants have been found in water and/or soil. The site listing is provided by the Federal Environmental Protection Agency (EPA).

**Government Publication Date:** Apr 15, 2022

**Perfluorinated Alkyl Substances (PFAS) Water Quality:**

PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

**Government Publication Date:** Jul 20, 2020

**SSEHRI PFAS Contamination Sites:**

PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Disclaimer: The source conveys this database undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Limited location details are available with this data. Access the following for the most current informations <https://pfasproject.com/pfas-contamination-site-tracker/>

**National Response Center PFAS Spills:**

ERNS PFAS

National Response Center (NRC) calls from 1990 to the most recent complete calendar year where there is indication of Aqueous Film Forming Foam (AFFF) usage. NRC calls may reference AFFF usage in the "Material Involved" or "Incident Description" fields. Data made available by the US Environmental Protection Agency (EPA). Disclaimer: dataset may include initial or misidentified incident data not yet validated or investigated by a federal/state response agency.

Government Publication Date: Feb 23, 2022

**Hazardous Materials Information Reporting System:**

HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

**National Clandestine Drug Labs:**

NCDL

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Apr 30, 2022

**Toxic Substances Control Act:**

TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

**Hist TSCA:**

HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

**FTTS Administrative Case Listing:**

FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

**FTTS Inspection Case Listing:**

FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

**Potentially Responsible Parties List:**

PRP

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: May 25, 2022

**State Coalition for Remediation of Drycleaners Listing:**

SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

**Government Publication Date: Nov 08, 2017**

#### **Integrated Compliance Information System (ICIS):**

**ICIS**

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

**Government Publication Date: Apr 30, 2022**

#### **Drycleaner Facilities:**

**FED DRYCLEANERS**

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) online search. The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

**Government Publication Date: May 5, 2021**

#### **Delisted Drycleaner Facilities:**

**DELISTED FED DRY**

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

**Government Publication Date: May 5, 2021**

#### **Formerly Used Defense Sites:**

**FUDS**

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

**Government Publication Date: May 26, 2021**

#### **Former Military Nike Missile Sites:**

**FORMER NIKE**

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

**Government Publication Date: Dec 2, 1984**

#### **PHMSA Pipeline Safety Flagged Incidents:**

**PIPELINE INCIDENT**

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

**Government Publication Date: Jul 7, 2020**

#### **Material Licensing Tracking System (MLTS):**

**MLTS**

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

**Government Publication Date: May 11, 2021**

#### **Historic Material Licensing Tracking System (MLTS) sites:**

**HIST MLTS**

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

**Government Publication Date: Jan 31, 2010**

#### **Mines Master Index File:**

**MINES**

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

**Surface Mining Control and Reclamation Act Sites:**

SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Feb 22, 2022

**Mineral Resource Data System:**

MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

**Uranium Mill Tailings Radiation Control Act Sites:**

URANIUM

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

Government Publication Date: Mar 4, 2017

**Alternative Fueling Stations:**

ALT FUELS

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

Government Publication Date: May 16, 2022

**Air Facility System:**

AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

**Superfunds Consent Decrees:**

CONSENT DECREES

A list of Superfund consent decrees made available by the Department of Justice, Environment & Natural Resources Division (ENRD).

Government Publication Date: May 18, 2022

**Registered Pesticide Establishments:**

SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 30, 2022

**Polychlorinated Biphenyl (PCB) Transformers:**

PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

**Polychlorinated Biphenyl (PCB) Notifiers:**

PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

**Government Publication Date:** Jan 20, 2022

## **State**

### **Underground Injection Control Wells:**

[UIC](#)

A well permit is required from the Division of Mineral Resources for any brine disposal well deeper than 500 feet. This includes any operation to drill, deepen, plug back or convert a well. Regardless of well depth, the NYSDEC Division of Water must be contacted for a determination of whether a SPDES permit is necessary to operate any brine disposal well.

**Government Publication Date:** Aug 6, 2018

### **Manufactured Gas Plants:**

[MGP](#)

A list of former Manufactured Gas Plants (MGP) made available by the New York Department of Environmental Conservation (NYSDEC). From the late 1800's to the mid 1900's, hundreds of manufactured gas plants across New York State supplied homes and industry with fuel. Former MGP structures such as gas holders, tar separators, wells, and tanks were often susceptible to spills and leaks. As a result, these structures were a significant source of contamination from the release of tar and other toxic by-products.

**Government Publication Date:** Oct 16, 2019

### **Spill Incidents Database:**

[NY SPILLS](#)

Spill Incidents Database has records dating back to 1978. This database contains records of chemical and petroleum spill incidents. The DEC Spill Response program receives and compiles reports of hazardous material spills occurring anywhere in New York State. These reports are submitted through the Spill Hotline and other mechanisms, and entered by DEC spill response staff into the state's official data base of Spill Incidents Reports. This list is made available by New York State Department of Environmental Conservation's Spill Response Program.

**Government Publication Date:** Jun 16, 2022

### **PFAS Remedial Sites:**

[PFAS CONTAM](#)

List of sites being addressed under one of the New York Department of Environmental Conservation (DEC) Division of Environmental Remediation (DER)'s remedial programs, where the waste or contaminant of concern is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

**Government Publication Date:** Jun 1, 2022

### **Per- and Polyfluoroalkyl Substances (PFAS):**

[PFAS](#)

A list of sites surveyed by the New York Department of Environmental Conservation to determine locations that manufacture, use, store, or release into the environment materials containing Per- and Polyfluoroalkyl Substances (PFAS). Per- and Polyfluoroalkyl Substances (PFAS) are a group of chemicals used to make fluoropolymer coatings and products that resist heat, oil, stains, grease, and water. Some PFAS are difficult to break down and persist in the environment that may cause harm to the public. This list is made available by the Department of Environmental Conservation of New York State.

**Government Publication Date:** Jan 16, 2019

### **Landfill Investigations PFAS Sampling Results:**

[PFAS LANDFILL](#)

A list of inactive landfill sites that have been investigated for Per- and Polyfluoroalkyl Substances (PFAS) in the state of New York made available by the New York State Department of Environmental Conservation.

