## **PHASE I ENVIRONMENTAL SITE ASSESSMENT**

***700 East 241st Street  
Bronx, New York***

### **EXECUTIVE SUMMARY**

The site is located in the Borough of the Bronx. An active gas station and a one (1) story auto repair shop are located on the site. The site is surrounded by other commercial buildings. Inspection of the building/ site did not reveal evidence of storage and use of hazardous materials. No damaged, friable asbestos containing, thermal system insulation was noted. Search documents do not disclose environmental violations.

Based upon site investigations and search documentation as described in this Assessment, the following is recommended.

- Provide waste oil manifest(s).
- Properly remove a 55 gallon drum of waste located on the west side of the building.

Based upon the recommendation made above, the following is an estimate of the cost of remediation:

- Waste oil manifest ..... \$2,000.00
- Removal of 55 gallon drum of waste ..... \$1,000.00

*February 12, 2008*

*700 East 241st Street  
Bronx, New York*

**Phase I Environmental Assessment**

**1.0 INTRODUCTION AND BACKGROUND**

Phase I site investigations are intended to provide a preliminary characterization of recognized hazardous substances and hazardous wastes from a past release, a present release or a potential release and their potential impact (if any). Additionally, the aim to identify pathways by which pollutants migrate from the original site of disposal, to determine what human population as well as biota and other natural resources might be affected by these pollutants, to observe how the disposal area was used or operated, and to gather information regarding who might be responsible for environmental conditions and/or wastes at the site. The inspection also involves research into the past use, history of the site, which includes reviewing government agencies reports, permits and violations. A walk through of the property and an interview with the owner or occupant of the property is mandatory.

Preliminary data and evaluations from Phase I investigations are then used to determine what actions, if any, should next be undertaken at the site.

Giorgio Engineering International, P.C., is familiar with applicable federal, state and local environmental laws and ordinances affecting this site.

This Phase I Environmental Site Assessment has been performed in conformance with the scope and limitations of ASTM Practice E1527-05. Any exceptions to, or deletions from, this practice have been noted as follows:

- No Exceptions

February 12, 2008

700 East 241st Street  
Bronx, New York

Phase I Environmental Assessment

**2.0 SITE DESCRIPTION**

**2.1 Location and Current Use**

The site is located on the southeast corner of East 241<sup>st</sup> Street and White Plains Road. It is a one (1) story active fill station with a repair area. There is one (1) commercial space, no medical offices and no car garage. At the time of inspection the commercial space was occupied as follows:

Caribbean Auto Repair, Gulf Service Station

In the Bronx, the property is designated as Block 5087, Lot 62.

A copy of the Certificate of Occupancy is included in the Attachments. The Certificate of Occupancy is consistent with the "as inspected" condition.

A copy of the Public Access Property Profile Overview is included in the Attachments. This document does not indicate significant environmental issues of concern.

**2.2 Site and Area Features**

The site is located in a commercial area. All areas around the site are fully developed. The site is surrounded by other buildings, roads, sidewalks, and parking lots.

**2.3 Abutters and Near-by Properties**

Abutting the site are commercial buildings on the south and east. The site has been used as a gasoline stations or similar types of businesses at least since 1935. Adjacent properties are identified as follows:

<b>Direction</b>	<b>Adjacent Properties</b>
North	East 241 <sup>st</sup> Street – a two (2) story commercial building.
South	A one (1) story commercial building, Farouk's Auto Collision
East	A one (1) story commercial office, Max Pfeifer Law Office
West	White Plains Road – Train station platform, two (2) story commercial building.

*February 12, 2008*

*700 East 241st Street  
Bronx, New York*

**Phase I Environmental Assessment**

**2.4 Topography, Surface Water Bodies and Drainage**

A Current USGS 7.5 Minute Topographic Map showing the site area has been reviewed. The Subject property is located on relatively flat land. Based on maps obtained from the U.S. Geological Survey (7.5 Minute Topographic Map), the elevation of the Subject property is approximately 156 feet. A topographic map is provided in the Attachments.

Soils are natural, three-dimensional bodies at the earth's surface. They formed through the interaction of five major factors parent material, relief, climate, plant and animal life, and time. The relative influence of each of these factors modifies the effect of the others. In places one factor may dominate and determine most of a soil's properties. Typically, broad areas consist of one or more major soils and some minor soils. Soils making up one unit can occur in another, but in a different pattern. The soil in this region of Bronx County is dominantly urban land and medium textured. The soil is moderately coarse textured formed in glacial till or uplands.

**2.5 Utilities**

Electrical service to the site is provided by Consolidated Edison Company of New York. Natural gas is provided by Keyspan Energy System.

*February 12, 2008*

*700 East 241st Street  
Bronx, New York*

**Phase I Environmental Assessment**

**3.0 GEOLOGY/HYDROLOGIC CONDITIONS**

The surficial geology of the Subject property is characterized as bedrock. A map of the Bronx region is accompanied by a legend providing an additional description of the deposits which underlie the site.

***BEDROCK***

Bedrock in the area is named after its locality in the Fordham Heights area of the Borough of Bronx, the Fordham gneiss. Fordham gneiss is one of the oldest formations in the New York City group and is a well foliated rock. The gneiss is composed largely of minerals quartz and orthoclase feldspar.

February 12, 2008

700 East 241st Street  
Bronx, New York

Phase I Environmental Assessment

**4.0 HISTORICAL INFORMATION**

**4.1 *Historical Sources Used***

Sanborn maps provide a historical perspective of the use of the site and the properties immediately surrounding the site. Historical uses are identified as follows:

<b>Year</b>	<b>Source</b>	<b>Subject Property</b>	<b>Adjacent Property</b>
2008	Site Visit	A one (1) story gas station and auto repair shop	N – E 241 <sup>st</sup> St. – two (2) story commercial S – one (1) story commercial E – one (1) story commercial W – White Plains Rd – Railroad – two (2) story commercial
2005	City Directory	As 2008	As 2008

*February 12, 2008*

*700 East 241st Street  
Bronx, New York*

*Phase I Environmental Assessment*

**4.2 Site and Area Description Chain of Use**

A 50-year deed search has been made of the property. Recent deed history is as follows:

<u><i>DATE</i></u>	<u><i>FROM</i></u>	<u><i>TO</i></u>
7/20/1989	Fenster, Florence	52 Associates, Inc.
2/3/1984	Shufandler, Rachel/DBA	Fenster, Florence/DBA
1/12/1983	52 Associates, Inc.	Place Plains Holdings Cor
3/12/1976	52 Associates, Inc.	Rachel Shufandler
12/8/1971	1963 Properties Inc.	Allison Hand (Inf)
10/29/1968	Loucabot Estates Inc.	1963 Properties Inc.

No other deed history was available prior to 1968.

*February 12, 2008*

*700 East 241st Street  
Bronx, New York*

**Phase I Environmental Assessment**

**5.0 SITE RECONNAISSANCE**

**5.1 *Description of Site Process***

The site is presently being used for commercial use. No medical care facility, doctor's office, dentist's office or laboratory was located on the site. There is good reason to believe that no bio-hazardous waste was being generated on the site.

**5.2 *Hazardous Substances Usage/Storage***

The site has been used as a gas station since 1935 according to Sanborn Maps. Refrigerant, lubricant (machine oil), and cleaning products are not stored and used regularly in the building. These are hazardous materials but commonly used as institutional chemicals. These materials are stored in either 55 gallon drums or 5 gallon containers. No stained or improperly disposed materials were observed.

**5.3 *Petroleum Products Usage/Storage***

The building is heated by an oil fired heating system. Fuel is stored in one aboveground 275 gallon storage tank located on the east side of the building. The tank was not leaking at the time of inspection. The site has three (3) Petroleum Bulk Storage tank registered with the New York State Department of Environmental Conservation. The certificate expires on February 9, 2010.

There is no emergency electric system. No fuel storage tanks associated with this type of equipment are located at the site.

There are two (2) gasoline storage tanks at the site. A 4,000 gallon and a 2,000 gallon underground steel/carbon or steel/iron gasoline tanks are located at the site.

**5.4 *Underground and Aboveground Storage Tanks***

There is a 550 gallon underground steel/carbon or steel/iron waste oil tank on the west side of the property.

*February 12, 2008*

*700 East 241st Street  
Bronx, New York*

*Phase I Environmental Assessment*

**5.5 Drums, Containers**

Other than those identified in 5.2, there is a 55 gallon drum of waste oil on the west side of the property.

**5.6 PCBs Usage**

Polychlorinated Biphenyls (PCBs) were widely used in electrical equipment until the EPA banned manufacture of PCBs in 1979. Transformers often contain dielectric liquid for the primary purpose of increasing resistance of the unit to arcing and acting as a heat transfer media, helping cool the coils. The majority of transformers are filled with mineral oil, but a small percentage of these liquid-filled transformers contain PCB Askarel coolant liquid. The term "Askarel" is a generic term used to a group of nonflammable synthetic chlorinated hydrocarbons. All types of Askarels sold prior to 1979 contained 60 to 100 percent PCBs and are generally used in hazardous locations where flammability is of concern.

There are three EPA categories of transformers:

- a. PCB Transformers: Any transformer containing 500 ppm PCBs or greater.
- b. PCB-Contaminated Transformer: Any transformer containing 40-499 ppm PCBs. These transformers are not subject to parts of the regulations such as marking requirements or, if drained of liquid, to the disposal requirements. Any liquid drained from these transformers must be stored and disposed of in accordance with the regulations.
- c. Non-PCB Transformer: Any transformer containing less than 50 ppm PCBs.

A letter from the Power Company is provided as an attachment to further clarify the status of its transformers.

*February 12, 2008*

*700 East 241st Street  
Bronx, New York*

**Phase I Environmental Assessment**

**5.7 Stains, Corrosion, Stained Vegetation**

All areas outside the building appeared to be well maintained. At the time of inspection, there was no evidence that hazardous chemicals or petroleum products were stored outside the building. Strong, pungent or noxious odors were not identified. Stains or chemical leaks were not noticeable anywhere outside the building. Surrounding areas (establishments and hazardous facilities within a 1/4 mile perimeter) were also evaluated for any obvious waste or hazardous materials which might affect the subsurface quality (soil and/or groundwater quality) of the subject property. No interactions with surrounding areas were found to be environmentally harmful to this property. To the extent visually or physically observed, stressed vegetation was not found.

**5.8 Solid Waste Disposal**

Waste from the commercial spaces is carted by private haulers.

**5.9 Waste water**

Waste water from the building is collected in the sewer system maintained by the City of New York.

**5.10 Wells**

The building is provided with drinking water from the New York City Municipal System.

There have never been, nor were there any at the time of inspection, any monitoring wells, or groundwater supply wells on the site.

**5.11 Sewage Disposal Systems**

Sewage from the building is collected in the sewer system maintained by the City of New York.

**5.12 Drains and Sumps**

Storm water drains are collected in the sewer system maintained by the City of New York. There are no sumps on the site.

February 12, 2008

700 East 241st Street  
Bronx, New York

Phase I Environmental Assessment

**5.13 Pits, Ponds and Lagoons**

There are no pits, ponds or lagoons on the site.

**5.14 Asbestos**

All accessible areas of the building were inspected including the cellar and roof.

The Environmental Protection Agency identifies three categories of asbestos-containing material, (ACM), used in building:

- Surfacing Materials--ACM sprayed or troweled on surfaces (walls, ceilings, structural members) for acoustical, decorative, or fireproofing purposes. This includes plaster and fireproofing insulation.
- Thermal System Insulation--Insulation used to inhibit heat transfer or prevent condensation on pipes, boiler, tanks, ducts, and various other components of hot and cold water systems and heating, ventilation, and air conditioning (HVAC) systems. This includes pipe lagging, pipe wrap; block, batt, and blanket insulation; cements and "muds"; and a variety of other products such as gaskets and ropes.
- Miscellaneous Materials--Other, largely nonfriable products and materials such as floor tile, ceiling tile, roofing felt, concrete pipe, outdoor siding, and fabrics.

