FEBRUARY 2017

CERTIFICATIONS

I, David K. Meixell, am currently a registered professional engineer licensed by the State of New York, I had primary direct responsibility for implementation of the remedial program activities, and I certify that the Remedial Action Work Plan and the Remedial Action Work Plan Addendum was implemented and that all construction activities were completed in substantial conformance with the Department-approved Remedial Action Work Plan.

I certify that the data submitted to the Department with this Final Engineering Report demonstrates that the remediation requirements set forth in the Remedial Action Work Plan and Remedial Action Work Plan Addendum and in all applicable statutes and regulations have been or will be achieved in accordance with the time frames, if any, established for the remedy.

I certify that all use restrictions, Institutional Controls, Engineering Controls, and/or any operation and maintenance requirements applicable to the Site are contained in deed restrictions created and recorded pursuant ECL 71-3605 and that all affected local governments, as defined in ECL 71-3603, have been notified that such easement has been recorded.

I certify that a Site Management Plan has been submitted for the continual and proper operation, maintenance, and monitoring of all Engineering Controls employed at the Site, including the proper maintenance of all remaining monitoring wells, and that such plan has been approved by the Department.

I certify that all documents generated in support of this report have been submitted in accordance with the DER's electronic submission protocols in place at the time and have been accepted by the Department.

I certify that all data generated in support of this report have been submitted in accordance with the Department's electronic data deliverable in place at the time and have been accepted by the Department.

I certify that all information and statements in this certification form are true. I understand that a false statement made herein is punishable as a Class “A” misdemeanor, pursuant to Section 210.45 of the Penal Law. I, David K. Meixell, of Plumley Engineering, P.C., 8232 Loop Road, Baldwinsville, New York, 13027, am certifying as Owner’s Designated Site Representative for the site.

FINAL ENGINEERING REPORT

1.0 BACKGROUND AND SITE DESCRIPTION

The City of Geneva entered into a State Assistance Contract (SAC) with the New York State Department of Environmental Conservation (NYSDEC) in March 1999, to investigate and remediate a 2.5-acre property located in Geneva, New York. The property was remediated to restricted commercial use.

The site is located in the County of Ontario, New York and is identified as tax parcels 090.15-4-67 and 90.20-1-11 on Ontario County Tax Maps # 090.15 and 090.20. The site is situated on an approximately 2.5-acre area bounded by Avenue F to the north, a warehouse to the south, Univar (formerly H.B. Fuller Company) and vacant property to the east, and Lehigh Street to the west (see Figures 1 and 2). The boundaries of the site are fully described in Appendix A: Survey Map, Metes and Bounds.

An electronic copy of this FER with all supporting documentation is included as Appendix B.

2.0 SUMMARY OF SITE REMEDY

2.1 REMEDIAL ACTION OBJECTIVES

Based on the results of the Remedial Investigation, the following Remedial Action Objectives (RAOs) were identified for this site in the March 2002 Record of Decision (ROD).

Goals for the remedial program have been established through the remedy selection process stated in 6 NYCRR Part 375-1.10. The overall remedial goal is to meet all standards, criteria, and guidance (SCGs) and be protective of human health and the environment. At a minimum, the remedy selected must eliminate or mitigate all significant threats to the public health and to the environment presented by the hazardous substances disposed at the site through the proper application of scientific and engineering principles.

The future use for the Market Basket site will be restricted commercial and industrial. The goals selected for this site are:

- Reduce, control, or eliminate to the extent practicable the contamination present within the soils/waste on site.
- Eliminate to the extent practicable the potential for direct human contact with the contaminated soils or groundwater on site.
- Provide for attainment of SCGs for groundwater quality at the site, to the extent practicable.

2.2 DESCRIPTION OF SELECTED REMEDY

The site was remediated in accordance with the remedy selected by the NYSDEC in the Record of Decision (ROD) dated March 2002.

The factors considered during the selection of the remedy are those listed in 6NYCRR 375-1.8. The following are the components of the selected remedy:

1. A remedial design program to verify the components of the conceptual design and provide the details necessary for the construction, operation and maintenance, and monitoring of the remedial program. Any uncertainties identified during the SI/RAR will be resolved.

2. Building demolition.

3. Sub-slab soil characterization.

4. Excavation and off-site disposal of contaminated soils to level consistent with TAGM 4046 (Standards at time of ROD). A baseline figure of 1,000 cubic yards is assumed due to uncertainties prior to completing the sub-slab soil evaluation. This figure assumes that all soils demonstrating elevated metal concentrations in the southeast area will not be removed. Rather, the source sludge material in this area will be removed and some pockets of metal contamination in soils may remain. Excavation will be backfilled with clean fill material.

5. Since the selected remedy will not immediately meet groundwater standards, a monitoring program will be instituted for a minimum of five years. This program will allow the effectiveness of the selected remedy to be monitored and will be a component of the operation and maintenance for the site. This monitoring program will be evaluated after five years to determine whether further monitoring is necessary.

6. Deed Restrictions will be used to prohibit the use of groundwater as a potable or process water source without treatment to achieve New York State standards; and ensure that if the site soil is excavated, it is managed, characterized, and properly disposed of in accordance with NYSDEC regulations and directives. The deed restrictions will also require owners to annually certify to NYSDEC that the restrictions have been adhered to and that the conditions at the site are fully protective of public health and the environment in accordance with the Record of Decision.

3.0 INTERIM REMEDIAL MEASURES, OPERABLE UNITS AND REMEDIAL CONTRACTS

The remedy for this site was performed as a single project, and no interim remedial measures, operable units or separate construction contracts were performed.

4.0 DESCRIPTION OF REMEDIAL ACTIONS PERFORMED

The Remedial Action at the site was conducted in 2 phases. Remedial activities completed at the Site were conducted in accordance with the NYSDEC-approved June 2007 Remedial Action Work Plan (RAWP) and the July 2016 RAWP Addendum for the Market Basket site (July 2005). All deviations from the RAWPs are noted below.

Phase 1 Remedial activities occurred at the 3 locations noted on Figure 2 and Figure 6, and are described below:

- **Impacted Soil/Fill Material at SB-2**

An area of soil that had been impacted with chlorinated compounds was identified in the vicinity of SB-2 on the north block. See Figure 2 and Figure 6. The excavation area was approximately 20 ft. x 20 ft. x 20 ft. centered at this location. Excavated soil/fill material was field screened with a photoionization detector (PID) using a screening level of 10 ppm. The excavated soil/fill material was staged in separate stockpiles based on the PID readings and visual observations. The excavation area was extended until it appeared that impacted soils had been removed. One confirmation soil sample was collected from each side of the excavation (north, east, south and west) and two soil samples were collected from the bottom of the excavation. Analytical results from these samples are included in Table 3-1 and Appendix H. Soils presenting evidence of impacts were segregated from non-impacted soils. Following receipt of analytical data from the confirmation soil samples and approval from NYSDEC, the excavation was backfilled with approved, imported fill from a site on Gates Road owned by Paul Malcuria. Analytical data from five grab samples of the imported fill are in Table 4-1 and Appendix K. Fill material was placed in the excavation and was compacted using the excavator bucket and tracked construction equipment.

The excavation around SB-2 required the removal of monitoring well MW-10. Two new downgradient wells (MW-12 and MW-13) were installed in locations immediately downgradient of the SB-2 excavation area. The monitoring well installations were in accordance with the July 2003 Sampling Plan for the Pre-Design Remedial Investigation.

- **Former Underground Storage Tank**

Fill in the former underground storage tank (UST) pit was excavated at the same time as the excavation activities associated with SB-2. See Figure 2 and Figure 6. The excavation progress was monitored visually and screened with a PID. Piping which was previously observed during the UST removal activities that extended northward from the UST pit was followed and removed. The surrounding soils were evaluated in accordance with Section 3.9(a)5 of DER-10. The excavation area was approximately 23 ft. x 20 ft. x 10 ft. centered at this location. One confirmation soil sample was collected from each side of the excavation (north, east, south and west) and two soil samples were collected from the bottom of the excavation. Analytical

results from these samples are included in Table 3-1 and Appendix H. Excavated soil/fill material was field screened with a photoionization detector (PID) using a screening level of 10 ppm. The excavated soil/fill material was staged in separate stockpiles based on the PID readings and visual observations. The excavation area was extended until it appeared that impacted soils had been removed. Soils presenting evidence of impacts were segregated from non-impacted soils. The piping was not connected on the other end and appeared to have been cut in during the removal of the dispensing pump. Waste characterization samples were collected of the soil/fill material excavated - one grab and one composite soil sample. The soil/fill material samples were analyzed for VOCs and SVOCs, via USEPA Methods 8020/8021 and 8270, respectively, as well as total lead via USEPA Method 6010. The sample locations chosen were based the PID screening results as well as visual and olfactory observations. The excavated soil/fill material was disposed off-site in accordance with applicable regulations.

Following receipt of analytical data from the confirmation soil samples and approval from NYSDEC, the excavation was backfilled with approved, imported fill from a site on Gates Road owned by Paul Malcuria. Analytical data from five grab samples of the imported fill are in Table 4-1 and Appendix K. Fill material was placed in the excavation and was compacted using the excavator bucket and tracked construction equipment.

- **Trench Area at the South Building**

Impacted soil/fill material, visual observations and PID readings, in the trench area located at the eastern end of the former South Building (see Figure 2 and Figure 6) was excavated and removed. Buried piping was encountered, traced, removed, and screened using visual observations and PID readings. The trench area excavation was approximately 20 feet by five feet by 1 to 2 feet deep (5.6 cubic yards). Six (6) soil samples were collected for confirmation purposes. Four (4) surface and two (2) subsurface soil samples were collected in the trench area excavation. Surface soil samples were collected from a depth of 0 to 2 inches beneath any vegetative cover and excluded any non-representative material such as large gravel or cobbles. The surface soil samples were collected based on visual observations and PID readings. The subsurface soil samples were collected at depths of one to two feet below grade. The collected soil samples were submitted to an ELAP certified laboratory, Life Sciences Laboratory, Inc., for analysis of VOCs and SVOCs via USEPA Methods 8020/8021 and 8270. The samples were also analyzed for TAL metals.

The excavations were monitored with a PID as they progressed, using a screening level of 10 ppm. When it appeared that impacted soil had been removed (based on visual observations and PID readings), confirmation samples were collected as noted above. Laboratory results were compared to SCOs as summarized in Table 3-1. Full analytical data are included in Appendix H. The excavated soil/fill material was

disposed off-site in accordance with applicable regulations.

Following receipt of analytical data from the confirmation soil samples and approval from NYSDEC, the excavation was backfilled with approved, imported fill from a site on Gates Road owned by Paul Malcuria. Analytical data from five grab samples of the imported fill are in Table 4-1 and Appendix K. Fill material was placed in the excavation and was compacted using the excavator bucket and tracked construction equipment.

Phase 2 Remedial activities occurred at 1 locations noted on Figure 2 and Figure 6.

- **Removal of Hydraulic Cylinder**

A subsurface hydraulic was encountered during the removal of vegetation on the south block. See Figure 2 and Figure 6 for the location. The structure was removed in September 2016 with NYSDEC oversight. The top of the cylinder was first uncovered via hand digging during the clearing of overgrown vegetation on the site. Excavated soil/fill material was field screened (visual, olfactory, and PID screening – screening level of 10 ppm). The excavated soil/fill material was segregated and staged based on field screening results. All excavated soil/fill material was staged on and covered with a minimum of 12-ml poly sheeting. The northern and southern sides of the cylinder were excavated to determine if any releases/impacts. The excavation was extended in the northerly and southerly direction until field screening indicated no potential for impacts. When field screening indicated no evidence of impacts, the cylinder was removed from the excavation and the excavation advanced to the east and west. The excavated was extended until field screening indicated no evidence of impacts. The excavation measured 7 ft. x 9 ft. x 8 ft. deep. Confirmation samples were collected from each sidewall of the excavation and the 1 bottom sample was collected for laboratory analysis. Confirmation samples were analyzed for TCL VOCs, TCL SVOCs, and PCBs. The confirmation sample analytical results showed no exceedances of the Site's restricted commercial SCOS. See Table 3-1 and Appendix H. The excavation area was restored to existing site grade. The excavation was backfilled with clean topsoil. The backfill material was from Montemorano Brothers, Inc. Topsoil, Sand & Gravel and NYSDEC approved. See Table 4-3 and Appendix K.

All excavated soils from both phases of remedy implementation were stored on, and covered with, plastic sheeting to prevent run-off from the staged soils. Access to staged soil was controlled via fencing and locked gates. Samples were collected from the piles for waste characterization. The excavated soil/fill material was disposed off-site in accordance with applicable regulations.

Groundwater was not encountered during the removal of the hydraulic cylinder and groundwater samples were not collected.

4.1 GOVERNING DOCUMENTS

4.1.1 Site Specific Health & Safety Plan (HASP)

All remedial work performed under this Remedial Action was in full compliance with governmental requirements, including Site and worker safety requirements mandated by Federal OSHA.

The Health and Safety Plan (HASP) was complied with for all remedial and invasive work performed at the Site.

4.1.2 Quality Assurance Project Plan (QAPP)

The QAPP was included as Attachment 10 of the Remedial Action Work Plans approved by the NYSDEC. The QAPP describes the specific policies, objectives, organization, functional activities and quality assurance/quality control activities designed to achieve the project data quality objectives.

4.1.3 Storm-Water Pollution Prevention Plan (SWPPP)

The erosion and sediment controls for all remedial construction were performed in conformance with requirements presented in the New York State Guidelines for Urban Erosion and Sediment Control.

4.1.4 Community Air Monitoring Plan (CAMP)

NYSDOH's Community Air Monitoring Plan (found in Appendix 1A of NYSDEC's DER-10) was incorporated by reference as part of the RAWP. In addition, a site-specific CAMP was prepared prior to remedial activities. During site remediation, real-time monitoring for particulates and VOCs was performed at one upwind and one downwind location.

4.1.5 Contractors Site Operations Plans (SOPs)

The Remediation Engineer reviewed all plans and submittals for this remedial project (i.e., those listed above plus contractor and subcontractor submittals) and confirmed that they were in compliance with the RAWP. All remedial documents were submitted to NYSDEC and NYSDOH in a timely manner and prior to the start of work.

