### DEC REMARKS:

Hydraulic line on vibratory hammer leaked during installation of sheet pile bulkhead along shoreline under Environmental Remediation Program project ID B00190. Approximately 150-200' N of Southern property line. Small amount of hydraulic fluid released to Hudson River within turbidity curtain. Equipment shut down immediately. Booms and sorbent pads deployed to remove sheens/product. Material is Chevron Clarity Hydraulic oil. MSDS describes as a highly refined mineral oil and says that it contains a petroleum-based mineral oil. - 6/27/08 JPC  
6/26/08 D. Weitz did site inspection. Met Joshua Cook (DEC Albany) on site. Small spill was completely contained, and was cleaned up prior to site inspection. Oil was described on-site as a non-petroleum mineral oil, but evidently the MSDS says otherwise. No impact noted to Hudson River. NFA