The inspection revealed the following:

- No Surfacing Material was used as a building material.
- No damaged, friable asbestos containing Thermal System Insulation was found at the site.
- No Miscellaneous Materials were found to be in a friable condition.

*February 12, 2008*

*700 East 241st Street  
Bronx, New York*

**Phase I Environmental Assessment**

**5.15 Lead Paint**

Lead based paint is commonly found in a building of this age. No apparent peeling or cracking on painted surface was observed during this inspection. The presence of lead-based paint in the building can be determined only by testing.

**5.16 Lead In Drinking Water**

Drinking water for this building is provided by the municipal system of the City of New York. Regular and frequent drinking water analysis is performed by the Department of Health to monitor levels of lead in the drinking water. Drinking water can be contaminated with lead from the distribution piping system. An exact determination of lead levels in the drinking water at a particular fixture can only be determined by analysis.

**5.17 Radon**

Radon is a radioactive gas that is found in the earth's crust and seeps into buildings from the surrounding soil and sometimes, contaminated well water. Radon is formed by the natural breakdown of radium, a radioactive product of decaying uranium. As radon decays, it creates "progeny" or daughters which, if inhaled, can damage the lung and eventually lead to lung cancer. Typically, the annual average indoor radon level nationwide is 1.5 pCi/liter of air and outdoor radon levels are less than 0.4 pCi/liter. The EPA's recommended action guideline level is 4 pCi/liter on a yearly average.

Regional area information related to radon activity is available by zip code for the New York City and State region from the New York State Department of Health. The Subject property lies in a region, where typical levels are 0.670 pCi/l. While a locality's geology may indicate a potential radon problem, the only way to determine if there is a problem in a specific structure is by measuring radon levels.

*February 12, 2008*

*700 East 241st Street  
Bronx, New York*

**Phase I Environmental Assessment**

**5.18 Mold**

Mold can produce compounds that become airborne along with the mold spores. A toxic substance called mycotoxin and other substances may be found within spores. Mold growth can originate where there is high humidity, mild temperature and an organic surface to grow on. Excessive mold growth in a building could become an indoor air quality problem, even though the environmental hazard is not encompassed by CERCLA's appropriate inquiry responsibilities, accessible areas of the building were inspected during the site visit. No areas of mold growth or conditions for mold growth were observed.

**5.19 Other Issues of Concern**

Generally, formaldehyde and other hazards are commonly found in this type of building. Formaldehyde may be emitted from certain types of foam insulation. This type of wall insulation was not observed in the building. According to the Building Superintendent, no record of eye irritation or odor complaint was noticed by the personnel or tenants in the building.

*February 12, 2008*

*700 East 241st Street  
Bronx, New York*

**Phase I Environmental Assessment**

**6.0 REGULATORY INFORMATION**

The following tables contains a review of Federal, State, local and tribal records pertaining to past or present potential Recognized Environmental Conditions (REC) at the subject property and the surrounding areas. The information is based on a computerized database provided by Environmental Data Resources, Inc. The approximate search distance from the subject property is in accordance with ASTM E1527-05.

**6.1 *NPL Sites***

The National Priorities List (Superfund Sites) contains sites identified for possible long term remedial action.

**6.2 *Delisted NPL Sites***

The National Priority List (Superfund Sites) Deletions

**6.3 *CERCLIS Sites***

The Comprehensive Environmental Response, Compensations, and Liability Information System is a database which contains information on hazardous waste disposal sites that have either been listed by the EPA on the NPL or nominated for consideration to the NPL.

**6.4 *CERCLIS – NFRAP***

The Comprehensive Environmental Response, Compensations, and Liability Information System – No Further Remediation Action Planned

**6.5 *RCRA TSD Facilities***

Treatment, Storage and/or Disposal Facilities (TSD) regulated under the Resource Conservation and Recovery Act (RCRA) are maintained on this database.

**6.6 *RCRA Generators***

Generation of hazardous waste regulated under the Resource Conservation and Recovery Act (RCRA) is maintained on this database.

February 12, 2008

700 East 241st Street  
Bronx, New York

Phase I Environmental Assessment

**6.7 RCRA Corrective Action Sites**

Corrective Action sites regulated under the Resource Conservation and Recovery Act (RCRA) are maintained on this database.

**6.8 ERNS**

The Emergency Response Network System (ERNS) maintains information on reported releases of oil and hazardous substances.

Federal Database Search	Subject Property	Radius mile	Sites	Comments
NPL	No	1.0	0	
Delisted NPL	No	1.0	0	
CERCLIS	No	0.5	0	
CERC-NFRAP	No	0.5	1	The site listed does not represent significant environmental conditions.
RCRA TSD	No	0.5	0

Phase I Environmental Assessment

**7.0 INTERVIEWS**

**7.1 Present Owners/Operators**

Naftali Beyt-Yaakob (Mahpour) performed the inspection of the site. He was accompanied by Mr. Max Pfeifer the representative of the site owner with the occupancy duration of over thirty years. Responses from the interviews are documented as specific information in this Assessment.

**7.2 Previous Owners/Operators**

Naftali Beyt-Yaakob (Mahpour) was not able to perform interviews with the previous representative of the site owner. Responses from the interviews are documented as specific information in this Assessment.

**7.3 Government Officials**

**7.3.1 State Agency**

All state agency information was obtained from the database search.

**7.3.2 Department of Health**

All New York State Department of Health information was obtained from the database search.

**7.3.3 Fire Department**

New York City Fire Department information was obtained from available clerical personnel at the Violations Unit.

**7.3.4 Department of Buildings**

New York City Department of Buildings information was obtained from available personnel at the borough Municipal Building.

*February 12, 2008*

*700 East 241st Street  
Bronx, New York*

*Phase I Environmental Assessment*

**8.0 DATA GAPS AND EXPLANATION**

Data gap may result from lack of information or inability to obtain such information required by ASTM E1527 - 05 in spite of **good faith** efforts by the **environmental professionals**. Data gap could be caused by many factors such as lack of historical maps, information, data failure, and inability to interview key site manager or regulatory officials. Data gap would become significant if according to the environmental professional's experience some specific activities on the target property or adjacent properties would lead to a Recognized Environmental Condition, REC.

The data gap for the target property is believed to be:

None

**9.0 PREVIOUS ENVIRONMENTAL SITE INSPECTIONS**

None Available

February 12, 2008

700 East 241st Street  
Bronx, New York

Phase I Environmental Assessment

**10.0 FINDINGS AND CONCLUSIONS**

**10.1 Findings and Recommendations**

We have performed a Phase I Environmental site Assessment in conformance with the scope and limitations of ASTM Practice E 1527 of 2005 for 700 East 241<sup>st</sup> Street, Bronx, New York. Any exceptions to, or deletions from, this practice are described in Section 1.00 of this Report. This Assessment has revealed no evidence of recognized environmental conditions in connection with the property except for the following:

- Lack of Waste Oil Manifest(s).
- Presence of a 55 gallon drum of waste on the site.

**10.2 Estimated Cost of Remediation**

Based upon the recommendation made above, the following is an estimate of the cost of remediation:

- Waste oil manifest ..... \$2,000.00
- Removal of 55 gallon drum of waste ..... \$1,000.00

**12.0 DISCLAIMER and SIGNATURE PAGE**

In the performance of this Phase I Environmental Site Assessment, ASTM E 1527- 05, Giorgio Engineering International, P.C. warrants that the degree of skill and care required by customarily accepted good practices and procedures have been exercised. There may however, be unknown conditions that were not revealed by the site inspections and searches. As a result, the potential additional environmental hazards cannot be completely eliminated.

I declare that to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in section 312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

I certify that the information provided in this Assessment is true and accurate to the best of my knowledge.

## **QUALIFICATIONS INFORMATION**

Giorgio Engineering International, P.C., is a full service consulting and environmental engineering organization dedicated to residential, industrial and commercial building design, construction and renovation. During its thirty years of existence, more than 8000 clients have engaged Giorgio Engineering International, P.C., in various engineering, design, construction consulting and environmental related services.

Giorgio Engineering International, P.C., maintains a fully integrated, single, responsibility organization with all the combined capabilities and resources required for licensing, design, engineering, construction, and related services to build residential and commercial buildings. The scope of Giorgio Engineering International, P.C. capabilities encompasses all phases of a project from its initial economic and technical feasibility studies through to client acceptance. This includes project management, technical and economic feasibility studies, environmental/licensing studies, detail engineering and design, and construction.

Environmental engineering capabilities include Phase I Site Assessments, Phase II testing of air, water, soil and Project Design of remediation projects.

### **PROFESSIONAL LICENSES**

- Licensed Professional Engineer
- State of New York (By Examination)
- State of New Jersey
- State of Pennsylvania
- State of Connecticut
- State of Florida

## ***RALPH J. GIORGIO, P.E.***

**1976 – Present - Giorgio Engineering International, P.C., President**

### ***Education:***

- B.S. Mechanical Engineering - Pratt Institute  
(9/64-6/68) Brooklyn, New York
- M.S. Engineering Management - Columbus University  
(1/71-2/72) New York, New York

### ***Environmental Certifications:***

- AHERA PROJECT DESIGNER - University of Medicine & Dentistry of New Jersey
- AHERA INSPECTOR - University of Medicine & Dentistry of New Jersey
- AHERA MANAGEMENT PLANNER - University of Medicine & Dentistry of New Jersey
- ASBESTOS INVESTIGATOR - City of New York Department of Environmental Protection
- ASBESTOS HANDLER - New York State Department of Labor

### ***Environmental Recognitions:***

- American Academy of Environmental Engineers - Diplomat of Environmental Engineering General Environmental Specialty.  
(In Process)
- ASTM - Committee Member E 50, Environmental Assessment  
- Committee Member E 47, Environmental Toxicology and Risk Assessment

### ***Expert Witness Testimony:***

- New York State Civil Court

-New York State Supreme Court

***Related Experience:***

**EBASCO, New York, New York (10 Years)**

Ten years experience as a Mechanical Engineer, Supervising Engineer, Assistant Chief Engineer, and Project Manager.

***Representative EBASCO Project Experience***

Carolina Power & Light	Shearon Harris NPP Unit Nos. 1-4-900 MWE each
Houston Light & Power Co.	Allen's Creek Nuclear Generating Station
Houston Light & Power Co.	Limestone Electric Generating Station
Orange & Rockland Co.	Lovett Unit 4 & 5 Reconversion

***Gibbs & Hill, Inc., New York, New York  
Senior Engineering (4 Years)***

Responsible for supervision of engineering, design and procurement of mechanical equipment and fluid systems for two nuclear units. 1150 MW each, Comanche Peak Steam Electric Station. Texas Utilities Services, Inc. Lead Engineer responsible for engineering, design and procurement of mechanical equipment and fluid systems for two fossil units, 500 MW each. Talin Unit No. 5 and Hsieh Ho Unit No. 2 Taiwan Power Company, Mechanical Job Engineer for ERDA's Plant Components Test Facility to test commercial sized sodium equipment for use in Liquid Metal Fast Breeder Reactor systems.

***American Electric Power Service Corporation, New York, New York  
Engineer (5 Years)***

Initial evaluation, design and installation of two 1100 MW nuclear turbines: turbine maintenance and performance responsibilities for four power plants: assistance in evaluation, design and installation to two 800 MW fossil electrohydraulic-controlled turbine generators.

**Consolidated Edison Company of New York**  
**Assistant Performance Test Engineer**

Performed performance tests on power plant equipment at the Ravenswood Power Station.

**Naftali Beyt-Yaakob (Mahpour)**

Environmental Project Manager

Giorgio Engineering International, P.C. Staten Island, New York

**Experience**

**Environmental Project Manager**

Responsible for managing and conducting environmental projects, including site inspection, Phase I, Transaction Screen investigation and writing site specific reports according to ASTM Standards.

