APPENDIX A

EPA 2070-13 SITE INSPECTION FORM

POTENTIAL HAZARDOUS WASTE SITE SITE INSPECTION REPORT

PART 1 - SITE LOCATION AND INSPECTION INFORMATION

I. IDENTIFICATION

01 State	02 Site Number
NY	932101

II. SITE NAME AND LOCATION

01 Site Name (legal, common, or descriptive name of site)	02 Street, Route No., or specific location identifier
Walmore Road - Johnson Property	6373 Walmore Road

03 City	04 State	05 Zip Code	06 County	07 County Code	08 Cong. Dist.
Town of Wheatfield	NY	14304	Niagara	063	

09 Coordinates Latitude	Longitude	10 Type of Ownership (check one)
43° 06' 58" N	78° 55' 25" W	[X] A. Private [ ] B. Federal _____ [ ] C. State [ ] D. County [ ] E. Municipal [ ] F. Other _____ [ ] G. Unknown

III. INSPECTION INFORMATION

01 Date of Inspection	02 Site Status	03 Years of Operation
6 / 23 / 93 (Month Day Year)	[ ] Active [X] Inactive	_____ | _____ (Beginning Year Ending Year) [X] Unknown (prior to 1980)

04 Agency Performing Inspection (check all that apply)
[ ] A. EPA [ ] B. EPA Contractor _____ (name of firm) [ ] C. Municipal [ ] D. Municipal Contractor _____ (name of firm)
[ ] E. State [X] F. State Contractor Ecology and Environment Engineering, P.C. (name of firm) [ ] G. Other _____ (specify)

05 Chief Inspector	06 Title	07 Organization	08 Telephone No.
Chad Eich	Biologist	E & E	(716) 684-8060
09 Other Inspectors	10 Title	11 Organization	12 Telephone No.
Michelle Christman	Environmental Scientist	E & E	(716) 684-6060
Abul Barkat	Engineer	NYSDEC	(716) 847-4585
			( )

POTENTIAL HAZARDOUS WASTE SITE SITE INSPECTION REPORT

PART 2 - WASTE INFORMATION

I. IDENTIFICATION

01 State	02 Site Number
NY	932101

II. WASTE STATES, QUANTITIES, AND CHARACTERISTICS

01 Physical States (check all that apply)

[X] A. Solid
[X] B. Powder, Fines
[ ] C. Sludge
[ ] D. Other _____
[ ] E. Slurry
[ ] F. Liquid
[ ] G. Gas

02 Waste Quantity at Site (measure of waste quantities must be independent)

Tons _____
Cubic Yards approx. 7,500
No. of Drums _____

03 Waste Characteristics (check all that apply)

[X] A. Toxic
[ ] B. Corrosive
[ ] C. Radioactive
[ ] D. Persistent
[ ] E. Soluble
[ ] F. Infectious
[ ] G. Flammable
[ ] H. Ignitable
[ ] I. Highly volatile
[ ] J. Explosive
[ ] K. Reactive
[ ] L. Incompatible
[ ] M. Not applicable

III. WASTE TYPE

Category	Substance Name	01 Gross Amount	02 Unit of Measure	03 Comments
SLU	Sludge			This property reportedly has been backfilled with graphite,
OLW	Oily waste			plastic battery cases, hardened resins, heat-treating salts,
SOL	Solvents			flyash, plastic tank sludge, and scrap wood to a depth of 5
PSD	Pesticides			feet. Fill actually encountered includes soil, graphite and
OOC	Other organic chemicals			flyash to maximum depth of 8 feet.
IOC	Inorganic chemicals			
ACD	Acids			
BAS	Bases			
MES	Heavy metals			

IV. HAZARDOUS SUBSTANCES (see Appendix for most frequently cited CAS Numbers)

01 Category	02 Substance Name	03 CAS Number	04 Storage/Disposal Method	05 Concentration	06 Measure of Concentration
OOC	PAHs			Various (max. 190)	ppm in samples
PSD	Numerous			Various (max. 1,200)	ppb in samples
MES	Numerous			Various	ppm in samples

V. FEEDSTOCKS (see Appendix for CAS Numbers)

Category	01 Feedstock Name	02 CAS Number	Category	01 Feedstock Name	02 CAS Number
FDS			FDS		
FDS			FDS		
FDS			FDS		
FDS			FDS		

VI. SOURCES OF INFORMATION (cite specific references, e.g., state files, sample analysis, reports)

Niagara County Department of Health files, Niagara Falls, New York; NYSDEC, Division of Solid and Hazardous Wastes, Inactive Hazardous Waste Disposal Report.

POTENTIAL HAZARDOUS WASTE SITE SITE INSPECTION REPORT

PART 3 - DESCRIPTION OF HAZARDOUS CONDITIONS AND INCIDENTS

I. IDENTIFICATION

01 State	02 Site Number
NY	932101

II. HAZARDOUS CONDITIONS AND INCIDENTS

01 [X] A. Groundwater Contamination
03 Population Potentially Affected Unknown
02 [ ] Observed (date _____)
04 Narrative Description:
[X] Potential [ ] Alleged

Potential exists because contaminants were detected in fill and leachate may enter groundwater system. However, well on site was sampled in 1985 by NCDOH and no contaminants were detected, therefore potential only. Groundwater is used for drinking water within 3 miles of the site.

01 [ ] B. Surface Water Contamination
03 Population Potentially Affected _____
02 [ ] Observed (date _____)
04 Narrative Description:
[ ] Potential [ ] Alleged

No site-related contaminants detected at elevated levels downstream.

