1.0 EXECUTIVE SUMMARY

Commander Terminal Holdings, LLC (Client) retained P.W. Grosser Consulting, Inc. (PWGC) to prepare a Phase I Environmental Site Assessment (ESA) for the property located at 1 Commander Square (AKA 4 South Street), Oyster Bay, New York. The purpose of the Phase I ESA was to identify and evaluate the presence of Recognized Environmental Conditions (RECs) at the subject site. RECs are the presence or likely presence of any hazardous substance or petroleum product under conditions that indicate an existing release, a past release or material threat of a release of any hazardous substance or petroleum product into structures on the property or into the ground, groundwater or surface water of the property.

The subject property consists of one parcel located at 1 Commander Square (AKA 4 South Street) in the Hamlet of Oyster Bay, New York. The site is located in the Town of Oyster Bay and Nassau County. The property is identified in the Nassau County Tax Map as Section 27, Block 16, and Lots 2, 3, 4 and 5.

The subject property measures approximately 3.21 acres and is occupied by a Major Oil Storage Facility (MOSF) operated by Global Commander Oyster Bay. The MOSF consists of 21 large capacity ASTs, a fueling rack, office building and garage building.

Work was conducted in accordance with the American Society for Testing and Materials (ASTM) Standard E 1527-13 (Standard Practices for Environmental Site Assessment: Phase I Environmental Site Assessment Process), 40 Code of Federal Regulations (CFR) Part 312 (Standards and Practices for All Appropriate Inquiry; Final Rule) and PWGC's proposal for services.

Potential RECs identified at the subject property were evaluated to determine whether items initially suspected to be RECs are in fact RECs. Evaluation of potential RECs are as follows:

- NYSDEC Spill #85-00426 is an active spill onsite which corresponds to the presence of petroleum impact in the soil and groundwater on the eastern portion of the property including the presence of free product in monitoring wells and free product seeping past the seawall and into Oyster Bay Harbor. The impact of this spill has been monitored routinely and remedial efforts including product removal and chemical oxidation have been applied. However, the impacts of the spill are still present onsite and remains an environmental concern. PWGC believes that NYSDEC Spill #85-00426 is a REC.

- NYSDEC Spill #99-25216 is an active spill onsite which corresponds to the presence of chlorinated solvent impact in the soil and groundwater on the eastern portion of the property due to a breach in the gasoline vapor recovery system once in place at the site. Remedial activities have involved the removal of approximately 125 tons of hazardous soils from the spill area and the installation of a groundwater treatment system. However, the impacts of the spill are still present onsite and contamination from this spill has possibly migrated into the adjacent property to the north. PWGC believes that NYSDEC Spill #99-25216 remains an environmental concern is a REC.
- Not including the two aforementioned active NYSDEC Spills, which are both considered RECs, the subject property is identified to be associated with 85 additional NYSDEC Spill incidents. The majority of these spills have been releases of small volumes (less than 30 gallons) of gasoline or fuel oil at the delivery truck filling station located in the center of the site and were cleaned up using sorbets. The larger spills incidents which included impact to the subsurface were remediated to the satisfaction of NYSDEC. The 85 closed NYSDEC spills associated with the site no longer represent an environmental concern to the subject property and PWGC considers these closed spills to be HRECs.
- The site appears to have been historically used for industrial purposes, including lumber processing, coal storage, and gasoline, diesel, and fuel-oil storage. Lumber processing is commonly associated with the use of heavy machinery and the use of metals and/or creosote for wood preserving. Coal storage can impact the subsurface with heavy metals and VOCs, especially if coal was staged directly on the ground surface. Prior to approximately 2005, the site operated as a MOSF storing and distributing gasoline, fuel-oil, and diesel fuel. Currently, the site is used for only fuel-oil and diesel fuel storage and distribution as it remains an active MOSF. Additionally, three active 275-gallon heating oil ASTs are present onsite to accommodate the heating systems associated with the buildings. Although the ASTs onsite were not identified to be in poor condition, the prolonged use as a MOSF with several ASTs and frequent filling and distribution events occurring it can not be ruled out that the sites use as a MOSF has impacted the subsurface. PWGC believes that the sites historical and current usage is a REC.
- During the site reconnaissance, PWGC observed various containers used for chemical storage onsite ranging from 55-gallon drums of fuel-oil additives in the garage to two active 7,500-gallon ASTs containing fuel-oil dye in the western containment area. PWGC did not observe improper housekeeping or evidence of leaks or staining in association with the chemical storage containers. PWGC does not believe that the chemical storage onsite is a REC.

- PWGC observed several 55-gallon drums onsite used to dispose of petroleum waste generation including spent sorbents, purge water, LNAPL recovered from monitoring wells onsite, and spent filters associated with the groundwater treatment system. The drums appeared to be properly labeled and in good condition and evidence of leaks associated with these drums was not observed. PWGC does not believe the waste generation associated with these drums constitutes a REC.
- The subject site is identified in the database report as a RCRA generator. This RCRA listing appears to be associated with the generation of hazardous chlorinated solvent waste associated with the former gasoline vapor coolant system, remedial activities associated with NYSDEC Spill #99-25216, and waste associated with the groundwater treatment system. The RCRA listing is associated with chlorinated solvent impact onsite which is an environmental concern. PWGC believes the sites listing as a RCRA generator is a REC.
- Several catch basins were identified at the subject property. One catch basin, located on the northeastern portion of the property, discharges directly to Oyster Bay Harbor. No surficial staining or improper chemical or petroleum storage was observed in conjunction with this catch basin. The other catch basins onsite are connected to an oil/water separator located on the south eastern portion of the site which discharges into the creek adjacent to the south of the property. Based on the presence of a functioning oil/water separator and the lack of staining near the north eastern catch basins, PWGC does not believe that the presence of onsite catch basins represents a REC.
- The subject site has the potential for vapor encroachment due to the documented active TCE and petroleum spills at the site. Such impact can off gas into the vapor phase and cause vapor intrusion issues within onsite buildings. PWGC believes that the potential for vapor encroachment represents a REC.
- The adjacent property to the north was identified to have been used historically for coal storage and to have contained two gasoline USTs onsite. Coal storage can impact the subsurface with contaminants namely heavy metals and VOCs, especially if coal was staged directly on the ground surface, and gasoline USTs are prone to leaks which can impact the subsurface. If potential impact from the coal storage and/or the gasoline UST impacted groundwater, it cannot be ruled out that contamination associated with the potential impact has migrated onto the subject property. PWGC believes that the historical use of the adjacent property to the north is a REC.

2.0 INTRODUCTION

2.1 Purpose

Commander Terminal Holdings, LLC (Client) retained P.W. Grosser Consulting, Inc. (PWGC) to prepare a Phase I Environmental Site Assessment (ESA) for the property located at 1 Commander Square (AKA 4 South Street), Oyster Bay, New York. The purpose of the Phase I ESA was to identify and evaluate the presence of Recognized Environmental Conditions (RECs) at the subject site. RECs are the presence or likely presence of any hazardous substance or petroleum product under conditions that indicate an existing release, a past release or material threat of a release of any hazardous substance or petroleum product into structures on the property or into the ground, groundwater or surface water of the property.

2.2 Scope of Services

The assessment consisted of a visual inspection of the site and surrounding areas, interviews, a review of historical information and aerial photographs, and a review of pertinent local, state, federal and facility records. Environmental Data Resources (EDR) of Shelton, Connecticut provided the following: a database search of environmental compliance records of sites within an ASTM standard radius of the property, a Sanborn fire insurance map search, historical aerial photograph search and a historical telephone directory search.

PWGC reviewed the environmental database report compiled by EDR as a part of the assessment. The purpose of the review was to identify reported listings for the subject property or other properties in the site vicinity. Databases reviewed included federal and state lists of known or suspected contaminated sites, lists of known handlers or generators of hazardous waste, lists of known waste disposal facilities, and lists of aboveground and underground storage tanks (ASTs and USTs). PWGC's review of the database has been incorporated into this report along with a copy of the EDR report.

The work was conducted in accordance with the American Society for Testing and Materials (ASTM) Standard E 1527-13 (Standard Practices for Environmental Site Assessment: Phase I Environmental Site Assessment Process), 40 CFR Part 312 (Standards and Practices for All Appropriate Inquiry; Final Rule) and PWGC's proposal for services.

2.3 Definitions

1. RECs are the presence or likely presence of any hazardous substance or petroleum product in, on, or at a property: (1) due to any release to the environment; (2) under the conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.
2. Historic RECs (HREC) are identified as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, activity or use limitations (AULs), institutional controls, or engineering controls).
3. Controlled RECs (CREC) are identified as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a No Further Action (NFA) letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls).
4. A *de minimus* condition generally does not present a threat to human health or of the environment, and generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimus* conditions are not RECs nor CRECs.

2.4 Significant Assumptions

PWGC has made the following significant assumptions in the preparation of this report:

1. Groundwater Flow Direction – Based upon regional groundwater elevation maps, and local topography, and previous environmental investigations, regional groundwater flow direction appears to be toward the southeast.
2. Regulatory Records Information - PWGC assumes that all information provided by EDR regarding the regulatory status of facilities within the ASTM Standard approximate minimum search distance is complete, accurate and current.
3. Other - PWGC assumes that all information provided through interviews is complete and unbiased.

2.5 Limitations and Exceptions

The conclusions presented in this report are professional opinions based on the data described in this report. These opinions have been arrived at in accordance with currently accepted engineering and hydrogeologic standards and practices applicable to this location, and are subject to the following inherent limitations:

1. The data presented in this report are from visual inspections, examination of records in the public domain, and interviews with individuals having information about the site. The passage of time, manifestation of latent conditions, or occurrence of future events may require further exploration of the site, analysis of data, and re-evaluation of the findings, observations, and conclusions presented in this report.
2. The data reported and the findings, observations, and conclusions expressed are limited by the scope of work. The scope of work was defined by the request of the client.
3. No warranty or guarantee, whether expressed or implied, is made with respect to the data reported, findings, observations, or conclusions. These are based solely upon site conditions in existence at the time of the investigation, and other information obtained and reviewed by PWGC.
4. PWGC's Phase I ESA report presents professional opinions and findings of a scientific and technical nature. While attempts were made to relate the data and findings to applicable environmental laws and regulations, the report shall not be construed to offer legal opinion or representations as to the requirements of, nor compliance with, environmental laws, rules, or regulations, or policies of federal, state, or local government agencies. PWGC does not assume liability for financial or other losses or subsequent damage caused by or related to any use of this document.
5. The conclusions presented in this report are professional opinions based on data described in this report. They are intended only for the purpose, site location, and project indicated. This report is not a definitive study of contamination at the site and should not be interpreted as such.
6. This report is based, in part, on information supplied to PWGC by third-party sources. While efforts have been made to substantiate this third-party information, PWGC cannot attest to the completeness or accuracy of information provided by others.

2.6 Special Terms and Conditions

Authorization to perform this assessment was given by a proposal for services between Commander Terminal Holdings, LLC and PWGC.

2.7 User Reliance

This report was prepared for the exclusive use of Commander Terminal Holdings, LLC. PWGC assumes no liability for use of this report by any person or entity other than those for which it was prepared.

2.8 Data Gaps

Any data gaps identified herein, as defined by ASTM Practice E 1527-13 § 3.2.20, are not considered to have significantly affected the ability to identify RECs in connection with the subject property and do not alter the conclusions of this report.

3.0 PROPERTY DESCRIPTION AND PHYSICAL SETTING

3.1 Location and Legal Description

The subject property consists of one parcel located at 1 Commander Square (AKA 4 South Street) in the Hamlet of Oyster Bay, New York. The site is located in the Town of Oyster Bay and Nassau County. The property is identified in the Nassau County Tax Map as Section 27, Block 16, and Lots 2, 3, 4 and 5.

A Site Location Map is included as **Figure 1** and a Site Plan is included as **Figure 2**; photos of the site are included in **Appendix A**.

3.2 Site Description and Improvements

The subject property measures approximately 3.21 acres and is occupied by a Major Oil Storage Facility (MOSF) operated by Global Commander Oyster Bay. The MOSF consists of 21 large capacity ASTs, a fueling rack, office building and garage building.

3.2.1 Municipal Services and Utilities

Utility services are provided to the property as follows:

- Heating/Cooling System – The office building is equipped with two fuel-oil powered heating systems and the garage building is powered with one fuel-oil powered heating system. Interior areas are cooled with electrical air conditioning units.
- Water Supply – The property is connected to the municipal water supply system.
- Sanitary System – The site is connected to the municipal sewer system.
- Electric – PSEG Long Island

3.3 Physical Setting

The topography of the site and surrounding area was reviewed from the USGS 7.5-minute series topographic map for the Bayville, New York quadrangle. The property elevation is approximately nine feet above the National Geodetic Vertical Datum (NGVD). Regional physiographic conditions are summarized below.

3.3.1 Regional Geology / Hydrogeology

The geologic setting of Long Island is well documented and consists of crystalline bedrock composed of schist and gneiss overlain by layers of unconsolidated deposits. Immediately overlying the bedrock is the Raritan Formation, consisting of the Lloyd sand confined by the Raritan Clay Member. The Lloyd sand is an aquifer and

consists of discontinuous layers of gravel, sand, sandy and silty clay, and solid clay. The Raritan Clay is a solid and silty clay with: few lenses of sand and gravel; abundant lignite and pyrite; and gray, red or white in color.

Above the Raritan Clay lies the Magothy Formation. The Magothy Aquifer consists of layers of fine to coarse sand of moderate to high permeability, with inter-bedded lenses of silt and clay of low permeability resulting in areas of preferential horizontal flow. Therefore, this aquifer generally becomes more confined with depth. The Magothy Aquifer is overlain by the Upper Glacial Aquifer. The Upper Glacial Aquifer is the water table aquifer at this location and is comprised of medium to coarse sand and gravel with occasional thin lenses of fine sand and brown clay. This aquifer extends from the land surface to the top of the Magothy and, therefore, is hydraulically connected to the Magothy Aquifer.

3.3.2 Local Hydrogeology

Based upon regional groundwater elevation maps, and local topography, and previous environmental investigations, the depth to groundwater beneath the site is approximately seven feet below existing grade and regional groundwater flow direction appears to be toward the southeast.

Based upon information contained within the EDR report, there is one public water supply well located 3/4th of a mile to the west of the subject property.

3.3.3 Flood Potential

PWGC reviewed the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Maps (FIRMs) to determine if the subject property is located within the 100-year or 500-year flood zones. Based upon FIRM data, it appears that the subject property is located within the 100 or 500-year flood zone (FEMA Map Panel ID: 36059C0044G).

3.3.4 Direction and Distance to Nearest Surface Water

Based on topographic maps, it appears that the nearest permanent surface water bodies are Oyster Bay Harbor, located adjacent to the east of the subject property, and White's Creek located adjacent to the south of the subject property.

4.0 PROPERTY USAGE

4.1 Current Property Usage

The subject property is currently used as fuel-oil storage and transfer facility.

4.2 Current Usage of Adjoining/Surrounding Properties

A summary of the surrounding properties is as follows:

Table 4-1 - Surrounding Property Usage

Direction	Property Description
North	Boat yard
South	White’s Creek, residential houses
East	Oyster Bay Harbor
West	Commercial and residential properties

4.3 Historical Usage of Subject Property and Surrounding Properties

Historical sources researched to determine past usage of the subject property and surrounding properties are as follows:

Sanborn Fire Insurance Maps - EDR was retained to provide historical Sanborn fire insurance maps of the subject and adjacent properties. Historical Sanborn maps for the subject property and surrounding area were reviewed for the years available which include 1897 to 1964. Review of the maps is summarized in Table 4-2. A copy of the historical Sanborn report is included in **Appendix B**.

Historical Topographic Maps - Historical topographic maps for the subject property and surrounding area were reviewed for the years available which include 1897 to 2013. Review of the maps is summarized in Table 4-2. Copies of historical topographic maps are included as **Appendix C**.