4.1.6 Community Participation Plan

As part of the Market Basket environmental restoration process, a number of Citizen Participation activities were undertaken in an effort to inform and educate the public about conditions at the site and the potential remedial alternatives. The following public participation activities were conducted for the site:

- A Fact Sheet was mailed to announce the beginning of field work at the site for remedy implementation was issued in 2008.

- A Fact Sheet will be issued within 10 days of the issuance of the Certificate of Completion announcing that the City of Geneva has met the program requirements and the Certificate of Completion has been issued by the NYSDEC.

4.2 REMEDIAL PROGRAM ELEMENTS

4.2.1 Contractors and Consultants

The remedy implementation was conducted in two (2) phases by the following contractors and consultants:

- O'Brien & Gere – environmental consultant
- Plumley Engineering – environmental consultant
- Eddington Environmental – consultant
- John H. Kenyon Trucking, Inc.
  US Bulk Transport, Inc.
- Ontario County Landfill
- Envirite of Ohio, Inc.
- Life Sciences Laboratory
- Pace Laboratories
- Environmental Laboratory Services
- SGS Accutest
- Engineer of Record: Dave Meixell, P.E., Plumley Engineering, P.C.
- Paul R. Malcuria – imported topsoil
- Hanson Aggregates – imported fill
- Montemorano Brothers, Inc. – imported topsoil
- Dox's Finger Lakes Auto Recycling, Inc. – recycled hydraulic cylinder

4.2.2 Site Preparation

The remedial action (remedy implementation) was conducted in two (2) phases: 1st phase was from 2008 to 2014 and the 2nd phase was from September 2016 to December 2016.

Remedial Action Phase 1:

- A pre-construction meeting was held with NYSDEC and all contractors on August 11, 2008.

- Documentation of agency approvals required by the RAWP is included in Appendix D.

- All SEQRA requirements and all substantive compliance requirements for attainment of applicable natural resource or other permits were achieved during this Remedial Action.

- A NYSDEC-approved project sign was erected at the project entrance and remained in place during all phases of the Remedial Action.

Second Phase:

- A pre-construction meeting was held with NYSDEC and all contractors on July 29, 2016.

- Documentation of agency approvals required by the RAWP is included in Appendix D.

- All SEQRA requirements and all substantive compliance requirements for attainment of applicable natural resource or other permits were achieved during this Remedial Action.

4.2.3 General Site Controls

During both phases of the remedy implementation the following general site controls were implemented.

- The site was fully fenced during remedial activities to provide security and to protect the public.

- Job site record keeping was maintained in the City Engineer's office located in City Hall.

- Erosion and sediment controls were not required following the completion of remedial activities due to the level topography of the site. Silt fencing was however installed along the down gradient site boundaries to minimize potential impacts to stormwater.

- Lined decontamination structures were used to contain wash waters generated from equipment decontamination. The collected wash water was disposed at approved off-site disposal facilities.

- Field screening was conducted for all excavated soil/fill material during the remedial action. Field screening included visual and olfactory screening and the use of a PID to screen for residual VOCs with a screening value of 10 parts per million.

- Confirmation samples were collected following the completion of each excavation as per the RAWP to confirm site SCOs were obtained.

- Excavated soils were placed on polyethylene sheeting and covered until characterization and approval was received from the off-site landfill for disposal.

4.2.4 Nuisance controls

Site ingress and egress was controlled via locked gates located near the northwest corner of the north parcel and the east end of the south parcel. Remedial activities involving excavations occurred over single day periods, and excavated soils covered at the completion of each excavation. Fence gates were closed and locked at the end of each work day. Dust generation was monitored in compliance with the approved CAMP. The CAMP monitoring did not indicate the need for additional dust controls. Trucks removing excavated materials were covered prior to leaving the site. The City did not receive any complaints during the remedial activities.

4.2.5 CAMP results

Community Air Monitoring was performed during both phases of the remedial activities and the results of this monitoring are included in Appendix G. Exceedances of action levels were not encountered and response actions were not necessary.

4.2.6 Reporting

A digital photo log, a log is included in Appendix E.

4.3 CONTAMINATED MATERIALS REMOVAL

The first phase of remedial activities was conducted in accordance with the Remedial Action Work Plan dated June 2007. The second phase of remedial activities was conducted in accordance with the Supplemental RAWP dated June 2016.

A list of the soil cleanup objectives (SCOs) for the contaminants of concern for this project is provided in Table 1.

A figure of the location of original sources and areas where excavations were performed is shown in Figure 2 and Figure 6.

4.3.1 Contaminated Soil

Impacted Soil/Fill Material at

- **SB-2:** 622 cubic yards
- **Former Underground Storage Tank:** 170 cubic yards
- **Trench Area at the South Building:** 6 cubic yards

Phase 2 Remedial activities occurred at 1 locations noted on Figure 2 and Figure 6.

- **Removal of Hydraulic Cylinder:** 16 yards

4.3.1.1 Soil Disposal Details

Remedial Action Phase 1:

- Excavated soil/fill material was disposed from October 7, 2008 to October 14, 2008.
- The total quantities disposed off-site is 798 cubic yards.
  - Area of SB-2: 622 cubic yards
  - Area of Former UST: 170 cubic yards
  - Trench Area at South Building: 6 cubic yards
- The excavated soil/fill was disposed at the Ontario Landfill Facility located in Stanley, New York.
- Excavated soils were placed on, and covered with, polyethylene sheeting. Composite soil samples from the piles were collected and submitted for TCLP analyses of VOCs, SVOCs, and metals. Analytical results are summarized in Table 2 and full analytical results are included in Appendix F.
- The excavated soil/fill was transported by Kenyon Trucking (transport #8A-841).
- Letters from Applicant to disposal facility owners and acceptance letters from disposal facility owners are attached in Appendix F.
- Manifests and bills of lading are included in electronic format in Appendix F.

Remedial Action Phase 2:

- Excavated soil/fill material was disposed from November 17, 2016 to November 18, 2016.

- The total quantities disposed off-site is 16 cubic yards.

- The excavated soil/fill was disposed at Envirite of Ohio, Inc. located in Canton, Ohio.

- The initial near-surface soils that were excavated were placed in a pile designated as the “small pile.” Subsequent excavated soils were designated the “large pile.” One composite soil sample was collected from each pile and submitted for laboratory analyses as required by the disposal site. Waste characterization results are included in Appendix F and summarized in Table 2.

- The excavated soil was transported by US Bulk Transport, Inc. (U.S. EPA ID Number PAD 987 347 515).

- Letters from Applicant to disposal facility owners and acceptance letters from disposal facility owners are attached in Appendix F.

- Manifests and bills of lading are included in electronic format in Appendix F.

4.4 REMEDIAL PERFORMANCE/DOCUMENTATION SAMPLING

During each of the remedial action phases, the excavations were field screened (visual, olfactory, and screened with a PID). When field screening indicated that there was no evidence of impacts, end-point samples (confirmation samples) were collected from the excavation sidewalls and the excavation bottom based on the size of the excavation. The sidewall and bottom confirmation samples were analyzed for VOCs and SVOCs. In addition, soil samples from the former UST were analyzed for total lead, and samples from the trench area on the south block were analyzed for the following metals: beryllium, chromium, copper, iron, mercury, nickel, and zinc. The appropriate QA/QC samples were collected based on the QAPP. Analytical results of the confirmation samples indicates that there were no exceedances of Site’s SCOs at the two areas remediated on the north block (area around SB-2 and the former UST), or at the bottom samples collected from the trench area on the south block. These results are included in Table 3-1 and Appendix H. However, the four surface soil samples collected adjacent to the trench area at the south building exceeded Site SCOs for several SVOCs and metals. Additional soil was removed from this area, but subsequent confirmatory samples (SS-5, SS-6, SS-7 and SS-8) still marginally exceeded SCOs for the following compounds: benzo[a]anthracene, benzo[a]pyrene, benzo[b]fluoranthene, benzo[k]fluoranthene, chrysene, chromium, copper, mercury, nickel and zinc. These results are included in Table 3-1 and Appendix H. This area of the Site will be managed under the Site Management Plan.

A table and figure summarizing all end-point sampling is included in Table 3-1 and Figure 3, respectively, and all exceedances of SCOs are highlighted.

Data Usability Summary Reports (DUSRs) were prepared for all data generated in this remedial performance evaluation program. The DUSRs are included in Appendix I.

4.5 IMPORTED BACKFILL

Following the completion of the Remedial Actions Phase 1 and 2 excavations, the Site was restored to the existing grade with imported backfill material approved by NYSDEC. Prior to being accepted for use on the Site, the sources were sampled. Analytical results from the sampling are included in Tables 4-1, 4-2, and 4-3.

Remedial Action Phase 1:

- Area of SB-2: Approximately 622 cubic yards of imported fill from the Malcuria site was used to fill the excavation that resulted from the remedial excavation at the SB-2 location.

- Area of Former UST: Approximately 170 cubic yards of imported fill from the Malcuria site was used to fill the excavation that resulted from the remedial excavation at the former UST location.

- Trench Area at South Building: Approximately 6 cubic yards of imported fill from the Malcuria site was used to fill the excavation that resulted from the remedial excavation at the trench area at the South Building.

Approximately 1,100 yd^3 of topsoil was purchased by the City from Mr. Paul Malcuria and was stockpiled at the Site. The topsoil material originated from an agricultural field owned by Mr. Malcuria. The topsoil material was sampled to determine if it met the Site's SCOs for importation to the Site. Five grab samples of the topsoil were collected. The topsoil samples were analyzed for the full suite of analytical parameters – TCL VOCs, TCL SVOCs, TAL Metals, Cyanide, Pesticides, and PCBs. The analytical data indicated that the topsoil material met the Site's restricted commercial SOCs for all constituents. See Appendix L of this document for DER-10 Appendix 5 Allowable Constituent Levels for Imported Fill or Soil Subdivision 5.4(e).

In November and December of 2013, final grading was performed on the northern portion of the Site. An additional 2,600 yd^3 of sandy soil material was purchased from Hanson Aggregates' facility located in Oaks Corners, New York. The soil material was sampled to determine if the material met the Site's SCOs for importation to the Site. Two composite soil samples were collected. The soil samples were analyzed for the full suite of analytical parameters – TCL VOCs, TCL SVOCs, TAL Metals, Cyanide, Pesticides, and PCBs. The analytical data indicated that the soil material met the Site's restricted commercial SOCs for all constituents. The sandy soil material was used as a sub-base across the graded site. The previously purchased topsoil from Mr. Malcuria was placed on top of the sandy soil material purchased from Hanson Aggregates. The site was hydro-seeded in the spring of 2014 to establish a grass vegetative cover that has been maintained by the City of Geneva.

Remedial Action Phase 2:

- Hydraulic Cylinder Excavation: Approximately 6 cubic yards of imported fill from the Malcuria site was used to fill the excavation that resulted from the remedial excavation at the trench area at the South Building.

Approximately 500 yd^3 of topsoil was purchased by the City from Montemorano Brothers, Inc., a supplier of topsoil, sand and gravel. The topsoil material was sampled to determine if it met the Site's SCOs for importation to the Site. Six grab samples and two composite samples of the topsoil were collected. The topsoil samples were analyzed for the full suite of analytical parameters – TCL VOCs, TCL SVOCs, TAL Metals, Cyanide, Pesticides, and PCBs. The analytical data indicated that the topsoil material met the Site's restricted commercial SOCs for all constituents. See Appendix L of this document for DER-10 Appendix 5 Allowable Constituent Levels for Imported Fill or Soil Subdivision 5.4(e). A table of all sources of imported backfill with quantities for each source is shown in Table 3-2. Tables summarizing chemical analytical results for backfill, in comparison to allowable levels, are provided in Tables 4-1, 4-2 and 4-3. A figure showing the site locations where backfill was used at the site is shown in Appendix J.

Documentation of chemical analytical results for backfill, bills of lading, and NYSDEC approvals are provided in Appendix D and the DUSRs are located in Appendix I.

4.6 CONTAMINATION REMAINING AT THE SITE

After the completion of Remedial Action Phase 1 and Phase 2 there is contaminated soil and groundwater remaining at the Site. The confirmation sampling completed during the Remedial Action Phase 1 indicated that a limited area of near surface soils that exceeded restricted commercial SCOs remained at the north and south edges of the trench area that was remediated at the south building. This area was subsequently covered with soil cover cap. These exceedances, along with the restricted commercial SCOs and the unrestricted SCOs are included in Table 5 and included the following constituents: benzo[a]anthracene, benzo[a]pyrene, benzo[b]fluoranthene, chromium and copper.

Confirmatory samples from the Phase 2 remedial action indicate that Unrestricted SCOs and Restricted Commercial SCOs were met.

Table 5 summarize the results of all soil samples remaining at the Site after completion of Remedial Action Phase 1 and Phase 2 that exceed the Unrestricted Use SCOs and the Restricted Commercial SCOs.

Figure 3 presents the locations of the remaining soil contamination that exceed the Unrestricted Use SCOs and the restricted commercial SCOs after the completion of Remedial Action Phase 1 and Phase 2.

Table 6 presents the remaining groundwater contamination at the Site after the completion of Remedial Action Phase 1 and Phase 2.

Figure 5 presents the remaining groundwater monitoring wells and the groundwater flow direction at the Site.

Since contaminated soil and groundwater remains at the Site after completion of the Remedial Action Phase 1 and Phase 2, Institutional Controls (ICs) are required to protect human health and the environment. The ICs implemented at the Site are described in the following sections. Long-term management of these ICs and residual contamination will be performed under the Site Management Plan (SMP) approved by the NYSDEC.

4.7 ENGINEERING CONTROLS

The remedy for the site did not require the construction of any engineering control systems.

4.8 INSTITUTIONAL CONTROLS

The Site remedy requires that deed restriction be placed on the property to (1) prevent future exposure to remaining contamination by controlling disturbances of the subsurface contamination; and, (2) limit the use and development of the site to restricted commercial or industrial uses only.

The deed restriction for the Site was executed by the NYSDEC in 2013, and filed with the Ontario County Clerk on June 11, 2013. The County Recording Control number for this filing is 201306110068. Copies of the deed restrictions and proof of filing is provided in Appendix C.

