1.0 EXECUTIVE SUMMARY

North Shore - LIJ Health System Department of Real Estate Services retained P.W. Grosser

Consulting, Inc. (PWGC) to prepare a Phase I Environmental Site Assessment (ESA) of 250 East

Main Street in Bay Shore, New York 11706. The purpose of the Phase I ESA was to identify and

evaluate the presence of recognized environmental conditions (RECs) at the subject site. Recognized

environmental conditions are the presence or likely presence of any hazardous substance or

petroleum product under conditions that indicate an existing release, a past release or material

threat of a release of any hazardous substance or petroleum product into structures on the property

or into the ground, groundwater or surface water of the property.

The subject site is 250 East Main Street, Bay Shore, NY 11706 (District 500 Section 394; Block 1; Lots

68.9 and 69). The site is located in the Town of Islip, in the County of Suffolk. The subject site

measures approximately 0.90 acres in size and is improved with two buildings. The north building is

an approximately 3,000 square feet, single story, commercial building utilized as a laundromat. The

south building is an approximately 1,000 square feet, two story, vacant, residential building. There is

asphalt paved parking surrounding the laundromat. Remaining areas are grass lawn and an

unfinished surface in the northwest corner of the site.

The work was conducted in accordance with the American Society for Testing and Materials (ASTM)

Standard E 1527-05 (Standard Practices for Environmental Site Assessment: Phase I Environmental

Site Assessment Process), 40 CFR Part 312 (Standards and Practices for All Appropriate Inquiry; Final

Rule) and PWGC's proposal for services.

Below is the Assessment Summary Table presenting our recommended actions for the subject

property. PWGC's Findings and Opinions are presented in Section 9.0 and recommendations for

further action or investigation are presented in Section 10.0.

ASSESSMENT SUMMARY TABLE					
Assessment Component	Sections	Recommended Actions	Estimated Cost		
Historical Review	3.3	No Further Action			
Current Occupants /	3.1	No Further Action			
Operations					
Hazardous Substances	6.4	No Further Action			
/ Petroleum Products					
Waste Generation	6.5	No Further Action			
Storage Tanks	6.2,6.3	No Further Action			
PCBs	6.6	No Further Action			
Storm Water Drainage	6.7	Phase II Recommended	\$12,000 - \$19,000		
Onsite Sanitary System	5.2	Phase II Recommended	Included in pricing above		
Potential Offsite	3.2,5.1	No Further Action	100		
Sources

Wetlands	8.1	No Further Action			

3

2.0 INTRODUCTION

2.1 Purpose

North Shore — LIJ Health System Department of Real Estate Services retained P.W. Grosser Consulting, Inc. (PWGC) to prepare a Phase I Environmental Site Assessment (ESA) of 250 East Main Street in Bay Shore, New York 11706. The purpose of the Phase I ESA was to identify and evaluate the presence of recognized environmental conditions (RECs) at the subject site. Recognized environmental conditions are the presence or likely presence of any hazardous substance or petroleum product under conditions that indicate an existing release, a past release or material threat of a release of any hazardous substance or petroleum product into structures on the property or into the ground, groundwater or surface water of the property.

2.2 Scope of Services

The assessment consisted of a visual inspection of the site and surrounding areas, interviews, a review of historical information and aerial photographs, and a review of pertinent local, state, federal and facility records. Environmental Data Resources (EDR) of Southport, Connecticut provided the following: a computerized database search of environmental compliance records of sites within an ASTM standard radius of the property, a Sanborn fire insurance map search, historical aerial photograph search and a historical telephone directory search.

PWGC reviewed the environmental database report compiled by EDR as a part of the assessment. The purpose of the review was to identify reported listings for the subject property or other properties in the site vicinity. Databases reviewed included federal and state lists of known or suspected contaminated sites, lists of known handlers or generators of hazardous waste, lists of known waste disposal facilities, and lists of aboveground and underground storage tanks (ASTs and USTs). PWGC's review of the database has been incorporated into this report along with a copy of the EDR report.

The work was conducted in accordance with the American Society for Testing and Materials (ASTM) Standard E 1527-05 (Standard Practices for Environmental Site Assessment: Phase I Environmental Site Assessment Process), 40 CFR Part 312 (Standards and Practices for All Appropriate Inquiry; Final

Rule) and PWGC's proposal for services.

2.3 Significant Assumptions

PWGC has made the following significant assumptions in the preparation of this report:

1. Groundwater Flow Direction - Based upon the most recent Suffolk County regional

groundwater map, regional groundwater flow direction is to the south.

2. Regulatory Records Information - PWGC assumes that all information provided by EDR

regarding the regulatory status of facilities within the ASTM Standard approximate minimum

search distance is complete, accurate and current.

3. Other - PWGC assumes that all information provided through interviews is complete and

unbiased.

2.4 Limitations and Exceptions

The conclusions presented in this report are professional opinions based on the data described in this

report. These opinions have been arrived at in accordance with currently accepted engineering and

hydrogeologic standards and practices applicable to this location, and are subject to the following

inherent limitations:

1. The data presented in this report are from visual inspections, examination of records in the

public domain, and interviews with individuals having information about the site. The passage

of time, manifestation of latent conditions, or occurrence of future events may require further

exploration of the site, analysis of data, and re-evaluation of the findings, observations, and

conclusions presented in this report.

2. The data reported and the findings, observations, and conclusions expressed are limited by

the scope of work. The scope of work was defined by the request of the client.

3. No warranty or guarantee, whether expressed or implied, is made with respect to the data

reported, findings, observations, or conclusions. These are based solely upon site conditions in

existence at the time of the investigation, and other information obtained and reviewed by

PWGC.

5

4. PWGC's Phase I ESA report presents professional opinions and findings of a scientific and

technical nature. While attempts were made to relate the data and findings to applicable

environmental laws and regulations, the report shall not be construed to offer legal opinion or

representations as to the requirements of, nor compliance with, environmental laws, rules, or

regulations, or policies of federal, state, or local government agencies. PWGC does not

assume liability for financial or other losses or subsequent damage caused by or related to any

use of this document.

5. The conclusions presented in this report are professional opinions based on data described in

this report. They are intended only for the purpose, site location, and project indicated. This

report is not a definitive study of contamination at the site and should not be interpreted as

such.

6. This report is based, in part, on information supplied to PWGC by third-party sources. While

efforts have been made to substantiate this third-party information, PWGC cannot attest to

the completeness or accuracy of information provided by others.

2.5 Special Terms and Conditions

Authorization to perform this assessment was given by a proposal for services between North Shore -

LIJ Health System and PWGC.

2.6 User Reliance

This report was prepared for the exclusive use of North Shore – LIJ Health System Department of Real

Estate Services. PWGC assumes no liability for use of this report by any person or entity other than

those for which it was prepared.

2.7 Data Gaps

Any data gaps identified herein, as defined by ASTM Practice E 1527-05 § 3.2.20, are not considered

to have significantly affected the ability to identify recognized environmental conditions in

connection with the subject property and do not alter the conclusions of this report.

3.0 PROPERTY DESCRIPTION AND PHYSICAL SETTING

3.1 Location and Legal Description

The subject site is 250 East Main Street Bay Shore, NY 11706 (District 500 Section 394; Block 1; Lots

68.9 and 69). The site is located in the Town of Islip, in the County of Suffolk. Figure 1 illustrates the

site location map and Figure 2 illustrates the site plan. Photos of the site are included in Appendix A.

3.2 Site Description and Improvements

The subject site measures approximately 0.90 acres in size and is improved with two buildings. The

north building is an approximately 3,000 square feet, single story, commercial building utilized as a

laundromat. The south building is an approximately 1,000 square feet, two story, vacant, residential

building. There is asphalt paved parking surrounding the laundromat. Remaining areas are grass

lawn and an unfinished surface in the northwest corner of the site.

3.2.1 Municipal Services and Utilities

Utility services are provided to the property as follows:

Heating/Cooling System – The commercial building is heated by a natural gas. The residential

building is heated by fuel oil. The fuel oil UST is located in the basement of the residential

building.

Water Supply – The site is connected to municipal water mains administered by the Suffolk

County Water Authority (SCWA).

Sanitary System – The site is reportedly connected to the municipal sewer system. There are

manhole covers which indicate the existence of on-site sanitary systems.

Electric – The site has electric service provided by Long Island Power Authority (LIPA).