Historical Aerial Photographs - PWGC performed a review of readily available aerial photographs showing the subject property and surrounding area. Photographs were reviewed for the years available which include 1938 to 2017. Review of the photos is summarized in Table 4-2. A copy of the aerial photograph search is included in **Appendix D**.

City Directory Listings - EDR was retained to provide a directory of historical telephone listings at the subject property and surrounding properties. City directories were reviewed for the years available which include 1972 to 2014. A copy of the city directory report is included as **Appendix E**.

Table 4-2 - Subject Property Historical Usage

Date(s)	Source	Issues Noted	Description
1897 to 1909	SB, TM	Yes	The central and eastern portion of the property appears to be developed as a saw and planing mill including lumber storage, log sawing, and coal storage with a boat slip. The western portion of the property is developed with two residential dwellings.
1915 to 1922	SB	Yes	The central portion of the property is used as an ice plant and coal yard (building used as a mill previously). The eastern portion of the site is now improved with an office and storage building for a spring water company. The western portion of the property is occupied by residential dwellings.
1928	SB	Yes	The coal storage operations on the eastern side of the property have ceased. The building formerly occupied by the spring water company is used as an automobile garage. The ice plant operations are still present. The western portion of the property is occupied by residential dwellings.
1938 to 1957	SB, AP, TM	Yes	The ice plant operations in the central portion of the site are still present. The eastern portion of the site has been converted into fuel storage facility with several large aboveground storage tanks (containing gasoline, fuel oil, kerosene). The building formerly used as an automobile garage is occupied by an oyster shell crushing company. The western portion of the property is occupied by residential dwellings.
1962 to present	SB, AP, TM, CD	Yes	The property appears in its current approximate configuration as a bulk oil storage facility.

Sources: SB – Sanborn Map; TM – Historical Topographic Map; AP – Aerial Photograph; CD – City Directory

Historical usage of the subject property indicates that it was first developed prior to 1897 and used for coal storage and lumber processing until approximately 1909, ice production and coal storage until 1957, and petroleum storage from approximately 1962 to the present. Historical usage of the subject property indicative of potential RECs include the following:

- Lumber processing.
- Coal storage
- Petroleum storage including gasoline and fuel-oil.

Table 4-2 – Surrounding Area Historical Usage

Date(s)	Source	Issues Noted	Description
1897 - 1902	SB, TM	Yes	North: Machine shop, boat yard, and coal storage. South: Undeveloped. East: Oyster Bay Harbor. West: Residential, hotel.
1909	SB, TM	Yes	North: Machine shop, boat yard, and coal storage. South: Undeveloped, office building. East: Oyster Bay Harbor. West: Residential, hotel.
1915 - 1922	SB, TM	Yes	North: Residential, Oyster house, boat yard, and coal storage. South: Vacant East: Oyster Bay Harbor. West: Residential, hotel.
1928 - 1941	SB, TM	Yes	North: Residential, Oyster house, and commercial dock with two gasoline tanks. South: Residential East: Oyster Bay Harbor. West: Commercial.
1941 - 1962	AP	No	North: Oyster house buildings, and commercial dock with two gasoline tanks. South: Residential East: Oyster Bay Harbor. West: Commercial.
1964 - 1994	SB, AP	Yes	North: Commercial buildings, commercial dock. South: Residential East: Oyster Bay Harbor. West: Commercial, residential.
1994 - Present	AP, CD	Yes	North: Boat yard, commercial dock South: Residential. East: Oyster Bay Harbor West: Commercial

Sources: SB – Sanborn Map; TM – Historical Topographic Map; AP – Aerial Photograph; CD – City Directory

Review of historical information reviewed for the properties surrounding the subject property indicate that the area was first developed prior to approximately 1897 and has been generally used for various commercial purposes as well as residential. Historical usage of properties in the surrounding area indicative of potential RECs include the following:

- Adjacent property to the north was used for coal storage and as a commercial dock with two gasoline tanks

5.0 USER PROVIDED INFORMATION

5.1 User Requirements

The user of a Phase I ESA report, in accordance with the USEPA All Appropriate Inquiries (AAI) Rule and ASTM E1527-13 has certain responsibilities which include providing the following information, if available, to PWGC to be included within the Phase I Report. Additionally, PWGC provided the user of the report a User Questionnaire form. The information requested in the User Questionnaire is intended to assist in gathering information that may be material to identify if RECs are present at the subject property. A copy of the User Questionnaire and any provided documents are included in **Appendix F**; relevant information has been incorporated into this report.

5.2 Title Records

Title records for the site may contain information about past owners and uses of the subject property. The title report may also contain site information such as restrictive declarations which are limitations on site uses based upon know environmental conditions. PWGC was provided with a Chain of Title report for the property prepared by Landstar Title Agency dated July 23, 2019. The report is summarized below; a copy is included in **Appendix F**.

Deed Date(s)	Deed Holder	Relationship to Requestor	Operator(s)	Relationship to Requestor
3/1/2001	Commander Terminals Holdings, LLC	Requestor	Global Commander Oyster Bay	None
7/13/1971	Commander Oil Corp.	None	Commander Oil Corp.	None
12/19/1952	Benjamin Shapiro (Lot 4)	None	Unknown	N/A
1/9/1946	Benjamin Shapiro (Lots 2, 3, & 5)	None	Unknown	N/A
12/27/1928	William M. Dean Jr.	None	Unknown	N/A
Prior to 12/27/1928	Elbert H. Griffin & Adelaide D. Griffin	None	Unknown	N/A

5.3 Environmental Liens

An environmental lien is a charge, security or encumbrance upon title to a property to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup or other remediation of hazardous substances or petroleum products upon a property, including, but not limited to, liens imposed pursuant to CERCLA 42 USC § 9607 (1) & 9607(r) and similar state and local laws. As of the date of this report the user has not provided PWGC with a lien search or requested that PWGC perform a lien search.

5.4 Specialized Knowledge

The user provided no specialized knowledge about the property to PWGC.

5.5 Commonly Known or Reasonably Ascertainable Information

The user provided no commonly known information about the property to PWGC.

5.6 Valuation Reduction for Environmental Issues

The user provided no information regarding price adjustments to the subject parcels value due to environmental issues.

5.7 Owner, Property Manager and Occupant Information

The property is currently owned and occupied by Commander Terminals Holdings, LLC.

5.8 Reason for Performing Phase I ESA

The Phase I ESA was performed to evaluate potential RECs as part of the sites application to the New York State Department of Environmental Conservation's (NYSDEC) Brownfield Cleanup Program (BCP).

6.0 RECORDS REVIEW

6.1 Standard Environmental Record Sources

EDR of Shelton, Connecticut was retained to provide a database search of the project area within an ASTM-standard radius of the subject property. A list of the databases searched, and the search radius is shown on the summary table below. PWGC reviewed the database output to determine if the property appears on any of the regulatory agency lists. Detailed information concerning each database list is provided in the EDR report (**Appendix G**).

In order to evaluate the potential for a site to have an adverse impact to the subject site, the migration pattern of contaminants in media such as groundwater or soil vapor is considered. Based upon previous environmental reports, shallow groundwater directly beneath the site generally flows in a southeasterly direction. However, deeper groundwater located beneath a peat layer, which is approximately 6 to 12 feet below grade across the site, is estimated to flow in an easterly direction.

- Sites located northwest of the subject site are considered to have the highest potential to impact the subject site and are referred to as “up-gradient.”
- Sites located southeast of the subject site, which are not neighboring or adjacent to the subject site are considered to have the least potential to impact the subject site and are referred to as “downgradient.”
- All other sites not adjacent to or neighboring the subject property are referred to as “cross-gradient” and are considered to have minimal potential to impact the subject site.
- White’s Creek and Oyster Bay Harbor likely act as barriers to shallow groundwater flow; sites separated from the subject property by these bodies of water can be expected to be hydrogeologically isolated from the subject property with respect to shallow groundwater flow.

A summary of standard environmental record sources researched is as follows:

6.1.1 Federal Databases

The table below summarizes the Federal databases that were searched.

Table 6-1 - Federal Databases Searched

Agency	Listing Name or database Searched	Abbreviation	Search Distance	Target Property Identified	Nearby Properties Identified
USEPA	National Priority List	NPL	1.0 mile	No	0
USEPA	National Priority List Deletions	Delisted NPL	0.5 mile	No	0
USEPA	Superfund Enterprise Management System	SEMS	0.5 mile	No	0
USEPA	Superfund Enterprise Management System Archive	SEMS-ARCHIVE	0.5 mile	No	0
USEPA	Resource Conservation and Recovery Act Corrective Action Activity	CORRACTS	1.0 mile	No	0
USEPA	Resource Conservation and Recovery Act Treatment/Storage/Disposal Facilities	RCRA TSD	0.5 mile	No	0
USEPA	Resource Conservation and Recovery Act Small/Large Quantity Hazardous Waste Generators	RCRA SQG/LQG/CESQG/Non-Gen	Subject Property and Adjoining	Yes	0
USEPA	Federal Institutional/Engineering Control registries	US INST/ENG Controls	Subject Property	No	0
USEPA	Emergency Response Notification System	ERNS	Subject Property	Yes	N/A
USEPA	Superfund (CERCLA) Consent Decrees	CONSENT	1.0 mile	No	0
USEPA	Records of Decision	ROD	1.0 mile	No	0
USEPA	Mines Master Index	MINES	0.25 mile	No	0

Review of the EDR Radius Map Report indicates that the subject property is listed in Federal environmental databases searched. Nearby properties within the search radii for Federal environmental databases were not identified.

RCRA Generators - The RCRA Generators database is a compilation of reporting facilities that generate hazardous waste. Large Quantity Generators (LQG) generate more than 1000 kg of hazardous waste per month or more than 1 kg of acutely hazardous waste per month. Small Quantity Generators (SQG) generate more than 100 and less than 1000 kg of hazardous waste per month. Conditionally Exempt SQGs (CESQG) generate less

than 100 kg of hazardous waste per month or less than 1 kg of acutely hazardous waste per month. A RCRA non-generator (RCRA Non-Gen) no longer produces hazardous waste.

The subject property is identified as a RCRA SQG and a RCRA Non-Gen. The site’s listing as a RCRA Generator is associated with the generation of hazardous waste include lead, trichlorethylene, and vinyl chloride.

The properties adjacent to the subject site are not identified as RCRA generators.

Emergency Response Notification System - The Emergency Response Notification System (ERNS) is a national database used to collect information on reported releases of oil or hazardous substances.

The subject property is identified as an ERNS site with 17 incidents. The identified incidents each appear to be associated with petroleum spill incidents which are discussed in the NYSPILLS portion of Section 6.1.2.

6.1.2 State and Local Databases

The table below summarizes the State databases that were searched.

Table 6-2 - New York State and Local Databases Searched

Agency	Listing Name or database Searched	Abbreviation	Search Distance	Target Property Identified	Nearby Properties Identified
NYSDEC	Inactive Hazardous Waste Disposal Sites in New York State	SHWS	1.0 mile	No	1
NYSDEC	Hazardous Substance Waste Disposal Site Study	HSWDS	0.5 mile	No	0
NYSDEC	Solid Waste Facility Register	SWF/LF	0.5 mile	No	0
NYSDEC	Registered Recycling Facilities	SWRCY	0.5 mile	No	0
NYSDEC	Registered Waste Tire Storage Facilities	SWTIRE	0.5 mile	No	0
NYSDEC	Leaking Underground Storage Tank Sites	LTANKS	0.5 mile	Yes	17
NCDH/ NCFM	Petroleum Bulk Storage (PBS)	UST/AST	Subject Property and Adjoining	Yes	1
NYSDEC	Chemical Bulk Storage (CBS)	CBS AST/UST	Subject Property and Adjoining	Yes	0

Agency	Listing Name or database Searched	Abbreviation	Search Distance	Target Property Identified	Nearby Properties Identified
NYSDEC	Institutional/Engineering Control registries	INST/ENG Controls	Subject Property	No	N/A
NYSDEC	Voluntary Cleanup Agreements	VCP	0.5 mile	No	0
NYSDEC	Brownfield sites	Brownfields	0.5 mile	No	0
NYSDEC	Major Oil Storage Facilities	MOSF	0.5 mile	Yes	0
NYSDEC	New York State Spills	NYSPILLS	0.125 mile	Yes	18
NYSDEC	Dry Cleaner Site	Drycleaners	0.25 mile	No	0
NYC	E-Designation	E-DES	Subject Property	No	N/A

Review of the EDR Radius Map Report indicates that the subject property is listed in State environmental databases searched. The subject property and nearby properties identified within the ASTM standard State database search radii are detailed below.

New York State Inactive Hazardous Waste Disposal Sites - The New York State Department of Environmental Conservation (NYSDEC) maintains a state priority list of Inactive Hazardous Waste Disposal Sites (SHWS) considered to be actually or potentially contaminated and presenting a possible threat to human health and the environment. Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites.

The subject property is not identified as a SHWS site.

One property within the search radius, Jakobson Shipyard Inc, is identified as SHWS sites. This identified SHWS site appears to be located cross gradient of the subject property and as such, appears unlikely to represent an environmental concern to the subject property.

Leaking Underground Storage Tank Sites - The Leaking Underground Storage Tank Sites (LTANKS) database contains a NYSDEC inventory of reported leaking storage tank incidents. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills.

The subject property is identified as a LTANKS site with eight NYSDEC Spill numbers listed. The NYSDEC Spills incidents in conjunction with the LTANKS listings are as follows:

- NYSDEC Spill #93-03726 was opened on June 22, 1993 after a tank test failure was reported on a 7,500-gallon AST. The contents of the AST are not included in the database report and impact to the subsurface is not identified. The spill was closed on July 7, 1993 and, as such, does not currently represent an environmental concern at the site.
- NYSDEC Spill # 96-04927 was opened on July 16, 1996 after a fuel-oil delivery truck operator overfilled the trucks holding tank. According to the database report, the spill was contained to the fill rack and the driveway area. The spilled fuel oil was cleaned up using absorbent pads. The spill was closed on July 18, 1996 and, as such, does not currently represent an environmental concern at the site.
- NYSDEC Spill #99-09698 was opened on November 10, 1999 after a gasoline delivery truck operator overfilled the trucks holding tank. According to the database report, the spill was contained to a concrete surface and cleaned up with absorbent pads and Speedy Dry. The spill was closed on November 15, 1999 and, as such, does not currently represent an environmental concern at the site.
- NYSDEC Spill #92-13498 was opened on March 5, 1993 after approximately 10 gallons of fuel oil was spilled onto a concrete surface when a delivery truck operator overfilled the trucks holding tank. The spill was cleaned up using sorbent pads and was subsequently closed on July 28, 1993.
- NYSDEC Spill #96-04851 was opened on July 15, 1996 after a fuel-oil delivery truck operator overfilled the trucks holding tank. The spilled fuel oil was cleaned up using absorbent pads. The spill was closed on July 18, 1996 and, as such, does not currently represent an environmental concern at the site.
- NYSDEC Spill #88-02606 was opened on June 22, 1988 when diesel fuel being delivered to the fuel terminal via barge overfilled a storage tank onsite. The spilled diesel settled in a drainage dike within the containment area and impacted the subsurface. Impacted material was removed from the site and the spill was closed on July 7, 1988 and, as such, this spill does not currently represent an environmental concern at the site.
- NYSDEC Spill #96-1251 was opened on January 21, 1997 when approximately five gallons of fuel-oil were spilled onto the concrete surface of a loading dock after delivery truck operator overfilled the trucks holding tank. The spilled fuel oil was cleaned up and the spill was subsequently closed on January 22, 1997 and, as such, this spill does not currently represent an environmental concern at the site.

A total of 17 properties within the search radius are identified as LTANKS sites. Each of the 17 identified LTANKS sites have been closed by NYSDEC, and as such appear unlikely to represent an environmental concern to the subject property.