4.9 DEVIATIONS FROM THE REMEDIAL ACTION WORK PLAN

The remedial actions resulted in the following deviations from the Remedial Action Work Plan:

- Monitoring well MW-3 was damaged during the demolition of the buildings and was replaced with MW-3R.

- Monitoring well MW-1 was also damaged during the building demolition and was replaced with MW-11.

- Monitoring well MW-10 was removed during the remedial excavation at the SB-2 area. Two additional wells, MW-12 and MW-13, were installed down gradient of the remedial excavation.

APPENDICES

APPENDIX A

SURVEY MAP, METES AND BOUNDS

SCHEDULE "A"

Description

CITY OF GENEVA - PARCEL A

All that tract or parcel of land situate in the City of Geneva, County of Ontario, State of New York. All of which is shown on a map prepared by David M. Clark, PLS #049807, entitled ***"Map Showing Lands Of City Of Geneva"*** Job #2815.00. Last dated April 8, 2013. Being more particularly described as follows.

Beginning at a point, marked by an iron pin, at the intersection of the apparent easterly line of Lehigh Street and the apparent northerly line of Gates Avenue. Thence the following four (4) courses and distances.

1. Thence, N 00° 51' 50" W along the apparent easterly line of Lehigh Street a distance of 320.00 feet to a point, marked by an iron pin;

2. Thence, N 89° 08' 05" E along the southerly line of lands of the City of Geneva (L. 1106 P. 981) (Avenue E – Paper Street) a distance of 250.00 feet to a point, marked by an iron pin;

3. Thence, S 00° 51' 50" E along the westerly line of lands of the Ontario County IDA – Finger Lakes Railway (L. 956 P.501) (Ontario Street – Paper Street) a distance of 320.00 feet to a point, marked by an iron pin, in the apparent northerly line of Gates Avenue;

4. Thence, S 89° 08' 05" W along the apparent northerly line of Gates Avenue a distance of 250.00 feet back to the point of beginning.

Containing 80,000± Sq. Ft. or 1.837 Acres of land.

Subject to easements, rights of way or encumbrances of record, if any.

Intending to describe the lands conveyed to the City of Geneva by deed dated April 26, 1988 and recorded in the Ontario County Clerk's Office in liber 873 of deeds, page 783.

SCHEDULE "A"

Description

CITY OF GENEVA - PARCEL B

All that tract or parcel of land situate in the City of Geneva, County of Ontario, State of New York. All of which is shown on a map prepared by David M. Clark, PLS #049807, entitled ***"Map Showing Lands Of City Of Geneva"*** Job #2815.00. Last dated April 8, 2013. Being more particularly described as follows.

Beginning at a point, marked by an iron pipe, at the intersection of the apparent easterly line of Lehigh Street and the apparent southerly line of Gates Avenue. Thence the following six (6) courses and distances.

1. Thence, N 89° 08' 05" E along the apparent southerly line of Gates Avenue a distance of 309.31 feet to a point, marked by an iron pin;
2. Thence, S 00° 53' 00" E along the lands of the City of Geneva IDA (L. 1014 P. 805) (Ontario Street – Paper Street) a distance of 83.50 feet to a point;
3. Thence, S 89° 15' 44" W along the northerly line of lands of The Cracker Factory, Inc. (L. 1194 P. 415) a distance of 151.83 feet to a point;
4. Thence, S 00° 56' 16" E along the lands of The Cracker Factory, Inc. (L. 1194 P. 415) a distance of 12.78 feet to a point;
5. Thence, S 89° 03' 44" W along the northerly line lands of The Cracker Factory, Inc. (L. 1194 P. 415) a distance of 157.49 feet to a point, marked by an iron pin, in the apparent easterly line of Lehigh Street;
6. Thence, N 00° 53' 00" W along the apparent easterly line of Lehigh Street a distance of 96.14 back to the point of beginning.

Containing 27,777± Sq. Ft. or 0.638 Acres of land.

Subject to easements, rights of way or encumbrances of record, if any.

Intending to describe the lands conveyed to the City of Geneva by deed dated April 26, 1988 and recorded in the Ontario County Clerk's Office in liber 873 of deeds, page 786.

Abstract of Title

No abstract of title was provided. An abstract would include items (such as easements, right of ways, agreements, etc.) that could possibly have an effect on the title. This survey is subject to facts that a full and up to date title search would include.

Only copies from the original of this survey bearing the signature and the inked surveyors inked seal (RED INK ONLY) or embossed seal shall be considered as true and valid copies.

Certifications indicated hereon, unless otherwise indicated, signify that this survey was prepared in accordance with the existing code of practice for land surveys as adopted by the NEW YORK STATE ASSOCIATION OF PROFESSIONAL LAND SURVEYORS, the GENESEE VALLEY LAND SURVEYORS ASSOCIATION and the MONROE COUNTY BAR ASSOCIATION. Said certifications shall be valid only to the party for whom the survey was prepared, and on that party's behalf to title company, governmental agency and lending institution listed hereon for mortgage proposed for said party for whom the survey was prepared. Certifications are not transferable to additional institutions or subsequent owners than as may be expressly stated hereon.

I, David M. Clark, PLS hereby certify that this map was prepared on APRIL 8, 2013 from notes of an instrument survey completed on MARCH 18, 2013 and from various references listed hereon. No search was made for any easements, restrictions or encumbrances affecting this property other than those found in the references.

DECLARATION of COVENANTS and RESTRICTIONS

THIS COVENANT is made the 8th day of May 2013, by City of Geneva, New York, a municipal corporation and having an office for the transaction of business at 47 Castle Street, Geneva, New York 14456.

WHEREAS, Market Basket Site is the subject of a State Assistance Contract executed by the City of Geneva as part of the New York State Department of Environmental Conservation's (the "Department's) Environmental Restoration Program, namely that parcel of real property located at the address of 63 Gates Avenue – North & South Side and Lehigh Street in the City of Geneva, County of Ontario, State of New York, being part of lands conveyed by William E. Yalden to City of Geneva by deed dated April 26, 1988 and recorded in Liber 873 at Page 783 [North Side] known and designated on the tax map of the County Clerk of Ontario as tax map parcel numbers: Block 16 Lot(s) 286 & 312A and deed dated April 26, 1988 and recorded in Liber 873 at page 786 [South Side] in the Ontario County Clerk's Office, and being more particularly described in Appendix "A," attached to this declaration and made a part hereof, and hereinafter referred to as "the Property"; and

WHEREAS, the Department approved a remedy to eliminate or mitigate all significant threats to the environment presented by the contamination disposed at the Property and such remedy requires that the Property be subject to restrictive covenants.

NOW, THEREFORE, City of Geneva, New York, for itself and its successors and/or assigns, covenants that:

First, the Property subject to this Declaration of Covenants and Restrictions is as shown on a map attached to this declaration as Appendix "B" and made a part hereof.

Second, unless prior written approval by the Department or, if the Department shall no longer exist, any New York State agency or agencies subsequently created to protect the environment of the State and the health of the State's citizens, hereinafter referred to as "the Relevant Agency," is first obtained, where contamination remains at the Property subject to the provisions of the Site Management Plan ("SMP"), there shall be no construction, use or occupancy of the Property that results in the disturbance or excavation of the Property which threatens the integrity of the engineering controls or which results in unacceptable human exposure to contaminated soils. The SMP may be obtained from the New York State Department of Environmental Conservation, Division of Environmental Remediation, Site Control Section, 625 Broadway, Albany, NY 12233.

Third, the owner of the Property shall not disturb, remove, or otherwise interfere with the installation, use, operation, and maintenance of engineering controls required for the Remedy, which are described in the SMP, unless in each instance the owner first obtains a written waiver of such prohibition from the Department or Relevant Agency.

Fourth, the owner of the Property shall prohibit the Property from ever being used for purposes other than for Commercial or Industrial use as defined in 6 NYCRR Part 375 1.8 (g) (2) (iii) & (iv) without the express written waiver of such prohibition by the Department or Relevant Agency.

Fifth, the owner of the Property shall prohibit the use of the groundwater underlying the Property without treatment rendering it safe for drinking water or industrial purposes, as appropriate, unless the user first obtains permission to do so from the Department or Relevant Agency

Sixth, the owner of the Property shall provide a periodic certification, prepared and submitted by a professional engineer or environmental professional acceptable to the Department or Relevant Agency, which will certify that the institutional and engineering controls put in place are unchanged from the previous certification, comply with the SMP, and have not been impaired.

Seventh, the owner of the Property shall continue in full force and effect any institutional and engineering controls required for the Remedy and maintain such controls, unless the owner first obtains permission to discontinue such controls from the Department or Relevant Agency, in compliance with the approved SMP, which is incorporated and made enforceable hereto, subject to modifications as approved by the Department or Relevant Agency.

Eighth, this Declaration is and shall be deemed a covenant that shall run with the land and shall be binding upon all future owners of the Property, and shall provide that the owner and its successors and assigns consent to enforcement by the Department or Relevant Agency of the prohibitions and restrictions that the State Assistance Contract requires to be recorded, and hereby covenant not to contest the authority of the Department or Relevant Agency to seek enforcement.

Ninth, any deed of conveyance of the Property, or any portion thereof, shall recite, unless the Department or Relevant Agency has consented to the termination of such covenants and restrictions, that said conveyance is subject to this Declaration of Covenants and Restrictions.

IN WITNESS WHEREOF, the undersigned has executed this instrument the day written below.

Alexander B. Grannis
Commissioner

March 7, 2008

Mr. Gordon Eddington
Director of Public Works
Engineering Department
City Hall
47 Castle Street
Geneva, NY 14456

Re: Remedial Action Work Plan
Market Basket ERP Site (B00018-8)
Geneva (C), Ontario (Co)

Dear Mr. Eddington:

The New York State Department of Environmental Conservation (NYSDEC), in consultation with the New York State Department of Health (NYSDOH), has completed its review of the June 2007 Remedial Action Work Plan (RAWP) and November 2007 Health and Safety Plan (HASP) for the subject property. The Department is providing the following modifications to the RAWP:

1. Section 3. Location and Description of Construction Activities - Since marginally elevated levels of chlorobenzenes remaining in soils at a depth of 15-16 feet below grade in boring SB-2 may act as a continuing source to groundwater, the excavation to remove the contaminated soil in this area is to extend to a minimum depth of 20 feet below grade.

2. Section 3. Location and Description of Construction Activities - As part of the excavation of impacted soils in the area of SB-2, it is understood that monitoring well MW-10 is likely to be damaged or removed. Two new groundwater monitoring wells are to be installed in locations immediately downgradient of this excavation area after it is complete. Based on the groundwater elevation contours provided, this would likely include locations to the north and south of the excavation area. An additional round of groundwater elevation data is to be collected for confirmation of groundwater flow prior to implementing the excavation work. Proposed monitoring well locations, in relation to the excavation area and groundwater elevation contours, are to be provided for approval prior to installation of these wells. The groundwater monitoring wells are to be installed and developed in accordance with procedures outlined in the July 2003 Sampling Plan for Pre-Design Remedial Investigation.

3. Section 3. Location and Description of Construction Activities - A round of groundwater samples is to be collected from all existing and new monitoring wells at the site after a minimum period of two weeks following development of the new monitoring wells. Low-flow groundwater sampling is to be performed in accordance with procedures outlined in the July 2003 Sampling Plan for Pre-Design Remedial Investigation. Groundwater samples are to be analyzed for TCL VOCs and SVOCs.

4. Section 3. Location and Description of Construction Activities - Access to staged soil needs to be limited by the use of appropriate site security measures, such as fencing and signage. In addition, contaminant run-off from the staged soils to the ground surface is to be prevented. The duration the soil is to remain at the site should be minimized to the extent possible to mitigate these concerns.

5. Section 6. Confirmation Sampling and Site Restoration Plan - As described in Section 3.2, six confirmatory soil samples are to be collected in association with the former trench area excavation (rather than the 5 samples noted in this section for other excavation areas). Additional confirmatory soil samples may be required following removal of piping that is associated with the former tank pit and trench areas in accordance with Section 3.9(a) 5 of the Draft DER 10 Technical Guidance Document.

6. Section 10. Institutional Controls to be Implemented - In addition to the items noted, the Site Management Plan (SMP) is to include the Operation, Maintenance and Monitoring Program as discussed in Section 11. Rather than deed restrictions, the Department prefers that institutional controls be provided in the form of an environmental easement (a boilerplate example is attached for future use).

7. The NYSDOH Community Air Monitoring Plan, which is found in Appendix 1A to Draft DER 10 and is attached, is to be considered part of the final RAWP. It is to be implemented and strictly adhered to during all ground intrusive fieldwork associated with the project.

8. Prior to the start of the remedial work, a sign is to be posted at the site in accordance with the attached specifications.

Please notify the Department in writing within 30 days of receipt of this letter as to your acceptance of these modifications. If accepting the modifications, this letter is to be attached to and become part of the final approved Remedial Action Work Plan. Please provide this office with a minimum notice of one week prior to implementing any fieldwork under the approved work plan. The Department will issue a fact sheet prior to the start of fieldwork. If you should have any questions, I can be reached at (585) 226-5356 or via email at gbmaclea@gw.dec.state.ny.us.

Sincerely,

Gregory B. MacLean, P.E.