- Inspected over two hundred commercial, industrial and residential properties covering all past and present environmental issues, such as presence of USTs, ASTs, spills, lead, asbestos and mold.
- Managed all environmental issues, obtaining all permits to operate a MOSF located in Long Island.
- Established environmental division within a large real estate management company and created individual environmental site status.
- Managed all environmental issues of a major oil storage facility including oil delivery barge spills.
- Evaluated the extent of the soil and groundwater contamination and existence of a plume.
- Created Scope of Work, qualified contractors, obtained all necessary permits from Federal, State, County and local authorities to remediate the site.
- Investigated, determined, and justified the best remediation methods for specific contaminated sites.
- Supervised remediation and clean up of industrial and commercial sites; supervised building demolition for residential development
- Inspected and created an interactive historical and present condition of a 144-acre commercial property as well as Marriott Hotel with 600 rooms, outlining all environmental issues and remediation cost.
- Run thorough investigation of lead poisoning cases and settled the issues between the tenants and the management company.
- Received NYSDEC and NCDOH "No Further Action" letters for three former gas stations and car dealership,
- Worked with several remediation systems, such as air sparging system, excavation, ORC, permanganate solutions, etc.
- Supervised remedial process of a NPL site.
- Supervised Phase II and III of several sites contaminated soil and groundwater
- Established relationship with local, county, state and federal agencies

- Spearheaded remediation of several contaminated sites and spills and received closure

**Prior Experience includes the following:**

**Process / Manufacturing Manager**

- Spearheaded development and production of sensor technology used in medical, high-tec and consumer product industries.
- Led an on-going process improvement and increased productivity by 50%
- Reduced process and manufacturing operation cost by 20%
- Achieved a consistent thin film process with over 98% yield, saving the company from bankruptcy
- In charge of all safety management, obtaining operation permits and waste disposal

**Process Engineer, Supervisor**

- In charge of thin film oxide coating for 8-inch hard discs division
- Supervised process engineering of coating and polishing divisions
- Studied failure analysis and developed manufacturing process instruction manual

**Education**

**Minnesota State University, Mankato, MN**

- M.S. in Chemistry
- Researched on water and wastewater analysis
  
- B.S. in Chemistry with minors in math and physics
- New York State Certified Asbestos Inspector
- New York City Certified Asbestos Investigator

### Title Documents

---

Subscribers to our Property Reports service can link directly to title documents in ACRIS!

To link to ACRIS documents you will need to do the following **once per session**:

1. Click on the "See it" link for one of the documents below. This **will open a new window** and take you to an ACRIS info page on the NYC DoF website.
2. On the ACRIS info page, find the link titled "Begin using ACRIS" and click it. This **will open another new window**. Minimize this window but do not close it. This keeps an ACRIS session running on your computer.
3. In the original PropertyShark.com window, you can now click on any of the "See it" links for any NYC property and be taken directly to the corresponding ACRIS document.

Records go back to about 1966. See the different types of NYC title documents!

<b>Special Status Text</b>	06/14/1990: APPLICATION BEING REPLACED BY JOB #200070591.

**HPD Violations**

When excessive violations are present, this can adversely affect the support given by The NYC Department of Housing Preservation and Development (HPD). These violations can result in building-wide inspections, fees, and the requirement of extensive repair work to correct underlying conditions. In some cases, outstanding violations may result in a lien being placed on the property. It is also substantially more difficult to mortgage a building with extensive violations.

**HPD Violations**

In this color-coded map, view the amount of B & C class violations that have been left uncorrected for the past 2 years for a specific property.

*Legend*

- Uncorrected violations in the last 2 years
- >27 violations & >=5 violations per unit
- between 3.5 and 5 violations per unit
- 35 total number of violations

Total number of B & C class violations: **0**

Map rendered 10/09/2007

Description of the Classes

Sorry, no records were found!

Please note: the NYC HPD is the only authoritative source for information on housing violations. Please consult the HPD web site for up-to-date violations.

PropertyShark obtains its records from HPD and updates them monthly.

**ECB Violations**

There are eleven city agencies that administer the City's quality-of-life laws and issue Notices of Violation (NOVs) for alleged violations. The ECB is a separate and independent agency that hears challenges to those NOVs. The agencies that issue the most violations for real estate are:

- Department of Buildings (DOB)
- Department of Environmental Protection (DEP)
- Fire Department
- Landmarks Preservation Commission (LPC)
- Department of Sanitation

PropertyShark obtains its ECB NOV records from the DOB and updates them nightly. Records go back to 1988

No records found.

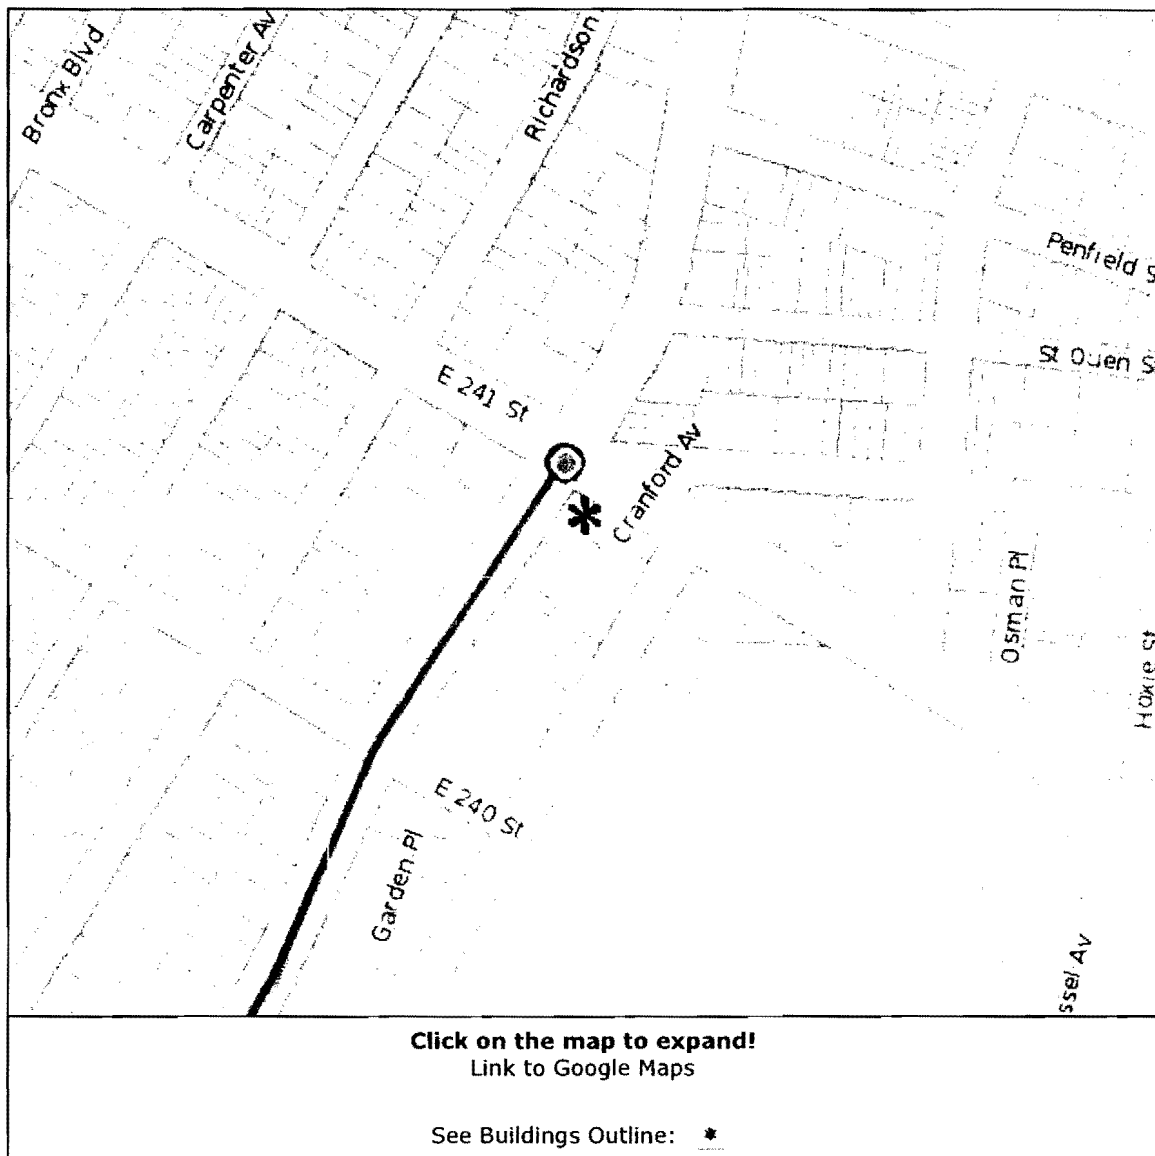

For more information about the ECB and the types of NOV's that it handles, visit its home page or this page with a list of rules, laws and agencies.

## Demographic Maps

### Population Density

Population density is the number of persons per unit of area.

Commonly this may be calculated for a city, county, state, or the entire world.

In this map, view the density of the New York City population.

#### Legend

Map rendered 10/16/2007

Map rendered 10/17/2007

- Crammed (above 26,000)
- Very Compact (26,000 to 13,000)
- Compact (13,000 to 2,600)
- Close-Knit (2,600 to 1,300)
- Neighborly (1,300 to 300)
- Distant Neighbors (300 to 50)
- Sparse (below 50)
- Open Space or Unknown

### Population Median Age

The median age marks the point where half the population is older than that age and half is younger.

This color-coded map shows the distribution of the median age of the population

#### Legend

- Golden Years
- 65 to mid 70's
- 50 to mid 60's
- 45 to late 40's
- 40 to mid 40's
- 35 to late 30's
- 30 to mid 30's
- 24 to late 20's
- 17 to 23
- 10 to 17

### Median Household Income

Median household income is used to provide data about geographic areas and divides households into two equal segments with the first half of households earning less than the median household income

View in this map the distribution of the median household income for New York City.

#### Legend

Map rendered 10/16/2007

Toxic Sites

Real estate buyers beware!

Hidden toxic hazards can drastically reduce property values, restrict property use, cause health problems or impose clean up liability on unsuspecting purchasers.

Use this screening map to check neighborhoods for selected toxic dumps, garbage landfills, leaking tanks, hazardous waste sites, pollution discharges or other environmental threats reported by local, state and federal government authorities.

NONE Toxic site data reported for this property:

*Leaking Tanks and Spills:*

NONE FOUND

*Superfund, Brownfields and Solid Waste Sites:*

NONE FOUND

*Other Toxic Sites:*

NONE FOUND

\* See full toxic map: [Click here](#)

More Details & Help:

Pollutants Groups Description FAQ: What do the toxic sites mean?

About Toxics Targeting FAQ: Want more information?

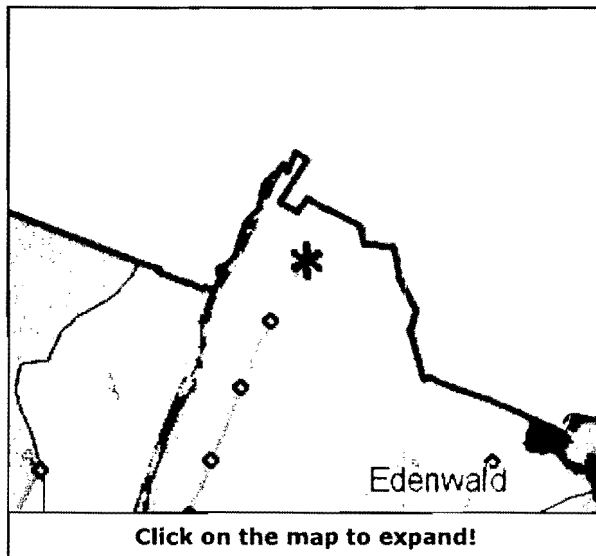

Order a **Toxics Targeting Report** to compile detailed environmental information on or around any home, business or property that you plan to buy in New York. It maps and profiles up to 19 categories of toxic sites at varying distances as far as one mile away. Your report will pinpoint many more sites than the screening maps.

**How to get a Full Toxics Property Report:** Toxics Targeting's reports (\$150.00 each) help buyers conduct due diligence or Phase I environmental site assessments required by mortgage lenders. We walk you through your report and answer questions. You can order on-line or by calling **718-715-1758!** For more informations visit [www.toxictargeting.com](http://www.toxictargeting.com)

**Map Disclaimer:** Mapped locations are approximate; site symbols can refer to large properties; additional toxic sites are not mapped; contamination problems can impact properties far from toxic sources; sites include known and potential hazards; regulatory status of sites may have changed.