01 [ ] C. Contamination of Air
03 Population Potentially Affected Unknown
02 [ ] Observed (date _____)
04 Narrative Description:
[ ] Potential [ ] Alleged

No organic vapors detected at surface; very low VOC concentrations in fill; soil/sod cover appears adequate to eliminate dust.

01 [ ] D. Fire/Explosive Conditions
03 Population Potentially Affected Unknown
02 [ ] Observed (date _____)
04 Narrative Description:
[ ] Potential [ ] Alleged

Fill samples not ignitable (no flash at 140°F).

01 [ ] E. Direct Contact
03 Population Potentially Affected Unknown
02 [ ] Observed (date _____)
04 Narrative Description:
[X] Potential [ ] Alleged

Potential indirect contact if excavation (for plumbing, plantings, etc.)

01 [X] F. Contamination of Soil
03 Area Potentially Affected ~1 acres
02 [ ] Observed (date _____)
04 Narrative Description:
[X] Potential [ ] Alleged

Potential exists; fill material is in direct contact with soil. However, off-fill surface soil contains similar compounds as fill which are likely the result of background contamination.

01 [X] G. Drinking Water Contamination
03 Population Potentially Affected Unknown
02 [ ] Observed (date _____)
04 Narrative Description:
[X] Potential [ ] Alleged

No groundwater samples were collected; however; groundwater is used for drinking water within 3 miles of the site.

Potential exists as groundwater is used as a source of drinking water on the Tuscarora Indian Reservation. However, groundwater flow in this area is generally south-southwest towards the PASNY conduits and away from the Tuscarora Reservation.

01 [ ] H. Worker Exposure/Injury
03 Workers Potentially Affected _____
02 [ ] Observed (date _____)
04 Narrative Description:
[ ] Potential [ ] Alleged

None reported; fill material is covered with soil and vegetation.

01 [ ] I. Population Exposure/Injury
03 Population Potentially Affected _____
02 [ ] Observed (date _____)
04 Narrative Description:
[ ] Potential [ ] Alleged

None reported; fill material is covered with soil and vegetation.

POTENTIAL HAZARDOUS WASTE SITE SITE INSPECTION REPORT

PART 3 - DESCRIPTION OF HAZARDOUS CONDITIONS AND INCIDENTS

I. IDENTIFICATION

01 State	02 Site Number
NY	932101

II. HAZARDOUS CONDITIONS AND INCIDENTS (Cont.)

01 [ ] J. Damage to Flora — 02 [ ] Observed (date _____) — [ ] Potential — [ ] Alleged
04 Narrative Description:

None reported or observed; waste is covered with soil and vegetation.

01 [ ] K. Damage to Fauna — 02 [ ] Observed (date _____) — [ ] Potential — [ ] Alleged
04 Narrative Description:

None reported; waste is covered with soil and vegetation.

01 [X] L. Contamination of Food Chain — 02 [ ] Observed (date _____) — [X] Potential — [ ] Alleged
04 Narrative Description:

Potential exists if bank erosion exposes fill to Cayuga Creek. However, currently no site-related surface water or sediment contamination observed.

01 [ ] M. Unstable Containment of Wastes (spills/ runoff/standing liquids, leaking drums) — 02 [ ] Observed (date _____) — [ ] Potential — [ ] Alleged
03 Population Potentially Affected: ____
04 Narrative Description:

Waste is covered with approximately 0.5 feet of soil and vegetation, and no leachate observed.

01 [ ] N. Damage to Off-site Property — 02 [ ] Observed (date _____) — [ ] Potential — [ ] Alleged
04 Narrative Description:

None reported.

01 [ ] O. Contamination of Sewers, Storm Drains, WWTPs — 02 [ ] Observed (date _____) — [ ] Potential — [ ] Alleged
04 Narrative Description:

None reported. No storm sewers are located near site.

01 [X] P. Illegal/Unauthorized Dumping — 02 [ ] Observed (date _____) — [ ] Potential — [ ] Alleged
04 Narrative Description:

Unable to document source of fill. Site currently inactive.

05 Description of Any Other Known, Potential, or Alleged Hazards

None identified.

III. TOTAL POPULATION POTENTIALLY AFFECTED 413 within 1 mile, total number within 3 miles is unknown.

IV. COMMENTS

V. SOURCES OF INFORMATION (cite specific references, e.g., state files, sample analysis, reports)

NYSDEC Phase I investigation June 1989; Ecology and Environment Engineering, P.C. Site Inspection, May 2, 1991; Niagara County Health Department files, Niagara Falls, New York; Niagara County Department of Planning, Lockport, New York; Town of Wheatfield (NY) Water Division

POTENTIAL HAZARDOUS WASTE SITE SITE INSPECTION REPORT

PART 4 - PERMIT AND DESCRIPTIVE INFORMATION

I. IDENTIFICATION

01 State	02 Site Number
NY	932101

II. PERMIT INFORMATION

01 Type of Permit Issued (check all that apply)	02 Permit Number	03 Date Issued	04 Expiration Date	05 Comments
[ ] A. NPDES				
[ ] B. UIC				
[ ] C. AIR				
[ ] D. RCRA				
[ ] E. RCRA Interim Status				
[ ] F. SPCC Plan				
[ ] G. State (specify)				
[ ] H. Local (specify)				
[ ] I. Other (specify)				
[ ] J. None				