Petroleum Bulk Storage - The NYSDEC Petroleum Bulk Storage (PBS) - UST database lists facilities with a petroleum storage capacity of more than 1,100 gallons and less than 400,000 gallons. The NYSDEC Petroleum Bulk Storage - AST database lists facilities with registered ASTs.

The subject property is registered as a PBS site. The AST database listing for the site does not list specific tanks present at the site; further information regarding the tanks at the site is included in the MOSF section below.

One property adjacent to the subject property, Franklin M. Flower and Sons Inc., is identified as a PBS site. The site is identified to have an active gasoline AST and a removed gasoline UST, according to the database report. Information pertaining to the volumes of these tanks is not provided. The presence of tanks alone does not necessarily represent an environmental concern. Sites with spills or releases will be addressed in the appropriate section.

Chemical Bulk Storage - The Chemical Bulk Storage (CBS) database is a NYSDEC list of facilities that store regulated hazardous substances in aboveground tanks (AST) with capacities of 185 gallons or greater or underground tanks (UST) of any size.

The subject property is identified as a CBS site. The following tanks are listed in the CBS database:

Tank ID	Tank Type	Contents	Capacity (gallons)	Notes
001	AST	Napthalene	2000	
002	AST	Napthalene	2000	

It should be noted that these tanks were not observed to be present during site reconnaissance (see Section 7.4).

No properties adjacent to the subject property are identified as CBS sites. The presence of CBS tanks alone does not necessarily represent an environmental concern. Sites with spills or releases will be addressed in the appropriate section.

Major Oil Storage Facilities - The NYSDEC Major Oil Storage Facilities (MOSF) database lists facilities or vessels with a petroleum storage capacity of more than 400,000 gallons.

The subject property is identified as a MOSF site. The following tanks are listed in the MOSF database:

Tank ID	Tank Type	Contents	Capacity (gallons)	Notes
1	AST	Diesel	91,896	
2	AST	Diesel	136,835	
3	AST	Diesel	91,896	
4	AST	Diesel	5,838	
5	AST	Unleaded Gasoline	5,838	
6	AST	Empty	22,260	
7	AST	Diesel	22,260	
8	AST	Diesel	22,260	
9	AST	Empty	14,784	
10	AST	Unleaded Gasoline	94,668	
11	AST	Unleaded Gasoline	186,606	
12	AST	Empty	23,226	
15	AST	Unleaded Gasoline	196,770	
16	AST	Unleaded Gasoline	471,198	
17	AST	Unleaded Gasoline	471,282	
18	AST	Unleaded Gasoline	508,158	
19	AST	Unleaded Gasoline	496,818	
20	AST	Fuel Oil	705,012	
21	AST	Fuel Oil	705,012	
22	AST	Fuel Oil	676,788	
23	AST	Fuel Oil	676,788	
24	AST	Fuel Oil	3,000	

It should be noted that the tanks listed in the MOSF database do not completely match with the tanks observed during site reconnaissance (see Section 7.2).

No properties within the search radius are identified as MOSF sites. The presence of tanks alone does not necessarily represent an environmental concern. Sites with spills or releases will be addressed in the appropriate section.

New York State Spills - The New York State Spills Information Database (NYSPILLS) contains data collected on chemical and petroleum spill incidents reported to NYSDEC since April 1, 1986.

The subject property is identified as a NYSPILLS site with 83 identified Spill incidents. Of the 83 NYSPILLS records identified to be associated with the subject property, two spills records are currently active. The NYSDEC Spill incidents associated with the site are summarized as follows:

Active Spills

- NYSDEC Spill #99-25216 was opened on July 27, 1999 due to a spill involving the release of approximately 300 gallons of TCE which was to be added to the gasoline AST cooling system on the western portion of the property. The database report does not include information pertaining to media impacted or remedial efforts, however, it is understood that the groundwater treatment system which remains active onsite is in place due to TCE impact in the groundwater on site. The spill is currently active and PWGC believes it to represent an environmental concern at the subject property.
- NYSDEC Spill #85-00426 was opened on May 6, 1985 after petroleum was observed along the bulkhead on Oyster Bay Harbor and the adjacent creek. Further investigations by NYSDEC documented the presence of free product in onsite monitoring wells and petroleum impacted soils on the property. This spill is associated with the ongoing seep of free product that flows out of the seams of the bulkhead and into Oyster Bay Harbor. Currently, there are a series of containment and sorbent booms installed around the bulkhead to control the spread of product into the water, however the spill remains open and represents an environmental concern at the subject property.

Closed Spills

- NYSDEC Spill #18-00855 was opened on April 26, 2018 after approximately 15 gallons of petroleum was released. The cause and media effected are not identified in the database report. However, the spill was closed on May 22, 2018 after satisfactory remedial efforts were undertaken and, as such, this spill appears to no longer represent an environmental concern at the subject property.

- NYSDEC Spill #09-11725 was opened on February 3, 2010 after the ground near a pipe connected to a pump manifold was observed to be wet. Upon further inspection, it could not be determined if the pipe in question was leaking or not. However, the pipe was replaced as a precaution and the spill was closed on February 8, 2010. This spill appears to no longer represent an environmental concern at the subject property.
- NYSDEC Spill #09-12036 was opened on March 15, 2010 following a severe rainstorm when a pump manifold within the secondary containment area was observed to be leaking #2 fuel-oil. Information pertaining to the volume of the release and the media effected was not included in the database report other than it was estimated to be “a few gallons” according to a site employee. Remedial action was taken and repairs to the manifold were made and the spill was closed on September 28, 2010. This spill appears to no longer represent an environmental concern at the subject property.
- NYSDEC Spill #01-04512 was opened on July 27, 2001 after a #2 fuel-oil spill occurred within the containment area of the truck filling area and was contained to the concrete surface and a nearby trench drain. The remediation generated two 55-gallon drums of impacted sentiment from the trench drain and concrete surface. The spill was closed on August 28, 2001 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #05-00122 was opened on April 4, 2005 after approximately five gallons of gasoline was spilled at the truck filling area after a fuel delivery truck overfilled the trucks holding tank. Information pertaining to media effected and remedial actions is not included in the database report other than the spill was on land and contained. The spill was closed on April 6, 2005 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #12-12886 was opened on December 26, 2012 after a release involving 40 gallons of #2 fuel-oil was reported. According to the database report, the spill involved the overflow of a tank truck caused by human error in the truck filing area. Information pertaining to remedial efforts and media effected was not included in the database report. However, the spill was closed on February 12, 2013 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #05-01719 was opened on May 12, 2005 after the pressure gauge associated with a fuel-oil additive line failed. According to the NYSDEC memo, approximately 200 gallons of additive were released into the containment area. Remedial efforts included the removal of approximately 16 yards of impacted soil from within the containment area. The spill was closed on November 28, 2005 and, as such, no longer appears to represent an environmental concern at the subject property.

- NYSDEC Spill #00-08200 was opened on October 13, 2000 after a gasoline truck operator overfilled the trucks holding tank at the truck filling area. The spill was contained to the concrete surface and was not identified to have impacted the subsurface according to the database report. The spill was closed on October 25, 2000 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #01-11257 was opened on February 27, 2002 when approximately 215 gallons of gasoline was spilled after a gasoline delivery truck operator overfilled the trucks holding tank. The gasoline spill was contained to the concrete surface and the filling area containment. The spill was closed on March 5, 2003 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #01-07014 was opened on October 5, 2001 after approximately 10 gallons of gasoline was released. Information related to the media effected and location of the spill within the site was not provided in the database report. The spill was closed on July 27, 2005 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #01-11584 was opened on March 8, 2002 after approximately six gallons of #2 fuel-oil was released after a fuel-oil delivery truck operator overfilled the truck's holding tank. The spill was contained to the concrete surface of the truck filling area and was cleaned up using sorbent pads and the spill was closed on January 28, 2004. This spill appears to no longer represent an environmental concern at the subject property.
- NYSDEC Spill #02-00709 was opened on April 18, 2002 after approximately 12 gallons of gasoline fuel was released after a gasoline delivery truck operator overfilled the truck's holding tank. The spill was contained to the concrete surface of the filling area and remediated using sorbent pads. The spill was closed on April 18, 2002 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #02-02597 was opened on June 11, 2002 after approximately 15 gallons of diesel fuel spilled after a delivery truck operator overfilled the truck's holding tank. The gasoline spill was confined to the containment area of the truck filling location. The containment area was pumped out with a vacuum truck and sorbent pads were used to clean up residual diesel fuel on the concrete surface. The spill was closed on January 28, 2004 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #02-09339 was opened on December 11, 2002 after a minor release of #2 fuel-oil. Information pertaining to the volume, location, and media impacted is not included in the database

report. However, the spill was closed on December 12, 2002 and, as such, no longer appears to represent an environmental concern at the subject property.

- NYSDEC Spill #02-10236 was opened on January 10, 2003 after approximately 20 gallons of #2 fuel-oil was spilled after a delivery truck operator overfilled the truck's holding tank. According to the database report, the spill was contained to the truck filling area and was cleaned up using sorbent pads. The spill was closed on January 28, 2004 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #03-06342 was opened on September 15, 2003 after approximately 15 gallons of gasoline was spilled after the automatic shut-off failed on a gasoline delivery truck and overfilled the truck's holding tank. According to the database report, the spill was contained to the truck filling area and the spill was remediated using sorbent pads. No impact to the subsurface was identified in conjunction with this release. The spill was closed on September 18, 2003 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #03-11049 was opened on December 27, 2003 after approximately 10 to 15 gallons of gasoline was spilled after a gasoline delivery truck operator overfilled the truck's holding tank. According to the database report, the spill was confined to the filling area's containment zone and only the concrete surface was impacted. The spill was remediated using speedi-dry and sorbent pads. The spill was closed on December 30, 2003 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #92-07767 was opened on October 5, 1992 after approximately 5 gallons of #2 fuel-oil was spilled after a fuel-oil delivery truck operator overfilled the trucks holding tank. According to the database report, the fuel-oil was spilled onto the concrete surface of the filling area. The spill was closed on September 9, 1993 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #93-11736 was opened on January 3, 1994 after approximately 500 gallons of #2 fuel-oil was released. Information pertaining to the cause of the spill or the media effected is not included in the database report. The database report states that the released material did not reach the water and a vacuum truck was used to remediate the spill. The spill was closed on August 7, 1995 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #96-04212 was opened on June 27, 1996 after approximately 5 gallons of gasoline was spilled after a gasoline delivery truck operator overfilled the truck's holding tank. According to the

database report, the spilled gasoline was confined to the concrete surface of the truck fulling area and was cleaned up using sorbent pads. The spill was closed on June 28, 1996 and, as such, no longer appears to represent an environmental concern at the subject property.

- NYSDEC Spill #97-10179 was opened on December 4, 1997 after approximately 20 gallons of #2 fuel-oil was spilled after a fuel-oil delivery truck operator overfilled the trucks holding tank. According to the database report, the fuel-oil was spilled onto the concrete surface of the filling area. The spill was cleaned up using speedi-dri and sorbent pads and was not identified to have impacted the subsurface. The spill was closed on December 5, 1997 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #97-12918 was opened on February 19, 1998 after #2 fuel-oil was discovered in the containment trench. The database report indicates that the volume of the oil was small and was cleaned up using sorbent pads. The spill was closed on January 28, 2004 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #98-10563 was opened on November 20, 1998 after approximately 20 gallons of gasoline was spilled after a gasoline delivery truck operator overfilled the truck's holding tank. According to the database report, the spilled gasoline was confined to the concrete surface of the truck fulling area and was cleaned up using sorbent pads. The spill was closed on November 24, 1998 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #98-12591 was opened on January 12, 1999 after approximately 10 gallons of #2 fuel-oil was spilled after a fuel-oil delivery truck operator overfilled the trucks holding tank. According to the database report, the fuel-oil was spilled onto the concrete surface of the filling area. The spill was cleaned up using speedi-dri and sorbent pads and was not identified to have impacted the subsurface. The spill was closed on January 28, 2004 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #98-14477 was opened on March 4, 1999 after approximately 10 gallons of #2 fuel-oil was spilled after a fuel-oil delivery truck operator overfilled the trucks holding tank. According to the database report, the fuel-oil was spilled onto the concrete surface of the filling area. The spill was cleaned up using speedi-dri and sorbent pads and was not identified to have impacted the subsurface. The spill was closed on January 28, 2004 and, as such, no longer appears to represent an environmental concern at the subject property.

- NYSDEC Spill #99-03460 was opened on June 25, 1999 after approximately 30 gallons of gasoline was spilled after a gasoline delivery truck operator overfilled the truck's holding tank. According to the database report, the spilled gasoline impacted the trench drain and associated oil/water separator. The spilled gasoline was recovered, and the residual gasoline was cleaned out from the truck by utilizing a power washer. The spill was closed on January 28, 2004 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #99-04390 was opened on July 14, 1999 after approximately 15 gallons of gasoline was spilled after a gasoline delivery truck operator overfilled the truck's holding tank. According to the database report, the spilled gasoline was confined to the concrete surface of the truck filling area and was cleaned up using sorbent pads. The spill was closed on January 28, 2004 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #08-11585 was opened on January 22, 2009 after approximately 20 gallons of #2 fuel-oil was spilled after a fuel-oil delivery truck operator overfilled the trucks holding tank. According to the database report, the fuel-oil was spilled onto the concrete surface of the filling area. The spill was cleaned up using speedi-dri and sorbent pads and was not identified to have impacted the subsurface. The spill was closed on July 9, 2013 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #05-13804 was opened on March 2, 2006 after approximately 10 gallons of #2 fuel-oil was spilled after a fuel-oil delivery truck operator overfilled the trucks holding tank. According to the database report, the fuel-oil was spilled onto the concrete surface of the filling area. The spill was cleaned up using speedi-dri and sorbent pads and was not identified to have impacted the subsurface. The spill was closed on December 14, 2007 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #06-10159 was opened on December 7, 2006 after a vessel delivering material spilled approximately 4,000 gallons of ethanol into Oyster Bay Harbor and approximately 500 gallons of ethanol into a secondary containment area. According to the database report, the material spilled into the water was not recoverable and the material captured by the secondary containment was pumped out and salvaged. The spill was closed on December 7, 2006 likely due to the nature of the spill and that remedial efforts were not an option once the material was dissolved into the water. The effects of this spill did not appear to directly impact the subject property based on the information available in the database report and, as such, does not appear to represent an environmental concern at the subject property.

- NYSDEC Spill #06-12815 was opened on February 27, 2007 after approximately 50 gallons of #2 fuel-oil was spilled from a fuel-oil delivery truck. According to the database report, the spill was contained to the concrete surface of the filling area and was cleaned up using sorbent pads and speedi-dri. The spill was closed on March 1, 2007 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #06-13262 was opened on March 10, 2007 after approximately 15 gallons of #2 fuel-oil was spilled after a delivery truck operator overfilled the truck's holding tank. According to the database report, approximately 2 cubic yards of soil was excavated and disposed of offsite in order to remediate the impact from this spill. The spill was closed on March 23, 2007 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #07-09777 was opened on December 11, 2007 after approximately gallons of #2 fuel-oil was spilled onto the concrete surface of the filling area after the handle of the dispenser pump jammed. The spill was contained to the concrete surface and was cleaned up using speedi-dri and sorbent pads. The spill was closed on December 14, 2007 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #16-11516 was opened on March 27, 2017 less than one gallon of gasoline was spilled into Oyster Bay Harbor as a result of a small vessel capsizing. A series of sorbent booms and pads were placed in the area of the spill until a visible sheen on the water was no longer observed. The spill was closed on March 28, 2017 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #10-05300 was opened on August 11, 2010 after approximately 8 gallons of #2 fuel-oil was spilled on to the concrete surface of the filling area due to a loading pipe failure. According to the database report, the spilled fuel-oil was confined to the concrete surface and cleaned up using speedi-dri and sorbent pads. The spill was closed on September 28, 2010 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #93-03726 was opened on June 23, 1993 after a tank test failure was reported on a 7,500-gallon storage tank. Information pertaining to the contents and location of the tank were not included in the database report, however a release of product was not identified in conjunction with this spill. The spill was closed on July 8, 1993 and, as such, no longer appears to represent an environmental concern at the subject property.