THIS INDENTURE made this ____day of _____, 20 __, between ***Name of title owner(s) of the site*** residing at (or having an office at) ***Title owner's address - no PO Boxes***, (the "Grantor"), and The People of the State of New York (the "Grantee."), acting through their Commissioner of the Department of Environmental Conservation (the "Commissioner", or "NYSDEC" or "Department" as the context requires) with its headquarters located at 625 Broadway, Albany, New York 12233,

WHEREAS, the Legislature of the State of New York has declared that it is in the public interest to encourage the remediation of abandoned and likely contaminated properties ("brownfield sites") that threaten the health and vitality of the communities they burden while at the same time ensuring the protection of public health and the environment; and

WHEREAS, the Legislature of the State of New York has declared that it is in the public interest to establish within the Department a statutory environmental remediation program that includes the use of environmental easements as an enforceable means of ensuring the performance of maintenance, monitoring or operation requirements and of ensuring the potential restriction of future uses of the land, when an environmental remediation project leaves residual contamination at levels that have been determined to be safe for a specific use, but not all uses, or which includes engineered structures that must be maintained or protected against damage to be effective, or which requires groundwater use restrictions; and

WHEREAS, the Legislature of the State of New York has declared that environmental easement shall mean an interest in real property, created under and subject to the provisions of Article 71, Title 36 of the New York State Environmental Conservation Law ("ECL") which contains a use restriction and/or a prohibition on the use of land in a manner inconsistent with engineering controls which are intended to ensure the long term effectiveness of a brownfield site remedial program or eliminate potential exposure pathways to hazardous waste or petroleum; and;

WHEREAS, Grantor, is the owner of real property located in the City/Town/Village of _____, _____County, New York known and designated on the tax map of the _____ of _____ as ***insert tax map information***, being the same as that property conveyed to Grantor by deed on _____, and recorded in the Land Records of the _____ County Clerk at ***insert Liber and page or computerized system tracking/ identification number***, comprised of approximately ***#*** acres, and hereinafter more fully described in Schedule A attached hereto and made a part hereof (the " Controlled Property"); and;
Attach an adequate legal description of the property subject to the easement, or reference a recorded map. If the easement is on only a part of a parcel of land which is not subdivided into encumbered and unencumbered portions, a legal description needs to be created by a survey bearing the seal and signature of a licensed land surveyor with reference to a metes and bounds description.

WHEREAS, the Commissioner does hereby acknowledge that the Department accepts this

Environmental Easement in order to ensure the protection of human health and the environment and to achieve the requirements for remediation established at this Controlled Property until such time as this Environmental Easement is extinguished pursuant to ECL Article 71, Title 36;and

NOW THEREFORE, in consideration of the covenants and mutual promises contained herein and the terms and conditions of (**STRIKE INAPPROPRIATE REFERENCE) Brownfield Cleanup Agreement Number_____/State Assistance Contract Number_____/Order on Consent Number_____**, Grantor grants, conveys and releases to Grantee a permanent Environmental Easement pursuant to Article 71, Title 36 of the ECL in, on, over, under, and upon the Controlled Property as more fully described herein ("Environmental Easement").

1. Purposes. Grantor and Grantee acknowledge that the Purposes of this Environmental Easement are: to convey to Grantee real property rights and interests that will run with the land in perpetuity in order to provide an effective and enforceable means of encouraging the reuse and redevelopment of this Controlled Property at a level that has been determined to be safe for a specific use while ensuring the performance of maintenance, monitoring or operation requirements; and to ensure the potential restriction of future uses of the land that are inconsistent with the above-stated purpose.

2. Institutional and Engineering Controls. The following controls apply to the use of the Controlled Property, run with the land are binding on the Grantor and the Grantor's successors and assigns, and are enforceable in law or equity against any owner of the Controlled Property, any lessees, and any person using the Controlled Property:

A. The Controlled Property may be used for **STRIKE INAPPROPRIATE LANGUAGE residential/commercial/industrial use as long as the following the long-term engineering controls are employed:**

STATE THE CONTROLS. FOR EXAMPLE:

(i) any soil on the property must be covered by a demarcation layer and a barrier layer approved by NYSDEC such as concrete, asphalt or structures or must be covered with a _____layer of clean soil and this demarcation layer and barrier layer must be maintained; and

(ii) any proposed soil excavation on the property below the _____ cover or below the demarcation layer requires prior notification and prior approval of NYSDEC in accordance with the Site Management Plan approved by NYSDEC for this Controlled Property and the excavated soil must be managed, characterized, and properly disposed of in accordance with NYSDEC regulations and directives.

B. The Controlled Property may not be used for a higher level of use such as **STRIKE INAPPROPRIATE LANGUAGE residential/commercial use** and the above-stated engineering controls may not be discontinued without an amendment or extinguishment of this Environmental Easement.

C. Grantor covenants and agrees that until such time as the Environmental Easement is extinguished in accordance with the requirements of Article 71, Title 36 of the ECL, the property deed and all subsequent instruments of conveyance relating to the Controlled Property shall state in at least fifteen-point bold-faced type:

This property is subject to an environmental easement held by the New York State Department of Environmental Conservation pursuant of Title 36 to Article 71 of the Environmental Conservation Law.

C. Grantor covenants and agrees that this Environmental Easement shall be incorporated in full or by reference in any leases, licenses, or other instruments granting a right to use the Controlled Property.

D. Grantor covenants and agrees that it shall annually, or such time as NYSDEC may allow, submit to NYSDEC a written statement by an expert the NYSDEC may find acceptable certifying under penalty of perjury that the controls employed at the Controlled Property are unchanged from the previous certification or that any changes to the controls employed at the Controlled Property were approved by the NYSDEC, and that nothing has occurred that would impair the ability of such control to protect the public health and environment or constitute a violation or failure to comply with any Site Management Plan for such controls and giving access to such Controlled Property to evaluate continued maintenance of such controls.

3. Right to Enter and Inspect. Grantee, its agents, employees, or other representatives of the State may enter and inspect the Controlled Property in a reasonable manner and at reasonable times to assure compliance with the above-stated restrictions.

4. Reserved Grantor's Rights. Grantor reserves for itself, its assigns, representatives, and successors in interest with respect to the Property, all rights as fee owner of the Controlled Property, including:

1. Use of the Controlled Property for all purposes not inconsistent with, or limited by the terms of this Environmental Easement;

2. The right to give, sell, assign, or otherwise transfer the underlying fee interest to the Controlled Property by operation of law, by deed, or by indenture, subject and subordinate to this

Environmental Easement;

5. Enforcement.

A. This environmental easement is enforceable in law or equity in perpetuity by Grantor, Grantee, or any affected local government, as defined in ECL Section 71-3603, against the owner of the Property, any lessees, and any person using the land. Enforcement shall not be defeated because of any subsequent adverse possession, laches, estoppel, or waiver. It is not a defense in any action to enforce this environmental easement that: it is not appurtenant to an interest in real property; it is not of a character that has been recognized traditionally at common law; it imposes a negative burden; it imposes affirmative obligations upon the owner of any interest in the burdened property; the benefit does not touch or concern real property; there is no privity of estate or of contract; or it imposes an unreasonable restraint on alienation.

B. If any person intentionally violates this environmental easement, the Grantee may revoke the Certificate of Completion provided under ECL Article 27, Title 14, or the Satisfactory Completion of Project provided under ECL Article 56, Title 5 with respect to the Controlled Property.

C. Grantee shall notify Grantor of a breach or suspected breach of any of the terms of this Environmental Easement. Such notice shall set forth how Grantor can cure such breach or suspected breach and give Grantor a reasonable amount of time from the date of receipt of notice in which to cure. At the expiration of such period of time to cure, or any extensions granted by Grantee, the Grantee shall notify Grantor of any failure to adequately cure the breach or suspected breach. Grantor shall then have a reasonable amount of time from receipt of such notice to cure. At the expiration of said second period, Grantee may commence any proceedings and take any other appropriate action reasonably necessary to remedy any breach of this Environmental Easement in accordance with applicable law to require compliance with the terms of this Environmental Easement.

D. The failure of Grantee to enforce any of the terms contained herein shall not be deemed a waiver of any such term nor bar its enforcement rights in the event of a subsequent breach of or noncompliance with any of the terms of this Environmental easement.

6. Notice. Whenever notice to the State (other than the annual certification) or approval from the State is required, the Party providing such notice or seeking such approval shall identify the Controlled Property by referencing the its County tax map number or the Liber and Page or computerized system tracking/ identification number and address correspondence to:

Division of Environmental Enforcement
Office of General Counsel
New York State Department of Environmental Conservation
625 Broadway
Albany New York 12233-5500

Such correspondence shall be delivered by hand, or by registered mail or by Certified mail and return receipt requested. The Parties may provide for other means of receiving and communicating notices and responses to requests for approval.

7. Recordation. Grantor shall record this instrument, within thirty (30) days of execution of this instrument by the Commissioner or her/his authorized representative in the office of the recording officer for the county or counties where the Property is situated in the manner prescribed by Article 9 of the Real Property Law.

8. Amendment. This environmental easement may be amended only by an amendment executed by the Commissioner of the New York State Department of Environmental Conservation and filed with the office of the recording officer for the county or counties where the Property is situated in the manner prescribed by Article 9 of the Real Property Law.

9. Extinguishment. This environmental easement may be extinguished only by a release by the Commissioner of the New York State Department of Environmental Conservation and filed with the office of the recording officer for the county or counties where the Property is situated in the manner prescribed by Article 9 of the Real Property Law.

10. Joint Obligation. If there are two or more parties identified as Grantor herein, the obligations imposed by this instrument upon them shall be joint and several.

11. Costs and Liabilities. Grantor shall retain all responsibilities and shall bear all costs and liabilities of any kind related to the ownership, operation, upkeep, and maintenance of the Property, including but not limited to the obligation to maintain adequate liability insurance coverage.

12. Taxes. Grantor shall pay before delinquency all taxes, assessments, fees, and charges of whatever description levied on or assessed against the Property by competent authority.

13. Successors. The term “Grantor”, wherever used herein, shall include the persons and/or entities named at the beginning of this document, identified as "Grantor" and their personal representatives, heirs, successors, and assigns.

14. Compliance with Law. This Environmental easement shall not remove the necessity of Grantor to obtain any permit and/or approval from any governmental agency having jurisdiction over any activity conducted or to be conducted on the Controlled Property.

IN WITNESS WHEREOF, Grantor has caused this instrument to be signed in its name.

Generic Community Air Monitoring Plan

A Community Air Monitoring Plan (CAMP) requires real-time monitoring for volatile organic compounds (VOCs) and particulates (i.e., dust) at the downwind perimeter of each designated work area when certain activities are in progress at contaminated sites. The CAMP is not intended for use in establishing action levels for worker respiratory protection. Rather, its intent is to provide a measure of protection for the downwind community (i.e., off-site receptors including residences and businesses and on-site workers not directly involved with the subject work activities) from potential airborne contaminant releases as a direct result of investigative and remedial work activities. The action levels specified herein require increased monitoring, corrective actions to abate emissions, and/or work shutdown. Additionally, the CAMP helps to confirm that work activities did not spread contamination off-site through the air.

The generic CAMP presented below will be sufficient to cover many, if not most, sites. Specific requirements should be reviewed for each situation in consultation with NYSDOH to ensure proper applicability. In some cases, a separate site-specific CAMP or supplement may be required. Depending upon the nature of contamination, chemical-specific monitoring with appropriately-sensitive methods may be required. Depending upon the proximity of potentially exposed individuals, more stringent monitoring or response levels than those presented below may be required. Special requirements will be necessary for work within 20 feet of potentially exposed individuals or structures and for indoor work with co-located residences or facilities. These requirements should be determined in consultation with NYSDOH.

Reliance on the CAMP should not preclude simple, common-sense measures to keep VOCs, dust, and odors at a minimum around the work areas.

Community Air Monitoring Plan

Depending upon the nature of known or potential contaminants at each site, real-time air monitoring for volatile organic compounds (VOCs) and/or particulate levels at the perimeter of the exclusion zone or work area will be necessary. Most sites will involve VOC and particulate monitoring; sites known to be contaminated with heavy metals alone may only require particulate monitoring. If radiological contamination is a concern, additional monitoring requirements may be necessary per consultation with appropriate NYSDEC/NYSDOH staff.

Continuous monitoring will be required for all ground intrusive activities and during the demolition of contaminated or potentially contaminated structures. Ground intrusive activities include, but are not limited to, soil/waste excavation and handling, test pitting or trenching, and the installation of soil borings or monitoring wells.

Periodic monitoring for VOCs will be required during non-intrusive activities such as the collection of soil and sediment samples or the collection of groundwater samples from existing monitoring wells. "Periodic" monitoring during sample collection might reasonably consist of taking a reading upon arrival at a sample location, monitoring while opening a well cap or overturning soil, monitoring during well baling/purging, and taking a reading prior to leaving a sample location. In some instances, depending upon the proximity of potentially exposed individuals, continuous monitoring may be required during sampling activities. Examples of such situations include groundwater sampling at wells on the curb of a busy urban street, in the midst of a public park, or adjacent to a school or residence.

VOC Monitoring, Response Levels, and Actions

Volatile organic compounds (VOCs) must be monitored at the downwind perimeter of the immediate work area (i.e., the exclusion zone) on a **continuous** basis or as otherwise specified. Upwind concentrations should be measured at the start of each workday and periodically thereafter to establish background conditions. The monitoring work should be performed using equipment appropriate to measure the types of contaminants known or suspected to be present. The equipment should be calibrated at least daily for the contaminant(s) of concern or for an appropriate surrogate. The equipment should be capable of calculating 15-minute running average concentrations, which will be compared to the levels specified below.

- If the ambient air concentration of total organic vapors at the downwind perimeter of the work area or exclusion zone exceeds 5 parts per million (ppm) above background for the 15-minute average, work activities must be temporarily halted and monitoring continued. If the total organic vapor level readily decreases (per instantaneous readings) below 5 ppm over background, work activities can resume with continued monitoring.

- If total organic vapor levels at the downwind perimeter of the work area or exclusion zone persist at levels in excess of 5 ppm over background but less than 25 ppm, work activities must be halted, the source of vapors identified, corrective actions taken to abate emissions, and monitoring continued. After these steps, work activities can resume provided that the total organic vapor level 200 feet downwind of the exclusion zone or half the distance to the nearest potential receptor or residential/commercial structure, whichever is less - but in no case less than 20 feet, is below 5 ppm over background for the 15-minute average.

- If the organic vapor level is above 25 ppm at the perimeter of the work area, activities must be shutdown.

All 15-minute readings must be recorded and be available for State (DEC and DOH) personnel to review. Instantaneous readings, if any, used for decision purposes should also be recorded.

Particulate Monitoring, Response Levels, and Actions

Particulate concentrations should be monitored **continuously** at the upwind and downwind perimeters of the exclusion zone at temporary particulate monitoring stations. The particulate monitoring should be performed using real-time monitoring equipment capable of measuring particulate matter less than 10 micrometers in size (PM-10) and capable of integrating over a period of 15 minutes (or less) for comparison to the airborne particulate action level. The equipment must be equipped with an audible alarm to indicate exceedance of the action level. In addition, fugitive dust migration should be visually assessed during all work activities.

