Re: Brownfield Cleanup Program Remedial Investigation
Bethpage Community Park Ice Rink Area – NYSDEC Site No.: C130212
Progress Report – July 2016

Dear Mr. Scharf:

On behalf of the Town of Oyster Bay (Town), H2M architects + engineers (H2M) is pleased to provide herein a progress report on the remedial investigation activity at the Bethpage Community Park Ice Rink Area pursuant to Appendix A, Section XI of the New York State Brownfield Site Cleanup Agreement (Index # C130212-01-12).

Tasks Initiated or Completed

- The Remedial Investigation (RI) Electronic Data Deliverable (EDD) are being revised by the laboratory based on the New York State Department of Environmental Conservation (NYSDEC) data manager comments and updated NYSDEC format files. The laboratory was able to name the tentatively identified compounds (TIC) in a cascade fashion, to identify the TIC analyte name and/or to determine the class for TICs identified in the soil vapor samples such that the EDD file was successfully processed through the EQulS data processor. The laboratory is revising the remaining EDD files in a similar manner.
- The RI EDD were revised based on your response to our inquiry regarding subfacility task codes and building codes (response received via e-mail on July 13, 2016).
- An Alternative Analysis Report (AAR) is being finalized.

Tasks to be Initiated or Completed during the Next Reporting Period

- Submit revised RI EDD to the NYSDEC Environmental Information Management System.
- Submit the AAR to the NYSDEC.

If you should you have any questions or concerns, please contact me at (631) 756-8000 extension 1623.

Very truly yours,

H2M architects + engineers