- NYSDEC Spill #96-04927 was opened on July 16, 1996 after approximately 5 gallons of diesel fuel was spilled after a diesel truck delivery operator overfilled the truck's holding tank. According to the database report, the spill was confined to the concrete surface of the filling area and was cleaned up using sorbent pads. The spill was closed on July 18, 1996 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #18-04377 was opened on July 24, 2018 after approximately 504 gallons of #2 fuel-oil was released into Oyster Bay Harbor after a vessel collided with the fill port dock. The released product was contained with sorbent and containment booms on the surface of the water. The spill remediation was undertaken by the United States Coast Guard and the spill was closed on July 24, 2018.
- NYSDEC Spill #17-09578 was opened on January 18, 2018 after approximately 10 gallons of #2 fuel-oil was spilled after a fuel-oil delivery truck operator overfilled the truck's holding tank. According to the database report, the fuel-oil was spilled onto the concrete surface of the filling area. The spill was cleaned up using speedi-dri and sorbent pads and was not identified to have impacted the subsurface. The spill was closed on February 28, 2018 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #14-08829 was opened on November 11, 2014 after approximately 50 gallons of #2 fuel-oil was spilled after a fuel-oil delivery truck overfilled the truck's holding tank. According to the database report, the spill was confined to the concrete surface of the truck filling area and the adjacent trench drain. Free product contained in the trench drain was removed using a vacuum truck and oil on the concrete surface was removed using sorbent pads. The spill was closed on December 23, 2014 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #14-08822 was opened on November 28, 2014 after approximately 5,000 gallons of #2 fuel-oil was released when product was being transferred between storage tanks. According to the database report, the spill occurred within the tanks secondary containment. Approximately 1,200 gallons of free product was removed via vacuum truck and approximately 53 cubic yards of impacted soils were removed via guzzler truck. The spill was closed on February 10, 2015 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #18-01193 was opened on May 3, 2018 after approximately 10 gallons of #2 fuel-oil was spilled after a fuel-oil delivery truck operator overfilled the truck's holding tank. According to the database report, the fuel-oil was spilled onto the concrete surface of the filling area. The spill was cleaned up using speedi-dri and sorbent pads and was not identified to have impacted the subsurface.

The spill was closed on May 22, 2018 and, as such, no longer appears to represent an environmental concern at the subject property.

- NYSDEC Spill #12-15402 was opened on February 8, 2013 after approximately 30 gallons of #2 fuel-oil was spilled after a fuel-oil delivery truck operator overfilled the trucks holding tank. According to the database report, the fuel-oil was spilled onto the concrete surface of the filling area. The spill was cleaned up using speedi-dri and sorbent pads and was not identified to have impacted the subsurface. The spill was closed on February 12, 2013 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #12-15241 was opened on February 2, 2018 after approximately 25 gallons of #2 fuel-oil was spilled after a fuel-oil delivery truck operator overfilled the trucks holding tank. According to the database report, the fuel-oil was spilled onto the concrete surface of the filling area. The spill was cleaned up using speedi-dri and sorbent pads and was not identified to have impacted the subsurface. The spill was closed on February 12, 2013 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #12-03968 was opened on July 23, 2012 after approximately 5 gallons of #2 fuel-oil was released into the secondary containment area during a pipe repair. According to the database report, a small amount of impacted soil was remediated from the spill location and sorbent pads were used to clean up the remaining oil. The spill was closed on December 3, 2012 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #18-11002 was opened on January 30, 2019 after approximately 10 gallons of #2 fuel-oil was spilled after a fuel-oil delivery truck operator overfilled the trucks holding tank. According to the database report, the fuel-oil was spilled onto the concrete surface of the filling area. The spill was cleaned up using speedi-dri and sorbent pads and was not identified to have impacted the subsurface. The spill was closed on February 13, 2013 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #12-07524 was opened on October 30, 2012 after approximately 10 gallons of #2 fuel oil was released after an incident caused by Hurricane Sandy occurred. Information pertaining to the source of the spill or the media impacted is not included in the database report. However, the spill was closed on May 10, 2013 and, as such, does not appear to represent an environmental concern to the subject property.

- NYSDEC Spill #13-11845 was opened on March 20, 2014 after red dye was observed on a puddle of rain water beneath a 7,500-gallon AST containing dye within a containment area was observed. According to the database report, approximately 2,000 gallons of potentially dye impacted rainwater was removed from the containment area as a remedial effort. The spill was closed on June 5, 2014 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #13-01559 was opened on May 15, 2013 after approximately 30 gallons of diesel fuel was spilled into the truck filling area. According to the database report, the spill was confined to the concrete surface and the drainage trench which is connected to an oil water separator. Remedial activities included using sorbent pads, removing impacted sediments entrained in the trench, and servicing the oil water separator. The spill was closed on August 14, 2014 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #12-11247 was opened on March 1, 2014 after approximately 30 gallons of #2 fuel-oil was spilled after a fuel-oil delivery truck operator overfilled the truck's holding tank. According to the database report, the fuel-oil was spilled onto the concrete surface of the filling area. The spill was cleaned up using speedi-dri and sorbent pads and was not identified to have impacted the subsurface. The spill was closed on March 25, 2014 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #18-08502 was opened on November 9, 2018 after approximately 10 gallons of #2 fuel-oil was spilled after a fuel-oil delivery truck operator overfilled the truck's holding tank. According to the database report, the fuel-oil was spilled onto the concrete surface of the filling area. The spill was cleaned up using speedi-dri and sorbent pads and was not identified to have impacted the subsurface. The spill was closed on December 6, 2018 and, as such, no longer appears to represent an environmental concern at the subject property.
- NYSDEC Spill #18-08501 was opened on November 9, 2018 approximately 10 gallons of #2 fuel-oil was spilled after a fuel-oil delivery truck operator overfilled the truck's holding tank. According to the database report, the fuel-oil was spilled onto the concrete surface of the filling area. The spill was cleaned up using speedi-dri and sorbent pads and was not identified to have impacted the subsurface. The spill was closed on November 11, 2018 and, as such, no longer appears to represent an environmental concern at the subject property.

- NYSDEC Spill #86-02387 was opened on July 11, 1986. Details of the spill are not available in the database report as the file for the spill has since been destroyed. The spill was closed on April 22, 1987 and it is not likely this spill represents an environmental concern at the subject property.
- NYSDEC Spill #05-05968 was opened on August 15, 2005 after approximately 10 gallons of #2 fuel-oil was spilled after a fuel-oil delivery truck operator overfilled the truck's holding tank. According to the database report the spill was confined to the concrete surface and cleaned up with sorbent pads. The spill was closed on December 14, 2007 and it is not likely this spill represents an environmental concern at the subject property.
- NYSDEC Spill #92-12739 was opened on February 11, 1993 after approximately 5 gallons of #2 fuel-oil was spilled after a fuel-oil delivery truck operator overfilled the truck's holding tank. According to the database report the spill was confined to the concrete surface and cleaned up with speedi-dri. The spill was closed on February 11, 1993 and it is not likely this spill represents an environmental concern at the subject property.
- NYSDEC Spill #98-12942 was opened on January 21, 1999 after approximately 10 gallons of #2 fuel-oil was spilled after a fuel-oil delivery truck operator overfilled the truck's holding tank. According to the database report the spill was confined to the concrete surface and cleaned up with sorbent pads. The spill was closed on June 29, 1999 and it is not likely this spill represents an environmental concern at the subject property.
- NYSDEC Spill #91-11538 was opened on February 8, 1992 after approximately 3 gallons of diesel fuel seeped from the overflow vent of a vessel in Oyster Bay Harbor. According to the database report, the spill dissipated into the water and the spill was closed on February 11, 1992 and, as such, does not represent an environmental concern to the subject property.
- NYSDEC Spill #06-13021 was opened on March 3, 2007 after approximately 10 gallons of #2 fuel-oil was released into Oyster Bay Harbor as a result of a stress fracture on a delivery barge. According to the database report, the barge was surrounded with containment boom and sorbet pads were applied to the sheen observed in the water. The spill was closed on March 3, 2007 and it is not likely this spill represents an environmental concern at the subject property.
- NYSDEC Spill #00-01458 was opened on May 5, 2000 after approximately 10 gallons of gasoline was spilled after a gasoline truck delivery operator overfilled the truck's holding tank. According to the database report, the spill was confined to the concrete surface of the truck filling area and was cleaned

up using sorbent pads. The spill was closed on June 29, 2000 and it is not likely this spill represents an environmental concern at the subject property.

- NYSDEC Spill #93-14877 was opened on March 19, 1994 after approximately 3 gallons of diesel fuel was spilled after a diesel delivery truck overfilled the truck's holding tank. According to the database report the spill was confined to the concrete surface and cleaned up with sorbent pads and speedi-dri. The spill was closed on February 27, 1995 and it is not likely this spill represents an environmental concern at the subject property.
- NYSDEC Spill #98-25224 was opened on February 1, 1999 during a utility upgrade when impacted soils were observed. Information pertaining to the exact location of the spill, the material encountered, and remedial efforts were not included in the database report. However, the spill was closed on October 26, 2016 and, as such, no longer represents an environmental concern to the subject property.
- NYSDEC Spill #00-11191 was opened on January 14, 2001 after approximately 20 gallons of #2 fuel-oil was spilled when a fuel-oil delivery truck operator overfilled the truck's holding tank. According to the database report the spill was confined to the concrete surface and cleaned up with sorbent pads. The spill was closed on July 16, 2008 and it is not likely this spill represents an environmental concern at the subject property.
- NYSDEC Spill #03-07944 was opened on October 28, 2003 after approximately 10 gallons of #2 fuel-oil was spilled when a fuel-oil delivery truck operator overfilled the truck's holding tank. According to the database report the spill was confined to the concrete surface and cleaned up with sorbent pads and speedi-dri. The spill was closed on January 28, 2004 and it is not likely this spill represents an environmental concern at the subject property.
- NYSDEC Spill #91-02638 was opened on June 5, 1991 after approximately 5 gallons of #2 fuel-oil was spilled when a fuel-oil delivery truck operator overfilled the truck's holding tank. According to the database report the spill was confined to the concrete surface and cleaned up with absorbents. The spill was closed on June 6, 1991 and it is not likely this spill represents an environmental concern at the subject property.
- NYSDEC Spill #99-95170 was opened on July 29, 1999 after approximately 10 gallons of gasoline was spilled when a gasoline delivery truck operator overfilled the truck's holding tank. According to the database report the spill was confined to the concrete surface and cleaned up with sorbent pads. The spill was closed on January 28, 2004 and it is not likely this spill represents an environmental concern at the subject property.

- NYSDEC Spill #99-07589 was opened on September 23, 1999 after approximately 5 gallons of gasoline was spilled when a gasoline delivery truck operator overfilled the truck's holding tank. According to the database report the spill was confined to the concrete surface and cleaned up with sorbent pads. The spill was closed on January 28, 2004 and it is not likely this spill represents an environmental concern at the subject property.
- NYSDEC Spill #92-13418 was opened on March 5, 1993 after approximately 25 gallons #2 fuel-oil spilled when a fuel-oil delivery truck operator overfilled the truck's holding tank. According to the database report the spill was confined to the concrete surface and cleaned up with sorbent pads. The spill was closed on July 28, 1993 and it is not likely this spill represents an environmental concern at the subject property.
- NYSDEC Spill #89-02414 was opened on June 8, 1989 after a gasoline spill occurred in the truck filling area. Information pertaining to the volume of the release was not included in the database report, however, it was noted that the spill was contained to the containment dike and did not impact the subsurface. The spill was closed on October 18, 1990 and it is not likely this spill represents an environmental concern at the subject property.
- NYSDEC Spill #96-13051 was opened on February 4, 1997 after approximately 5 gallons #2 fuel-oil spilled when a fuel-oil delivery truck operator overfilled the truck's holding tank. According to the database report the spill was confined to the concrete surface and cleaned up with sorbent pads. The spill was closed on February 10, 1997 and it is not likely this spill represents an environmental concern at the subject property.
- NYSDEC Spill #04-13608 was opened on March 30, 2005 after approximately 8 gallons of #2 fuel-oil spilled when a fuel-oil delivery truck operator overfilled the truck's holding tank. According to the database report the spill was confined to the concrete surface and cleaned up with sorbent pads. The spill was closed on April 5, 2005 and it is not likely this spill represents an environmental concern at the subject property.
- NYSDEC Spill #02-09335 was opened on December 11, 2002 after approximately 20 gallons of #2 fuel oil when a fuel-oil delivery truck operator overfilled the truck's holding tank. According to the database report the spill was confined to the concrete surface and cleaned up with sorbent pads and speedi-dri. The spill was closed on December 24, 2002 and it is not likely this spill represents an environmental concern at the subject property.

- NYSDEC Spill #91-09860 was opened on December 16, 1991 after approximately 15 gallons of gasoline was released in to Oyster Bay Harbor after a holding compartment on a delivery barge suffered a leak. The spill was contained with booms and the observable sheen was contained. The spill was closed on December 17, 1991 and it is not likely this spill represents an environmental concern at the subject property.
- NYSDEC Spill #89-04111 was opened on July 25, 1989. According to the database report, the file documenting the spill has been destroyed. However, the limited retained information describes that a sheen was observed on Oyster Bay Harbor and it was assumed that the source of the sheen was coming from the subject property. The spill was closed on July 26, 1989 and it is not likely this spill represents an environmental concern at the subject property.
- NYSDEC Spill #88-05341 was opened on September 21, 1988 after approximately 15 gallons of #2 fuel oil when a fuel-oil delivery truck operator overfilled the truck's holding tank. According to the database report the spill was confined to the concrete surface and cleaned up with absorbents. The spill was closed on October 12, 1990 and it is not likely this spill represents an environmental concern at the subject property.
- NYSDEC Spill #88-04915 was opened on September 3, 1988. According to the database report, the file documenting the spill has been destroyed. However, the limited retained information describes that one gallon of gasoline was spilled into Oyster Bay Harbor. According to the limited information in the database report, NYSDEC advised that a boom not be applied so the spill can dissipate naturally since it was a minor volume. The spill was closed on September 6, 1988 and it is not likely this spill represents an environmental concern at the subject property.
- NYSDEC Spill #92-10504 was opened on December 11, 1992 after sheen was observed on the creek adjacent to the property. Over the course of approximately four years several vacuum truck visits were arranged to remove floating product and oily water from the creek. Additionally, approximately 80 cubic yards of impacted debris was removed from the creek. Approximately 9,400 gallons of diesel fuel and oily water was removed from the creek and the spill was closed on October 23, 1996 and, as such, no longer represents an environmental concern to the subject property.
- NYSDEC Spill #97-12403 was opened on February 6, 1998 after approximately 25 gallons of #2 fuel-oil when a fuel-oil delivery truck operator overfilled the truck's holding tank. According to the database report the spill was confined to the concrete surface and cleaned up with absorbents. The spill was

closed on January 28, 2004 and it is not likely this spill represents an environmental concern at the subject property.

- NYSDEC Spill #98-12972 was opened on January 21, 1999 after approximately 10 gallons of #2 fuel-oil when a fuel-oil delivery truck operator overfilled the truck’s holding tank. According to the database report the spill was confined to the concrete surface and cleaned up with absorbents. The spill was closed on January 28, 2004 and it is not likely this spill represents an environmental concern at the subject property.
- NYSDEC Spill #02-02476 was opened on June 7, 2002 after approximately 170 gallons of gasoline spilled from a delivery barge into Oyster Bay Harbor. According to the database report, containment booms were deployed to surround the spill area and sorbent booms were used to remove the gasoline from the water. The spill was closed on July 19, 2002 and it is not likely this spill represents an environmental concern at the subject property.
- NYSDEC Spill #90-09715 was opened on December 7, 1990 after a sheen was observed on Oyster Bay Harbor adjacent to a vessel unloading #2 fuel-oil to be delivered to the site. Information pertaining to the volume released or clean up measures are not included in the database report. However, the spill was closed December 10, 1990 and, as such, no longer represents a concern to the subject property.
- NYSDEC Spill #87-08637 was opened on January 11, 1988 after approximately 10 gallons of gasoline was spilled when a gasoline delivery truck operator overfilled the truck’s holding tank. According to the database report the spill was confined to the concrete surface and cleaned up with sorbent pads. The spill was closed on April 28, 1988 and it is not likely this spill represents an environmental concern at the subject property.