III. SITE DESCRIPTION

01 Storage Disposal (check all that apply)	02 Amount	03 Unit of Measure
[ ] A. Surface Impoundment		
[ ] B. Piles		
[ ] C. Drum, Aboveground		
[ ] D. Tank, Aboveground		
[ ] E. Tank, Belowground		
[X] F. Landfill	7500	yd^3
[ ] G. Landfarm		
[ ] H. Open Dump		
[ ] I. Other _____ (specify)		

04 Treatment (check all that apply)

- [ ] A. Incineration
- [ ] B. Underground Injection
- [ ] C. Chemical/Physical
- [ ] D. Biological
- [ ] E. Waste Oil Processing
- [ ] F. Solvent Recovery
- [ ] G. Other Recycling Recovery
- [ ] H. Other _____ (specify)

05 Other

[X] Buildings On Site

06 Area of Site

0.8 Acres of fill on 2 acre parcel of land.

07 Comments

Contaminants detected in fill samples, but did not meet the definition of a hazardous waste.

IV. CONTAINMENT

01 Containment of Wastes (check one)

[ ] A. Adequate, Secure [X] B. Moderate [ ] C. Inadequate, Poor [ ] D. Insecure, Unsound, Dangerous

02 Description of Drums, Diking, Liners, Barriers, etc.

Waste was used as fill material, placed on land surface, and covered.

V. ACCESSIBILITY

01 Waste Easily Accessible [X] Yes [ ] No

02 Comments

Waste covered by approximately 0.5 feet of soil and vegetation.

VI. SOURCES OF INFORMATION (cite specific references, e.g., state files, sample analysis, reports)

Niagara County Department of Health files, Niagara Falls, New York; Ecology and Environment Engineering, P.C. Site Inspection, May 2, 1991; NYSDEC Engineering Investigation Phase I, June 1989.

POTENTIAL HAZARDOUS WASTE SITE SITE INSPECTION REPORT

PART 5 - WATER, DEMOGRAPHIC, AND ENVIRONMENTAL DATA

I. IDENTIFICATION

01 State	02 Site Number
NY	932101

II. DRINKING WATER SUPPLY

01 Type of Drinking Supply (check as applicable)

	Surface	Well
Community	A. [X]	B. [ ]
Non-community	C. [X]	D. [X]

02 Status

Endangered	Affected	Monitored
A. [ ]	B. [ ]	C. [X]
D. [ ]	E. [ ]	F. [X]

03 Distance to Site

A 5.5 (mi)

B 5.5/~3.0 (mi)

III. GROUNDWATER

01 Groundwater Use in Vicinity (check one)

[ ] A. Only Source for Drinking [X] B. Drinking (other sources available) Commercial, Industrial, Irrigation (no other water sources available) [ ] C. Commercial, Industrial, Irrigation (limited other sources available) [ ] D. Not Used, Unusable

02 Population Served by Groundwater Unknown

03 Distance to Nearest Drinking Water Well ~3 (mi)

04 Depth to Groundwater	05 Direction of Groundwater Flow	06 Depth to Aquifer of Concern	07 Potential Yield of Aquifer	08 Sole Source Aquifer
5 (ft)	Southwest	15 (ft)	Unknown (gpd)	[ ] Yes [X] No [ ] Unknown

09 Description of Wells (including usage, depth, and location relative to population and buildings)

One well reportedly on site but no longer used. Wells within 3 miles of site are used for irrigation purposes only. Approximately 3 miles north of site drinking water wells exist a Tuscarora Reservation.

10 Recharge Area

[X] Yes | Comments: Unconsolidated deposits. Aquifer is recharged with precipitation

[ ] No |

11 Discharge Area

[X] Yes | Comments: Discharge likely occurs to Cayuga Creek

[ ] No |

IV. SURFACE WATER

01 Surface Water (check one)

[ ] A. Reservoir, Recreation, Drinking Water Source [ ] B. Irrigation, Economically Important Resources [ ] C. Commercial, Industrial [X] D. Not Currently Used

02 Affected/Potentially Affected Bodies of Water

Name:	Affected	Distance to Site
Cayuga Creek	[ ]	0 (mi)
Niagara River	[ ]	3.5 (mi)
	[ ]	(mi)

V. DEMOGRAPHIC AND PROPERTY INFORMATION

01 Total Population Within	One (1) Mile of Site	Two (2) Miles of Site	Three (3) Miles of Site	02 Distance to Nearest Population
	A. 413 No. of Persons	B. 5,072 No. of Persons	C. 21,584 No. of Persons	0 (mi)

03 Number of Buildings Within Two (2) Miles of Site

1,181

04 Distance to Nearest Off-Site Building

< 0.1 (mi)

05 Population Within Vicinity of Site (provide narrative description of nature of population within vicinity of site, e.g., rural, village, densely populated urban area)

Site located in semi-rural area. Niagara Falls Air Force Base adjacent to site. City of Niagara Falls approximately 1.5 miles to the southwest of site.