Leaking Tanks & Spills:		
○ MTBE Spill	☆ Tank Failure	☆ Tank Test Failure
▼ Gasoline Spill	☆ Spill greater than 25 gal/lbs	
Superfund, Brownfields and Solid Waste:		
⊕ US Superfund Priority Site	⊕ NY Superfund Site	⊕ US Superfund/CERCLIS Site
⊙ Brownfield Site	⊕ Hazardous Substance Study	⊗ Solid Waste Facility
Other Toxic Sites:		
⊗ NY Superfund Qualifying Site	◇ Major Oil Storage Facility	□ Hazardous Waste Corrective Act

**USER PROVIDED INFORMATION**

# **Giorgio Engineering International, P.C.**

**CONSULTING AND ENVIRONMENTAL ENGINEERS**

**Subject:** 700 East 241st Street  
Bronx, New York

**User Name and Address:**

## **USER QUESTIONNAIRE ASTM E 1527 - 05**

### **INTRODUCTION**

In order to qualify for one of the Landowner Liability Protections (LLPs)<sup>1</sup> offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments")<sup>2</sup> the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

**1. Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).**

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

**2. Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).**

Are you aware of any AULs, Activity and Use Limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

**3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).**

As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

**4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).**

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

**5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).**

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

- a) Do you know the past uses of the property?
- b) Do you know of specific chemicals that are present or once were present at the property?
- c) Do you know of spills or other chemical releases that have taken place at the property?
- d) Do you know of any environmental cleanups that have taken place at the property?

**6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).**

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

<sup>1</sup> Landowner Liability Protections, or LLPs, is the term used to describe the three types of potential defenses to Superfund liability in EPA's Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability ("Common Elements' Guide) issued on March 6, 2003.

<sup>2</sup> P.L. 107-118.

**POWER COMPANY PCB REPORT**

## INTRODUCTION

This report constitutes Con Edison's semiannual electric equipment and gas compressor PCB inventory filing under Section 66(23) of the New York Public Service Law ("PSL"), PSC Case 29211, for the period ending June 30, 2007. As specified in the Public Service Commission's regulations (16 NYCRR Part 730) implementing PSL § 66(23), this report is also being submitted to the chief executive officer of each county and city located within Con Edison's service territory in which the Company operated, stored, or transported equipment containing 500ppm or more of PCBs and is organized as follows:

- Part 1 of the report addresses equipment that contains or is assumed to contain PCBs in concentrations of 500 ppm or more ("PCB Equipment") and that was in-service as of June 30, 2007.
- Part 2 of the report addresses PCB Equipment that was retired or disposed of during the period January 1, 2007 through June 30, 2007, or that was being stored for disposal as of June 30, 2007.

It should be noted that this report's inventory listings include only equipment, as defined in 6 NYCRR § 730.1, that contains or is assumed to contain oil or fluids with PCB concentrations of 500 ppm or greater. Con Edison owns and operates oil and fluid-filled equipment and equipment components that are known or assumed to contain PCBs in concentrations of less than 500 ppm. However, the Public Service Law does not require that lists of such equipment be included in semiannual PCB inventory reports. In addition, this report does not address PCB materials, as defined in NYCRR § 730.1, discovered in Con Edison's gas distribution system. Under PSL § 66(23) and 6 NYCRR Part 730, these materials are addressed in a separate report to the Public Service Commission.

### **USEPA POLICIES**

In determining which of its equipment should be included in this report, Con Edison adhered to the regulations (40 CFR 761), policies, and guidance of the U.S. Environmental Protection Agency ("USEPA") pertaining to PCB-containing equipment. These include:

1. Transformer PCB classification status is based on the PCB concentration of the dielectric fluid in the main body of a transformer while the unit is in use or in storage for reuse. Transformer component parts, such as bushings, tap changers, external

stiffener box beams, and attached bushing potential devices, are considered to have the same PCB concentration as the in-service transformer of which they are component parts. The same considerations and policies apply when determining the PCB classification status of other types of electric equipment, such as switches, circuit breakers, reclosers, voltage regulators, and rectifiers. While the equipment is in service or being stored for re-use, its PCB classification depends on the PCB concentration of the dielectric fluid in the main body of the equipment and all attached components of the equipment are considered to have the same PCB concentration as the dielectric fluid in the equipment's main body.

2. Unless the PCB concentration of the following types of oil-filled electric equipment has been established through oil analysis, wipe sampling, manufacturer's documentation, or service records, they can be assumed to contain less than 50 ppm PCBs and be categorized as non-PCB electrical equipment under EPA's regulations while in use or in storage for re-use: transformers containing less than three (3) pounds of fluid; circuit breakers; reclosers; rectifiers; oil-filled cable (including paper insulated lead cable); capacitors that were either manufactured after July 2, 1979, or marked with a "No PCBs" label by their manufacturer; and other electrical equipment manufactured after July 2, 1979.

3. Unless the PCB concentration of the following types of oil-filled electric equipment has been established through oil analysis, wipe sampling, manufacturer's documents, or service records, they can be assumed to contain 50 ppm or more but less than 500 ppm of PCBs and be categorized as PCB-Contaminated Electrical Equipment under EPA's regulations while in use or in storage for re-use: mineral oil-filled electric equipment (other than the equipment discussed in item 2) that was manufactured before July 2, 1979, or for which there is no information establishing when the equipment was manufactured; and pole-top or pad-mounted transformers that were manufactured before July 2, 1979, or for which there is no information indicating when they were manufactured.

4. Unless the PCB concentration of the following types of oil-filled electric equipment has been established through oil analysis, wipe sampling, manufacturer's documentation, or service records, they are assumed to contain 500 ppm or more of PCBs and are categorized as PCB Electrical Equipment under EPA's regulations while they are in use or in storage for re-use: capacitors manufactured before July 2, 1979, or with an unknown date of manufacture if they do not have a "NO PCB" label; *small* transformers containing three (3) pounds or more of fluid other than mineral oil (or with an unknown fluid) if manufactured before July 2, 1979 (unless Best Engineering Judgment determines otherwise: see #5 following), or if the date of manufacture is unknown; and equipment known to contain concentrated formulations of PCBs, such as the trade name Askarel or brand names Pyranol and Inerteen.

5. **Best Engineering Judgment (BEJ)** may be used to categorize *small* transformers. *Small* transformers include (but are not limited to) current, potential, ignition, and instrument transformers. The size of these types of transformers and type of insulating material they contain vary. Their size ranges from several inches to several feet in height.

They can be filled with liquid, with a non-liquid compound, or they can be "dry". Unlike most power transformers, *small* transformers are often hermetically sealed at the factory to prevent breathing and leakage (sealed units generally cannot be tested for PCBs without puncturing or cutting them open to obtain samples of their dielectric fluid). They are often found in confined energized locations, such as cabinets, vaults, and switchgear assemblies. Consequently, they can be difficult to access to read nameplate information regarding date of manufacture or type and amount of fluid.

USEPA recognized that in many cases it is not possible to test or inspect *small* transformers without compromising their integrity or creating safety hazards. Therefore, USEPA provided the following guidance with respect to such transformers:

"....For any period during which it is not possible to physically inspect or test a small transformer (as described at 63 FR 35388) without compromising the integrity of the equipment or where such inspection or testing would pose a safety hazard to personnel without an electrical shutdown of the transformer, the owner or operator of the equipment may rely upon the exercise of best engineering judgment to evaluate the regulatory status of the equipment under the criteria set out in § 761.2 (a) (3) (e.g., whether the equipment is dry, non-liquid, contains less than 3 pound of fluid, or contains mineral oil)." (September 2, 1998 letter from Lynn Goldman, USEPA, to Toni Allen, Piper & Marbury, counsel to Utility Solid Waste Activities Group).

With respect to *small* transformers located in Con Edison's electric substations, Con Edison's Best Engineering Judgment - - based on testing, information from equipment manufacturers, technical and contract specifications, and the experience of Con Edison's substation operators and maintenance personnel - - indicates that the small transformers at its substations are either dry type transformers or are likely to contain mineral oil rather than concentrated PCB dielectric fluid formulations. Consequently, for its substations, Con Edison assumes that small transformers manufactured before July 2, 1979, which have not been tested for PCB content and for which it has no information indicating that the small transformers are filled with concentrated PCB dielectric fluid, are mineral oil-filled units that contain more than 50 ppm but less than 500 ppm of PCBs. In keeping with USEPA's guidance, if Con Edison discovers that a small transformer at its substations (or any other facility) contains Askarel or other concentrated PCB dielectric fluid, it will treat other units of the same style, class, or model number as PCB Transformers.

## EXPLANATION OF THE INFORMATION

1. **Capacitors.** Pursuant to PSC Staff guidance, any capacitor inventory listings contained in this report would include only *Large* Capacitors as defined by USEPA regulations (40 CFR 761.3). Under those regulations, a *Large* Capacitor is one that contains, or is assumed to contain 3 pounds or more of dielectric fluid.

Con Edison generally does not inventory separate component parts of its electric equipment because, as noted above, the PCB classification of electric equipment under

the USEPA regulations is predicated on the PCB concentration of the dielectric fluid in the main tank or body of a piece of electric equipment, rather than the PCB concentration of the equipment's various individual component parts. However, Con Edison does maintain on its electric system equipment that contains *Small* Capacitors as defined by the USEPA regulations (capacitors containing less than three pounds of dielectric fluid). Some of these small capacitors are known to contain concentrated PCB dielectric fluid formulations, such as Pyranol and Inerteen. Others are assumed to contain such formulations because they were manufactured before July 2, 1979 and were not marked with "No PCB" labels by their manufacturers. The electric equipment that contains or is suspected to contain Small PCB Capacitors includes oil-filled rectifiers located in New York County and certain older vintage network protector switches. The locations of the oil-filled rectifiers in New York County and network protector switches that have been determined to contain or that may contain *Small* PCB Capacitors are provided in Exhibit 1. Note that, as of June 30, 2007, there are only two such rectifiers, which have been de-energized and drained of fluid, remaining to be removed for disposal, and two such switches remaining in service (four units were replaced during this report period), in New York County, while one such switch remains in service in Westchester County.

**2. Rectifiers.** USEPA regulations do not currently contain formal PCB reclassification procedures for rectifiers. While the USEPA regulations do not prohibit the refilling of rectifiers to reduce their PCB content, the reductions in PCB concentration achieved through those measures do not affect the PCB classification of the rectifiers under the USEPA regulations. Consequently, a rectifier whose main tank was once filled with dielectric fluid that contained over 500 ppm PCBs remains classified as PCB Electric Equipment under the USEPA regulations, even if the rectifier's main tank is drained, flushed, and refilled with non-PCB dielectric fluid.

Con Edison has included in this report's PCB inventory listings rectifiers that formerly contained dielectric fluid with PCB concentrations of 500 ppm or greater. The listed rectifiers have been refilled with non-PCB oil to reduce the PCB concentration of the dielectric oil in their main tank. Because the USEPA regulations do not specifically allow for the reclassification of rectifiers, these rectifiers remain classified as PCB Electric Equipment under the USEPA regulations. Note that, as of June 30, 2007, only one such rectifier remained to be removed for disposal in New York County. This unit has been de-energized and drained of oil, and will be removed for disposal once an obstruction is resolved with the building owner.

3. The PCB equipment inventory listings presented in this report are based in part on the information contained in various internal databases. While Con Edison strives to maintain high quality PCB information for the equipment used on its electric system, it cannot guarantee that its databases are 100% complete or accurate or that they address all electrical components and devices. Con Edison corrects any errors that are identified. With some exceptions, such as the external vacuum braces on large transformers at generating stations and electric substations, the databases are generally limited to inventorying the PCB concentrations of the dielectric fluid contained in the main tank or main body of oil or fluid-filled electric equipment. As such, there is

electrical equipment and components of electrical equipment, such as bushings in particular, on the system which are not included in our databases. Generally, components such as bushings are sealed units and they cannot be sampled without puncturing them. Under USEPA regulations, while the equipment is in service or being stored for re-use, attached components of the equipment are considered to have the same PCB concentration as the dielectric fluid in the equipment's main body.

