Re: Brownfield Cleanup Program Remedial Investigation
Bethpage Community Park Ice Rink Area
NYSDEC Site No.: C130212
Progress Report – June 2017

Dear Mr. Scharf:

On behalf of the Town of Oyster Bay (Town), H2M architects + engineers (H2M) is pleased to provide herein a progress report on the remedial investigation activity at the Bethpage Community Park Ice Rink Area pursuant to Appendix A, Section XI of the New York State Brownfield Site Cleanup Agreement (Index # C130212-01-12).

Tasks Initiated or Completed

- The AAR and information compiled by the Town, Northrop Grumman Systems, the United States Navy, and their consultants are under review by the Town.
- As per the New York State Department of Environmental Conservation (NYSDEC) approval issued on May 10, 2017, the Town is evaluating the current status of the ongoing remedial efforts at Bethpage Community Park and revising the AAR.
- Based on an email from the NYSDEC on June 26, 2017 and a telephone conversation with the NYSDEC on June 27, 2017, the NYSDEC intends to issue a decision document regarding a remedial strategy for the Site based on the investigation and analysis reports submitted to the NYSDEC thus far. The NYSDEC stated that a draft of the decision document would be provided to the Town for review and comment prior to finalizing the decision document.

Tasks to be Initiated or Completed during the Next Reporting Period

- After receiving a response from the NYSDEC Environmental Information Management System (EIMS) Manager regarding the TICs not included in the current NYSDEC Valid Values list, the finalized soil vapor EDD will be checked with the EQUIS Electronic Data Processor (EDP). After the EDD pass through the EQUIS EDP with no errors, the revised RI EDD containing soil vapor data will be submitted to the NYSDEC EIMS Administrator.
- After receiving the draft decision document from the NYSDEC, the Town will review the decision document and provide their comments to the NYSDEC.

If you should you have any questions or concerns, please contact me at (631) 756-8000 extension 1623.

Very truly yours,
H2M architects + engineers