**Government Publication Date:** Jun 30, 2020

### **Registered Dry Cleaner Facilities:**

[DRYCLEANERS](#)

The Division of Air Resources of the Department of Environmental Conservation (DEC) tracks all registered dry cleaner facilities.

**Government Publication Date:** May 27, 2022

### **Delisted Dry Cleaner Facilities:**

[DELISTED DRYCLEANERS](#)

Sites removed from the list of dry cleaner facilities registered with the Department of Environmental Conservation (DEC)'s Division of Air Resources.

**Government Publication Date:** May 27, 2022

### **Hazardous Waste Manifest - Facilities:**

[NY MANIFEST](#)

List of facilities located in New York that are included in the Hazardous Waste Manifest Data Downloads Location Address data file made available by the New York Department of Environmental Conservation (DEC), with which no manifests are associated. The Hazardous Waste Manifest Data made available by the NY DEC is compiled from hazardous waste manifest shipments to, from, or within New York State. The Bureau of Program Management, in the Division of Environmental Remediation, is responsible for maintaining hazardous waste manifest records.

**Government Publication Date: Jun 23, 2022**

**Receivers from Hazardous Waste Manifests:**

**REC MANIFEST**

List of receiver facilities located in New York that are included in the Hazardous Waste Manifest Data Downloads Location Address data file made available by the New York Department of Environmental Conservation (DEC), which are identified as a receiver in associated manifests. The Hazardous Waste Manifest Data made available by the NY DEC is compiled from hazardous waste manifest shipments to, from, or within New York State. The Bureau of Program Management, in the Division of Environmental Remediation, is responsible for maintaining hazardous waste manifest records. Hazardous Waste Code Descriptions are from NY Part 371.4 (6 CRR-NY 371.4) Identification and Listings of Hazardous Waste, unless otherwise noted.

**Government Publication Date: Jun 23, 2022**

**Generators from Hazardous Waste Manifests:**

**GEN MANIFEST**

List of generator facilities located in New York that are included in the Hazardous Waste Manifest Data Downloads Location Address data file made available by the New York Department of Environmental Conservation (DEC), which are identified as a generator in associated manifests. The Hazardous Waste Manifest Data made available by the NY DEC is compiled from hazardous waste manifest shipments to, from, or within New York State. The Bureau of Program Management, in the Division of Environmental Remediation, is responsible for maintaining hazardous waste manifest records. Hazardous Waste Code Descriptions are from NY Part 371.4 (6 CRR-NY 371.4) Identification and Listings of Hazardous Waste, unless otherwise noted.

**Government Publication Date: Jun 23, 2022**

**New York City E-Designated Sites:**

**E DESIGNATION**

List of sites with an E-Designation - a NYC zoning map designation that indicates the presence of an environmental requirement pertaining to potential hazardous materials contamination, window/wall noise attenuation, or air quality impacts on a particular tax lot. The New York City Office of Environmental Remediation administers the E-Designation Environmental Review Program to avoid significant adverse impacts to human health or the environment through exposure to these hazards.

**Government Publication Date: Feb 4, 2022**

**Registered Cooling Towers:**

**COOLING TOWERS**

Locations of cooling towers registered with New York State, made available by the Center for Environmental Health. In August 2015, the New York State Department of Health released emergency regulations requiring the owners of cooling towers to register them with New York State. These data are self-reported by owners and/or property managers of cooling towers in service in New York State.

**Government Publication Date: May 24, 2022**

**Tier 2 Report:**

**TIER 2**

A list of Tier 2 facilities in the state of New York. This is a list of facilities which have reported hazardous substances provided by Homeland Security and Emergency Services.

**Government Publication Date: Jan 28, 2019**

**NY DEC Projects of Interest:**

**PROJECTS**

A list of permits for notable projects - permit applications that have received a lot of public attention - made available by the New York Department of Environmental Conservation (DEC).

**Government Publication Date: Nov 26, 2021**

**Air Permitted Facilities:**

**AIR PERMITS**

This list of issued state facility air permits is maintained by the New York State Department of Environmental Conservation. Owners or operators of emission sources that are subject to 6 NYCRR Subpart 201-5 must obtain a State facility permit. Draft permits are official versions of permits whose initial development is complete, public notice given, and made available for public review and comment. These permits are prepared by the Division of Air Resources regional staff of the New York Department of Environmental Conservation. Please note: An Issued permit is valid for a stated period of time. Modifications may be made to an issued permit for the remainder of the active permit.

**Government Publication Date: Dec 22, 2021**

**Liens Listing:**

**LIEN**

New York Environmental Protection and Spill Compensation Fund (Oil Spill Fund) places liens on properties that are sites of oil spills when the owners are responsible parties and fail to pay for cleanup. The Office of the State Comptroller provides this listing of liens information from the Oil Spill Fund.

**Government Publication Date: Oct 5, 2021**

**Tribal**

*No Tribal additional environmental record sources available for this State.*

**County**

*No County additional environmental record sources available for this State.*

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

## Property Information

Order Number: 22072700165p  
Date Completed: July 27, 2022  
Project Number: e2121  
Project Property: 4245 Clark Street  
4245 Clark Street Hamburg NY 14075

Wells and Additional Sources.....	22
Summary.....	23
Detail Report.....	25
Radon Information.....	46
Appendix.....	47
Liability Notice.....	49

The ERIS **Physical Setting Report - PSR** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

### Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

## Topographic Information

**Current USGS Topo (2016)**

**Quadrangle(s): Hamburg, NY**

Source: USGS 7.5 Minute Topographic Map

## Topographic Information

The previous topographic map(s) are created by seamlessly merging and cutting current USGS topographic data. Below are shaded relief map(s), derived from USGS elevation data to show surrounding topography in further detail.

Topographic information at project property:

Elevation: 819.41 ft

Slope Direction: N/A

# Hydrologic Information

## Wetland (State Source)

This data shows only those wetlands that are currently mapped or officially proposed for addition to the wetland maps and currently regulated under the New York State Freshwater Wetlands Act.