Emergency Electrical Power – Not Provided

3.3 Physical Setting

The topography of the site and surrounding area was reviewed from the USGS 7.5-minute series

topographic map for the Bay Shore East, New York quadrangle. The property has an elevation of

approximately 9 feet above the National Geodetic Vertical Datum (NGVD). In general, the subject site

is flat and the surrounding area has minimal topographical sloping. Regional physiographic conditions

are summarized below.

3.3.1 Regional Geology / Hydrogeology

The geologic setting of Long Island is well documented and consists of crystalline bedrock composed

of schist and gneiss overlain by layers of unconsolidated deposits. Immediately overlying the bedrock

is the Raritan Formation, consisting of the Lloyd sand confined by the Raritan Clay Member. The

Lloyd sand is an aquifer and consists of discontinuous layers of gravel, sand, sandy and silty clay, and

solid clay. The Raritan Clay is a solid and silty clay with: few lenses of sand and gravel; abundant

lignite and pyrite; and gray, red or white in color.

Above the Raritan Clay lies the Magothy Formation. The Magothy Aquifer consists of layers of fine to

coarse sand of moderate to high permeability, with inter-bedded lenses of silt and clay of low

permeability resulting in areas of preferential horizontal flow. Therefore, this aguifer generally

becomes more confined with depth. The Magothy Aquifer is overlain by the Upper Glacial Aquifer.

The Upper Glacial Aquifer is the water table aquifer at this location and is comprised of medium to

coarse sand and gravel with occasional thin lenses of fine sand and brown clay. This aguifer extends

from the land surface to the top of the Magothy and, therefore, is hydraulically connected to the

Magothy Aquifer.

3.3.2 Local Hydrogeology

Based upon the site elevation and regional groundwater contour maps, the depth to groundwater

beneath the site is estimated to be approximately 6 feet below existing grade. Groundwater flow is

estimated to be south, towards the Great South Bay.

Based upon information contained within the EDR report, there are no public water supply wells

located within a one-mile radius of the subject property.

3.3.3 Flood Potential

PWGC reviewed the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Maps

(FIRMs) to determine if the subject property is located within the 100-year or 500-year flood zones.

Based upon the FIRM data, the subject property is not located within an identified flood zone.

3.3.4 Direction and Distance to Nearest Surface Water

The closest surface water body is an estuarine canal located approximately 250 feet south of the subject site.

4.0 PROPERTY USAGE

4.1 Current Property Usage

The subject site is a 0.90 acre lot with two buildings. There is a single story commercial building which is currently operated as a laundromat. The other building is a single family residential house which is currently vacant. According to the property owner, the house was most recently used for document storage.

4.2 Current Usage of Adjoining/Surrounding Properties

The surrounding area is a mix of commercial and residential properties. A summary of the surrounding properties is as follows:

Table 4-2 - Surrounding Property Usage

Direction Property Description	
North East Main Street (Route 27A) and South Side Hospital	
South	Residential
East	Mowbray Avenue and a vacant lot
West	Mowbray Lane and a delicatessen

4.3 Historical Usage of Subject Property and Surrounding Properties

Historical sources researched to determine past usage of the subject property and surrounding properties are as follows:

Sanborn Fire Insurance Maps - Environmental Data Resources (EDR) was retained to provide historical Sanborn fire insurance maps of the subject and adjacent properties. Historical Sanborn maps for the subject property and surrounding area were reviewed for the years available between 1897 and 1969. Review of the maps is summarized in Table 4-3. Copies of historical topographic maps are included as **Appendix B**.

Historical Topographic Maps - Historical topographic maps for the subject property and surrounding

area were reviewed for the years available between 1903 and 1979. Review of the maps is summarized in Table 4-3. Copies of historical topographic maps are included as **Appendix C**.

Historical Aerial Photographs - PWGC performed a review of readily available aerial photographs showing the subject property and surrounding area. Photographs were reviewed for the years available between 1953 and 2011. Review of the photos is summarized in Table 4-3. A copy of the aerial photograph search is included in **Appendix D**.

City Directory Abstract - EDR was retained to provide a directory of historical telephone listings at the subject property and surrounding properties. City directories were reviewed for the years available from 1974 through 2008. A copy of the city directory report is included as **Appendix E**. The site is listed as Garden Cleaners from 1974 to 1988, Bay Shore Newspaper from 1974 to 1981, Kilarjian Rug Cleaners in 1981, Coastal Realty Company in 1988, and B Sure Laundromat since 2002.

Table 4-3 - Subject Property Historical Usage

Date(s)	Source	Issues Noted	Description
1897-1902	SB	No	Three structures appear on the site which appear to be single-family dwellings. Main Street is present and present-day Mowbray Lane is indicated as Jib Boom Street. Mowbray Avenue is not present.
1909	SB	No Mowbray Avenue is constructed.	
1915-1925	1925 SB No One of the dwellings is no longer presen		One of the dwellings is no longer present.
1949	SB	Yes	An auto service building is present on the northeast portion of the site which appears to be the currently-existing Laundromat building. A dwelling is present which appears to be the currently existing dwelling. There is one other dwelling, one other auto service building, and two other small buildings on the subject site. Seven gasoline tanks are indicated surrounding the northeast auto service building.
The currently-exit cleaning building.		Yes	The currently-existing commercial building is indicated as a dry cleaning building. The dwelling on the northwest corner of the site is no longer present.

Sources: SB - Sanborn Map; TM - Historical Topographic Map; AP - Aerial Photograph; CD - City Directory

Review of historical information for the subject property indicates that the site has been developed since at least 1897. The currently-existing buildings have been present since at least 1949. The city directory and the Sanborn Maps indicate that the site has been utilized for automotive service and dry cleaning.

Table 4-3.1 – Surrounding Area Historical Usage

Date(s)	Source	Issues Noted	Description	
1897-1915	SB	No	The surrounding properties appear to be primarily residential.	
1925	SB	No	South Side Hospital is present to the north across Main Street.	
1949	SB	Yes	An auto sales and service buildings are present on the properties to the east and west across Mowbray Avenue and Mowbray Place.	
1 1909 1 30 1 180 1		Yes	A gasoline filling station with two gasoline tanks is indicated to the north of the subject site across East Main Street.	

Sources: SB – Sanborn Map; TM – Historical Topographic Map; AP – Aerial Photograph; CD – City Directory

Review of historical information reviewed for the properties surrounding the subject property indicate that the area was primarily used for residential purposes until approximately 1925 and for commercial/residential purposes since then. According to the available maps, South Side Hospital has existed to the north of the subject site since at least 1925, a gasoline filling station existed to the north of the site in 1969, and auto service stations existed to the east and west of the site from at least 1949 through 1969.

5.0 USER PROVIDED INFORMATION

5.1 User Requirements

The user of a Phase I report, as per the EPA AAI Rule and ASTM E1527-05 has certain responsibilities

which include providing information requested in the Owner Questionnaire, if available, to PWGC to

be included within the Phase I Report. Additionally, PWGC provided the user of the report a Owner

Questionnaire form. The Owner Questionnaire form was not completed and returned to PWGC. The

information requested in the Owner Questionnaire is intended to assist in gathering information that

may be material to identify if recognized environmental conditions are present at the subject

property. A sample Owner Questionnaire is included in Appendix F.

5.2 Title Records

Title records for the site may contain information about past owners and uses of the subject

property. The title report may also contain site information such as restrictive declarations which are

limitations on site uses based upon know environmental conditions. As of the date of this report the

user has not provided PWGC with a title search, or requested that PWGC perform a title search.

5.3 Environmental Liens

An environmental lien is a charge, security or encumbrance upon title to a property to secure the

payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup or other

remediation of hazardous substances or petroleum products upon a property, including, but not

limited to, liens imposed pursuant to CERCLA 42 USC § 9607 (1) & 9607(r) and similar state and local

laws. As of the date of this report the user has not provided PWGC with a lien search, or requested

that PWGC perform a lien search.

5.4 Specialized Knowledge

No specialized knowledge about the property was provided to PWGC.

5.5 Commonly Known or Reasonably Ascertainable Information

There is no commonly known information about the subject property.

5.6 Valuation Reduction for Environmental Issues

To the best of PWGC's knowledge, there have been no adjustments to the subject parcels value due

to environmental issues.

5.7 Owner, Property Manager and Occupant Information

The property is reportedly owned by Peter Ohara. The laundromat is operated by B Sure Laundromat.