- If the downwind PM-10 particulate level is 100 micrograms per cubic meter (mcg/m^3) greater than background (upwind perimeter) for the 15-minute period or if airborne dust is observed leaving the work area, then dust suppression techniques must be employed. Work may continue with dust suppression techniques provided that downwind PM-10 particulate levels do not exceed 150 mcg/m^3 above the upwind level and provided that no visible dust is migrating from the work area.

- If, after implementation of dust suppression techniques, downwind PM-10 particulate levels are greater than 150 mcg/m^3 above the upwind level, work must be stopped and a re-evaluation of activities initiated. Work can resume provided that dust suppression measures and other controls are successful in reducing the downwind PM-10 particulate concentration to within 150 mcg/m^3 of the upwind level and in preventing visible dust migration.

All readings must be recorded and be available for State (DEC and DOH) personnel to review.

June 20, 2000

SITE SIGNS FOR REMEDIAL PROGRAMS

Instructions

Signs are required at sites where remedial actions are being performed under one of the following remedial programs: State Superfund, Voluntary Cleanup Program (VCP), Brownfield Cleanup Program (BCP), and Environmental Restoration Program (ERP). They will not be required during the investigation and design phases. The cost of the sign will be borne by the parties performing the remedial action based on the legal document the activities are being performed under (i.e. volunteers/participants would pay 100% of the cost under the BCP; municipalities would pay 100% and then would be reimbursed for the cost under the ERP).

Sign Requirements

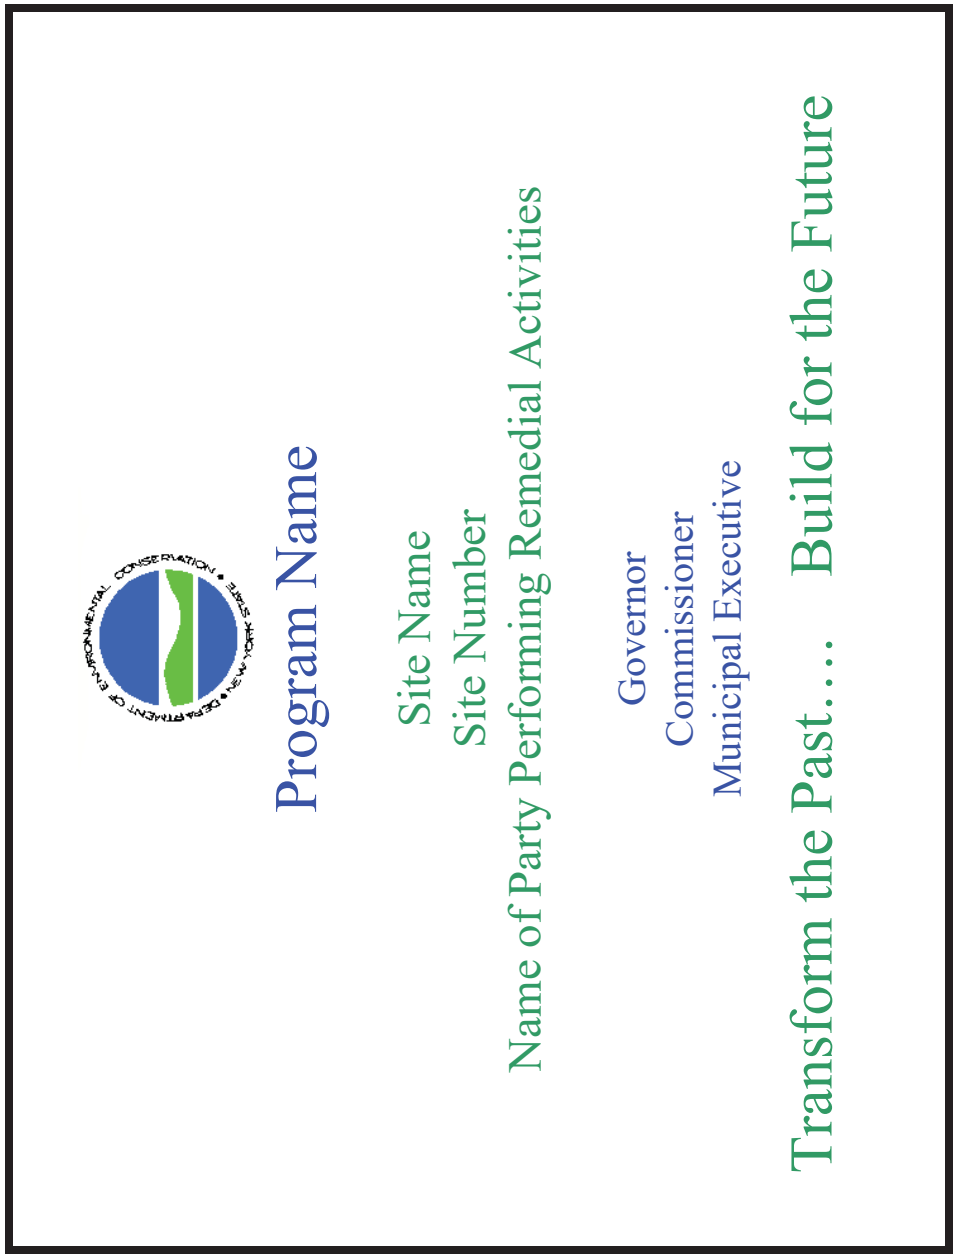
Size: **Horizontal format - 96" wide by 48" high**

Construction Materials: **Aluminum or wood blank sign boards with vinyl sheeting.**

Inserts: **"Site Name", "Site Number", "Name of Party Performing Remedial Activities" and "Municipal Executive".**
Indicate position, size and topography for specific inserts.

Color Scheme: **Copy surrounding DEC logo - "NEW YORK STATE DEPARTMENT OF ENVIRONMENTAL CONSERVATION" - PMS 355**

DEC logo: **PMS 301 Blue**
PMS 355 Green



Text:

Program (choose one):	**PMS 301**
Brownfield Cleanup Program	
Voluntary Cleanup Program	
State Superfund Program	
1996 Clean Water/Clean Air Bond Act - Environmental Restoration Program	
Site Name, Site Number, Party Performing Remedial Activities	**PMS 355**
Names of Governor, Commissioner, Municipal Executive	**PMS 301**
Transform the Past.....Build for the Future	**PMS 355**

Type Specifications: **All type is Caslon 540, with the exception of the logotype.**
Format is: center each line of copy with small caps and initial caps.

Production Notes: **96" wide x 48" high aluminum blanks will be covered with vinyl sheeting to achieve background color. Copy and logo will be silk screened on this surface.**

See attached format

Matthew Horn
City of Geneva City Manager
City Hall, 47 Castle Street
Geneva, New York 14456

Re: Remedial Action Work Plan Addendum
Market Basket Site
Site No. B00018
Geneva (C), Ontario (C)

Dear Mr. Horn:

The New York State Department of Environmental Conservation (the Department) has completed its review of the Remedial Action Work Plan Addendum dated April 2016, the Health and Safety Plan dated July 2016, and the site plan figure dated July 2016 (the 3 documents collectively known as the Addendum) for Market Basket site (Site) located at corner of Gates Avenue and Lehigh Street in the City of Geneva, Ontario County. Based on the information presented in the Addendum, the Addendum is conditionally approved with the following modifications and clarifications.

1. The Department understands that a utility clearance will be completed at the Site prior to any ground intrusive activities.

2. The Department understands that the soil/fill material will be staged on-site on 12 mil poly sheeting. The Department is amendable to having the soil/fill material direct loaded into trucks and/or roll-offs. If the roll-offs and/or staged soil piles remain on-site then the roll-offs and/or staged soil piles will be covered with 12 mil poly sheeting daily to prevent precipitation and wind erosion.

3. The Department understands that each bucket of soil/fill material will be screened with a photoionization detector (PID) and will also be screened for evidence of impacts (visual and olfactory). The PID screening level will be 10 parts per million (ppm).

4. The Department understands that the soil/fill material will be screened and staged as follows:
   - Less than or equal to 10 ppm PID reading and showing no evidence of impacts (visual and odor) will be staged on and covered with 12 mil poly sheeting.
   - Greater than 10 ppm PID reading and/or showing evidence of impacts (visual impacts or odor) will be staged on and covered with 12 mil poly sheeting.

5. The Department understands that the staged soil/fill material that is less than or equal to 10 ppm PID reading and no evidence of impacts (visual and olfactory) can be placed back in the excavation as backfill material but must be placed below the cover system (i.e., placed at a depth greater than 1 foot below ground surface).

6. The Department understands that the staged soil/fill material that has PID readings greater than 10 ppm and/or has evidence of impacts (visual or olfactory) will be disposed off-site at a permitted landfill facility in accordance with all local, state, and federal regulations.

7. The Department understands that all grossly contaminated as well as any soil/fill material showing evidence of impacts (PID, visual, olfactory) will be excavated the extent feasible (e.g., up to the property boundary) and disposed off-site at a permitted landfill facility in accordance with all local, state, and federal regulations.

8. The Department understands that if excavation water (groundwater or precipitation) is encountered then the excavation water will be containerized, characterized, and disposed off-site at a permitted facility in accordance with all local, state, and federal regulations. If the excavation water is to be discharged to a sanitary sewer system all proper permits and approvals must be obtained. Prior to any discharges to the sanitary sewer, a copy of all approvals and permits must be submitted to the Department's project manager.

9. The Department understands that all liquids associated with the elevator cylinder and the ancillary piping (free and decontamination liquids) will be containerized, characterized, and will be disposed off-site at a permitted facility.

10. The Department understands that if concrete material (e.g., footers, slabs) is encountered or removed as part of the excavation activities the concrete material will be staged on and covered with 12 mil poly sheeting. The concrete material visual inspected. If the concrete material shows no evidence of impacts (visual and/or olfactory) then the concrete material could be recycled at a concrete recycling facility. If the concrete material shows any evidence of impacts (visual and/or olfactory) then the concrete material must be disposed off-site at a permitted landfill facility in accordance with all local, state, and federal regulations.

11. The Department understands that once the elevator cylinder and any ancillary piping/equipment has been removed from the excavation the documentation/confirmation sampling completed in accordance with DER-10 Section 5.4(b). The sample collection location will be biased towards that showing elevated PID readings or evidence of impacts (visual and olfactory). The Department understands that the documentation/confirmation soil samples will be analyzed for Target Compound List (TCL) volatile organic compounds (VOCs) plus tentatively identified compounds (TICs), TCL semi-volatile organic compounds (SVOCs), and PCBs.

    If the backfilling of the excavation is contingent upon the laboratory analytical results then the Department would suggest a rapid turnaround on the analysis of the documentation/confirmatory soil/fill samples collected from the excavation.

12. The Department understands that the laboratory data package will be Analytical Services Protocol (ASP) Category B data deliverables. The laboratory data package will have a data usability summary report (DUSR) completed in accordance with DER-10 Section 2.0 and Appendix 2B of DER-10.

13. The Department understands that all data deliverables will be submitted in an electronic data deliverable (EDD) that complies with the Department's Electronic Data Warehouse Standards (EDWS). Additional information relevant the EDD and EDWS can be found on the Department's public website: http://www.dec.ny.gov/chemical/62440.html

14. The Department understands that the excavation will be backfilled to meet the existing grade of the Site. The Department also understands that the backfill material imported to the Site will be in accordance with DER-10 Section 5.4(e). Department approval for backfill material must be obtained prior to importation to the Site. Attached is the Request to Import/Reuse Fill or Soil form (hard copy and electronic) to be used to obtain approval for the reuse or importation of backfill material to the Site. Please use this form when submitting a request for Department's approval of backfill material. It must be noted that the soil material must be sampled to demonstrate that soil material meets the Site's soil cleanup objectives for restricted commercial use for all compounds as presented in Appendix 5 of DER-10. Attached is Appendix 5 of DER-10 which provides the compounds and values for restricted commercial use. DER-10 Table 5.4(e)10 titled Recommended Number of Soil Samples for Soil Imported To or Exported From a Site provides the number of samples to be collected for laboratory analysis based on the quantity of soil material to be imported to the Site.

    Please note that the Department must see 80 sieve analysis documentation for material other than soil to be imported to the Site.

15. The Department understands that the elevator cylinder will either be disposed off-site at a permitted landfill facility or the elevator cylinder will be decommissioned/decontaminated and will be sent to a recycling facility in accordance with all applicable local, state and federal regulations.

16. The Department understands that equipment to be used in the excavation and cover installation fieldwork activities will arrive at the Site in a clean condition (i.e.; decontaminated from previous job site). If any equipment arrives at the Site unclean (i.e.; not decontaminated from previous job site) the equipment will not be allowed entry to the Site. Once decontamination has been completed at an off-site location then the equipment will be granted access to the Site. All equipment used in the excavation and cover system installation activities will be decontaminated prior to the exiting the Site.

17. The Department understands that a decontamination pad will be constructed so that no soil/fill material and/or liquid will be tracked from the Site onto the streets/roadways. If in the event that soil/fill material and/or liquid is tracked/discharged onto the streets/roadways then all of the material will be cleaned up immediately and the Department's project manager will be notified of the issue and the corrective measures must be taken to mitigate the tracking/discharging issues.

18. The Department understands that if the soil/fill material is saturated and needs to be dewatered then the staging area will have a sump built into it to collect the dewatering fluids. If saturated soil/fill material is trucked off-site for disposal the trucks will be lined to prevent the discharge of liquids to the environment (e.g., streets, roadways). All dewatering liquids will be containerized, characterized, and disposed off-site at a permitted landfill facility in accordance with all local, state, and federal regulations.

19. If groundwater monitoring wells need to be decommissioned as part of the remedial activities notification must be given the Department's project manager prior to decommissioning the monitoring wells. The groundwater monitoring wells will be decommissioned in accordance with the Department's CP-43 Commissioner Policy on Monitoring Well Decommissioning. The Department understands that if groundwater monitoring wells need to be decommissioned for the implementation of the remedial activities then the need for those decommissioned groundwater monitoring wells to be re-installed will be evaluated to determine which wells are needed for the site management phase of the project.

20. The Department understands that the trucks for transporting material for off-site disposal will not be queued and will be not sit idling in the neighborhoods adjacent to and surrounding the Site.

21. The Department understands that waste generated (e.g., decon liquids, disposable personal protection equipment) as part of the elevator excavation and cover system installation will be managed in accordance with IDW will be managed in accordance with DER-10 section 3.3(e).

