

Field Report

14 Oct 19

Date:

Spill Number:

Location		Representatives on Site	
Name	Cibro	DEC David Raymond	1000 time in time out 1630
Address	WASHINGTON AVE		
Town	Island Park	Contractor	phone
Phone		Posillico	
County	Nassau	Roux	
Temperature ☐ Cold ☐ Fair ☐ Warm ☐ Hot General Conditions ☒ Sunny ☐ Part Cloudy ☐ Cloudy ☐ Rain/Snow		Owner's Representative VHB phone	

Cause of Spill:

X-Coordinate:

Y-Coordinate:

Contaminated soil excavated?

☒ Yes, Amt. ☐ No

Approx. Dimensions of Excavation (ft)

L= W= D=

85-100' N/S x 5-6' D x - 'E/W - 65-70 F

End Point Sampling Required?

☒ Yes ☐ No

Ground water impacted?

☐ Yes

☐ Unlikely DTW(ft)

☐ Unknown

Is additional investigation and/or remediation required?

☒ Yes ☐ No ☐ TBD

Notes:

See attached

Site Diagram

- cloudy upon arrival but cleared soon thereafter

- light "W" wind shifting to S
2 air monitors along E bulk-head

- tide going out (low tide mid pm)

Spill Number:

Representatives:

Posillio James (on/off?) etc

Roux Chris etc

VHB Mohamed etc

Date	Time	Narrative
14 Oct 19	1000	debriefed by James * "Tank 12" flooded and area to S too wet, so currently working E/SE side; may do "Tank 12" area tomorrow; very NE also flooded * DEC directed update to NA, HS, DR at end of today
1000-	1200	at E/SE side very NE corner still flooded digging down ~4 ft to either odor/visual clean or peat/clay small collapse of E wall - small amount of flooding - backfilled area of collapse * at bottom seems like mostly/all "bad" odor (eg hydrogen sulfide) and no sheen
	1200	Trimble survey instrument brought to site delineate excavated area & depth mark sampling points
	1230	began working N/S strip on W side of am strip paced am strip: ~85 ft N/S
	1315	* encountered wood pilings for former tank near S end of W strip

Spill Number:

Representatives:

Date	Time	Narrative
14 Oct 19	~1330	W strip now as long as <u>am</u> (<u>E</u>) strip
	1355	* bottom sample "Q10" grid sand, "bug" odor, <u>no</u> sheen
	1400	* bottom sample "Q11" grid same as above (W strip)
	1405	* bottom sample "R11" grid (W strip) same as above (E strip at <u>Send</u>)
	1415	began removing overburden at <u>S</u> end of <u>am</u> (<u>E</u>) strip in order to dig toward/along <u>old</u> bulkhead
	~1420	began backfilling into <u>both</u> strips
	1520	inspected bottom along <u>old</u> bulkhead <u>N</u> end at sheeting #18 ~5-5.5 ft bgs at bulkhead - clay is <u>more</u> compact than at shallower depth, (more "silty" at shallower depth) <u>Send</u> at sheeting # 189 (to <u>S</u>) ~5.5-6.0 ft bgs - same as above. seemed shallower away from bulkhead
	1545	began backfilling this area - Chris: "this is <u>SID</u> only ~20ft x 20ft + we have data all around it" - clay at bottom
	1630	off site

PHOTOGRAPH LOG 14 Oct 2019

Number	Direction	Title/Comments
1	W/NW	"Tank 12" excavation
2	E/NE	overview of N end of morning digging
3	W	"Grid II" bottom - top of 'peat/clay'
4	W	" " " - deepening slightly
5		" " " - sheen from residual at bottom of excavation (ie small pockets on top of 'peat/clay')
6		" same as #5
7		12:45pm S end of morning excavation
8	W	bottom of W (afternoon) strip
9	W	same as #8
10	S	13:25 S end of W strip - wood pilings
11	S/SE	removing overburden along bulkhead
12	S/SE	excavating along bulkhead
13	S/SE	"silt/clay" " "
14		closeup of "silt/clay"
15	S/SE	scrapping bottom of excavation
16	S/SE	"clay" at bottom - notice how it "peeled" up
17	S/SE	excavating away from bulkhead - notice "clay" is shallower
18	S	same as #17