POTENTIAL HAZARDOUS WASTE SITE SITE INSPECTION REPORT

PART 5 - WATER, DEMOGRAPHIC, AND ENVIRONMENTAL DATA

I. IDENTIFICATION

01 State: NY

02 Site Number: 932101

VI. ENVIRONMENTAL INFORMATION

01 Permeability of Unsaturated Zone (check one)

[ ] A. Impermeable (less than 10^{-6} cm/sec) [X] B. Relatively Impermeable (10^{-4} - 10^{-6} cm/sec) [ ] C. Relatively Permeable (10^{-2} - 10^{-4} cm/sec) [ ] D. Very Permeable (greater than 10^{-2} cm/sec)

02 Permeability of Bedrock (check one)

[ ] A. Impermeable (less than 10^{-6} cm/sec) [ ] B. Relatively Impermeable (10^{-4} - 10^{-6} cm/sec) [X] C. Relatively Permeable (10^{-2} - 10^{-4} cm/sec) [ ] D. Very Permeable (greater than 10^{-2} cm/sec)

03 Depth to Bedrock	04 Depth of Contaminated Soil Zone	05 Soil pH
15-20 (ft)	1 (ft)	6.9-8.6

06 Net Precipitation	07 One Year 24-Hour Rainfall	08 Slope: Site Slope	Direction of Site Slope	Terrain Average Slope
4 (in)	2.5 (in)	2 %	NW	2 %

09 Flood Potential

Site is in 100 Year Floodplain

10 [ ] Site is on Barrier Island, Coastal High Hazard Area, Riverine Floodway

11 Distance to Wetlands (5 acre minimum)

ESTUARINE OTHER

A. NA (mi) B. 2.25 (mi)

12 Distance to Critical Habitat (of endangered species)

NA (mi)

Endangered Species: _____

13 Land Use in Vicinity

Distance to:

COMMERCIAL/INDUSTRIAL	RESIDENTIAL AREAS, NATIONAL/STATE PARKS, FORESTS, OR WILDLIFE RESERVES	AGRICULTURAL LANDS: PRIME AG LAND	AGRICULTURAL LANDS: AG LAND
A. 0.1 (mi)	B. 0 (mi)	C. 0 (mi)	D. 0 (mi)

14 Description of Site in Relation to Surrounding Topography

This site is located in a flat area. The property is bounded on the west by Walmore Road, Cayuga Creek to the north and a Conrail railroad track embankment to the northeast and east. Rainwater runoff is expected to enter Cayuga Creek, which flows southwest to Niagara River.

VII. SOURCES OF INFORMATION (cite specific references, e.g., state files, sample analysis, reports)

Re: NYS Standby Contract #D002625, Work Assignment #D002625-17
Walmore Road-Johnson Property (Site #932101) Geophysical Survey Results

Dear Ms. Woodward:

Geophysical surveys were performed by Ecology and Environment Engineering, P.C., (E & E) at the Walmore Road-Johnson Property (Walmore) site located in the Town of Wheatfield, Niagara County, New York on August 18, 1993. The surveys were performed as requested in the New York State Department of Environmental Conservation (NYSDEC) scope-of-work (SOW) at two locations to identify landfill boundaries.

Grid 1 was located across the front yards and the area in between 6381 Walmore Road and 6373 Walmore Road (formerly a barn). Grid 2 was located in the back yard of the former barn and extended south to 6381 Walmore Road (see Attachment 1).

SURVEY TECHNIQUES

The geophysical surveys were performed using an EG&G Geometrics model G-856 proton precession magnetometer and a Geonics Ltd. model EM31 ground conductivity meter.

Grids were established over each survey area with 20-foot station and line spacings. Grid 1 was 120 feet along the X-axis and 240 feet along the Y-axis. Grid 2 was 60 feet along the X-axis and 220 feet along the Y-axis. Both grids were oriented north 5 degrees east with station

(0,0) located in the southwest corner of each grid. Compass directions are uncorrected for regional magnetic declination (8.5 degrees west).

One reading of the earth's total magnetic field (in units of gammas) was collected at each grid station. Magnetic readings were later corrected for diurnal drift from base station readings. Four readings were recorded at each grid station by the EM31. Two of these readings were collected with the instrument oriented parallel to the Y-axis (orientation 1) of the grid, and the remaining two were collected with the instrument oriented parallel to the X-axis (orientation 2). The readings in each orientation consisted of the quadrature phase component (conductivity) of the induced magnetic field in both the vertical and horizontal dipole modes.

The quadrature phase component measures ground conductivity in units of millimhos/meter (mmhos/m). In the vertical dipole mode, the instrument response has a depth of penetration of approximately 18 feet below ground surface and it is more sensitive to deeply buried objects. In the horizontal dipole mode, the instrument response has a depth of about 9 feet below ground surface and is more sensitive to shallow objects.

All instrument readings were electronically recorded and stored by the instruments. Magnetometer readings were down-loaded using MAGPAC Version 4.1.5-89 software (EG&G Geometrics) and EM31 readings were down-loaded using DAT31 Version 3.20 software (Geonics, Ltd.). All geophysical data were then plotted and contoured using Surfer Version 4.0 software (Golden Software, Inc.).

SURVEY RESULTS

Several contour maps of each survey grid were generated to illustrate survey results. Magnetometer contour maps are labeled "MAG", and EM31 maps are labeled "conductivity" for the quadrature phase component. Vertical and horizontal dipole modes in instrument orientations 1 and 2 are labeled V1, H1, V2, and H2 respectively. Attachment 2 contains the contour plots illustrating the survey results. Asterisks on the maps indicate data collection stations. Multiple contour intervals are presented for some orientations to better illustrate anomalies.

GRID 1

Irregular magnetic gradient fluctuations occurred through most of the western and northern half of the survey grid. This was supported and further delineated by the EM31 results. High conductivity values were recorded in both the vertical and horizontal dipole modes in both orientations 1 and 2 in the northern portion of the grid trending northeast/southwest. The strongest readings were centered at grid stations (40,140), (60,160), and (100,200). These anomalies may represent large, separately buried objects at these locations; a linear feature (pipeline or trench filled with metallic objects) trending northeast/southwest beneath the grid area; or most likely, the boundary of the landfill, between grid stations (0,80) and (120,140), which contains large amounts of metallic debris.