Eighteen properties within the search radius are identified as NYSPILLS sites. Each of the eighteen identified NYSPILLS sites have been closed by NYSDEC, and as such appear unlikely to represent an environmental concern to the subject property.

6.1.3 EDR Databases

The table below summarizes the EDR databases that were searched.

Table 6-3 - Additional Databases Searched

Agency	Listing Name or database Searched	Abbreviation	Search Distance	Target Property Identified	Nearby Properties Identified
EDR	Manufactured Gas Plants	MGP	1.0 mile	No	0
EDR	Historical Drycleaners	HDC	0.25 mile	No	0
EDR	Historical Auto Station	HAS	0.125 mile	No	0

Review of the EDR Radius Map Report indicates that the neither the subject property nor nearby properties are not listed in EDR proprietary databases searched.

6.2 Orphan Sites

Orphan sites are properties, that due to an inadequate or incomplete address in government databases or in base map files, are not able to be geographically located (i.e. mapped or geocoded). This can occur for several reasons; no street number or street name in address given; the street address is given only as a P.O. Box; or when inconsistencies exist in the address (street number does not exist in the city / zip code given).

Four orphan sites, including the subject property, were identified in the EDR report. The subject property is identified as an orphan site due to a NY Manifest and PA Manifest listing in the database report. These manifest listings appear to be associated with the disposal of non-hazardous materials generated at the subject property. These disposal manifests likely correspond to remedial efforts undertaken at the site related to the numerous NYSDEC Spills incidents, which are discussed in the state database section of this report.

Based on a cursory review of the addresses listed, the remaining identified orphan sites do not appear to be located in close proximity to the subject property.

6.3 Vapor Encroachment

PWGC performed a Tier 1 Vapor Encroachment Screening for the subject property in accordance with ASTM E2600-15, Vapor Encroachment Screening on Property Involved in Real Estate Transactions. In accordance with ASTM E2600-15, the default Area of Concern (AOC), adjusted to account for the groundwater flow direction in the vicinity of the subject property, is defined as follows:

Direction Relative to Subject Property	Petroleum Impacted Sites AOC Radius	Contaminants of Concern Impacted Sites AOC Radius
Up Gradient	528 feet	1760 feet
Cross Gradient	165 feet (LNAPL) 95 feet (dissolved)	365 feet
Down Gradient	100 feet (LNAPL) 30 feet (dissolved)	100 feet

PWGC evaluated sites identified in Federal and State databases (see Section 6.1) located within the adjusted AOC radii for the potential for petroleum impact and or contaminants of concern (such as perc) to be present. The following sites were identified within the adjusted AOC:

- The subject property which is A MOSF with an open petroleum spill and open TCE spill.
- Adjacent property to the north which has a documented history of gasoline storage.

Each of these sites was evaluated for the potential for a vapor encroachment condition (VEC) to be present. Due to the active TCE and petroleum spills at the site, PWGC believes a VEC exists at the subject property. NYSDEC Spills documented at the adjacent property to the north have since been closed and PWGC does not believe a VEC exists in conjunction with this neighboring property.

A copy of the Tier 1 Vapor Encroachment Screening is included as **Appendix H**.

6.4 Additional Environmental Record Sources

6.4.1 Freedom of Information Act Requests

Freedom of Information Act (FOIA) requests were sent to the United States Environmental Protection Agency, Region 2 (USEPA), the New York State Department of Environmental Conservation, Region 1 (NYSDEC), The Nassau County Fire Marshall, and the Nassau County Department of Health. and the Copies of FOIA requests are included in **Appendix I**.

As of the date of this report, responses to FOIA requests have not been received, except as noted below. As responses were not provided within the allotted due diligence period, the records were deemed not to be “reasonably ascertainable” at this time. Should records become available at a later date, pertinent information will be forwarded as an addendum upon receipt.

NYSDEC – PWGC was provided with quarterly status reports dating from 2005 to 2019 documenting monitoring and periodic remedial activity for the open petroleum spill and open chlorinated solvent spill onsite. Two of the provided reports, January 2011 CVOC Source Area Investigation and January 2013 VRUE Excavation Report, both prepared by Kleinfelder, document the removal of approximately 125 tons of hazardous material from the chlorinated spill area. Excavation activity was limited due to the concrete footings of the secondary containment and the shallow groundwater. These two aforementioned reports are included in **Appendix I**.

6.4.2 Publicly Available Information

Information regarding the subject property available on the commercial real estate website www.propertyshark.com (an aggregator of publicly available real estate information) was reviewed to identify pertinent information. No indication of environmental issues was identified.

Copies of publicly available information are included in **Appendix H**.

7.0 SITE RECONNAISSANCE

7.1 Methodology and Limiting Conditions

Mr. Ryan Morley of PWGC performed the site inspection on Tuesday, July 16, 2019. Weather conditions during the inspection were sunny with a temperature of approximately 81° Fahrenheit.

The site inspection consisted of an inspection of the interior portions of the existing building, followed by inspection of the exterior portions of the property.

- Could not inspect the previously documented seep of free product at the bulkhead due to high tide at the time of inspection.

7.2 Aboveground Storage Tanks (AST)

PWGC identified several ASTs at the site. Below is an inventory of each observed AST:

- Western containment area:
 - Four 702,817-gallon active fuel-oil ASTs.
- North-central containment area:
 - One 471,282-gallon active fuel-oil AST.
 - One 471,282-gallon out-of-service gasoline AST.
- East containment area:
 - One 500,000-gallon active fuel-oil AST.
 - One 500,000-gallon out-of-service AST.
 - One 186,606-gallon out-of-service gasoline AST.
 - Two 94,668-gallon out-of-service gasoline ASTs.
- South-east containment area:
 - Two 91,896-gallon active diesel ASTs.
 - Seven 23,226-gallon out-of-service ASTs.
 - One 180,000-gallon active diesel AST.
- Office building:
 - Two 275-gallon active fuel-oil ASTs for heating system.
- Garage building:
 - One 275-gallon active fuel-oil AST for heating system
 - One 275-gallon disconnected and out-of-service fuel-oil AST.

7.3 Underground Storage Tanks (UST)

PWGC did not identify evidence of USTs, such as fill ports or vent lines at the site.

7.4 Hazardous and Non-Hazardous Chemical Storage

PWGC observed chemical storage consisting of the following:

- Western containment area:
 - Two 7,500-gallon active fuel-oil additive/dye ASTs.
 - One 7,500-gallon out-of-service AST which formally contained fuel-oil additive/dye.
- Garage building:
 - Six 55-gallon drums of ansulite, a foaming agent used to extinguish hydrocarbon fuel fires.
 - One 250-gallon AST of ansulite.
 - Five 250-gallon totes of WDA-2016, an anti-gel agent to keep the viscosity of fuel-oil consistent.
 - Two 55-gallon drums of fuel-oil lubricant, an agent to keep the viscosity of fuel-oil consistent.
 - Three 55-gallon drums of SDA-2016, an additive to prevent fuel-oil from coagulating.
 - Two 55-gallon drums of Statis, an agent to reduce static friction in fuel-oil.

Each area of chemical storage appeared to be in good condition and evidence of leaks from these containers was not observed.

7.5 Waste Generation, Storage, and Disposal

PWGC observed evidence of waste generation, storage or disposal consisting of the following:

- Twelve 55-gallon drums were identified on the northern portion of the site. The labeling indicated that purge-water from onsite monitoring wells and discarded filters from the groundwater treatments system was contained within these drums. Additionally, seventeen empty 55-gallon drums were staged in a nearby area. Staining and/or leakage was not identified this drum storage area.
- The upper floor of the garage building onsite contained several small containers for discarded batteries and florescent lightbulbs. Housekeeping in this area appeared to be well maintained and containers were appropriately labeled.

- Seven 55-gallon drums were identified in the garage area which contain spent sorbents and speedi-dri from recent petroleum spill incidents. Staining and other evidence of poor housekeeping was not observed.

7.6 Polychlorinated Biphenyls (PCBs)

PWGC did not identify potentially PCB containing equipment such as electrical transformers or hydraulic lifts at the site.

7.7 Additional Site Conditions

The following is a summary of visual and/or physical observations made by PWGC at the time of the site inspection. Photographs of pertinent observations are included in **Appendix A**.

Table 7-1 - Additional Site Conditions

Condition	Identified
Interior drains, trenches or sumps.	Yes ¹
Interior stains or corrosion	No
Unusual odors	No
Interior pools of liquid	No
Stained Soils or Pavement	No
Stressed Vegetation	No
Indications of solid waste disposal	No
Exterior ponds, pits, or lagoons	No
Wastewater or storm water discharge/disposal	Yes ^{2,3}
Oil water separators/clarifiers	Yes ⁴
Septic Systems/Cesspools	No
Wells (Drinking water, monitoring wells, agricultural/irrigation wells, or process water wells)	Yes ⁵
Petroleum or natural gas pipelines or easements	No
Other	No

1 – One solid bottom sump pit was observed in the garage area on the eastern side of the office building. This sump is used to control the inflow of rainwater into the area during heavy rainstorms. The sump is pumped out into a nearby catch basin.

2 – There are several catch basins and two long trench drains located on site. These catch basins and trench drains are connected to an oil/water separator located on the eastern portion of the site which flows out into the adjacent creek. One storm drain located on the north east portion of the property is connected to a separate outfall that is not equipped with an oil/water separator and discharges to Oyster Bay Harbor.

3 – An active groundwater treatment system is operating on the eastern portion of the property. This treatment system is designed to pump groundwater from an area of the site impacted with TCE from a prior spill, remove TCE impact from the water, and discharge the water into Oyster Bay Harbor.

4 – An oil/water separator is located on the eastern portion of the property which is connected to a series of catch basins and trench drains onsite. The water from this oil/water separator discharges into the creek located adjacent to the property.

5 – There are approximately 25 groundwater monitoring wells or recovery wells located at the site. Most of these wells are concentrated in the eastern portion of the site where the TCE spill occurred and where petroleum impact is most extensive.

7.8 Neighboring Properties

PWGC performed a cursory inspection of the neighboring properties from the subject site and public right of ways. The neighboring properties are used for residential and commercial. Potential environmental concerns observed at neighboring properties included:

Potential environmental concerns were not observed at neighboring properties during the site reconnaissance.

8.0 INTERVIEWS

8.1 Current Owner/Occupant

PWGC interviewed Mr. Peter Ionnotta a representative of the current property owner and occupant. Mr. Ionnotta did have knowledge of environmental issues at the site. Information provided by Mr. Ionnotta is summarized below and has been incorporated into this report where appropriate.

- Information regarding which ASTs were active at the time of inspection as well as their contents.
- Discharge locations of drainage structures.
- Location of groundwater treatment system.
- Locations of drums stored onsite and their contents.
- Locations of onsite monitoring wells.
- Information pertaining to chemical storage onsite.

8.2 Previous Environmental Reports

PWGC was provided copies of a November 2008 Baseline Environmental Site Assessment prepared by Environmental Compliance Services (ECS) and a May 2019 Quarterly Site Status Update prepared by VHB Engineering, Surveying, Landscape Architecture and Geology P.C. (VHB) for the subject property. Information included in the reports is summarized below:

8.2.1 *November 2008 Baseline Environmental Site Assessment by ECS*

ECS documented the following information pertaining to the subject property:

- The site has operated as a petroleum storage terminal since approximately 1929.
- NYSDEC Spill #85-00426, which is associated with extensive petroleum impact at the site and the seep of product into Oyster Bay harbor, is being monitored with quarterly gauging and sampling events. Additionally, remedial efforts such a product recovery and chemical oxidizer applications were carried out between 2005 and 2008. According to the report, the chemical oxidizer applications were successful in reducing the amount of petroleum seeping into the water, however impacts from the spill remain onsite and the spill is active.
- Chlorinated solvent impact associated with NYSDEC Spill #99-02526 is still present onsite. The extents of the chlorinated impact plume have been delineated onsite by prior subsurface investigations, however, it is a possibility that the plume has migrated beyond the site's northern property line.

Remedial activities included the removal of approximately 125 tons of impacted soils and the installation of a groundwater treatment system.

- Multiple wells onsite have a documented presence of LNAPL from petroleum impact in the groundwater onsite.

8.2.2 May 2019 Quarterly Site Status Update by VHB

This report documents ground water monitoring, LNAPL removal, treatment system inspection, and seep mitigation activities performed in the first quarter of 2019 and documents prior remedial and monitoring efforts. This report recommended continuing groundwater monitoring and LNAPL removal activities, continued maintenance and monitoring of the onsite treatment system, and replacing the sorbent boom installed at the base of the seawall.

These two provided historical reports are included in **Appendix G**.

8.3 Local Government Officials

Based upon the site history, interviews with government officials to obtain additional information are not warranted at this time.

9.0 CONDITIONS OUTSIDE THE SCOPE OF ASTM 1527-13

9.1 Wetland Delineation

Based on review of the EDR Radius Map Report, which includes State and Federal wetlands, it appears that State and/or Federal wetlands are/are not present on the subject property. Based on review of the NYSDEC Environmental Resources Mapper, the site does not appear to be located within a wetlands checkzone.

Based on review of the EDR Radius Map Report, it appears that the nearest State or Federal wetland is Oyster Bay Harbor, located adjacent to the east of the subject property.

9.2 Radon Risk Evaluation

Radon is a colorless, radioactive; inert gas formed by the decay of radium and may be present in soils and rocks containing granite, shale, phosphate and pitchblende. The USEPA's "Map of Radon Zones for New York State", September 1993 indicates that Nassau County is not a radon risk area. The EDR report provides information from the New York State Department of Health radon survey which indicates that the average result for sites tested in Nassau County is 0.640 Pico curies per liter (pCi/L) in the living area, which is below the USEPA radon action level of 4 pCi/L, and 98% of sites tested in Nassau County were below the action level of 4 pCi/L in the living area.

9.3 Asbestos

PWGC did not identify evidence of potential asbestos containing material (ACM) at the site. Based on the apparent age of the buildings, it is possible that ACM is present. An inspection of suspected ACM should be conducted at the subject property prior to renovation or demolition, per federal, state and local regulations.

9.4 Lead-Based Paint (LBP)

PWGC did not identify evidence of potential lead-based paint at the site. Based on the apparent age of the building, it is possible that lead based paint is present.

9.5 Mold

PWGC did not visually observe significant sources of mold at the site during site reconnaissance.

10.0 FINDINGS AND OPINIONS

Based upon reconnaissance of the subject and surrounding properties, interviews and review of historical records and regulatory agency databases, the following potential RECs have been identified:

Onsite

- Impact from active petroleum spill.
- Impact from active chlorinated solvent spill.
- Identified NYSPILLS and LTANKS listings associated with the site.
- Historical and current site use including large scale petroleum storage onsite.
- Chemical storage onsite.
- Petroleum and hazardous waste generation.
- The site is listed as a RCRA generator.
- Catch basins and trench drains located on site.
- Vapor encroachment.