5.8 Reason for Performing Phase I ESA

The Phase I ESA was performed to evaluate site conditions prior to a potential lease of the property.

6.0 RECORDS REVIEW

6.1 Standard Environmental Record Sources

Environmental Data Resources (EDR) of Southport, Connecticut was retained to provide a computerized database search of the project area within an ASTM-standard radius of the subject site. A list of the databases searched and the search radius is shown on the summary table below. PWGC reviewed the database output to determine if the subject site appears on any of the regulatory agency lists. Detailed information concerning each database list is provided in the EDR report (Appendix G). A summary of standard environmental record sources researched is as follows:

6.1.1 Federal Databases

The table below summarizes the Federal databases that were searched.

Table 6-1 - Federal Databases Searched

Agency	Agency Listing Name or database Searched		Search Distance
USEPA	National Priority List	NPL	1.0 mile
USEPA	National Priority List Deletions	Delisted NPL	0.5 mile
USEPA	Comprehensive Environmental Response		0.5 mile
USEPA	CERCLIS No Further Remedial Action Planned	CERCLIS-NFRAP	0.5 mile
USEPA	Resource Conservation and Recovery Act Corrective Action Activity	CORRACTS	1.0 mile
USEPA	Resource Conservation and Recovery Act Treatment/Storage/Disposal Facilities	RCRA TSD	0.5 mile
USEPA	Resource Conservation and Recovery Act Small/Large Quantity Hazardous Waste Generators	RCRA SQG/LQG	Subject Property and Adjoining
USEPA	Federal Institutional/Engineering Control registries	US INST/ENG Controls	Subject Property
USEPA	Emergency Response Notification System	ERNS	Subject Property
USEPA	Superfund (CERCLA) Consent Decrees	CONSENT	1.0 mile
USEPA	Records of Decision	ROD	1.0 mile
USEPA	Mines Master Index	MINES	0.25 mile

National Priority List - The National Priority List (NPL) is the Environmental Protection Agency (EPA)

database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions

under the federal Superfund Program.

Neither the subject site nor any sites within the search radius were identified as an NPL site.

National Priority List Deletions - National Priority List Deletions are sites that have been removed

from the National Priorities List. Sites are deleted where the EPA has determined that no further

response is appropriate.

Neither the subject site nor any sites within the search radius were identified as a Delisted NPL site.

CERCLIS - The Comprehensive Environmental Response, Compensation and Liability Information

System (CERCLIS) list is a compilation of sites that the EPA has investigated or is currently

investigating for a release or threatened release of hazardous substances.

Neither the subject site nor any sites within the search radius were identified as a CERCLIS site.

CERCLIS-NFRAP - No Further Remedial Action Planned (NFRAP) sites are sites that have been

removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best

of EPA's knowledge, assessment at a site has been completed and that EPA has determined no

further steps will be taken to list this site on the National Priorities List (NPL).

Neither the subject site nor any sites within the search radius were identified as a CERCLIS-NFRAP

site.

RCRA CORRACTS - The RCRA Corrective Actions (CORRACTS) database is the EPA's list of hazardous

waste treatment, storage or disposal facilities subject to corrective action under RCRA.

Neither the subject site nor any sites within the search radius were identified as a RCRA CORRACTS

16

site.

RCRA Treatment, Storage and Disposal - The EPA Resource Conservation and Recovery Act (RCRA)

program identifies and tracks hazardous waste from the point of generation to the point of disposal.

The RCRA Treatment, Storage and Disposal (TSD) database is a compilation of reporting facilities that

treat, store or dispose of hazardous waste.

Neither the subject site nor any sites within the search radius were identified as a RCRA TSD site.

RCRA Generators - The RCRA Generators database is a compilation of reporting facilities that

generate hazardous waste. A Small Quantity Generator (SQG) is a site which generate more than 100

and less than 1000 kg of hazardous waste during any one calendar month and accumulates less than

6000 kg of hazardous waste at any time; or a site which generates less than 100 kg of hazardous

waste during any one calendar month and accumulates less than 1000 kg of hazardous waste at any

time. Large Quantity Generators (LQG) generate more that 1000 kg of hazardous waste per month.

A Conditionally Exempt SQG (CESQG) generates less than 100 kg of waste a month. A RCRA non

generator (RCRA Non-Gen) no longer produces hazardous waste.

The subject site is not identified as a RCRA Generator site.

Two properties within the search radius were identified as a RCRA SQG Generator, including

Southside Hospital which is located to the north and across the street from the subject site. The

hospital has a single violation listed, specifically that they failed to report on their Universal Waste.

The failure to report a Universal Waste does not pose an environmental concern to the subject site.

Southside Hospital does not have a spill associated with the RCRA violation, but it is listed as a site

under the NY SPILLS database which will be discussed in the appropriate section below. The other

RCRA SQG site Five Star Motor Ltd, 224 East Main St. Bay Shore, NY 11706, which is approximately

100 feet to the west of the site. This site is located hydraulically cross gradient and has no violations

listed. Therefore, based on the RCRA status, it is unlikely to represent a concern to the subject site.

Five properties within the search radius were identified as a RCRA CESQG Generator. A single site

(MAACO Auto Printing & Bodyworks, 1916 Union Blvd Bay Shore, NY 11706) is listed as having a

violation although no further details are available. The site is located hydraulically up and cross

gradient to the subject site. The violation site is located adjacent to Penataquit Creek and any

potential groundwater impact will likely migrate towards the creek to the west rather than towards

the subject site to the east. Therefore the presence of this violation is unlikely to represent a concern

to the subject site. The other four RCRA sites have no violations listed and are located approximately

¼ miles from the subject site. Based on the absence of violations and the distance these sites are

unlikely to have impacted the subject site.

Federal Institutional/Engineering Controls – Federal Institutional/Engineering Controls databases list

sites with institutional/engineering controls in place. Institutional controls include administrative

measures, such as groundwater use restrictions, construction restrictions, property use restrictions,

and post remediation care requirements intended to prevent exposure to contaminants remaining on

site. Engineering controls include various forms of caps, building foundations, liners, and treatment

methods to create pathway elimination for regulated substances to enter environmental media or

effect human health.

The subject site is not identified in the Federal Institutional/Engineering Controls databases.

Emergency Response Notification System - The Emergency Response Notification System (ERNS) is a

national database used to collect information on reported releases of oil or hazardous substances.

The subject site is not identified in the ERNS databases.

Superfund Consent Decrees - The Superfund Consent Decrees (CONSENT) list identifies major legal

settlements that establish responsibility and standards for cleanup at NPL sites.

P.W. Grosser Consulting, Inc • P.W. Grosser Consulting Engineer & Hydrogeologist, PC 630 Johnson Avenue, Suite 7 • Bohemia, NY 11716
PH 631.589.6353 • FX 631.589.8705 • www.pwgrosser.com
New York, NY • Syracuse, NY • Seattle, WA

17

Neither the subject site nor any sites within the search radius were identified as a CONSENT site.

Records of Decision - Record of Decision (ROD) documents mandate a permanent remedy at an NPL site containing technical and health information to aid in the cleanup.

Neither the subject property nor any sites within the search radius were identified as a ROD site.

Master Mines Index - The Master Mines Index (MINES) file contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

Neither the subject site nor any sites within the search radius were identified in the MINES database.

6.1.2 New York State Databases

The table below summarizes the State databases that were searched.

Table 6-1.2 - New York State Databases Searched

Agency	Listing Name or database Searched	Abbreviation	Search Distance
NYSDEC	Inactive Hazardous Waste Disposal Sites in New York State	SHWS	1.0 mile
NYSDEC	Hazardous Substance Waste Disposal Site Study	HSWDS	0.5 mile
NYSDEC	Solid Waste Facility Register	SWF	0.5 mile

NYSDEC	Brownfield sites	Brownfields	0.5 mile

Agency	Listing Name or database Searched	Abbreviation	Search Distance
NYSDEC	Major Oil Storage Facilities	MOSF	0.5 mile
NYSDEC	New York State Spills	NYSPILLS	0.125 mile
NYSDEC	Dry Cleaner Site	Drycleaners	0.25 mile

New York State Inactive Hazardous Waste Disposal Sites - The New York State Department of Environmental Conservation (NYSDEC) maintains a state priority list of Inactive Hazardous Waste Disposal Sites (SHWS) considered to be actually or potentially contaminated and presenting a possible threat to human health and the environment. Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites.