It appears, based upon the geophysical results of Grid 1, that the landfill begins along the southern bank of Cayuga Creek and extends partially onto the property of 6381 Walmore Road. It is unknown at this time whether the fill material extends north of Cayuga Creek. E & E recommends drilling the soil borings north of grid stations (0,80) to (120,140) to characterize the fill material, however, stations (0,100), (0,160), (0,200), (20,120), (40,100), (40,120), (40,140), (40,200), (60,140), (60,160), (60,240), (80,180), (80,200), and (100,200) should be avoided.

GRID 2

One large anomaly was detected at grid station (20,140) in both the magnetometer and most of the EM31 plots of grid 2. This anomaly represents a metal fence post in the garden behind 6373 Walmore Road. Another low gradient anomaly was detected by the magnetometer and the EM31 in the vertical dipole mode (thus indicating a deeply buried object) between grid stations (0,40) to (0,60). A shallow anomaly was also detected by the EM31 in the horizontal dipole mode at station (60,40). The source of these anomalies are unknown.

Based on the range of conductivity values detected in Grid 2, as well as the relative lack of magnetic and conductive anomalies, it appears that no fill exists behind 6373 Walmore Road. The fill area is primarily confined to the front yard along Walmore Road.

CONCLUSIONS/RECOMMENDATIONS

Analysis of the magnetometer and EM31 data for each of the survey grids has indicated the presence of subsurface metallic debris in both grid areas. However, relatively few anomalies were detected in Grid 2 and the fill area appears confined to the front yard of 6373 Walmore Road extending from Cayuga Creek southward, partially onto the property of 6381 Walmore Road. Since Grid 1 had numerous subsurface anomalies, caution should be taken when drilling in this area. The drilling program at this site may proceed as scheduled following the recommendations stated above.

If you have any questions, or require additional information, please contact me or Gene Florentino at 716/684-8060.

Sincerely,

ECOLOGY AND ENVIRONMENT, INC.

APPENDIX D

DATA SUMMARY

DATA USABILITY REVIEW

The data usability review for the Walmore Road-Johnson Property site consisted of the following:

- Checking chain-of-custody forms and analytical logs to confirm that samples were analyzed for the parameters requested on the chain-of-custody; and
- Reviewing the data to confirm that NYSDEC and laboratory quality control criteria were met.

These quality control criteria included:

- Holding times;
- Laboratory blank contamination;
- Surrogate recoveries;
- Internal standards area and retention times;
- Matrix spike/matrix spike duplicate (MS/MSD) results;
- Instrument calibration (initial and continuing); and
- For metals, the specific criteria were reviewed and problems noted. These criteria included laboratory method blanks, MS/MSDs, instrument calibration, and ICP interference check samples.

Based on the above-described review, memoranda were generated outlining any problems that affected the usability of the data. These memoranda were submitted to NYSDEC under separate cover as part of the reduced data packages. The problems commented on generally included blank contamination and holding time violation, and do not constitute a full data validation effort.

For the Walmore Road-Johnson Property site, all data were considered usable as qualified by the data review.

Data qualifiers used in the data summary forms are defined below. Table D-1 which follows provides a list of the PAHs analyzed for (as base/neutral extractables) and shows which are considered carcinogenic.

Defined Qualifiers

B Analyte is found in the associated blank as well as in the sample.

J Indicates the value is estimated.

UJ Indicates the quantitation limits are estimated.

A Indicates that a TIC is a suspected aldol-condensation product.

N Indicates presumptive evidence of a compound. Used only for TICs where the identification is based on a mass spectral library search.

Table D-1 POLYNUCLEAR AROMATIC HYDROCARBON (PAH) ANALYSIS LIST
Naphthalene
2-Methylnaphthalene
2-Chloronaphthalene
Acenaphthylene
Acenaphthene
Fluorene
Phenanthrene
Anthracene
Fluoranthene
Pyrene
Benzo(a)anthracene[a]
Chrysene[a]
Benzo(b)fluoranthene[a]
Benzo(k)fluoranthene[a]
Benzo(a)pyrene[a]
Indeno(1,2,3-cd)pyrene[a]
Dibenz(a,h)anthracene[a]
Benzo(g,h,i)perylene

a Considered carcinogenic (Department of Health and Human Services, 1993).

WASTE CHARACTERISTICS

Waste Characteristics (WC) Calculations:

1 landfill	Landfill	Ref: 1	WQ value	maximum
Area	8.00E-01 acres		1.03E+01	1.03E+01

The site consists of a 2-acre parcel of which approximately 0.8 acres has been filled. Subsurface borings drilled during the PSA invesatigation indicate fill depths between approximately 4.5 and 8 feet.
Ref: 8

** Only First WC Page Is Printed **	Waste Characteristics Score: WC = 18

Ground Water Pathway Criteria List
Suspected Release

Are sources poorly contained? (y/n/u)	Y
Is the source a type likely to contribute to ground water contamination (e.g., wet lagoon)? (y/n/u)	Y
Is waste quantity particularly large? (y/n/u)	U
Is precipitation heavy? (y/n/u)	N
Is the infiltration rate high? (y/n/u)	Y
Is the site located in an area of karst terrain? (y/n)	N
Is the subsurface highly permeable or conductive? (y/n/u)	N
Is drinking water drawn from a shallow aquifer? (y/n/u)	Y
Are suspected contaminants highly mobile in ground water? (y/n/u)	N
Does analytical or circumstantial evidence suggest ground water contamination? (y/n/u)	Y