22. The Department understands that all individuals involved with the remedial activities will be HAZWOPER 40 hr. trained and will have current 8 hr. refresher certifications. The certifications will be made available upon request by the Department and New York State Department of Health (NYSDOH).

23. In future submittals of HASPs, a map that shows the route to be taken to the nearest hospital must be provided. Attached is a copy of a map that presents the route to be taken to the nearest hospital based on the directions given in the HASP.

24. The Department understands that the community air monitoring plan (CAMP) locations will be based on the wind direction of that day and the locations will be adjusted as needed as the wind direction changes during the course of the work day. The Department also understands that the CAMP monitoring readings will be recorded and presented as supporting documentation within the Final Engineering Report (FER).

    The CAMP will be implemented for any and all ground intrusive activities and during the demolition of contaminated or potentially contaminated structures. Ground intrusive activities include but not limited to soil/waste excavation and handling, test pitting, trenching, soil borings, monitoring well installation.

    Dust suppression techniques/methods (e.g., misting the excavation area) must be implemented if the CAMP levels are exceeded as well as if fugitive dust is seen leaving the Site.

25. The Department understands that the reference on page 16 of the July 2016 HASP for Attachment C is actually Attachment B in the submitted document.

26. The Department understands that if odors issues arise during the excavation activities appropriate odor suppression techniques/methods will be implemented at the Site.

27. Once the remedial action has been completed on the southern portion of the Site, the City of Geneva will submit to the Department the details regarding the placement of the cover material and establishment of grass cover, all supporting documentation to obtain approval for importation of cover material, and details on and figure showing the final grade of the Site.

28. During the meeting held at the Department's Region 8 office on July 29, 2016, there was some uncertainty as the if the groundwater monitoring wells requested in the Department's March 7, 2008 approval letter for the June 2007 Remedial Action Work Plan prepared by O'Brien and Gere had been completed. The Department is requesting that a groundwater monitoring well inventory be completed at the Site to document the number and condition of the groundwater monitoring wells. The groundwater monitoring well inventory findings need to be presented to the Department's project manager. Based on the groundwater monitoring well inventory findings the next steps forward will be determined.

29. As discussed during the July 29, 2016 meeting, the FER and SMP need to be developed using the current template available on the Department's public website. The FER will document all remedial activities completed at the Site after the Record of Decision was signed and will need to have the necessary supporting documentation as well as as-built drawings for the Site. DER-10 Section 5.8 provides all the necessary components needed in a FER. Also, use the checklist provided on the Department's public website to make certain the key components for the FER and SMP are in the documents to be submitted for review and approval. The following website will provide all the templates and checklists needed to close out the Site: http://www.dec.ny.gov/chemical/48236.html

30. As per the State Assistance Contract and 6 NYCRR Part 375-1.6(a)(4) the Department will be notified at least 7 days in advance of and be allowed to attend any field work activities to be completed under a Department approved work plan as well as any pre-bid meetings, job progress meetings, substantial completion meeting and inspection, and final inspection and meeting.

31. There are less than 150 days till December 31, 2016 and a reasonable amount of work yet to be completed, documents to be developed, reviewed, and approved. With that said the Department is proposing the following schedule for the start of excavation fieldwork activities, the installation of the cover system, and the submittal of documents to achieve the issuance of the Certificate of Completion.

    - 30 days from the date of this letter the Remedial Action Work Plan Addendum (start of excavation activities) will begin at the Site.
    - Construction activities – excavation, cover installation, monitoring well installation (as needed), and groundwater sampling will be completed by October 1, 2016.
    - The draft FER will be submitted to the Department by October 1, 2016.
    - The draft SMP will be submitted to the Department by September 15, 2016.
    - The FER and SMP (in final form) will be submitted to the Department by November 15, 2016.

The draft FER and SMP documents can be submitted electronically – the complete documents (text, tables, figures, supporting documentation) in pdf format and the text of each document, the FER and the SMP including the Excavation Work Plan, in Microsoft Word.

Within 15 days of the date of this letter, the City of Geneva shall elect in writing (e-mail is acceptable) one of the following options:

A. Accept the Department modified work plan; or
B. Invoke dispute resolution as set forth in paragraph 375-1.5(b)(2).

If the City of Geneva elects option A then a copy of the Remedial Action Work Plan Addendum along with this letter including attachments must be placed in the document repository within 7 days of the acceptance and prior to the start of any fieldwork activities at the Site. Documentation of placement of the Remedial Action Work Plan Addendum along with this letter including attachments in the document repository must be submitted to the Department. If you have any questions or concerns regarding this letter or need further assistance with the Site, please feel free to contact me at 585-226-5354 or via e-mail at charlotte.theobald@dec.ny.gov.

Sincerely,

Charlotte B. Theobald
Environmental Engineer 1

NEW YORK STATE
DEPARTMENT OF ENVIRONMENTAL CONSERVATION

Request to Import/Reuse Fill or Soil

This form is based on the information required by DER-10, Section 5.4(e). Use of this form is not a substitute for reading the applicable Technical Guidance document.

SECTION 1 – SITE BACKGROUND

The allowable site use is: Choose an item

Have Ecological Resources been identified? Choose an item

Is this soil originating from the site? Choose an item

How many cubic yards of soil will be imported/reused? Choose an item

If greater than 1000 cubic yards will be imported, enter volume to be imported:

SECTION 2 – MATERIAL OTHER THAN SOIL

Is the material to be imported gravel, rock or stone? Choose an item

Does it contain less than 10%, by weight, material that would pass a size 80 sieve? Choose an item

Is this virgin material from a permitted mine or quarry? Choose an item

Is this material recycled concrete or brick from a DEC registered processing facility? Choose an item

SECTION 3 - SAMPLING

Provide a brief description of the number and type of samples collected in the space below:

Example Text: 5 discrete samples were collected and analyzed for VOCs. 2 composite samples were collected and analyzed for SVOCs, Inorganics & PCBs/Pesticides.

If the material meets requirements of DER-10 section 5.5 (other material), no chemical testing needed.

SECTION 3 CONT'D - SAMPLING

Provide a brief written summary of the sampling results or attach evaluation tables (compare to DER-10, Appendix 5):

Example Text: Arsenic was detected up to 17 ppm in 1 (of 5) samples; the allowable level is 16 ppm.

If Ecological Resources have been identified use the "If Ecological Resources are Present" column in Appendix 5.

SECTION 4 – SOURCE OF FILL

Name of person providing fill and relationship to the source:

Location where fill was obtained:

Identification of any state or local approvals as a fill source:

If no approvals are available, provide a brief history of the use of the property that is the fill source:

Provide a list of supporting documentation included with this request:

Revised August 2014

The information provided on this form is accurate and complete.

Footnotes:
[1] The SCO for Hexavalent or Trivalent Chromium is considered to be met if the analysis for the total species of this contaminant is below the specific SCO for Hexavalent Chromium.
[2] The SCO is the sum of endosulfan I, endosulfan II and endosulfan sulfate.
[3] For constituents where the calculated SCO was lower than the contract required quantitation limit (CRQL), the CRQL is used as the Track 1 SCO value.
[4] This SCO is derived from data on mixed isomers of BHC.

Subject: RE: Market Basket Analytical Results

Dave:

Based on the preliminary data it appears that the confirmation shows no exceedances above the Site's SCOs. All Department and NYDOH remedial decisions on analytical data is made from validated data. The Site will have a cover system; therefore, any future intrusive activities below the cover system will be in accordance with the Site Management Plan. Also, it has come to my attention the soil pile at the Site is not covered. The soil pile needs to remain covered while on Site. Any idea when that material will be disposed off-site at a permitted landfill facility? I want the material off the Site and disposed at a permitted landfill facility as soon as possible. It has been on the Site too long now. Let me know when the material is disposed off-site. The disposal records will need to be included in the final version of the FER.

Best Regards,
Charlotte

Charlotte,

Thank you for your response on the request for the off-site fill. I just wanted to verify that the Department is OK with the confirmation samples (see below) before we complete the cover.

Thank you,

Dave Meixell

Subject: Market Basket Analytical Results

Charlotte,

The summary table for the analytical data from the removal of the hydraulic cylinder from the Market Basket site in Geneva is attached. There were no exceedances for the Restricted Residential SCOs. The results for the characterization samples have been submitted to the Ontario County Landfill for their approval.

We will forward the results from the samples of the potential soil cover source upon our receipt, along with the application form.

Please contact me if you have any questions or comments.

Thank you,

Dave Meixell

EFFECTIVE DATE: 10/02/2008
EXPIRATION DATE: **09/15/2009**
US EPA ID NUMBER: NYR0000757 70

AUTHORIZED WASTE TYPES BY DESTINATION FACILITY:
The Permittee is Authorized to Transport the Following Waste Type(s) to the Destination Facility listed :

Destination Facility	Location	Waste Type(s)
AUBURN WWTF	AUBURN , NY	Sludge from Sewage or Water Supply Treatment Plant
Bath Sanitary Landfill	Bath , NY	Non-Hazardous Industrial/Commercial Asbestos Petroleum Contaminated Soil Sludge from Sewage or Water Supply Treatment Plant
BFI NIAGARA FALLS LANDFILL FACILITY	NIAGARA FALLS , NY	Non-Hazardous Industrial/Commercial Waste Tires Asbestos Petroleum Contaminated Soil Grease Trap Waste Septage only (residential) Residential Raw Sewage including Portable Toilet Waste Non-Residential Raw Sewage or Sewage-Contaminated Wastes Sludge from Sewage or Water Supply Treatment Plant
Chautauqua Landfill	Ellery , NY	Non-Hazardous Industrial/Commercial
Chemung County Solid Waste Management District	Elmira , NY	Petroleum Contaminated Soil
High Acres Western Expansion Landfill	Fairport , NY	Non-Hazardous Industrial/Commercial Sludge from Sewage or Water Supply Treatment Plant
HYLAND LANDFILL	ANGELICA , NY	Non-Hazardous Industrial/Commercial Petroleum Contaminated Soil

*** AUTHORIZED WASTE TYPES BY DESTINATION FACILITY LISTING (continued on next page) ***

NOTE: By acceptance of this permit, the permittee agrees that the permit is contingent upon strict compliance with the Environmental Conservation Law, all applicable regulations, and the General Conditions printed on the back of this page.

HAZARDOUS MATERIALS CERTIFICATE OF REGISTRATION FOR REGISTRATION YEAR(S) 2016-2019

Registrant: U S BULK TRANSPORT INC
Attn: GARY GOODELLE
205 PENNBRIAR DRIVE
ERIE, PA 16509

This certifies that the registrant is registered with the U.S. Department of Transportation as required by 49 CFR Part 107, Subpart G.

This certificate is issued under the authority of 49 U.S.C. 5108. It is unlawful to alter or falsify this document.

Reg. No: 060716 552 099YA **Effective: 07/01/2016** **Expires: 06/30/2019**

HM Company ID: 057616

Record Keeping Requirements for the Registration Program

The following must be maintained at the principal place of business for a period of three years from the date of issuance of this Certificate of Registration:

(1) A copy of the registration statement filed with PHMSA; and
(2) This Certificate of Registration

Each person subject to the registration requirement must furnish that person's Certificate of Registration (or a copy) and all other records and information pertaining to the information contained in the registration statement to an authorized representative or special agent of the U. S. Department of Transportation upon request.

Each motor carrier (private or for-hire) and each vessel operator subject to the registration requirement must keep a copy of the current Certificate of Registration or another document bearing the registration number identified as the "U.S. DOT Hazmat Reg. No." in each truck and truck tractor or vessel (trailers and semi-trailers not included) used to transport hazardous materials subject to the registration requirement. The Certificate of Registration or document bearing the registration number must be made available, upon request, to enforcement personnel.

For information, contact the Hazardous Materials Registration Manager, PHH-52, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, 1200 New Jersey Avenue, SE, Washington, DC 20590, telephone (202) 366-4109.

United States Environmental Protection Agency

ACKNOWLEDGEMENT OF NOTIFICATION OF REGULATED WASTE ACTIVITY (VERIFICATION)

This is to acknowledge that you have filed a Notification of Regulated Waste Activity for the installation located at the address shown below to comply with Section 3010 of the Resource Conservation and Recovery Act (RCRA). Your EPA Identification Number for that installation is identified below. The EPA Identification Number must be included on all shipping manifests for transporting hazardous wastes; on all Biennial Reports that generators of hazardous waste, and owner and operators of hazardous waste treatment, storage and disposal facilities must file with EPA; on all applications for a Federal Hazardous Waste Permit; and other hazardous waste management reports and documents required under Subtitle C of RCRA.

Waste Characterization Data

11) Is the waste classified as a "listed" or "characteristic" hazardous waste as defined by USEPA, or State of origin, or State where disposed? (If yes, explain.)

No

12) Describe all hazardous or nuisance properties associated with the waste.

None

13) Does the waste require any special handling or disposal procedures? If so, explain.

None

14) Analytical Data Submitted (TCLP/Other).	Type of Samples (indicate No. of each type in space provided)
Yes - attached	_____ grab ___X___ composite

New England Waste Services of N.Y., Inc. requires, at a minimum, the submittal of full TCLP (Metals-RCRA 8, VOC, SVOC, PCBs, Pesticides/Herbicides), pH, Reactivity, Ignitibility, and % solids testing results for any special waste submitted for landfill acceptance unless the applicant can provide an acceptable justification for submittal of less comprehensive data. The generator is responsible for proper waste characterization.

15) Justification for not submitting full TCLP data.

GENERATOR CERTIFICATION

I hereby certify that all information submitted on this form and on supplemental materials is complete and accurate to the best of my knowledge and ability to determine. I further certify that there is no deliberate or willful omissions of data necessary to characterize the waste material and that all known or suspected hazards have been disclosed.

GENERATOR APPROVAL NOTIFICATION

Customer: THE ENVIRONMENTAL SERVICE GRP January 9, 2017

ENVIRONMENTAL MANAGER
CITY OF GENEVA
GATES AVENUE & LEHIGH STREET
GENEVA, NY 14456

This Generator Approval Notification acknowledges the acceptability of waste material(s) into the noted EQ facility(s) identified below and ensures that each facility has the appropriate permit(s) issued by federal and state regulatory agencies to properly transport, treat, and/or dispose of the waste material(s).