Neither the subject site nor any sites within the search radius were identified in the SHWS database.

Hazardous Substance Waste Disposal Site Study - The Hazardous Substance Waste Disposal Site Study (HSWDS) list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the SHWS registry and non-registry sites that EPA Preliminary Assessment reports or Site Investigation reports were prepared.

Neither the subject site nor any sites within the search radius were identified as a HSWDS site.

Solid Waste Facility Register - The NYSDEC Solid Waste Facility Register (SWF) records contain an inventory of solid waste disposal facilities or landfills in New York State.

Neither the subject site nor any sites within the search radius were identified as a SWF site.

Registered Recycling Facilities - The Registered Recycling Facilities List (SWRCY) is a NYSDEC list of recycling facilities.

The subject site is not a SWRCY site.

There is one SWRCY site, Universal Recycling, LLC located approximately 1/3 mile north of the subject

site in an up-gradient direction. Based on the nature of the recycling operation and the distance from

the subject site, it is unlikely that the SWRCY site has impacted the subject site.

Registered Waste Tire Storage Facilities - The Registered Recycling Facilities List (SWTIRE) is a

NYSDEC list of Registered Waste Tire Storage & Facility List.

Neither the subject site nor any sites within the search radius were identified in the SWTIRE database.

Leaking Underground Storage Tank Sites - The Leaking Underground Storage Tank Sites (LTANKS)

database contains a NYSDEC inventory of reported leaking storage tank incidents. They can be either

leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents

are tank test failures, tank failures or tank overfills.

The subject site was not identified as a LTANK site. A total of fifteen LTANK sites were identified

within the search radius. Southside Hospital, which is directly north of the subject site, has two

separate listings for a tank test failure in 1992. The database does not indicate that there was a

release. Both of the listings for Southside Hospital were closed on February 1, 1995. There were no

spills documented as part of the LTANK listing and the listings were closed. Based upon the lack of

documented release and the closed status they are unlikely to pose a concern to the subject

property.

Each of the thirteen other LTANK sites is not an adjacent property and has been issued a no further

action letter by the NYSDEC. Therefore they are unlikely to represent a concern to the subject site.

Petroleum Bulk Storage - The NYSDEC Petroleum Bulk Storage - Underground Tanks (UST) database

lists facilities with a petroleum storage capacity of more than 1,100 gallons and less than 400,000

gallons. The NYSDEC Petroleum Bulk Storage - Aboveground Tanks (AST) database lists facilities with

registered above ground storage tanks.

The subject site is not identified as a PBS site. Nine UST sites and four AST sites were identified within

the EDR Report search radius. Southside Hospital, located directly north of the subject site, is

identified as having seventeen USTs, two 10,000 gallon capacity ASTs, and three 275 gallon capacity

ASTs. Southside Hospital is listed as a spill site under the NY SPILLS database which will be discussed

in the appropriate section below.

Chemical Bulk Storage - The Chemical Bulk Storage (CBS) database is a NYSDEC list of facilities that

store regulated hazardous substances in aboveground tanks (AST) with capacities of 185 gallons or

greater or underground tanks (UST) of any size.

Neither the subject site nor any sites within the search radius were identified in the CBS database.

Institutional/Engineering Controls - NYSDEC list of Environmental Remediation sites with

Institutional or Engineering Controls in place.

The subject site was not identified in the IC/EC database. One site, Gibson and Cushman Dredging

Co. LLC, 38 Homan Ave. Bay Shore, NY 11706, within the search radius was identified as an IC/EC site.

The site is not on adjacent property and is hydraulically down-gradient from the subject site. Based

on the distance and down-gradient direction, it is unlikely to represent a concern to the subject site.

Voluntary Cleanup Agreements - The NYSDEC Voluntary Cleanup Program (VCP) database identifies

brownfield sites undergoing private sector cleanup as part of redevelopment.

The subject site was not identified in the VCP database. One VCP site, Gibson and Cushman Dredging

Co. LLC, 38 Homan Ave. Bay Shore, NY 11706, within the search radius was identified as a VCP site.

The site is not on an adjacent property and is hydraulically down-gradient from the subject site.

P.W. Grosser Consulting, Inc • P.W. Grosser Consulting Engineer & Hydrogeologist, PC 630 Johnson Avenue, Suite 7 • Bohemia, NY 11716
PH 631.589.6353 • FX 631.589.8705 • www.pwgrosser.com
New York, NY • Syracuse, NY • Seattle, WA

21

Based on the distance and down-gradient direction, it is unlikely to represent a concern to the subject

site.

Brownfields - A Brownfield is any real property where redevelopment or re-use may be complicated

by the presence or potential presence of a hazardous waste, petroleum, pollutant, or contaminant.

Neither the subject site nor any sites within the search radius were identified as a Brownfield site.

Major Oil Storage Facilities - The NYSDEC Major Oil Storage Facilities (MOSF) database lists facilities

or vessels with a petroleum storage capacity of more than 400,000 gallons.

The subject site was not identified in the MOSF database. One listing (Frank Bros. Fuel Corp, 7

Belford Ave. Bay Shore, NY 11706) within the search radius was identified as a MOSF site. The site is

located approximately ½ mile to the north of the subject site and it is not listed as having a Spill. The

distance from the subject site and lack of a documented spill make it unlikely to represent a concern

to the subject site.

New York State Spills - The New York State Spills Information Database (NYSPILLS) contains data

collected on chemical and petroleum spill incidents reported to NYSDEC since April 1, 1986.

The subject site is identified as a NYSPILLS site (#1113618) due to the detection of petroleum in the

site soils in March 2012. According to the EDR Report and the NYSDEC Spill Incidents Database, the

Spill is not closed. However, a remediation occurred to remove gasoline USTs and gasoline-impacted

soils and there is a letter from the NYSDEC indicating that no further remedial activities are required

regarding this Spill.

Thirteen other properties within the search radius were identified in the NYSPILLS database; two of

them were on neighboring properties, including to the north at Southside Hospital. A spill was listed

for the property in August of 2010, but no details of volume or type of product are provided in the

23

database. Details from a New York State Department of Environmental Conservation memo state

that 650 tons of impacted soil/debris and 30,000 gallons of oily water were removed from the site.

The memo also states that groundwater samples were below water quality standards indicating that

the impact source had been removed and groundwater quality at the hospital is within regulatory

standards. The spill was closed in June of 2011. Groundwater samples indicated that the

groundwater below Southside Hospital is not impacted by the release and the spill was closed,

therefore this site is unlikely to represent a concern to the subject property.

The second Spill located adjacent to the subject site is Pathey Flowers, formerly located across

Mowbray Avenue to the east in a cross-gradient direction. The Spill is related to the detection of

gasoline in site soils during the removal of gasoline USTs. According to the EDR Report, one of the

associated Spill numbers is still open. Based on the proximity of the Pathey Flowers site and the open

listing, it is potential exists for the Pathey Flowers site to have impacted the subject site.

Each of the other eleven identified Spill sites have been closed by the NYSDEC. Based on the closure,

it is unlikely that these sites have impacted the subject site.

Historical Drycleaners - The NYSDEC maintains registry of Registered Drycleaner sites that were

available to EDR researchers.

The subject site is identified as a historical dry cleaner.

Two other dry cleaner sites were identified within the search radius. The sites are located in either a

cross-gradient or down-gradient direction. Based on this, it is unlikely that these sites have impacted

the subject site.

6.1.3 EDR Databases

The table below summarizes the EDR databases that were searched.

Table 6-1.3 - Additional Databases Searched

Agency	Listing Name or database Searched	Abbreviation	Search Distance
EDR	Manufactured Gas Plants	CGS	1.0 mile

Manufactured Gas Plants - The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas plants (MGP) were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar, sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

The subject site was not identified as a MGP site. One listing (LILCO Bay Shore MGP, Clinton Ave. Bay Shore, NY 11706) within the search radius was identified as a MGP site, but the site is located approximately one mile to the west and is hydraulically cross-gradient from the subject site. Based on the distance and cross-gradient direction, it is unlikely that the MGP site has impacted the subject site.

6.1.4 Orphan Sites

Orphan sites are properties, that due to an inadequate or incomplete address in government databases or in base map files, are not able to be geographically located (i.e. mapped or geocoded). This can occur for several reasons; no street number or street name in address given; the street address is given only as a P.O. Box; or when inconsistencies exist in the address (street number does

not exist in the city / zip code given).