Other criteria? (y/n) N

SUSPECTED RELEASE? (y/n) Y

Summarize the rationale for Suspected Release:

AN UNKNOWN QUANTITY OF MATERIAL WAS LANDFILLED AT THE SITE INCLUDING, FLYASH, GRAPHITE, SOIL, ETC. THIS MATERIAL WAS FOUND TO CONTAIN MODERATE LEVELS OF PESTICIDES AND PAH'S AND LOW LEVELS OF PCB'S ANDORGANIC SOLVENTS. BOREHOLES INSTALLED AT THE SITE ENCOUNTERED FILL MATERIAL (SLAG, GRAPHITE ETC.) TO A MAXIMUM DEPTH OF APPROXIMATELY 8 FEET. GROUNDWATER DEPTH IN THE AREA IS REPORTEDLY 6 FEET. GROWNDWATER WAS ENCOUNTERED AT A DEPTH OF APPROXIMATELY 5.0 FEET IN ONE OF THE ON-SITE BORINGS.

Ref: 1,6,8

Ground Water Pathway Criteria List
Primary Targets

Is any drinking water well nearby? (y/n/u)	N
Has any nearby drinking water well been closed? (y/n/u)	U
Has any nearby drinking water well user reported foul-testing or foul-smelling water? (y/n/u)	N
Does any nearby well have a large drawdown/high production rate? (y/n/u)	U
Is any drinking water well located between the site and other wells that are suspected to be exposed to a hazardous substance? (y/n/u)	N
Does analytical or circumstantial evidence suggest contamination at a drinking water well? (y/n/u)	N
Does any drinking water well warrant sampling? (y/n/u)	N
Other criteria? (y/n)	N
PRIMARY TARGET(S) IDENTIFIED? (y/n)	N

Summarize the rationale for Primary Targets:

DRINKING WATER WELLS ARE LOCATED APPROXIMATELY 3-MILES NORTH OF THE SITE ON THE TUSCARORA INDIAN RESERVATION. SPECIFIC INFORMATION SUCH AS WELL CONSTRUCTION, DEPTH,SCREENED INTERVAL, NUMBER OF WELLS, AND POPULATION SERVED ARE NOT KNOWN. GROUNDWATER TARGET POPULATIONS WERE OBTAINED BY COUNTING HOUSES ON THE USGS TOPOGRAPHIC MAP AND MULTIPLYING BY 3.8. IT IS NOT KNOWN IF THE WELLS HAVE BEEN SAMPLED. THE TUSCARORA'S WELLS WILL BE CONSIDERED SECONDARY TARGETS. THERE IS NO DOCUMENTATION OF COMPLAINTS OR DRINKING WATER CONTAMINATION RELATED TO THE SITE.

Surface Water Pathway Criteria List Suspected Release	
Is surface water nearby? (y/n/u)	Y
Is waste quantity particularly large? (y/n/u)	N
Is the drainage area large? (y/n/u)	Y
Is rainfall heavy? (y/n/u)	N
Is the infiltration rate low? (y/n/u)	N
Are sources poorly contained or prone to runoff or flooding? (y/n/u)	Y
Is a runoff route well defined(e.g.ditch/channel to surf.water)? (y/n/u)	Y
Is vegetation stressed along the probable runoff path? (y/n/u)	N
Are sediments or water unnaturally discolored? (y/n/u)	N
Is wildlife unnaturally absent? (y/n/u)	N
Has deposition of waste into surface water been observed? (y/n/u)	N
Is ground water discharge to surface water likely? (y/n/u)	Y
Does analytical/circumstantial evidence suggest S.W. contam? (y/n/u)	N
Other criteria? (y/n)	N
SUSPECTED RELEASE? (y/n)	N

Summarize the rationale for Suspected Release:

ANALYTICAL RESULTS FOR SURFACE WATER AND SEDIMENT SAMPLES COLLECTED FROM CAYUGA CREEK ADJACENT TO THE SITE DO NOT INDICATE SIGNIFICANT RE LEASES FROM OF THE SITE OF ORGANIC OR INORGANIC ANALYTES.

Ref: 6

Surface Water Pathway Criteria List
Primary Targets

Is any target nearby? (y/n/u) If yes: Y
N Drinking water intake
Y Fishery
Y Sensitive environment

Has any intake, fishery, or recreational area been closed? (y/n/u) N

Does analytical or circumstantial evidence suggest surface water contamination at or downstream of a target? (y/n/u) N

Does any target warrant sampling? (y/n/u) If yes: N
N Drinking water intake
N Fishery
N Sensitive environment

Other criteria? (y/n) N

PRIMARY INTAKE(S) IDENTIFIED? (y/n) N

Summarize the rationale for Primary Intakes:

THERE ARE NO DRINKING WATER INTAKES WITHIN THE TARGET DISTANCE LIMIT OF 15 MILES DOWNSTREAM WHICH ARE SUSPECTED OF BEING CONTAMINATED FROM THE SITE.

SUMMARY

1. Is there a high possibility of a threat to any nearby drinking water well(s) by migration of a hazardous substance in ground water? No

   If yes, identify the well(s).

   If yes, how many people are served by the threatened well(s)? 0

2. Is there a high possibility of a threat to any of the following by hazardous substance migration in surface water?
   A. Drinking water intake — No
   B. Fishery — No
   C. Sensitive environment (wetland, critical habitat, others) — No

   If yes, identity the target(s).