In addition, PCBs were commonly used in many applications (including non-liquid, solid applications) that are not unique to Con Edison specifically or to utility operations in general. These applications include ballasts in lighting fixtures, motor starting capacitors, pipe wraps, small transformers that are components of electrical devices such as public address and telephone communication systems, and solid plasticizer in relay wires and are not inventoried by Con Edison.

4. Analytical methods used by Con Edison's certified laboratory and approved contract laboratories are subject to some degree of inaccuracy and variability. PCBs could also leach from the core of a piece of equipment over time to increase the concentration in the dielectric fluid. Consequently, equipment on record to contain less than 500 ppm PCBs could, when re-tested, be found to contain more than 500 ppm PCBs.

5. The retired PCB Equipment presented in this report is based on hazardous waste manifests and other records at Con Edison's Astoria PCB Storage Facility.

6. Pursuant to a March 18, 1999, telephone conversation with Mr. Robert Johnson, New York State Department of Public Service, Con Edison is permitted to report any newly identified PCB equipment in its next semi-annual submission to PSC and is not required to modify this or any other previously-submitted PCB equipment inventory report that it filed with the PSC each time equipment that was assumed to contain less than 500 ppm PCBs under EPA's PCB Regulations in 40 CFR Part 761 is tested and found to contain 500 ppm or more of PCBs. However, Con Edison must file modifications to its inventory reports to correct any mistakes that were made in a previously submitted report and to include any PCB equipment that was identified by Con Edison prior to the filing of a report but not listed in the report.

## **CHANGES SINCE LAST REPORT**

**Kings County:** Three oil-filled bushings from a potential transformer taken out of service at the Greenwood Substation were tested to contain 2437 ppm PCB. These units were shipped for disposal as reported in Part 2 of this report.

**Westchester County:** Two distribution transformers were discovered to contain oil with 1166 and 1006 ppm PCB. These units were removed from service within 30 days of discovery and shipped for disposal as reported in Part 2 of this report.

SECTION C

REQUEST A VIOLATION REPORT FEE \$10.00 / PER REPORT

If you have no information and would like to obtain a certified report (with computer printouts), please complete this section by checking one or more boxes from the selection below:

[x] ITEM 1 - EXISTING VIOLATIONS [ ] ITEM 3 - DISMISSED VIOLATIONS [ ] ITEM 5 - EXISTING LIENS

[x] ITEM 2 - EXISTING SUMMONSES [ ] ITEM 4 - DISMISSED SUMMONSES [ ] OTHER: \_\_\_\_\_

CUSTOMER - PLEASE READ THE INFORMATION BELOW.

A CERTIFIED REPORT AND COMPUTER PRINTOUTS WILL BE MAILED TO THE ADDRESS YOU HAVE PROVIDED WITHIN FIVE (5) BUSINESS DAYS AFTER DATE SUBMITTED.

Note: Computer printouts cannot be provided for FDNY Violation Orders listed on the report. Also, please allow time for regular mail delivery.

After you have received the certified Violation Report, you can obtain a certified copy of any record available for an additional fee of \$0.25 (cents) / per page. The fee for individual copies can only be determined after this search has been completed and you have received the related report. All payments are non-refundable.

A requested report will only list the control numbers for liens or existing / dismissed records. The report issued by this office will not be valid unless all required areas are properly completed and it has an original FDNY Certification Stamp (no exceptions).

Note: A "dismissed" status means that the condition no longer exists, according to agency records. Also, please be advised that this search will not include records manually kept by Fire or Engine Companies.

## EDR City Directory Abstract

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening report designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

*Thank you for your business.*  
Please contact EDR at 1-800-352-0050  
with any questions or comments.

## SUMMARY

- *City Directories:*

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1927 through 2005. (These years are not necessarily inclusive.) A summary of the information obtained is provided in the text of this report.

This report compiles information by geocoding the subject properties (that is, plotting the latitude and longitude for such subject properties and obtaining data concerning properties within 100.32 Feet of the subject properties). There is no warranty or guarantee that geocoding will report or list all properties within the specified radius of the subject properties and any such warranty or guarantee is expressly disclaimed. Accordingly, some properties within the aforementioned radius and the information concerning those properties may not be referenced in this report.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

700 EAST 241ST STREET  
BRONX, NY 10470

#### COORDINATES

<b>INDIAN UST</b> .....	Underground Storage Tanks on Indian Land

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### FEDERAL RECORDS

**CERCLIS-NFRAP:** Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 06/21/2007 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

**RCRA-SQG:** RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/11/2007 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
<b>NYCTA - 239TH STREET SUBSTATIO</b>	<b>4530 WHITE PLAINS ROAD</b>	<b>1/8 - 1/4SSW</b>	<b>48</b>	<b>178</b>

**RCRA-CESQG:** RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 09/11/2007 has revealed that there are 4 RCRA-CESQG sites within approximately 0.25 miles of the target property.

### STATE AND LOCAL RECORDS

**SHWS:** The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the SHWS list, as provided by EDR, and dated 08/15/2007 has revealed that there are 2 SHWS sites within approximately 1 mile of the target property.

Class Code: Significant threat to the public health or environment - action required.

## EXECUTIVE SUMMARY

**DEL SHWS:** A database listing of sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites.

A review of the DEL SHWS list, as provided by EDR, and dated 05/01/2007 has revealed that there is 1 DEL SHWS site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
<b>SIGNO TRADING INTERNATIONAL LT</b>	<b>200-208 SOUTH 14TH AVEN</b>	<b>1/4 - 1/2ENE</b>	<b>O53</b>	<b>198</b>

**SWF/LF:** The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the SWF/LF list, as provided by EDR, and dated 10/26/2007 has revealed that there are 2 SWF/LF sites within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>

USA RECYCLING INC.	4817 BALDWIN STREET	1/4 - 1/2NNW	P57	247

**LTANKS:** Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the LTANKS list, as provided by EDR, and dated 10/02/2007 has revealed that there are 45 LTANKS sites within approximately 0.5 miles of the target property.

**HIST LTANKS:** A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database.

A review of the HIST LTANKS list, as provided by EDR, and dated 01/01/2002 has revealed that there are 32 HIST LTANKS sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

**SPILLS:** Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 10/02/2007 has revealed that there are 5 NY Spills sites within approximately 0.125 miles of the target property.

**HIST SPILLS:** This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database.

A review of the NY Hist Spills list, as provided by EDR, and dated 01/01/2002 has revealed that there are 4 NY Hist Spills sites within approximately 0.125 miles of the target property.

### EDR PROPRIETARY RECORDS

**EDR Manufactured Gas Plants:** The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there is 1 Manufactured Gas Plants site within approximately 1 mile of the target property.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

NJ-NJEMS (New Jersey - New Jersey Environmental Management System).  
 The Department of Environmental Protection (NJDEP) manages large  
 databases of environmental information in this integrated system.

RCRAInfo is a national information system that supports the Resource  
 Conservation and Recovery Act (RCRA) program through the tracking of  
 events and activities related to facilities that generate, transport,  
 and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA  
 program staff to track the notification, permit, compliance, and  
 corrective action activities required under RCRA.

**Historical Generators:**

Date form received by agency: 06/23/1992  
 Facility name: NEW YORK TELEPHONE CO  
 Classification: Conditionally Exempt Small Quantity Generator

**Hazardous Waste Summary:**

Waste code: D001  
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

UTM Y: 4528405.00578  
Site Type Name: Unknown  
Site Type Status: Administratively Closed  
Comments: 12/29/92 - All attempts to contact this facility have failed. Mail is being returned as undeliverable, and no one is reachable by telephone. This site will not receive any future mailing correspondence, including registration renewal applications and tank testing overdue notices, until this problem has been resolved. A site inspection is necessary to determine the true status of this facility. For all intents and purposes, it's UNDELIVERABLE. This site, however, is still considered active until deemed otherwise. A DUPLICATED REGISTRATION RECORD EXISTS AT 2-483133 UNDER A DIFFERENT OWNER. THE NEW OWNER MUST HAVE SENT IN A NEW REGISTRATION APPLICATION IN STEAD OF A TRANSFER. SO THIS RECORD IS ADMINISTRATIVELY CLOSED. 09/04/92 - This site has been declared ADMINISTRATIVELY CLOSED. It has been removed from active status. (Please specify why below)

**FINDS:**  
 Other Pertinent Environmental Activity Identified at Site

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 DEC Memo: Start DECRemark - 0210176 03/02/06 - The NYSDEC sent a letter to the property owner on 12/19/05 requesting information on the status of the reported petroleum spill. The NYSDEC has not yet received a response. The NYSDEC also attempted to contact the consultant (A.L. Eastmond) that performed the cleanup to obtain documentation of the cleanup, but our calls to the consultant were never returned. Prior to Sept, 2004 data translation this spill Lead DEC Field was "DEMEO" 1/30/02 tjd Site inspected by Demeo. All product contained inside vault. AL Eastmond performing cleanup. Spill to remain open until disposal manifests and passing tightness test is submitted. END DECRemark - 0210176  
 Remarks: Start CallerRemark - 0210176 5,000 GALLON TANK FAILED THERE WAS 1600 GALLONS IN THE TANK AND IT WAS REMOVED 50 GALLONS WAS CLEANED OFF THE FLOOR. END CallerRemark - 0210176

 Site Description:

This Site Description was reviewed and edited on August 6, 2007. Location description: This site was located in Mt. Vernon, NY on the Bronx County border in a densely populated residential and light industrial neighborhood. Predominant SiteFeatures: An abandoned three-storey warehouse occupied a major portion of the site. Toxic, flammable and hazardous substances in various forms of containers were stored insecurely inside this warehouse. The basement was rented to another business. Current Use: Unknown Historical Sources of Contamination: Improper storage of hazardous substances including flammable liquids and solids, poisonous liquids and solids, oxidizers, strong reducing agents, peroxide forming materials like ethers (shock sensitive explosive) and corrosives. Investigations/actions performed to date: The conditions of the site was reported by the Mt. Vernon Fire Department to the USEPA in November 1986. Between December 1986 and June 1987, the USEPA undertook characterization of the chemicals, controlled detonation of explosive substances at the Hickok State Park in Sullivan County, and disposal of other hazadous substances at various disposal facilities including Hanford, Washington; Chemical Waste Management, Alabama; Polyscience, Warrington, Pennsylvania; Cylinder Recon, Kearny, New Jersey; BDT, Clarence, New York; SCA Chemical Services, Newark, New Jersey; and ThermalKem, Rockhill, South Carolina. Current Actions: Remediation is complete, no further action or review of this Site Description is required.

**Environmental Problems:**

Contaminants of Concern: Flammable liquids and solids, poisonous liquids and solids, oxidizers, strong reducing agents, peroxide forming materials (shock sensitive explosive) and corrosives. Impacted Media: No release to the environment was reported. Known SCG Exceedances: None identified Special resources Impacted/Threatened: Prior to remediation, there had been a potential for release of incompatible chemicals with possiblity of environmental and health disaster. Significant Threat: The site is remediated and no significant threat is present.

Health Problems Assesment: NYSDOH has insufficient information to fully evaluate the potential for human exposures.