**Geologic Units**

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

## Geologic Information

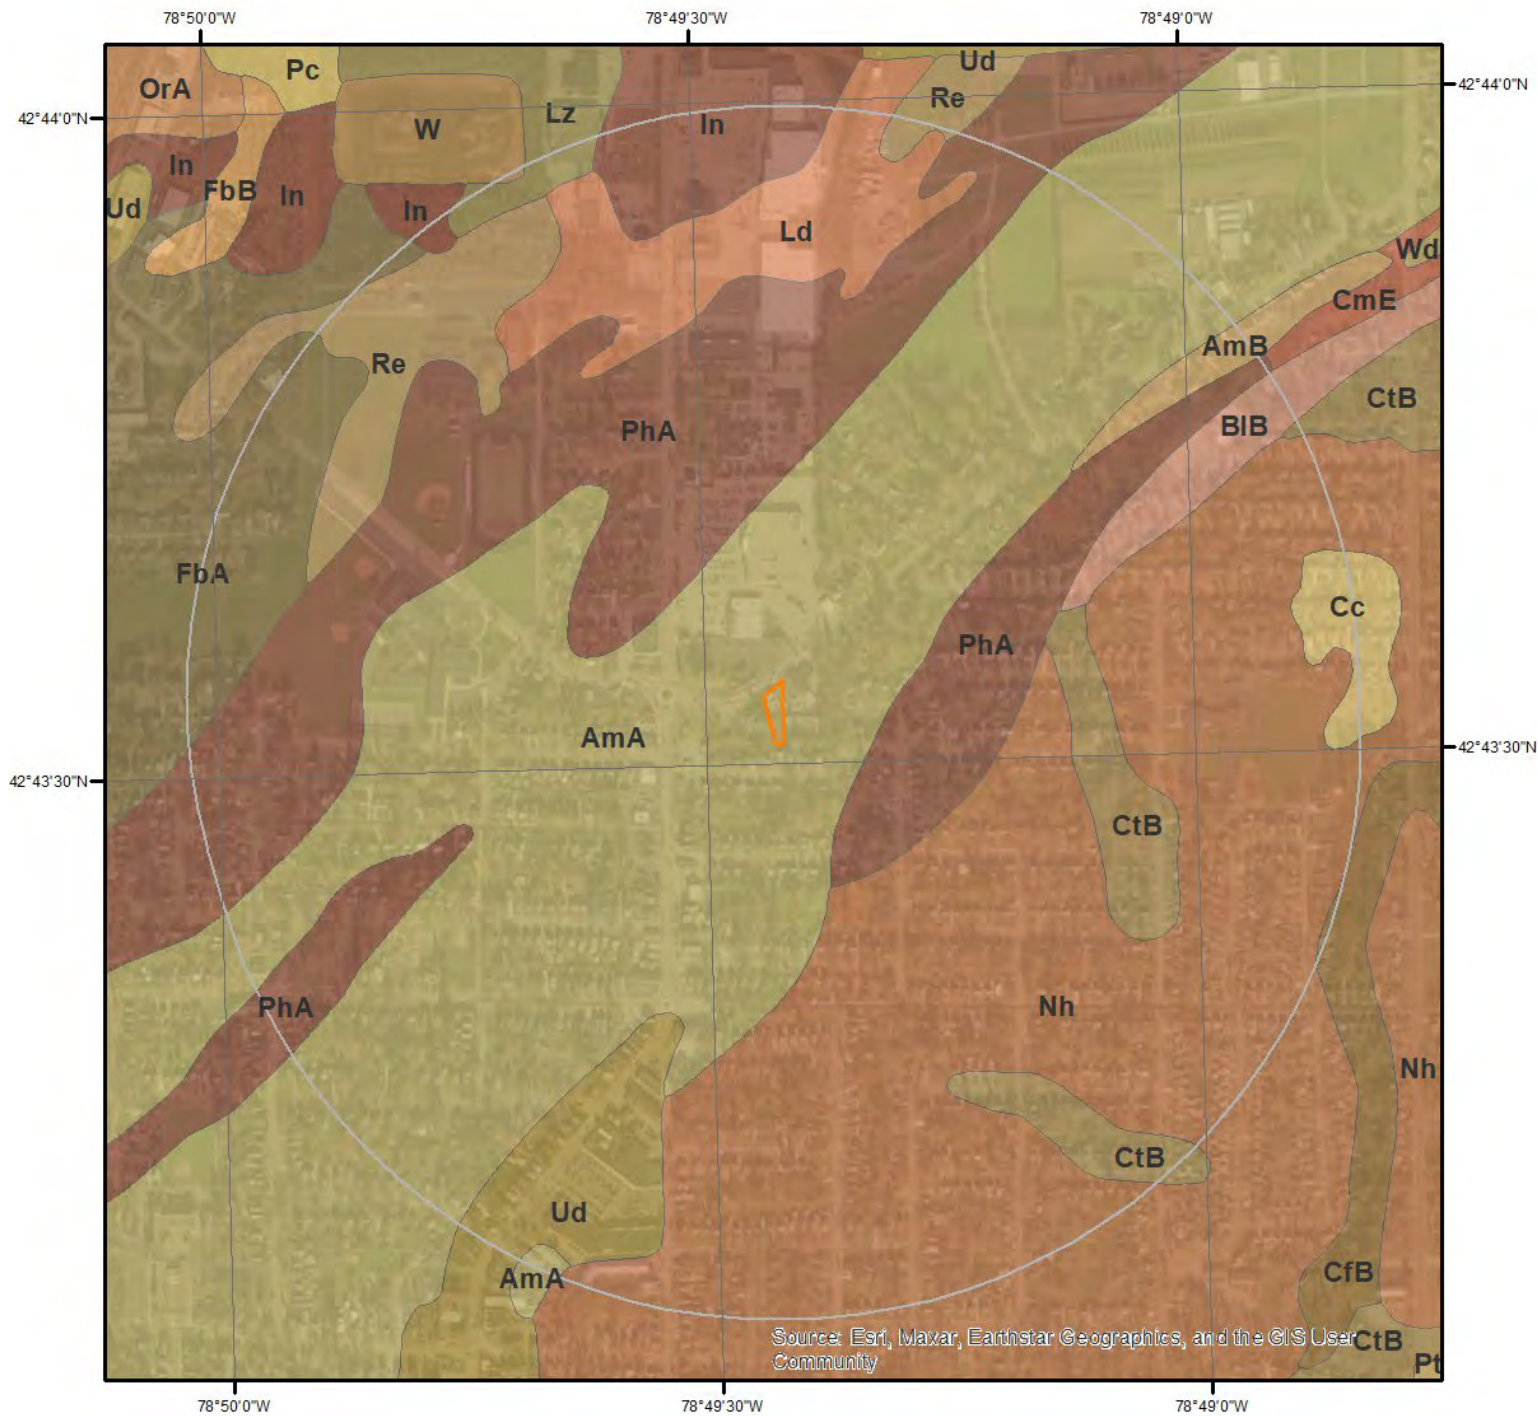

The previous page shows USGS geology information. Detailed information about each unit is provided below.