3. Is there a high possibility of an area of surficial contamination within 200 feet of any residence, school, or daycare facility? Yes

   If yes, identify the properties and estimate the associated population(s)
   TWO RESIDENCES EXIST ADJACENT TO THE SITE, NO SCHOOLS OR DAYCARE FACILITIES. ASSOCIATED POPULATION IS 10 PEOPLE

4. Are there public health concerns at this site that are not addressed by PA scoring considerations? No

   If yes, explain:

Dear Mr. Sundquist:

I am writing in response to your May 20, 1988 letter to Brian Smith.

While we would like to provide assistance we are unable to do so at this time. We have no record of involvement at this site. Our manifest system started in 1981, after the period in question.

Sincerely,

Carl G. Buzawa

INTERVIEW ACKNOWLEDGMENT FORM

SITE NAME: Walmore Road-Johnson Property Site

PERSON CONTACTED: Mark Haseley

AFFILIATION: Haseley Trucking Company

ADDRESS: 10315 Lockport Road, Wheatfield, New York

TYPE OF CONTACT: Telephone interview

I.D. NUMBER: 932101

DATE: May 15, 1991

PHONE NUMBER: (716) 297-1550

CONTACT PERSON(S): S. Glinski

INTERVIEW SUMMARY:

5/15/91 - Mark Haseley Trucking Company manager could not recall the contents of his company's fill transported to the Johnson property. He will conduct file search to find documentation, if any. He remembers many haulers bringing clean fill to the site.

5/17/91 - Mr. Haseley's file search has turned up no record of what was hauled to the Johnson property for the time period in question.

ACKNOWLEDGMENT

I have read the above transcript and I agree that it is an accurate summary of the information verbally conveyed to Ecology and Environment, Inc. interviewer(s) (as revised below, if necessary).
Revisions: (please write in any corrections needed to the above transcript)

Woody Herman
Town of Wheatfield Water District
3113 Niagara Falls Boulevard
North Tonawanda, NY 14120

Dear Mr. Herman:

Thank you for providing the information concerning the water distribution system along Walmore Road in the Town of Wheatfield. Ecology and Environment is currently investigating the fill at 6373 Walmore Road for the New York State Department of Environmental Conservation (DEC). For the purpose of our contract with the DEC, we must have written confirmation of the information you provided to me over the telephone on May 6, 1988. I have listed the points we discussed on Attachment 1. If these statements on the attachment are correct to the best of your knowledge, please acknowledge this and return it to us. If you can recall anything else about the fill at this site, such as its extent, color, odor and whether the entire length or just portions of the copper distribution line was corroded, we would like to learn of this information.

Sincerely yours,

Jon Sundquist

JS:bf-06
Attachment

Attachment I

- The material of construction of the water main along Walmore Road in the Town of Wheatfield is Asbestos Concrete.
- Distribution lines to residences along the road are usually constructed of copper.
- The copper distribution line to 6373 Walmore Road corroded and had to be replaced with PVC.
- The cause of the corrosion apparently was the fill in which it was buried, as no other customers along Walmore Road have had such problems.
- The fill had the appearance of cinders.

This information is correct to best of my knowledge.

NIAGARA COUNTY HEALTH DEPARTMENT

MEMORANDUM

DATE: December 6, 1984

TO: Peter Buechi

FROM: Mike Hopkins M. Hopkins

SUBJECT: JOHNSON PROPERTY - 6373 WALMORE ROAD, WHEATFIELD, NY

In response to a complaint received from Mr. Dean Johnson of 6373 Walmore Rd., this department has begun an investigation of an apparent inactive disposal site at that address. According to Mr. Johnson, the site was filled with graphite hardened resin, crushed plastic battery cases and similar materials by the Hasely Trucking Company many years ago. The fill is reportedly five feet deep in some areas. An area of one to three acres may be involved. A site sketch is attached.

It seems likely that this site may be the site listed in the Disposal Site Registry as the"Walmore Road Site" which was previously believed to be located 1000 to 1200 feet north of 6373 Walmore Road. It appears likely that two distinct sites are present. The description of the waste materials present at both locations is similar (i.e., mainly graphite).

There is a well on the Johnson property which is used to water fruit trees, etc., but not for drinking water. It would be possible to sample water from this well.

Since it appears that there is evidence that waste materials are present beneath or adjacent to an occupied dwelling, this department recommends that samples be collected and analyzed. This department could collect the samples but does not currently have the resources to have the samples analyzed. We are therefore requesting that your department consider having one or more samples from this site analyzed. At a minimum, we feel that analysis of a well water sample for THO and heavy metals would be appropriate.

If DEC can arrange for analysis of samples from this site, please contact me so that arrangements for sampling can be made.

NIAGARA FALLS, NEW YORK 14302

February 15, 1985

Mr. Dean Johnson
6373 Walmore Road
Niagara Falls, NY 14304

Dear Mr. Johnson:

Attached is a copy of the laboratory report submitted to this department from the Department of Environmental Conservation with the results of the analysis of water from your well. Please note that the Total Halogenated Organics (THO) concentration as well as the concentrations of Lead, Chromium and Cadmium were below detection limits.

Based on these results and considering that the well is not used for drinking water supply, this department sees no reason for concern regarding possible toxic contaminants in the well water. The water should be suitable for its present uses, which I understand to be as irrigation and washwater.

Please feel free to contact me with any questions.