Site Description: This site is located in Mt. Vernon, NY on the Bronx County border. It is situated in a densely populated residential and light industrial neighborhood. The site was a structure containing a large quantity of toxic, flammable and hazardous substances stored in compressed gas cylinders, 55 gallon drums, 50 pound bags, numerous 5 gallon containers, boxes, jars, and other containers. The types of chemicals include flammable liquids and solids, poisonous liquids and solids, oxidizers, strong reducing agents, peroxide forming materials (shock sensitive explosive) and corrosives. Sampling of drums has been done. All wastes in the abandoned warehouse have been removed. The shock sensitive wastes were detonated at West Point and Hickok Park in Sullivan County and the remaining wastes were shipped to Thermal Kem. There are no reported releases to the environment.  
Confirmed HW: Not reported

 Other Pertinent Environmental Activity Identified at Site

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

VCP:

Program Type: VCP  
Site Code: 57161  
Assessment: The site is located in an active commercial/industrial neighborhood.  
Metals-contaminated soils were identified in subsurface soils adjacent to and  
beneath one of the buildings. Soils were excavated to bedrock and disposed of  
off-site. Groundwater was not encountered above bedrock. The area is served by  
public water and there are no known current or potential exposure pathways  
present.  
Env Problems: Contaminants of Concern: The primary contaminants of concern at the site  
included cadmium and chromium. Impacted Media: Investigations indicated that  
soil below the former plating room was impacted by metals. This soil was  
excavated under the 2005 remedial program. Known SCG Exceedances: The soil  
which contained elevated levels of cadmium and chromium has been removed.  
Special Resources Impacted/Threatened: None. Significant Threat: None.  
Site Desc: Location Description: The 31 South Street site is located at 31 South Street,  
Mount Vernon, New York. Predominant Site Features: The site is a 24 foot by 28  
foot area in the middle of a complex of buildings bound by Cortlandt, Pearl,  
and South Streets in the City of Mount Vernon, Westchester County, New York.  
Current Use: Currently the buildings on-site are being renovated/repared.  
Surrounding Use: The surrounding area is a mix of commercial and residential  
properties. Historical Sources(s) of Contamination: Prior to the purchase of  
the property by the Volunteer, the facility was used for the design,  
manufacture, and testing of electrical equipment including motor controllers,  
relays, rheostats, contractors, and switchgear. The facility's operations  
generally included machining, sheet metal fabrication, surface coating,  
degreasing, electroplating, brazing, smelting, assembly, and pottery  
manufacturing, as well as electrical and mechanical testing. A plating  
operation existed in a small room on the site. This operation included  
zinc/silver plating and chromate conversion coating. In addition, cadmium  
plating was conducted prior to the early 1980s. Although spent acid and caustic  
solutions were drummed for off-site disposal, rinse water was discharged to the  
municipal sewer system by draining it into two concrete-bottomed sumps.  
Investigations/Actions Performed to Date: A July 2000 investigation of the site  
revealed metals, including cadmium and chromium, above soil cleanup objectives  
or site background values. Current Actions: Under the Voluntary Cleanup

Program, a remedial program was planned and implemented which included the excavation and off-site disposal of the contaminated soil. This remedial action was completed in August 2005.

DEC Memo:

Start DECRemark - 0405805 Prior to Sept, 2004 data translation this spill Lead DEC Field was "TIPPLE" 4/27/06 - Austin - Spill inadvertently assigned to CO staff (Keating) - reassigned to Ketani 7/11/06 - Raphael Ketani. The spill of #2 oil took place on 8/27/04. Mr. Cardoza (718) 994-2658 is the contact. Margret Gentle of Stuyvesant Fuel (718) 665-5700 is the fuel company contact. I called up Mr. Cardoza and he said this is a private home. He said that back in 2004 he noticed the tank was leaking onto the floor. He called U. S. Tanks and they replaced the tank. He said that the floor is solid concrete and that there are no cracks. 7/13/06 - Raphael Ketani. I spoke to Ms. Gentle and she said that Stuyvesant didn't handle the case. She said it was USA Tanks (718) 981-5710. I called USA Tanks and talked to Kristin. She looked into her database and said that there are some notes in the record regarding the tank replacement. I asked her to FAX me the notes. She said she would. Kristin added that the tank was replaced. She FAXed me her company's notes for the site. Based upon the FAXed notes and my conversations with Mr. Cardoza and Kristin, I am closing the case. END DECRemark - 0405805

DEC Memo:

Start DECRemark - 0305990 Prior to Sept, 2004 data translation this spill Lead DEC Field was "TIPPLE" Sangesland spoke with Keith Bartley of KB Installations. Mr. Bartley spoke with Pastor Ralph Williams (718-325-9291). He told the pastor that the tank needs a tank test (buried 1080 tank). Depending on the results of this test, there may be more investigation required. Pastor Williams knows he needs to do a tank test. 9/9/2003 New spill report (0306118) was made by owner of 4419 WhitePlains Rd. (Mr. Evan Rogers 718-994-1640) He says there is oil coming through the basement wall from the church next door. He had his own boiler company check all of his lines and tank and he said his stuff is fine and not in that area. Smell in his building is terrible and his tenants are complaining. When you go to the church, there is always someone there, the caretaker lives there and so does the pastor. 9/16/03 tipple's second site visit, basement access revealed oil staining on the stone foundation wall as well as olfactory evidence of 2 oil entering 4419 white plains rd. basement. tipple revisited the church basement and there was no olfactory, only the remains(two bags) of contaminated sand used to clean up the release on the church basement floor. I spoke with Peter Lendre the church handyman who restated that they were going to get the tank/system repaired and tested. Tipple sent a letter requiring repair/cleanup on 9/17 9/26/03 Dave from A-1 Tank( 516-695-6303 cell) conducted a system test for the UST which failed, and was reported directly to Tipple/project mgr. from the site. Dave stated there were two sets of lines from the tank. Combined combustion has been called in to uncover the tank and isolate it for a retest. Based on the findings the next actions will be determined. 3/23/2004 TIPPLE Updating//Tradewinds completed remedial efforts/dig, dispose. monitoring for 6 months revealed no further instances of contamination. no further action necessary!!! END DECRemark - 0305990

Remarks: Start CallerRemark - 0305990 CALLER STATES THAT HE GOT A CALL FROM A NEIGHBOR AT THE ABOVE ADDRESS FOR AN ODOR OF OIL - CALLER STATES THAT IT APPEARS TO BE

Other Pertinent Environmental Activity Identified at Site

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

05/23/05-File Update by Sun- On 05/05/05, the Department held a project review  
meeting with Hess's Project Manager (Mike Matri) and his consultant  
(EnviroTrac). Per Mike Matri, EnviroTrac is currently evaluating possible  
drilling locations north and west of off-site monitoring well MW-6 to further

delineate benzene, toluene, ethylbenzene, xylenes (BTEX) and MTBE in groundwater. Hess will propose drilling locations once permits are obtained from NYCDOT. Joe Sun indicated that due to high concentrations of BTEX (24,360ppb max at MW-1) and MTBE (1,200 ppb max at MW-2) based on 01/28/05 sampling data, a Stipulation Agreement is required for this site. (Sun) 09/30/05-File Update by Sun: As discussed during a May 2005 meeting between DEC, Hess, and EnviroTrac, Hess will install delineation monitoring wells to the north and west of MW-6. Hess will proceed with the well installation once permits are obtained from the New York State Department of Transportation. Based on Update Report for the period of February 2005 through May 2005 and samples taken on 04/25/05, no free phase product was detected in any well. The BTEX (max) and MTBE (max) concentrations are 28,856 ppb and 5,300 ppb, respectively. A Stipulation Agreement will be mailed to Hess. (Sun) 10/20/2005: Project reassigned from Sun to Andersen. 10/25/05: Stip mailed to Hess, cc to consultant. (Andersen) 12/5/05: Reviewed quarterly monitoring report dated 11/29/05. Eight wells sampled on October, 6, 2005. Max BTEX 14,518 (MW2), max MTBE 4,100 (MW6). Waiting for DOT permit to complete delineation. 1/10/06: Received email from Thomas Bosshard: The off-site delineation at the referenced site has been scheduled for Wednesday and Thursday, January 18 and 19, 2006. Proposed off-site well locations are depicted in the attached site plan. The necessary permits have been obtained from the New York City Department of Transportation (NYCDOT). The monitoring wells will be incorporated into the site's quarterly groundwater sampling schedule; the first quarter 2006 sampling event is scheduled for January and will be conducted following the installation of the off-site wells. 1/13/06: The off-site delineation has been rescheduled for Thursday and Friday, January 19 and 20. 1/26/06: 1/25/06 meeting with Quantum, NYSDEC, and ET. Off site delineation has been started. SVE/ET is not feasible for this site. Dual phase treatment will be investigated. 3/1/06: Signed stipulation agreement, effective date February 23, 2006. ISR due April 24, 2006. 4/24/06: Received and approved the update report/investigation summary report dated 4/21/06. Four off-site monitoring wells installed in January 2006. Soil samples collected from the four off-site wells and three additional locations in which refusal was encountered were all found to be clean. Maximum BTEX and MTBE concentrations were found in the new MW 9, BTEX 55,470 ppb and MTBE 16,200 ppb. Depth to water 12-38 ft. RAP due June 23, 2006. 6/19/06: Received a call from Ed Russo indicating that the RAP will be late. Hess will submit a letter requesting an extension. 6/20/06: Received request for extension of RAP deadline. DPE pilot testing will be conducted. Deadline extended to 9/30/06. 6/30/06: Meeting with Hess, Quantum, NYSDEC, EnviroTrac and GSC. Pilot testing completed. RAP due 9/30/06. Ozone may be utilized in off-site wells. 7/12/06: Reviewed the second 2006 quarterly report. Sampling conducted on 4/4/06. Product found in MW1 at a thickness of 0.02ft. Max BTEX 31,910 ppb in offsite well MW6, and max MTBE 7,170ppb in off-site well MW9. RAP will be submitted after dual phase extraction pilot testing. 9/27/06: RAP deadline extended until 10/31/06. Delta will be the new consultant for Hess sites, and Delta requested time to review the RAP prior to submission. 9/29/06: Sent email to Gail Helfrick: "In our phone conversation on August 29, 2006 you proposed the submittal of a Remedial Action Plan (RAP) for the above mentioned site on October 31, 2006 that will only include a remedial workplan for on-site contamination. Contamination in off-site wells MW 6 and MW 9 is significant. A RAP is required for off-site contamination. The Department approves of the submission of separate RAPs for on-site and off-site contamination with the following deadlines: On-site RAP : due October 31 , 2006 Off-site RAP : due November 30, 2006" 10/5/06: Received update report dated 9/27/06. Wells sampled on 7/13/06. Max BTEX 36,180 ppb (MW1), max MTBE 2,130 ppb (MW14). Significant off-site contamination. 11/1/06: The Department approved an RAP

S105054928

for on site remediation. The RAP proposed to remediate on-site contamination utilizing high vacuum dual phase extraction (HVDPE). Six 4-inch diameter PVC extraction wells will be utilized, with a groundwater radius of influence of 25 feet side-gradient and 15 feet down-gradient, and a soil vapor extraction radius of influence of 23 feet. The groundwater discharge will be treated with an air stripper and granular activated carbon (GAC) vessel prior to discharge into the sewer system. Air effluent will be sampled and treated with GAC vessels if necessary. The system will be monitored weekly for the first month of system operation, and monthly thereafter. Quarterly monitoring and reporting of groundwater, system groundwater influent and effluent, and air effluent will occur. A schedule was provided in the RAP which indicated that 295 days were required for RAP implementation. The Department requests that RAP implementation be expedited as much as possible. A supplemental RAP will be submitted on November 30, 2006 to address off-site groundwater contamination. Spoke to Aaron Lapine of Delta Consultants, the new consultant for Hess. Requested extension to complete pilot testing at off site wells. Extension approved to 12/30/06. Chemical oxidation/biostimulation is being considered. Soil vapor sampling may be prudent. 11/29/06: Spoke to Aaron Lapine. Pilot testing not possible by 12/30/06, RAP will be submitted by original deadline of 11/30/06. 12/4/06: RAP approved for off-site treatment. iSOC (in-site submerged oxygen curtain) will be used in two wells on the sidewalk. Oxygen radius of influence of 15 feet. Bioremediation parameter monitoring and a soil vapor well are required. 12/15/06: Received email from Aaron Lapine of Delta: "As a follow up to our recent telephone conversation concerning the conditions associated with the Off-site RAP approval, we are proposing: \* Eliminating the requirement to collect ferrous iron and dissolved manganese data, since the iron and manganese reductive degradation pathways are not the focus of this technology; and \* The vapor sampling point required as a condition for implementation will be installed within an iSOC vault, but within a separate borehole. Acetone will be used as a tracer during the quarterly laboratory analytical to ensure that there isn't any short-circuiting from the nearby iSOC well. If it is determined through the initial sampling events that volatilization is not an issue (the oxygen is diffused so it shouldn't be), we will be petitioning to discontinue the vapor monitoring. 12/18/06: Sent email to Aaron Lapine of Delta: 1) The Department approves the request to eliminate monitoring of ferrous iron and dissolved manganese data. 2) What is the distance between the proposed soil vapor sampling point and the iSOC well? The wells should be at least 2 ft apart. 3) Briefly, what is the procedure for the use of acetone as a tracer? 12/22/06: Received email from Aaron Lapine: "The distance between the vapor point and the well will be between 1 and 2 feet. The tracer testing will ensure that there is no significant leakage from the proximity of the well. If there is an issue with significant leakage we'll need to relocate the vapor point. The acetone liquid is applied onto the fittings, connections, and base of the well points with an applicator cloth." A portfolio review meeting is scheduled for January 16 at 10 am. 1/17/07: Meeting on 1/16/07 with Hess, Delta, and NYSDEC. Soil vapor well will be located in 2x2 iSOC vault. HVDPE system startup expected 10/07. iSOC startup expected 5/07. 1/23/07: Reviewed update report. Wells sampled on 10/2/06. Max BTEX 22,260 (MW1), max MTBE 8,650 (MW14). RAP implementation in progress. 4/3/07: Reviewed update report. Fluctuating groundwater concentrations in some wells. MPE startup expected 10/07. iSOC startup expected 5/07. 6/26/07: Received notification: "The installation of the 2 iSOC wells is scheduled to begin tomorrow (6/26). We expect the well installation to be completed this Friday (6/29)." 6/28/07: Reviewed update report. Wells sampled 4/10/07. Max BTEX 39,100 (MW14), max MTBE 16,000 (MW14). iSOC installation in progress. MPE system installation expected to be completed by 10/2007. END DEC Remark - 0101986

