Dear Ms. Sosa and Mr. Welling:

Re: **Quarterly Operations Report - First Quarter 2010**  
Hyde Park Remedial Program  
Bedrock and Overburden Monitoring Programs

In accordance with the July 2006 "Performance Monitoring Plan," the following is the quarterly data report for the Hyde Park Remedial Program for the period January 1, 2010 through March 31, 2010. A total of 4.2 million gallons of aqueous phase liquid (APL) was collected, treated, and discharged in compliance with our City of Niagara Falls Publicly Owned Treatment Works (POTW) permit; no non-aqueous phase liquid (NAPL) was shipped for incineration. The potentiometric contours are consistent with previous interpretations. Flow zones 6, 7, and 9 have large dewatered areas between the landfill and the gorge face. The current data continue to support the interpretation of effective hydraulic containment.

The performance monitoring data are presented as follows:

1. Figures 1-9: Showing groundwater contours for the flow zones and overburden
2. Figure 10: Showing continuously recorded water levels at flow zone piezometer PMW-1M-09
3. Table 1: Water Level Elevation Summary
4. Tables 2, 3, and 4: Daily, Weekly, and Quarterly Treatment System Effluent Monitoring Data
5. Attachment 1: Purge well performance graphs indicating daily level and flow information

Review of the water level data presented on Figure 10 (PMW-1M-09) indicates a data gap between January 1, 2010 and February 23, 2010. This data gap is due to the loss of the levellogger recorder that had been installed in the well. The levellogger was replaced on February 23, 2010. Based on a review of historic data for this location, it is not believed that the water level rose above the action level of 526 feet MSL.

APW-2 remained un-repaired during the first quarter of 2010 due to accessibility issues (i.e., snow cover, soft ground, etc.) However, in April, the area surrounding APW-2 did dry out sufficiently to allow the repair activities to take place. APW-2 was repaired on April 05, 2010.

April 22, 2010
