June 6, 2005

Mr. Nicolas Mann
Quay Consulting, LLC
PO Box 812
Nyack, NY 10960

Dear Mr. Mann:

RE: NY Sand & Stone, LLC
BUD No. 846-2-24

The New York State Department of Environmental Conservation (NYSDEC) has reviewed your petition dated May 5, 2005 for a beneficial use determination (BUD) for sand dredged by Amboy Aggregates, Inc., of South Amboy, New Jersey, from the Ambrose Channel, as unrestricted-use aggregate in New York State.

The May 5 petition states the following:

- Sand dredging (“mining”) from the Ambrose Channel is conducted in accordance with a US Army Corps of Engineers permit, No. 2001-00492 and a NJ Department of Environmental Protection permit, both held by Amboy Aggregates.
- The sand is distributed in New York by New York Sand & Stone, LLC, of Brooklyn, NY. Sand delivered to New York meets geotechnical criteria for sand aggregate.
- The dredged sand is sampled and analyzed twice per year by Amboy Aggregates, for total metals, pesticides, PCBs, chloride, cyanide, volatile and semi-volatile organic compounds. NY Sand & Stone, in addition, samples and analyzes the sand twice per year for parameters listed in NYSDEC’s DER TAGM 4046. The petition provided the most recent results for two samples from Amboy and NY Sand & Stone. No results were found of concern for the proposed use of sand as commercial fill or aggregate.

Mr. Nicolas Mann

2.

Based on the above ongoing sampling programs and continued compliance with valid USCOE and NJDEP dredging permits, Amboy Aggregates' dredged sand is not a solid waste when placed in commerce for distribution in New York State as a substitute for mined sand aggregate and fill. Chemical characteristics of the product (including chloride) must not vary significantly from results reported in the petition. Because the sand originates from marine waters, use must be avoided where elevated chloride or other saline elements could result in phytotoxicity or water quality impacts.

This BUD No. 846-2-24 is granted to New York Sand & Stone, LLC, 63 Flushing Avenue, Unit No.311, Brooklyn, NY 11205 (a joint venture of Amboy Aggregates, Inc., and New York Sand Co.). By March 1 of each year, NY Sand & Stone, or its agent, must provide a report to NYSDEC of the quantity of material used in the previous calendar year under this BUD. This report and any other correspondence should be sent to my attention at the above address.

Please contact Kathleen Prather, of my staff, at (518) 402-8678 if you have any questions regarding this BUD.

Sincerely,

A handwritten signature in cursive script, appearing to read "Kathleen Prather" followed by initials "TJL".

Aggregate Source Status	
Name:	N.Y. Sand & Stone LLC
Source No.	10-143F9
Location:	Brooklyn, NY
Fine Aggregate Approved for Item 703-01	

Dear Mr. DeRosa:

Aggregate from the operating location noted above is approved for Item 703-01, Fine Aggregate. The requirements of Materials Method 29, Aggregate Acceptance Procedures, have been met.

Aggregate sources which satisfy all applicable requirements of Materials Method 29, issued October 2000, appear on the Approved List of Sources of Fine and Coarse Aggregates. The Approved List is available on the Internet @

www.nysdot.gov and clicking on Publications.

Approval status is reaffirmed by testing every 2 years. However, approval status may be modified if it is determined that conditions have changed. The Regional Materials Engineer may be consulted for current data concerning this or any source.

Any questions regarding these matters, may be directed to Mr. William Skerritt or members of his staff in the Materials Bureau, Engineering Geology Section at (518) 457-1038.

Very truly yours,

William Skerritt
Engineering Geology

110 Sand & Gravel Stockpile Analysis & summary table attached. Brian says this should be OK.

**BRONX TERMINAL MARKET
SUMMARY OF STOCKPILE ANALYSIS
SAMPLE COLLECTED FROM 110 SAND AND GRAVEL
SAMPLE COLLECTED AUGUST 21, 2008**

Parameter	Compounds Detected	Unit	NYSDEC TAGM RSCO Criteria	SI
Pesticides/Herbicides	None Detected	ppm	NA	ND
Mercury	None Detected	ppm	NA	ND
PCBs	None Detected	ppm	NA	ND
Metals	Aluminum	ppm	SB	583
	Arsenic	ppm	7.5 or SB	1.41
	Barium	ppm	30 or SB	2.78
	Cadmium	ppm	1 or SB	ND
	Calcium	ppm	SB	538
	Chromium	ppm	10 or SB	5.13
	Copper	ppm	25 or SB	1.78
	Iron	ppm	2,000 or SB	2520
	Lead	ppm	SB****	7.01
	Magnesium	ppm	SB	202
	Manganese	ppm	SB	27.9
	Nickel	ppm	13 or SB	1.21
	Potassium	ppm	SB	88.4
	Silver	ppm	SB	ND
	Sodium	ppm	SB	29.7
Vanadium	ppm	150 or SB	5.85	
Zinc	ppm	20 or SB	3.29	
Semi-Volatile Organic Compounds	Butyl benzyl phthalate	ppm	50***	.130
Volatile Organic Compounds	Methylene Chloride	ppm	0.1	.019
Cyanide	Cyanide	ppm	***	ND

Notes:

Analytical results were compared to NYSDEC TAGM Recommended Soil Cleanup Criteria, Tables 1 through 4

SB SRO Background (not determined at this time)

NS No regulatory criteria available

*** Some forms of Cyanide are complex and very stable while other forms are pH dependent and hence are very unstable. Site specific forms of Cyanide should be taken into consideration when establishing soil cleanup objective.

SB**** Background levels for lead vary widely. Background levels in rural, undeveloped areas may range from 4-81 ppm. Average background levels in metropolitan or suburban areas or near highways are much higher and range from 200-500 ppm.