DEC Memo: Start DECRemark - 0514405 03/17/06-Hiralkumar Patel. Spoke with Mr. Abraham, who did tank test. they did test on regular basis. tank system lost vacuum at the rate of 0.03 inch of vacuum in 5 minutes. UST is of 1500 gal capacity. Abraham didn't do isolation test so he doesn't know about which part is leaking. PBS#: 2-284564 Called Mr. Allen, but nobody replied and no room to record a voice mail. Spoke with Operator at Allen's office and left message for Allen. From Reverse Phone Directory, address for Allen's number: TMMA Management 303 E 238th St Bronx, NY 10470-1806 PH. (718) 994-8744 FAX (718) 324-3403 03/20/06-Hiralkumar Patel. Called Allen's office and nobody replied. no room for voice mail recording. Tried again Allen's office and left message for Allen. Allen will be in office tomorrow afternoon.  
03/24/06-Hiralkumar Patel. Tried Allen's number, nobody replied, no space for voicemail recording. TTF letter sent out to Allen. Letter sent at two different addresses at TMMA Management & at 4359 Furman Ave. 04/04/06-Hiralkumar Patel. Letter sent out to Allen at 4359 Furman AVE address came back.  
04/21/06-Hiralkumar Patel. Left message for Allen. received call from Allen's office and person told methat environmental company did testing and they will get results in first week of May. and then they will forward it to the department. 05/11/06-Hiralkumar Patel. Left message for Allen.

**Site Description:**

Location Description This site is located at the west corner of Oak Street and North West Street, in the City of Mt. Vernon, Westchester County. The Bronx River (Class C) is downgradient and is separated from the site by a banked railway line to the southeast of the river. The river is between 125 feet away from the north end of the site and 185 feet away from the south end. Site Feature The site is about 1.1 acre in area, 73 percent of which is occupied by multi-floored buildings which together have a frontage of 480 feet on North West Street. Current Use The property is used as a self-storage facility. Surrounding Uses Local land use within one mile of the site is urban with some mixed residential and industrial/commercial development. The railroad track to the northwest is used by Metro-North Railroad Co. The site is located in area that is expressly zoned for industrial use. The area has a public water supply system. Historical Sources of Contamination Polyurethane and toluene are the two principal contaminants at the site. These chemicals were used in the paint manufacturing operation at the site that lasted from 1955 to mid 1990's. The contamination of soil and groundwater at the site are the result of releases/spills during storage or handling of these chemicals. Completed Investigations/Actions: In 1990, Insilco conducted a preliminary site assessment of the contamination at the site that had as its objective the closure of the tanks at the site. Since leaks were observed in some of these tanks, a preliminary site investigation was completed in May 1992. This was followed by a Remedial Investigation that was completed in 1994. A Feasibility Study (OU-I) report was prepared in June 1995 that focused on the recovery and disposal of free polyurethane in the ground that was, and still is, flowing into the Bronx River. A record of decision (ROD) was issued in March 1996. The selected remedy, which commenced operation in January 1999, included an on-shore polyurethane recovery system, and an interceptor boom along a stretch of the eastern bank of the Bronx River that has polyurethane seeps. Current Action The boom is still being used for interception of seeps into the River. Insilco, the responsible party filed for Chapter 11 Bankruptcy on December 16, 2002. The on-shore free product recovery system has been rendered inoperable. The facility operated as a paint manufacturer from 1915 to mid 1990. The USEPA was notified in 1980 that Red Devil was a hazardous waste generator. NYSDEC inspections show the facility using mineral spirits as a solvent to clean vats with a D001 waste number. Some tanks, found in poor condition (holes), contained mineral spirits. The owner, Insilco Corporation, implemented

a site assessment and management program that started with a Phase II investigation. It is still doing supplemental sampling. The initial part of the Phase II was completed in 1991. The preliminary investigation showed groundwater and soil contamination by solvents such as: toluene at 2,200 ppm (soil) and 610 ppb (water), xylenes at 65ppm (soil) and 1,870 ppb (water). Ethylbenzene, naphthalene, methylene chloride, chloroform and 1,1,1-trichloroethane were found at levels above water quality standards. Four feet of free phase product containing polyurethane varnish was also discovered in the groundwater. Investigations in February 1993 indicated 3 areas of product seepage into the Bronx River. A consent order was signed in June 1993 for a PRP funded RIFS. The ROD, approved in March 1996, calls for NAPL recovery from on-site groundwater, passive recovery of off-site paint material from the Bronx River and the construction of an active off-site paint material recovery system along the banks of the river. Construction of an off-site active paint product recovery system started in January 1999 and was completed in the summer of 1999. The rate of recovery of polyurethane from the floating layer above the groundwater has been very low because of its viscous nature. Other remedial alternatives are being explored.

Environmental Problems: The continued seepage of free polyurethane into the Bronx River is a significant threat to the environment.

Health Problems Assesment: Ingestion of drinking water is not considered a potential route of exposure as drinking water comes from upstate reservoirs and institutional controls of the City prevent the installation of drinking water supply wells. Under normal conditions, direct contact by building occupants with chemical contamination is not expected as known contamination is primarily subsurface as a result of underground storage tank leakage, and the building covers most of the property. In addition, 24-hour security is provided and fencing maintained to restrict unauthorized access. The potential exists for the free product floating on the water table to produce vapors that could enter the basement and upper floors, thereby potentially impacting indoor air quality. NYSDOH and NYSDEC has requested the responsible party to conduct additional investigations to determine the potential for soil vapor intrusion into structures on or near the site. Contact with free product seeping into the nearby river is not expected due to the inaccessibility of the river and the placement of absorbent capture booms.

VCP:

Program Type: BCP  
Site Code: 348782  
Assessment: Ingestion of drinking water is not considered a potential route of exposure as drinking water comes from upstate reservoirs and institutional controls of the City prevent the installation of drinking water supply wells. Under normal conditions, direct contact by building occupants with chemical contamination is not expected as known contamination is primarily subsurface as a result of underground storage tank leakage, and the building covers most of the property. In addition, 24-hour security is provided and fencing maintained to restrict unauthorized access. The potential exists for the free product floating on the water table to produce vapors that could enter the basement and upper floors, thereby potentially impacting indoor air quality. NYSDOH and NYSDEC will be evaluating the need to conduct additional investigations to determine the potential for soil vapor intrusion into structures on or near the site. Contact with free product seeping into the nearby river is not expected due to the inaccessibility of the river and the placement of absorbent capture booms.

Env Problems: Solvents and LNAPL have been identified under the building and seeping into the Bronx River. VOC groundwater contamination and subsurface soil contamination have been identified. Active seeps of LNAPL are noted along the Bronx River. A hard boom Alcohol, mineral spirits, petroleum hydrocarbons and methylene chloride contamination has been noted from several former underground storage tanks. Groundwater impacts have been documented including free product on the water table. LNAPL is seeping system is in place to collect LNAPL. The remedy implemented for the site has only been partially effective. LNAPL is still noted under the site and entering the river. A volunteer signed a BCA and is reevaluating the on-site remedy. An RI and sour into the Bronx River.ce removal

IRM are underway. An RI/FS for residual soil/groundwater beyond the site BCA boundary and the impacts to the Bronx River is planned for 2007. (07/07)  
This Red Devil site is the former location of a paint manufacturing facility. The site is presently an active self storage facility. The site is located on 30 North West Street, Mount Vernon, Westchester County. This site is approximately 1.16 ac. The former Red Devil Paint facility is located on 30 Northwest Street, Mount Vernon, New York. The site is about 1 acre and contains a multi-floored self storage facility. The site is surrounded by mixed residential and commercial development. The site is also listed on the NYS Registry as a Class 2. The site is in a mixed residential, commercial and industrial area. The Metro North Railroad is located directly west of the site. The contaminants at this site are chlorinated solvents and the Bronx River is located 100 feet north west of the site. The paint manufacturing plant was constructed in phases starting in 1956 and completed in 1966. Paint manufacturing ended in 1990. The site was then sold and refurbished into the self storage facility. VOCs and are impacting the subsurface soils, groundwater and surface water. LNAPL has been identified below the site and seeping into the Bronx River. Prior to 1992, the site was subject to numerous spill events. In 1992, the site was listed as a Class 2. This project has been terminated. The site is being managed as a Class 2. Insilco Corp. conducted several IRM and an RI/FS. In March 1996, a ROD was signed. The ROD called for LNAPL collection under the building and along the Bronx River. Due to operational problems, the system was shut down in 2002. The PRP filed for bankruptcy. In 2005, a volunteer approached the Department to enter the BCP. The BCA was signed in December 2005. The RI/FS work plan was approved in July 2006 and the RI is underway. A source removal IRM work plan was approved in November 2006 and calls for the removal of former USTs/ASTs. This work is also underway. A referral to SSF for an RI/FS for OU2 (residual soil & groundwater contamination) and OU3 (the Bronx River) was received in March 2007. An investigation work plan for the two projects is anticipated in 2007. (07/07)

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

### FEDERAL RECORDS

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/02/2007	Source: EPA
Date Data Arrived at EDR: 12/03/2007	Telephone: N/A
Date Made Active in Reports: 12/28/2007	Last EDR Contact: 01/28/2008
Number of Days to Update: 25	Next Scheduled EDR Contact: 04/28/2008
	Data Release Frequency: Quarterly

#### **NPL Site Boundaries**

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/02/2007	Source: EPA
Date Data Arrived at EDR: 12/03/2007	Telephone: N/A
Date Made Active in Reports: 12/28/2007	Last EDR Contact: 01/28/2008
Number of Days to Update: 25	Next Scheduled EDR Contact: 04/28/2008
	Data Release Frequency: Quarterly

#### **DELISTED NPL: National Priority List Deletions**

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/02/2007	Source: EPA
Date Data Arrived at EDR: 12/03/2007	Telephone: N/A
Date Made Active in Reports: 12/28/2007	Last EDR Contact: 01/28/2008

	Data Release Frequency: Quarterly

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 11/15/2007
Number of Days to Update: 56	Next Scheduled EDR Contact: 02/18/2008
	Data Release Frequency: No Update Planned

### **CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System**

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/23/2007	Source: EPA
Date Data Arrived at EDR: 06/20/2007	Telephone: 703-412-9810
Date Made Active in Reports: 08/29/2007	Last EDR Contact: 12/06/2007
Number of Days to Update: 70	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: Quarterly

