Re: Brownfield Cleanup Program Remedial Investigation
Bethpage Community Park Ice Rink Area – NYSDEC Site No.: C130212
Progress Report – August 2016

Dear Mr. Scharf:

On behalf of the Town of Oyster Bay (Town), H2M architects + engineers (H2M) is pleased to provide herein a progress report on the remedial investigation activity at the Bethpage Community Park Ice Rink Area pursuant to Appendix A, Section XI of the New York State Brownfield Site Cleanup Agreement (Index # C130212-01-12).

Tasks Initiated or Completed

- The Remedial Investigation (RI) Electronic Data Deliverable (EDD) containing groundwater sampling data were revised based on the New York State Department of Environmental Conservation (NYSDEC) comments and updated NYSDEC format files. The EDD files containing groundwater sampling data were successfully processed through the EQUIS electronic data processor (EDP) and submitted to the NYSDEC Environmental Information Management System (EIMS) Administrator.
- The RI EDD containing soil vapor data are being revised by the laboratory (naming the tentatively identified compounds [TIC] in a cascade fashion, identifying the TIC analyte name and/or determining the class for TICs identified in the soil vapor samples).
- An Alternative Analysis Report (AAR) is being finalized. Cost estimates are being obtained from potential vendors for alternatives included in the AAR.

Tasks to be Initiated or Completed during the Next Reporting Period

- After receipt of the revised data from the laboratory, the EDD will be checked with the EQUIS EDP. After the EDD pass through the EQUIS EDP with no errors, the revised RI EDD containing soil vapor data will be submitted to the NYSDEC EIMS Administrator.
- Submit the AAR to the NYSDEC.

If you should you have any questions or concerns, please contact me at (631) 756-8000 extension 1623.

Very truly yours,

H2M architects + engineers