---

### Geologic Unit Dwf

Unit Name:	Angola and Rhinestreet Shales
Unit Age:	Upper Devonian
Primary Rock Type:	shale
Secondary Rock Type:	black shale
Unit Description:	Angola and Rhinestreet Shales.

Soil Information

SSURGO Soils

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

## Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

### Map Unit AmA (37.28%)

Map Unit Name:	Alton fine gravelly loam, 0 to 3 percent slopes
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Alton(75%)	
horizon H1(0cm to 23cm)	Fine gravelly loam
horizon B21(23cm to 46cm)	Fine gravelly loam
horizon B22(46cm to 76cm)	Very gravelly sandy loam
horizon 2C(76cm to 152cm)	Very gravelly loamy sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: AmA - Alton fine gravelly loam, 0 to 3 percent slopes

Component: Alton (75%)

The Alton component makes up 75 percent of the map unit. Slopes are 0 to 3 percent. This component is on proglacial deltas, outwash plains, terraces. The parent material consists of gravelly loamy glaciofluvial deposits over sandy and gravelly glaciofluvial deposits, derived mainly from acidic rocks, with some limestone below 40 inches. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 4 percent. Nonirrigated land capability classification is 2s. This soil does not meet hydric criteria.

Component: Blasdel (5%)

Generated brief soil descriptions are created for major soil components. The Blasdel soil is a minor component.

Component: Phelps (5%)

Generated brief soil descriptions are created for major soil components. The Phelps soil is a minor component.

Component: Colonie (5%)

Generated brief soil descriptions are created for major soil components. The Colonie soil is a minor component.

Component: Arkport (5%)

Generated brief soil descriptions are created for major soil components. The Arkport soil is a minor component.

Component: Palmyra (5%)

Generated brief soil descriptions are created for major soil components. The Palmyra soil is a minor component.

### Map Unit AmB (0.41%)

Map Unit Name:	Alton fine gravelly loam, 3 to 8 percent slopes
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

## Soil Information

Major components are printed below

Alton(75%)

horizon H1(0cm to 23cm)	Fine gravelly loam
horizon B21(23cm to 46cm)	Fine gravelly loam
horizon B22(46cm to 76cm)	Very gravelly sandy loam
horizon 2C(76cm to 152cm)	Very gravelly loamy sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: AmB - Alton fine gravelly loam, 3 to 8 percent slopes

Component: Alton (75%)

The Alton component makes up 75 percent of the map unit. Slopes are 3 to 8 percent. This component is on terraces, outwash plains, proglacial deltas. The parent material consists of gravelly loamy glaciofluvial deposits over sandy and gravelly glaciofluvial deposits, derived mainly from acidic rocks, with some limestone below 40 inches. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 4 percent. Nonirrigated land capability classification is 2s. This soil does not meet hydric criteria.

Component: Arkport (5%)

Generated brief soil descriptions are created for major soil components. The Arkport soil is a minor component.

Component: Palmyra (5%)

Generated brief soil descriptions are created for major soil components. The Palmyra soil is a minor component.

Component: Blasdel (5%)

Generated brief soil descriptions are created for major soil components. The Blasdel soil is a minor component.

Component: Phelps (5%)

Generated brief soil descriptions are created for major soil components. The Phelps soil is a minor component.

Component: Colonie (5%)

Generated brief soil descriptions are created for major soil components. The Colonie soil is a minor component.

### Map Unit BIB (0.96%)

Map Unit Name:	Blasdel channery silt loam, 3 to 8 percent slopes
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Blasdel(75%)

horizon H1(0cm to 20cm)	Channery silt loam
horizon H2(20cm to 91cm)	Very channery silt loam
horizon H3(91cm to 152cm)	Extremely channery loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: BIB - Blasdel channery silt loam, 3 to 8 percent slopes

Component: Blasdel (75%)

The Blasdel component makes up 75 percent of the map unit. Slopes are 3 to 8 percent. This component is on terraces, alluvial fans. The parent material consists of channery loamy glaciofluvial deposits derived mainly from local acid shale bedrock. Depth to a root

## Soil Information

restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 5 percent. Nonirrigated land capability classification is 2s. This soil does not meet hydric criteria.

Component: Marilla (5%)

Generated brief soil descriptions are created for major soil components. The Marilla soil is a minor component.

Component: Farnham (5%)

Generated brief soil descriptions are created for major soil components. The Farnham soil is a minor component.

Component: Manlius (5%)

Generated brief soil descriptions are created for major soil components. The Manlius soil is a minor component.

Component: Alton (5%)

Generated brief soil descriptions are created for major soil components. The Alton soil is a minor component.

Component: Chenango (5%)

Generated brief soil descriptions are created for major soil components. The Chenango soil is a minor component.

### Map Unit Cc (0.53%)

Map Unit Name:	Canandaigua silt loam
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	15cm
Drainage Class - Dominant:	Poorly drained
Hydrologic Group - Dominant:	C/D - These soils have moderately high runoff potential when drained and high runoff potential when undrained.