The Approval(s) listed below are based upon characterization information supplied to EQ by the Customer and the Generator (if other than the Customer). The Customer is ultimately responsible for the accuracy and completeness of all such information, whether provided by the Customer or the Generator. The Customer must notify EQ immediately upon knowledge of any changes to this information. The Approval and all wastes which are transported, delivered, or tendered to EQ under this Approval shall be subject to the Standard Terms and Conditions associated with the original Waste Profile Form. (The Standard Terms and Conditions are incorporated into the Waste Profile Form as Page 4.)

The Approval(s) will expire on the date(s) noted. Any new Approvals obtained from EQ on future business will be valid for a period of one (1) year from the date of issuance. Within 60 days of the Approval Expiration Date, you will be notified of the requirements for recertification.

AUTHORIZED ACTIVITIES

In reference to the application of Envirite of Ohio, Inc. for an Ohio Hazardous Waste Facility Installation and Operation Renewal Permit under Ohio Revised Code (ORC) Chapter 3734 and the record in this matter, you are authorized to conduct at the above-named facility the following hazardous waste management activities:

- Storage in containers and tanks
- Treatment in tanks and miscellaneous units
- Corrective Action

PERMIT APPROVAL

[signature]
Craig W. Butler, Director
Ohio Environmental Protection Agency

This permit approval is based upon the record in this matter which is maintained at the offices of the Ohio Environmental Protection Agency. The Director has considered the application, accompanying information, inspection reports of the facility, e report regarding the facility's compliance or noncompliance with the terms and conditions of its permit and rules adopted by the Director under this chapter, and such other information as is relevant to the operation of the facility. The Director has determined that the facility under the existing permit has a history of compliance with ORC Chapter 3734, rules adopted under it, the existing permit, or orders entered to enforce such requirements that demonstrate sufficient reliability, expertise, and competency to operate the facility henceforth under this chapter, rules adopted under it, and the renewal permit.

Entered into the Journal of the Director this 17th day of July, 2014

By [signature] of the Ohio Environmental Protection Agency

THE ENVIRONMENTAL QUALITY COMPANY
MANIFEST CHECKLIST

In an effort to serve you better, EQ - The Environmental Quality Company is providing assistance in completion of your U.S. EPA Uniform Hazardous Waste Manifest. For your convenience, a portion of the manifest has been completed for you.

Prior to releasing your waste for transport, please review all information, and complete the sections checked below. Accurately completing the required sections will help ensure compliance with applicable DOT regulations and minimize delays at the TSDF.

If you have any questions, comments or concerns regarding any of the following information, please contact your Customer Service Specialist at (800) 592-5489. A complete set of manifesting instructions is available on the back of your Uniform Hazardous Waste Manifest.

Manifest Number(s): _____

Please complete the checked sections prior to releasing the waste for transport:

- ☐ Generator ID Number
- ☐ Page Number
- ☑ Emergency Response Phone
- ☐ Offeror's Name and/or Contract Number
- ☐ Generator's Name and Mailing Address
- ☐ Generator's Site Address (if different than mailing address)
- ☐ Generator's Phone
- ☐ Transporter 1 Company Name
- ☐ Transporter U.S. EPA ID Number
- ☐ Designated Facility Name and Site Address
- ☐ Facility's Phone
- ☐ U.S. EPA ID Number
- ☐ HM
- ☐ U.S. DOT Description
- ☐ Containers ☐ No ☐ Type
- ☑ Total Quantity
- ☐ Unit Wt./Vol.
- ☐ Waste Codes
- ☐ Special Handling Instructions and Additional Information

Please remember to send a completed Land Disposal Restriction Form with your first shipment. If you need a copy of the LDR form, please call Customer Service at 800-592-5489.

TEL:

Project: CITY OF GENEVA- MARKET BASKET SITE
RE: Analytical Results Order No.: 0808068, 0808076

Dear Dave Miexell:

Life Science Laboratories, Inc. received samples on 8/12/2008-8/13/2008 for the analyses presented in the following report.

Very truly yours,
Life Science Laboratories, Inc.

Monika Santucci
Project Manager

NARRATIVE

INTRODUCTION/ANALYTICAL RESULTS

This report summarizes the laboratory results for samples from O'Brien & Gere Engineers, Inc. for the City of Geneva project. Immediately following the narratives are the Work Order Sample Summary and Dates Report.

CONDITION UPON RECEIPT/CHAIN OF CUSTODY

The coolers were received intact. When the coolers were received by the laboratory, the sample custodian(s) opened and inspected the shipments for damage, custody inconsistencies and proper preservation. The chain of custody forms documenting receipt are presented in the chain of custody section. Each sample was assigned a unique laboratory number and a custody file created. The samples were placed in a secured walk-in cooler and signed in and out by the chemists performing the tests. The sign out record, or lab chronicle, is presented in the chain of custody section.

Discrepancies noted upon receipt are listed on the sample receipt checklist located in the chain of custody section of the report. The temperatures of the iced coolers were 0.2°C and 2.2°C.

METHODOLOGY

The following methods were used to perform the analyses:

PARAMETER	METHOD	REFERENCE
Volatile Organics	SW8260B	1
Semivolatile Organics	SW8270C	1
ICP Metals	SW6010B	1
Mercury	SW7471A	1
Percent Moisture	SM 2540G	2

1) New York State Department of Environmental Conservation Analytical Services Protocol, June 2000.

2) Standard Methods for the Examination of Water and Wastewater, 18th Edition, 1992

QUALITY CONTROL

QA/QC results are summarized in the Laboratory Report Package and are also included in the raw data.

RAW DATA

The raw data is organized in the New York State Department of Environmental Conservation Analytical Services Protocol Category B order of data requirements.

GC/MS Volatile Organics
The GC/MS Volatile instruments are equipped with a Restek Rtx-VMS, 40 m x 0.18 mm ID capillary column (MS01 & MS03), Restek Rtx-502.2, 105 m x 0.53 mm ID capillary column (MS02), and Restek Rtx-VMS, 60 m x 0.25mm ID capillary column (MS04), and a Vocarb 3000 adsorbent trap.

Holding Times and Sample Preservation
All samples were prepared and analyzed within the method and/or QAPP specified holding time requirements. Aqueous samples had a pH of < 2.

Laboratory Control Sample
The following compound(s) did not meet laboratory control sample recovery criteria:

LCS No.	Compound	Corrective Action
LCS-14526, LCS-14527	Cyclohexane	1
LCS-14529	1,1-Dichloroethene	1
	Carbon disulfide	1
	Cyclohexane	1
LCS/LCSD-14531	Cyclohexane	1
LCSD-14531	Carbon disulfide	1,2
	1,1,2,2-Tetrachloroethane	1,2
	1,2-Dibromo-3-chloropropane	1,2

1 The recovery exceeded the upper control limit and was not detected above the PQL/RL in the associated samples. No corrective action was taken.

2 The primary LCS met acceptance limits.

MS/MSD/MSB
The following compound(s) did not meet matrix spike/matrix spike duplicate percent recovery and/or RPD criteria:

Sample Description	Sample #	Compound	% REC	RPD	Corrective Action
MSB	MSB-14529	Carbon disulfide	X		1
		Cyclohexane	X		1

GC/MS Volatile Organics Case Narrative - Page 2

Client: OBG
Project/Order: City of Geneva – Market Basket Site
Work Order #: 0808068, 0808076
Methodology: 8260B

Sample Description	Sample #	Compound	% REC	RPD	Corrective Action
UST-East	0808076-004A MSD	Cyclohexane	X		1

1 The recovery exceeded the upper control limit and was not detected above the PQL/RL in the associated sample. No corrective action was taken.

Surrogate Standards
The following sample(s) did not meet surrogate recovery criteria:

Sample Description	Sample #	Surrogate	Corrective Action
UST-Bot-1	0808076-001A	4-Bromofluorobenzene	1
UST-Bot-2	0808076-003A	4-Bromofluorobenzene	2
Field Dup	0808076-007A	4-Bromofluorobenzene	2

1 The recovery was confirmed by analysis of the sample at a higher dilution. Matrix interference is suspected. Both sets of data are reported. No further corrective action was taken.

2 The recovery met acceptance criteria when reanalyzed at a higher dilution. Matrix interference is suspected. Both sets of data are reported. No further corrective action was taken

Internal Standards
The internal standard area for the following sample(s) did not meet abundance criteria:

Sample Description	Sample #	Internal Standard	Corrective Action
UST-Bot-1	0808076-001A	1,4-dichlorobenzene-d4	1
UST-Bot-2	0808076-003A	1,4-dichlorobenzene-d4	1
Field Dup	0808076-007A	1,4-dichlorobenzene-d4	1
Trench-Bot-1	0808076-008A	1,4-dichlorobenzene-d4	2
Trench-Bot-2	0808076-009A	1,4-dichlorobenzene-d4	2

1 The recovery was confirmed by analysis of the sample at a higher dilution. Matrix interference is suspected. Both sets of data are reported. No further corrective action was taken.

2 The internal standard area met abundance criteria when reanalyzed at a higher dilution. Matrix interference is suspected. Both sets of data are reported. No further corrective action was taken.

Calibrations
All initial calibrations and calibration verifications met method and/or project specific QC criteria.

Preparation Blanks
All preparation blanks met method and/or project specific QC criteria.

GC/MS Semi-Volatile Organics Case Narrative

Client ID: OBG-MS
Project/Order: City of Geneva-Mark Basket Site
Work Order #: 0808068,0808076
Methodology: 8270C

Analyzed/Reviewed by (Initials/Date): MS 8/27/08
Supervisor/Reviewed by (Initials/Date): DW 8-27-08
QA/QC Review (Initials/Date): DL 9/2/08

GC/MS Semi-Volatile Organics
The GC/MS Semi-volatile instruments used a J & W DB-5MS, 30 m x 0.25 mm ID capillary column.

Holding Times and Sample Preservation
All samples were prepared and analyzed within the method and/or QAPP specified holding time requirements.

Laboratory Control Sample
All spike recoveries met method and/or project specific QC criteria.

MS/MSD/MSB
The following compound(s) did not meet matrix spike/matrix spike duplicate percent recovery and/or RPD criteria:

Sample Description	Sample #	Compound	% REC	RPD	Corrective Action
Matrix Spike Blank	MSB-7957	Caprolactam	X		1

1 The recovery exceeded the upper control limit and was not detected above the PQL/RL in the associated samples. The associated LCS met acceptance limits. No corrective action was taken.

Surrogate Standards
All surrogate standard recoveries met method and/or project specific QC criteria.

Internal Standards
All internal standard areas met method and/or project specific QC criteria.

Calibrations
All initial calibrations and calibration verifications met method and/or project specific QC criteria.

Preparation Blanks
All preparation blanks met method and/or project specific QC criteria.

NARRATIVE

INTRODUCTION/ANALYTICAL RESULTS
This report summarizes the laboratory results for samples from O'Brien & Gere Engineers, Inc. for the City of Geneva project. Immediately following the narratives are the Work Order Sample Summary and Dates Report.

CONDITION UPON RECEIPT/CHAIN OF CUSTODY
The coolers were received intact. When the coolers were received by the laboratory, the sample custodian(s) opened and inspected the shipments for damage, custody inconsistencies and proper preservation. The chain of custody forms documenting receipt are presented in the chain of custody section. Each sample was assigned a unique laboratory number and a custody file created. The samples were placed in a secured walk-in cooler and signed in and out by the chemists performing the tests. The sign out record, or lab chronicle, is presented in the chain of custody section.

Discrepancies noted upon receipt are listed on the sample receipt checklist located in the chain of custody section of the report. The temperatures of the iced coolers were 0.2°C and 2.2°C.

METHODOLOGY
The following methods were used to perform the analyses:

PARAMETER	METHOD	REFERENCE
Volatile Organics	SW8260B	1
Semivolatile Organics	SW8270C	1
ICP Metals	SW6010B	1
Mercury	SW7471A	1
Percent Moisture	SM 2540G	2

1) New York State Department of Environmental Conservation Analytical Services Protocol, June 2000.

2) Standard Methods for the Examination of Water and Wastewater, 18th Edition, 1992

QUALITY CONTROL
QA/QC results are summarized in the Laboratory Report Package and are also included in the raw data.

RAW DATA
The raw data is organized in the New York State Department of Environmental Conservation Analytical Services Protocol Category B order of data requirements.

Total # of pages in report: _____

GC/MS Volatile Organics Case Narrative

Client: OBG
Project/Order: City of Geneva – Market Basket Site
Work Order #: 0808068, 0808076
Methodology: 8260B

Analyzed/Reviewed by (Initials/Date): MS 8/27/08
Supervisor/Reviewed by (Initials/Date): MT 8/29/08
QA/QC Review (Initials/Date): Gh 9/3/08
File Name: G:\Narratives\MSVoa\0808068vnar.doc

GC/MS Volatile Organics
The GC/MS Volatile instruments are equipped with a Restek Rtx-VMS, 40 m x 0.18 mm ID capillary column (MS01 & MS03), Restek Rtx-502.2, 105 m x 0.53 mm ID capillary column (MS02), and Restek Rtx-VMS, 60 m x 0.25mm ID capillary column (MS04), and a Vocarb 3000 adsorbent trap.

Holding Times and Sample Preservation
All samples were prepared and analyzed within the method and/or QAPP specified holding time requirements. Aqueous samples had a pH of < 2.

Laboratory Control Sample
The following compound(s) did not meet laboratory control sample recovery criteria:

LCS No.	Compound	Corrective Action
LCS-14526, LCS-14527	Cyclohexane	1
LCS-14529	1,1-Dichloroethene	1
	Carbon disulfide	1
	Cyclohexane	1
LCS/LCSD-14531	Cyclohexane	1
LCSD-14531	Carbon disulfide	1,2
	1,1,2,2-Tetrachloroethane	1,2
	1,2-Dibromo-3-chloropropane	1,2

1 The recovery exceeded the upper control limit and was not detected above the PQL/RL in the associated samples. No corrective action was taken.