Offsite

- Adjacent property to the north historical use and former presence of USTs

Potential RECs identified at the subject property were evaluated to determine whether items initially suspected to be RECs are in fact RECs. Evaluation of potential RECs are as follows:

- NYSDEC Spill #85-00426 is an active spill onsite which corresponds to the presence of petroleum impact in the soil and groundwater on the eastern portion of the property including the presence of free product in monitoring wells and free product seeping past the seawall and into Oyster Bay Harbor. The impact of this spill has been monitored routinely and remedial efforts including product removal and chemical oxidation have been applied. However, the impacts of the spill are still present onsite and remains an environmental concern. PWGC believes that NYSDEC Spill #85-00426 is a REC.
- NYSDEC Spill #99-25216 is an active spill onsite which corresponds to the presence of chlorinated solvent impact in the soil and groundwater on the eastern portion of the property due to a breach in the gasoline vapor recovery system once in place at the site. Remedial activities have involved the removal of approximately 125 tons of hazardous soils from the spill area and the installation of a groundwater treatment system. However, the impacts of the spill are still present onsite and contamination from this spill has possibly migrated into the adjacent property to the north. PWGC believes that NYSDEC Spill #99-25216 remains an environmental concern is a REC.

- Not including the two aforementioned active NYSDEC Spills, which are both considered RECs, the subject property is identified to be associated with 85 additional NYSDEC Spill incidents. The majority of these spills have been releases of small volumes (less than 30 gallons) of gasoline or fuel oil at the delivery truck filling station located in the center of the site and were cleaned up using sorbets. The larger spills incidents which included impact to the subsurface were remediated to the satisfaction of NYSDEC. The 85 closed NYSDEC spills associated with the site no longer represent an environmental concern to the subject property and PWGC considers these closed spills to be HRECs.
- The site appears to have been historically used for industrial purposes, including lumber processing, coal storage, and gasoline, diesel, and fuel-oil storage. Lumber processing is commonly associated with the use of heavy machinery and the use of metals and/or creosote for wood preserving. Coal storage can impact the subsurface with heavy metals and VOCs, especially if coal was staged directly on the ground surface. Prior to approximately 2005, the site operated as a MOSF storing and distributing gasoline, fuel-oil, and diesel fuel. Currently, the site is used for only fuel-oil and diesel fuel storage and distribution as it remains an active MOSF. Additionally, three active 275-gallon heating oil ASTs are present onsite to accommodate the heating systems associated with the buildings. Although the ASTs onsite were not identified to be in poor condition, the prolonged use as a MOSF with several ASTs and frequent filling and distribution events occurring it can not be ruled out that the site's use as a MOSF has impacted the subsurface. PWGC believes that the site's historical and current usage is a REC.
- During the site reconnaissance, PWGC observed various containers used for chemical storage onsite ranging from 55-gallon drums of fuel-oil additives in the garage to two active 7,500-gallon ASTs containing fuel-oil dye in the western containment area. PWGC did not observe improper housekeeping or evidence of leaks or staining in association with the chemical storage containers. PWGC does not believe that the chemical storage onsite is a REC.
- PWGC observed several 55-gallon drums onsite used to dispose of petroleum waste generation including spent sorbents, purge water, LNAPL recovered from monitoring wells onsite, and spent filters associated with the groundwater treatment system. The drums appeared to be properly labeled and in good condition and evidence of leaks associated with these drums was not observed. PWGC does not believe the waste generation associated with these drums constitutes a REC.
- The subject site is identified in the database report as a RCRA generator. This RCRA listing appears to be associated with the generation of hazardous chlorinated solvent waste associated with the former gasoline vapor coolant system, remedial activities associated with NYSDEC Spill #99-25216, and waste

associated with the groundwater treatment system. The RCRA listing is associated with chlorinated solvent impact onsite which is an environmental concern. PWGC believes the sites listing as a RCRA generator is a REC.

- Several catch basins were identified at the subject property. One catch basin, located on the northeastern portion of the property, discharges directly to Oyster Bay Harbor. No surficial staining or improper chemical or petroleum storage was observed in conjunction with this catch basin. The other catch basins onsite are connected to an oil/water separator located on the south eastern portion of the site which discharges into the creek adjacent to the south of the property. Based on the presence of a functioning oil/water separator and the lack of staining near the north eastern catch basins, PWGC does not believe that the presence of onsite catch basins represents a REC.
- The subject site has the potential for vapor encroachment due to the documented active TCE and petroleum spills at the site. Such impact can off gas into the vapor phase and cause vapor intrusion issues within onsite buildings. PWGC believes that the potential for vapor encroachment represents a REC.
- The adjacent property to the north was identified to have been used historically for coal storage and to have contained two gasoline USTs onsite. Coal storage can impact the subsurface with contaminants namely heavy metals and VOCs, especially if coal was staged directly on the ground surface, and gasoline USTs are prone to leaks which can impact the subsurface. If potential impact from the coal storage and/or the gasoline UST impacted groundwater, it cannot be ruled out that contamination associated with the potential impact has migrated onto the subject property. PWGC believes that the historical use of the adjacent property to the north is a REC.

11.0 DEVIATIONS

This Phase I ESA was conducted in accordance with the scope and limitations of the ASTM Standard E 1527-13 (Standard Practices for Environmental Site Assessment: Phase I Environmental Site Assessment Process) and 40 CFR Part 312 (Standards and Practices for All Appropriate Inquiry; Final Rule). Excluding data gaps identified in Section 2.8 and additional services outlined in Section 9.0, there were no deviations or deletions from this practice.

12.0 REFERENCES

All Appropriate Inquiry, Final Rule, 40 CFR Part 312.

Standard practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM Standard E 1527-13.

13.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312. I have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by P.W. Grosser Consulting were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by P.W. Grosser Consulting were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

APPENDIX F
SITE QUESTIONNAIRE
AND RELEVANT DOCUMENTS

Owner Questionnaire

P.W. Grosser Consulting Inc. (PWGC) has been contracted to perform a Phase I Environmental Site Assessment (ESA) of the property listed below. The Phase I investigation will include site observations, interviews, and review of available documentation. To ensure the success of the assessment, and in accordance with the ASTM 1527-13, we are required to ask the following question of the owner or opener's representative. If you could please complete this questionnaire and return it via email within one business day of receipt it will allow us to complete the Phase I ESA in a timely and efficient manner.

Name of person completing questionnaire:	Date:
	Company:
Length of association with property:	Phone #:
Property Name/Address:	PWGC Project #:
Please Check One: <input type="checkbox"/> Owner <input type="checkbox"/> Owner Representative	

Directions: Please read and answer all questions very carefully, to the best of your knowledge and in good faith. Mark the column corresponding to the appropriate response. Supplemental details necessary to explain any yes or unknown responses should be provided in the "Comments" column. Note: U/NR indicates "Unknown" or "No Response," and "N/A" indicates not applicable. If "Comment" box proves too small to fit your comment please attach an additional form with your full response.

		Question	Y	N	U/NR	Comment
1		Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?		N		
2		Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?		N		
3		Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	Y			Active Spill cleanup
4		Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?		N		
5		Are you aware of any Activity and Use Limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?		N		

6	Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user:	Y			
6(a)	Do you know past uses of the property?	Y			
6(b)	Do you know of specific chemicals that are present or once were present at the property?	Y			
6(c)	Do you know of any spills or other chemical releases that have taken place at the property?	Y			
6(d)	Do you know of any environmental cleanups that have taken place at the site?	Y			

In addition, are you aware of any of the following documents, and if so, please forward copies of the document(s) to P.W. Grosser Consulting at 630 Johnson Ave, Ste 7, Bohemia, NY 11716-2618 (along with a copy of this form):

<p>Helpful Documents to be forwarded to PWGC:</p> <p><input type="checkbox"/> Environmental site assessment reports (i.e. Phase I or II, tank testing results, radon, lead paint, or asbestos testing, etc.)</p> <p><input type="checkbox"/> Environmental compliance audit reports; risk assessments; and recorded Activity and Use Limitations (AULs)</p> <p><input type="checkbox"/> Environmental permits (i.e. solid waste disposal, hazardous waste disposal, wastewater, NPDES, etc.)</p> <p><input type="checkbox"/> Registrations for underground storage tanks (USTs) and aboveground storage tanks (ASTs)</p> <p><input type="checkbox"/> Registrations for underground injection systems</p> <p><input type="checkbox"/> Material safety data sheets</p> <p><input type="checkbox"/> Community right to know plan</p> <p><input type="checkbox"/> Safety plans; preparedness and prevention plans; spill prevention, countermeasure/control plans, etc.</p> <p><input type="checkbox"/> Reports regarding hydrogeological or geotechnical conditions on the property and surrounding area</p> <p><input type="checkbox"/> Notices/correspondence from any agency relating to past or current violations of environmental laws, or liens encumbering the property</p> <p><input type="checkbox"/> Hazardous waste generator notices or reports</p> <p><input type="checkbox"/> Other:</p>

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 05/13/2019 has revealed that there is 1 NY SHWS site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
JAKOBSON SHIPYARD IN Site Code: 58746	WESTEND AVE	W 1/2 - 1 (0.641 mi.)	115	383

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 05/13/2019 has revealed that there are 22 NY LTANKS sites within approximately 0.5 miles of the target property.

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS AST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

DEC Memo: "****SEVERE NORTHEASTER WITH HEAVY RAIN AND VERY STRONG WINDS 3/13***
DR 03/15/10 approx 0835 Hrs (A): Cassandro called- upon inspecting
the facility after the storm, a dripping union was noticed. 03/15/10
approx 0835 Hrs (B): He has already notified the National Response
Center and obtained report #933936. 03/15/10 approx 0835 Hrs (C):
Asked him to report this to the Spills Hotline, and told him Region
would call him back shortly to review the details. DR 03/15/10 0900
Hrs (A): Called Cassandro- the leak was at a pump manifold within the
#2 oil secondary containment area. They are making repairs at this
time. 03/15/10 0900 Hrs (B): He estimates only a few gallons spilled,
and it has been cleaned up. DR"

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

GASOLINE AND DIESEL PRODUCERS

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DR 01/30/19, 20:52, phone call w/ Tony: Rosales driver error caused approx. 10 gallons of #2 FO to spill on concrete loading pad. Spill was cleaned up with pads and speedy dry. Tony contacted NRC, DEC, and NCFD; he will submit a formal report to NA on 01/31/19. Miller or Milro will be contacted to dispose of contaminated debris. ME 01/31/19 am: NA will inspect the site. DR 01/31/19 @ 1131: Acampora/Schatz on site. Met with Anthony Cassandro who escorted us to the location of the release. Confirmed release occurred as a result of human error at the rack while loading truck. Tank was overfilled with product spilling to truck rack containment area at Rack Position 5. Commander and Rosales Fuel Oil personnel applied speedi-dri and cleaned-up spill. Spill remained inside containment area under loading rack. Approximately 1/2 drum of material generated for disposal. Milro retained by Commander to dispose of material. Can be closed upon receipt of copy of disposal manifest. 11:42: Acampora/Schatz off site. 2/13/19 DISPOSAL RECPTS REC'VD, 1 DRUM WASTE"

 DEC Memo: "03/20/14 0434 Hrs: Received Federal National Response Center (NRC) report 1077182. DR 3/20/14 0435 Hrs: RJP made call to Tony Cassandro. Night watch observed minor chemical odor and thin red layer of liquid, on surface of rainwater accumulated in fuel oil tank containment area. Estimated quantity 20 gallons of product, 2,000 gallons rainwater. States product is definitely not fuel oil, likely red dye additive which is stored in tank CBS-001. He searched the area but observed no source of leak/spill. Tony cell (516) 398-4226. RJP. "

Remarks: "A RED DYE WAS NOTICED ON RAINWATER WITHIN A CONTAINMENT AREA. (DR)"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was KISP/LEUNG 07-12-94 Consent Order executed. 05-24-94 Letter from L. Aja to Fran Hirmes (Commander Oil's attorney): gave extension to serve Answer to the Hearing and Complaint to May 31, 1994. 05-09-94 Letter from L. Aja to Nick Damadeo: request respondent to serve an answer by May 23, 1994. 01-28-94 Phone call from Cassandro: they are still working on getting all information, need extension and will have everything in a week or two. 12-21-93 Letter from Leung to Commander: outlined required items to be submitted by 01-18-93. 11-19-93 Letter from L. Aja to N. Damadeo: follow up to 11-16-93 meeting. 10-28-93 Letter from L. Aja to Nick Damadeo: Order on Consent. 09-20-93 Letter from L. Aja to Nick Damadeo (Commander Oil's attorney): reschedule 09-15-93 meeting. 08-31-93 Letter from L. Aja (DEC attorney) to Nick Damadeo: 09-15-93 meeting: issues to be discussed: spill response program, tidal wetlands remediation, natural resource damages, state fund reimbursement, previous spills, license problem, air permit problem. 04-05-93 Kispert on site: some sheen noted 02-17-93 Leung on site: no sheen observed in creek. 02-11-93 Acampora on site: inspected creek:some sheen noted. 01-22-93 Disposal receipts submitted by Commander. 01-14-93 Kispert on site. Crew observed working on diked area. Cleanup continued. 01-08-93 Received FOIL from Town of Oyster Bay, Dept. of Public Works via fax. 01-06-93 Laboratory results from Pedneault: sample is diesel fuel. 12-30-92 Kispert on site.Slight sheen observed in some areas of the creek. Cleanup completed and booms are being maintained. 12-23-92 Commander Oil submitted spill report to the USCG and cc DEC. 12-21-92 Kispert on site. Slight sheen observed only in creek. 12-18-92 Received FOIL request from Town of Oyster Bay, Supervisor's office: wants copy of USCG's report. 12-17-92 Kispert continued to oversee cleanup. 12-16-92 Kispert on site. USCG on site. Crane removing contaminated debris from southern end of the Creek. Creek bottom not being disturbed. Kispert updated Andrea Reiss of status and will also have artesian wells test as citizens are concerned. Kolonicki (US Fish & Wildlife) on site: does not expect a large numbers of waterfowl in the area. He feels that sheen will not cause a problem to wildlife. Kispert checked area east of Whites Creek: no spillages found. 12-15-92 Kispert on site: spoke with USCG: their estimate of spill is about 9400 gallons. About 7200 gallons recovered so far. 80

yds of contaminated debris recovered so far. Kispert obtained sample and dropped it off at Pedneault. Leung on site to assist Kispert. 12-14-92 Kispert continued to oversee cleanup. Leung issued cleanup letter to Commander. 12-13-92 Leung On site: USCG and Kispert were also on site. Leung assisted Kispert in overseeing cleanup operation. DEC (Leung, Parish, Kispert) met with USCG (Alley) and Commander Oil (L.Shapiro, J.Shapio, Cassandro, Barnett), established cleanup strategy. Other Units were also notified of spill. 12-12-92 Kispert on site at 11:47. One vac truck was on site. Kispert requested more vac truck. Barnett said this is the best they can do. Kispert updated Leung on situation and Leung told Kispert that if they are not willing to hire more vac trucks, DEC will do so. Barnett hired General Utilities. Leung dispatched N. Acampora to site to assist Kispert. N. Acampora arrived at 14:00. Two affected swans picked up by wildlife rehabilitator. Commander wanted to stop cleanup work at dusk and pick up in the morning. DEC disagreed and told Commander to continue or DEC will hire contractor. Commander then hired General Utilities and Fenley and Nicol to continue the cleanup. Leung arrived and relieved Kispert. 12-11-92 Received call from Andrea Reiss (Town of Oyster Bay): unk. petroleum in White's Creek, suspect Commander Oil is the spiller. Edgar Barnett (Commander Oil) called: telephones are not working because terminal is flooded. They are cleaning up. Unknown source at this time. USCG not on site. Kispert dispatched to site at 15:54: Kispert observed the following: terminal flooded, 6 to 8 of water; Fire Marshal not on site; oil is being pumped out of tank 2 diked farm area. Cassandro said all drains are closed and spill is about 70 gallons; 5800 gallon tank is floated. Kispert checked north end of diked area, no obvious sheen observed, slight sheen near mouth of creek. Kispert observed 1/2 floating product (redish color-smells like diesel or fuel oil) in middle and southern end of creek. Kispert requested boom to be deployed and floating product to be recovered immediately. Further investigation revealed 2 of floating product near southern end of creek. Kispert further requested containment and cleanup immediately. Barnett not sure if boom is available and will not retrieve the one in the sound as condition is bad; also not sure if vacuum truck is available tonight. Kispert again asked boom to be deployed on the north and recover product tonight. Absorbent boom deployed at the mouth of the creek. Kispert left site to check on something else. Kispert back on site at 19:55. Water level in terminal is lower; two absorbent booms placed near mouth of the creek. Barnett and L. Shapiro said no vac trucks available or additional men available. Rice Tank to be on site tomorrow morning to begin recovery process. "