Major components are printed below

Canandaigua(75%)

horizon H1(0cm to 23cm)	Silt loam
horizon H2(23cm to 94cm)	Silt loam
horizon H3(94cm to 152cm)	Silt loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: Cc - Canandaigua silt loam

Component: Canandaigua (75%)

The Canandaigua component makes up 75 percent of the map unit. Slopes are 0 to 3 percent. This component is on depressions. The parent material consists of silty and clayey glaciolacustrine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is poorly drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is very high. Shrink-swell potential is low. This soil is not flooded. It is frequently ponded. A seasonal zone of water saturation is at 6 inches during January, February, March, April, May, November, December. Organic matter content in the surface horizon is about 10 percent. Nonirrigated land capability classification is 3w. This soil meets hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 1 percent.

Component: Lamson (5%)

Generated brief soil descriptions are created for major soil components. The Lamson soil is a minor component.

Component: Canadice (5%)

Generated brief soil descriptions are created for major soil components. The Canadice soil is a minor component.

Component: Lyons (5%)

Generated brief soil descriptions are created for major soil components. The Lyons soil is a minor component.

Component: Niagara (5%)

Generated brief soil descriptions are created for major soil components. The Niagara soil is a minor component.

## Soil Information

Component: Lakemont (5%)

Generated brief soil descriptions are created for major soil components. The Lakemont soil is a minor component.

### Map Unit CfB (1.7%)

Map Unit Name:	Cayuga silt loam, 3 to 8 percent slopes
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	69cm
Drainage Class - Dominant:	Moderately well drained
Hydrologic Group - Dominant:	D - Soils in this group have high runoff potential when thoroughly wet. Water movement through the soil is restricted or very restricted.

Major components are printed below

Cayuga(75%)

horizon H1(0cm to 25cm)	Silt loam
horizon H2(25cm to 66cm)	Silty clay
horizon H3(66cm to 152cm)	Gravelly loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: CfB - Cayuga silt loam, 3 to 8 percent slopes

Component: Cayuga (75%)

The Cayuga component makes up 75 percent of the map unit. Slopes are 3 to 8 percent. This component is on till plains, proglacial lake plains. The parent material consists of clayey glaciolacustrine deposits over loamy till derived from limestone, dolomite, sandstone, or shale. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is moderately low. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 27 inches during April, May. Organic matter content in the surface horizon is about 4 percent. Nonirrigated land capability classification is 2e. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 1 percent.

Component: Niagara (5%)

Generated brief soil descriptions are created for major soil components. The Niagara soil is a minor component.

Component: Churchville (5%)

Generated brief soil descriptions are created for major soil components. The Churchville soil is a minor component.

Component: Collamer (5%)

Generated brief soil descriptions are created for major soil components. The Collamer soil is a minor component.

Component: Schoharie (5%)

Generated brief soil descriptions are created for major soil components. The Schoharie soil is a minor component.

Component: Rhinebeck (5%)

Generated brief soil descriptions are created for major soil components. The Rhinebeck soil is a minor component.

### Map Unit CtB (2.9%)

Map Unit Name:	Collamer silt loam, till substratum, 3 to 8 percent slopes
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	54cm
Drainage Class - Dominant:	Moderately well drained
Hydrologic Group - Dominant:	C/D - These soils have moderately high runoff potential when drained and high runoff potential when undrained.

Major components are printed below

Collamer(75%)

horizon H1(0cm to 20cm)	Silt loam
-------------------------	-----------

## Soil Information

horizon H2(20cm to 38cm)	Silt loam
horizon H3(38cm to 122cm)	Silty clay loam
horizon H4(122cm to 152cm)	Gravelly silt loam

### Component Description:

Minor map unit components are excluded from this report.

Map Unit: CtB - Collamer silt loam, till substratum, 3 to 8 percent slopes

#### Component: Collamer (75%)

The Collamer, till substratum component makes up 75 percent of the map unit. Slopes are 3 to 8 percent. This component is on proglacial lake plains. The parent material consists of silty and clayey glaciolacustrine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is moderately low. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 21 inches during March, April, May. Organic matter content in the surface horizon is about 4 percent. Nonirrigated land capability classification is 2e. This soil does not meet hydric criteria.

#### Component: Niagara (5%)

Generated brief soil descriptions are created for major soil components. The Niagara soil is a minor component.

#### Component: Hudson (5%)

Generated brief soil descriptions are created for major soil components. The Hudson soil is a minor component.

#### Component: Canandaigua (5%)

Generated brief soil descriptions are created for major soil components. The Canandaigua soil is a minor component.

#### Component: Scio (5%)

Generated brief soil descriptions are created for major soil components. The Scio soil is a minor component.

#### Component: Rhinebeck (5%)

Generated brief soil descriptions are created for major soil components. The Rhinebeck soil is a minor component.

### Map Unit FbA (9.49%)

Map Unit Name:	Farnham channery silt loam, 0 to 3 percent slopes
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	54cm
Drainage Class - Dominant:	Moderately well drained
Hydrologic Group - Dominant:	A/D - These soils have low runoff potential when drained and high runoff potential when undrained.

Major components are printed below

#### Farnham(75%)

horizon H1(0cm to 18cm)	Channery silt loam
horizon H2(18cm to 97cm)	Very channery loam
horizon H3(97cm to 152cm)	Very channery loam

### Component Description:

Minor map unit components are excluded from this report.

Map Unit: FbA - Farnham channery silt loam, 0 to 3 percent slopes

#### Component: Farnham (75%)

The Farnham component makes up 75 percent of the map unit. Slopes are 0 to 3 percent. This component is on alluvial fans, terraces. The parent material consists of gravelly loamy glaciofluvial deposits dominated by shale fragments. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 21 inches during January, February, March, April, May. Organic matter content in the surface horizon is about 5 percent. Nonirrigated land capability classification is 2w. This soil does not meet hydric criteria.

## Soil Information

### Component: Blasdel (5%)

Generated brief soil descriptions are created for major soil components. The Blasdel soil is a minor component.

### Component: Chenango (5%)

Generated brief soil descriptions are created for major soil components. The Chenango soil is a minor component.

### Component: Red Hook (5%)

### Map Unit In (4.68%)

Map Unit Name:	Ilion silt loam
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	15cm
Drainage Class - Dominant:	Poorly drained
Hydrologic Group - Dominant:	C/D - These soils have moderately high runoff potential when drained and high runoff potential when undrained.