Twenty-five orphan sites were identified in the EDR report. PWGC performed a cursory review of the addresses listed. Neither the subject site, nor any adjoining parcels appear to be identified in the

orphan listings.

6.1.5 Freedom of Information Act Requests

files received are included in Appendix H.

Freedom of Information Act (FOIA) requests were sent to the United States Environmental Protection Agency, Region II (USEPA), the New York State Department of Environmental Conservation, Region 1 (NYSDEC), the Suffolk County Department of Health Services (SCDHS), and the Town of Islip Building Department. As of the date of this report, responses to FOIA requests have not been received. Pertinent information will be forwarded as an addendum upon receipt. Copies of FOIA requests and

26

7.0 SITE RECONNAISSANCE

7.1 Methodology and Limiting Conditions

Mr. John Eichler of PWGC performed site inspections on Wednesday, September 25 and Friday,

September 27, 2013. Weather conditions during both inspections were mostly sunny with a

temperature of approximately 70° Fahrenheit.

The initial site inspection consisted of an inspection of the interior of the commercial structure,

followed by the exterior portions of the property. The second inspection consisted of an inspection

of the vacant residential building.

7.2 Aboveground Storage Tanks (AST)

One 275-gallon fuel oil AST was identified in the basement of the house. The AST was heavily

corroded with some petroleum staining on the bottom, as well as on the concrete floor beneath.

7.3 Underground Storage Tanks (UST)

A fuel oil fill port and vent were identified outside the northwest corner of the Laundromat. Two

gasoline tank vents were observed on the outer west wall of the laundromat. One gasoline tank vent

was observed near the southeast corner of the Laundromat. Based on a conversation with the

NYSDEC, nine gasoline USTs were removed from the site, and one fuel oil UST remains.

7.4 Hazardous and Non-Hazardous Chemical Storage

No hazardous or non-hazardous chemicals were observed during the site inspection.

7.5 Waste Generation, Storage, and Disposal

One dumpster was observed to the west of the Laundromat.

7.6 Polychlorinated Biphenyls (PCBs)

No PCB containing equipment was observed at the subject site during the inspection.

7.7 Additional Site Conditions

The following table is a summary of visual and/or physical observations made by PWGC at the subject

property on the day of the inspection. Photographs of pertinent observations are included in

Appendix A.

Table 7-7 - Additional Site Conditions

Condition	Identified
Interior drains, trenches or sumps.	Yes
Interior stains or corrosion	Yes
Unusual odors	No
Interior pools of liquid	No
Stained Soils or Pavement	No
Stressed Vegetation	No
Indications of solid waste disposal	No
Exterior ponds, pits, or lagoons	No
Wastewater or storm water discharge / disposal	Yes
Oil water separators / clarifiers	No
Septic Systems / Cesspools	Yes
Wells (Drinking water, monitoring wells, agricultural / irrigation wells, or process water wells)	No
Petroleum or natural gas pipelines or easements	No
Other	No

- One sump with a pump was observed in the basement of the house.
- The AST in the basement of the house was heavily corroded with petroleum staining on the floor beneath.
- A storm water pool is located in the parking area between the house and the Laundromat.

7.8 Neighboring Properties

PWGC performed a cursory inspection of the neighboring properties from the subject site and public right of ways. This inspection revealed no issues of environmental concern which would pose a concern to the subject site.

8.0 INTERVIEWS

8.1 Owner

The owner, Peter Ohara, was not present during the site inspection and as of the date of this report, PWGC has not received the completed Owner Questionnaire. The owner was interviewed and he indicated that a remediation occurred at the site which included the removal of several gasoline USTs. A sample Owner Questionnaire is included as **Appendix F**.

8.2 Occupant

The laundromat is occupied by B Sure Laundromat. The house is vacant.

8.3 Historic Environmental Report Review

PWGC was not provided with any historic environmental reports.

8.4 Local Government Officials

Freedom of Information Act (FOIA) requests were sent to the United States Environmental Protection Agency, Region II (USEPA), the New York State Department of Environmental Conservation, Region 1 (NYSDEC), the Suffolk County Department of Health Services (SCDHS), and the Town of Islip Building Department. FOIA requests and responses are addressed in Section 6.1.5. Copies of the FOIA requests are included in **Appendix H.** The NYSDEC case manager involved with the site's Spill was interviewed, and indicated that a remediation occurred at the site which included the removal of nine gasoline USTs and gasoline-impacted soil, and that the remediation was complete. The NYSDEC letter indicating this is included in **Appendix H**.

29

Conditions Outside the Scope of ASTM 1527-05

8.5 Wetland Delineation

A review of the EDR database search, which includes State and Federal wetlands, indicates that there

are wetlands located within a one mile radius of the subject property. The nearest wetland is

located approximately 1/8 mile to the west of the subject site and is associated with Penataguit

Creek. Based upon this information, the property is not located within a wetland buffer zone.

8.6 Radon Risk Evaluation

Radon is a colorless, radioactive; inert gas formed by the decay of radium and may be present in soils

and rocks containing granite, shale, phosphate and pitchblende. The EDR report provides

information from the New York State Department of Health radon survey which indicates that 100%

of those sites tested in Suffolk County were below the United States Environmental Protection

Agency (USEPA) radon action level of 4 Pico curies per liter (pCi/L) in the living area.

8.7 Asbestos

PWGC did not observe evidence indicating the presence of potential asbestos containing material

during site reconnaissance. Due to the age of the structures, it is possible that asbestos containing

material is present within the structures.

8.8 Lead-Based Paint (LBP)

Due to the age of the structures, it is possible that lead-based paint is present within the structures.

8.9 Mold

At the time of the inspection, PWGC did not observe evidence of mold at the subject site.

9.0 FINDINGS AND OPINIONS

Based upon reconnaissance of the subject and surrounding properties, interviews and review of historical records and regulatory agency databases, the following potential recognized environmental conditions have been identified:

- An open NYSDEC Spill (1113618) is assigned to the subject site.
- An open NYSDEC Spill (1006448) is assigned to the former Pathey Flowers property across
 Mowbray Avenue to the east.
- Historical records indicate that the site was operated as an automotive service station.
- Historical records indicate that the site was operated as a dry cleaner.
- A corroded 275-gallon fuel oil AST was observed in the basement of the house. Petroleum staining was observed on the floor beneath the AST.
- A fuel oil fill port and vent (evidence of a fuel oil UST) are located adjacent to the laundromat.
- Gasoline tank vent pipes were observed along the outer walls of the laundromat.
- A storm water pool was observed in the parking area between the laundromat and the house.
- Five solid manhole covers were identified on the subject site, which may be related to on-site sanitary systems.

Potential recognized environmental conditions identified at the subject property were evaluated to determine whether items initially suspected to be recognized environmental conditions are in fact recognized environmental conditions. Evaluation of potential recognized environmental conditions (REC) are as follows:

- An open NYSDEC Spill (1113618) is assigned to the subject site. Based on a NYSDEC letter regarding the subject Spill, dated October 12, 2012, no further remedial activities are necessary for the subject site. Based on this letter, the Open Spill is not a REC (Appendix H).
- An open NYSDEC Spill (1006448) is assigned to the former Pathey Flowers property across Mowbray Avenue to the east. Based on the proximity of the former Pathey Flowers site to the subject site, the potential exists for the former Pathey Flowers site to have impacted the subject site with gasoline product. The potential for an off-site source of contamination should be considered during Phase II activities performed at the subject site.

Historical records indicate that the site was operated as an automotive service station. The
potential exists for operations at auto service stations to impact the subsurface. Based on

this, the former usage of the site as an automotive station is considered a REC.

Historical records indicate that the site was operated as a dry cleaner. The potential exists for

operations at a dry cleaner to impact the subsurface with chlorinated solvents. Based on this,

the former usage of the site as a dry cleaner is considered a REC.

A corroded 275-gallon fuel oil AST was observed in the basement of the house. Petroleum

staining was observed on the floor beneath the AST. It is possible that leaks from the AST

have found a pathway through the basement floor and impacted the subsurface. Based on

this, the AST is considered a REC.

A fuel oil fill port and vent (evidence of a fuel oil UST) are located adjacent to the laundromat.

Fuel oil USTs have the potential to release product to the subsurface. Based on this, the

suspected UST is considered a REC.