Sincerely,

Michael E. Hopkins
Ass't. P.H. Engineer

Mrs. Debbie Johnson
2 Cranston Street
Worcester, MA 01602

Dear Mrs. Johnson:

Thank you for calling last Friday, June 26, 1987 to provide information to Ecology and Environment, Inc. (E & E) concerning the Johnson property on Walmore Road in the Town of Wheatfield. To restate our role, E & E is working under a contract from the New York State Department of Environmental Conservation (DEC) to investigate suspected waste disposal sites in western New York. The Johnson property (specifically 6373 Walmore Road) is on the registry of such sites at the request of the owner, Mr. Dean Johnson, who suspected that industrial wastes may have been used as fill during the development of the property. For future reference, the DEC site code for this property is 932094. Any questions about the site or this investigation should be referred directly to the DEC.

With this letter, we would like to confirm the information you provided us over the telephone. This information is listed in Attachment 1. To provide sufficient documentation of this information, the DEC requires that we ask you to sign this document, acknowledging that the information (with any changes you may note) is correct to the best of your knowlege.

Thank you for your assistance in this investigation.

Sincerely,

Jon Sundquist

Attachment 1

Dean Johnson owns the property at 6373 Walmore Road (converted barn) and 6367 Walmore Rd. (Ranch-style house)

JAMES & DEBRA ~~Debbie~~ Johnson owns the property at 6381 Walmore Rd. (2 story farm house)

Debbie Johnson is Dean Johnson's sister-in-law

Debbie Johnson's father-in-law owns the property ~~between~~ ON THE SOUTH SIDE OF 6381 ~~the railroad embankment and~~ Walmore Road

- This land is leased to a farmer named Pfoul
- This farmer has farmed the land since at least 1979

The barn at 6373 Walmore Road was converted to a residence in ~~1980~~ APPROX. 1979 & 1980.

- Water line and septic tank installed at that time
- Water line runs from the road to the barn, parallel to the driveway on its north side

The water line had completely corroded and was leaking by 1984

- Water line was replaced with POSSIBLE PVC piping
- Replacement work performed by Mr. Pete seeger, a licensed plumber *
- OUTSIDE- Plumbing at both 6367 and 6381 Walmore Road is in accordance with Town water regulations

* ORIGINAL INSIDE PLUMBING DONE BY P. SEEGER, NOT SURE ON REPLACEMENT WORK OR OUTSIDE PLUMBING.

A military agency has tested the water in the well on the property AT 6381 WALMORE RD.

- Analytical results were sent to Debbie Johnson
- Military agency indicated they were testing because of a leaking fuel tank and possible buried transformers on the air force base across Walmore Road from the property

Dear Mr. Smyth:

The oil and grease calculation I quoted to you over the telephone was in error. When I recalculated, I found the oil and grease to be virtually none. The flask used had actually lost weight, not gained, and I miscalculated it as a positive number.

My sincere apologies for this error.

Very truly yours,

ADVANCED ENVIRONMENTAL SYSTEMS, INC.

Marlene C. Moyer

SCOPE OF WORK

Under the direction of Mr. Smyth, this work was performed to fulfill an analytical requirement for the Niagara Falls Tactical Airlift Group Facility.

RECEIPT OF SAMPLE

At 1:15 p.m., on January 7, 1985, Mr. Charles Calvert of Advanced Environmental Systems, Inc. sampled the groundwater well at the TAG Facility. Mr. Calvert then directly transported the sample to the Advanced Environmental Systems laboratory.

Re: Unsafe Private Water Supply
6381 Walmore Road
Town of Wheatfield

Dear Mr. Johnson:

On January 8, 1985, Mr. Stimson of this department made a sanitary survey of the well utilized as a source of private water supply for your residence at the above location. During this inspection, a sample of water was collected and submitted to the Niagara County Laboratory for bacterial examination. It is reported that organisms of the coliform group were present at the time of sampling, indicating that the supply was contaminated and unfit for human consumption at the time of sampling.

Inas much as the report of the survey indicates that this well is properly constructed and properly located with respect to known sources of pollution, it is quite possible that the contamination in this supply is of incidental origin. We would, therefore, suggest that this well be thoroughly disinfected in accordance with the enclosed instructions and this office notified so that a new sample may be taken. Until such time as a sanitary survey, confirmed by a bacterial analysis, indicates that this supply is of a safe sanitary quality, all water from it should be boiled before being used for human consumption, or culinary purposes.

Very truly yours,

Michael Popovici

MEMORANDUM

TO: Mr. Demick - Western Investigation Section
FROM: Mr. Tygert - Region 9 John J. Tygert
SUBJECT: Walmore Road Site (932094)
DATE: September 17, 1986

On September 17, 1986, Mr. Clare of Region 9 and Mr. Lupe of your Section discussed the problem with site identification of the Walmore Road site. It was agreed that the two sites should be separated in the Registry. We recommend the following division be made:

1. 932094 - Existing file for Walmore Road. Change name to Lockport Road Site.

2. _____ - Add new site identified by the Niagara County Health Department in 1982. Name this site Johnson Site - Walmore Road. - 6373 Walmore Rd

It is also recommended that the Johnson Site - Walmore Road be added to the next schedule of Phase I Investigations.

This recommendation was previously made to your Office in a memorandum (undated, unfortunately) written on March 6, 1986. Mr. Lupe advises that this request is not available in your file.

Your consideration of this recommendation will be appreciated.

We will prepare appropriate fact sheet as presented at Sept ESWE meeting