DR 05/12/17 1105 Hrs: RJP called- he had not called Stassi. DR 05/12/17 1105 Hrs (A): Called Stassi- he said this is a plastic drum that was found IN the water in Oyster Bay. There are no markings on the drum. 05/12/17 1105 Hrs (B): They are towing the drum to the boat launching ramp at the end of Route 106, will assess whether they wish to open the drum to determine its contents, and will call back with an update. DR 05/12/17 1125 Hrs (A): Stassi called- he said the drum appears to contain gasoline. DEC informed him this office would probably have to make arrangements for the disposal of the drum. He will contact the Town and have them transport the drum to the Bay Constable's office nearby at Roosevelt Park Marina in Oyster Bay. 05/12/17 1125 Hrs (B): Informed him this office would have RJP call him directly to coordinate. DR 05/12/17 1130 Hrs: Called RJP and updated him. DR 05/12/17 1135 Hrs: Emailed copy of this report to RJP. DR 05/12/17 1232 Hrs: RJP email- he is leaving (Massapequa) for Oyster Bay, and requested that the office contact a contractor, etc. DR 05/12/17 1240 Hrs: Called AB Environmental and spoke to Mike Rosati- informed him what this office had been told, and directed him to call RJP directly for the latest information and to coordinate. DR PIN 07445, Drum collected and disposed. No further action. RJP. CALLOUT ID FOR AB:129794"

DEC Memo: "7/20/07 14:00 TELECON TO TOM HEWITT, MEENAN OIL, OVERFILL ALARM FAILED, TANK OVERFILLED, 1K UST, SPILL TO GRAVEL AREA AND PAVEMENT, NO DRAINS AFFECTED, SURFACE SPILL CLEANED BUT NEEDS TO RETURN TO EXCAVATE AND REPLACE GRAVEL, ADVISED TO CALL DEC FOR A BACKFILL INSPECTION (BD) 7-26-07 TJD Onsite 1530-1630 Site inspection. At time of inspection - Superintendent Thomas Rosetti stated Meenan Oil had completed clean-up and restoration of affected media (gravel). Area of spill was visually inspected - minor staining on concrete surfaces. Gravel area beneath vent pipe restored with fresh stone. Thomas Rosetti stated he was satisfied with cleanup by Meenan. The UST fill port was inspected and found to contain product in spill bucket. A test of OMNTEC panel revealed several alarm conditions and non working audible alarm. Thomas was issued a PBS violation notice and directed to correct deficiencies. 8/29/07 TJD Letter received from Thomas @ Oyster Bay Sewer District. Most deficiencies have been corrected. Awaiting parts to repair alarm panel. 9/20/07 TJD Letter received from Thomas @ Sewer District. All deficiencies now corrected. Requesting final inspection. 10/18/07 TJD Onsite 1430-1500 Site inspection. Sump clear of water & product. Alarm panel fully functioning. Tank fill color coded incorrectly (color correct - wrong symbol) Thomas from Sewer District was verbally instructed to correct symbol. Registration certificate posted. No further action required."

DEC Memo:

****ROUTINE REMOVAL OF 2 4,000GAL SINGLEWALL FIBERGLASS GAS TANKS BY ISLAND PUMP & TANK*** DR 02/05/14 1150 Hrs (A): Called Canavan- he said both tanks are out, AND THERE WAS SHEEN/FLOATING PRODUCT ON THE GROUNDWATER, AND THIS WAS CONFIRMED BY USING SORBENT PADS. 02/05/14 1150 Hrs (B): They plan to excavate SOME soil today, then take SOIL sidewall samples and a GROUNDWATER sample, then BACKFILL FOR NOW. 02/05/14 1150 Hrs (C): NEW TANKS WILL BE INSTALLED IN THE SAME LOCATION, BUT SHORING MUST FIRST BE INSTALLED. When the shoring is installed, additional soil will be excavated in order to install the new tanks. 02/05/14 1150 Hrs (D): DEC informed him this office would like to inspect the excavation today if possible, would check to see whether an inspector was available, and either call back directly or have the inspector call him directly. DR 02/05/14 1215 Hrs (A):

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Backfill inspection. Excavation approximately 8 x 8 x 6. Sidewalls and base are clear of visual and olfactory petroleum impacts. Consultant involved is Gerard Rutigiano of Rutigliano Environmental Services @ 600 Pine Hollow Road, East Norwich 11732 (516 922 8301 or cell 516 314 1553). Action Environmental is contractor performing excavation work. Approximately 10 yds of contaminated soils in dumpster at time of inspection. Soil Mechanics also onsite collecting samples. Noted during Soil Mechanics sampling event were the failure to properly screen soils with a PID/FID to bias sample collection. Invert of tank was reported to be @6ft. Awaiting closure documentation. 5/13/05 TJD Closure documents received. No further action required."

 Site Description:

This six acre site is bordered on the north by Oyster Bay Harbor and is in close proximity to Beekman Beach and Theodore Roosevelt Memorial Park on the west and east respectively. Site operations since 1938 have included the construction of steel tugboats, and the repair and maintenance of commercial boats and yachts. Site soils were contaminated with heavy metals, halogenated volatile organic compounds (VOCs), phenols and petroleum hydrocarbons. This contamination resulted from boat repair, sanding, painting, cleaning parts, bulk petroleum storage tanks, waste oil storage, and areas of mechanical equipment usage. The most serious inorganic contaminant noted on site resulted from the improper disposal of lead based paint onto surface soils after having been sanded off of boat hulls. Jakobson voluntarily cleaned up the land based areas prior to signing a Consent Order with the Department. A Preliminary Site Assessment (PSA) was completed to check the effectiveness of the clean-up, since it was performed without any NYSDEC oversight. Sandblasting of small coastal vessels at Jakobson drydock has contaminated the adjacent sediments of Oyster Bay with heavy metals. An Interim Remedial Measure (IRM) dredging project to study & remediate these

sediments has been completed. An IRM soil removal was performed for selected areas of the land based site due to elevated levels of lead. Remediation of the land based portion of the site has been completed to the satisfaction of the DEC and the DOH. Since the site formerly used some chlorinated solvents in their operations, including the use of an outdoor vapor degreaser, the Department decided to perform a vapor intrusion investigation (VII) of the site. The VII sampling was completed in 2008. A final report with the results of this sampling is expected in early 2009.

Env Problem: Contaminated soils (approximately 20,000 tons) have been removed to the satisfaction of the DEC and the DOH. The results of a supplemental soil vapor intrusion investigation indicate that there are no appreciable concentrations of site related contaminants in the soil vapor throughout the site that are attributable to former boat yard operations. Improvements are planned to address very limited detections of petroleum related compounds in the indoor air of the office building that are apparently primarily attributable to fuel oil storage and use in the basement of that building.

Health Problem: Contaminated site surface soils have been remediated. Groundwater at the site is not used for potable purposes and the area is served by a public water supply. The planned investigation of the soil vapor intrusion pathway will help to delineate remaining public health exposures associated with this site.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State and tribal institutional control / engineering control registries

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

	Data Release Frequency: Annually

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Southwest Map:	5940537 HICKSVILLE, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Pleistocene
Code: Qp *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: RIVERHEAD

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: LOW

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	12 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 6.00 Min: 3.60
2	12 inches	27 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 6.00 Min: 3.60
3	27 inches	35 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 6.00 Min: 4.50
4	35 inches	65 inches	stratified	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 20.00 Min: 20.00	Max: 7.30 Min: 4.50

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam
loamy sand
silt loam
fine sandy loam

Surficial Soil Types: loam
loamy sand
silt loam
fine sandy loam

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: gravelly - coarse sand
very gravelly - sand
sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

GASOLINE AND DIESEL PRODUCERS

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

MAP FINDINGS

GL (Continued)

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

 DEC Memo: "05/03/18 1010 Hrs: As per ME- Cassandro called to inquire whether this had to be reported, and ME confirmed that it did. DR 05/03/18 1020 Hrs: Left message for Cassandro. DR 05/03/18 1028 Hrs: Received Federal National Response Center (NRC) report 1211044 (by Cassandro)- no additional details were provided. DR 05/03/18 1035 Hrs (A): Cassandro called- he confirmed that Ecklund's driver overfilled his truck but that only 5-10gal of oil spilled. No drains were involved, and Commander and Ecklund cleaned up the spillage. Cassandro will have Milro Associates dispose of the waste. DR 05/03/18 1040 Hrs: Obtained Ecklund's address and phone number from the internet. DR"
 Remarks: "The spill was over concrete in the loading area. The cleanup is in progress."

 Contact Name: TONY CASSANDRO
 DEC Memo: "01/30/19 2035 Hrs: Received Federal National Response Center (NRC) report 1236397 (by Cassandra)- 'cleanup is underway.' DR 01/30/19, 20:52, phone call w/ Tony: Rosales driver error caused approx. 10 gallons of #2 FO to spill on concrete loading pad. Spill was cleaned up with pads and speedy dry. Tony contacted NRC, DEC, and NCFD; he will submit a formal report to NA on 01/31/19. Miller or Milro will be contacted to dispose of contaminated debris. ME 01/31/19 am: NA will inspect the site. DR 01/31/19 @ 1131: Acampora/Schatz on site. Met with Anthony Cassandra who escorted us to the location of the release. Confirmed release occurred as a result of human error at the rack while loading truck. Tank was overfilled with product spilling to truck rack containment area at Rack Position 5. Commander and Rosales Fuel Oil personnel applied speedi-dri and cleaned-up spill.

MAP FINDINGS

COMMANDER OIL CORP LLC, 1 COMMANDER SQ, OYSTER BAY, NY 11771 (Continued)

Spill remained inside containment area under loading rack.
 Approximately 1/2 drum of material generated for disposal. Milro retained by Commander to dispose of material. Can be closed upon receipt of copy of disposal manifest. 11:42: Acampora/Schatz off site. 2/13/19 DISPOSAL RECPTS REC'VD, 1 DRUM WASTE"
 Remarks: "concrete loading pad containment area - cleanup in progress"

NRC Report #: 930387
 Description of Incident: CALLER IS REPORTING A DRIP OF NO. 2 HEATING OIL COMING FROM A PIPELINE THAT IS CONNECTED TO A STORAGE TANK. THE OIL IS RELEASING INTO THE WALL OF THE TANK FARM IN A CONTAINMENT AREA.
 Type of Incident: STORAGE TANK
 Incident Cause: EQUIPMENT FAILURE
 Incident Date Time: 2010-02-03 08:30:00
 Incident DTG: DISCOVERED
 Incident Location: Not Reported
 Location Address: 1 COMMANDER SQUARE
 Location Street 1: Not Reported
 Location Street 2: Not Reported

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KISP/LEUNG 07-12-94 Consent Order executed. 05-24-94 Letter from L. Aja to Fran Hirmes (Commander Oil's attorney): gave extension to serve Answer to the Hearing and Complaint to May 31, 1994. 05-09-94 Letter from L. Aja to Nick Damadeo: request respondent to serve an answer by May 23, 1994. 01-28-94 Phone call from Cassandro: they are still working on gathering all information, need extension and will have everything in a week or two. 12-21-93 Letter from Leung to Commander: outlined required items to be submitted by 01-18-93. 11-19-93 Letter from L. Aja to N. Damadeo: follow up to 11-16-93 meeting. 10-28-93 Letter from L. Aja to Nick Damadeo: Order on Consent. 09-20-93 Letter from L. Aja to Nick Damadeo (Commander Oil's attorney): reschedule 09-15-93 meeting. 08-31-93 Letter from L. Aja (DEC attorney) to Nick Damadeo: 09-15-93 meeting: issues to be discussed: spill response program, tidal wetlands remediation, natural resource damages, state fund reimbursement, previous spills, license problem, air permit problem. 04-05-93 Kispert on site: some sheen noted 02-17-93 Leung on site: no sheen observed in creek. 02-11-93 Acampora on site: inspected creek:some sheen noted. 01-22-93 Disposal receipts submitted by Commander. 01-14-93 Kispert on site. Crew observed working on diked area. Cleanup continued. 01-08-93 Received FOIL from Town of Oyster Bay, Dept. of Public Works via fax. 01-06-93 Laboratory results from Pedneault: sample is diesel fuel. 12-30-92 Kispert on site.Slight sheen observed in some areas of the creek. Cleanup completed and booms are being maintained. 12-23-92 Commander Oil submitted spill report to the USCG and cc DEC. 12-21-92 Kispert on site. Slight sheen observed only in creek. 12-18-92 Received FOII request from Town of Oyster Bay, Supervisor's office: wants copy of USCG's report. 12-17-92 Kispert continued to oversee

MAP FINDINGS

COMMANDER OIL TERMINAL, SOUTH STREET, OYSTER BAY, NY (Continued)

cleanup. 12-16-92 Kispert on site. USCG on site. Crane removing contaminated debris from southern end of the Creek. Creek bottom not being disturbed. Kispert updated Andrea Reiss of status and will also have artesian wells test as citizens are concerned. Kolonicki (US Fish & Wildlife) on site: does not expect a large numbers of waterfowl in the area. He feels that sheen will not cause a problem to wildlife. Kispert checked area east of Whites Creek: no spillages found. 12-15-92 Kispert on site: spoke with USCG: their estimate of spill is about 9400 gallons. About 7200 gallons recovered so far. 80 yds of contaminated debris recovered so far. Kispert obtained sample and dropped it off at Pedneault. Leung on site to assist Kispert. 12-14-92 Kispert continued to oversee cleanup. Leung issued cleanup letter to Commander. 12-13-92 Leung On site: USCG and Kispert were also on site. Leung assisted Kispert in overseeing cleanup operation. DEC (Leung, Parish, Kispert) met with USCG (Alley) and Commander Oil (L.Shapiro, J.Shapio, Cassandro, Barnett), established cleanup strategy. Other Units were also notified of spill. 12-12-92 Kispert on site at 11:47. One vac truck was on site. Kispert requested more vac truck. Barnett said this is the best they can do. Kispert updated Leung on situation and Leung told Kispert that if they are not willing to hire more vac trucks, DEC will do so. Barnett hired General Utilities. Leung dispatched N. Acampora to site to assist Kispert. N. Acampora arrived at 14:00. Two affected swans picked up by wildlife rehabilitator. Commander wanted to stop cleanup work at dusk and pick up in the morning. DEC disagreed and told Commander to continue or DEC will hire contractor. Commander then hired General Utilities and Fenley and Nicol to continue the cleanup. Leung arrived and relieved Kispert. 12-11-92 Received call from Andrea Reiss (Town of Oyster Bay): unk. petroleum in White's Creek, suspect Commander Oil is the spiller. Edgar Barnett (Commander Oil) called: telephones are not working because terminal is flooded. They are cleaning up. Unknown source at this time. USCG not on site. Kispert dispatched to site at 15:54: Kispert observed the following: terminal flooded, 6 to 8 of water; Fire Marshal not on site; oil is being pumped out of tank 2 diked farm area. Cassandro said all drains are closed and spill is about 70 gallons; 5800 gallon tank is floated. Kispert checked north end of diked area, no obvious sheen observed, slight sheen near mouth