Major components are printed below

#### Ilion(80%)

horizon H1(0cm to 23cm)	Silt loam
horizon H2(23cm to 33cm)	Silty clay loam
horizon H3(33cm to 74cm)	Silty clay loam
horizon H4(74cm to 152cm)	Channery silty clay loam

### Component Description:

Minor map unit components are excluded from this report.

Map Unit: In - Ilion silt loam

### Component: Ilion (80%)

The Ilion component makes up 80 percent of the map unit. Slopes are 0 to 3 percent. This component is on depressions. The parent material consists of loamy till derived from calcareous dark shale. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is poorly drained. Water movement in the most restrictive layer is moderately low. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 6 inches during January, February, March, April, May, November, December. Organic matter content in the surface horizon is about 6 percent. Nonirrigated land capability classification is 4w. This soil meets hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 15 percent.

### Map Unit Ld (1.97%)

Map Unit Name:	Lamson mucky very fine sandy loam
----------------	-----------------------------------

## Soil Information

Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	7cm
Drainage Class - Dominant:	Very poorly drained
Hydrologic Group - Dominant:	A/D - These soils have low runoff potential when drained and high runoff potential when undrained.

Major components are printed below

### Lamson(75%)

horizon H1(0cm to 23cm)	Mucky very fine sandy loam
horizon H2(23cm to 102cm)	Fine sandy loam
horizon H3(102cm to 152cm)	Loamy very fine sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: Ld - Lamson mucky very fine sandy loam

### Component: Lamson (75%)

The Lamson component makes up 75 percent of the map unit. Slopes are 0 to 3 percent. This component is on depressions. The parent material consists of deltaic or glaciolacustrine deposits with a high content of fine and very fine sand. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is very poorly drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is low. This soil is not flooded. It is occasionally ponded. A seasonal zone of water saturation is at 3 inches during January, February, March, April, June, December. Organic matter content in the surface horizon is about 12 percent. Nonirrigated land capability classification is 5w. This soil meets hydric criteria.

### Component: Unnamed soils (5%)

### Map Unit Lz (3.87%)

Map Unit Name:	Lyons soils, 0 to 3 percent slopes, frequently ponded
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	0cm
Drainage Class - Dominant:	Very poorly drained
Hydrologic Group - Dominant:	C/D - These soils have moderately high runoff potential when drained and high runoff potential when undrained.

Major components are printed below

### Lyons(75%)

horizon Ap(0cm to 25cm)	Mucky silt loam
horizon Bg1(25cm to 48cm)	Silt loam
horizon Bg2(48cm to 64cm)	Silty clay loam
horizon BCg(64cm to 86cm)	Gravelly silt loam
horizon C(86cm to 200cm)	Gravelly loam

### Lyons(15%)

horizon Ap(0cm to 25cm)	Silt loam
-------------------------	-----------

## Soil Information

horizon Bg1(25cm to 48cm)	Silt loam
horizon Bg2(48cm to 64cm)	Silty clay loam
horizon BCg(64cm to 86cm)	Gravelly silt loam
horizon C(86cm to 200cm)	Gravelly loam

### Component Description:

Minor map unit components are excluded from this report.

Map Unit: LZ - Lyons soils, 0 to 3 percent slopes, frequently ponded

#### Component: Lyons (75%)

The Lyons, frequently ponded component makes up 75 percent of the map unit. Slopes are 0 to 3 percent. This component is on depressions, till plains. The parent material consists of calcareous loamy lodgment till derived from limestone and shale. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is very poorly drained. Water movement in the most restrictive layer is low. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is low. This soil is not flooded. It is frequently ponded. A seasonal zone of water saturation is at 0 inches during January, February, March, April, May, June, November, December. Organic matter content in the surface horizon is about 15 percent. Nonirrigated land capability classification is 5w. This soil meets hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 20 percent.

#### Component: Lyons (15%)

The Lyons component makes up 15 percent of the map unit. Slopes are 0 to 3 percent. This component is on depressions, till plains. The parent material consists of calcareous loamy lodgment till derived from limestone and shale. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is poorly drained. Water movement in the most restrictive layer is low. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 0 inches during January, February, March, April, May, June, November, December. Organic matter content in the surface horizon is about 10 percent. Nonirrigated land capability classification is 5w. This soil meets hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 20 percent.

### Map Unit Nh (18.83%)

Map Unit Name:	Niagara silt loam, till substratum
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	31cm
Drainage Class - Dominant:	Somewhat poorly drained
Hydrologic Group - Dominant:	C/D - These soils have moderately high runoff potential when drained and high runoff potential when undrained.

Major components are printed below

#### Niagara(75%)

horizon H1(0cm to 31cm)	Silt loam
horizon H2(31cm to 66cm)	Silt loam
horizon H3(66cm to 102cm)	Silt loam
horizon H4(102cm to 152cm)	Channery silty clay loam

### Component Description:

Minor map unit components are excluded from this report.

## Soil Information

Map Unit: Nh - Niagara silt loam, till substratum

Component: Niagara (75%)

The Niagara, till substratum component makes up 75 percent of the map unit. Slopes are 0 to 3 percent. This component is on proglacial lake plains. The parent material consists of silty and clayey glaciolacustrine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat poorly drained. Water movement in the most restrictive layer is moderately low. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 12 inches during January, February, March, April, May, December. Organic matter content in the surface horizon is about 4 percent. Nonirrigated land capability classification is 3w. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 1 percent.

### Map Unit PhA (11.3%)

Map Unit Name:	Phelps gravelly loam, 0 to 3 percent slopes
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	54cm
Drainage Class - Dominant:	Moderately well drained
Hydrologic Group - Dominant:	B/D - These soils have moderately low runoff potential when drained and high runoff potential when undrained.

Major components are printed below

Phelps(80%)

horizon H1(0cm to 25cm)	Gravelly loam
horizon H2(25cm to 38cm)	Gravelly loam
horizon H3(38cm to 71cm)	Gravelly loam
horizon H4(71cm to 81cm)	Gravelly sandy loam
horizon H5(81cm to 152cm)	Stratified very gravelly loamy sand to sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: PhA - Phelps gravelly loam, 0 to 3 percent slopes

Component: Phelps (80%)

The Phelps component makes up 80 percent of the map unit. Slopes are 0 to 3 percent. This component is on valley trains, terraces. The parent material consists of loamy glaciofluvial deposits over sandy and gravelly glaciofluvial deposits, containing significant amounts of limestone. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 21 inches during March, April, May. Organic matter content in the surface horizon is about 5 percent. Nonirrigated land capability classification is 2w. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 15 percent.

## Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *ERIE* County: **1**

*Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L*

*Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L*

*Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L*

---

### Federal Area Radon Information for *ERIE* County

No Measures/Homes:	4671
Geometric Mean:	14.2
Arithmetic Mean:	4.4
Median:	1.1
Standard Deviation:	1.3
Maximum:	371.9
% >4 pCi/L:	18
% >20 pCi/L:	4
Notes on Data Table:	Table 1. Screening indoor radon data compiled by the New York State Department of Health. Data represent 1-7 day charcoal canister measurements from the lowest level of each home tested.

## **Federal Sources**

### **FEMA National Flood Hazard Layer**

**FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

### **Indoor Radon Data**

**INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

### **Public Water Systems Violations and Enforcement Data**

**PWSV**

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SDWIS may correspond either with the physical location of the water system, or with a contact address.

### **Radon Zone Level**

**RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

### **Safe Drinking Water Information System (SDWIS)**

**SDWIS**

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

### **Soil Survey Geographic database**

**SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

### **U.S. Fish & Wildlife Service Wetland Data**

**US WETLAND**

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

### **USGS Current Topo**

**US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

### **USGS Geology**

**US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

### **USGS National Water Information System**

**FED USGS**

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

## **State Sources**

### **Oil and Gas Wells**

**OGW**

The Division of Mineral Resources maintains a data management system on wells regulated under the Oil,

## Appendix

Gas and Solution Mining Law (OGSML). To assist the Division in the regulation of wells subject to the OGSML, a database of the wells was created in the early 1980's and significantly upgraded in 1998 by the adoption of the Risk Based Data Management System. This system provides information on well ownership, well owners and operators, registered driller, pluggers and companies that provide financial security instruments.

### Regulatory Freshwater Wetlands

### WETLAND

The Regulatory Freshwater Wetlands data are a set of ARC/INFO coverages composed of polygonal and linear features. Coverages are based on official New York State Freshwater Wetlands Maps as described in Article 24-0301 of the Environmental Conservation Law. Coverages are not, however, a legal substitute for the official maps. Coverages are available on a county basis for all areas of New York State outside the Adirondack Park. This dataset is provided by New York State Department of Environmental Conservation.

### Underground Injection Control Wells

### UIC

A well permit is required from the Division of Mineral Resources for any brine disposal well deeper than 500 feet. This includes any operation to drill, deepen, plug back or convert a well. Regardless of well depth, the NYSDEC Division of Water must be contacted for a determination of whether a SPDES permit is necessary to operate any brine disposal well.

### Water Wells Database

### WATER WELLS

The New York State Department of Environmental Conservation (DEC) Bureau of Water Resource Management works to protect, manage, and conserve New York State's groundwater and surface water supply sources, develop management strategies to enhance and protect these waters, and protect both the groundwater and surface water quality in the New York City Watershed and other major watersheds. This dataset does not include information on wells located in Nassau, Suffolk, Kings, and Queens counties.

## Liability Notice

**Reliance on information in Report:** The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

RE: CITY DIRECTORY RESEARCH  
4245 Clark Street  
Hamburg, NY 14075

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

**Search Criteria:**

BEG-4285 of Clark Street

**Search Notes:**

Ranges change between 1985 and 1980 with the target site looking to previously be at 53 Clark St and whole range being approximately 1-100

## FREEDOM OF INFORMATION LAW REQUEST

Under the provisions of the New York Freedom of Information Law, Article 6 of the Public Officers Law, I hereby request records of portions thereof pertaining to:

PLEASE PROVIDE THE FOLLOWING INFORMATION FOR 4245 CLARK STREET,  
SBL # 183.18-2-6 : CURRENT & ARCHIVED PERMITS, PLANS, DRAWINGS, APPROVALS,  
OR ANY OTHER INFORMATION ASSOCIATED WITH ENVIRONMENTAL CONCERNS  
AT THE PROPERTY FROM THE ENGINEERING DEPARTMENT & PLANNING DEPARTMENT.

THANK YOU!

(Attempt to identify the records in which you are interested in as clearly as possible):

If there are any fees for copying the records requested please inform me before filling the request (or.....Please supply the records without informing me if fees are not in excess of \$ 20<sup>00</sup> ).

The Freedom of Information Law requires that an agency respond to a request within five (5) business days of receipt of a request. Therefore, I would appreciate a response as soon as possible and look forward to hearing from you shortly.

If for any reason any portion of my request is denied, please inform me of the reason for the denial in writing and provide the name and address of the person or body to whom an appeal should be directed.

NAME JASON KRYSZAK (ENVIRONMENTAL ADVANTAGE, INC.)

ADDRESS 3636 N BUFFALO RD. ORCHARD PARK NY 14127

# Environmental Advantage

Environmental Advantage, Inc. 3636 N. Buffalo Road Orchard Park, New York 14127  
Industrial Compliance, Hazardous Materials Management, Site Assessment/Remediation

August 10, 2022

Erie County Health Department  
FOIL Access Officer  
503 Kensington Avenue  
Buffalo, New York 14214

Re: FOIL Request  
4245 Clark Street  
Hamburg, New York

Dear FOIL Access Officer:

Under the Freedom of Information Law (FOIL), Environmental Advantage, Inc. is inquiring as to the existence of any files or records concerning any environmental violations or legal actions, permits, septic system documents, spills, hazardous or solid waste disposal/storage, underground and/or above ground storage tanks, etc. relating to the above-referenced subject site.

A location plan identifying the site is enclosed. If such files or records exist, please forward any information you may have or notify our office so that we may make arrangements to review these files.

The requested information will be used in the preparation of an environmental site assessment of the property. If any cost will be incurred concerning this request, please notify us.