Gasoline tank vent pipes were observed along the outer walls of the laundromat. Gasoline

USTs have the potential to release product to the subsurface. However, based on the NYSDEC

'no further action' letter regarding the former gasoline USTs, the vent pipes are not

considered a REC.

A storm water pool was observed in the parking area between the laundromat and the house.

Such structures can act as pathways for improper chemical disposal. Based on this, and the

property's former usage as an automotive service station and a dry cleaner, the storm water

pool is considered a REC.

Five solid manhole covers were identified on the subject site, which may be related to on-site

sanitary systems. Improper chemical disposal to on-site sanitary systems have the potential

to impact the subsurface. Based on this, the suspected sanitary systems are considered a REC.

PWGC identified the following concerns outside ASTM Scope:

Due to the age of the structures, it is possible that asbestos containing material is present

within the structures.

• Due to the age of the structures, it is possible that lead-based paint is present within the

structures.

PWGC Strategic Environmental Engineering Solutions

11.0 CONCLUSIONS AND RECOMMENDATIONS

Based upon evaluation of recognized environmental conditions identified in Section 10.0 above, PWGC concludes that a Phase II ESA is necessary for the site. Based on our findings, PWGC recommends the Phase II ESA include the following (at minimum):

- Ground-penetrating radar (GPR) survey to determine the locations of potential Underground
 Injection Control (UIC) structures and USTs, and clear locations for soil borings.
- Subsurface soil and groundwater investigation to determine if the site's former usage as an automotive service station and dry cleaner has impacted the subsurface.
- Inspection of on-site manhole structures. Investigation and sampling of Underground Injection Control (UIC) structures including suspected on-site sanitary systems and the storm water pool.
- Confirm that the site's structures are connected to the municipal sewer system.
- Soil vapor sampling to determine if past operation of a dry cleaner and an automotive service station has created a vapor intrusion condition.

PWGC estimates the cost to perform the recommended services to be approximately \$11,000 to \$15,000 depending upon the extent of Phase II services required.

9.1 Deviations

This Phase I ESA was conducted in accordance with the scope and limitations of the American Society for Testing and Materials (ASTM) Standard E 1527-05 (Standard Practices for Environmental Site Assessment: Phase I Environmental Site Assessment Process) and 40 CFR Part 312 (Standards and Practices for All Appropriate Inquiry; Final Rule). Excluding additional services outlined in Section 11.0, there were no deviations or deletions from this practice.

11.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312. I have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

The EDR Aerial Photo Decade Package

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

<u>Year</u>	Target Street	Cross Street	<u>Source</u>

APPENDIX F SITE QUESTIONNAIRE AND RELEVANT DOCUMENTS

P.W. GROSSER CONSULTING

Owner Questionnaire

P.W. Grosser Consulting Inc. (PWGC) ha s been contracted to perform a Phase I Environmental Site Assessment (ESA) of the property listed below. The Phase I investigation will include site observations, interviews, and re view of available documentation. To ensure the success of the assessment, and in acc ordance with the ASTM 1527-05, we are required to ask the following question of the owner or opener's representative. If you could pleas e complete this questionnaire and return it vi a email or by fax to (631) 589-8705 within one business day of receipt it will allow us to c omplete the Phase I ESA in a timely and e fficient manner.

Directions: Please read and answer all questions very carefully, to the best of your knowledge and in good faith. Mark the column corresponding t o the appropriate response. Supplemental details necessary to explain any yes or unknown responses should be provided in the "Comments" column. Note: U/NR indicates "Unknown" or "No Response," and "N/A" indicates not applicable. If "Comment" box proves to small to fit your comment please attach an additional form with your full response.

	Question	Y	N	U/NR	Comment
1	Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?				
2	Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?				
3	Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?				
4	Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?				
5	Are you aware of any Activity and Use Limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?				

6	Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user			
6(a)	Do you know past uses of the property?			 _
6(b)	Do you know of specific chemicals that are present or once were present at the property?			
6(c)	Do you know of any spills or other chemical releases that have taken place at the property?			
6(d)	Do you know of any environmental cleanups that have taken place at the site?			

In addition, are you aware of any of the following documents, and if so, please forward copies of the document(s) to P.W. Grosser Consulting at 630 Johnson Ave, Ste 7, Bohemia, NY 11716-2618 (along with a copy of this form):

Helpful Documents to be forwarded to PWGC:			
Environmental site assessment reports (i.e. Phase I or II, tank testing results, radon, lead paint, or asbestos			
testing, etc.)			
Environmental compliance audit reports; risk assessments; and recorded Activity and Use Limitations (AULs)			
Environmental permits (i.e. solid waste disposal, hazardous waste disposal, wastewater, NPDES, etc.)			
Registrations for underground storage tanks (USTs) and aboveground storage tanks (ASTs)			
Registrations for underground injection systems			
Material safety data sheets			
Community right to know plan			
Safety plans; preparedness and prevention plans; spill prevention, countermeasure/control plans, etc.			
Reports regarding hydrogeological or geotechnical conditions on the property and surrounding area			
Notices/correspondence from any agency relating to past or current violations of environmental laws, or liens			
encumbering the property			
Hazardous waste generator notices or reports

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in bold italics are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 07/11/2013 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Lower Elevation	Address	Direction / Distance	Map ID	Page
FIVE STAR MOTOR LTD	224 E MAIN ST	W 0 - 1/8 (0.040 mi.)	B9	33

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 07/11/2013 has revealed that there are 5 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 08/19/2013 has revealed that there are 15 NY LTANKS sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, and dated 08/07/2013 has revealed that there are 9 NY UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 07/11/2013 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page	
LILCO BAYSHORE MGP	CLINTON AVE	W 1/2 - 1 (0.885 mi.)	62	186	

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 9 EDR US

Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

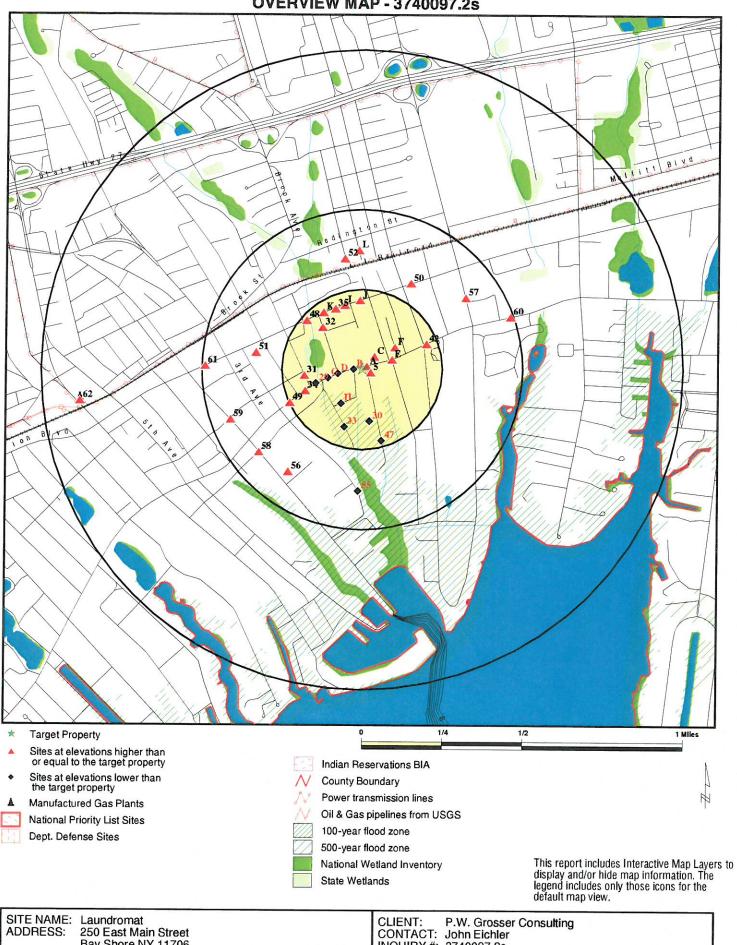

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 2 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