### **CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned**

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/21/2007	Source: EPA
Date Data Arrived at EDR: 07/23/2007	Telephone: 703-412-9810
Date Made Active in Reports: 08/29/2007	Last EDR Contact: 12/06/2007
Number of Days to Update: 37	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: Quarterly

### **LIENS 2: CERCLA Lien Information**

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 08/08/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/03/2007	Telephone: 202-564-6023
Date Made Active in Reports: 12/28/2007	Last EDR Contact: 11/15/2007
Number of Days to Update: 25	Next Scheduled EDR Contact: 02/18/2008

### **CORRACTS: Corrective Action Report**

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 09/18/2007	Source: EPA
Date Data Arrived at EDR: 12/03/2007	Telephone: 800-424-9346
Date Made Active in Reports: 12/28/2007	Last EDR Contact: 12/03/2007
Number of Days to Update: 25	Next Scheduled EDR Contact: 03/03/2008
	Data Release Frequency: Quarterly

### **RCRA-TSDF: RCRA - Transporters, Storage and Disposal**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

### RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/11/2007

### RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/11/2007  
Date Data Arrived at EDR: 12/03/2007

### RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 07/16/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/03/2007	Telephone: 703-603-8905
Date Made Active in Reports: 10/11/2007	Last EDR Contact: 01/02/2008
Number of Days to Update: 69	Next Scheduled EDR Contact: 03/31/2008
	Data Release Frequency: Varies

### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 07/16/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/03/2007	Telephone: 703-603-8905

### HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 10/01/2007	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 12/03/2007	Telephone: 202-366-4555
Date Made Active in Reports: 12/28/2007	Last EDR Contact: 01/17/2008
Number of Days to Update: 25	Next Scheduled EDR Contact: 04/14/2008
	Data Release Frequency: Annually

### DOT OPS: Incident and Accident Data

Department of Transportation, Office of Pipeline Safety Incident and Accident data.

Date of Government Version: 08/14/2007	Source: Department of Transportation, Office of Pipeline Safety
Date Data Arrived at EDR: 08/29/2007	Telephone: 202-366-4595
Date Made Active in Reports: 10/11/2007	Last EDR Contact: 11/29/2007
Number of Days to Update: 43	Next Scheduled EDR Contact: 02/25/2008
	Data Release Frequency: Varies

### CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 09/01/2007  
Date Data Arrived at EDR: 12/03/2007

Next Scheduled EDR Contact: 03/24/2008  
Data Release Frequency: Quarterly

### US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 10/12/2007  
Date Data Arrived at EDR: 12/03/2007  
Date Made Active in Reports: 01/24/2008

Last EDR Contact: 01/02/2008  
Next Scheduled EDR Contact: 03/31/2008  
Data Release Frequency: Annually

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 07/13/2007

Last EDR Contact: 12/17/2007  
Next Scheduled EDR Contact: 03/17/2008  
Data Release Frequency: Quarterly

### **HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing**

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006  
Date Data Arrived at EDR: 03/01/2007  
Date Made Active in Reports: 04/10/2007

Last EDR Contact: 12/17/2007  
Next Scheduled EDR Contact: 03/17/2008  
Data Release Frequency: No Update Planned

### **SSTS: Section 7 Tracking Systems**

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2005

Data Release Frequency: Annually

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### **ICIS:** Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 07/27/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/13/2007	Telephone: 202-564-5088
Date Made Active in Reports: 10/11/2007	Last EDR Contact: 01/15/2008
Number of Days to Update: 59	Next Scheduled EDR Contact: 04/14/2008
	Data Release Frequency: Quarterly

### **PADS:** PCB Activity Database System

PCB Activity Database. PADS identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 04/12/2007	Source: EPA
Date Data Arrived at EDR: 06/08/2007	Telephone: 202-566-0500
Date Made Active in Reports: 08/29/2007	Last EDR Contact: 08/09/2007
Number of Days to Update: 82	Next Scheduled EDR Contact: 11/05/2007
	Data Release Frequency: Annually

### **MLTS:** Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 10/04/2007	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 12/03/2007	Telephone: 301-415-7169
Date Made Active in Reports: 12/28/2007	Last EDR Contact: 01/02/2008
Number of Days to Update: 25	Next Scheduled EDR Contact: 03/31/2008
	Data Release Frequency: Quarterly

### **RADINFO:** Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 10/30/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/03/2007	Telephone: 202-343-9775
Date Made Active in Reports: 01/24/2008	Last EDR Contact: 01/31/2008
Number of Days to Update: 52	Next Scheduled EDR Contact: 04/28/2008
	Data Release Frequency: Quarterly

### **FINDS:** Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 10/18/2007	Source: EPA
Date Data Arrived at EDR: 12/03/2007	Telephone: (212) 637-3000
Date Made Active in Reports: 12/28/2007	Last EDR Contact: 01/02/2008
Number of Days to Update: 25	Next Scheduled EDR Contact: 03/31/2008
	Data Release Frequency: Quarterly

### **RAATS:** RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 04/17/1995  
Date Data Arrived at EDR: 07/03/1995  
Date Made Active in Reports: 08/07/1995  
Number of Days to Update: 35

### **STATE AND LOCAL RECORDS**

#### **SHWS: Inactive Hazardous Waste Disposal Sites in New York State**

Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites

Date of Government Version: 08/15/2007  
Date Data Arrived at EDR: 09/12/2007  
Date Made Active in Reports: 10/17/2007  
Number of Days to Update: 35

Source: Department of Environmental Conservation  
Telephone: 518-402-9622  
Last EDR Contact: 12/13/2007  
Next Scheduled EDR Contact: 03/10/2008  
Data Release Frequency: Annually

#### **HSWDS: Hazardous Substance Waste Disposal Site Inventory**

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

Date of Government Version: 01/01/2003

Next Scheduled EDR Contact: 03/10/2008  
Data Release Frequency: Annually

#### **SWF/LF: Facility Register**

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Data Release Frequency: Varies

### HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Data Release Frequency: Quarterly

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

Date of Government Version: 08/15/2007  
Date Data Arrived at EDR: 09/12/2007

Data Release Frequency: Semi-Annually

### SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

Date of Government Version: 08/06/2007  
Date Data Arrived at EDR: 08/07/2007

### **RES DECL:** Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

Data Release Frequency: No Update Planned

### **E DESIGNATION:** E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

### EDR PROPRIETARY RECORDS

#### **Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants**

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## Listing of Storage Tanks

A listing of underground storage tank sites located in Westchester County.

Date of Government Version: 05/05/2005	Source: Westchester County Department of Health
Date Data Arrived at EDR: 05/31/2005	Telephone: 914-813-5161
Date Made Active in Reports: 06/30/2005	Last EDR Contact: 11/26/2007
Number of Days to Update: 30	Next Scheduled EDR Contact: 02/25/2008
	Data Release Frequency: Varies

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2005	Source: Department of Environmental Protection
Date Data Arrived at EDR: 06/15/2007	Telephone: 860-424-3375
Date Made Active in Reports: 08/20/2007	Last EDR Contact: 12/13/2007
Number of Days to Update: 66	Next Scheduled EDR Contact: 03/10/2008
	Data Release Frequency: Annually

### NJ MANIFEST: Manifest information

Hazardous waste manifest information.

Date of Government Version: 09/30/2007	Source: Department of Environmental Protection
Date Data Arrived at EDR: 12/04/2007	Telephone: N/A
Date Made Active in Reports: 12/31/2007	Last EDR Contact: 01/03/2008

Telephone: N/A

Last EDR Contact: 01/07/2008

Next Scheduled EDR Contact: 04/07/2008

Data Release Frequency: Annually

**Oil/Gas Pipelines:** This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

### **Electric Power Transmission Line Data**

Source: PennWell Corporation

Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### **AHA Hospitals:**

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### **Medical Centers: Provider of Services Listing**

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### **Nursing Homes**

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### **Public Schools**

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### **Private Schools**

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### **Daycare Centers: Day Care Providers**

Source: Department of Health

Telephone: 212-676-2444

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

### **State Wetlands Data: Freshwater Wetlands**

Source: Department of Environmental Conservation

Telephone: 518-402-8961

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### **Scanned Digital USGS 7.5' Topographic Map (DRG)**

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## GEOCHECK® - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

700 EAST 241ST STREET  
700 EAST 241ST STREET  
BRONX, NY 10470

### TARGET PROPERTY COORDINATES

Latitude (North):	40.90338 - 40° 54' 12.2"
Longitude (West):	73.8503 - 73° 51' 1.1"
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	596836.1
UTM Y (Meters):	4528456.0
Elevation:	156 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map:	40073-H7 MOUNT VERNON, NY
Most Recent Revision:	1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### **FEMA FLOOD ZONE**

<u>Target Property County</u> BRONX, NY	<u>FEMA Flood Electronic Data</u> Not Available
Flood Plain Panel at Target Property:	Not Reported
Additional Panels in search area:	3609360010B 3609200005B

### **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u> MOUNT VERNON	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	---

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### ROCK STRATIGRAPHIC UNIT

#### GEOLOGIC AGE IDENTIFICATION

Era:	Paleozoic	Category:	Stratified Sequence
System:	Ordovician		
Series:	Middle Ordovician (Mohawkian)		
Code:	O2 (decoded above as Era, System & Series)		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	URBAN LAND
Soil Surface Texture:	variable
Hydrologic Group:	Not reported
Soil Drainage Class:	Not reported
Hydric Status:	Soil does not meet the requirements for a hydric soil.
Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 10 inches
Depth to Bedrock Max:	> 10 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Surficial Soil Types: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock  
very gravelly - loamy sand  
stratified  
sandy loam

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## AREA RADON INFORMATION

State Database: NY Radon

### Radon Test Results

Zip	Num Sites	< 4 Pci/L	>= 4 Pci/L	>= 20 Pci/L	Avg > 4 Pci/L	Max Pci/L
10470	2	2 (100%)	0 (0%)	0 (0%)	1.70	2.9

Federal EPA Radon Zone for BRONX County: 3

- Note: Zone 1 indoor average level > 4 pCi/L.  
 : Zone 2 indoor average level >= 2 pCi/L and <= 4 pCi/L.  
 : Zone 3 indoor average level < 2 pCi/L.

---

### Federal Area Radon Information for BRONX COUNTY, NY

Number of sites tested: 31

Area	Average Activity	% <4 pCi/L	% 4-20 pCi/L	% >20 pCi/L
Living Area	0.670 pCi/L	96%	4%	0%
Basement	1.110 pCi/L	42%	58%	0%

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### **USGS 7.5' Digital Elevation Model (DEM)**

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### **Scanned Digital USGS 7.5' Topographic Map (DRG)**

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

### **State Wetlands Data: Freshwater Wetlands**

Source: Department of Environmental Conservation

Telephone: 518-402-8961

## HYDROGEOLOGIC INFORMATION

### **AQUIFLOW<sup>R</sup> Information System**

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### **Geologic Age and Rock Stratigraphic Unit**

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### **STATSGO: State Soil Geographic Database**

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### **SSURGO: Soil Survey Geographic Database**

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### **PWS: Public Water Systems**

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### **PWS ENF: Public Water Systems Violation and Enforcement Data**

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### **USGS Water Wells: USGS National Water Inventory System (NWIS)**

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### **New York Public Water Wells**

Source: New York Department of Health

Telephone: 518-458-6731

## OTHER STATE DATABASE INFORMATION

#### **Oil and Gas Well Database**

Department of Environmental Conservation

Telephone: 518-402-8056

These files contain records, in the database, of wells that have been drilled.

### RADON

#### **State Database: NY Radon**

Source: Department of Health

Telephone: 518-402-7556

Radon Test Results

#### **Area Radon Information**

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey.

The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### **EPA Radon Zones**

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

#### **Airport Landing Facilities: Private and public use landing facilities**

Source: Federal Aviation Administration, 800-457-6656

#### **Epicenters: World earthquake epicenters, Richter 5 or greater**

Source: Department of Commerce, National Oceanic and Atmospheric Administration