Should you have any questions regarding this matter, please contact the undersigned at (716) 667-3130 or [mbehlmaier@envadvantage.com](mailto:mbehlmaier@envadvantage.com). Your prompt attention to this matter would be greatly appreciated.

Very truly yours,  
ENVIRONMENTAL ADVANTAGE, INC.

## **APPENDIX G**

### **OBJECTIVES AND LIMITATIONS**

## **OBJECTIVES AND LIMITATIONS**

Environmental Advantage, Inc. (EA) has endeavored to meet what it believes is the applicable standard of care for the services completed and, in doing so, is obliged to advise our Client of the Phase I Environmental Site Assessment (ESA) limitations. EA believes that providing information about limitations is essential to help our Client identify and thereby manage risks. These risks can be mitigated, and possibly eliminated, through additional research. EA will, upon request, advise our Client of the additional research opportunities available and their associated costs.

This ESA did not require any inquiry with respect to Radon, Methane, Asbestos, Lead-based paint, Lead in drinking water, Formaldehyde, endangered species, wetlands, test borings/monitoring wells, analytical testing or other services or potential conditions or features not specifically identified and discussed herein. In those instances where additional services or service enhancements are included in the report as requested or authorized by the Client, specific limitations attendant to those services are presented in the text of the report.

The findings and opinions conveyed via this ESA report are based upon information obtained at a particular date from a variety of sources enumerated herein, and which EA believes are reliable. EA cannot, and does not warrant, the authenticity or reliability of the information sources it has relied upon.

The final report represents EA's service to our Client as of the report date. In that regard, the report constitutes EA's final document, and the text of the report may not be altered in any manner after final issuance of same. Opinions relative to environmental conditions presented in this report are based upon information derived from the most recent site reconnaissance date and from other activities described herein. The Client are herewith advised that the conditions observed by EA are subject to change. Certain indicators of the presence of hazardous materials may have been latent or not present at the time of the most recent site reconnaissance and may have subsequently become observable. In similar manner, the research effort conducted for a Phase I ESA is limited. Accordingly, it is possible that EA's research, while fully appropriate for a Phase I ESA and in compliance with the scope of service, may not include other important information sources. Assuming such sources exist, their information could not have been considered in the formulation of our findings and conclusions.

The final report is not a comprehensive site characterization or regulatory compliance audit and should not be construed as such. The opinions presented in this report are based upon findings derived from a site reconnaissance, a review of specified records and sources and comments made by interviewees. Specifically, EA does not, and cannot, represent that the site contains no hazardous or toxic materials, products, or other latent conditions beyond that observed by EA during its site assessment. Further, the services herein shall in no way be construed, designed or intended to be relied upon as legal interpretation or advice.

**APPENDIX H**

**PROFESSIONAL QUALIFICATIONS**

Mr. Hanna has 40 years of experience in environmental pollution control and health/safety services. As principal for Environmental Advantage, Inc., Mr. Hanna is responsible for all technical services. He specializes in hazardous materials/wastes management, site assessment and remediation, industrial compliance auditing, chemical exposure assessment and Process Safety Management and Risk Management Planning programs.

Mr. Hanna's career has included over 40 federal/state Superfund projects and over 1,500 due diligence projects. His industrial experience focuses on air, water, waste and chemical management compliance aspects at metal working, wood working, foundry, electroplating, printing and food production facilities.

## ***Education***

B.A., 1975, Biology, S.U.C. at Oswego, N.Y.

M.S., 1977, Natural Sciences (Toxicology Concentration), S.U.N.Y. at Buffalo, N.Y.

MEPC, 1982, Pollution Control, Pennsylvania State University

M.S., 1983 Forest Hydrology (Hydrogeology Minor), Pennsylvania State University

## ***Professional Registrations***

1985-Present, Certified Hazardous Materials Manager, Senior Level

1989-1998, Registered Environmental Professional

1997-1985, Certified Hazardous Materials Manager, Master Level

## ***Key Skills***

- Industrial Emission Permits and Controls
- Hazardous/Solid Waste Management
- Industrial Wastewater Pretreatment and Discharge Permits
- Waste Reduction and Pollution Prevention Programs
- Petroleum and Chemical Bulk Storage
- Industrial Stormwater Management
- Environmental Site Assessments
- Environmental Compliance Assessment
- Industrial Risk Management Program and Audit
- Remedial Investigations
- Brownfield Cleanup Program
- Budgeting & Cost Controls

## ***Affiliations and Certifications***

Air & Waste Management Association, Member  
Academy of Hazardous Materials Management, Member  
Erie County Local Emergency Planning Committee, Member  
New York Water Environment Association, Member  
International Institute of Ammonia Refrigeration, Member  
Refrigerating Engineers & Technicians Association, Member WNY Chapter  
OSHA 40 Hour 29 CFR 1910. (HAZWOPER) Certification

Ms. Behlmaier has over four years of experience in conducting a variety of environmental investigations and remediation are various types of properties. As an Environmental Scientist, Ms. Behlmaier has performed numerous Transaction Screens and Phase I Environmental Site Assessments (ESA) to include historical review, site reconnaissance, and report preparation. Ms. Behlmaier has also assisted with Phase II Environmental Site Assessments including soil borings and sampling, test pits, groundwater monitoring well installation and sampling, and analytical data and report preparation. Ms. Behlmaier has worked with the Region 9 New York State Department of Conservation Permits Department, conducting environmental and regulatory reviews to meet state permitting standards.

In addition to her duties in the site assessment field, Ms. Behlmaier plays a key role in report preparation under a multitude of environmental compliance requirements.

### ***Education***

B.S., Environmental Studies, 2017, State University of New York at Buffalo – Concentrations in Environmental Policy and Education and Environmental Resources and Management

Minor, Geography, 2017, State University of New York at Buffalo – Concentration in Earth Systems Science

### ***Key Skills***

- Environmental Site Assessments
- NYSDEC Brownfield Cleanup Program
- NYSDEC MSGP Compliance
- Soil/water sampling
- Sampling and assessment of Radon
- Sampling and assessment of Legionella
- Sampling and assessment of Vapor Intrusion

### ***Affiliations and Certifications***

OSHA 40 Hour 29 CFR 1910. (HAZWOPER) Certification