S110540862

SOME POINT PRIOR TO THAT*** DR05-17-10 11:45 AM WG spoke to Skip Rooney (516-480-4453)-As per Mr. Rooney, contaminated soil has been observed inside the excavation at the above location during a routine tank removal of seven underground tanks -- 2(2K)Gas, 3(1k)Gas, and (1) 550 gal of waste oil, under SCHD (Dennis) supervision.-Mr. Rooney is requesting a backfill inspection from DEC. (WG)Dave Raymond has been dispatched to the site from Patchogue.5/20/10 FILE REASSIGNED5/19/10 TJDSite inspection. (6) UST's removed previously under DOH supervision. Tanks reported not in service for 30+ years. (1) 1K gasoline tank reported to have single pinhole in steel shell. At time of inspection excavation was approximately 20x30x8 ft bgs with shallow GW flooding open excavation @approximately 4 ft bgs. Excavator was used collect samples for field screening - minor olfactory impacts noted. No sample of north sidewall required (heavily undermined) contractor advised to backfill area to north immediately. Vacant parcel in contract for sale - owner plans to over excavate area to clean endpoint. DEC to perform follow-up inspection prior to backfill.5/24/10 TJDSite inspection. Excavation has been expanded to approximate dimensions of 25x40x12 ft bgs. Screening of base/sidewalls soils appear free of residual petroleum impacts. Sample requirements discussed with contractor. Approximately 200 vds of petroleum impacted soil is stockpiled onsite pending disposal. Backfill approved.8/4/10 TJDFile review. All required disposal documentation has been received. A total of 195.7 tons of petroleum impacted soil was excavated and properly disposed of during remedial process. Laboratory analysis of endpoint samples (soil/water) reveal minor exceedances of allowable concentrations of target analytes. Inconsistancies for sample identification noted - disparity between map and lab data - Lou @Eastern contacted via phone and asked to provide a written explanation. Awaiting requested information 8/5/10 TJDEastern provided requested documentation. West sidewall sample is likely improperly labeled on chain of custody as North pit. Concentrations of target compounds in GW samples do not warrant further investigatory or remedial action. File closed.

Remarks:

tank removal underway/contamination has been found.UPDATE: GASOLINE AND/OR DIESEL IS BELEIVED TO BE THE MATERIAL SPILLED.

DEC Memo:

***CHECKED THE DATABASE- COULD NOT DETERMINE WHETHER THERE HAVE BEEN PRIOR INCIDENTS AT THIS SPECIFIC PARCEL, BUT THERE HAVE BEEN SOME

INCIDENTS REPORTED FOR "SOUTHSIDE HOSPITAL 301 EAST MAIN ST".***

DR08/30/10 1300 Hrs (A): While speaking to Walter Petrule (Suffolk County Health Department)- he said he needed either the specific address or the tax map number to determine whether his agency has records of any tanks at this location.08/30/10 1300 Hrs (B): He suggested speaking to Janet Gremle in his office if this involved a site assessment. DR08/30/10 approx 1450 Hrs (A): Provided the spill number to Marsh, and advised him to check with Spills tomorrow to determine who had been assigned to the case 08/30/10 approx 1450 Hrs (B): HE SAID THE TAX MAP NUMBER IS 0500-393-3-133.1.08/30/10 approx

1450 Hrs (C): MARSH DOES NOT HAVE A CONTACT AT THE HOSPITAL, BUT THE CONTACT AT THE TOWN OF ISLIP PLANNING DEPARTMENT IS TOM MARGUARDT

(631-224-5445).08/30/10 approx 1450 Hrs (D): MARSH IS NOT CERTAIN

EXACTLY WHAT MIGHT HAVE BEEN PERFORMED FOR A SITE ASSESSMENT, BUT SAID THE TOWN IS WAITING TO HEAR WHAT DEC MIGHT REQUIRE FOR FURTHER

INVESTIGATION/CLEANUP. DR6/21/11 650 TONS IMPACTED SOIL/DEBRIS REMOVED ALONG WITH 30000 GALS OILY WATER, ENDPOINTS BELOW

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Date Record Added: Date Rec Updated: 01/14/2008 01/29/2013 ietrad

Updated By: Site Description:

Location: The site is located at 38 Homan Avenue in suburban Bay Shore, Long Island. This is a rectangularly shaped repair & amp; storage facility. Surrounding use includes commercial, recreational and some residential. It is used as a base of operations for a dredging business, with barges anchored in a canal alongside the property. The property has been used for dredging operation for 80 years with the current owners, GCD, having owned the property for 75 years. Site Features: There are two parcels: the northern, which contains the company offices, portable sea containers & amp; a workshop area is approx 28,800 ft. sq. The southern parcel contains storage racks, a steel welding area & amp; two large maintenance shop buildings is approx 38,400 ft. sq. The dredging equipment & amp; attendant plant are removed by crane & placed on the southern parcel for repair & maintenance. Current Zoning/Use(s): The site is currently active, and is zoned for commercial use. The surrounding parcels are a combination of commercial and residential. Historical Use(s): In 1997, Roux Assoc, Inc conducted a limited Environmental Phase II ESI of the property and in 1999, Anson Environmental, Ltd. Performed additional Phase II ESI activities which included soil sampling. These investigations found that the northern parcel had a moderate amount of nonhazardous petroleum hydrocarbon contamination and the southern parcel contained primarily metals contamination of zinc, lead and arsenic. The Volunteer, Gibson and Cushman Dredging Co. entered in a voluntary agreement with the NYSDEC on 10/10/2001 to remediate the site. The Volunteers consultant had prepared a workplan to address the remedy of the site. This workplan provided for the excavation of soil from the surface of the entire site not covered by a structure and confirmatory sampling pursuant to DER-10. The workplan was approved and the remedy was implemented in 2006. Deed restrictions are required due to some remaining residual contamination. Deed restrictions were filed 11/15/2007, NYSDEC OGC issued the Release Letter 12/16/08. Site Geology and Hydrogeology: The site is located near the southern perimeter of the Town ofIslip. The groundwater reservoir underlying the Township of Bay Shore, Town of Islip is composed of unconsolidated local deposits of Holocene age, glacial deposits of Pleistocene Age, and coastal-plain deposits of continental and marine origin of the Late Cretaceous Age. From oldest (deepest) to youngest (shallowest) these sediments have been identified and divided into a series of hydrogeologic units: the Lloyd Aquifer; the Raritan clay confining unit; the Magothy Aquifer,

and the Upper Glacial Aquifer. The Upper Glacial Aquifer consists of late Pleistocene and Holocene Age poorly sorted sand, gravel, silt, and clay deposits. The upper surface of the upper glacial deposits comprise present day land surface. The southernmost part of the Town of Islip is underlain by highly permeable glacial outwash consisting of stratified sand and gravel and occasional thin clay beds. The deposits forming the Upper Glacial Aquifer range in thickness from 6 feet to more than 350 feet. The extreme variation in thickness results from the highly eroded surface upon which these materials were deposited and the irregularity of their upper surface that is the present land surface. The outwash deposits range in thickness from 14 feet to about 165 feet. The groundwater under the site ranges from six inches below the ground surface on the westernside of the property to twenty-four inches below grade on the eastern side.

Env Problem:

Hazardous waste contamination due to operation and maintenance of the dredging equipment and barges. The welding, sanding and painting operations have caused the contamination of the soil by arsenic, lead and zinc, primarily in the southern parcel. There is predominantly nonhazardous petroleum hydrocarbon contamination and some metals contamination of the northern parcel. On-site soils metals contamination and petroleum hydrocarbon were at levels above NYS standards. The remedy has been implemented. Deed restrictions were filed 11/15/2007. RBE-RSA issued the Recommendation to Issue Release of VCA memo 11/4/08. NYSDEC OGC issued the Release Letter 12/16/08.

Health Problem:

No one is likely to come in contact with contamination from this site. Public water serves the area and there are no known users of well water in the vicinity so no one is likely to drink contaminated groundwater. Residual soil contamination on-site has been covered with clean fill, and since the site is fenced, contact with contaminated soil is not expected. If a change of site use is contemplated, the State will evaluate what additional investigations may be needed.

Hazardous waste contamination due to operation and maintenance of the dredging equipment and barges. The welding, sanding and painting operations have caused the contamination of the soil by arsenic, lead and zinc, primarily in the southern parcel. There is predominantly nonhazardous petroleum hydrocarbon contamination and some metals contamination of the northern parcel. On-site soils metals contamination and petroleum hydrocarbon were at levels above NYS

standards. The remedy has been implemented. Deed restrictions were filed 11/15/ 2007. RBE-RSA issued the Recommendation to Issue Release of VCA memo

11/4/08. NYSDEC OGC issued the Release Letter 12/16/08.

