Re: Brownfield Cleanup Program Remedial Investigation
Bethpage Community Park Ice Rink Area – NYSDEC Site No.: C130212
Progress Report – October 2016

Dear Mr. Scharf:

On behalf of the Town of Oyster Bay (Town), H2M architects + engineers (H2M) is pleased to provide herein a progress report on the remedial investigation activity at the Bethpage Community Park Ice Rink Area pursuant to Appendix A, Section XI of the New York State Brownfield Site Cleanup Agreement (Index # C130212-01-12).

Tasks Initiated or Completed

- The Remedial Investigation (RI) Electronic Data Deliverable (EDD) containing soil vapor data were revised by the laboratory (naming the tentatively identified compounds [TIC] in a cascade fashion, identifying the TIC analyte name and/or determining the class for TICs identified in the soil vapor samples), where possible. The laboratory uses a NIST Library (NIST02.L) to identify the TICs. A list of TICs (and their corresponding CAS numbers) identified in the samples and not included in current New York State Department of Environmental Conservation (NYSDEC) Valid Values list is being compiled. As per the NYSDEC EDD Manual, the list of identified TICs will be submitted to the NYSDEC Electronic Information Management System (EIMS) Manager with a request for the TICs to be added to the Valid Values list.
- An Alternative Analysis Report (AAR) was finalized and submitted to the NYSDEC.

Tasks to be Initiated or Completed during the Next Reporting Period

- The finalized soil vapor EDD will be checked with the EQUIS Electronic Data Processor (EDP). After the EDD pass through the EQUIS EDP with no errors, the revised RI EDD containing soil vapor data will be submitted to the NYSDEC EIMS Administrator.

If you should have any questions or concerns, please contact me at (631) 756-8000 extension 1623.

Very truly yours,

H2M architects + engineers