MAP FINDINGS

COMMANDER OIL TERMINAL, SOUTH STREET, OYSTER BAY, NY (Continued)

of creek. Kispert observed 1/2 floating product (redish color-smells like diesel or fuel oil) in middle and southern end of creek. Kispert requested boom to be deployed and floating product to be recovered immediately. Further investigation revealed 2 of floating product near southern end of creek. Kispert further requested containment and cleanup immediately. Barnett not sure if boom is available and will not retrieve the one in the sound as condition is bad; also not sure if vacuum truck is available tonight. Kispert again asked boom to be deployed on the north and recover product tonight. Absorbent boom deployed at the mouth of the creek. Kispert left site to check on something else. Kispert back on site at 19:55. Water level in terminal is lower; two absorbent booms placed near mouth of the creek. Barnett and L. Shapiro said no vac trucks available or additional men available. Rice Tank to be on site tomorrow morning to begin recovery process. "

Remarks: "HEAVY SHEEN NOTED IN WHITES CREEK NEXT TO COMMANDER TERMINAL AREA HAS HIGH WATER FLOOD NOTED BY BOAT PATROL.TOWN WILL ALSO CALL USCG"

of an abandoned drum on the beach in Lattingtown (Spill 1701359). DR 05/12/17 1105 Hrs: RJP called- he had not called Stassi. DR 05/12/17 1105 Hrs (A): Called Stassi- he said this is a plastic drum that was found IN the water in Oyster Bay. There are no markings on the drum. 05/12/17 1105 Hrs (B): They are towing the drum to the boat launching ramp at the end of Route 106, will assess whether they wish to open the drum to determine its contents, and will call back with an update. DR 05/12/17 1125 Hrs (A): Stassi called- he said the drum appears to contain gasoline. DEC informed him this office would probably have to make arrangements for the disposal of the drum. He will contact the Town and have them transport the drum to the Bay Constable's office nearby at Roosevelt Park Marina in Oyster Bay. 05/12/17 1125 Hrs (B): Informed him this office would have RJP call him directly to coordinate. DR 05/12/17 1130 Hrs: Called RJP and updated him. DR 05/12/17 1135 Hrs: Emailed copy of this report to RJP. DR 05/12/17 1232 Hrs: RJP email- he is leaving (Massapequa) for Oyster Bay, and requested that the office contact a contractor, etc. DR 05/12/17 1240 Hrs: Called AB Environmental and spoke to Mike Rosati- informed him what this office had been told, and directed him to call RJP directly for the latest information and to coordinate. DR PIN 07445, Drum collected and disposed. No further action. RJP. CALLOUT ID FOR AB:129794"

DEC Memo:	"7/20/07 14:00 TELECON TO TOM HEWITT, MEENAN OIL, OVERFILL ALARM FAILED, TANK OVERFILLED, 1K UST, SPILL TO GRAVEL AREA AND PAVEMENT, NO DRAINS AFFECTED, SURFACE SPILL CLEANED BUT NEEDS TO RETURN TO EXCAVATE AND REPLACE GRAVEL, ADVISED TO CALL DEC FOR A BACKFILL INSPECTION (BD) 7-26-07 TJD Onsite 1530-1630 Site inspection. At time of inspection - Superintendent Thomas Rosetti stated Meenan Oil had completed clean-up and restoration of affected media (gravel). Area of spill was visually inspected - minor staining on concrete surfaces. Gravel area beneath vent pipe restored with fresh stone. Thomas Rosetti stated he was satisfied with cleanup by Meenan. The UST fill port was inspected and found to contain product in spill

MAP FINDINGS

OYSTER BAY SEWAGE TREATMENT PLANT, 15 BAY AVE, OYSTER BAY, NY 11771 (Continued)

bucket. A test of OMNTEC panel revealed several alarm conditions and non working audible alarm. Thomas was issued a PBS violation notice and directed to correct deficiencies. 8/29/07 TJD Letter received from Thomas @ Oyster Bay Sewer District. Most deficiencies have been corrected. Awaiting parts to repair alarm panel. 9/20/07 TJD Letter received from Thomas @ Sewer District. All deficiencies now corrected. Requesting final inspection. 10/18/07 TJD Onsite 1430-1500 Site inspection. Sump clear of water & product. Alarm panel fully functioning. Tank fill color coded incorrectly (color correct - wrong symbol) Thomas from Sewer District was verbally instructed to correct symbol. Registration certificate posted. No further action required."

Remarks: "ALL CONTAINED AND IN PROCESS OF CLEANING UP"

F. Sales & Value

F1. Valuation Model

Our database has 0 properties that meet the following criteria:

- Sold within the last 18 months
- In the 11771 zip code
- Property class 441
- Sale price over \$25,000

Expecting more results? Use our [Comparables](#) tool, define your own criteria and browse through recently sold properties.

F2. Neighborhood Price History

All sales of property class '441', in the 11771 zip code were analyzed. For each year, median values (sale price and property size) were calculated, together with the value of the subject property (3,357 sqft), if it were to be sold at median \$/sqft.

Year	# of sales	Median price	Median sqft	Median price/sqft	Value at median price/sqft
2001	1	\$5,000,000	3,357	\$1,489	\$5,000,000
1999	1	\$350,000	0		

F3. Sales & Values Maps

Date of Last Sale

This map shows the most recent sales around the subject property, with darker colors indicating more recent sales.

- Second half of 2018
- First half of 2018
- Second half of 2017
- First half of 2017
- Second half of 2016
- First half of 2016
- 2014 - 2015
- < 2014
- No data

The map is based only on valid sales with a recorded price over \$1000.

* Sale age: 18 years

Price per Square Foot

On this color-coded map, view the price paid per square foot around the subject property.

Building sqft	14,233
Sale price	\$5,000,000
Price per sqft	\$351

- Below \$100
- \$100 - \$250
- \$250 - \$400
- \$400 - \$550
- \$550 - \$700
- \$700 - \$850
- \$850 - \$1000
- Above \$1000
- No data

Note: The map displays Price Per Square Foot (\$/sqft) for properties sold in the last 5 years.

G. Development & Use

G1. Commercial Building

Structure	Square feet	Grade	Year built	Stories
Warehouse 10k-20k sf	9,279	C	1959	1
Warehouse 10k-20k sf	4,954	C	1930	1

Income & Expenses

Use	Rentable square feet
Lt mfg/ whse >10k - 20,000	14,233

G2. Land Use

On this map, view the current land use for a property. The land use specifies how a property is used or what type of building is present on that property.

* Land use: **Fuel Storage - Gasoline, Fuel, Oil, Liquid Petroleum Storage and/or Distribution (441.14)**

- | | |
|----------------------------------|--------------------------------|
| Single family | Public services/Facilities |
| 2-4 family | Education |
| Condominium/Coop units | Cemeteries and other religious |
| Other residential | Hospitals/Care facilities |
| Apartments/Multi-Family | Other institutional |
| Commercial condos | Entertainment/Recreation |
| Office | Agricultural |
| Retail | Parks |
| Hotel/Motel/Other accommodation | Forest |
| Restaurants | Mixed use |
| Manufacturing/Storage facilities | Vacant land |
| Other industrial | Other |
| | Unknown |

G3. Zoning

Properties can be classified by zoning and building class. Nassau County is divided into four basic zoning districts: residential (R), commercial (C), agricultural(A) and manufacturing (M). These basic zoning districts are subdivided by the intensity of use.

* Zoning: **One-Family Residence (R1-10)**

- Major zoning groups:
- Multiple family
 - Single family
 - Other residential
 - Commercial
 - Industrial/manufacturing
 - Public facilities
 - Open space
 - Agricultural
 - Special zones
 - Offices
 - Planned development
 - Mixed use
 - Planned development - overlay
 - No zoning data available

For more information about zoning districts click [here](#).

G4. Urban Landscape Maps

Year Built

* Year built: 1959

On this map, view the year each property was built.

Building Stories

* Stories: 1

On this map, view the number of stories per building.

H. Property Tax

H1. Tax Bill

General current tax bill for 01/01/2019 to 12/31/2019	\$209,030
School current tax bill for 07/01/2018 to 06/30/2019	\$64,832

H2. Property Tax Calculation

In New York State, the real property tax is a tax based on the value of real property. Counties, cities, towns, villages, school districts and special districts each raise money through the real property tax. The money funds schools, pays for police and fire protection, maintains roads and funds other municipal services enjoyed by residents.

Market Value

This value is determined by the Department of Assessment. It reflects the amount of money a buyer would be willing to pay a seller for property offered for sale on an open market, over a reasonable amount of time, where both the buyer and seller are well informed and neither is under undue pressure to act. The value is used in the calculation of property taxes and as the basis for filing an appeal; it reflects any and all adjustments and limitations on increases in assessed value.

Land value	\$1,869,700
Improvement value	+ \$1,874,000
Market value	= \$3,743,700

Assessed Value

The assessed value is a uniform percentage of the market value of the property as of January 2 for any given year. For this property, the assessment ratio is 1%.

Land assessed value	\$18,697
Improvement assessed value	+ \$18,740
Assessed value	= \$37,437

School Tax Relief Program

[STAR](#) is New York State's School Tax Relief Program that provides a partial property tax exemption from school taxes. All New Yorkers who own and live in their home are eligible for the STAR exemption on their primary residence. Also, senior citizens over age 65 may benefit from the Enhanced New York State School Tax Relief (Enhanced STAR). Both Basic and Enhanced STAR amounts are capped at 2% of the prior year values.

We have no information about whether this property benefits from School Tax Relief Program.

Exemptions for 2019 Tax Year

There are several exemptions that qualified homeowners can apply for, such as veterans, senior citizens, volunteer firefighters and ambulance workers, limited income disability, or home improvement exemptions. Exemptions brochures and applications can be accessed on the Department of Assessment [homepage](#).

We have no information about whether any exemptions currently apply to this property.

Property Tax

Property tax is the sum of the property's *general* and *school* taxes. These last two are calculated by multiplying the property's *taxable value* by all the tax rates applicable to it and subtracting any other savings, adding direct charges against property or restored taxes, if they apply. The general tax rates are set by the local governing body, county and town, while the school tax rates are set by the local school districts.

Tax description	Assessed value	Tax rate	Tax amount
	\$37,437	x 26.3020	= \$9,846.68
County Environmental Bond Fund	\$37,437	x 1.1240	= \$420.79
County General Fund	\$37,437	x 3.5780	= \$1,339.50
County Police	\$37,437	x 87.2840	= \$32,676.51
County Police Headquarters	\$37,437	x 29.7280	= \$11,129.27
District 2 Garbage District	\$37,437	x 96.0580	= \$35,961.23
Fire Prevention	\$37,437	x 1.7570	= \$657.77
Lighting District	\$37,437	x 2.7030	= \$1,011.92
Nassau Community College	\$37,437	x 5.5290	= \$2,069.89
Oyster Bay Fire Protection District	\$37,437	x 42.7560	= \$16,006.56
Oyster Bay Park District	\$37,437	x 38.0470	= \$14,243.66
Oyster Bay Sewer District	\$37,437	x 125.0740	= \$46,823.95

Combined school taxes		=			\$64,833
-----------------------	--	---	--	--	----------

Total school tax		=			\$64,832
-------------------------	--	---	--	--	-----------------

Property tax		=			\$273,862
---------------------	--	---	--	--	------------------

Actual taxes might differ from the figures displayed here due to various abatement and financial assistance programs. For more information you can visit the Nassau County's [Assessor](#) and [Treasurer](#) or look up this property's current [tax situation](#).

H5. Tentative Values

The tentative assessment roll for 2021 tax year is subject to change, therefore the values displayed here are not final.

Land value	\$2,033,700
Improvement value	\$3,045,300
Market value	\$5,079,000

Land assessed value	\$20,337
Improvement assessed value	\$30,453
Assessed value	\$50,790

Property tax (estimated)	\$371,544
---------------------------------	------------------

H6. Assessment History

Year	Property class	Market value	Assessment value	Total tax rate	Property tax
2019	Fuel Storage - Gasoline, Fuel, Oil, Liquid Petroleum Storage and/or Distribution	\$3,743,700	\$37,437	731.53	\$273,863
2018	Fuel Storage - Gasoline, Fuel, Oil, Liquid Petroleum Storage and/or Distribution	\$3,743,700	\$37,437	759.751	\$284,428
2017	Fuel Storage - Gasoline, Fuel, Oil, Liquid Petroleum Storage and/or Distribution	\$4,072,100	\$40,721	682.514	\$277,927
2016	Fuel Storage - Gasoline, Fuel, Oil, Liquid Petroleum Storage and/or Distribution	\$5,965,000	\$59,650	609.706	\$363,690
2015	Fuel Storage - Gasoline, Fuel, Oil, Liquid Petroleum Storage and/or Distribution	\$5,965,000	\$59,650	576.333	\$343,783

Year	Property class	Market value	Assessment value	Total tax rate	Property tax
2014	Fuel Storage - Gasoline, Fuel, Oil, Liquid Petroleum Storage and/or Distribution	\$5,965,000	\$59,650	544.799	\$324,973
2013	Fuel Storage - Gasoline, Fuel, Oil, Liquid Petroleum Storage and/or Distribution	\$5,965,000	\$59,650	519.599	\$309,941
2012	Fuel Storage - Gasoline, Fuel, Oil, Liquid Petroleum Storage and/or Distribution	\$8,240,700	\$82,407	482.243	\$397,402
2011	Fuel Storage - Gasoline, Fuel, Oil, Liquid Petroleum Storage and/or Distribution	\$5,966,000	\$59,660	473.719	\$282,621
2010	Fuel Storage - Gasoline, Fuel, Oil, Liquid Petroleum Storage and/or Distribution	\$15,752,400	\$157,524	473.719	\$746,221

H7. Tax per Square Foot

This map shows property tax in correlation with square footage of the property.

Property tax	\$273,862
Tax year	2019
Square feet	14,233
Tax per sqft	\$19

I2. Demographics By Zip Code

Demographic data shown in this section was gathered from the 2014 American Community Survey and refers to zip code **11771**.

Population Demographics

Total population	9,344
Female population	51.4%
Male population	48.6%
Median age	45.4
Male median age	45.4
Female median age	45.5

Education

No highschool	6.7%
Some highschool or college	36.2%
Bachelors degree	31.1%

Other

Citizens	93.8%
Citizens born in US	82.8%
English speakers	97.9%

Journey to Work

Work in a metropolitan area	100.0%
Work at home	6.0%
Go to work by car	80.9%
Go to work after 10 am	15.0%

Economic/Employment

Average household income	\$201,447
White collar	88.7%
Blue collar	11.3%

Housing

Family households	75.0%
Households with kids	33.5%
Housing units	3,820
Occupied housing units	3,390
Owner occupied units	77.6%
Average number of people per household	2.75
Median year structure built	1960
Houses with mortgages	60.9%

Wealth

Median value for units with a mortgage	\$783,000
Median value for units without a mortgage	\$682,900
Median gross rent	\$1,460
Median housing costs per month	\$2,365
Population in poverty	3.5%

J. Transportation

J1. Traffic Map

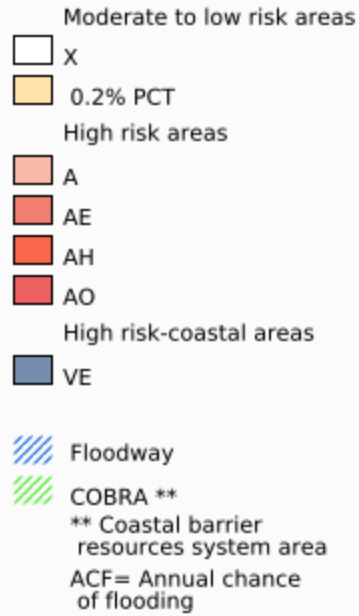

Estimated average daily traffic volume on a route segment at a particular count location.

K. Hazards & Environment

K1. FEMA Flood Zones

Use this map to determine if the property is in a flood zone.

FEMA Flood Zoning

FEMA flood zone	AE, VE
Costal barrier resources system area (COBRA)	Out
FEMA floodway	Out
FEMA special flood hazard area	In

For more information about FEMA flood zones map click [here](#).