Health Problem:

No one is likely to come in contact with contamination from this site. Public water serves the area and there are no known users of well water in the vicinity so no one is likely to drink contaminated groundwater. Residual soil contamination on-site has been covered with clean fill, and since the site is fenced, contact with contaminated soil is not expected. If a change of site use is contemplated, the State will evaluate what additional investigations

may be needed.

Updated By:

Site Description:

Location: The site is located at 38 Homan Avenue in suburban Bay Shore, Long Island. This is a rectangularly shaped repair & amp; storage facility. Surrounding use includes commercial, recreational and some residential. It is used as a base of operations for a dredging business, with barges anchored in a canal alongside the property. The property has been used for dredging operation for 80 years with the current owners, GCD, having owned the property for 75 years. Site Features: There are two parcels: the northern, which contains the company offices, portable sea containers & amp; a workshop area is approx 28,800 ft. sq. The southern parcel contains storage racks, a steel welding area & amp; two large maintenance shop buildings is approx 38,400 ft. sq. The dredging equipment & amp: attendant plant are removed by crane & amp; placed on the southern parcel for repair & amp; maintenance. Current Zoning/Use(s): The site is currently active, and is zoned for commercial use. The surrounding

parcels are a combination of commercial and residential. Historical Use(s): In 1997, Roux Assoc, Inc conducted a limited Environmental Phase II ESI of the property and in 1999, Anson Environmental, Ltd. Performed additional Phase II ESI activities which included soil sampling. These investigations found that the northern parcel had a moderate amount of nonhazardous petroleum hydrocarbon contamination and the southern parcel contained primarily metals contamination of zinc, lead and arsenic. The Volunteer, Gibson and Cushman Dredging Co. entered in a voluntary agreement with the NYSDEC on 10/10/2001 to remediate the site. The Volunteers consultant had prepared a workplan to address the remedy of the site. This workplan provided for the excavation of soil from the surface of the entire site not covered by a structure and confirmatory sampling pursuant to DER-10. The workplan was approved and the remedy was implemented in 2006. Deed restrictions are required due to some remaining residual contamination. Deed restrictions were filed 11/15/2007. NYSDEC OGC issued the Release Letter 12/16/08. Site Geology and Hydrogeology: The site is located near the southern perimeter of the Town ofIslip. The groundwater reservoir underlying the Township of Bay Shore, Town of Islip is composed of unconsolidated local deposits of Holocene age, glacial deposits of Pleistocene Age, and coastal-plain deposits of continental and marine origin of the Late Cretaceous Age. From oldest (deepest) to youngest (shallowest) these sediments have been identified and divided into a series of hydrogeologic units: the Lloyd Aquifer; the Raritan clay confining unit; the Magothy Aquifer, and the Upper Glacial Aquifer. The Upper Glacial Aquifer consists of late Pleistocene and Holocene Age poorly sorted sand, gravel, silt, and clay deposits. The upper surface of the upper glacial deposits comprise present day land surface. The southernmost part of the Town of Islip is underlain by highly permeable glacial outwash consisting of stratified sand and gravel and occasional thin clay beds. The deposits forming the Upper Glacial Aquifer range in thickness from 6 feet to more than 350 feet. The extreme variation in thickness results from the highly eroded surface upon which these materials were deposited and the irregularity of their upper surface that is the present land surface. The outwash deposits range in thickness from 14 feet to about 165 feet. The groundwater under the site ranges from six inches below the ground surface on the westernside of the property to twenty-four inches below grade on the eastern side. Hazardous waste contamination due to operation and maintenance of the dredging equipment and barges. The welding, sanding and painting operations have caused the contamination of the soil by arsenic, lead and zinc, primarily in the southern parcel. There is predominantly nonhazardous petroleum hydrocarbon contamination and some metals contamination of the northern parcel. On-site soils metals contamination and petroleum hydrocarbon were at levels above NYS standards. The remedy has been implemented. Deed restrictions were filed 11/15/2007. RBE-RSA issued the Recommendation to Issue Release of VCA memo 11/4/08. NYSDEC OGC issued the Release Letter 12/16/08. No one is likely to come in contact with contamination from this site. Public water serves the area and there are no known users of well water in the vicinity so no one is likely to drink contaminated groundwater. Residual soil contamination on-site has been covered with clean fill, and since the site is fenced, contact with

contaminated soil is not expected. If a change of site use is contemplated, the State will evaluate what additional investigations

may be needed.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/26/2013 Date Data Arrived at EDR: 05/09/2013 Date Made Active in Reports: 07/10/2013

Next Scheduled EDR Contact: 10/21/2013 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities

List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

State and tribal Brownfields sites

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

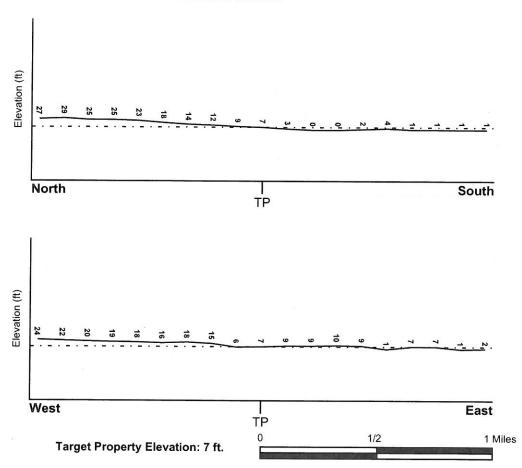

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

BAY SHORE EAST

YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:

1.25 miles

Status:

Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION

FROM TP

GENERAL DIRECTION

MAP ID Not Reported GROUNDWATER FLOW

riot rioportou

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK[®] - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil	Map	ın.	1
JUII	IVIAN	IU.	

Soil Component Name:

Urban land

Soil Surface Texture:

Hydrologic Group:

Not reported

Soil Drainage Class: Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min:

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOWR Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at

least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

P.W. GROSSER CONSULTING

September 26, 2013

Ms. Olga Murray Town Clerk Town of Islip 655 Main Street Islip, New York 11751

Re:

Freedom of Information Request

250 East Main Street Bay Shore, NY 11706

District 500; Section 394; Block 1; Lot 68.9 and 69

Dear Ms. Murray:

P.W. Grosser Consulting, Inc. (PWGC) has been retained to prepare a Phase I Environmental Site Assessment for the above-referenced site.

We are requesting available copies of environmental files, records, and memoranda concerning the facility. This information should include: 1) Building Plans, 2) past and present underground storage tank registration(s); 3) Onsite- Sanitary system information.

We will gladly pay copying costs.

Please advise if this request can be accommodated in an expedient manner. We would like to schedule an appointment to copy the file/records if this is not possible.

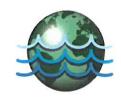

Feel free to call with any questions or if additional information is needed to respond to this request.

Very truly yours, **PWGC**

Ms. Bonnie Bellow Freedom of Information Officer United States Environmental Protection Agency, Region II 290 Broadway, 26th Floor New York, NY 10007-1866

Re:

Freedom of Information Request

250 East Main Street Bay Shore, NY 11706

Dear Ms. Bellow:

P.W. Grosser Consulting, Inc. (PWGC) has been retained to prepare a Phase I Environmental Site Assessment for the above referenced address.

We are requesting available copies of environmental files, records, and memoranda concerning the facility. This information should include: 1) past and present underground storage tank registration(s); 2) reported spills or releases of hazardous substances; 3) generation, storage, treatment, or disposal of hazardous substances; 4) past or present groundwater, surface water, and soil investigations; 5) environmental permits/violations.

We will gladly pay copying costs.

Please advise if this request can be accommodated in an expedient manner. We would like to schedule an appointment to copy the file/records if this is not possible.

Feel free to call with any questions or if additional information is needed to respond to this request.

Very truly yours, **PWGC**

Mr. Norman Chernik 250 Realty Holding Co., LLC 250 E. Main Street Bay Shore, NY 11706

Re: Spill #1113618; 250 East Main Street, Bay Shore, NY

Dear Mr. Chernik:

The Department has reviewed the records and data submitted by you regarding cleanup actions at the above referenced petroleum spill site. Based on such review, the Department determined that you have completed the necessary cleanup and removal actions, and no further remedial activities are necessary.

Nothing contained herein shall be construed as barring, diminishing, or in any way limiting Department's authority under the Navigation Law or the Environmental Conservation Law, including the authority to require additional remedial work, if necessary.

Should you have any questions concerning this matter, you may call me at (631) 444-0334.

Sincerely,

Kristy A. Salafrio