50*** As per TAGM 404B, Total VOCs < 10 ppm, Total Semi-VOCs < 500 ppm and Individual Semi-VOCs < 50 ppm.

RE: 110 Sand and Gravel for Bronx Terminal M

Order No.: 0808318

Dear Brian Pendergast:

American Analytical Laboratories, LLC. received 1 sample(s) on 8/21/2008 for the analyses presented in the following report.

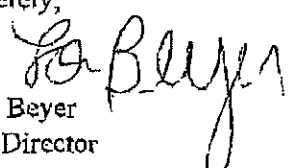

Samples were analyzed in accordance with the test procedures documented on the chain of custody and detailed throughout the text of this report.

The results reported herein relate only to the items tested or to the samples as received by the laboratory. This report may not be reproduced, except in full, without the approval of American Analytical Laboratories, LLC and is not considered complete without a cover page and chain of custody documentation. The limits (LOQ) provided in the data package are analytical reporting limits and not Federal or Local mandated values to which the sample results should be compared.

There were no problems with the analyses and all data for associated QC met laboratory specifications. If there are any exceptions a Case Narrative is provided in the report. This package has been reviewed by American Analytical Laboratories' QA Department/Laboratory Director to comply with NELAC standards prior to report submittal.

If you have any questions regarding these tests results, please do not hesitate to call (631) 454-6100 or email me directly at lbeyer@american-analytical.com.

Sincerely,

Lori Beyer

DATA REPORTING QUALIFIERS

For reporting results, the following "Results Qualifiers" are used:

Value	If the result is greater than or equal to the detection limit, report the value.
U	Indicates the compound was analyzed for but was not detected. Report the minimum detection limit for the sample with the U, i.e. "10U". This is not necessarily the instrument detection limit attainable for this particular sample based on any concentration or dilution that may have been required.
J	Indicates an estimated value. The flag is used: <ol style="list-style-type: none">(1) When estimating a concentration for a tentatively identified compound (library search hits, where a 1:1 response is assumed.)(2) When the mass spectral data indicated the identification, however the result was less than the specified detection limit greater than zero. If the detection limit was 10ug/L and a concentration of 3ug/L was calculated report as 3J. This flag is used when similar situations arise on any organic parameter i.e. Pesticide, PCBs and others.
B	Indicates the analyte was found in the blank as well as the sample report "10B".
E	Indicates the analytes concentration exceeds the calibrated range of the instrument for that specific analysis.
D	This flag identifies all compounds identified in an analysis at a secondary dilution factor.
P	This flag is used for Pesticide / PCB target analyte when there is >25% difference for detected concentrations between the two GC Columns. The higher of the two values is reported on Form I and flagged with a "P".
N	This flag indicates presumptive evidence of a compound. This is only used for tentatively identified compounds (TICs), where the identification is based on a mass spectral library search. It applies to all TIC results. For generic characterization of a TIC, such as chlorinated hydrocarbon, the flag is not used.
H	Indicates sample was received and/or analyzed outside of the method allowable holding time.

Mr. John Lollo
Ruttura & Sons Construction Co., Inc.
200 Cabot St.
West Babylon, NY 11704

Re: Gateway at Bronx Terminal Market
NYSDEC Brownfield Cleanup Program Site

To whom it May Concern:

The concrete sand from the 110 Sand Company sandpit provided as fill material for the above referenced jobsite meets NYSDEC TAGM 4046 standards.

Very truly yours,

James Debis, P.E.
Engineer

TEL: (516) 481-8800
FAX (516) 481-8846

RE: Bronx Terminal Market

Order No.: 0901390

Dear Jack Harder:

American Analytical Laboratories, LLC. received 1 sample(s) on 1/27/2009 for the analyses presented in the following report.

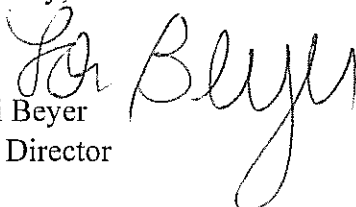

Samples were analyzed in accordance with the test procedures documented on the chain of custody and detailed throughout the text of this report.

The results reported herein relate only to the items tested or to the samples as received by the laboratory. This report may not be reproduced, except in full, without the approval of American Analytical Laboratories, LLC and is not considered complete without a cover page and chain of custody documentation. The limits (LOQ) provided in the data package are analytical reporting limits and not Federal or Local mandated values to which the sample results should be compared.

There were no problems with the analyses and all data for associated QC met laboratory specifications. If there are any exceptions a Case Narrative is provided in the report or the data is qualified. This package has been reviewed by American Analytical Laboratories' QA Department/Laboratory Director to comply with NELAC standards prior to report submittal. This report consists of 30 pages.

If you have any questions regarding these tests results, please do not hesitate to call (631) 454-6100 or email me directly at lbeyer@american-analytical.com.

Sincerely,

Lori Beyer
Lab Director

American Analytical Laboratories, LLC.

CLEAN FILL CERTIFICATION

I am the owner of Island Topsoil, Inc, located at 85 Oak Dr. in Syosset, N.Y.

I hereby certify that the fill at 110 Sand Pit, located at 110 Sand Pit, Farmingdale, NY consists of clean, virgin material. To the best of my knowledge, the soil is uncontaminated Pursuant to any applicable remediation standard and is free of extraneous debris or solid waste, based upon my knowledge of the site and the history of site use.

The soil sample taken from 110 Sand Pit on 01/27/09 was delivered to American Analytical Labs of 56 Toledo St, Farmingdale, NY. Two samples, #0901390-01A and # 0901390-01B, were taken from that bag and tested according to the TAGM 4046 requirements. The stockpile of soil from which these samples were taken is to be used exclusively for the "Bronx Terminal Market" project.