2 The primary LCS met acceptance limits.

MS/MSD/MSB
The following compound(s) did not meet matrix spike/matrix spike duplicate percent recovery and/or RPD criteria:

Sample Description	Sample #	Compound	% REC	RPD	Corrective Action
MSB	MSB-14529	Carbon disulfide	X		1
		Cyclohexane	X		1

GC/MS Volatile Organics Case Narrative - Page 2

Client: OBG
Project/Order: City of Geneva – Market Basket Site
Work Order #: 0808068, 0808076
Methodology: 8260B

Sample Description	Sample #	Compound	% REC	RPD	Corrective Action
UST-East	0808076-004A MSD	Cyclohexane	X		1

1 The recovery exceeded the upper control limit and was not detected above the PQL/RL in the associated sample. No corrective action was taken.

Surrogate Standards
The following sample(s) did not meet surrogate recovery criteria:

Sample Description	Sample #	Surrogate	Corrective Action
UST-Bot-1	0808076-001A	4-Bromofluorobenzene	1
UST-Bot-2	0808076-003A	4-Bromofluorobenzene	2
Field Dup	0808076-007A	4-Bromofluorobenzene	2

1 The recovery was confirmed by analysis of the sample at a higher dilution. Matrix interference is suspected. Both sets of data are reported. No further corrective action was taken.

2 The recovery met acceptance criteria when reanalyzed at a higher dilution. Matrix interference is suspected. Both sets of data are reported. No further corrective action was taken

Internal Standards
The internal standard area for the following sample(s) did not meet abundance criteria:

Sample Description	Sample #	Internal Standard	Corrective Action
UST-Bot-1	0808076-001A	1,4-dichlorobenzene-d4	1
UST-Bot-2	0808076-003A	1,4-dichlorobenzene-d4	1
Field Dup	0808076-007A	1,4-dichlorobenzene-d4	1
Trench-Bot-1	0808076-008A	1,4-dichlorobenzene-d4	2
Trench-Bot-2	0808076-009A	1,4-dichlorobenzene-d4	2

1 The recovery was confirmed by analysis of the sample at a higher dilution. Matrix interference is suspected. Both sets of data are reported. No further corrective action was taken.

2 The internal standard area met abundance criteria when reanalyzed at a higher dilution. Matrix interference is suspected. Both sets of data are reported. No further corrective action was taken.

Calibrations
All initial calibrations and calibration verifications met method and/or project specific QC criteria.

Preparation Blanks
All preparation blanks met method and/or project specific QC criteria.

GC/MS Semi-Volatile Organics Case Narrative

Client ID: OBG-MS
Project/Order: City of Geneva-Mark Basket Site
Work Order #: 0808068,0808076
Methodology: 8270C

Analyzed/Reviewed by (Initials/Date): MS 8/27/08
Supervisor/Reviewed by (Initials/Date): MT 8-27-08
QA/QC Review (Initials/Date): Gh 9/2/08
File Name: G:\Narratives\MSSemi\0808068svnar.doc

GC/MS Semi-Volatile Organics
The GC/MS Semi-volatile instruments used a J & W DB-5MS, 30 m x 0.25 mm ID capillary column.

Holding Times and Sample Preservation
All samples were prepared and analyzed within the method and/or QAPP specified holding time requirements.

Laboratory Control Sample
All spike recoveries met method and/or project specific QC criteria.

MS/MSD/MSB
The following compound(s) did not meet matrix spike/matrix spike duplicate percent recovery and/or RPD criteria:

Sample Description	Sample #	Compound	% REC	RPD	Corrective Action
Matrix Spike Blank	MSB-7957	Caprolactam	X		1

1 The recovery exceeded the upper control limit and was not detected above the PQL/RL in the associated samples. The associated LCS met acceptance limits. No corrective action was taken.

Surrogate Standards
All surrogate standard recoveries met method and/or project specific QC criteria.

Internal Standards
All internal standard areas met method and/or project specific QC criteria.

Calibrations
All initial calibrations and calibration verifications met method and/or project specific QC criteria.

Preparation Blanks
All preparation blanks met method and/or project specific QC criteria.

MDLs are calculated using the method in Appendix B, Part 136, Revision 1.11 of the Federal Register, Volume 49, No. 209, October 1984.

MDL=(S Dev) x (t-value)

The GC/MS instrument minimum threshold quantitation level is set to 0.5 ug/Kg.

The MDL is a statistical measurement which defines the theoretical minimum concentration of a substance which can be measured and reported with 99% confidence that the analyte concentration is greater than zero.

MDL Verifications:
MS2:
MS3: 2/21/08

* not verified, surrogate no longer utilized.

Laboratory Worksheets

Copy of Calculations

GC/MS SOIL SAMPLE CALCULATIONS

1. Relative Response Factors for GC/MS Volatiles and Semivolatiles

$$RRF = \frac{A_x}{A_{is}} \times \frac{C_{is}}{C_x}$$

Where: A_x = Area of the characteristic ion for the compound to be measured
A_{is} = Area of the characteristic ion for the specific internal standard
C_{is} = Concentration of the internal standard (µg/Kg)
C_x = Concentration of the compound to be measured (µg/Kg)

2. Relative Standard Deviation

$$\%\ RSD = \frac{SD}{\bar{X}} \times 100$$

Where: RSD = Relative Standard Deviation
SD = Standard Deviation of initial relative response factors (per compound)
$\bar{X}$ = Mean of initial relative response factors (per compound)

3. %Deviation for Continuing Calibration (for quantitation from RF only)

$$\%\ \text{Deviation}_{\text{(RODIN)}} = \frac{RRF_c - \overline{RRF_i}}{RRF_i} \times 100$$

$$\%\ \text{Deviation}_{\text{(software)}} = \frac{\overline{RRFi} - RRF_c}{\overline{RRFi}}$$

Where: RRF_c = Relative response factor from continuing calibration standard
$\overline{RRFi}$ = Mean relative response factor from most recent initial calibration meeting technical acceptance criteria

4. %Drift for Continuing Calibration (for quantitation from RF or Curve)

$$\%\ \text{Drift}_{\text{(RODIN)}} = \frac{C_c - C_i}{C_i} \times 100$$

$$\%\ \text{Drift}_{\text{(software)}} = \frac{C_i - C_c}{C_i}$$

Where: C_i = Calibration check std concentration (theoretical)
C_c = Measured concentration

GC/MS SOIL SAMPLE CALCULATIONS

5. RRT Deviation

$$\Delta\ RRT = RRT_s - RRT_c\ ,\ RRT = \frac{RT_t}{RT_s}$$

Where: RRT_t = Relative RT of target compound in sample
RRT_c = RRT of target in continuing calibration standard
RT_t = RT of target compound
RT_s = RT of internal standard

6. Final Concentration for GC/MS Volatiles

Low Soil

$$\text{Concentration } (\mu g/kg) = \frac{(A_x)(I_{is})V_o}{(A_{is})(RRF)(W_s)(D)}$$

Where: V_o = Volume of water purged (5 to 25 mL)
A_x = Area of the characteristic ion for the compound to be measured
A_{is} = Area of the characteristic ion for the specified internal standard
I_{is} = Concentration of internal standard added in nanograms/ml
W_s = Weight of sample purged (1-5g)
D = % solids/100
RRF = Response factor for compound to be measured (average or single point) *

* For compounds calculated using a regression equation for initial calibration, the terms of the equation replace the RRF.

Medium Soil

$$\text{Concentration } (\mu g/kg) = \frac{(A_x)(I_{is})(V_T)(V_A)Df}{(A_{is})(RRF)(W_s)(V_{is})(D)}$$

Where: RRF, A_x, A_{is}, I_{is} = Same as above
W_s = Weight of sample extracted (5g)
V_T = Total volume of methanol extract adjusted for sample moisture:

V_T = mL solvent + (%moisture x W_s/100)

V_A = Volume of methanol extract used for purging
V_{is} = Volume of water purged
Df = Dilution factor if original extract is diluted

7. Final Concentration for GC/MS Semivolatiles

$$\text{Concentration } (\mu g/kg) = \frac{(A_x)(I_{is})(V_t)(Df)(2.0)}{(A_{is})(RRF)(V_i)(Ws)(D)}$$

Where: RRF, A_x, A_{is}, I_s D, Df= Same as above
W_s = Weight of sample extracted (g)
V_t = Volume of concentrated extract (µL)

GC/MS SOIL SAMPLE CALCULATIONS

V_I = Volume of extract injected (µL)

The factor of 2.0 is used to account for the amount of extract that is not recovered from the GPC. If the GPC is not used, this factor is not used.

8. Matrix Spike Recovery for Volatiles and Semivolatiles

$$\text{Recovery (\%)} = \frac{(SSR) - (SR)}{(SA)} \times 100$$

Where: SSR = Spike sample result
SR = Sample result
SA = Spike added

9. % RPD of Matrix Spike and Matrix Spike Duplicate

$$\%RPD = 100 \times \frac{|S - D|}{((S + D)/2)}$$

Where: S = First Sample Value (Original)
D = Second Sample Value (Duplicate)

10. The Recovery of Reference Sample (LCS) and Surrogate

$$\text{Recovery (\%)} = \frac{SR}{SA} \times 100$$

Where: SR = Sample results
SA = Sample spike added

11. The calculation of Library Search compounds (TICs) is similar to target compounds except a RRF of 1.0 is assumed.

MDLs are calculated using the method in Appendix B, Part 136, Revision 1.11 of the Federal Register, Volume 49, No. 209, October 1984.

MDL=(S Dev) x (t-value)

The MDL is a statistical measurement which defines the theoretical minimum concentration of a substance which can be measured and reported with 99% confidence that the analyte concentration is greater than zero.

The GC/MS instrument minimum threshold quantitation level is set to 0.5 (or 1.0 ug/mL) ug/mL of extract (dependant on the initial calibration low standard concentration).

MDL verified (MS5/MS6): 2-24-08 (*not verified)

4-8-08

Laboratory Worksheets

Copy of Calculations

GC/MS SOIL SAMPLE CALCULATIONS

1. Relative Response Factors for GC/MS Volatiles and Semivolatiles

$$RRF = \frac{A_x}{A_{is}} \times \frac{C_{is}}{C_x}$$

Where: A_x = Area of the characteristic ion for the compound to be measured
A_{is} = Area of the characteristic ion for the specific internal standard
C_{is} = Concentration of the internal standard (µg/Kg)
C_x = Concentration of the compound to be measured (µg/Kg)

2. Relative Standard Deviation

$$\%\ RSD = \frac{SD}{\bar{X}} \times 100$$

Where: RSD = Relative Standard Deviation
SD = Standard Deviation of initial relative response factors (per compound)
$\bar{X}$ = Mean of initial relative response factors (per compound)

3. %Deviation for Continuing Calibration (for quantitation from RF only)

$$\%\ Deviation_{(Excel)} = \frac{RRF_c - \overline{RRF_i}}{\overline{RRF_i}} \times 100$$

$$\%\ Deviation_{(software)} = \frac{\overline{RRF_i} - RRF_c}{\overline{RRFi}} \times 100$$

Where: RRF_c = Relative response factor from continuing calibration standard
$\overline{RRFi}$ = Mean relative response factor from most recent initial calibration meeting technical acceptance criteria

4. %Drift for Continuing Calibration (for quantitation from RF or Curve)

$$\%\ Drift_{(Excel)} = \frac{C_c - C_i}{C_i} \times 100$$

$$\%\ Drift_{(software)} = \frac{C_i - C_c}{C_i} \times 100$$

Where: C_i = Calibration check std concentration (theoretical)
C_c = Measured concentration

GC/MS SOIL SAMPLE CALCULATIONS

5. RRT Deviation

$$\Delta\ RRT = RRT_x - RRT_c\ ,\ RRT = \frac{RT_c}{RT_i}$$

Where: RRT_x = Relative RT of target compound in sample
RRT_c = RRT of target in continuing calibration standard
RT_c = RT of target compound
RT_i = RT of internal standard

6. Final Concentration for GC/MS Volatiles
Low Soil

$$Concentration\ (\mu g/kg) = \frac{A_x)(I_{is})V_o}{(A_{is})(RRF)(W_s)(D)}$$

Where: V_o = Volume of water purged (5 to 25 mL)
A_x = Area of the characteristic ion for the compound to be measured
A_{is} = Area of the characteristic ion for the specified internal standard
I_{is} = Concentration of internal standard added in nanograms/ml
W_s = Weight of sample purged (1-5g)
D = % solids/100
RRF = Response factor for compound to be measured (average or single point) *

* For compounds calculated using a regression equation for initial calibration, the terms of the equation replace the RRF.

Medium Soil

$$Concentration\ (\mu g/kg) = \frac{(A_x)(I_{is})(V_T)(V_a)Df}{(A_{is})(RRF)(W_s)(V_A)(D)}$$

Where: RRF, A_{is}, A_{is}, I_{is} = Same as above
W_s = Weight of sample extracted (5g)
V_T = Total volume of methanol extract adjusted for sample moisture.

V_T = mL solvent + (%moisture x W_s/100)

V_A = Volume of methanol extract used for purging
V_a = Volume of water purged
Df = Dilution factor if original extract is diluted

7. Final Concentration for GC/MS Semivolatiles

$$Concentration\ (\mu g/kg) = \frac{(A_x)(I_{is})(V_T)(Df)(2.0)}{(A_{is})(RRF)(V_i)(W_S)(D)}$$

Where: RRF, A_x, A_{is}, I_{is}, D, Df = Same as above
W_S = Weight of sample extracted (g)
V_T = Volume of concentrated extract (µL)

GC/MS SOIL SAMPLE CALCULATIONS

V_i = Volume of extract injected (µL)

The factor of 2.0 is used to account for the amount of extract that is not recovered from the GPC. If the GPC is not used, this factor is not used.

8. Matrix Spike Recovery for Volatiles and Semivolatiles

$$\text{Recovery (\%)} = \frac{(SSR) - (SR)}{(SA)} \times 100$$

Where: SSR = Spike sample result
SR = Sample result
SA = Spike added

9. % RPD of Matrix Spike and Matrix Spike Duplicate

$$\%RPD = 100 \times \frac{|S - D|}{(S + D)/2}$$

Where: S = First Sample Value (Original)
D = Second Sample Value (Duplicate)

10. The Recovery of Reference Sample (LCS) and Surrogate

$$\text{Recovery (\%)} = \frac{SR}{SA} \times 100$$

Where: SR = Sample results
SA = Sample spike added

11. The calculation of Library Search compounds (TICs) is similar to target compounds except a RRF of 1.0 is assumed.
